Biomedical Informatics Seminar Series Presents: Shamsi Berry, PhD & Heather Edgar, PhD

by Tamara Wheeler on March 4th, 2019 | [o Comments](#)

Mark your calendars for Thursday, March 7, 2019 in room 228 at the Health Sciences Library & Informatics Center from 10-11 AM for a pivotal seminar on *NMDID: Development of a Large-Scale, Whole-Body CT Image Database*

by Shamsi Berry, PhD and Heather

Edgar, PhD.

Dr. Berry is a former Informatics Research Fellow at the Health Sciences Library and Dr. Edgar is a current Associate Anthropology Professor at UNM and a Forensic Anthropologist with the Office of the Medical Investigator (OMI).

The Office of the Medical Examiner received a grant in 2010 to CT scan any decedent that underwent an autopsy. In 2016, a grant was awarded to make those CT scans useable to the widest variety of researchers. The database will include 15,249 full body CT scans with associated health and lifestyle data. This seminar will review the project as well as the data standards that can be selected for a large

database. The benefits to creating a database with CT images and associated health and lifestyle information will also be discussed.

For a complete list of speakers and dates, please visit https://hslic.unm.edu/bmi/docs/BioMISS_Schedule_2018-19.pdf.
