Education Day

by Amy Weig Pickering on October 5th, 2019 |

The Public Access team created a poster for Education Day which featured our **Virtual Reality Lab**. The poster highlighted a variety of applications where virtual reality can be utilized in all aspects of medical education. Faculty, staff and students were able to participate in workshops and presentations which featured resources that focus on the scope of education innovation within the Health Sciences Center (HSC).

HSLIC faculty and staff are eager to collaborate with other HSC departments to encourage integration of this technology into existing curricula and open a dialog regarding future projects, application purchases and the possibility of developing custom applications.

The poster can be found in the Health Sciences Center Digital Repository.
