It has been long predicted that about 50 million Americans will be over 65 by the year 2040. That's why the Social Security Administration is looking for ways to make sure that the system can pay out the benefits that will be needed to support the growing number of people who will be dependent on the system.

The group is subdividing the method into a systematic flow chart (Fig. 1) and a decision tree (Fig. 2) for use by nurses to assist with the use of the Intentional Community. These materials, supplied by Dr. Mathison, are the first made available to nurses in the Atlantic and will be found to be most useful.

The Froths in Feeding Young
The first of April was the best time to visit the pond and see the young of the Froth hoppers. It has passed and the luteal stage is brought to its close. The twenty-five or thirty eggs are fastened to the water plants by their sticky ends. When the young hatch they ask for food. They will eat anything green and soft that comes near them.

The Froths in Feeding Young
I went out at nine o'clock on the 20th of April to find the Froth hoppers feeding their young. I found about a dozen of them sitting on the water plants. Each mother had from five to ten young ones. The young were all about half grown and were very active. They would jump up and down and move their legs as if they were trying to escape. The mothers were very patient and did not seem to mind being disturbed. They would wait until the young were back and then continue to feed them.

For a July 1969 issue, the author was asked to contribute a study on the "role of the father in the family." He did not want to write a theoretical paper, but he did want to write a paper that would be useful to the family therapist. He decided to write a paper on the role of the father in the family, and he did so.

The *Passions*, drawn from the East and West, Richard M. Coe.

It is hard to believe how completely a philosopher's sense of the meaning of his subject is expressed in the title of his book. *The Passions* is a translation of the work of a French philosopher, and the word "passions" is used in the French sense, to mean the emotions, the feelings, the impulses, the drives, the passions.

The federal government had a hard time getting the bill passed Tuesday by the House. The hard-liners are still rejecting over the return of their popular leader for they have seen of him able to find a cause who captured the work as a martyr as well as first income. But Suarez, who held the position of leader for a short time, is now at Mexico.
