What a lot of argument there used to be about a woman driving an automobile

TODAY she can "make a train" or fix a tire as well as anybody.

As soon as a luxury becomes a necessity the point of view changes. II

Two or three years ago you would have listened to more varying opinions about tires than you could shake a stick at. Mileages, construction, treads and whatnot.

It's different now. Tire users are working towards a unanimous feeling.

You express it one waythe man down the street another. But sifted down it amounts to this:

That the only way to settle

Select your tires according to the roads they have to travel: In sandy or hilly country, wherever the going is apt to be heavy - The U. S. Nobby.

your tire problem is to get a tire of known value and stick to it.

Ш

We recommend and sell U.S. Tires because their value is known.

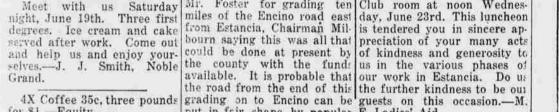

There's no guess about it.

It was the U.S. quality policy which led to the perfection of the straight-side automobile tire, the pneumatic truck tire-two of the greatest additions to tire value that have ever been made.

As representatives of the oldest and largest rubber concern in the world, we are in a position to tell you something about tire values. Come in some day and talk to us.

Our stock room is full of Genuine Ford Parts. We have enough parts to build a Ford from, the ground Then, too, those parts are Ford-made. They are exact duplicates of the original parts now in your car, and will give the same constant hard wear.

Our shop is equipped with up-to-the-minute tools and machinery especially designed so that we can prop-erly and promptly take care of your repair workfrom a minor adjustment to a complete overhaul. And the mechanics who will work on your car understand the Ford mechanism and know the Ford way to make repairs.

We not only give Ford service but sell Ford cars and Ford trucks, so it is easy to understand that we have more than a passing interest in your car. Be on the safe side of dependable repairs.
