OF INTEREST TO TEACHERS OF LINCOLN COUNTY.

Legal Excerpts Compiled By Lee H. Rudisille, County Supt. Of Schools.

The following information taken from the statutes of New Mexico is given for the guidance of those who teach in the Public Schools of Lincoln County.

By an act of the Territorial Legislature of 1891, a person legally qualified to teach in the public schools of New Mexico shall be one who has received a certificate according to the provisions therein contained and must possess a certificate of attendance upon some county or city normal institute held within the year; and must also hold a certificate from the county board showing freedom from tuberculosis.

Examinations for first and second class certificates are held only twice each year, on the last Friday in August and the last Friday in November. These examinations will be conducted by the county board of examiners, with examination papers on the examinations so held, and immediately thereafter send the papers of the applicants with the grade given them, to the Territorial Board of Education to be revised, if deemed proper.

This revision shall be final, and the county examiners shall upon notification immediately issue certificates in accordance with instructions from the territorial board of examiners.

All applicants receiving a general average grade as high as 90 per cent, and no grade in any one branch lower than 70 per cent, will receive a first class certificate entitling them to teach for three years throughout the territory. Those who receive a general average grade not lower than 70 per cent, and with no grade in any one branch lower than 60 per cent, will receive second class certificates entitling them to teach for two years within the county in which granted. These may be honored in other counties, at the discretion of superintendents of those counties, for the time specified in the certificates. The law provides for renewal, without examination, of only first class certificates.

In districts where Spanish is the only language spoken, it is required that teachers have knowledge of both Spanish and English.

County superintendents, members of school boards and county treasurers are prohibited from paying any other than legally qualified teachers upon penalty of a fine not less than $500 nor more than $5,000, for each and every offense, and may be removed from office by the governor.

Examinations for all grades of certificates will be given in the following branches: geography, arithmetic, English grammar, United States history, hygiene, and methods of teaching.

Examinations for third class certificates will be conducted, as formerly, by the county board of examiners and the certificates issued without supervision from the territorial board, and will be good for one year in this county only.

Section 1536, Compiled Laws, requires all teachers, to keep a daily register of their schools and at the end of each term make a report to the county superintendent showing the whole number of pupils enrolled during such term, giving their names, ages, sex, and branches taught, and such other information as may be deemed important. Failure to make such report may subject the teacher to fine in a sum not more than $50, upon conviction in any justice court.

A brief monthly report is also required to be made out in duplicate, one to be filed with the clerk of the district school board and the other sent to the county superintendent before warrants for salaries are paid by him. Daily registers and blanks for these reports will be furnished by the county and issued by the clerks of the several districts.

The territorial board of education is vested with exclusive power in the matter of prescribing the text books to be issued in the public schools of the territory.

An act of the last legislature makes it a misdemeanor, punishable by fine or imprisonment, for any person to write, make marks upon, or in any manner deface or injure any building, fence, wall, or inclosure, or the furniture; apparatus or fixtures therein, belonging to any school district; all teachers are specially required to warn their pupils against any violation of this law, particularly as to defacing school furniture and obscene writing on walls and out buildings.

The last legislature also enacted a law prohibiting the killing of any song bird and all birds known as harmless and whose principal food is insects, by fixing a penalty for every bird wantonly killed. Teachers are required to impress upon their pupils the cruelty and criminality of this offense.

LEE H. RUDISILLE.
County Superintendent.

WHY REFORMS FAIL.

Prof. Felix Adler, assessed for $5,000 in personal property, has given sworn affidavits of his taxes. He seeks to have these affidavits held, and the assessments stand. The memorable thing about this fact is that professor Adler is a member of the reform committee of fifteen.

The majority of the members of that committee have sworn off their personal taxes. Mr. Charles Swaugus Smith and Mr. Joe D. Erhart, assessed at $25,000 apiece, have sworn that they have no taxable personal property at all.

Mr. Austin G. Fox and Mr. John Hansen Rhoades, assessed at $30,000 and $50,000 respectively have sworn to the same thing.

Mr. George Putnam was assessed at $200,000 admits $2,000 and swears $96,000. Mr. John S. Kennedy owns up to $25,000 of his $100,000 assessments. Prof. Edwin R. A. Seilgman is willing to pay taxes on $16,000 out of the $250,000 attributed to him by the assessors. Mr. Jacob Schif has substituted a valuation of $150,000 for one of $1,000,000.

These things help to answer the question why reform movements fail. Invariably, sooner or later, they run up against the same business interests of the reformers. It is a well-known fact that the leading citizens" of New York, as of every city, are the men who carry out the great schemes of corruption which ward politicians are the errand boys. Any investigation pushed to a certain point reaches these leading citizens, and then it stops.

Swearing off taxes is a very venial offense compared with some others that are committed by our most respectable citizens, as would be clearly manifest if we ever had a genuine investigation into the question of vice in the tenements or into the genesis of the tunnel contracts.

But Al Johnson is dead—New York Journal.

THE WEATHER.

Rev. Ir. E. Hicks the noted weather prophet, says the entire summer will be unusually hot, very encouraging to the sweltering inhabitants of all portions of the land except in the high altitudes of the mountain regions. In localities like that of Raton hot weather is an unknown condition. Rev. Hicks says:

"There is a reason for everything that happens in nature. If this summer is different from last summer there must be some explanation for the change. For the past ten years or more we have been continually calling the attention of the public to the fact that the present year would be phenomenal in more ways than one. I have said that there would be a great drought and verification of the prediction is found in the conditions which exist today in all parts of the country. The reason is, that this season is a Jupiter period. The relationship between Jupiter and Saturn is of a peculiar nature. No man now living will ever see them in their present relationship again. The bright star which we see in the heavens in the evening, the brightest star in the firmament, is Jupiter, and near it Saturn may be seen. They will not come so close together again, under present conditions, for many years. It is to this phenomenon that I ascribe the intense hot summer, and as these planets move more slowly their influence will be felt through the entire season."—Gazette.

SPANIARD COMMENDS SCHLEY.

Captain Moreau, who commanded the Christohal Colon in the Santiago fight, says that Schley and the Brooklyn were the bravest of the brave. They were always in the thickest of the fray. "The suggestion that Schley displayed cowardice must have come from cowards," says he.

MONUMENT FOR JOHNSTON.

The Confederate Veterans and Daughters of the Confederacy are working hard to have Governor Sayers ask the legislature at its special session to appropriate money for a monument over the neglected grave of Albert Sidney Johnston. He fought in the Texas-Mexican war, the United States Mexican war, and on the Confederate side in the civil war, meeting death in battle.
RECORD'S SPECIAL OUT.

The special illustrated edition of the Industrial Record, El Paso Mining Journal, is out, and is a record of great credit to its authors. The mining camps of New Mexico receive a bold mention in this special. The White Oaks country has been given the most thorough and impartial write-up it has ever had. The Record's friends in this country are numbered by a poll of the inhabitants. The paper has done us a good service, let us return it by doing the Return a good turn when opportunity comes.

ADDITIONAL LOCAL.

The ball at Hotel Baxter Saturday night was much enjoyed by those who attended. McPherson and Chittenden have contracted about 20,000 feet of lumber at Santa Rosa. Four outfits were loaded in the yards here yesterday for that place. The oil company represented by E. S. Brown is getting in a diamond drill, and will immediately begin prospecting holdings in the Potosi district east of town.

TEACHERS ELECTED.

The school board held a meeting Wednesday evening for the purpose of electing teachers for the ensuing school year. J. F. Wharton, brother of J. E. and S. M. Wharton, and late principal of the De Leon high school, at De Leon Texas, was elected principal; Mrs. Jno. A. Hollars, first assistant and Miss Mabel Walsh second assistant. The opening term will begin the first Monday in September.

BAPTIST ASSOCIATION.

The following ministers will be present at the opening of the Baptist Association at the Congregational church to-night: Rev. Geo. H. Brewer, General Missionary, Albuquerque; Rev. C. A. Taylor, principal Baptist College at Alamogordo; Rev. W. C. Rocho, Alamogordo; Rev. H. P. Powell, Carlsbad; Rev. C. A. McIver, Weed; Rev. Newbrough, Cloudcroft; Rev. R. P. Pope, Cloudcroft; Judge A. Green, Carlsbad.

PAYMASTER LICKED.

Constable John Owen came in yesterday from the railroad line, having in custody Wm. Forrestor, who is charged with assault on the person of paymaster, H. C. Miller. It seems that Miller and Forrestor had some difficulty over money due Forrestor, and Miller slapped Forrestor when the latter drew his six-shooter and laid it with considerable force on the head of Miller resulting in a deep scalp wound.

Forrestor went before Judge Collier and pleaded guilty, as charged, and was fined $100, and costs of suit, in default of which he now languishes in the bastile.

THURSDAY AUGUST 8, 1901.

A halftone of Governor Otero should be printed on the American flag, according to the New Mexican's idea of his importance. The New Mexicans say: "Governor Otero and the American flag seems to have one quality in common. They are still here in spite of many efforts to the contrary.

It has been given out from the official figures that the shrinking of taxes in New Mexico has been enormous. The assessed valuation last year shows a reduction of $4,000,000. In the item of sheep alone it is well known that there are over 5,000,000 sheep in the Territory. The records show over 4,500,000, yet only 1,500,000 are returned for taxation. This is also true of other live stock. There are thousands of cattle un-assessed in the Territory.

Judge Daniel H. McMillan has a column and a half write-up of what he has done in New Mexico, in the Buffalo Evening News, a paper published in his home town. The Judge is not very much concerned on one way or another about Judge McMillan, or what he or any other carpet-bagger, has done in New Mexico; but from a standpoint of morality, New Mexico would probably be as well off without him. According to his reputation at Lincoln and Roswell terms of district court, one would naturally infer that he is more fitted for superintendence of a Mormon colony than to direct a court of justice. Such is life, however, in New Mexico.

UP AGAINST IT.

Eddy county is having, or going to have trouble in the perfecting of title to property sold for taxes last year. The trouble seems to have originated from the erroneous advertisement of delinquent taxes. It has been a subject of complaint to the county for months, and the grand jury during the county's last court recommended that the sale be set aside and the delinquent tax list revised so as to comply with the law.

GREAT MIDSUMMER CLEARING SALE.

EVERY article of Summer Wear, will be closed out regardless of Cost. Don't fail to take advantage of this opportunity. Still three months of warm weather to come.

FRESH FRUIT Always in Stock.

School of Mines

FALL SESSION BEGINS SEPT. 9, 1901.

Regular Degree Courses of Study:
I. Chemistry and Metallurgy
II. Mining Engineering
III. Civil Engineering

Special courses are offered in Agricultural Chemistry and Surveying.

A PREPARATORY COURSE is arranged for the benefit of those who have not the necessary preparation before coming to the School of Mines.

Further information for preparatory course, can be had for the technical course.

There is a great demand at good salaries for Young men with a technical knowledge of mining.

For particulars Address
F. A. JONES, Director.

White Oaks Passenger Line.

Passengers carried to White Oaks and any part of the country on the shortest notice.

Address—White Oaks, N. M.

PAUL MAYER, PROPRIETOR.
A. H. Rockenfielder's family, of Roswell, is now occupying one of P. G. Peters' summer cottages here.

Plums and blackberries are now just beginning to ripen; apples and pears, that have been well cultivated and irrigated, are fine and a full crop.

The strawberries, gooseberries and early peaches are all gone, and it will be about a month before the late peaches will be ripe. One late variety of cherries at the Willows, will hold good till the 15th; that makes a three-months season for this delectable fruit. It is astonishing the quantity of cherries the birds can get away with, which reduces the income one-half per tree in an orchard of one hundred trees.

COAL TAR.

We are told that the waste of coal after the gas has been extracted produces a gas tar, which yields a series of dyes of unrivalled beauty; scarlet, violet, orange and magenta, and that eighty-nine separate tints are obtained by the judicious blending of these colors. Pretty much all of the coloring used by fabric manufacturers, now-a-days, are the product of this gas tar, popularly known as aniline dyes. Seventeen medicines are the product of coal tar; about a dozen perfumes, scents that are known by the name of the flowers they are extracted from; vanilla for flavoring custards and puddings is a product of coal. Besides these dyes and scents, coal tar yields a substance called saccharine, one pound of which is equal to two hundred weight of sugar. It is wholesome and a capital disinfectant. Preserves made of it will keep indefinitely.

With the many discoveries of late years and the heavy beds of coal, Lincoln county has, of numerous varieties, who knows what industries will be carried on here in a decade or two hence? With this, you see, Lincoln county needs an academy, where chemistry, the natural sciences and mechanical arts can be taught, with Latin and modern languages; English literature and ancient history, which is largely tables feet to the dogs.

A gang of Mexican horse thieves are said to be giving the railroad contractors a good deal of trouble along the line of construction. A few days ago a contractor discovered that six head of horses were gone, and in company with his dumpy hound the trail was started with guns in pursuit. They returned later in the day with the horses—no information was asked or given as to what was done with the thieves.

GALLINA CAMP,
Correspondence
A D. Long of Albuquerque is in the camp prospecting.
C. M. Bryan had a fine 8 pound boy presented him by his wife on the 9th alt.
C. M. Bryan, J. P. Palmer and F. O. Hostetler went to White Oaks for supplies last week.
Lawrence Barrett has secured a large order from ores taken from his new group that show values of 22 dollars per ton.
An Alamogordo company, composed of John Hunter, John Kennedy and James A., are prospecting here. They want copper. McBoon and Webster have struck good copper ore on the River. The shaft is 20 feet deep, the lead shows both copper and lead.

Mark Thomas is expected here next week with a drilling outfit. He has been engaged by a number of the local inhabitants to sink a well for mutual benefit.
Hansel has returned from Alamogordo, and has begun the assessment on his various claims. He anticipates getting in machinery for regular development as soon as conditions will warrant it.
Pueblo parties are expected to arrive here next week to examine a group of prospects near to local prospectors. Claims are reasonably certain that they will invest, and begin operations for development.

Watch the Gallinas. This is the coming mining district of this section of New Mexico, and railroad facilities will soon be such that capital can be induced to take hold, and develop our prospects into mining mines.
There was a Jewell—Barrett scrap here after our last letter, and the principals thought no professionals, are way-up amateurs. The energy expended in settling the difficulties between them properly directed against the English would have aided materially in making Oon Paul major of London, or failing that, would at least have made Lord Roberts' endowment by the English parliament double the 100,000 pounds given him.

GENERAL NEWS ITEMS.

W. J. Blanmer is still the leading celery farmer of the Pecos Valley. He has just completed the planting of 240,000 plants on eight and one-half acres.
A. T. Gunter has sold his ranch of 240 acres near Lower Penasco to Tom Catenhead for $8,000. Mr. Catenhead was a resident of Chavez county in the '90s, but came recently from Oklahoma.—Rowell Record.
The work of changing the 60-pound rail used on the E.P. & N. E. some distance out of El Paso to 70-pound rail, the standard of the American Society of Engineers, has been completed, and now the weight of rail is uniform as far as the Pecos river will be of 70-pound rail—and makes the E.P. & N. E. one of the best roadbeds in the West.—Alamosa News.

Someone has discovered that sun stroke is also the work of a microbe of peculiar shape and kind. It only remains now to find the one which causes people to freeze to death in winter time, remarks the Chicago News. The germ which invades the physical anatomy that has been lighted upon by the fasciculus that plays havoc with persons who are run over by railway trains can be hunted up and identified later.—Optic.

SANTA ROSA.
A. P. Jackson is out of town on a trip over the extension. He is visiting Santa Rosa, where the E. P. & N. E. and Rock Island connect, and liberty, whence an extension will be built from the Rock Island to the Dawson coal fields. Mr. Jackson, if he finds conditions favorable, will put in another camp at each place. Mr. Jackson in a letter just at hand says it is a fine country between White Oaks and Santa Rosa, though of course it is not settled. It is filled with cedar and cotton, and there is plenty of grass. It will be a fine stock country when water is developed, and the railroad company is proving that water can be had. Mr. Jackson says there is a fine well of water fifteen miles from Halibam’s camp.—Alamosaga News.
Santa Rosa has at present fourteen saloons, five restaurants and lunch counters and a hotel, three barber shops and a livery stable, and three stores at the various camps, which goes to show that she is picking up quite lively.

Drying preparations simply develop dry ethers; they dry up the narcotics, which adhere to the alimentary and digestive tracts, causing for more serious intoxication than the ordinary forms of ethers. Avoid all drying inhalants, fumes, smoke and odors which dissipate the vital nervous and bodily. Ely’s Cream Balm is such a remedy and will cure coughs as cold in the head easily and permanently. A trial box will be mailed for 25 cents. All druggists and the 50c. men. By Edwards. 56 Washington Street, N. Y.
The Balm causes no pain, does not irritate the throat. It stimulates the irritant and soothes the inflamed. Ely’s Cream Balm with the application of the warm hand. With Ely’s Cream Balm you are armed against Nast Cough and Hay Fever.

A GREAT NEWSPAPER.
The Sunday edition of The St. Louis Republic is a marvel of modern newspaper enterprise. The organization of its new service is worldwide, complete in every department; in fact, superior to that of any other newspaper.
The magazine section is illustrated in daintily tinted colors and splendid half-tone pictures. This section contains more high-class literary matter than any of the monthly magazines. The fashions illustrated in natural colors are especially valuable to the ladies.
The colored comic section is a genuine laugh-maker. The funny cartoons are by the best artists. The humorous stories are high class, by authors of national reputation.
Sheet music, a high-class, popular song, is furnished free every Sunday in The Republic.
The price of The Sunday Republic by mail one year is $2.00. For sale by news dealers.

The New York World
THIRTEEN-WEEK EDITION.
The Most Widely Read Newspaper in America.

Time has demonstrated that the Thirteen-Week World stands alone. Of papers that haveimitated its form but not its success. This is because it tells all the news all the time and tells it impartially, whether that news be political or otherwise. It is in fact almost a dupe at the price of a weekly and you cannot afford to be without it.

Republican and Democrat alike can read the Thirteen-Week World with absolute confidence in its truth.

In addition to news, it publishes first-class serial stories and other features suited to the home and fireside.

The Thirteen-Week World's regular subscription price is only $1.00 per year and this pays for 156 papers. We offer this unique newspaper and Wurty Thirteen-Week together one year for $2.00.

The regular subscription price of the two papers is $2.50.

SHERIFF'S EXECUTION SALE.
George B. Pfeiffer, Clerk.

The execution sale of the property of John McConaughy, by virtue of a Writ of Execution issued out of the Honorable District Court of Los Angeles County, was held on Tuesday, the 25th day of November, in the above-mentioned Court, in which W. Potter, Petersen & Co., Attorneys, were Executors, for the sum of Eight Thousand Five Hundred Dollars, to be paid together with interest at five percent per annum, from the day of July, A.D. 1899, and until paid, on the last day of July, A.D. 1900, being upon a 10-acre lot in the heart of Los Angeles on the 10th day of August, A.D. 1895, in form of the post office of the town of Whittier, California, and in which such property is located.

A. J. JACOBS.
By Charles D. Meyer, Deputy Sheriff.

MUCH READING FOR LITTLE MONEY.
The New York World has got the cost of printing down to a minimum. Its latest offer of its monthly newspaper magazine is interesting if from no other cause than that it shows the name of "how much for how little." The Monthly World is a 32-page magazine with colored pages. Its population is the most of the pages of the Ladies' Home Journal, and it is capably illustrated in half-tone. The illustrations are the result of the best artistic skill, and by all the latest printing press apparatus, making a magazine unrivaled in the quality of its contents and its appearance.

Each issue contains stories of romance, love, adventure, travel; stories of fact and fancy; stories of things quaint and curious, gathered together from all over the world; the results of scientific research and editorial reviews. It numbers amongst its contributors, the leading literary men and women of the day.

A feature each month is a full-page portrait of the most famed man or woman of the moment in the public eye.

In collecting and preparing for publication the literary matter and art subjects for the Monthly World no expense is spared.

The New York World will send six numbers of this newspaper magazine on receipt of fifteen cents in stamps, Address The World, Publisher Building, New York.

TWO-WEEKS REPUBLIC.
Every Monday and Thursday a newspaper as good as a magazine—and better, for it contains the latest news of the world as well as the most interesting stories—is sent to the subscriber of the Thirteen-Week Republic which is only $1 a year.

The man who reads this paper knows all about affairs political, domestic and foreign events; is posted about the markets and commercial matters generally.

The woman who reads the Republic gathers a bit of information about how she should dress and how she should festoon and festoon the firesides, and the stories that come under both the headings of fact and fiction.

There is gossip about new books and a dozen other topics of especial interest to the wide-wake man or woman.

THE EAGLE'S CLUBBING RATES.
To subscribers paying one year in advance for the Eagle the following clubbing rates are offered: Eagle and Thirteenth Week World, $1.00.

1. St. Louis Republic, 2.00

2. Weekly Republic, 3.00

3. Mines and Minerals, 4.00

4. Telegraph, 6.00

5. Expansor, 1.00

This offer applies to old subscribers renewing their subscription to the Eagle and paying one year in advance also to new subscribers paying one year in advance.

The regular subscription to these papers is largely in excess of the clubbing rate given above, and any one desiring to secure two papers (the Eagle and any one of the others named) for a little more than the price of one should take advantage of this liberal offer.

Editor, E. O. Creighton, of the Roswell Record is engaging extensively in various industrial enterprises in the Deacs Valley, his latest ventures are meat growing and oil stocks.

MINERALS ENTRIES WITHIN FIFTY MILES OF THE RESERVES.

In view of the proposed forest reservation in Josephine, Douglas, Coos and Curry counties the following extract from a circular issued by the department of the interior June 24, 1899, will no doubt be of interest to our readers:

"The law provides that 'any mineral lands in any forest reservation which have been or may be shown to be such, and subject to entry under the existing mining laws of the States and the rules and regulations applying thereto, shall continue to be subject to such entry and entry,' notwithstanding the reservation. This makes mineral lands in the forest reserve subject to location and entry under such general mining laws in the usual manner.

"Owners of valid mining locations made and held in good faith under the mining laws of the United States and the regulations thereunder to which they and their successors shall be subject, are entitled to their claims, and minerals, minerals, including such claims and minerals, as may be of mineral value, to the same extent and under the same conditions and proceedings as if said location were not in a forest reservation. This provision is limited to persons resident in forest reservations who have not a sufficient supply of timber or stone on their own claims or lands for the purposes enumerated, or for necessary use in developing the mineral or other natural resources of the lands owned or occupied by them. Such persons, therefore, are permitted to take timber and stone from public lands in the forest reservations under the terms of the law above quoted, strictly for the individual use of their own claims or lands owned or occupied by them, but not for sale or disposal, or use on other lands, or by other persons. Provided, that where the stumpage value exceeds $100, application must be made to and permission given by the department."—Oregon Mining Journal.

Christians are again in danger of being boxed around in China. It is sometimes very troublesome to be good.

DIVIDED A THOUSAND PER CENT.

The First National bank, which recently increased its capital from a half million to ten million dollars, has declared a dividend understood to be between three and five million dollars.

The latter figure is equivalent to a thousand per cent on the old stock.

ORDER OF THE GARTER.
Hereafter no woman will be a genuine snob unless she wears a garter in her arm.

Edward VII. has conferred upon his royal consort, Queen Alexandra, the most noble Order of the Garter, and on the first formal appearance she will be expected to wear it upon her arm instead of elsewhere.—William E. Curtis' London Letter.

SHEEP ARE IN DEMAND.

Sheep seem to be in demand just at the present time, notwithstanding declining bobbyard tendencies. In the last two weeks not less than fifteen men have been in the valley, coming from all portions of the United States, but the amount of their purchases have been nil. They have not been willing to pay the figure asked for good stuff, and for the most part have drifted down into the San Angelo country, Roswell Record.

OF INTEREST TO STOCKMEN.
The Live Stock Inspector at Woodward, Okla., and Kansas City, Mo., issue of July 15, 1901, publishes a cut of "Advance," together with parties interested in the sale of this highest priced beef steer ever sold in the world. The animal was owned, bred and exhibited by Stanley R. Pierce of Creston, Ohio county. Ill.; age is thirteen years; weighs 1,450 pounds; price, $150 per hundred; amount, 2145. The sale was made by J. D. Bowles, president of the Bank of Stock Commission association, well known in the Southwest.

A PRINCELY ESTATE.
W. J. Wilson has completed a map of the W. E. Washington lands south of Hagerman. This map shows Mr. Washington's real estate holdings in that locality to consist of 10,640 acres. And though the map does not show it, the fact may be added that it yields about fifteen dollars with good stock of cattle and horses.—Roswell Record.

COCHITI GOLD.
One of Cochiti's mines has this year produced $60,000,000 in gold bullion, a sum greater than official figures of the United States credit to the entire territory.
