Spectacles Once a Sign of Wealth.

Spectacles were invented in Italy about 1285. They were at first very expensive, so were worn only by wealthy persons or noblemen and so came to be regarded as a mark of rank. The larger the spectacles the higher the rank, and so the glasses grew to prodigious size. There are two or three busts extant of Italian gentlemen wearing "specs," and in one of these cases the lenses are three inches in diameter.

Burma Excels in Rice Growing.

Burma is the world's great rice-exporting center, and Rangoon is the chief rice port in the world. The amount of rice exported each year from the four ports of Burma is about equal to that shipped from Siam and French Indo-China combined, and the export from Rangoon is nearly equal to the combined export from the ports of Saigon and Bangkok.

Couldn't Prove It by Him.

Lyle was the owner of a puppy of which he was fond. So when the dog became sick and had to be killed everything possible was done to keep Lyle from hearing of it. Some time afterward I went to call on his mother, and, not knowing of the dog's fate, I asked Lyle where it was. "Oh," he said, "It's dead, I guess, but I don't know it."—Chicago Tribune.

Advance the Result of Experience.

The world's advance is due only to the hopes, the plans, the progress and the work of living men and women who have tasted of the waters of life for themselves and know what it is to live and are determined that the rest of the world shall have life more abundantly.

Beginning of Postal Systems.

The complete organization of a system of postal communication in England did not take place till the reign of James I (1606). Doctor Franklin was the father of the present gigantic postal system in the United States.

Orchid's Drinking Tube.

One of South America's curiosities is an orchid which has a peculiar tube that it lets down into the water when it wants a drink. At other times it is kept curled up.

Dry Town and Dry Vegetables.

A dehydrated or dry vegetable is one from which all the water has been extracted, but a dry town is a town where there's nothing but water.—Portland Press.

A Plea.

"And why should I give you a kiss?" "Scientists say a man needs sweets." "What of it?" "I'm going without sugar. Now's your time to encourage patriotism, girlie."

Sense of Relief.

"How did the shortage of gasoline affect you?" "Well," replied Mr. Chuggins, "it was a kind of comfort to know offhand exactly why the old machine wouldn't run."

Care of Flutes.

Flutes sometimes suffer from any abrupt change in the weather, and should therefore be kept in camoels leather.

Coconut Butter.

European factories each week make about 16,000,000 pounds of artificial butter with coconut oil as a base.

To The People Of Roosevelt County

The first six months in each year is the busy time in the office of the County Assessor, consequently, I may be unable to see you as I would like. The reason why your bank declines to loan you as much money on the same collateral as some one else has offered, is generally because they do not want any strained credits and consequent foreclosures, even though the profits are large for the bank. We have some examples of overloaned foreclosures in our community and we know of others pending. We want your business but we want it safe for you and safe for us; we realize this is no time to take long chances and foreclosures are unpleasant. This bank is for the benefit of the entire community as well as the stockholders, and we will be glad to talk with you about that loan you want on a conservative basis.

RED CROSS NOTES.

We wish to have every one look up their bits of yarn—any color, any size, any amount. If you do not knit please give to some number of Red Cross class. About 40 squares have been knitted. We wish to finish by next Friday, March first.

We will in the near future have the mothers meet with the Red Cross class.

When wash day comes don't forget the old rags which you're going to wash up for your rag sack. For 1 1-2 lbs. of these will make an ambulance pillow, which is badly needed at the front now.

We have no charter here but we think the mothers can do their bit by co-operating with the junior class.

Dr. J. F. Garmany

Dr. J. F. Garmany is a candidate for the office of county commissioner for the third precinct.

In asking for this office he desires to call the attention of the voters to his record during many years of residence here to his well known views on sanitation. He was city health officer for the town of Portal for some three or four years, and during his term of office he so thoroughly cleaned the town that sickness, due to unsanitary conditions and flies was practically eradicated. He promises that should he be selected as commissioner to use his influence in putting the entire county in just as perfect a sanitary condition as it may be possible to do. He also desires to say that he will hold every effort toward securing a trenchment and drainage will not, in any event, give rise to waste or extra expense. He is an old resident of Roosevelt county, having been a voter in this district for ten years, and a heavy taxpayer and asks that you give his candidacy your thought and consideration.

Dr. Coats, government veterinarian came up from Roswell, to superintend the dipping of cattle at the Littlefield ranch this week.

School Notes.

The school turned out in mass to attend the patriotic speaking at the hall last Friday.

The high school is in possession of the pennant, as usual.

C. M. Selsor took a picture of the school Wednesday. The rather cold weather prevented several from being in attendance, we regret to say.

Literary last Saturday evening was well attended and highly appreciated by all present.

Our next question for debate is, Resolved, that ten thousand dollars from an economic standpoint, is worth more to a young man of 21, than is a high school education.
