## Student Presentations - PowerPoint design using an evidence-based approach

by Sarah Morley on October 22nd, 2018 | [o Comments](#)

Did you know that there is a research basis for designing PowerPoint slides to enhance audience learning rather than being subjected to volleys of bullet points and ineffective graphics? You know you hate it when instructors kill you with slides so don't make the same mistake during your class presentation. Associate Professor James Nawarskas will present tips for creating engaging slide presentations. This workshop will take place on Wednesday 10/24 in the Library's 428 classroom from 12:10 - 12:50 p.m. Come to this session - your classmates will thank you.
