ALBUQUERQUE, NEW MEXICO, SATURDAY JUNE 18, 1904.

NUMBER 136

THE FINAL SESSION

United States Court of Private Land Claims at Santa Fe.

WILL ADJOURN SINE DIE

The court of private land claims met for its final session yesterday forenoon in the court room of the federal building, at Santa Fe. On the bench were Chief Justice Reed and Associate Justices Sims, Stone and Murray, Justice Osborne being absent. The court officials present were: United States Attorney Matthew G. Reynolds; Clerk Irenes L. Chavez; Stenographer Francisco Delgado; Interpreter Basilio Chacon and Deputy United States Marshal George A. Kessman.

There were also present Judge James H. Reeder, of Hays, Kansas, formerly clerk of the court; Judge William H. Pope, formerly assistant United States attorney of the court, and L. P. Parker, Jr., at one time stenographer of the court and now mayor of Santa Fe, Indian Territory. Upon motion of United States Attorney Matthew G. Reynolds and upon invitation of the court, Judge Reeder and Judge Pope took places upon the bench. L. P. Parker, Jr., was admitted to practice before the court upon motion of Mr. Reynolds, his to be the honor of having been the last attorney so admitted, before the court went out of existence. A number of members of the local bar and other visitors were also in attendance.

The survey of the San Miguel del Bado grant, case No. 25, was approved by the court. The grant is situated in San Miguel county, consisting of ten tracts, the total area being 5,924.39 acres. The claimants are Julian Sandoval et al.

In case No. 165, involving the Santa Teresa grant in Dona Ana county, near El Paso, the claimants entered an objection to the survey on account of an alleged discrepancy in the survey of the New Mexico-Texas boundary, but the court overruled this objection and approved the survey. The grant covers 8,478.51 acres. M. R. Pendell, et al. are the claimants.

In cases Nos. 150 and 151, the Refugio Colony grant, consisting of two tracts of land in Dona Ana county, with a total acreage of 11,524.39 acres, the claimants through their attorney, H. B. Holt, objected to the confirmation of the survey made by Deputy United States Surveyors Clayton G. Coleman and Wendell V. Hall, setting forth that the survey was carelessly and negligently made and that the bed of the Rio Grande in 1852, the eastern boundary of the grant, was not accurately surveyed. They presented a number of affidavits of old residents and surveyors. The matter was argued by counsel, Mr. Reynolds for the government, maintaining that the claimants had slept upon their rights and he questioned their motive in objecting to the survey at the last hour and almost the last minute. He claimed that the survey had been a fair one and that if the matter could be brought up again, the claimants of the grant would have a rocky road to travel to establish their title to the grant. Mr. Holt answered by pointing out that the claimants had been lax in prosecuting their rights and that their motives were prompted by desire for justice.

After Mr. Holt had concluded, the court adjourned until 2 o'clock yesterday afternoon.

Upon the reconvening of the court yesterday afternoon Chief Justice Reed announced that the court overruled the objection of the claimants in the Refugio Colony grant case and that it confirmed the survey.

The closing scenes of the session were impressive and dignified. Addresses were made by United States Attorney Matthew G. Reynolds of St. Louis; John H. Knaebel, of Denver; Solicitor General Edward L. Harrell, of Santa Fe; Judge William H. Pope of Howell; Judge J. H. Reeder of Kansas, and Chief Justice Joseph R. Reed of St. Louis, Iowa, and Justices Murray, Stone and Sims. In reviewing the work of the court, its officials and its attaches, paying high tributes to those connected with it, and giving reminiscences and incidents humorous and tender the court was adjourned sine die this afternoon.

Tears, Idle Tears.

Ex-Secretary Milhu Root was talking about the humanity of judges, according to the New York Tribune. "They are human men," he said. "I could tell you many moving stories of the pain that they have suffered in the infliction of severe sentences. It is not altogether pleasant to be a judge."

"That is why I cannot credit a story that was told me the other day about a judge in the west. A criminal on trial before this man had been

found guilty. He was told to rise, and the judge said to him: "Have you ever been sentenced to imprisonment before?"

"No, your honor," said the criminal, and he burst into tears. "Well," said the judge, "don't cry. You're going to be now."

Printers' Queer Errors.

To the many instances given to typographical errors, which, like the poor, are always with us, we add the following:

Horace Greeley was noted for his wretched writing, which puzzled many a printer. Once he wrote, "The true, 'tis pity, and pity 'tis 'tis true," quoted from Shakespeare. It appeared the next day. "The two, 'tis pity, 'tis pity, 'tis pity-two."

Bishop W. A. Chandler was once advancing a more liberal lesson of the purse strings and told his audience that several years ago he sent an article to a paper in which he said: "We pray too loud and work too little." The compositor, consciously or unconsciously, perpetuated a little joke, for when the article appeared it read: "We pray too loud and work too little." "I let it go at that," said the bishop. "The fact is, I believe the printer was right, and I never ventured to correct him."—Tid-Bits.

GRANT COUNTY CONDITIONS

W. H. NEWCOMB OF SILVER CITY, THINKS THEY ARE ALL RIGHT—GRATIFYING ACTIVITY IN MINING CIRCLES.

Judge W. H. Newcomb of Silver City, who was at Santa Fe, to attend a meeting of the penitentiary commissioners, he being a member of the commission, passed through the city home bound last night. When interviewed he had the following to say in regard to conditions in Grant county:

"The conditions prevailing in Grant county at the present time are good in almost every respect. It is true that the lack of rain will be felt by the cultivation to some extent, but there have been, and will be, no such losses as have been stated by those who have misrepresented matters for reasons best known to themselves.

"The Colorado Fuel and Iron Company expects to resume shipments of iron ore from Hanover Gulch to Pueblo on June 15, with a daily output of from 700 to 800 tons. Mr. Laughlin, Manager of the Comanche Mining and Smelting company, who has been on a trip to Denver to arrange for machinery to complete a large smelting plant destroyed by fire in July of last year, has returned to Silver City. He expects to have a 200-ton plant in operation by the first of the year. His company will enlarge from time to time as business warrants.

"In the Burro mountains a large concentrating plant is nearly completed and the Leopards of Chicago hope to have it ready to run inside the next 90 days. They have secured control of the Sampson group, the St. Louis group, and several other claims and propose to operate them for all they are worth. T. E. Carter is their manager, and to him will be due all the credit of carrying the enterprise to a successful issue.

"Politics are somewhat lively in Grant county among those who want office. Our democratic friends are objecting to a long campaign while the republicans think that two months will be about the proper time to properly canvass the county. It looks as if the republicans will win about all there is in sight this year. Silver City has a new administration. Arthur H. Goodell is mayor and has taken hold of the position like an old hand.

"The Hoarst properties at Pinos Altos, that were reported as unprofitable are paying well under the leasing system, and an option has been secured by Californians on the entire property, the first payment falling due on July 1st.

"Business conditions in Silver City are excellent, as is also the fruit crop on the Mimbres river. The people of that section are deserving of all the aid that was promised them by the governor, but unfortunately the appropriation is tied up awaiting the decision of the supreme court and the governor is unable to carry out what he is most anxious to do, namely, to distribute the \$2,000 among the needy and deserving food sufferers on the Mimbres river."

Drinking Job Filled.

"Every man to his job was the motto of Captain Evan P. Howell of Atlanta, Georgia, when he was editor of the Constitution," said a Washington newspaper writer, who did his early work on that journal. "I will never forget the call down the captain gave me one day when I had shown up considerably the worse for a three days' Indian fighting expedition. He called me into his den and read the riot act to me in this way:

"Been on another lat, eh? Now, boy, I just want to say to you that this job is run on systematic prin-

ciples. There is a job for every man. Bill Humphill does the paying, Henry Grady the scheming, and, by gad, sir, I do the drinking for the whole outfit. I am not ready yet to turn this job over to you or any other member of the force. If you can't leg it around town here and write your stuff without drinking, then you had best throw up your job before requested to do so."

"I didn't give the captain the opportunity to jump all over me again, but I let him go ahead and fill his own job."

LIVELY SALOON ROW.

Crazed With Liquor, Man Runs Amuck.

Rociada, Sunday, was the scene of a drunken row and shooting which it is a wonder did not result seriously for some of the participants, says the Las Vegas Optic. As near as the story can be learned it seems that the saloon up there is not in the habit of observing the Sunday closing law and several men were in the saloon drinking and finally wound up in a row. Candido Lujan struck Albert Barum over the head with a bottle. Barum drew his pistol and Lujan took it away from him and shot a man named Sanchez. Then Lujan got a billiard ball and threw it at the crowd. Barum ran out and Lujan went after him. They were met outside by Sotero Bustos, the owner of the saloon, whom Lujan tried to shoot. Bustos grabbed the gun and took it away from Lujan, knocking Lujan down. In the scuffle it is said that Bustos shot at Lujan and Lujan, being on the ground, was liberally kicked and pounded by the crowd. Bustos had his thumb dislocated. Sheriff Romero went up and arrested Lujan. The trial will take place tomorrow before the justice of the peace at Rociada.

COURT OF PRIVATE LAND CLAIMS

IT ADJOURNED SINE DIE YESTERDAY FORENOON, ALTHOUGH ITS EXISTENCE DOES NOT EXPIRE UNTIL JULY 1.

The court of private land claims adjourned sine die yesterday forenoon, after the judges had signed the records, thus completing the business for which the court was created thirteen years ago. Before adjournment Chief Justice Joseph R. Reed announced the passage by the court of the following resolution which had been offered for consideration by Solicitor General E. L. Harrell:

Whereas, Henry J. Easton was for many years the official clerk of this court and performed his duties as such with unusual care and fidelity, and

Whereas, said Easton departed this life during the recess of this court, and this court believes that the character and official services of said Easton merit and deserve the public recognition of this court on account of his long and efficient services.

It is ordered that the above and foregoing be entered of record by the clerk as an expression of the sentiments of this court of the memory of an old soldier, a good citizen and a faithful officer of this court.

The court also recommended that its records be kept at Santa Fe for the convenience of the bar and litigants in the southwest. The law which created the court provided that all records and documents be sent to Washington, and it will take congressional action to retain them at Santa Fe, where they will be much more convenient for practical purposes. United States Attorney Matthew G. Reynolds will submit to the department of justice a voluminous report of the work of the court during its existence, on July 1, on which day the courts existence expires by legal limitation. The statistical part of the report has been completed and will be published later.

Col. R. E. Twitchell, the New Mexico assistant counsel of the Santa Fe road, has returned to the city from Las Vegas, and is attending to legal matters here today.

A CORRECTION

In the new city directory, just issued, among the list of city officials appears the name of H. B. Ruppe, fire chief. This is a mistake, and does an injustice to H. B. Nash, who has made a good fire chief and still holds that office. This error is easily accounted for. When the city of Santa Fe was cut from the old directory, the name of H. B. Ruppe appeared as fire chief. Since that time Mr. Nash was appointed and filled the position, but in making the corrections of city officers, and waiting appointments from Mayor McKee, the fire chief correction was overlooked; hence the error, and hence the apology of the compilers to Fire Chief Nash.

M'COMBER'S DEAD BODY IS FOUND

Near a Pinon Log, About a Mile From His House, and His Body Decomposed.

EVIDENCE OF A MURDER

When Sheriff Hubbell was notified of the mysterious disappearance of G. W. McComber, from his ranch in a small canyon near Escabosa, in the Manzano mountains, he immediately sent word to Jose Manuel Montoya, deputy sheriff at Chilili, to form a posse of ten men and search for the remains; also to collect together the stock of the missing man and take care of same until further instructed. A day before yesterday The Citizen, on information obtained from nearby ranchmen, John and Frank Selbert, published the news of the McComber disappearance and the fear expressed that he had been foully dealt with.

Monday J. J. Votaw and a man named "Frenchy" were at the McComber ranch looking for the body, and while at the search found six young calves dead from starvation, two more dying, and the other stock, about 25 head of cattle, in an almost starved condition. These latter were collected together and were being driven to "Frenchy's" ranch to be fed, but later, on request, were turned over to Deputy Sheriff Montoya.

The rumor yesterday that two men, with Frenchy, had been arrested, is false.

Yesterday the search for the old man was continued, and about 4 o'clock in the afternoon the body was found.

Deputy Sheriff Montoya came to town this morning and reported to Sheriff Hubbell the result of his search. He stated that about a mile from the old man's house, at the foot of the mountains, the body was found partially hid behind a pinon log. It was badly decomposed, but an examination revealed the fact that the head had been crushed in with some blunt instrument.

Further examination of the surroundings showed plainly that the old man had engaged in a struggle for his life, and that his body had been dragged from a nearby spring of water where McComber had evidently ridden to water his horse or cattle to the place where it was found. Horse's hoofs were plain, and following the dragged body walked a man wearing moccasins.

Deputy Sheriff Montoya is of the opinion that McComber had left his house for the spring, and after watering his horse and stock was returning to the house when attacked. A big pinon stick picked up midway between the spring and the place where the body was found, was the instrument with which the cowardly deed was done. It was bloody and bore clots of the hair from the old man's head.

The remains were so badly decomposed, says the deputy sheriff, that after it was examined by five other men he ordered it buried where found. Two men, deputized as officers, were placed in charge of the house and stock of the dead man. Deputy Sheriff Montoya says he is working on some clues and hopes to land the murderers behind the bars of the county jail in a very short time.

This afternoon Sheriff Hubbell wired G. A. McComber, the son at Prescott, Arizona, the news relative to finding the dead body of his father, and advising him to come and look after his effects as soon as possible.

MARKET LETTER

Special Correspondence.

Kansas City, Mo., June 13.—There was a liberal supply of range bred steers here last week, and it included some choice fed western steers. The feature of the week was the sale last Monday of a string of Colorado bred and fed steers, averaging 1,375, at \$4.45. This quality of steers gained 10 to 15 cents during the week. Medium to common kinds closed the week steady to a little lower, as compared with the previous week. Best kinds of also stuff closed the week steady, but there was a large supply of grassy cows that lost 20 to 30 cents during the week, and sold from \$2.50 to \$2.75. There was a liberal supply of stockers and feeders, good kinds

of which sold steady to strong all week, but the commoner kinds were slow sale at fairly steady prices. Most sales of western and Panhandle stockers and feeders were at \$3.50 to \$4.50. Stock calves sold at \$1.50 to \$4.50 for desirable runs, and veal calves brought about the same price. Supply today is large at 12,000 head. Market is steady on the best cattle, and steady to 10 cents lower on medium to common grades. A large part of the supply today is stuff of only ordinary quality, and the market is therefore slow. Best posted cattlemen expect the present prices to hold good on top quality, but inferior grades will doubtless suffer some losses.

Sheep prices changed very little last week. Supply of Texans was small, indicating that it was nearing the close of the season in that territory. No western sheep have been received here yet, but the first shipments from Idaho appeared in Omaha during the week, and sold at \$4.40. Texans, suitable for killers, continue about steady at \$4.35 to \$4.75, while those that would class as stockers, if not too heavy hided, could be placed here at \$2.75 to \$3.25, as there is inquiry for stock sheep, and very little has been received this season. Some bunches of fed, clipped western lambs were sold last week at \$6.25; spring lambs brought \$5.50 to \$7.00 and clipped ewes \$5.00 to \$5.25. No change is expected in sheep and lamb prices in the immediate future.

South Dakota Endeavors.

Sioux Falls, S. D., June 15.—Sioux Falls is entertaining the sixteenth annual state convention of the Christian Endeavor society, which will be in session here during the remainder of the week. Delegates are here from local organizations throughout the state and in addition there are present a number of notable speakers from other states.

NEW MARKET FOR NEW MEXICO HORSES

OPENED OWING TO THE EFFORTS OF GOVERNOR OTERO—FIRST SHIPMENT OF 40 ANIMALS FOR PHILIPPINES.

Governor Otero has been at work for some time to find a new and good market for New Mexico horses. Last winter, while at the national capital, he discussed the matter with Colonel Clarence P. Edwards, chief of the insular bureau of the Philippine islands, who suggested that good mounts are needed in those islands. Recently Colonel Edwards telegraphed the governor that on July 8, the steamer Dix would leave San Francisco with horses for Manila and that he would be pleased to examine any horses from New Mexico for shipment to the Orient. W. H. Greer, manager of the Victoria Land and Cattle company, thereupon selected forty horses from the range of his company in Grant county and took them to Deming, where, according to a dispatch received by Governor Otero from Washington, they will be examined by an inspector of cavalry mounts within the next few days. The governor has been asked to recommend a young man to accompany the horses to the Philippines. His transportation and board will be free and he will receive an allowance of \$40 per month besides. Governor Otero has asked Mr. Greer to select a cowboy, or some other young man who understands the management of horses to accompany the shipment. If the horses are accepted, of which there is no doubt, as Mr. Greer has selected the stock carefully, a new market for New Mexico horses will have been opened. The government pays good prices for cavalry mounts and as horses from the New Mexico range have not brought more than \$1 per head at recent sales, territorial stockmen should take advantage of this new opportunity and market created for them through the efforts of Governor Otero.

OFFICIAL MATTERS.

The following coal entry was made in the United States land office: No. 1320. Fred V. Matteson of Albuquerque, for the northwest quarter, section 22, township 14 north, range 6 east.

Notaries Public Appointed. The following notaries public have been appointed by Governor Otero: Francisco Ganno of Hato, Colfax county; John Floyd Howard of Roswell, Chaves county.

Declined Postmastership. Edward Pennington has declined the position of postmaster at Deming to which he was appointed recently by succeeded Postmaster Clark, resigned.

A. Temple, and Mrs. J. P. Byron, are the leading candidates for the position.

Place of Business Designated.

The Public Utilities company which will construct water and light works at Carlsbad, Eddy county, has designated that place as its headquarters. The following are the directors: William J. Barber, James O. Cameron and Fred F. Doepf.

Homestead Entry.

The following homestead entry was

filed in the United States Land office: No. 7956, Jose L. Busio of Sandoval for lot 4, section 7, and lot 1 section 18, township 16 north, range 24 east, and southeast quarter, southeast quarter, section 13, northeast quarter, northeast quarter, section 13, township 16 north, range 23 east, 160 acres of land in San Miguel county.

Resurvey Ordered.

The commissioner of the general land office has ordered the resurvey of the town of Manzano grant, township 8 north, range 6 east, in Valencia county. The contract and bond No. 872, involving the survey of township 8 and 9 north, range 5 east, and township 4 north, range 5 east, has been approved by the commissioner.

Territorial Funds Received.

Territorial Treasurer J. H. Vaughn received from Donald Stewart, collector and ex-officio treasurer of Quay county, \$31.55 of 1903 taxes; and \$389.62 of 1904 taxes. The tax collections during the past six months have surpassed all former records, and the tax collections during the next six months promise to be even better, as the payments remitted this month from San Miguel, Colfax, Sandoval and other counties run into the tens of thousands of dollars.

W. C. Butman, of this city, and Mrs. M. C. Partlow, of Birmingham, Ala., came in on the stage from Whitehead Springs this morning.

SUICIDE CLUB WIPED OUT

LAST MEMBER OF "13" WHO SIGNED DEATH PACT AS JOKE DIES AS DID ALL THE OTHERS, BY HIS OWN HAND.

True to his death pact, made fifteen years ago, George Wagner, a wealthy retired brewer of Bridgeport, Conn., the last member of the famous suicide club of that city, Monday ended his life by blowing his brains out in a room in the Morton house in New York City.

He was a member of the famous Bridgeport Suicide club, formed in Kinsale's saloon, at 431 Main street, fifteen years ago.

The club consisted of thirteen members and it was really started as a joke. The members all laughed and pledged faithfulness with huge steins of beer. Then they went home and when they met joked about their club, but it proved no joke.

Of the thirteen men who pledged themselves to this humorous pact not one is left; each died by his own hand.

George Wagner was one of the best known Germans in Bridgeport and had a large circle of friends in New York. At one time he owned the Union hotel, and was also proprietor of a large brewery, which yielded him a fortune of at least \$100,000. He retired from active business about five years ago. Besides a widow he is survived by one daughter, Josie, wife of Otto Hagg, who conducted the Hoffman house in Derby, Conn.

LIFE AMONG THE CLIFF DWELLERS

QUAINT CUSTOMS OF ANCIENT ABORIGINAL RACE ARE TYPIFIED AMONG NATURAL SURROUNDINGS AT WORLD'S FAIR.

St. Louis, June 16.—Famous caves of the Stone age, as they exist today in the canyons of Arizona, New Mexico and Colorado, are reproduced for the habitation of real Cliff Dwellers on the Pike at the World's Fair, and here the life of these ancient aboriginals may be studied amid natural surroundings.

Added ethnological interest is found in a large pueblo of Zuni and Moiti Indians, who daily perform the historic snake dance and following the strange customs common to their tribes. These Indians are the descendants of ancient kings, and are the remnants of a once powerful race. They have not before been seen at any exposition.

Huge cliffs form the front of the concession, and above these can be seen a lowering peak, which can be reached by a tortuous trail overhanging rocky ledges, deep fissures and caverns. Burros convey the visitor to the top of the crags, where the caves and their relics may be seen, and where a fine view is obtained of the busy scenes on the Pike below.

Entrance to the city of Cliff Dwellers is through a tunnel which pierces the cliffs. The reverse side of the walls presents more caves and other mountain trails. A large structure of quaint architecture occupies the center of the village, and in this the Indians perform the dance of Kachina, the poetic flute dance and the dramatic snake dance.

The Kachina is distinguished by the use of the heads of buffalo and deer, which are worn by the warriors over their heads to conceal the features. The Snake Kiva, a cavern reached by a ladder, the famous dance Rock of Wotpi, the Antelope and other interesting sights arise from cacti and sage growing in the rocks and sand.

Long ladders reach to the roofs of the Cliff Dwellers, and potters, weavers, silversmiths, basket makers and other Indian workers give the final touch to the attraction.

OFFICIAL MATTERS

Successful Bidders For Supplies For New Mexico Penitentiary.

ARTICLES OF INCORPORATIONS

Articles of incorporation were filed in the office of the territorial secretary for the Public Utilities company. The incorporators and directors of the company are William A. Finler, Matthew S. Groves, William J. Barber, James O. Cameron and Fred F. Doepf. The company is incorporated for a period of fifty years for the purpose of acquiring, installing, owning and operating telephones, telegraph lines, etc., and to acquire, construct and maintain a dam for the production of water power and electric light plants and systems. The capital stock is \$100,000 divided into 1,000 shares of the par value of \$100 each.

Supplies Awarded by Penitentiary Commission.

Supplies awarded at the meeting of the honorable board of penitentiary commissioners of the New Mexico penitentiary held June 13, 1904: H. B. Cartwright & Brother, Santa Fe, New Mexico.

Two thousand pounds corn meal, \$1.85; 1,000 pounds rice, No. 481, \$4.50; 2,000 pounds pink No. 1 beans, \$4.50; 5 cases Sunburst corn, \$2.75; 100 pounds laundry starch, \$5; 500 pounds No. 1 choice evaporated peaches, \$5.50; 500 pounds 60-70 pruner, \$4.75; 50 sacks sugar, \$6; 1 case starch, corn (40 pounds), \$3.05; 25 cases Diamond C. soap, 10 oz., \$3.10; 1,000 pounds oat flakes, \$3.65; 3 dozen Price's Lemon Extract, 1-2 pints, \$6.50; 3 dozen Burnett's Vanilla 1-2 pints, \$10.50; 500 pounds evaporated apples \$5.50.

Browne & Manzanarez Co., Las Vegas, New Mexico.

Two thousand pounds hominy, \$2.45; 10 cases California assorted fruits, \$3.97; 6 barrels standard corn syrup, \$3.7 a gallon; 1 case Delands Soda, \$3.17.

Gross Kelly & Co., Las Vegas, New Mexico.

Ten cases Las Cruces tomatoes \$2.70; 200 pounds Red Soda, \$3.25; 2 pounds whole black pepper, \$16 1/2. Charles Ifford, Las Vegas, New Mex.

Two hundred and fifty pounds raisins \$5.24.

Blanchard Meat and Supply Company Albuquerque, New Mexico.

Seventy-five thousand pounds fresh beef, prime quality, necks and shanks excluded, \$5.75 per cwt.

A Lieutenant Dead.

Richard Gray McConnell died this morning at St. Joseph's sanitarium. He was 33 years of age and came to Albuquerque during the first part of March, accompanied by his brother, Paul G. McConnell. Mr. McConnell was a lieutenant in the United States Marine Corps and attended Annapolis Naval academy for three years previous to the Spanish-American war. The remains will be taken to his old home in Heaver, Indiana, for burial.

A "riot call" was sent in to police headquarters this morning from the 2224-23rd saloon, in south Albuquerque, and Assistant Marshal Cooper and Patrolman Joe Balcar responded. The officers found half a dozen of the strike breakers bowling up to their hearts content and eager for a tray of some kind. The belligerent members of the party were quitted by the officers, and up to 3 o'clock this afternoon everything was reported as peaceful in the vicinity of that well known south Albuquerque drink shop.

A. H. Myers and son, who have resided at Phoenix, Arizona, the past few years, joined Mrs. Meyers at No. 108 West Tijeras avenue yesterday. Mr. Meyers will probably remain here in the future.

A RUMOR CORRECTED

A rumor is in circulation since the arrest of W. L. Bess, foreman of the local machine shops, by Policeman Mike Martinez, that the Citizens' Alliance has asked Mayor Frank McKee to remove the policeman from the force.

Mayor McKee was seen this afternoon and emphatically denied that the Citizens' Alliance has made such a request of him, and thus putting a quietus on the report evidently started by someone without any regard whatever for the truth.

In connection with this item The Citizen wishes to say that Policeman Martinez is not holding office by regular appointment and confirmation by the city council. He is extra, and will not so act until Mayor McKee makes an appointment and such appointment, whoever he may be, is confirmed by the council.

THE TELEPHONE

Only a generation ago, at the Centennial exposition in Philadelphia the telephone was exhibited as a scientific toy. Since then the telephone industry has been growing and has grown to a magnitude not generally understood. When it is considered that, without counting private telephone lines, some \$274,000,000 is invested in the telephone business, that nearly 65,000 people are employed by the various concerns, it will be seen that it is no small element in the national prosperity of the country.

MILLIONS IN RUBBER

Imports of rubber into the United States in the fiscal year about to end will exceed by far those of any earlier year, and will amount to over forty million dollars in value. The demand for this article of exclusively foreign production for use in manufacturing has increased very rapidly in recent years, and the imports in the present fiscal year, as shown by the department of commerce and labor through its bureau of statistics, will amount to about sixty million pounds. This rapid increase is apparently due, in a large degree, to the increasing use of this material for tires of vehicles, though in other lines of manufacture the demand is also very great.

More than one-half of the India rubber imported into the United States comes from Brazil, the total from that country alone being for the ten months thirty million pounds, valued at twenty and one-third million dollars.

BUSINESS PROMOTER

"If there is one enterprise on earth that is 'quicker' than any other, it is advertising," says John Wanamaker. "To make a success of advertising, one must be prepared to stick to it like a barnacle on a boat's bottom. He should know before he begins it that he must spend money—lots of it. Somebody should tell him, also, that he cannot hope to reap results commensurate with his expenditure early in the game. Advertising doesn't jerk; it pulls. It begins very gently at first, but the pull is steady. It increases day by day, and year by year, until it exerts an irresistible power. It is likened to a team pulling a heavy load. A thousand spasmodic jerks will not budge the load; while one-half the power exerted in steady effort will start and keep it moving. There are three ways to make advertising pay, and these are the only ways. There are no others. First, is to keep at it; second, is to keep at it; third, is to keep at it."

PHILIPPINE CENSUS

The population of the Philippines has been generally supposed to be between six million and eight million people. The returns show it to actually be 7,635,426, of whom 747,740 are wild and uncivilized, Luzon, the largest and most populous island, has 3,796,007 inhabitants. Pampanga comes next with 743,511; Cebu is third with 692,247; and Mindanao fourth with a population of 499,434. Manila, the largest city, has 219,028 people, ranking with Jersey City, and Minneapolis.

Unquestionably the future of this great population, greater than that of any state in the union, is full of boundless possibilities. Except in isolated places the islands are at peace, and what little disturbance there is can not be dignified by the name of warfare. The people as a rule are satisfied with American domination and are enjoying the prosperity that comes with a stable government and beneficent administration. The few natives who still flaunt the banner of rebellion are nothing more than brigands.

FLAG DAY

The fourteenth day of June is the one hundred and twenty-seventh anniversary of the adoption of the national emblem by the Continental Congress in 1777. Since then the flag has undergone several changes and in present form bears only a general resemblance to the original design. The first banner bearing the stars and stripes was made by Betsy Ross, in Philadelphia, in a house which still stands, and which is pointed out as one of the historic show places of the city.

The American Flag Association, "formed to promote reverence for and prevent desecration of the flag of the country," has for the past seven years striven to secure the general observance of this anniversary in the schools and by the public. It happens that nearly all of the public schools are closed at this date so it is impossible for them to take part in the celebrations, but more and more the day is coming to be observed by city governments and the people at large. It involves no elaborate ceremonial or interference with the course of business; it consists merely in the display of the flag on buildings, both public and private, and in homes.

DYSPEPSIA AND WEALTH

"There's always something." When a man has an appetite he has no money. When he has a lot of money he has no appetite. John D. Rockefeller has most of the money there is, according to report, but he has no hair, no appetite, no tastes and habits that require expenditures, none of

RHEUMATISM

JOINTS AND MUSCLES SWOLLEN AND STIFF

A disease as painful and far-reaching in its effects upon the human system as Rheumatism, must have a deep and well-laid foundation. It originates and develops in the blood, and, like other diseases of the blood, is frequently inherited. The poisonous acids with which the blood is charged circulate through the system, breaking down the health, irritating the nerves, settling in joints and muscles, and causing the sharp, cutting pains peculiar to Rheumatism. Unless the blood is purified, joints and muscles become coated with the acid matter and are rendered stiff and sore, and the nerves completely wrecked. Rheumatism, being a constitutional blood disease, requires internal treatment. Liniments, plasters and such things as are applied outwardly, give only temporary relief. S. S. S. is the recognized great purifier and tonic, and in no disease does it act so promptly and beneficially as Rheumatism, neutralizing the acids and restoring the blood to a pure, healthy condition and invigorating and toning up the nerves and all parts of the system. It is guaranteed strictly vegetable. Write us should you desire medical advice, which will cost you nothing.

I had a severe attack of Inflammatory Rheumatism. I was up in bed for six weeks, and the doctors I had did me no good. They changed medicine every week, and nothing they prescribed seemed to help me. Finally I left of my own accord and began the use of S. S. S. My knee and elbow joints were so swollen and painful that I could not close them when opened. I was getting discouraged when I began S. S. S., but as I saw it was helping me, continued, and to-day am a well man.

1855 Mt. Vernon Ave. B. H. CHAPMAN.

FACTS AND FIGURES

To Increase Efficiency and Extend Scope of Important Territorial Institutions Higher Taxes Became Necessary.

NEW MEXICO UNIVERSITY FUNDS

The administration of Governor M. A. Otero has been much criticized by democrats, disgruntled republicans and fellows that are neither, but who have an ache or pain, as to increase in territorial tax, says the New Mexican.

This paper recently published an article, reviewing and comparing the financial record made during the past seven years of the administration of Governor Otero with that of the preceding twelve years of two democratic and one republican administration. A comparison with respect to the management of the legitimate financial affairs of the territory stamped the Otero administration as businesslike, safe and conservative from beginning to end, and also explained in a clear and concise manner why it became necessary in order to restore and preserve the credit of the territory, to increase tax rates to meet the debt, principal and interest, saddled on the people by years of democratic mismanagement and incompetency.

The article, however, did not explain all the increased taxation, which has been charged, has been steadily growing. Anyone familiar with the affairs of the territory ten or even eight years ago, knows full well that educational institutions were languishing; charitable institutions were practically in name only; territorial institutions were run down at the heels, and all were in a chronic condition of lack of funds for regular maintenance.

From examination of the various financial bills passed by the different legislatures prior to the administration of Otero, it can be readily seen that no appropriations were made for these institutions except of the most meager kind, and a further examination of territorial treasurers' reports will prove that after those appropriations, such as they were, were made. The only liberal appropriations made since 1892 were for current expenses, and those were insufficient as shown in deficiencies reported by territorial treasurers, and the repeated issuing of expense and deficiency bonds.

All this has been changed under the Otero administration. The territorial institutions are in a flourishing condition; educational institutions rank with institutions of a similar character in the other states and the charitable institutions are a credit to the territory. In order to attain this desired result money had to be expended and the only revenue that can be derived is from taxation. The wifely misrepresentations on this subject make it necessary to place before the taxpayers of the territory a brief showing as to what has been accomplished in the way of extending financial aid to these institutions.

During the past three years twelve counties of the territory have received from the territorial treasurer over one-half million dollars, all derived direct from taxation, for their maintenance, while twelve counties of the territory have been paying their taxes to help raise this money and have not had one dollar of it disbursed within their boundaries. Here are the figures, which are based on direct payments made by the territorial treasurer:

Bernillo County.	
Holmes Hospital . . . \$2,778.67	
University of New Mexico \$1,755.45	\$4,534.12
Chaves County.	
N. M. Mil. Inst.	\$4,399.93
Dona Ana County.	
Agricultural College	\$2,091.22
Eddy County.	
Kitty Co. Hospital	\$2,295.16
Grant County.	
Sisters of Mercy Hospital	\$4,745.49
Grant Co. Charity Hospital	\$5,022.41
Normal School	\$4,515.03
Silver City Dam	\$4,000.00
Luna County.	
Ladies Hospital, Deming	\$4,098.79
McKinley County.	
Gallop Hospital	\$76.26
San Miguel County.	
Ladies Relief Soc.	\$5,028.39
Nor. University	\$1,483.77
Inmate Asylum	\$118,350.12
Santa Fe County.	
Penitentiary	\$120,000.00
Orphan's School	\$13,912.16
St Vincent's Hos.	\$9,991.01
Deaf Dumb Asy.	\$4,786.43
Socorro County.	
School of Mines	\$2,745.76
Taos County.	
Sisters of Loreto	\$720.30
Valencia County.	
Orphan's School	\$3,030.12

Total \$538,325.64

More than \$179,000 per year to maintain institutions and charities, representing 6 1/2 mills of the present tax levy as shown by the average collection of taxes during the past three years. These figures do not include \$139,000 for permanent improvement derived from the sale of public lands.

An examination of this statement will show that the counties from which largely come the criticisms as to the increased tax levies, are the very counties that are reaping the direct benefit of such levies and are thereby, in reality, actually reducing their rate very largely.

Without going into too great detail in the matter of tax levies by mills it may be worth while to cite a few

examples. At the close of the Thornton administration, the democratic legislature, in 1897, authorized a levy for all territorial institutions, (not including the penitentiary and charitable associations), in the sum of 2.05 mills on the dollar. The republican legislature of 1903 made a levy for the same purposes in the sum of 5.10 mills on the dollar, thus accounting for 3.05 mills of the present tax rate, which designating people and yellow papers assure the public is due to extravagance in official salaries under the Otero administration.

Now, if it is good policy, if it is good management to reduce expenses regardless of results and if the tax payers of the territory do not care for schools, do not wish their institutions kept up and are not disposed to be charitable, then cut them out, lower taxes, and go back to where the territory was under democratic administrations. Those persons who desire to show their good faith in demanding a lower tax rate can best do so by pledging themselves to elect members of the next legislature who are committed to vote for a bill abolishing or curtailing the income of any public institution or charity located in their respective districts.

USUAL BREAKFAST FOOD

EL PASO DISHES UP HER REGULAR MAN FOR MEAL.

A desperate combat took place early this morning at El Paso and Second streets between a negro and a white man, which resulted in the death of the former and the probable fatal wounding of the white man, says the El Paso News. Charles L. McBride, a former bartender in "Fronch's" saloon, was sitting at a table in a Chinese restaurant waiting for his breakfast, when like blood, a negro, entered. McBride sat down at the same table with McBride, although there were many other vacant places which he could occupy. McBride requested that he remove to another table, which request caused the negro to become very angry, and warm words ensued.

In the midst of the argument, the negro came at McBride, who is a consumptive, with an ice pick, and inflicted a stab, penetrating his left side and causing a serious wound. In the struggle for his life McBride had been sent crashing through the folding doors and as he reached the sidewalk he drew his revolver and shot the negro through the right breast. The colored man immediately sought cover and hid himself to rush through the rear of when he again began an attack, swinging the sharp pick murderously through the air. McBride then fired a second time, this shot getting his man through the heart, which caused the building, breaking the doors in his desperate flight and then to drop dead on the sidewalk, with the pick firmly clutched in his hand.

McBride painfully walked into the saloon and then proceeded down the street to the police station in order to give himself up. En route he met Detective Joe Rogers and told him what had occurred. Mr. Rogers then accompanied the wounded man to the station from which he was immediately transferred to the hospital at the county jail.

McBride's condition is considered serious by the physicians in attendance, as the ice pick passed three inches to the right, and one and one-half inches below the left nipple, inflicting a deep wound, which has caused internal bleeding. The injured man is known to have always been peaceably inclined. His wound, taken with his falling health, is viewed with concern by his many friends.

Worst of All Experiences.

"Can anything be worse than to feel that every minute will be your last? Such was the experience of Mrs. S. H. Newman, Decatur, Ala. "For three years," she writes, "I endured insupportable pain from indigestion, stomach and bowel trouble. Death seemed inevitable when doctors and all remedies failed. At length I was induced to try Electric Bitters, and the result was miraculous. I improved at once, and now I'm completely recovered." For Liver, Kidney, Stomach and Bowel troubles Electric Bitters is the only medicine. Only 50c. It's guaranteed by all druggists.

THE GOVERNMENT FORESTRY DISPLAY

MOST EXTENSIVE DISPLAY EVER MADE BY UNCLE SAM AT A WORLD'S FAIR.

St. Louis, June 14.—The magnitude and importance of the Louisiana Purchase Exposition as a school of instruction to the people of the United States is fully appreciated by the government, which has many interesting and instructive exhibits. The Bureau of Forestry has an exhibit in the government building, its purpose being to illustrate the work which the bureau is doing, and to show actual forest conditions in all parts of the country.

The importance of preserving our forests is receiving much consideration and the world's fair visitors are

given object lessons showing them what practical forestry is, and how the forests can be preserved and maintained.

The American lumber interests are very extensive, and are important natural sources of wealth. The forests must be protected and preserved in order to continue the lumber industry, and as a means aiding the farmer the forests figure in many ways. With the enlargement of the cultivable area and the improved methods of farming by irrigation, the degree of dependence upon the forests is becoming more appreciable. The government has three separate forestry exhibits at the fair. One is the Government building proper, another in the Forestry, Fish and Game building in which is centered the exhibits of the great lumber industry of the country and a third is an outdoor exhibit. A complete and attractive collection of photographic transparencies illustrating forest problems and conditions as they exist in the United States. Among the features shown are the tree planting, cutting of forests and their renewal by natural reproduction, forest planting in treeless regions and in places where forests have been destroyed by various agencies. These pictures form an interesting display.

The various implements and instruments used in connection with forest destruction, and the insects which destroy trees, are also exhibited. Methods of testing the strength of woods are also shown in this collection.

An extensive outdoor forestry exhibit is another of the features of general instructive value of this bureau. Two and a half acres are given to tree planting and scientific forestry, showing how to plant trees and preserve forests, and the best forms of wind breaks, made of trees planted in various ways for preserving the farms in the windy regions of the west.

The entire forestry exhibit is a valuable school for the public. Farmers can derive inestimable benefit from visiting the World's fair and carefully studying the government's scientific methods not only of forestry but of other branches of the field, farm and garden, the ranch and the home. The fair is the world's greatest school, where more can be learned on almost any one subject in a week's observation than can be learned in the ordinary course of a life time by merely taking advantage of things as they come and go.

The Iowa people of Albuquerque, pursuant to previous arrangements, met last night and perfected the organization of an Iowa club. The principal objects of the society are to promote sociability among the people from Iowa, to welcome strangers from that state, and to furnish information to Iowa people who contemplate coming to Albuquerque.

The organization starts out with a membership of twenty, and other names will be added at the next meeting. The following officers of the club were chosen last night: President, Mrs. W. J. Hyde, formerly of Tracer; vice president, Mrs. J. H. Clifton; of Des Moines; treasurer, Mrs. S. E. Newcomer, of Burlington; secretary, Mr. Gatchell, of Des Moines.

The ladies of the club will meet semi monthly, and the regular meetings will be held once a month at the residences of the members. The next regular meeting will be held at the home of Mrs. Newcomer, on South Walter street.

The new society starts out with flattering prospects of being a social success.

GOOD RAIN AT LAS CRUCES

THE MESILLA VALLEY DRENCHED BY A THREE HOUR RAIN LAST NIGHT.

"The drought is broken in the Mesilla valley," said Conductor L. F. Gilford, as his train from the south came to a halt at the local depot this morning. "For three solid hours the glorious rain came down along the Mesilla valley, and when the train was speeding along the fertile valley the ground was being thoroughly soaked and the irrigating ditches were running full. The present drought is the longest in the history of the Mesilla valley, and although late in coming, the rain last night was hailed by the people down south with genuine delight. It was a grand rain—the very skies seem to open wide, and the water came from the heavens in good old Missouri fashion."

Sunday School Workers.

Duluth, Minn., June 14.—The annual convention of the Minnesota State Sunday School association begins its sessions this evening in this city and will last until the end of the week. Almost every county of the state is represented among the several hundred delegates who have arrived. The meetings are to be held in the First Methodist and Pilgrim Congregational churches, and some of the most noted Sunday school workers and evangelists of the entire country will take part.

When the Missouri building, the most important of all the state buildings, was designed, a place was made for a piece of sculpture that all the world should see. The enormous glided dome must be crowned by a statue embodying the Spirit of Missouri. The commission was awarded to Miss Carrie Wood, who, as a child, has played in Forest park where the Missouri building stands.

The interior decorations of the government pavilion, carried out so effectively in the colors and design of the national flag, were done by Miss Grace Lincoln Temple of Washington, D. C.

The finer work of the landscape department was planned largely by a woman who has been for several years Mr. Keasler's trusted assistant. The young lady is Miss Eda Sutermeister, a trained landscape architect. To her it fell the task and the opportunity of arranging the decorative

WOMAN'S WORK AT WORLD'S FAIR

St. Louis, Mo., June 12.—The important place of woman in the world's economy is fully set forth at the Louisiana Purchase Exposition. In every department of this greatest of all exhibitions, her influence and taste are demonstrated. From the dome of Festival hall to the remotest corner of the grounds where floral decorations lend their charm, woman's handiwork is to be found.

That women are able to cope with men in almost all fields of human activity has been proved within the past decade. The World's Fair visitors whose exposition standards are based upon what they saw at the Chicago fair, eleven years ago, are apt to ask, after a tour of the grounds, "Where is your women's building? Is there no pavilion where the work of women is displayed? Are women ignored altogether? Are women great World's Fair?"

Then the mind wanders back to the beautiful women's building at Chicago, where paintings, statuary, lace and embroidery were on exhibition, where the entire building was a monument to woman's skill and ability, and there is a feeling of regret that the commissioners should have forgotten or ignored their sisters and wives, their daughters and sweethearts. Yet the women were not forgotten. The shy, timid creature who could be overlooked or relegated to the background has but remote connection with the American woman of today. She is a creature of the past, and in her place come the strong, capable, enlightened woman of the twentieth century, who does not take her place there by reason of what she is and what she can accomplish.

We no longer hear of the "poetess," the "dilettante," the "gambleress," but we have more women poets, doctors and authors than ever before. And so it was a confession of inferiority and weakness to huddle the products of women's hands in a building by themselves, as if women were afraid of a comparison with men, as if their work could have no possible chance for award was brought into competition with the work of men.

The act of congress that made the Louisiana Purchase Exposition a possibility outlined the work of the Board of Lady Managers in such terms as to preclude the possibility of any separation in the work of men and women. In every department the sex distinction is eliminated, the work of men and women being admitted on exactly the same basis. The fact that there is to be a woman on each jury of award that is to pass judgment on the work of women is a concession, not to women but to the men on the jury, who are much less likely to know about the things made exclusively by women than is the modern woman, with her insatiable thirst for knowledge, to know about the work of men, the work in which she has not yet taken a hand.

In the administrative departments of the exposition, much of the most important work has been entrusted to women, and their compensation is the same as that paid to men holding similar positions. In a few instances, women have performed missions and accomplished tasks that would have resulted in failure had they been entrusted to men.

When the federal government was asked for a loan of four and one-half millions of dollars, it was a woman, Mrs. Daniel Manning, president of the Board of Lady Managers, who went to Washington and lobbied for the bill among the friends of her distinguished husband, thus securing enough votes to insure its passage.

There was a general wish on the part of the American people that Queen Victoria's jubilee presents might form a part of the great exposition. That these priceless treasures would actually be sent to St. Louis to remain on exhibition for seven months was thought to be impossible, for the world remembered with what precautions and anxiety they were sent throughout the United Kingdom, a few years ago. Yet Miss Florence Hayward, the well-known writer of St. Louis, who is well known in London as she is in her native city, agreed to undertake the delicate mission. The fact that thousands daily climb the hill to the group of administration buildings for the purpose of inspecting these tokens of loyalty to the best of all queen monarchs is sufficient evidence of the success of Miss Hayward's work.

In the department of education and social economy, the greatest educational exhibit in the history of America, Mr. Rogers has been assigned by a woman whose knowledge of educational works, and whose taste in the arrangement of displays, have relieved him of the most trying details of his section. The lady is Miss Minnie Bronson, a teacher and writer of wide experience.

When the Missouri building, the most important of all the state buildings, was designed, a place was made for a piece of sculpture that all the world should see. The enormous glided dome must be crowned by a statue embodying the Spirit of Missouri. The commission was awarded to Miss Carrie Wood, who, as a child, has played in Forest park where the Missouri building stands.

The interior decorations of the government pavilion, carried out so effectively in the colors and design of the national flag, were done by Miss Grace Lincoln Temple of Washington, D. C.

The finer work of the landscape department was planned largely by a woman who has been for several years Mr. Keasler's trusted assistant. The young lady is Miss Eda Sutermeister, a trained landscape architect. To her it fell the task and the opportunity of arranging the decorative

planting for the beautiful cascade gardens and many of the other ornamental landscape decorations. She is at once a business woman, an artist and an unflinching judge of plants.

The extensive exhibit that made the long journey from Alaska to St. Louis, the collection of furs, minerals, photographs and all the other interesting objects from that remote territory, came under the direction and management of a capable and much traveled woman, Mrs. Mary E. Hart.

The secretaries of several of the state commissions are ladies, and the big offices in the Administration building are filled with women employed in every capacity from that of newspaper reporter to mediator of photographs.

In the department of sculpture, women are conspicuously represented. Miss Wood's "Spirit of Missouri" is by no means the only figure modeled by a woman. The beautiful sphinxes over the arches of the north and east entrances to the Palace of Machinery were done by Miss Melva Boedler Wilson, of New York. Another New York woman, Miss Edith H. Stevens, modeled the splendid figures that recline above the broken pediment forming the top of the center dome within the grand triumphal arch that is the main entrance to the Palace of Liberal Arts. These figures, because of their position, only a few feet above the eyes of the beholder, were much more important than many of the larger groups for routine and dome.

Among the seventeen portrait statues that line the approaches to the cascade gardens, four were the work of women. These are Daniel Boone, by Emil Yandell, George Rogers Clark, by Elsie Ward, James Madison, by Janet Hendler, and James Monroe, by Julia Bracken. And a greater triumph for woman than any of those that have been described remains to be mentioned. Behind the great main cascade, and at the center of the majestic Colonnade of States, stands the beautiful temple of music and oratory. Festival hall, whose mighty dome, towering two hundred feet in air, is larger than that of St. Peter's of the Pantheon at Rome. This dome that overlooks the entire exposition grounds, the city, and a wide expanse of farm land to the west, is crowned by the work of a woman. True, this important commission was not assigned to a woman. A man was to have modeled the Victory for the dome of Festival hall. At the last moment he fell ill, or was called abroad, or—but it is needless to speculate as to the cause of his failure to deliver the model from which the colossal figure should have been enlarged. The failure was not announced until it was too late to give another commission, so Dr. Bitter was constrained to look about among his plaster figures for one that would do. Miss Evelyn B. Longman has modeled a Victory for the dome of the Palace of Varied Industries that was an entirely new conception as a Victory. Ever since the Nike of Samothrace sprang into marble flight in commemoration of the greatest of Greek triumphs, the accepted figure of Victory has been that of a woman. Miss Longman modeled a vigorous young athlete, his supple figure poised on the tips of his toes, his lips parted as if in a shout of triumph and his hand extended with the victor's wreath. This figure was found to be not merely the best, but the only one that was really worthy of the loftiest point of decoration in the great decorative scheme of the grounds.

So the Victory that crowns the dome of the Festival hall is the crowning victory of woman at the Louisiana Purchase Exposition.

THE VERY GOOD TOWN OF DEMING

A FINE COLLECTION OF MOST INTERESTING LOCAL HAPPENINGS.

Special Correspondence.

Deming, June 12.—Deming has never looked better than it does this spring. The trees and lawns of the town are fresh and green. A good rain is the only thing needed now to make it one of the most comfortable places in the southwest.

The opera house which is being built by A. J. Clark, is one hundred and twenty-five feet deep, and fifty feet wide. The roof is now being put on, and the floor laid. When completed, it will be one of the best opera halls in New Mexico.

Mrs. B. O. Maule, at present of Hachita, where Mr. Maule is in the employ of the El Paso & Southwestern railroad, spent several days in town last week. Mr. Maule is one of the old timers in Deming.

A great many cattle have been shipped from the local yards during the past two weeks. While the range is generally speaking, pretty dry, still there have been some showers, and a few stockmen report their cattle as picking up.

Rodney G. Clark, who has been Deming's efficient postmaster for the past two years, has resigned. Mr. E. Ward Pennington who was appointed in his place, has decided that he does not care for it. It is understood that there are a number of applicants.

Mrs. W. R. Merrill and family, Miss Jessie Hendrick, Mrs. E. L. Dozier, Mrs. George Rutherford and daughter, and Mrs. Henry Meyer are camping at the Byron ranch east of town. They report a first class time.

Hon. Anson W. Pollard and Mrs. Pollard leave tomorrow, Tuesday, for Portage, Wisconsin, their old home, where Mrs. Pollard will spend the summer with her parents.

Colonel J. P. McGurty has just returned from a trip to New York and Massachusetts.

Doctor K. L. Casselle and wife left Thursday, by way of the Santa Fe, for Chicago. They go to have an operation performed on Mrs. Casselle.

who has been suffering for months with an abscess on her jaw.

A Portland cement sidewalk will at once be laid from the depot to the center of town.

Since the closing of school, nearly all the teachers have left town. Prof. W. H. Dickey goes to Tuscon for the summer. Miss Lily Billingsley will attend a summer school in Chicago. Miss Allen will visit in the Indian Territory. Miss Ella P. Quibner, who has been the eight grade grammar teacher for the past seven years, has returned to her home in Sioux City, Iowa, and will not come back to Deming. Miss Quibner is one of the best teachers in the country. Professor Dickey will hold his old place as city superintendent and U. Francis Duff will continue as principal of the high school.

Friday last a party of six drove out to Black Butte and visited the prehistoric ruins in that vicinity.

Saturday a number of the little trucks plinked at the ranch of W. T. Russell, the milkman. They report a good time drinking milk and eating watermelons.

Remains Will be Taken to Louisville.

Charles Johnbooke, age 29, who succumbed to consumption last Sunday will be taken to his old home in Louisville, Ky., for burial. He came to this city about a year ago with his wife and child and up to a few weeks ago was doing very nicely. When the turn for the worse came his parents were sent for and will accompany the remains home tomorrow morning. Mr. Johnbooke, while a young man, had attained some prominence in his home town on account of his ability as a lawyer.

TO BEOM MINNESOTA.

St. Paul, Minn., June 12.—The state immigration convention, for which preparations have been making for some time under the joint auspices of the commercial clubs of Duluth, Minneapolis and St. Paul, opened in this city today with a good attendance of railroad officials, land agents and business men from various parts of the state. The specific purpose of the meeting is to promote the settlement of the unoccupied lands of Minnesota and to induce farmers and other immigrants to settle in this state instead of going further into the northwest.

GREETING TO FLAG DAY AT PHILADELPHIA

Philadelphia, June 14.—Today is Flag day, the one hundred and twenty-seventh anniversary of the enactment by congress that the flag should consist of thirteen stripes, alternate red and white, and a union of stars, one for each state, in a blue field. The American flag association, which takes this day under its particular care, recently sent out a circular broadcast through the country urging patriotic societies, school children and the public generally to observe the day with appropriate ceremonies, and to see that the flag should "greet the rising sun salute the setting sun."

It is but natural that the day should be more generally observed in Philadelphia than in other cities, for it was in this city, in a house still standing at 235 Arch street, that Betsy Ross made the first flag. The house was to-day visited by delegations of school children and others, and during the forenoon patriotic exercises were held under its roof.

Miss Claude Albright, daughter of Col. and Mrs. J. G. Albright, returned home last night. Miss Albright has just closed her season in New York City. She has been starring as "Peggy from Paris." George Ade's clever opera of Henry W. Savage management. She has had immense success, both as grand and comic opera artist for the past two seasons. The young lady is delighted to be home again, but will leave soon to continue her work in New York.

Shooting at Minot.

Minot, N. D., June 14.—The annual tournament of the North Dakota State Sportsman's association opened here today and will continue through tomorrow. A number of well known shots are taking part and some good scores were made in the opening events.

John Stein, the general superintendent of the Fred Harvey eating system, came in from the south this morning, and is spending the day at the Alvarado.

Madame Dean's French Female Pills.

HOSTETTER'S
STOMACH BITTERS

If you neglect the stomach and bowels you are going to suffer from Nausea, Sick Headache, Sleeplessness, Constipation, Dyspepsia and Indigestion. The Bitters will strengthen the stomach, keep the bowels open and prevent these ailments. Try a bottle.

From the Graphic.

Rev. E. N. Beane and family arrived and are established at the Methodist parsonage. He began his work as pastor of the church at this place last Sunday.

A letter from Mrs. J. W. Burley, who formerly lived here, but now in San Marcial, brings the sad news that Mr. Burley died of pneumonia at that place.

Walter Wilkinson returned from Albuquerque, where he had been for several weeks past in the employ of the Albuquerque Traction company. He expects to return to that city soon.

Frank Prior went out to his mines in the Florida mountains to do some development work on a property which he thinks gives promise of making a dividend payer when the proper depth is reached.

Col. J. P. McIlroy returned from his trip south and east. The colonel's return was quite unexpected, although he was none the less welcome to his numerous friends who are always glad to see his genial countenance.

Frank Thurmond and Al Shultz have taken a lease on mining property in the Tres Hermanas, owned by A. J. Clark, A. J. Maloney and C. J. Kelly of this city, and are now actively engaged developing the same. Mr. Thurmond speaks very highly of the property and hopes to show up something before long.

Prof. W. H. Dickey left for Chicago, where he will attend school this summer. He was accompanied by his family as far as Gainesville, Texas, where Mrs. Dickey and the children will remain for some time visiting friends. After the professor finishes his work in school he will go to his home at Union City, Tenn., where he will be joined by his family, and after a visit there and at the World's fair at St. Louis, they will return to Deming.

Last Saturday an interesting case came up in the court of Judge Pennington. Messrs. George Roede and Nicanor Barrio were tried, each on a charge of the other for criminal assault. The trouble appears to have started some time ago over a cattle trade made between the two, and finished in a free-for-all fight, in which a quilt and a revolver figured. There were two charges against Barrio—one for assault with a deadly weapon and one for assault and battery. The former was discharged as no case was made out on the evidence and on the latter he was fined \$10 and costs. In the case of Roede there was more evidence, and he was bound over to the grand jury in the sum of \$500.

HILLSBORO.

From the Advocate.

Ed Tafaja has been appointed postmaster of the new postoffice, Hursum. Hursum is about six miles from the Gila Hot Springs, and the mail route runs through Chiricahua.

The school election held here resulted in the election of J. M. Webster for a three years' term. The vote stood as follows: J. M. Webster, 21; J. C. Plimmons, 5; C. H. Meyers, 1; F. I. Given, 2; J. W. Burke, 1.

Bishop J. Mills Kendrick spent last Saturday and Sunday in Hillsboro. On Sunday morning he addressed the Sunday school, after which followed baptismal, confirmation and communion services. Miss Mary Nowell and Mr. James Hiller were confirmed members of the church, and the infant son of Mr. and Mrs. George Miller was baptized. There was a strong prayer and sermon at 7:30. A large and appreciative audience attended both morning and evening.

At the last term of court the grand jury found an indictment against John Longbottom, who, it is alleged, held up T. A. Robinson in his store last February. Longbottom surrendered to the authorities last Sunday. On Tuesday he gave bail in the sum of \$1,000 for his appearance at the next term of court. Longbottom was tried before Justice Bernard at Kingman for holding up Robinson, but was acquitted. Leonard Olinos is also out on \$500 bonds, charged with perjury. He surrendered to the officers last Monday.

The Union church was well filled last Sunday evening to listen to an excellent sermon by Bishop Kendrick. During his discourse he dealt strenuously with liars and scandal mongers. Bishop Kendrick talked straight from the shoulder and is a hard hitter, and we are inclined to believe that some people who heard that sermon will not forget it for some time to come. The bishop said that hell was too good for liars and scandal mongers, and he never stuttered when he said it.

E. W. Allen, accompanied by his wife, who has been a resident of Albuquerque for the past year and a half enjoying New Mexico sunshine, last night left for their home in Foster, Ohio. Mr. Allen is cashier of the Mechanics' bank of that city, and also president of the Peabody Wagon and Carriage Co., who have their plant in Foster. Mr. Allen speaks very highly of the Duke City and both he and his wife expect to return here this fall and enjoy the cold weather of the Buckeye state.

LEVI STRAUSS & CO'S
COPPER RIVETED OVERALLS
for men who toil

ARIZONA TOWNS

ST. JOHNS.

From the Herald.

There has been a good deal of sickness in town the past week.

James Lennor is in the mountains looking after sheep interests.

Reiner J. H. Poirer, who was appointed from this county says he will be stationed at Greer for the remainder of the year.

Marque Zapines shot himself in the calf of the leg while out hunting rabbits. A painful wound was inflicted, but is not considered very serious.

Wm. Holgate and family left for Zuni where they will remain until December. Mr. Holgate has a contract for excavating and furnishing 120,000 bricks for the Indian school that will be constructed by the government.

E. S. Perkins and family formerly residents of this place, but now of Martinez, have gone to St. Louis to see the fair. They will also go to Mr. Perkins' old home in Kentucky, where Mrs. Perkins and children will remain for two years.

WINSLOW.

From the Mail.

Miss Lily Winders, of Gallup, arrived the first of the week and is visiting at the home of W. G. Kelly.

Colin Campbell will have his headquarters at the Canyon Diablo for some time to come, as he has a large number of sheep in that vicinity.

Mr. and Mrs. Chas. Brownell entertained a few friends the other evening. Progressive whist was the order of the evening, the honors falling to Mrs. Kidder and Mr. Holmes. After awarding prizes light refreshments were served.

Roid Fenton has been a very busy man for several months. Three large brick buildings and several smaller ones together with several hundred feet of brick sidewalks, have kept him busy burning brick. He has already used two large kilns this summer and has the third ready for burning. Winslow white brick can't be beat. It is the best of its kind and the local contractors have found it out. No brick is being shipped to Winslow.

The Ladies' Aid society met at the home of Mrs. Lane's the other afternoon. After the business meeting we were asked to keep our seats, and cake and sherbet were served. Those present were: Mrs. Robinson, Mrs. Lucy Moore, Mrs. J. L. Moore, Mrs. Walcott, Mrs. R. L. Moore, Mrs. McNeill, Mrs. Beeley, Mrs. Kidder, Mrs. Clark, Mrs. Letter, Mrs. Smith, Mrs. Morrison, Mrs. Allen, Mrs. J. Hill, Miss Taylor and Mr. Smith.

FLAGSTAFF.

From the Sun.

Mrs. E. B. Res left on a visit to Los Angeles.

Mrs. Lucy Cordes, of Cordes, Ariz., is visiting Mrs. J. D. Newman.

E. S. Gossney and wife are visiting relatives in Missouri, and will also attend the World's Fair.

C. T. Philbrook, principal of the Williams schools, was here Wednesday. He will be one of the teachers at the summer session of the Northern Arizona Normal.

George Babbitt and family returned from Los Angeles, Cal., where they had been on a trip for three weeks. While there Mr. Babbitt investigated the oil fields and streets, and was very favorably impressed with the results on the California roads, and he believes that the streets of Flagstaff can be oiled at a price that the city can afford.

A double wedding will be one of the events of this week. The affair will take place in the Methodist church on next Thursday evening. Contracting parties are Mr. Hugh Anderson and Miss Margaret Wallace and Mr. William Wallace and Miss Ethel Anderson all well known young people of Flagstaff. A "tin shower" was given at the residence of L. L. Burns Thursday night by the young lady friends of the brides to be, and they were the recipients of a large number of useful articles.

HOLBROOK.

From the Argus.

Mrs. J. H. Richards, of St. Joseph, is here visiting with Mrs. E. H. Bargo.

Willis Bros freight team were here and loaded 90,000 pounds of freight for Fort Apache.

A crew of sheep shearers arrived here Sunday from Winslow and have begun shearing a band of Julius Wetzel's sheep, about a mile below town.

Dick Amos came in from his sheep camp. He reports a heavy rain at Ten Milewash, all tanks in that section are full, enabling stock to get on good feed.

Mr. and Mrs. Wm. Morgan came down from Show Low and returned the next day. While here Mr. Morgan sold his spring clip to A. A. Vanderwort at 10 cents per pound.

E. A. Sawyer was up from Winslow interviewing sheep men, who pastured their flocks in the Salt River Valley last winter. In regard to sending men over on the Verde river to gather the numerous bands of sheep reported to be ranging in that vicinity.

Claude Bouldridge arrived here from Pleasant Valley and had a petition drawn up; praying that settlers, who had built homes on the Black Mesa Forest Reserve since 1898, and before the boundary lines of said reserve had been surveyed be allowed to remain on the reserve, or that the government pay them for their improvements. He was successful in getting over one hundred signatures here, and intends circulating the petition throughout Navajo, Apache, Gila

and Coconino counties before forwarding it to the secretary of the interior.

KINGMAN.

From the Miner.

The government is to construct a large building at Fort Mohave for the use of the Herbert Welch Institute. The brick will be made at the Fort and 300 tons of lumber and other materials are to be hauled up the river from Needles. The building will be one of the handsomest of the many buildings at that place.

Miss S. H. Lingley, principal of the Kingman public school during the past term, departed for her home in Santa Ana, Cal. Miss Finley has taught this school several terms and during the past three years has made many warm friends, who would be pleased to have her again with us during the next school year.

Miss Mabel Ayres, daughter of Mr. and Mrs. T. L. Ayres, and Morris Schneider, a young business man of San Francisco, were married at the Palace hotel, 1441 W. F. Levy performing the ceremony. Miss Ayres is known to nearly all the people of this county, having lived in Corbat practically all her life, and to them her many amiable qualities have endeared her. May her path through life be rose strewn.

David Hutton, who has a ranch on the west side of the Colorado river, near Cottonwood Island, is irrigating many acres by water wheels of his own invention. The wheels are set on trucks and are run into the current of the river on tracks. The wheels have bucket attachments that raise the water high enough to discharge into a flume, from which it is carried in ditches over the farm. All the produce that can be raised on this ranch is readily sold at Searchlight.

Louis Robertson, who was charged with causing the fire that destroyed the Harrington home and the Quinones residence, has been adjudged insane and taken to the asylum at Phoenix. From what we can learn of the case Robertson set fire to the hospital to vent his spleen on one of the inmates and when he saw what he had done made use of the insane dodge to evade punishment. He had a disturbing element in the hospital and considerable complaint was made by Mrs. Sweeney and by the inmates of the place.

WILLIAMS.

From the News.

Mrs. Wm. Nichols came from San Bernardino, accompanied by her young son, for a visit with relatives.

F. O. Polson departed for a ten days visit at Los Angeles, Long Beach, San Diego and other Southern California points with his family.

Miss Lilly Wakefield, who has been in California for some time, spent Monday here, the guest of Mrs. J. C. Phelan, while on her return trip to Winslow.

John H. Page departed last Saturday for his old home at Proctor, Vt. The trip is made that he may assist in straightening out his deceased brother's (W. R. Page) business affairs. He will be absent about a month.

Mrs. D. J. Crighton, accompanied by her son and daughter, Chris and Alice, and Charles Mausfield, son of the editor of the San Francisco Call, arrived here from the Golden Gate City, expecting to remain about two months.

L. O. Maas was struck in the stomach at Anita by a piece of heavy machinery, and while it has caused him some suffering, is in no wise serious. Mr. Maas expects to leave next week for Boston, upon the return of Todd C. Woodworth.

Mrs. John X. McDonald departed for Los Angeles, where she expects to reside in the future. She will probably be joined there about the 1st of July by her husband, when arrangements for building a cosy home will be perfected. Of course John X. does not expect to leave these parts permanently.

The other day a force of six men under direction of Contractor Kilgore started work on the new addition to the I. O. O. F. hall. It is planned to add forty-five feet to the length of the building; the whole of the building will be raised about four feet and a stage placed on the south side. The exterior will be covered with rustic and painted, and when completed will present a good appearance.

By jumping the town something over a week ago and leaving a few unsettled bills, J. H. Duncan precipitated a bunch of trouble for his partner, W. P. Finley. Shortly after Duncan's disappearance, S. Darden, who had been employed by Finley & Duncan in the cash and door department of the local mill, fearing he could not get his wages, got out a writ of attachment on the stock. Mr. Finley appeared before Judge Ranney and had the matter satisfactorily settled.

Last Sunday a number of young men had an altercation on Second street opposite the old postoffice building. It started out in fun and ended up in a free-for-all fight, in which only one of the contestants, however, received a black eye. Warrants were sworn out for three of the boys and in Judge Ranney's court John Neils, Hanford Scott and Fred Schindler were fined \$5 each. In rendering his decision the court stated that there was too much rowdiness displayed on the streets by some of our youngsters and while he made the fine as light as possible, he trusted it would be a lesson to others not to engage in street brawls.

Died En Route.

Undertaker Emerson was asked by year.

wire last Tuesday evening to have a coffin at the depot on the arrival of No. 1. It appears that a young man by the name of Wilkinson, of Rochester, Wis., was hurrying to Tropico, Cal., where his mother was very ill, when he was stricken with heart failure on the train at Pineville, a station near Ash Fork, and expired in a few minutes. The body was placed in the coffin and shipped to the home of the parents at Tropico. The mother was so ill that the news of the death of the son was kept from her.—Kingman, Arizona, Miner.

DEPORTED COLORADO MINERS

WILL RECEIVE FULL PROTECTION OF THE LAW IN NEW MEXICO IF ORDERLY AND PEACEFUL.

Governor M. A. Otero on Monday received the following telegram from the New York Times:

"Will you kindly wire the Times your views on the proposed deportation of citizens of Colorado to New Mexico and what measures the territorial government will take to prevent this course."

To which the governor replied as follows:

"My view is that no difference should be shown between capital and labor in their respective positions, so far as the law is concerned. New Mexico has no objections to any citizens who respect our laws, and we are well able to uphold them under any and all conditions. If the deportees themselves in a law abiding manner, they will be welcome; if not, they are coming to a poor place, as the laws of this territory will be upheld, so long as I am governor. We will not, however, tolerate dictators from any source, and those wishing to work will receive full protection under our laws."

Indian School Notes.

Congressman Rodney was a welcome caller at the Indian school yesterday and he was in company with Messrs. Newell, Ensign and McCollough. Mr. Rodney is a benefactor of the institution and is always a welcome visitor.

Our farmer is busy harvesting his first crop of alfalfa for the season.

The supervisor of construction is expected today and the work of erecting the new ice plant will be pushed to completion in the near future.

Mrs. Hollingsworth from Fort Scott, Kansas, arrived yesterday and was installed as cook at the school.

Miss Martha G. Engle, who has been filling the place of cook for the past month, returned to her position of housekeeper at Acemita last evening.

Mrs. Anna Schandore, who has been filling the place of baker, went to Camp Whitcomb today, where she will spend some time on account of the illness of her little boy. Mrs. R. D. Wilson will fill the place of baker for the present.

School will close on Friday of this week and a number of the large boys will go out to work during the vacation.

STURGES' EUROPEAN CHANGES HANDS

F. E. STURGES STEPS OUT AND JACOB LEVY AND SAMUEL LEVY STEPS IN.

This morning an important business change took place, wherein the business and good will of the Sturges European hotel was purchased by Jacob Levy, of this city, and Samuel Levy of San Francisco, Calif., the new purchasers and managers taking immediate possession. Both gentlemen have had more or less experience in the business, which they have just purchased, and being well known, with plenty of western energy and grit, they will no doubt continue to enjoy the excellent patronage heretofore enjoyed by the retiring proprietor. It is understood that Samuel Levy, who with his wife, will have charge of the hotel and restaurant departments, that there will be no change in the personnel of the present excellent force of employees.

The Citizen speaks for the new management much luck and continued prosperity.

For seventeen years Sturges' European hotel has been popular with the traveling public from the lakes to the Gulf, and from one ocean to the other, and it becomes generally known that F. E. Sturges has stepped out of business harness, many of his traveling friends, who made his place their headquarters while here, will be surprised. Mr. Sturges made a success out of the business, and it can be said by his sagacious and principles which were always right. The business circles of Albuquerque will miss him. It is understood that Mr. Sturges will make his home in this city, but with Mrs. Sturges and son, Lloyd, he will visit southern California and will remain in that exhilarating lower altitude during the hot summer months.

It is a mistake to imagine that itching piles can't be cured; a mistake to suffer a day longer than you can help. Doan's Ointment brings instant relief and permanent cure. At any drug store, 50 cents.

Double Affliction—Santiago, the little 11-month-old child of Hercules Garcia, of Las Vegas, died Tuesday at his home on the west side. The mother of the child died about four months ago, since which time the child has been tenderly cared for by Mrs. Encarnacion Gutierrez. Thus has the father been called upon to bear the double affliction of the loss of his wife and child in one short

NEWELL DISAPPOINTED

His Listeners at Club Relative to What We May Expect of Reclamation Service.

PUMPING PLANT SYSTEM

F. H. Newell, the chief hydrographer of the United States reclamation service, and O. H. Ensign, a consulting engineer from California, who has recently been engaged with reference to pumping plants by the Geological survey, having been driven over the city and vicinity yesterday and having examined the water and pumping conditions, were the guests of the evening at the Commercial club last night, where they were met by many of our citizens, and made statements with reference to irrigation in the Rio Grande valley.

Mr. Ensign made a very interesting statement with reference to pumping plants wherever the underflow water was as abundant as he said he saw it was in the Rio Grande valley, and where coal was as available as it is in this vicinity. He pointed out how a large plant for generating electricity could be erected at any of the coal beds over on the Puerco, or up around Pecos or Madrid, and the electricity transmitted to the valley for use at the irrigation pumps on the different ranches. He detailed the success of such power plants in California, with which he had to do.

Mr. Newell made an extended statement with reference to the reclamation act, and with reference to the preliminary work which is being done in New Mexico, such as measuring our waters, gathering data, taking levels and doing other work of that kind. He showed that the work already done was very extensive, and that there was a large force of men at work in the territory now.

He showed that there had been a great deal of work done in the vicinity of Las Cruces, and also some work clear up as high as White Rock canyon. He also showed there was a large amount of work being done around Las Vegas and down the Pecos valley, and up in the San Juan country, and that the contract for the Hondo project near Roswell would be let pretty soon, and that probably the second project would be the one at Las Vegas, if it turned out on investigation that the water that could be impounded is sufficient.

Mr. Newell's talk with reference to what the Geological survey intended to do in the Rio Grande valley was very unsatisfactory and disappointing to the people of the valley. Major Llewellyn was present and made a statement on behalf of the Las Cruces section of the valley. He is, also, deeply disappointed. He and Delegate Rodney have had a conference over the matter and both they and the members of the citizens' committee, who were present last night, are very much disappointed in the attitude the reclamation service is taking. The service does not seem to be doing anything in earnest in the Rio Grande valley. Delegate Rodney has made up his mind, as he expressed it to The Citizen representative this morning, to have a talk with the president of the United States and the secretary of the interior direct about it. Irrigation matters in the Rio Grande valley under the reclamation act are not at all satisfactory to our people. The progress being made is certainly too slow.

Mr. Newell pointed out the advantage of pumping plants, as stated, and expressed the intention of the service to look into the matter further, and then call upon the people of different sections of the Rio Grande valley to do what the service always requires to be done as a prerequisite to have the government take hold of an enterprise, such as generating, and getting lands pledged to the government for reclamation. Our people are pleased at the pumping prospects, but they regard it as merely auxiliary to reservoir work.

The meeting was a pleasant one in that it gave the people an opportunity to meet Mr. Newell and his assistants, but to the delegates and the people present, in so far as impounding waters and building dams on the Rio Grande is concerned, it was not at all satisfactory. The people in the valley feel that the influence of Mexico, Texas and a certain color of interested people at El Paso are really hampering and blinding the progress of the government in the Rio Grande valley. In New Mexico, and there is to be a concerted movement made by our people to get to the bottom of it and see if something cannot be done about it.

A delegation was in from Casa Balazas to see Chief Newell about building a dam in the Puerco for the benefit of the people there, and their interview was very satisfactory. Mr. Newell promised to send a man to look into the matter within two or three weeks.

At the handsome home of Mr. and Mrs. Joseph Price, of Socorro, last night at 7 o'clock, their daughter, Miss Essie Price, one of Socorro's most popular young ladies, was given in marriage to Simon Bitterman, a well known young business gentleman of El Paso.

The ceremony, which announced their young people husband and wife, was said in beautiful words by Rabbi Kaplan of this city, to the young couple under a canopy of green and white, the ceremony ending with a shower of rose leaves. Little Aime Stern, the pretty daughter of Mr. and Mrs. Simon Stern, dressed in white, was the beautiful ring bearer.

Immediately following the marriage a banquet of choice viands was served, at which the couple were showered with congratulations, and at which the handsome and numerous presents, consisting largely of cut glass and silverware, were shown.

The parlor of the home was decorated in green and white, and dining room in pink and white.

The bride wore a gown of white satin, trimmed with point lace and pearls, and she carried a Bible. She also wore a white veil, fastened with a beautiful pinhead, the gift of the groom.

The bridegroom was Miss Lena Price, her twin sister. Her gown was of pink, and she carried a bouquet of pink carnations.

The groom and his best man, Dr. Bloomstein of El Paso, wore the conventional black.

The newly married couple took the south bound train early this morning, and after a short wedding trip will make their future home in El Paso.

was said in beautiful words by Rabbi Kaplan of this city, to the young couple under a canopy of green and white, the ceremony ending with a shower of rose leaves. Little Aime Stern, the pretty daughter of Mr. and Mrs. Simon Stern, dressed in white, was the beautiful ring bearer.

USED KEROSENE AND THE RESULTS

MRS. WALTER RALPH BADLY BURNED IN A FIRE YESTERDAY AFTERNOON.

The fire department had a run yesterday afternoon about 4:30 o'clock to the home of Walter Ralph. Mrs. Ralph had lighted a fire in the cooking stove and the fire not burning up right away she decided to try kerosene and oil as with almost fatal results.

As soon as the oil touched the coils, which were unshielded, there was a terrific explosion and the flames flew to all parts of the room. Mrs. Ralph was standing in front of the stove and received the best part of the flames. Her dress immediately took fire, and in her efforts to quench the fire on her person, she came too close to the walls of the house, which were covered with cloth, setting fire to the walls. The fire spread rapidly to the other parts of the house. Her small child was sleeping in another room at the time, and in her efforts to rescue the child Mrs. Ralph was very badly burned about the neck and arms.

She was removed to the home of Joseph Mooney, at 512 Hunting avenue, where Drs. Wroth, Pearce and Wylder dressed her burns. The house was completely gutted.

Mr. Ralph called at The Citizen of this morning and said that he had found \$15 which was supposed to have been lost, and also said Mrs. Ralph was doing nicely this morning, but that her burns were very painful.

NEW MEXICO DELEGATION TO CHICAGO CONVENTION

IT WILL LEAVE ON FRIDAY AFTERNOON AND WILL MAKE ITS HEADQUARTERS AT THE AUDITORIUM ANNEX.

The New Mexico delegation to the republican national convention, will leave the territory on Friday forenoon on Santa Fe train No. 2. Governor Otero had intended to leave on Saturday morning, but he received telegrams yesterday from Colonel W. H. H. Llewellyn and other delegates to join them on Friday forenoon and he will probably do so. Governor Otero is chairman of the delegation. Captain W. E. Dams, secretary of the delegation, has already gone on to Chicago to make arrangements for the accommodation of the delegates. Hon. Solomon Luna, member from New Mexico, left last night for Chicago as a number of important matters are to be taken up by the committee before the convention convenes on June 21, among these being the contests from Wisconsin and Delaware.

Nearly all the alternates from New Mexico have signified their intention of going to Chicago, and probably all will go. Delegate B. S. Rodney will also be among those at Chicago next week. Yesterday morning Governor Otero received a cordial invitation from Colonel J. E. Hurley to join him in his private car at Topeka, Kansas and to be his guest from Topeka to Chicago, which invitation the governor will accept. The delegates and alternates from New Mexico to the republican national convention are:

Delegate at large, Governor M. A. Otero; delegate from the first district, Territorial Auditor W. G. Sargent; second district, Captain W. E. Dams; third district, Colonel W. H. H. Llewellyn; fourth district, David J. Leahy; fifth district, H. O. Bureau.

Alternates at large, Colonel W. H. Greer; first district, George W. Arnold; second district, Clark M. Carr; third district, W. H. Newcomb; fourth district, Herbert J. Hageman. The delegation will make its headquarters at the Auditorium Annex.

For sick headache take Chamberlain's Stomach and Liver Tablets and a quick cure is certain. For sale by all druggists.

Dr. A. F. Morrison, who is on missionary work at Las Vegas, has received a letter from Silver City which tells of the continued drought conditions in Grant county. The writer says that cattle are dying by hundreds and that the rain which has fallen in spots has been quite insufficient to bring any substantial relief.

Dr. J. B. Cutler, in charge of the local railway hospital, who was out west on professional duties, has returned to the city.

Railroad Topics

Conductor W. S. O'Brien has been reinstated on the Winslow run.

Conductor Geo. Irwin returned to Winslow from a visit to Kentucky.

Proctor's gang has been busy the past few days rebuilding the water treating plant at Laguna.

When completed, the Santa Fe coast line will have a most complete hospital at this point. Work on the structure is progressing nicely.

Mrs. C. A. Morrison, of El Paso, is here on a visit to friends.

The lady is the wife of the city ticket agent of the Santa Fe at El Paso.

Frank Myers, a popular young clerk at the local shops, will leave in a few days for the east. He will, of course, take in the World's Fair.

A. M. Wilbur, a machinist handy man at the Needles shops, had his right arm severely scalded the other morning. He was taken to the hospital at Los Angeles.

A. N. Brown, general freight and passenger agent of the El Paso & Northwestern, accompanied by Photographer Humphries, left El Paso yesterday on a trip over the line.

The Southern Pacific, Pacific system, is arranging to have yellow fuses fused to all trainmen for use in place of the red fuses, when it is necessary to throw out one to cause a following train to slow up.

The Winslow Mail says: The strike breakers are to have a little reading room of their own. In the center of their tent outfit tents will be one large tent, in which the company will place books and magazines for the use of the men.

W. R. Huber, J. S. Alford and E. V. Stewart, connected with the telegraphic construction service of the Santa Fe, were here last night, and went north this morning. They are rebuilding the lines a few miles north of this city.

C. G. Jones, president of the Arizana Valley & Western railroad, which is a part of the "Pecos" system, passed through El Paso en route to Cananea, where he is going to look after some mining properties in which he is interested.

The Santa Fe will soon have the best water situation on the Grand Canyon road. A steel tank is being erected at Anita, by Rickman's gang, and water will be hauled from Williams and stored at Anita. The water will be handled from the cars by a gravity line.

It is understood that the address of J. B. Buckalew, the third vice president of the Machinists' Union, at Winslow Monday night, was well received, although the audience was small. Mr. Buckalew will visit all the division points on the Santa Fe coast lines, and hopes to return to Albuquerque in a few weeks.

Simon Horshberg, a young man who had been discharged from the employ of the Stubbs Contracting company, and later entered the employ of the Santa Fe as a shop man at Needles, worked four hours, and while attempting to take apart a 32-calibre bicycle revolver, discharged the gun, shooting himself through the right hand.

W. H. Garby has filed a suit in El Paso against the Mexican Central railroad for \$3,000 for personal injuries received while serving as a brakeman on that road. He says that a handhold on a freight car broke near the station of Symon and precipitated him to the ground, injuring him permanently. He says that he was earning \$125 a month, Mexican money, at the time of the accident.

The Needles Eye says: The local ticket agent's office of the Santa Fe sold over 1600 worth of tickets Tuesday evening between 8 and 9 o'clock. The principal reason for the big sale arises from the quitting of about forty of the employees of the railroad company in the local shops. They were of foreign nativity, evidently, and as a class would not add much to the increase of our standard of citizenship.

Despite the fact that John McNell, president of the "boilermakers" and iron shipbuilders' union, has disavowed the present strike of the boilermakers on the Illinois Central system, the men are still out. In a message to the Illinois Central officials he states that he does not approve of the action of the men and will not uphold them. The strike is believed to have been inaugurated by irresponsible parties and will probably be ended off at once.

Superintendent Jones, of the Southern Pacific at Tucson, has just issued a bulletin stating that in future conductors taking freight trains out of El Paso west will advise dispatcher's office by telephone, after they have received way-bills at the freight house that they will call in a few minutes for orders. This ruling is given in order that the dispatchers may ask Tucson for orders and have them ready by the time the conductor arrives, that the delay in getting out may be as small as possible.

Engineer Joe Finley of San Bernardino, an old friend of W. P. Finney, stopped at Williams today on a visit to the Grand Canyon.

The News says: The Santa Fe laid off all the deputy sheriffs at Williams except one, James Bradshaw, last Sunday, which signifies that they could not be used as a danger from the strikers. "Tis an ill wind that blows nobody good," as while no machinists were out at Williams six guards were given employment for thirty-three days at \$3.75 per day.

Killed by a Train.—Last Tuesday evening about 5:30 o'clock a few miles this side of Yucca, Engineer Walter J. Bardsell saw a black object lying in the middle of the track, says the Needles Eye. As it was down grade and he was pulling a passenger train, he had no time to stop be-

fore striking the object. When the train did stop it was found to be a man badly cut up, but as the body was so mangled it is presumed that he had been struck by a preceding train or had fallen off a train. Papers on the body are said to have identified the man as Thomas K. Haley, and as Haley was seen on the rear of an engine going out of Kingman some hours previously, it is presumed that he fell off the rear of the engine and was killed by the fall. The body was buried by Sheriff Henry Levin, but as yet no inquest has been held.

POLICEMAN MARTINEZ MAKES DENIAL.

A number of citizens believe that Policeman Mike Martinez showed spite work in the arrest of W. I. Essex, foreman of the local machine shops. The gentleman appeared before Judge Crawford yesterday, as stated in The Citizen, on the charge of carrying a pistol. He has a commission as a deputy sheriff. At one time Martinez was an employee of the local shops, and some say that he does not like Mr. Essex.—Citizen, June 14.

The above paragraph, relative to the arrest of Foreman Essex, has called forth a denial from Policeman Martinez. The policeman and The Citizen representative this morning stated that both this paper and Morning Journal are mistaken in the statement that the arrest of Mr. Essex was the result of spite work on my part. "I have nothing whatever against the man," said the policeman, "and was never discharged from work at the shops. I quit of my own accord. I will admit that when I quit Mr. Essex and myself had some words, but his arrest was not the result of any spite I held against him. Had I thrown my hand around him, as I should have, I do not doubt but what I would have found a pistol concealed in his hip pocket."

They Object.—The committee of the Santa Fe board of trade which consisted of Hon. L. B. Prince, I. Sparks and S. Spitz, has addressed strong communications to the general manager of the Santa Fe railway and to the postmaster general setting forth the disastrous effects of any further reduction of the train service between Santa Fe and Lamy. A letter has also been sent to Delegate Rodney asking his action as to the mail service, as the discontinuance of connection with the 7:10 p. m. train No. 2 from the east would upset all the present mail arrangements, both coming and going.

Lost Both Legs—Hidalgo Gutierrez, a man about fifty years old, a sheep herder, during the rain Sunday afternoon, crept under a car of a train in order to keep out of the wet, in the Las Vegas yards, near the ice house, says the Optic. He had forgotten about the switch engine, which, it is thought suddenly coupled onto the train, and in attempting to get out he was run over. One leg was cut off below the knee and the other across the foot. Dr. Smith attended the injured man and found it necessary to amputate one leg above the knee. The injured man has a good chance for recovery. He was taken to the house of a friend on the west side.

L. F. Parlier of St. Louis, general solicitor of the St. Louis & San Francisco railway, arrived in Santa Fe Monday evening and registered at the Palace. Mr. Parlier was, in the early days of the United States Court of Private Land Claims, an assistant attorney for the United States before the court, and was at Santa Fe to attend the closing sessions of that body. Mr. Parlier is chairman of the republican delegation from the state of Missouri to the Chicago convention and will be a

NEW MEXICO TOWNS

ALAMOGORDO.

From the News.
L. M. Jackson and wife went up to Clondorff. Mrs. Jackson will remain during the summer.
Mrs. E. L. Barnes and little son arrived from Rockwall, Texas, to visit a sister, Mrs. E. R. Williams.
Mrs. Caldwell, of Corsicana, Texas, arrived to visit her daughter, Mrs. Thomas Hodge, and will remain through the summer.
Miss Lillian Laurie returned home from California, where she was in school, and will spend vacation with mamma and papa.
Mrs. M. Ruthman and mother, Mrs. Hodge, left Clondorff to spend the summer. The Hodge boys will go to St. Louis to take in the big show.
Mr. and Mrs. Stebbins of Chicago, who have been spending the winter in El Paso, are in the city for a few months. Mrs. Stebbins is connected with the Chicago Conservatory of Music.

From the advertiser.
Reports from the Weel country state that a good rain was enjoyed by ranchmen and cattlemen of that part of the country on Tuesday evening.

Mrs. J. H. Laurie expects to leave next week to spend the summer at her girlhood home in Canada. She will be accompanied by her daughter, Miss Olive.

R. B. Armstrong, who has been connected with the R. H. Pierce Mercantile company for the past several years, has sold his interest in the firm to Mr. Pierce and will retire in the course of several weeks.

Perfecto Jaramillo, one of the most prominent native citizens of the town, died of heart failure, resulting from a critical stage of typhoid pneumonia. He had been sick about five days. Jaramillo came here several years ago from Las Vegas, where he was well connected with the best families of San Juan county. He was an intelligent man, engaged in business, and had accumulated considerable property.

From the Journal.
R. L. Larkin, of Gallup, representing Ginn and company, of Chicago, was in the city on business this week. He visited Clondorff while here.

Mrs. Alma Weigle, who suffered from a severe attack of appendicitis some time since, is still in very poor health. She has not improved as rapidly as had been hoped.

Hornace H. Buell, the artist, left for St. Louis, where he will have charge of the mounting of his painting of the city of Alamogordo, which will be displayed with the New Mexico exhibit at the World's fair, St. Louis.

W. H. Slaughter was elected as school director for the three year term vice G. J. Wolfinger. As soon as Mr. Slaughter qualifies, a meeting will be held by the directors the object of which will be to elect the principal for the ensuing year.

George Spurgar, of Bainbridge, Ohio, who has been in Los Angeles, Calif., for his health, died on the train Sunday while en route to his home. The remains were taken off the train here and were embalmed and shipped to his home in Bainbridge Monday. Dr. W. W. Davis, of Bainbridge, Ohio, was traveling with him and has charge of the remains. Death was from tuberculosis.

RATON.

From the News.
Miss Marion Blackwell has returned from her school studies at Colter college in Missouri.

Dr. A. G. Stalnesker, of Tunnelton, West Virginia, formerly a resident of Raton, is the guest of Mr. and Mrs. W. F. Ruffler. It has been a number of years since he left here and he commented greatly on the growth and improvement during that time.

Mrs. W. F. Deener gave a dinner in honor of her father and mother, Mr. and Mrs. Van Way. Refreshments were served for twelve. Those present were Messrs. and Madams J. W. Sloanek, William Pugham, Van Way, Deener, Mrs. Price, Mrs. Butcher and son and George Deener.

Otto Plety and Thomas Roberts returned the first of the week from a thirty day trip in southern Kansas and northern Oklahoma. While there they made final proof on their quarter section claims. The boys are working here in the shops and have set an example worthy of our men copying, securing by claim a start for a home.

Prof. Wm. Henry, superintendent of Raton public schools, returned from a business and pleasure trip to St. Louis, Mo. While away, Prof. Henry had some queer experiences with the Kansas floods at many places being detained by high water and at one place, while at supper, the water rose so high between his hotel and the depot that he was obliged to voyage back to his train.

From the Range.
The telephone company is putting in a new switch board at the central office.

The three-month-old baby of Mr. and Mrs. Jas. Campbell is recovering from a severe attack of pneumonia. Mrs. A. B. Gale and grandchild, a little daughter of James Gale, arrived from Marlin, Colorado, for a few weeks' visit with Mr. and Mrs. Marion Littlefield.

Mrs. Jas. Burns left for Chicago, where she will undergo a surgical operation in Vincent hospital. She was accompanied by her daughter, Miss Mary Burns, and Mrs. C. F. Burns.

J. C. King returned from Ojo Caliente, to which place he had taken his aged father, who is afflicted with sciatic rheumatism. He left the old gentleman improving very rapidly, which speaks well of the wonderful

curative powers of the waters for the Ojo Caliente.

From the Gazette.
Miss Lillian Burman returned from a pleasant two weeks' visit with Mrs. Jerome Troy at Harmony ranch.

Mrs. M. Fiesner left for Texas, called there by the death of her son-in-law, Mrs. Kyle, who died of heart trouble in a hospital.

Miss Evelyn Shuler arrived home from Colorado Springs, where she has pursued her studies at Colorado college the past year. She was accompanied by her sister, Miss Winifred, who has been visiting in Denver and Colorado Springs.

Rev. Magill preached an inspiring sermon to young people on behalf of the Christian Endeavor society last Sunday evening. At the close of the service the Christian Endeavor officers for the ensuing term were installed by prayer. They are: Miss Alice Clark, president; Miss Della Clements, first vice president; Mrs. Harvey, second vice president; Miss Nellie Thorpe, secretary and treasurer.

FARMINGTON NOTES.

From the Times-Herald.

Y. S. Blake this week gave Mrs. E. Y. McAlpine a deed for the two acres of ground where the cannery is located. Mr. Blake was satisfied with the progress of the work and execution of the deed.

J. L. King, G. A. Inman, F. Williams and W. Duran, all of Hale Center, Texas, are here looking over the country with a view to locating and are very favorably impressed with what they have seen.

Filomino Almaraz, a Mexican who had been working for W. N. Knight, was found dead in Mr. Knight's barn the other morning. Judge Fay held an inquest and the jury found he had died of heart failure.

The other evening a surprise party was given Dr. O. C. McKee at his home on Main street by some thirty of his friends, the occasion being the doctor's 29th birthday. The evening was spent in playing bridge and other games until a late hour, when the party repaired to the dining room where the tables were spread with ice cream, cake and other light refreshments of which all partook and enjoyed. The party joined in wishing him many happy returns of his birth and bidding him good night they all departed for their homes.

Among those present were Mr. and Mrs. C. W. White, Mr. and Mrs. Abe Howe, Mr. and Mrs. O. S. Evans, Mr. and Mrs. H. A. Knight, Mrs. Edna Townner, Mrs. Keelefe and Mr. John Rogers.

THE RATON GAMES

TWO RATTING GAMES PLAYED BETWEEN RATON AND LAS VEGAS CLUBS.

The ball games at Raton Saturday and Sunday are still the subject of considerable interest. The facts have come to light concerning one of the games, that of Saturday. It seems that the Las Vegas team in Saturday's game were up against an umpire who repeatedly gave rank decisions against them; so rank, in fact, that the people of Raton who witnessed the game almost unanimously sympathized with the Las Vegas team and say that the team from here should have had the decision in the Saturday game. Up to the seventh inning the score was even to six in favor of Las Vegas, but in the seventh inning, through the unjust decisions of the umpire, the Raton team scored five runs and in the ninth made one.

The Sunday game was the best that was ever played on a Raton diamond. Up to the seventh inning the score stood 1 to 0 in favor of Raton. In the seventh inning Carmen went to the bat and made a hit to right field, which was fumbled, and he reached second safely. Rhodes then came to the bat and made a home run, the feature of the day, bringing in Carmen, thus making the score two to one in favor of the Las Vegas team, the spectators going wild. In the eighth Raton scored one, tying the game; in the ninth neither scored. In the tenth inning Raton scored one and succeeded in shutting out the New-Low City Haddies. Division Master Mechanic Hanley umpired the Sunday game and gave entire satisfaction both to the spectators and the Las Vegas team. The local boys speak in the highest praise of their reception by the Raton people and the Raton team—Optic.

For advertisement, published elsewhere in The Citizen, it will be seen that the Las Vegas team will be here for a game with the Albuquerque Browns Sunday afternoon at the fair grounds, and the visitors intend to play hard to win from the Browns. Besides the game of base ball, there will be red hot bicycle races and a shoot from the Gun club. Admission, 35 cents; grand stand free.

COOK-RAWLINS

WILLIAM PHILLIP COOK AND MISS KATIE RAWLINS MARRIED

The pleasant country home of Mr. and Mrs. W. K. Rawlins, just north of Old Albuquerque, was the scene of a happy event last evening, when their daughter, Miss Katie Rawlins, was united in marriage to William Phillip Cook.

Promptly at 8:30 o'clock, under a canopy of evergreens and roses, and in the presence of about sixty invited guests, Rev. Mandalar, of the immaculate Conception church, spoke

the holy words that united the lives of these young people for better or for worse. The beautiful ring ceremony was used. Mrs. Rose Berry played the wedding march.

The bride was very becomingly groomed in white veil and lace and carried a bouquet of white roses. She was attended by Miss Sadie Strain as bridesmaid, while Mr. Virgil Sparks acted as the groom's best man. The flower girls were two little sisters of the bride and groom.

Mr. Cook is an employee of the Colorado Telephone company and has been here about three years. He is a son of Mr. and Mrs. J. W. Cook, well-known people of Las Vegas, who came down yesterday to attend the wedding. The bride is the daughter of W. K. Rawlins, night operator for the Postal Telegraph company, and has a large circle of friends in this city.

They received many valuable and useful presents, the groom's present to the bride being a handsome \$1000 Kimball piano, bought of the Whitson Music company.

Congratulations were followed by a beautiful wedding supper, after which Mr. and Mrs. Cook were driven to their new home at 218 West Silver avenue, where they will be at home to their many friends.

This morning early risers on West Silver avenue knew that a newly wedded couple occupied house No. 218, for on the front of the house mischievous friends had posted these suggestive signs:

"We're just married. Don't tell any one."
"Oh, my."

"I hear's beat as I."
"Lavey and Ducky."
"Oh, my!"

"Oh! Yes. Married. Well, I guess."

A pair of old shoes and two pairs of old corsets hung conspicuously on the front of the house.

On the back porch of the residence a regular wire net had been placed, and the newly wedded found it difficult to get out of the rear door. All these evidences of a marriage have been removed, and No. 218 West Silver avenue is serene this afternoon.

BOOTH GOES TO TRIAL

TAKEN BACK TO GLOBE TO STAND TRIAL FOR DOUBLE MURDER.

Sheriff C. P. Rogers, of Globe, was in the city and took back with him J. Booth, a Gila county murderer. The grand jury of Gila county is in session and Booth will then be given a trial.

It will be remembered that Booth, better known as "Woody Kid," killed two boys, one named Berry and the other a Mexican, in the Tonto country, last December. The two boys were in their camp near the sheep which they were caring for, when Booth approached and shot through the window, killing both of them. They were sitting by a fire and fell into it, the bodies of both being badly burned when found. At the time "Woody Kid" was arrested his brother was also taken into custody on the same charge, but the former pleaded guilty and saved his brother. The murderer was brought to this place for safe keeping as it was feared that the citizens of Gila county would lynch him if kept in that county jail. He will now receive his punishment through the court—Phoenix Gazette.

Ready for the Occasion.

Brooklyn Chronicle—Opportunities do not happen. They are cultivated within the man. His "chances" are in exact proportion to the correctness of his ideas, the amount of his energy and the range of his ability.

Good luck lies in good preparation. Senator Hoar in his autobiography tells of "an amusing piece of good fortune" that happened to him at the beginning of his service in congress. He was a country lawyer from an interior town, but was placed on a committee on revision of the laws, presumably because that committee rarely had anything of consequence to do. Being from country practice, he had little knowledge of national jurisprudence and none at all of admiralty law. But he proceeded to learn. Before he had time to read far a communication came to the committee from the supreme court, asking for a change in the law governing defendants in admiralty. Not a member of the committee knew a thing about it except Hoar. It had happened to come within the range of his reading. He stated to the rest of the committee the difficulty, the necessity for a remedy, and quoted some recent decisions. His associates were astonished that a man from the country of whom they had never heard, should have the law of admiralty at his tongue's end. From that moment George F. Hoar has been a great man in congress. On many another occasion since, when great questions have come up, he has "happened" to be prepared for them. It is a way he has. It is the way of all men who achieve success. The genial sun of fortune shines alike for all of human kind, but there is no magic in it that can bring vegetation out of sterile ground.

Captured a Deer—A few days ago, while a Santa Fe construction train was not far from Lamy, W. E. Smith and Geo. Neff saw what they thought was a sick burro lying near the track, says the Optic. Being kind-hearted gentlemen and loyal to New Mexico's choicest animal product, they went to what they could for the little beast. Imagine their surprise to find instead of a burro a full grown deer. The animal had doubtless been almost famished by thirst and at last reaching a stream had drunk himself so full that he could not walk. The men carried him to the train and he was taken to Lamy. There the deer was doing on milk and eggs. He is said to be doing well and will, if possible, be tamed.

Territorial Topics.

Colonel Twitchell Sued—In the district court for Santa Fe county, suit has been filed by Hon. T. B. Twitchell versus R. E. Twitchell on account of a promissory note dated December 22, 1897, for the sum of \$1,078.55, interest and costs.

Petrified Human Leg—George W. Kutz & Co., of Monero, Rio Arriba county, notified Governor Otero that they had shipped to Leo Herack of Santa Fe a petrified human leg, which was discovered some time ago on top of a vein of coal in the Kutz mine at Monero. The suggestion is made that the curiosity be placed with the New Mexico exhibit at St. Louis.

Has Stopped Work—A. R. Greig of Chicago, formerly of Alamogordo, writes Governor Otero that he has been compelled to relinquish work on his million dollar sanitarium project at Alamogordo, and had turned over his interest to Dr. Martin of Buffalo, who is in a fair way of successfully completing the financial arrangements for the sanitarium which is to be built at Alamogordo for the accommodation of wealthy sufferers from tuberculosis.

Trees and Grasses to be Examined—J. C. Holsinger, expert of the forestry division of the department of agriculture, has been directed to make an examination of the trees and grasses on the townships in San Juan and Rio Arriba counties, recently withdrawn from public entry and which it is proposed to erect into a forest reserve. Mr. Holsinger, it is expected, will commence this work within a week and will be accompanied by a surveyor and other assistants.

Did Not Return With the Horse—Last Sunday morning about 8 o'clock a young fellow by the name of Lon Middleton, who has been around Alamogordo the most of the time for the past year, went to the livery stable of A. J. Buck and hired a horse and saddle, ostensibly to go out on the plains and get a horse. He rode away and has not been seen since, and Mr. Buck surmises that he stole the property. The outfit was worth about \$65 and description and reward cards have been sent out broadcast for his apprehension. The reward offered for the return of the horse and saddle is \$15.

Lieutenant Collins Weds Miss Hughes—Lieutenant Robert L. Collins and Miss Emily Hughes were married at Fort Bayard recently. The wedding was held on the porch of the nurses' home, this being decorated with white canvas and decorated with American flags and greens. After the wedding a reception was held on the nurses' porch, to which all the officers of the post were invited.

The bride came to Fort Bayard about a year ago and is a professional nurse. The groom is a second lieutenant in the Second cavalry. He came to Fort Bayard about two years ago from Cuba. He has served as adjutant in the post for about a year and a half. The newly married couple left for the Philippines, where Lieutenant Collins has been ordered for duty.

Ejectment Suit Decided—Judge John R. McPhee in chambers at Santa Fe heard the cases of Thomas Borrego et al. vs. Josefa Guillen, and of Trinidad Borrego vs. Josefa Guillen, the two cases being combined for trial. They were suits in ejectment involving four parcels of land and a house valued at \$1,500 and the case was brought in the district court for Rio Arriba county, the property being situated just across the line from Santa Cruz, Santa Fe county. The plaintiffs claimed the property by right of inheritance from their father, deceased, but the defendant produced a deed executed by the father of the plaintiffs, and judgment was thereupon given in her favor. Judge McPhee has given a number of cases booked to be heard in chambers during the next few days.

THE TALK OF A DEMOCRAT

Mayor Gibson, of Santa Fe, is interviewed by Hearst's New York American.

FAVORS HEARST FOR PRESIDENCY

From New York American, June 12.

A. R. Gibson, mayor of Santa Fe, New Mexico, and one of the leading democrats of that territory, which he instructed its six delegates to the St. Louis convention to vote first, last and always for W. R. Hearst for the presidential nomination, is at the Gilsey House with a party of mining engineers. He is negotiating a mining deal with eastern capitalists involving a million dollars.

Mr. Gibson is an ardent advocate of statehood for New Mexico, and a bit of opponent of the plan contemplated by the Omaha bill, which has passed congress, of joining New Mexico and Arizona into one state. Last night he spoke of the loss of the southwest stream had drank himself so full that he could not walk. The men carried him to the train and he was taken to Lamy. There the deer was doing on milk and eggs. He is said to be doing well and will, if possible, be tamed.

he said, "brought to public attention, through the wide publicity it was given in Mr. Hearst's newspapers, the wonderful resources of New Mexico. It demonstrated the fact that in the mining industry we are today where Colorado was thirty years ago, and that the properties now being worked in New Mexico are giving satisfaction to the operators."

A Wealth of Coal.

Within the last two years immense coal fields have been discovered. Coal veins from ten to twenty feet have been developed in various parts of the territory. In the last three years we have led the country in mileage of railroad building. Through Mr. Hearst's visit the subject of irrigation was shown to be one of great importance to the people of New Mexico. It is as contemplated, congress makes an appropriation for government irrigation, hundreds of thousands of acres of arid land in our territory can be reclaimed.

"Attention was drawn, by Mr. Hearst's tour, to the great possibilities we present for stock raising. We suffer a smaller percentage of loss and enjoy a greater percentage of gain in the raising of cattle, sheep and goats than any other territory of state in the Union."

"There are also wonderful opportunities for those who desire to engage in the cutting of timber and manufacture of lumber. We have millions of acres of virgin timber, where never a tree has been cut."

"The climate of New Mexico cannot be duplicated anywhere in this country. It is wonderfully beneficial in its effects upon tuberculosis patients. There is an outdoor sanitarium called Summit, about a mile from the capital, occupying about 200 acres of land, covered with small tent houses. This is the only open-air sanitarium in America, aside from the two established by the government, one at Fort Baird and the other at Fort Stanton. People go there from all over the country, and in innumerable cases there is a very small percentage of deaths."

"Should be Next President." "All these advantages of New Mexico were brought to the public attention by Mr. Hearst. We are greatly indebted to him for the interest he has taken in us. If we had a few more men like Mr. Hearst advocating our cause, statehood would be assured to us. You may feel certain that the people of New Mexico, irrespective of politics, are with Mr. Hearst, to a man. If we had the right to vote for him at the polls, he would receive 95 per cent of the votes of our territory. Even the children in our country have become interested in his canvass for the nomination."

Why, today I received a letter from my 16-year-old daughter, Ida Inez Gibson, which shows what politicians our girls are coming to be."

Mr. Gibson produced a beautifully worded and well written letter from his daughter, in which she begged him to "do all in your power for Mr. Hearst. He certainly should be our next president."

"Aside from his absolute fitness for the presidency," added Mr. Gibson, "our people entertain a most profound sense of admiration and gratitude for Mr. Hearst because he is in our champion. Until he journeyed to New Mexico with his congressional party, prospects of being admitted to statehood seemed extremely remote. We expect that, with the assistance of such men as Mr. Hearst, we will double our population within a few years after we are recognized as a state."

With Mayor Gibson are General Henry Ide Willey, former surveyor general of California and Supervisor of the Pacific Coast Geological Government survey; George Peck, a prominent banker of Cincinnati, and Richard P. Travis, a banker at Chicago. He says the consummation of his mining deal will mean the taking of more money into New Mexico than the territory has ever seen, and that it will stimulate all the business interests there.

WEEKLY CROP BULLETIN

Santa Fe, New Mexico, June 14.—The temperature has averaged nearly normal, warm, bright days, prevailing, with considerable wind, and some sand and dust storms, especially in northern counties. Good local showers occurred at the beginning and ending of the week over the northern half of the territory, further relieving the drought, but southern counties remain dry, and stockmen and ranchmen are greatly discouraged.

Northeastern counties are still the most favored, a little planting is being done, stock is slowly improving, losses have practically ceased and shearing is beginning with prospects much more favorable. Other northern counties are slowly improving, but irrigation water is very scarce, or entirely lacking, little or no planting has been done, and the outlook is gloomy; first crop of alfalfa is being harvested, with light yield. On low lands fruits continue in fair condition, sustained by the underflow.

In southern counties, especially the southwestern part of the territory, conditions remain discouraging, high winds and dryness prevail, little or no water is available for irrigation; stock continues poor and losses are still large, some ranches are shipping stock to northern ranges; no peaches are promised, and but few Apples.

In northern districts corn and vegetables have been improved by the showers, but wheat and oats were too far damaged to be much revived.

The following extracts are taken from reports of correspondents: Albert—H. M. Hanson—Broom conditions still in evidence, no general soaking rain, but country begins to look green; grass very short and cattle, especially, find it difficult grazing; further losses in sheep not looked for. A little planting being done but much less than usual. Rainfall, 0.58 inch.

Chester—Robt. Martin—Very high winds, water for irrigation low; range and stock in very poor condition. Deming—C. B. Holzworth—Clear, warm week, without rainfall. Aurora—J. C. Lucero—Good rain first of week, with some hail; much

benefit to crops and grass after the long drought; cattle and sheep look good so far; lambing nearly over, but increase small, those saving 50 per cent think they have done well.

Bloomfield—W. A. Hallinger—Nights continue cool, but plants making fair growth; most of the range stock taken to the mountains. Cleveland—Daniel Cassidy—Light showers, not sufficient to start grass; wheat and oats have nearly died out; alfalfa promises about one-third crop; streams dried up.

El Rio—P. Lopez—Good showers during the early part of the week.

Estancia—P. A. Spockman—Good two-hour rain here afternoon of the 12th, and still raining at 6 p. m.; some hail accompanied the shower, but caused little damage; rain of great value to ranchmen and stockmen. Showers have also fallen in surrounding country; sheep fed during lambing doing well under the circumstances.

Folsom—Jackson Faber—Cool and cloudy, with several good showers; range good and stock doing well; alfalfa which escaped damage by hail ready to cut; light yield; irrigation water scarce; rainfall, 0.76 inch.

H. W. Wooten—John Woodgate—High winds and lack of moisture have withered all vegetation; stock in poor condition.

Hermosa—Philip Zoolter—Broom conditions; little water and no grass; some of stock heavy; not enough rain to lay the dust for past nine months; on eastern slope of Black range; stock in very poor condition; streams mostly dry and high winds prevail; no peaches and low apples; outlook very discouraging.

Hobart—W. H. Hough—Hats first of week did not extend far; improved corn and vegetables somewhat, but came too late for wheat; alfalfa doing well.

Laguna—Ope Wells—No rain since last report, cloudy and threatening, but rain has not fallen; conditions, however, continue favorable for showers.

Las Vegas—Wm. Curtis Bailey—Two light showers during week and heavy rain Saturday afternoon, total 0.62 inch.

Los Alamos—Wm. Frank—Good heavy rain on the 12th; with sunshine everything that is planted will grow rapidly.

Lucero—Mary Lodge—Beneficial showers first of week; crops and range slightly improved; good showers in adjacent country.

Miera—Francis Miera—Good heavy rains during the week; drought broken; prairie look green and grass advancing rapidly; conditions on range changed; shearing time at hand and beginning made; information from surrounding country indicates that rains have fallen and stock has begun to improve.

Mineros—Chas. Dennis—No rain and water low; cattle poor; some ranchmen have to feed to keep them alive, and many cattle dying; outlook serious, none in condition to ship, and great distance from feed to water causes many to drop by the way as exhausted; first crop of alfalfa harvested.

Mountainair—John W. Corbett—Grass starting slowly in localities, including this vicinity, but general rain badly needed.

Orono—N. J. Neil—Very dry, some rain in narrow strips, but nothing general; grass starting, but more moisture needed; lambing over and in increase about 50 per cent.

Ojo Caliente—A. Joseph—Good showers first of week; irrigated crops look promising; streams hold out well, and grass on range is beginning to grow; stock in fair condition, everything considered.

Pinos Altos—L. B. Robinson—Dry and windy; cattle very poor and dying; Angora goats doing well on mountain ranges; fruits doing very well; no vegetation starting.

San Rafael—Chas. M. Grover—Men returning from lambing camps tell same story, sheep very poor and in increase from 10 to 60 per cent; rains of past month, while not ample, have kept considerable number of sheep from dying and general tone is hopeful; calf and colt increase considerably better than that of lambs.

Santa Fe—U. S. Weather Bureau—Temperature nearly normal; light shower first of week, refreshing vegetables, coloring Red Wagon. Irrigation, frequent sprinkles since with good showers in vicinity; some early cherries coloring and other fruits making fair growth; first cutting of alfalfa being made on the low lands; slight increase in water for domestic purposes, but none available for irrigation; precipitation, 0.30 inch.

Silver City—Chas. H. Lyons—No rain yet and condition of range could hardly be worse; river still has water for irrigation; first crop alfalfa harvested; almost continuous high west-easterly winds.

Tularosa—John A. Shryock—No rain and little prospect for future; sheep and goats have done very poorly, small per cent of lambs and kids saved; some cattle dying, but not so many as in other parts of the country; ranch men are shipping some stock to northern ranges.

Vermejo—H. W. Adams—Weather cool and vegetation making slow growth; heavy rains first of week.

Wagon Mound—J. L. Guna—Some what warmer; rainfall slight; alfalfa and gardens doing better; but little green grass on range in this vicinity.

CHARLES E. LINNEY, Section Director.
Northern Court Cases—In the district court for Colfax county, Henruique Martinez Sianeros has brought suit against her hedge lord for divorce, alleging abandonment and cruelty as the cause of her desire for a separation. In the district court for Mora county Veedor & Veedor have brought suit in ejectment against Edward J. Jones to recover possession of a large tract of land known as the Frank Metzger or Colada ranch and the Frank Metzger and Pinar ranches at La Cueva, and also for \$5,000 damages.

Suburban for The Citizens and get the news.

The Home

A quick way to toast bread is to have a nice hot fire, put the oven grate on top of the range, lay on as many slices of bread as desired and turn over to prevent burning. The work can be done in half the time without burning face of hands.

Cocoanut Custard Pie—One pound of grated cocoanut, one-half pound of sugar, one quart of rich milk, six eggs beaten to a froth, two teaspoonful of butter and two teaspoonful of vanilla. Beat the milk, take it from the fire and whip in gradually the beaten eggs. When nearly cold season, add the cocoanut and pour into buttered shells. Bake twenty minutes. This is enough for three pies.

A plain fruit cake is suitable for serving with fruit. Take half a cupful of butter, two cupfuls of sugar, three cupfuls of flour, four eggs, one cupful of milk, one teaspoonful of baking powder and season to taste. Cream half the butter with the sugar, the other half with the yolks of the eggs, then mix together. Add the milk and flour, sifted four times, putting the baking powder in the last sifting. Add the whites of eggs beaten light. This cake can be put together with any kind of filling or icing desired.

The season has come for the delicious strawberry shortcake. Make a soft dough of one quart of flour, three teaspoonfuls of baking powder, four teaspoonfuls of white sugar and four of butter. Roll out and bake in three-quarter cake pans. Mash two quarts of ripe strawberries and sweeten them well. When the cakes are done split in half, butter white hot, and insert the berries, spreading them over each half. Pile and cover the top with whipped cream. Clusters of ripe strawberries laid on the cream are ornamental.

New Rhubarb Pudding—Place one quart of water and three teaspoonfuls of sugar in a pudding dish and set in a hot oven until the sugar is melted. Cut two pounds of rhubarb in small pieces, drop it into the pudding dish and cook all gently for half an hour. Beat three ounces each of butter and sugar to a cream, add one well beaten egg, one quart of milk and three ounces of flour. Stir until perfectly smooth and pour the mixture over the rhubarb. Cook gently in the oven for half an hour and serve either hot or cold.

In the average household flutrons are too often neglected. They are very apt to be left on the back of the stove, where they can never become thoroughly cold and in time they lose their power to retain heat. Like all iron and steel instruments they possess that peculiar quality called temper. Iron heated to a high temperature and then as soon as the worker is done with them put in a cool place to become thoroughly cold will last for many years.

Here is a recipe for a moist French tea cream that is an excellent warm weather dessert. Beat one quart of cream, take from the fire, and one teaspoonful of any preferred kind of tea, stir for an instant, cover closely for six minutes, then strain. Return to the fire in a double boiler with five eggs and five teaspoonfuls of sugar beaten together and added to it and stir till as thick as a custard. Take from the fire and mix one box of gelatin which has been soaked in one cupful of cold water. Stir until dissolved and set away until firm. Serve with whipped cream.

The latest wrinkle is to use a chopping knife in bread making instead of the hands. The sponge should be lightly sprinkled with flour and chopped 180 or three times during the process. It is easier to make and makes better bread than the old fashioned way. It is possible to handle the dough in soft condition, keeping it more moist and preventing quick drying. Another scheme is to use a clean folded cloth instead of a kneading board and toss the chopped dough quickly into shape and roll it lightly with a glass rolling pin for biscuits or put it into small loaves.

Water—Question at Santa Fe—The members of the Plaza committee of the Woman's Board of Trade would like the people to understand that they have done everything possible to keep the Plaza in good condition and to save the grass lots, says the New Mexican. They have called on Mr. Owen of the Santa Fe Water & Light company who did all he could for them, but on account of the present shortage of water and the long continued drought, but little water for the grass and trees in the Plaza could so far be secured. They have also called upon the city marshal to keep people from trampling out the grass and to keep stray animals out of the Plaza and have done so several times, but so far to effect. Taking these facts into consideration the Woman's Board of Trade which still has charge of the Plaza, cannot be blamed for its present unsatisfactory condition.

The El Paso Herald contains the account of the loss by theft by Rev. Geo. H. Adams of his valuable watch, worth fully \$300. Mr. Adams is blind and the watch is so made that it will strike the hour when desired by pressing a spring. Mr. Adams is known to a number of our citizens.

M. J. Dwyer yesterday quit the service of the Santa Fe as an engineer, and will seek employment elsewhere.

ARIZONA TOWNS

HOLBROOK.

From the Argon.
Mrs. A. Garvin has closed the Apache House.
Julius Webster has returned from Los Angeles.

Robert Scott was down from How Low the report of the week looking after his sheep, ranging in this vicinity.

Henry Smith has returned to Holbrook after an absence of two months spent on a pleasure trip in the White Mountains.

C. H. Burro, accompanied by his daughter, Maud, arrived here from Kansas City, Mo., Wednesday morning, and left for Kankakee, "Noyon, the same day.

J. M. Lynn, agent for the Rose Contracting company, of Riverside, Cal., arrived to consult with Contractor J. H. Willis, of Snowflake, in regard to building the material for the Indian school buildings, at Tuba City, from Flagstaff.

ST. JOHNS.

From the Herald.
Miss Lella Kempe left for Provo, Utah, to attend the summer school.

W. O. Gibson who was thrown from his horse and badly hurt last week, is again able to attend to business.

Nefsey Davis, one of the local mechanics, has sold out his property here and will move to Idaho in the near future.

Shas Harris, who has been at work in the mountains for the past few months, is in the city visiting with his sister, Mrs. David Gibbons.

Wm. Holgate has the contract to make 10,000 brick for the government school buildings at Zuni, N. M. Mr. Holgate is now hunting men to labor for him.

Brigham Peterson, who has been in Provo, Utah, for the past three years attending school, returned home last Thursday. He brought home a wife. The bride is Miss Stella Jarkis who left here about two months ago to meet him at Salt Lake City.

WILLIAMS.

From the News.
Mrs. John Fink visited in town from Rhodes.

Bert Fousha is now employed at J. C. Phelan's during the absence of Wm. Lockridge in Los Angeles.

Frank Aycock returned from Oklahoma, where he had been called recently by the death of his sister.

James Irvin, shoemaker, came down from Winslow and is making arrangements to open up a shop in town.

Williams will be in darkness for the next few weeks, owing to the shut down of the local electric light plant to install a new engine.

Mrs. Florence Barber, a sister of Mrs. C. A. Corver, who has been visiting here for some weeks, returned to her home in California.

M. A. Smith passed through here en route to Flagstaff, from which point he goes to Oak Creek with a number of Flagstaff fishermen.

Wm. Sater, who some weeks since went to Los Angeles to secure special treatment for an old trouble in his ear, has returned home much improved, and has resumed his position at the Cabinet.

Word has been received here that Mrs. D. P. Phelan, now a resident of Los Angeles, is very ill and little hope is held out for her recovery. A telegram was received by Wm. Lockridge from his wife, calling him to Los Angeles, in which it was stated that there was little hope of her mother's recovery.

KINGMAN.

From the Miner.
Mrs. Daniel Bonell, of Riverside, Nevada, is visiting with her son, Geo. A. Bonell.

Mrs. Alice Flowers left for Los Angeles, where she expects to make her future home.

Commencement exercises of the Fort Mohave Indian school (Herbert Welch Institute) will be held at that place on the 15th and 17th of this month. Quite a number of pupils will be graduated from that institution.

It is to be hoped that when school opens in Kingman next September a principal teacher of the male persuasion and two assistants will have been employed by the trustees, and that the higher grades will be taught. Kingman children of tender years should not be sent to California or other places in Arizona to take the rudiments of an education when the public school here can give it to them. Deputy Sheriff Gibson took an insane miner to the asylum at Phoenix. The man held a lease on one of the Gold Road mines and was considered to be all right until ten days ago, when he conceived an hallucination that people were intent on robbing him. He took to the hills and was captured only after a long chase and a hard struggle. After he was brought to the jail he became rambunctious and the officers had considerable trouble in controlling him.

FLAGSTAFF.

From the Sun.
Henry Dietzman has secured the contract for the stone and brick work on the Indian school building at Tuba City.

Miss Mabel M. McClure, a teacher of grammar, N. Y., is in the city from Phoenix to pursue work in Way's school and the summer normal.

Dr. J. E. Adams has an x-ray machine and he believes the only one in northern Arizona. The doctor has been giving exhibitions of the working of the machine to his friends, which are highly interesting and instructive.

and is prepared to take up, immediately, the work of his summer school. He is greatly pleased with Flagstaff and with the reception and encouragement Mrs. Way has received from the business men and educators of the city.

On Tuesday night the members of the Pioneer Hose company held a meeting to elect officers to fill the vacancy occasioned by the resignation of John Marshall, the foreman, who has moved to San Diego, Calif. J. Edward Priest was chosen foreman; C. A. Green, first assistant; John Donahue, second assistant, and Louis Spiers, secretary pro tem. The following new members were elected: Robert Walker, Los Veramp, Edgar A. Brown, J. McKiernan, Oswald Reuchert, and J. S. Keister. The company expect to practice work at stated times during each week. They will give another of their popular "smokers" at an early date.

From the Gem.

Harrison Conrad, of this place, has been appointed by the governor as a delegate to the World's Cattle Congress, which convenes at St. Louis on July 27.

Mrs. W. Wallace and daughter, Miss Lorabel, returned from Congress Yavapai county, where the latter recently closed a successful term of school. Mrs. Wallace was there for the benefit of her health, and we are pleased to state her health has improved.

If the citizens of Flagstaff mean to hold a celebration on the 4th of July it is time some active steps were taken in that direction. The proposition is up to the business men of Flagstaff, as they would be the beneficiaries if one is held.

A gentleman from Camp Verde, Yavapai county, has been exhibiting some fine specimens of gold and silver ore here this week. He found the mines about three miles from Camp Verde, and says there is plenty of it there.

It is a mistake to imagine that itching piles can't be cured; a mistake to suffer a day longer than you can help. Dean's Ointment brings instant relief and permanent cure. At any drug store, 50 cents.

Mine Director Injured.—B. Frank Hall, one of the resident directors of the Golden Gate Mining company, was severely injured near Corral, Arizona, by having a horse fall on him. In the fall the animal rolled over on Mr. Hall, severely bruising and shaking him up. At first it was thought that his injuries might be fatal, but he is now getting along all right, although it will be some days before he is able to get out. He was brought to Kingman on the Arizona & Utah train and has been confined to his room at the Hotel in that town.

For a Hundred Years.—For a hundred years or more Witch Hazel has been recognized as a superior remedy, but it remained for E. C. DeWitt & Co. of Chicago to discover how to combine the virtues of Witch Hazel with other antiseptics, in the form of a salve. DeWitt's Witch Hazel Salve is the best salve in the world for sores, cuts, burns, bruises and piles. The high standing of this salve has given rise to counterfeits, and the public is advised to look for the name "DeWitt's" on the package, and accept no other. Sold by B. H. Briggs & Co. and S. Vann & Son.

School Census of Tombstone.—Prof. Berner has completed the census of Tombstone school population and finds a total of 424 children of school age in Tombstone. This shows an increase of 28 over the census of last year. Of the total number, 214 are boys and 210 girls. By comparison with last year's census there is an increase of 26 boys and 23 girls. On a basis of five for each child in school census Tombstone would be accredited with a population of 2,120—Tombstone Prospector.

Thrown From a Wagon.—Mr. George K. Babcock was thrown from his wagon and severely bruised. He applied Chamberlain's Pain Balm freely and says it is the best liniment he ever used. Mr. Babcock is a well-known citizen of North Plain, Conn. There is nothing equal to Pain Balm for sprains and bruises. It will effect a cure in one-third the time required by any other treatment. For sale by all druggists.

Mark Smith at Flagstaff.—Last week the Flagstaff Gem mentioned that the following persons had left for Oak Creek: Hon. Mark Smith of Tucson, J. B. Jones and Jack Smith of Williams, E. M. Doe, H. C. Hibben, T. C. Coalter, J. A. Mail, E. A. Siker, and John Vercamp, of Flagstaff. They have returned to Flagstaff, except the two last mentioned, and reported the catch good, and the size of the fish as being somewhat smaller than the largest whale. As we look on fish stories with some degree of suspicion, and the further fact that Hon. Mark Smith and E. M. Doe are suspected of being candidates, and Harry Hibben is an avowed candidate, makes us have a doubt. Mr. Hibben is our informant, and under the circumstances there is a bare possibility that the number and size were overdrawn.—Flagstaff Gem.

Cheap Traveling.—On June 14 and 25 the Santa Fe will sell round trip tickets to St. Louis or Kansas City for \$25.00. Tickets good for 10 days.

The King of Cattle Thieves.—W. T. Armstrong, who has been denounced by rangers and other territorial officers as the king of Arizona cattle thieves, was convicted at Florence of cow stealing. In this particular case Armstrong was charged with stealing a cow belonging to John Zellerbach. Other indictments are

hanging over his head and he will be tried on these charges. The conviction is considered a great triumph for the Live Stock Sanitary board and the Arizona Rangers. Armstrong will undoubtedly get a severe sentence.—Tucson Post.

Raised the Money.—At the First Methodist Episcopal church \$7,500 was raised by Joseph W. Powell. Of this amount \$5,000 was desired for the payment of the church debt and it was all that was intended to be raised. However, enthusiasm ran high and the extra \$2,500 was subscribed. Sixty new members were added to the church roll and reports from all the church societies and auxiliaries were exceedingly favorable. The Brotherhood of St. Paul was organized by the election of the following officers: President, W. H. Black; vice president, J. W. Todd; secretary, Amos E. English; treasurer, E. M. Lanson.

An Alarm Clock for 25c.—If you want to get up early and feel good all day take a Little Early Riser or two at bed time. Then little pills relax the nerves, give quiet rest and refreshing sleep, with a gentle movement of the bowels about breakfast time. W. H. Howell, Houston, Tex., says "Early Risers are the best pills made for constipation, biliousness, etc." Sold by B. H. Briggs & Co. and S. Vann & Son.

Fairy Tales About Savage Seri Indians.—A. J. Crawford, a mining operator, has just returned from a month's investigation of the mineral resources of the Tiburon island in the Gulf of California, the home of the Seri Indians. According to Mr. Crawford and the members of his party, the mineral wealth of Tiburon has been greatly exaggerated, and the tales which "Arizona Charlie" has told, and others who have led sensational expeditions to explore this island are largely myths. The savage Seris are in reality very peaceful Indians, who live off of fish and turtles. They are not cannibals, and showed no inclination to attack Crawford and his party. The Indians are rapidly dying off and it is the opinion of Mr. Crawford that they will have all passed away in a few years. The island is situated about a few miles from the mainland, and the distance could almost be waded at low tide. Mr. Crawford intended to apply for mineral concessions on the island, but gave up the idea after his investigations.—Tucson Post.

Starting Evidence.—Fresh testimony in great quantity is constantly coming in, declaring Dr. King's New Discovery for Consumption, Coughs and Colds to be unequalled. A recent expression from T. J. McFarland, Bostonville, Va., serves as an example. He writes: "I had bronchitis for three years and doctored all the time without being benefited. Then I began taking Dr. King's New Discovery, and a few bottles wholly cured me." Equally effective in curing all Lung and Throat troubles, Consumption, Pneumonia and Grip. Guaranteed by all druggists. Trial bottles free, regular sizes 50c and \$1.00.

The Prescott Printers.—Prescott Typographical union No. 474, at its regular meeting installed its newly elected officers for the ensuing term as follows: President, T. L. Harris; vice president, Geo. Ward; secretary, G. P. Campbell; treasurer, Wm. O'Grady; executive committee, Ward Harrington, Wm. Tinker and Fred Madrid. Wm. Burrow was also elected as delegate to the next international meeting of the International Typographical union.

A Strong Heart.—Is assured by perfect digestion. Indigestion swells the stomach and puffs it up against the heart. This causes shortness of breath, palpitation of the heart and general weakness. Kodol Dyspepsia Cure cures indigestion, relieves the stomach, takes the strain off the heart and restores it to a full performance of its function naturally. Kodol increases the strength by enabling the stomach and digestive organs to digest, assimilate and appropriate to the blood and tissues all of the food nutriment. Tones the stomach and digestive organs. Sold by B. H. Briggs & Co. and S. Vann & Son.

Historical Records.—While in Las Vegas, Hon. L. B. Prince obtained an interesting object for the Historical society. It was the iron grated door of the old jail of San Miguel county in which Rudabaugh, Webb, and many of the desperadoes of the early days were confined. The old court house and jail now belongs to Charles Hild, and he very cheerfully made the donation to the society when requested. The old door is expected to arrive at Santa Fe in two or three days.

Chamberlain's Stomach and Liver Tablets Better Than a Doctor's Prescription.—Mr. J. W. Turner, of Truett, Va., says that Chamberlain's Stomach and Liver Tablets have done him more good than anything he could get from the doctor. If any physician in this country was able to compound a medicine that would produce such gratifying results in cases of stomach troubles, biliousness or constipation, his whole time would be used in preparing this one medicine. For sale by all druggists.

P. J. Primrose, one of the largest wool buyers of Philadelphia and who formerly considered New Mexico his home, is here today, feeling the pulse of the local wool market. Edward Claves, of South Second street, recently negotiated the purchase of 20,000 pounds of wool for Mr. Primrose from the John Becker company of Belen. Mr. Primrose says he is satisfied with the wool market, and prices obtained by the raisers are with the conditions of the times.

OFFICIAL MATTERS

Postoffice Change-Draughtsman Transferred-Land Contest Dismissed.

HOMESTEAD AND DESERT ENTRIES

The name of the postoffice at Jarilla, Otero county, has been changed to Jirica.

Notary Public Appointed.—Eduardo Tafeta of Bursam, Socorro county, was today appointed a notary public by Governor Otero.

A Pension for Jose Sandoval.—Delegate B. S. Rodey has secured a pension of \$5 a month for Jose Sandoval of Rancho de Taos, Taos county.

Allotment for Whipple Barracks.—The secretary of war has appointed the allotment of \$137,500 to rebuild the army post at Whipple Barracks, Arizona, situated one mile from Prescott.

Draughtsman Transferred.—Henry C. Hamill has been transferred from the office of the surveyor general in Denver to the office of the surveyor general in Santa Fe, to take the place of draughtsman left vacant by the transferring of J. H. Hendrickson to Cheyenne, Wyoming.

Township Plat Filed.—The plat of township 18 north, range 19 east, New Mexico principal meridian was filed on July 15, 1904, in the federal land office in Santa Fe. On and after that date applications for entry in this township will be received. The township is north of the Gilaudo grant, east of the Tangua Pueblo grant, and west of the Pecos River Forest Reserve, Santa Fe county.

Contest Dismissed.—The contest between Hippolyte Dominique and Ramon Jimenez, in the United States land office, which involves lots 6 and 19 of the NW 1-4, of the SW 1-4, section 3, T 18 N, R 19 E, in Santa Fe county, was set for hearing yesterday but the matter had been arranged previously by the parties themselves and the case was dismissed by the land office officials. The land is situated near Tesuque.

Final Homestead Entry.—The following certificate of final homestead entry was filed in the office of the United States land office: No. 2167, Donaciano Martinez of Otero, for the N 1-2, SE 1-4, SE 1-4, SE 1-4, section 10, T 22 N, R 19 E, 160 acres of land in Mora county.

Desert Land Entry.—The following desert land entry was filed in the United States land office: No. 558 Hattie A. Laughens of San Juan county for the SW 1-4, NE 1-4, S 1-2, NW 1-4, lots 1, 2, 3 and 4, section 7, T 22 N, R 6 W, and N 1-2, SE 1-4, lots 1 and 2, section 12, T 22 N, R 7 W, 511.00 acres of land in San Juan county.

Hearing Ordered on Applications to Purchase Coal Lands.—In the matter of the objection and protest to the applications to purchase of Francisco Montes and Mrs. W. S. Hopewell, made by the heirs of Henry Carpenter, which involve coal entries for the E 1-2 of section 15, and the W 1-2, of section 14, township 19 north, range 5 east, the department of the Interior has ordered a hearing and August 16, was set as the date for the hearing, which will be held in Albuquerque before a notary public. The coal land in dispute lies close to the Bernalillo county line in Santa Fe county.

Territorial Funds Received.—The following public funds have been received by Treasurer J. H. Vaughn: From J. C. Flemming, treasurer and ex-officio collector of Sierra county, \$21.17, taxes for 1902, and \$1,401.82 taxes for 1903.

NO MYSTERY ABOUT NAVAJO BLANKETS.—It will be observed in watching the Navajo Indians making Navajo blankets that it is as easy as weaving strawberries. You and I and all of us

could make Navajo blankets. When blankets are selling for \$15 and \$18 apiece, it is a wonder that the whole world is not making them. After watching Mrs. Navajo threading the strand of red and white yarn through the warp on the loom for some minutes, and packing it down with a flat wooden paddle, I feel confident that I could sit down and do the same thing with my own shut. "Navajo blanket making is twenty easy lessons," should be a motto taken up by any one who wishes to earn money without leaving home; no outfit required; send for circular. More time is spent on sofa pillows and burnt work and money dissipated than would serve to carpet the whole house with Navajos. Fit out every bed, supply each lounge and easy chair and drape a couple of easy corners.—St. Louis Globe-Democrat.

Triumphs of Modern Surgery.—Wonderful things are done for the human body by surgery. Organs are taken out and scraped and polished and put back, or they may be removed entirely; bones are spliced; pipes take the place of diseased sections of veins; antiseptic dressings are applied to wounds, bruises, burns and like injuries before inflammation sets in, which causes them to heal without maturation and in one-third the time required by the old treatment. Chamberlain's Pain Balm acts on this same principle. It is an antiseptic, and when applied to such injuries, causes them to heal very quickly. It also allays the pain and soreness. Keep a bottle of Pain Balm in your home and it will save you time and money, not to mention the inconvenience and suffering which such injuries entail. For sale by all druggists.

RIOT Averted AT STOCKADE

AS CROWD OF STRIKE BREAKERS ARE RETURNING TO SHOPS LAST EVENING ONE OF THEM IS STRUCK DOWN BY A GUARD.

There came near being a riot at the Santa Fe yards last night because E. L. Corbett, one of the deputy sheriffs in charge of the Fourth street gate, struck one of the strike-breakers across the back of the head with a club, rendering him unconscious by the blow, says the San Bernardino Sun.

The guards stationed about the shops were quickly mobilized and the danger quelled. It is believed that a number of the men will quit work today unless Corbett is relieved of his office as gate keeper.

The affair took place at 10:30 last night. As is the rule on Saturday night, a number of the strike-breakers were given passes permitting them to go through the gates and return, providing they do not remain out after midnight.

At 10:30 a party of seven men, all of whom had taken more or less advantage of the pleasures afforded by an evening in town, liquor and otherwise, arrived at the Fourth street gate and demanded entrance. Deputy Corbett was on guard and as the men advanced he demanded to see their passes.

But the sleepy men had no time to procure their "door-tickets" and proceeded to crowd inside the gate. At this Corbett commanded them to halt. In answer they only showed the guard their passes and he, becoming excited, the guard drew his club and struck the man nearest him. The fellow hit the ground and it was soon apparent that he was badly hurt. Finding him unconscious his companions carried him to a tent and a guard was hasty to send for Dr. Hayter, the company's surgeon. The latter, upon arriving, pronounced the blow a staggering one, which might result seriously, although he was inclined to believe that the outcome would not be serious.

The news of the assault upon one of their number spread quickly among the men who reside inside the stockade. They became much incensed over the "outrage," as they pronounced it. There was some talk of "evening up" with Corbett, but an armed force of deputies dispelled the trouble makers.

"The thing isn't through with yet," said one of the men last night. "We'll take it up tomorrow. The company will have to make good on this or June 15 will see us all on the outside of the fence."

Cures Old Sores.—Westmorland, Kansas, May 5, 1902. Callard Snow Liniment Co.: Your Snow Liniment cured an old sore on the side of my chin that was supposed to be a cancer. The sore was stubborn and would not yield to treatment, until I tried Snow Liniment, which did the work in short order. My sister, Miss Sophia J. Carson, Allenville, Minn. Co., Pa., has a sore and nodule that it is a cancer. Please send her a 50c bottle. Sold by J. H. O'Reilly & Co.

STANL INTERVIEWED

IN THE FAILURE OF MEXICO CITY BANK.

A clipping from the Mexican Herald says: "Alfonso Hoguebach, cashier of the Banco Central, was arrested and sent to Helen.

"The cause of the arrest was the discovery of a shortage in the bank's funds of \$95,000.

"Suspicion was first aroused by the discovery that the daily balance sheet had been torn from the books where it was kept. The officers ordered an investigation immediately which led to the above arrest."

Joseph H. Stahl, the architect and contractor of this city, was quite heavily interested in the bank; but when seen yesterday, said that he doubt it would come out all right.

Railroad Topics

W. D. Lee, general manager of the Santa Fe Central, left Saturday on a tour of inspection over the Santa Fe Central.

Several engines from the west and south, which are in need of general overhauling, were received at the local shops yesterday.

R. W. Robbins, general freight and passenger agent for the Santa Fe Central railway, left Sunday morning for Torrance on a business trip.

The Pennsylvania has decided to cease using its parlor cars, and in a few weeks only those owned by the Pullman Co. will be in operation.

Frank Dilibert, assistant treasurer of the Santa Fe Central railway, left Saturday for Antelope Springs to spend the week-end with his family.

H. W. Gardner, of the telegraphic department of the Santa Fe, doing construction work, is in the city from Topeka, on business. He will probably remain here several days.

The El Paso & Northeastern is suffering from washouts along the line between Torrance and Santa Rosa and as a consequence the regular passenger trains are reported as being indefinitely late.

The American Society of Civil Engineers has just issued a preliminary announcement of an international engineering congress, to be held from October 2 to 8, 1904, at St. Louis, during the Louisiana Purchase Exposition.

Albert C. Harris, assistant city clerk agent of the L. & N. railway, at Nashville, Tenn., is a son of Frank Harris, agent at Lebanon, Ky. He received his appointment April 1st, 1904 and is prepared to sell tickets to the World's Fair or "any other old place."

The Santa Fe announces that all of its branch lines, which were closed by the high water in Kansas, are now open for traffic. The El Dorado branch was the last one opened. It was necessary to rebuild several bridges on this branch.

Securing a railroad compression in two weeks from the time of application to the Mexican government is a record-breaker in the railroad history of Mexico, yet this has been accomplished by the Southern Pacific for an extension of the Imperial branch of that company.

Mrs. A. S. Barney, wife of A. S. Barney, general agent of the Denver & Rio Grande railroad in Santa Fe, accompanied by their son, came to join Mr. Barney. The family have taken the Hinkley residence, in Santa Fe, for the summer, during the absence of Mrs. Hinkley and daughters in Canada.

O. E. Parmelee, an employee of the Santa Fe ticket auditing department, has resigned his position in that office, and will leave Topeka shortly for Seattle, Wash., where he intends to locate with his family. Mr. Parmelee is well known in Topeka railroad circles, having been in the employ of the Santa Fe since 1891.

The engineers who are to compose Engineer J. R. Farwell's surveying party, which left Santa Fe for Willard to survey the proposed extension of the Santa Fe Central, are George Saint of Santa Fe, P. McKane, E. E. Spierling and Ralph Dunbar, of Albuquerque, and about twelve more surveyors.

The St. Petersburg council has accepted estimates for a system of electric street railways in and around St. Petersburg of 290 miles in length. The cost will be \$21,000,000, exclusive of the right of way. It is feared that the plan cannot be executed because of financial difficulties until the war is ended.

Germany is building trackless electric railways for the convenience of the farmers in hauling their produce to market. Good macadam roads are essential to the operation of such transportation lines. Fifty years hence, when the highways of the United States are all of stone, no doubt trackless railways will be the fact.

The Boston & Maine railroad has ordered ten mogul freight and ten six-wheel switching locomotives from the American Locomotive Works to be delivered early in the fall. The freight engines will weigh 135,000 pounds, with 117,000 pounds on the drivers, which are 65 inches in diameter. The switchers will weigh 114,000 pounds, and will have drivers 50 inches in diameter.

More American locomotives are being exported this year than last. The locomotives exported during the months ending April last numbered 266 and were valued at \$3,947,225. In the ten months ended with April, 1903, 266 locomotives, valued at \$2,924,841, were exported. British North America and Central America took 70 per cent of the locomotives exported in the past two years.

A number of citizens believe that Policeman Mike Martinez showed spite work in the arrest of W. L. Essex, foreman of the local machine shops. The gentleman appeared before Judge Crawford yesterday, as stated in The Citizen, on the charge of carrying a pistol. He has a commission as a deputy sheriff. The court discharged Mr. Essex. At one time Martinez was an employee of the local shops, and some say that he does not like Mr. Essex.

Replacing the Steel on the Santa Fe.—The Santa Fe work train is distributing steel along the line north of the smelter, preparatory to having the old rails along that portion of the line taken up and replaced with heavier steel, says the El Paso Herald.

The new steel has been in use for some time on the main line of the company, but is now being replaced by a heavier article and is to be placed on the branch between El Paso and Albuquerque. The light rail now

in use on this portion of the line will be used on the different little branches from the line between El Paso and Albuquerque, of which there are a number.

Hit by Engine.—What came near being a serious accident occurred to Jesse A. Tarr and Miss Gerlie Mensch (the other evening, says the Kingman Miner). The young folks had been to McConico on the A. & U. auto car and were following a Santa Fe freight train to Kingman, when a light engine came out of the Kingman yard and caught them in the canyon near the old pump house. The young lady jumped from the car and alighted on the ground without injury. Mr. Tarr remained in the car in an attempt to save it and was compelled to jump to save his life. The engine struck the car and totally wrecked it. Had they gotten into the cut a few hundred feet ahead it is probably they would have been killed.

BOILERMAKERS ARE OUT.

Two Hundred Men on Illinois Central Demand Increase in Pay.

A Chicago dispatch, dated June 11, says: Boilermakers employed on the Illinois Central railroad system went on strike yesterday for an increase in wages and a reduction in the hours of labor from ten to nine. Company officials claim that the strike is a violation of an agreement made last year, which required thirty days' notice to be given of any change.

There are 200 boilermakers employed on the system and reports received from the shops at various points yesterday were to the effect that over two-thirds of the men had responded to the strike order. The boilermakers have been receiving 24 and 26 cents an hour and demanded 42½ cents, which would practically be the same wages for one hour's less work a day.

In a statement issued from the railway news bureau last night it was shown that the demands of the boilermakers would involve an expenditure of \$100,000 a year extra, while the gross earnings of the company for the month of May had fallen off \$500,000.

Before the strike was ordered the company officials had shown those figures to the union committee and insisted that the road was in no position to grant increase this year. For ten months ending April of this year the net receipts of the company were \$1,227,000 less than for the corresponding period last year, while the gross receipts during the same period had increased \$1,357,000. The operating expenses for the same period had increased more than \$2,000,000.

Similar facts and figures were shown to the committees representing other mechanics on the road, and were accepted by them as demonstrating that the company was not in a position to advance wages now.

The strike has not yet received the endorsement of President McNell of the Brotherhood of Boilermakers, whose headquarters are in Kansas City, the order having been issued from Chicago. There are sixty-two boilermakers employed in the local shops of the company at Burnside.

"A NOBLE OUTCAST"

A DRAMA TO BE PRODUCED FOR BENEFIT OF COMPANY G.

A play is being arranged by the members of Company G of this city to be given July 7th in Elks' opera house. Carl Tolan is managing the play and no doubt the boys will put on one of the best home talent productions that has been seen in this city for some time past. Following is the cast of characters:

Gerald Weston (known as Jerry the tramp) Carl Tolan
James Blackburn J. J. Roberts
Jack Worthington L. J. Wilson
Col. Lee Henry Conley
Francis Miss C. Clyde
Mrs. Lee Miss Grace Houghlin
Sadie Mrs. Carl Tolan

The object of the play is to help defray part of the indebtedness incurred by the boys in fitting up the armory and as this is really a public institution the people of the city should give the boys their hearty support.

Louis Schmidt, who had tickets issued and sold quite a number for a performance with plenty of pretty girls at the Elks' Opera house, has abandoned the idea of giving the show. It is said, and the assertion is well warranted, that the old gentleman has "wheels in his head," and friends should take care of him.

PATENTS

New York News Letter

New York, June 12.—Probably the most interesting feature of the recent slump in the cotton market was the fact that it was indirectly due to a woman. It must not be supposed, however, that some speculator in here with a fair maiden upon the market to show his heroism and win his lady love or to take revenge upon a more favored rival. There was absolutely no romance in it. The trouble was due to Miss Katherine Giles, a clever and thoroughly practical business woman, who would never dream of anything more romantic than a corner in cotton. Some time ago Miss Giles conceived the idea of establishing a bureau of cotton statistics and to sell her information to those who were willing to pay for it. She began an extensive correspondence with planters, officials and others in the cotton districts of this country and thus obtained reliable information concerning the conditions of the cotton crop, the area planted, etc. All points of great value in determining the price of cotton. She secured a number of customers who regularly received her reports and paid for them liberally. When her reports showed that the condition of the crop at this time is unusually good and the area planted is cotton seven per cent larger than last year, it became evident that there was nothing to support the high cotton prices, and the bears among her customers began to butter down the price.

The question which at present agitates the hundreds of teachers and principals of the schools of New York is whether corporal punishment for refractory pupils shall again be introduced or not. Ever since the order was passed prohibiting the use of the rod in the schools of Greater New York the teachers and principals have had no end of trouble with some of their pupils who turned a deaf ear to all admonitions and refused to be shamed into obedience or good manners. There is probably more rowdiness among the children of New York than among the children of any other city in the world, and the effect of the abolition of corporal punishment upon discipline was simply disastrous. The teachers complained to the principals and the principals to the board of education, and so much pressure was brought to bear upon that august board that it finally decided to refer the matter to a committee, which was instructed to hear testimony and arguments for and against the proposition of the teachers and report back to the board. A few hysterical women and ditto men had upon letters published in the papers, strongly opposing the "return to the barbarous practice of corporal chastisement," but the teachers and principals of the schools almost unanimously urge the restoration of the beneficial rule of the rod, of course with certain restrictions. The result of the contest between the teachers and the hysterical sentimentalists is awaited with great interest.

Although New York has in recent years become the stamping ground of many members of the high and highest aristocracy of Europe, visits from royal personages or real heirs to some throne are not yet so common as to escape public notice. The visit of Prince Pu Lan, the Chinese heir to the throne, caused considerable interest and perhaps more on account of the picturesque display which accompanied it than on account of a thorough appreciation of the importance of the event. The ceremonies at the arrival of the royal prince were extremely interesting and picturesque on account of the Oriental splendor of costumes displayed upon that occasion. Since then the high guest has been "rotated" around in the most approved style. He has been dined and feted, and he has probably seen more of New York and of the interesting sights and features of its obscure byways than many New Yorkers who have lived in the city for a quarter of a century.

There have been few cases in the Chronicle Scandalous of this city in recent years that have created as widespread sensation as the case of John R. Platt, whose entanglements and disgraceful connection with the colored woman, Hannah Elias, have furnished the most splay material for long newspaper articles which are eagerly devoured by the patrons of the yellow press. Professional scandal-mongers and thousands who do not exactly belong to that class, are looking forward with considerable interest to the time when the case will be tried. The belief is quite general that the end of scandalous disclosures in connection with that case has by no means been reached, and well informed persons are of the opinion that it will be shown at the proper time that old Mr. Platt was not the only victim of the clever adventures of dusky hue.

The gloomy and rainy weather of last week caused an alarming increase in the number of suicides and murders in Greater New York. From five to twelve suicides and sudden deaths from violence or mysterious causes were reported every day, a record which is almost unprecedented in the history of the city.

WALKER-SHIRT.
Popular Las Vegas Folks Are Joined in Marriage.
The marriage of Mr. F. M. Walker to Mrs. Joale G. Shirk was solemnized at high noon Saturday. Father H. C. Fouget officiated at the ceremony, which was performed at his residence.

Mr. and Mrs. Charles Spiess acted as witnesses. The wedding dinner was served at the Castenedo. Mrs. Walker is well known in this city, where she has made her home since childhood and has a large circle of friends and relatives throughout the territory. She is the daughter of Judge Hubbell, former chief justice of the territory, who served under Lincoln's first administration.

Mr. Walker is a piano tuner well known to many of the people of Las Vegas, where he had pursued his profession for several months past. He will leave for Santa Fe and will be joined by Mrs. Walker in Albuquerque—Optic.

Driven to Desperation.
Lying at an out of the way place, remote from civilization, a family is often driven to desperation in case of accident, resulting in Burns, Cuts, Wounds, Etc., etc. Lay in a supply of Bucklen's Arnica Salve. It's the best on earth. 25c. at all druggists.

CASES SETTLED.
Judge Frank W. Parker Disposed of Three Cases in One Day at Silver City Last Week.

Judge Parker at Silver City last week disposed of three cases on the same day. The first was that of William H. Henry versus the Johnny Bull Copper Mining company, involving the question of the title to the Johnny Bull mine near Stein Pass, Grant county. The suit was dismissed owing to a compromise arranged between the parties of the suit before the case came on for trial, whereby the title vests in the plaintiff and his associate, General Dodge, of New York. In the second suit, that of the Lyons and Campbell Ranch and Cattle company against Jesse Harris, applying for a permanent injunction against the use of water in a certain ditch by the defendant, said injunction was made perpetual. The defendant's motion to set aside the decree was denied. The third case was that of J. C. Downes & Company versus W. C. Chandler.

Sued by His Doctor.
"A doctor here has sued me for \$1250, which I claimed was excessive for a case of cholera morbus," says R. White, of Coahuila, Cal. "At the trial he praised his medical skill and medicine. I asked him if it was not Chamberlain's Colic, Cholera and Diarrhoea Remedy he used, as I had good reason to believe it was, and he would not say under oath that it was not." No doctor could use a better remedy than this in a case of cholera morbus; it never fails. Sold by all druggists.

JUMP IN FRONT OF ENGINES.
Frenzied Women Try to Stop Trains With Their Bodies.

News has been received in Denver that the reverses suffered by the Russian army have cast terror into the hearts of Russian women, particularly those of the peasant class, who regard the Japanese as demons. Hundreds, who are torn away from their families against their will, are followed to the trains by their wailing wives and offspring, says the Denver Post.

The women in numerous instances throw themselves in front of trains in the hope that the trains will not proceed. For to them it appears that their husbands are going to certain death, to be buried in an unknown land. E. Bronstine of 1809 Larimer street, received a communication from Kharkoff, Russia, today, telling of a horrible series of tragedies in that place. The writer declares that the car is being hoisted—his subjects are overcome by fright. The number of men who do not want to face the Japanese is getting larger every day, and it is not unlikely that a combined effort will be made by soldiers and civilians alike to disobey orders to proceed to the front. Should this condition of affairs continue, parts of the empire, it is believed, will be thrown into a state of civil war, the crazed passions against the mutants.

Women Were Frenzied.
The wives of the soldiers and other women who came to the depot to bid them goodbye cried to heaven and held on to the uniforms of the soldiers and appealed to them not to go.

"The soldiers who came from other parts of the province to go on the same train forced the home men to board the train and get ready to leave. They enforced this order by pointing their guns at them and threatening to shoot.

"On seeing this and on hearing the order the women threw themselves upon the track in front of the engine and loudly proclaimed that the train could only move on by passing over their dead bodies. They were driven back sixteen times and whenever the train was about to start they repeated their act. At last the commander gave the order to move, thinking that they would be repulsed on hearing the order. The order was promptly obeyed, and the train moved on, passing over the bodies of the women. A great many of the women were killed and scores were wounded so badly that they will be crippled for life.

"The depot represented a scene similar to a slaughter house, running with blood and strewn with the bones and torn limbs of those who were killed."

That Throbbing Headache
Would quickly leave you, if you used Dr. King's New Life Pills. Thousands of sufferers have proved their matchless merit for Sick and Nervous Headaches. They make pure blood, and build up your health. Only 25 cents, money back if not cured. Sold by all druggists.

A car load of Mexico cantaloupes passed through the city this morning for Kansas City markets.

STRONG MAN is not always a healthy one—for a man may have a strong frame, muscular sinews like steel and yet suffer from nervousness, "brain-fag," languor, depression and blue feelings, all due to a deranged stomach or dyspepsia. It may of example take the case of the Assistant Treasurer of the Catholic Foresters at Quebec, Mr. Louis Pare, who writes:

"For years after my health began to fail, my head grew dizzy, eyes pained me, and my stomach was sore all the time, while everything I would eat would seem to be heavy like lead on my stomach. The doctors claimed that it was sympathetic trouble due to dyspepsia, and prescribed for me, and although I took their powders regularly yet I felt no better. My wife advised me to try Dr. Pierce's Golden Medical Discovery, and stop taking the doctors' medicine. She bought me a bottle and we soon found that I began to improve, so I kept up the treatment. I took on flesh, my stomach became normal, the digestive organs worked perfectly and I soon began to look like a different person. I can never cease to be grateful for what your medicine has done for me and I certainly give it highest praise."

*For over a third of a century Dr. Pierce's Golden Medical Discovery has sold more largely than any other blood purifier or stomach tonic. Bigger sales

to-day than ever before. Is that not the true test? Cures others, why not you?

AN ILLUSTRATION OF NATURE'S METHOD of restoring waste of tissue and impoverishment of the blood and nervous force is used when you take an alternative course of herbs and roots, without the use of alcohol, like Dr. Pierce's Golden Medical Discovery. This vegetable medicine cures the digestive functions and helps in the assimilation of food, or rather takes from the food just the nutriment the blood requires.

Along with its use one should take exercise in the outdoor air, get all one can of God's sunlight and air, and practice a good breathing exercise each day. This "Medical Discovery" gives no false stimulation, because it does not contain alcohol or a narcotic. It helps digestion and the assimilation of such elements in the food as are required for the blood. Instead of a cool liver oil, against which the already sensitive stomach will declare open rebellion, this tonic has a purifying action upon the sensitive stomach and gives to the blood the food elements the tissues require. It maintains one's nutrition by enabling him to eat, retain, digest and assimilate nutritious food. It overcomes gastric irritability and symptoms of indigestion, and in this way, fever, night-sweats, headaches, etc., are done away with.

No matter how powerful the intellect or the resources of intellectual power, it

must be backed up by physical force. Every day the youth or man must manufacture a pint of red, arterial blood, that is pure, stimulating to the brain, and that can rebuild the tissues that were destroyed in yesterday's work.

A pint of blood and a drop of blood on a glass slide will tell whether your blood is in a healthy condition or not. Every healthy man should have five million red blood corpuscles to every cubic millimeter of blood. If there are too few red blood corpuscles the person is said to be anemic and run down. A chemical test of the water from the human body will tell whether the kidneys are in good health or not. These tests of health are conducted by expert physicians and chemists every day. Such examinations are made without cost. This is only a very small part of the work of the staff of physicians and surgeons under the direction of Dr. R. V. Pierce, of Buffalo, N. Y., the founder and director of the Invalids' Hotel and Surgical Institute of that city. To build up the body that has been weakened by an attack of grip, pneumonia or typhoid, write Dr. R. V. Pierce for advice, giving all your symptoms, and he will give you the best medical advice.

The Common Sense Medical Adviser, is sent free on receipt of stamps to pay expense of mailing only. Send 21 cent stamps to Dr. R. V. Pierce, Buffalo, N. Y., for the book in paper covers, or 31 stamps for the volume bound in cloth.

NEWS OF THE CHURCHES

Love-Making Institutions.—American Quakers, feeling that they owe a debt to the Holy Land, went some years ago to the village traditionally the home of the prophet Samuel, to miles out of Jerusalem, and started a school for girls. It is a training home, where especially is house work taught. Forty pupils are in the home, and a Friends' meeting has grown up. The girls get husbands and found homes for families. But there is a great dearth of men fitted to be their husbands, and so American Quakers, equal to the situation, have now established a training school for boys, and have 22 pupils attending it. A building is soon to be erected. The Christian Endeavor of the New England yearly meeting have offered to furnish the funds to pay the running expenses of the new school for boys.

Doukhobors Recalcitrant.—At their yearly meeting just held, Philadelphia Orthodox Friends reported the failure of their efforts to improve conditions of the Doukhobors in western Canada. The Quakers, especially those of Pennsylvania, led in the movement to bring these "spirit-wrestlers" from Russia in 1899. Sympathy of belief and persecution by Greeks and Russians attracted them. Now, the Quakers say the Doukhobors show more animosity in acquiring our views than in getting hold of such virtues as we have. They are slow to perceive the advantages of an education. So little do they care for it, indeed, that Friends have voted to give up secular educational work. They will continue religious work among them for a time, and hope for improved conditions. The Quakers are spending a lot of money annually upon these Doukhobors, in addition to the vast sums they gave to help them cross the Atlantic.

Miss Helen Gould's Work.—Mr. William B. Miller, who has the confidence of Miss Helen Gould as has no other missionary secretary or Christian association man, has gone to the Philippines to study conditions with a view of extending city Young Men's Christian association work in Manila, and also in establishing work among the Japanese. In Manila he will act for the city association, but in Japan he will, if the authorities permit, confine himself to instruction of the Japanese in American relief methods. He takes with him three association secretaries, whom he will place at various points. In his progress of instruction to the Japs he has, it is said, the encouragement of Miss Gould. It was Mr. Miller who, acting in conjunction with Dwight L. Moody, and supported in part by Miss Gould, inaugurated the army and navy department of the association in southern army camps and in Cuba and the Philippines during our slight brush with Spain.

Presbyterians at Panama.—Presbyterians are going to enter Panama. A political straw is the fact that they select their home and not their foreign organization to lead, indicating that they regard Panama as practically home territory. This same body decided, as its assembly just held in Buffalo, to enlarge and continue its evangelistic work. The enlargement decided upon was along the development of the pastor into an evangelist, and the discouragement of the scheme of hiring the professional evangelists. The Rev. Dr. Chapman will continue

his work, and will, it is said, take up various cities in the middle west after a campaign on the Pacific coast. An effort is to be made this year by Presbyterians to raise \$1,500,000 for foreign missions, and \$900,000 for home missions. These sums will be advances of \$100,000 and \$100,000 respectively. These increases are backed by the Presbyterian church funds, and are not merely the plans of missionary secretaries. There are to be sent to the foreign field early this summer about 85 new workers, a number slightly below the number sent out last year.

Protestants in Cuba.—Efforts of Baptists in western Cuba, and especially in Havana, have known troubles times for many years. Support has been had from Baptists of the south, and the trouble has been the double dealing of the Spaniards, who have professed Christian loyalty, and are charged with being something quite different. Assisted by Baptists of the north, a general effort is now to be made, both in Cuba and Porto Rico. Fully a dozen new men will be sent out at once, and it is the purpose to erect at least four new churches on each island during the year. Besides, two new schools will be established in Porto Rico, and three in Cuba, and half a dozen new fields will be tentatively occupied. The Rev. Dr. H. L. Moorehead, who has just passed his twenty-fifth year in the service of Baptist missions, and who received an ovation at the anniversary just held in Cleveland, returned from Porto Rico and Cuba in April and reports extraordinary progress throughout both islands of Protestant propaganda. Both progress has been marked in eastern Cuba, where strong churches are already established. In Porto Rico, according to Dr. Moorehead, Baptist places of worship are unable to hold the people who wish to attend them, and there is universal demand for English instruction.

THE CHINESE ARMY

ALBUQUERQUE MAY HAVE AN OFFICER IN THE RANKS OF THE YELLOW PERIL.

It leaked out this morning that Harmon H. Wynkoop, whose accounts as secretary-treasurer of the local Typographical union have been found short by the printers, may become an officer in the Chinese army. Tracing the rumor to its head, the Chinese was informed by Thomas Thompson, who is the chief aliner at the dining parlors of Palace on First street, that Mr. Wynkoop informed him several weeks ago that he had been appointed an officer in the Chinese army, and would go to El Paso to sign the commission. Mr. Wynkoop, it is true, went to El Paso, but the news of his signing the commission as an officer in the Chinese army has not reached this city.

Yesterday afternoon the Typographical union held a meeting, and, after discussing the Wynkoop shortage, adjourned without any action.

One of the clauses bearing upon Mr. Wynkoop's case, as found in the by-laws of the local Typographical union, reads as follows:

"Sec. 11.—Any member of the union who shall be convicted of knowingly defrauding or attempting to defraud any office or chapel in which he may be employed shall be expelled."

In the by-laws of the International Typographical union the following has a direct bearing on Mr. Wynkoop's case:

"Sec. 18.—If said report should show any errors of importance, or defalcation, or misappropriation of funds of the secretary-treasurer, or of any officer of the Union Printers' Home corporation, it shall be the duty of the president, with the consent of the executive council, to suspend such officer or officers, and he shall proceed at Typographical union from loss, and in accordance with the bond or bonds of said officer or officers."

SILVER CITY.
From the Independent.
Mrs. H. A. Owen left for St. Louis to join her husband who is in charge of the New Mexico educational ex-

hibition at the Louisiana Purchase exposition.

Charles Mastin left for Nebraska, where he will remain for a considerable length of time.

J. W. Allen, who is an extensive property owner at White Signal, was in Silver City purchasing supplies.

Mrs. A. H. Laird arrived from Los Angeles, where she has been for over a year. Mrs. Laird will remain in Silver City now indefinitely.

A cave-in occurred in the Robert E. Lee mine at Santa Rita in which two Mexican miners were painfully, though not seriously injured.

Charles H. Lyons was in Silver City from his ranch on the Mangos. Mr. Lyons reports the arrival of a girl baby at his home on the 11th inst, and is the typical "proud father."

Louis Champagne was in town from the Middle Gila. Mr. Champagne reports that there have been two good crops in the Gila river within the past couple of weeks, and that the farmers have plenty of water for irrigation in this section.

A. H. Hartree, attorney-at-law, has been confined to his bed at the latter hospital for several days with a very severe attack of pneumonia. He is receiving excellent care from nurses and doctors, and it is hoped that he will soon be convalescent.

Mrs. Mary E. Dodd left for Los Angeles, Calif., where she expects to make her future home. Mrs. Dodd has been a resident of Silver City for a number of years, and will be greatly missed by her many friends, by whom she is highly esteemed.

Telephone connection has been made with the G. O. H. ranch headquarters. A bill charge of 50 cents will be made for a connection with this line. It is expected to have the line completed to Upper Gila hot springs within the next five days.

William Mann, an old time resident of Pinos Altos, but now a resident of Coahuila county, in the northern part of the territory, is in the city renewing acquaintances. Mr. Mann came to the territory 54 years ago, was one of the first settlers at Prescott, Arizona, and was in Pinos Altos in 1862, during the gold excitement. He is a fluent talker, and tells many interesting reminiscences of the early days in New Mexico and Arizona.

Otto Metzger and Willie Tait, two bright and enterprising youngsters, with an overwhelming desire to see how the country out side of Silver City looks, left quietly on a journey, the ultimate destination of which in St. Louis and the World's fair. The last seen of the boys they were in Rincon and faring reasonably well, but before they get through with it, they will find that the life of a box car tourist is not all that it is cracked up to be.

H. S. Van Ryzek, the live stock agent of the Santa Fe at El Paso, came in from the south this morning, and will leave tonight for Los Angeles, where Mrs. Van Ryzek has been visiting the past few weeks. Both will return to El Paso in a short time.

PENNSYLVANIA MILLIONAIRES.

Will Give El Paso Pure Water From Deming.

Messrs. Allen C. Kennedy and J. B. Delamater of the Mimbres River Water company, whose articles of incorporation were filed with the secretary of the territory on June 8, and are published elsewhere in today's Citizen, are registered at the Alvarado.

Mr. Kennedy this morning made the following statement, to a representative of the Citizen:

"The Mimbres River Water company has been incorporated with a capital of \$2,000,000 for the purpose of furnishing the city of El Paso a pure and abundant supply of water, procured from the Mimbres river, near Deming, and from thence piped, with a natural gravity fall to the city."

"The officers of the company are Geo. W. Delamater, of Pittsburgh, president; Allan G. Kennedy, of Santa Fe, vice president and general manager, and Jas. B. Delamater, secretary and treasurer."

"We propose to place in El Paso within one year from beginning of construction, five million gallons of Deming water per day, and should that supply prove inadequate in the future, we are in a position at any time to increase the same up to sufficient water for a city of two hundred thousand inhabitants."

"The syndicate underwriting the stock of the company are Pennsylvania capitalists and are represented in the management of the company by Senator Delamater. While this is their first venture into the New Mexican field of investment the undoubtedly satisfactory returns from the same will doubtless encourage them to make further investments in this vicinity."—Albuquerque Citizen.

DEMING WILL KICK.

Yes. No doubt the above sounds very nice to Messrs. Kennedy, Delamater et al. But when they commence active work on this scheme they will find that there are others who propose to have something to say about this matter.

If the gentlemen suppose for a moment that the people of Luna county will sit idly by and see them take such a volume of water from under their noses, thereby causing every well west of their plant to dry up, they don't know the residents of Deming and Luna county. No such volume of water as is guaranteed in the above interview can be had, and if it could, not a well for twenty-five miles west of the proposed plant would have a drop of water in it after six weeks pumping by the Mimbres Water company. To be plain gentlemen, you will find that the Elephant Butte dam scheme and its accompanying law suits won't compare with what you are running up against when you attempt the scheme you are now attempting to foist onto eastern capitalists to the tune of \$2,000,000.—Deming Headlight.

THE LITTLE DOCTOR ...

Neuralgia.—This, so common in Colorado, is difficult to cure. Try one drop of fluid extract of apoc in a spoonful of water every half hour until relieved. Keep the feet and body warm.

Inflamed Eyes.—A very good formula is composed of acetic acid, twenty grains, sulphate of morphia, thirty grains, and glycerine, one-half ounce. Shake well and place one drop in the eye night and morning.

Hives.—In summer, known also as nettle rash or hives, a dram of carbolic acid to a pint of water is said to give immediate relief to the itching. The addition of four drams of borie acid and two ounces of alcohol give more positive results.

A remedy for Chiggers.—A small dose of pulverized sulphur, about twice the size of a pea, taken every two or three days will render one immune to attacks from chiggers. A person may get with impunity into the worst infested places after taking internally a small amount of sulphur.

Flatulency.—This animal universal stomach disorder among people of sedentary habits can be overcome by taking two or three grains of subnitrate of bismuth before each meal and following thereafter with a five-grain tablet of some of the peppermints procurable at any drug store.

Cure for Night Sweats.—This complaint may be cured by sponging the body with salt water, and patients who are suffering from fevers may be made cool and comfortable by frequent sponging with soda water. In all cases where the patient is likely to chill during the sponging one (or two) or a small portion of the body should be sponged at a time and then covered up before the next part is touched.

To Open a Boil Painlessly Without a Knife.—Take a piece of soft linen, smear a little vasoline or other ointment substance on one side, pour chloroform on the other side, and quickly apply over the boil or carbuncle. Place a handkerchief or compress over it. It will smart a little at first, followed soon by a pleasing and cool sensation. Change the cloth often, applying the chloroform each time, and in from two hours to a day the boil will soften and open, no matter how hard it may be.

Nose Bleed.—A very simple and easy method for controlling nose bleed that may prove valuable to many persons living in the country where a physician is not procured as easily as in the cities, is to take a piece of fat bacon, two and one-half inches in length, and of sufficient size, cut in the proper shape and as large as can be easily forced into the nostril. Press into the bleeding nostril and let it remain several hours. It controls the hemorrhage and is not uncomfortable.

Dysentery.—This is simply an inflammation of the lower bowel characterized by evacuations of blood and mucus, diarrhoeal stools, etc., and may be acute or become chronic. Adult males are usually the ones attacked. Changes in temperature, bad hygienic conditions, are generally the sources of infection, together with drinking water in which decomposed vegetable matter has been thrown. The patient should take daily doses of castor oil—an ounce to the dose and mixed with fifteen drops of denatured tincture of opium. Rochelle salts is also good, given every hour in one-half ounce doses. This treatment should not be continued too long—perhaps two to four days. Diet is most important. It will be noticed in cases of chronic dysentery that much undigested food will be found in the stools, therefore it will be readily seen that a strict diet is necessary. The intestinal tract is irritated and it is necessary to give as little work as possible and at the same time to keep up the general strength of the patient. Use baked milk, milk toast and raw eggs in moderation. Pain in the abdomen may be relieved by a hot water bag or a flaxseed poultice.

T. Y. Maynard, watch inspector for the Santa Fe, is in Gallup on one of his periodical official trips.

GOO WORK.

Gone Daily in Albuquerque. Many Citizens Tell of It.

Nearly every reader has heard of Doan's Kidney Pills. Their good work in Albuquerque still continues, and our citizens are constantly adding new testimonies by public testimony. No better proof of merit can be had than the experience of friends and neighbors. Read this case:

Mrs. M. J. Butler (M. J. Butler, night watchman in the Santa Fe shops) residence 117 East street, says: "When I went to the Alvarado Pharmacy for Doan's Kidney Pills I had an attack of backache. It was only one of many which had annoyed me for two or three years. At first they were mild and I expected they would leave just as mysteriously as they came but with the passing of time the attacks were more frequent and of longer duration. I used three boxes of Doan's Kidney Pills and was rewarded with an entire cessation of the aching. Up to date, and it is considerably over six months since I stopped the treatment, there has not been a sign of any recurrence."

For sale by all dealers. Price 50 cents. Foster-McBarn Co., Buffalo, N. Y., sole agents for the United States.

Remember the name—Doan's—and take no substitute.

AMERICAN MINING CONGRESS

Will Meet at Portland, Oregon, Five Days in August.

IMPORTANT GATHERING OF MINERS

Hon. J. H. Richards of Boise, Idaho, president of the American Mining congress, which will hold its seventh annual session in Portland, Oregon, August 22nd to 27th inclusive, in discussing the outlook for the coming season, said:

"The people of the Portland convention of the American Mining congress will exceed in interest, as well as in the number of delegates present, any former session of that body. The national character of the congress is becoming better understood, and the national importance of mining as one of the greatest elements of permanent industry and commercial progress is being more fully recognized."

"The people of Portland as well as those of the state of Oregon, as evidenced by the newspapers printed in the city and state, are taking a very earnest interest in developing the resources of the state, and naturally feel a substantial and solid interest in the success of the congress, knowing that it will not only serve to direct attention to Portland as a city, but in the varied resources of the state and the Pacific northwest generally."

"As a convention city Portland is splendidly situated, both as regards her local accommodations and on account of the great variety of attractive natural scenery in its environs. I know of no other part of the United States that in variety and magnificence of scenic attractions can surpass the territory immediately surrounding Portland for about one hundred miles in all directions. The snow-capped peaks, Mount Hood, St. Helens and Adams, the fertile Willamette valley, the grand and stately Columbia river, the innumerable Pacific coast resorts, or, to put in a more condensed form, everything that the harmonious blending of mountain, valley, river and ocean can present."

"But the enduring picture of all this grandeur and beauty, coupled with the capacity to sustain such a vast home and industrial life which will in the near future thrive within the landscape, is what heightens the attractiveness of this highly favored section to me."

"In the light of the surrounding conditions as I see them, it would be profitable to all delegates to the American Mining congress who have the time at their disposal, to arrange to remain in and around Portland some time after the convention closes, in order to avail themselves of the numerous opportunities for pleasant excursions that will be provided. The citizens of Portland have a thoroughly representative committee in charge of all local matters connected with the congress, and this committee is heartily co-operating with our secretary, Col. Irwin Maben."

"Among other things I have been informed that at the convention the Portland Commercial Club, easily the most handsomely equipped popular commercial body in the west is to give a reception at which the delegates and citizens may become acquainted. A trolley ride, showing the varied and peculiar attractions of Portland, will be another feature of interest, while the local committees are arranging for side trips at reduced rates for delegates, who not only wish to enjoy the scenic attractions, but desire to investigate the different mining sections through out the territory of which Portland is the center."

"Mr. J. Frank Watson, third vice-president of the American Mining congress, the president of the Merchants' National bank of Portland, represents not only the executive department of the American Mining congress, but is also acting with the Portland committee, and it is assured that the representative mining men of the west will find a hearty and cordial welcome in Portland."

"It is the intention to provide especially, for the comfort and convenience of visiting newspaper men, representing not only western publications but those printed in the great metropolitan cities, and it is also desired that newspaper representatives from foreign countries attend this session of congress."

"We want delegates from every section of the United States, and we have reason to anticipate an especially large attendance from Colorado, New Mexico, Arizona, Montana, Wyoming, California, Utah, Nevada, Idaho, Washington, Oregon, Kansas and Missouri."

"The program as the Portland meeting will be one of special interest and among those who will address the congress are some of the best speakers in the United States, while the experts representing the United States government will be a feature of vital importance. This meeting at Portland is expected to decide definitely upon the question of permanent business headquarters for the American Mining congress between its western and eastern divisions. There will doubtless be an interesting contest between the different western cities in regard to the location of this permanent headquarters, while the decision of the congress as to its next place of meeting will also be an important matter and a subject of some rivalry."

"We must not cease to press our demand upon congress for an independent department of mines and mining. This is one of the necessary steps to be taken in accomplishing

the aims of the congress, and the institution of such a department is just as essential and will be found to be just as salutary as the creation of the department of agriculture."

TWO MARRIAGES.
Thomas R. Daly and Miss Alpha M. Hall—Eugene McElroy and Miss Blanche Maud Fleming.

On Tuesday evening at the home of Mr. and Mrs. Tamme, Thomas R. Daly of Las Vegas, and Miss Alpha Mae Hall of St. Louis, were married, the Rev. A. C. Geyer performing the ceremony. It was a very quiet wedding, there being no attendants and only a few intimate friends of the contracting parties being present. Mr. and Mrs. Daly left on the flyer on Wednesday for St. Louis, where they will visit the exposition, going from there to Chicago and probably returning to Las Vegas in the fall. Eugene McElroy of Las Vegas, and Miss Blanche Maud Fleming, of Baton Rouge, were married in the Catholic church on Wednesday morning in the presence of a large number of invited guests. Father Cooney performed the ceremony. The bride was attended by her sister, Miss Lillian Fleming, and Miss Katherine Fleming. The groom was escorted by Patrick McElroy, who was best man. A wedding breakfast was served at the home of the bride after the ceremony. In the afternoon Mr. and Mrs. McElroy left for a visit to Michigan and on their way home they will stop at the St. Louis exposition for a few days.

NOT YET SETTLED.
Who Will be Appointed Master Mechanic Here.

The report that D. A. Sullivan has been appointed master mechanic for the New Mexico division, with headquarters at Raton has been confirmed. A. H. Harty, the present incumbent, is to succeed Superintendent of Motive Power Bureau as mechanical superintendent at Albuquerque.—Raton Gazette.

The Gazette is wrong; the appointment of master mechanic to take the position of Mr. Bean at the local shops "has not been confirmed." The coast line officials are considering the names of several good men, notably Master Mechanic Harty at the Raton shops, and Master Mechanic Buck at the Needles shops. Both of these gentlemen are thoroughly competent, skilled mechanics, and stand very high in the estimation of the Santa Fe road. The appointment, however, may be expected in a few days, and The Citizen predicts, from later reports, that Mr. Buck, of the Needles shops, is more than likely to be transferred to the local shops, and the latter would be bettering his condition, financially and otherwise.

In the case of Mr. Harty the salary would be about the same, and if he were decided upon and would accept, he would do so merely for the advantage to be gained in residing in a larger town and the gratification of having control over larger and more commodious shops.

It is almost positive, however, should Mr. Harty come to Albuquerque, that D. A. Sullivan, well known in this city, would succeed him at the Raton shops.

In the case of Mr. Buck, no name has been mentioned as his successor, should he (Buck) come to the Albuquerque shops. The assistant superintendent of machinery of the coast line, Arthur Lovell, who has the appointment in hand, has not announced his choice, regardless of the fact that certain newspapers persist in stating that the appointment of a master mechanic for the local shops, vice S. L. Bean, who was recently promoted to the position of superintendent of machinery of coast line, has been made. Mr. Bean's family have already removed to Los Angeles, his future headquarters, and he expects to be able to leave here in a very short time as matters have now become quiet and everything is again running smoothly at the big local railroad shops.

GERONIMO'S DAUGHTER LIVES AT THE MESCALERO RESERVATION AND DESIRES TO VISIT HER FATHER, WHOM SHE HAS NEVER SEEN.

It is not generally known, but it is a fact, nevertheless, that Geronimo, the famous old Apache chief of the southwest, who has been nominally a prisoner of war for the past 15 or 16 years, has a daughter living on the Mescalero reservation. Her name is Lena Geronimo, and she is now 16 years old. Her father has never seen her and does not know that she is the belle of the reservation. So famous has become her personal beauty that the El Paso & Northern Eastern road is now using her photograph in the advertising pictures issued by that line.

Geronimo is now making an effort to get his daughter to visit St. Louis, where he is located as a special attraction of the World's fair. Both parties are, however, without funds and so far no one has been found who is charitable enough to send the young woman to St. Louis to visit her father. An effort is now being made, however, to get the World's fair people to furnish the necessary cash for the young woman's transportation to St. Louis and return, that she may visit her father.

Work on the new building being erected on Railroad avenue for the Rothberg & Schloss Cigar company, is progressing rapidly, and it is expected will be finished by August 1st. H. Massey & Co. will occupy the building now used by Rothberg & Schloss Cigar Co.

GREAT FIELD FOR FARMERS

THE WORLD'S FAIR FULL OF INSTRUCTIVE FEATURES—SCIENTIFIC FARMING DEMONSTRATED.

By Frank Ebert.
St. Louis, June 17.—The greatest school of instruction for farmers, fruit growers and stockmen that has ever existed in the World's Fair at St. Louis. The whole theme of the fair is instruction; its most striking features are those pertaining to education. To the farmer especially the educational features are valuable. In fact more can be learned in scientific, up-to-date practical farming at the World's Fair in a week, than can be learned at all of the county and state fairs of the country in years. Here everything is thorough and complete and every sort of improved machinery and method of cultivating the soil is carefully demonstrated.

The Palace of Agriculture is the largest building on the ground, so great is the importance attached to farming by the exposition company. Besides this, there are many acres outside the building devoted to agriculture, and the Palace of Agriculture is devoted to fruit and fruit growing. In the Palace of Agriculture the various states of the Union and the leading nations of the world have exhibits, showing their principal products. These are arranged with excellent taste, the products of the field and farm being turned into artistic decorations and beautiful pictures.

With the various products exhibited are given facts and figures, showing where the best crops are made and the relative merits of the different varieties of grains, fruits, vegetables, etc. Some of the leading fruit crops are made special features of the state exhibits and are displayed in a way to impart much useful information to farmers from all localities, by showing the effects of improving the seed, cultivating and crossing varieties.

The United States government experimental stations show their methods of cultivating the soil and destroying insects that injure crops. The details of disposing of destructive insects, as studied by the farmers of the country, will save millions of dollars worth of farm products, which are annually destroyed by these insects. It will be money well invested by every farmer in the land to visit the World's Fair and study the agricultural exhibits thoroughly, and learn how to protect his crops from the ravages of insects, how to get the best results from planting, how to cross varieties to the best advantage and how to strengthen and fertilize the soil effectively.

The experiments made by others can be utilized by the farmers who visit and study the World's fair. They can see what crops thrive best in different soils and climates, what crops should be varied in order to rest the soil, and a thousand valuable pointers about farming.

The destructive insects are shown in their several stages, the egg, the worm and the moth, and the methods of destroying the insects are fully explained. The outdoor exhibit shows the growing plants and explains their habits and proportion. This is the United States outdoor agriculture exhibit under the control of the department of agriculture. In this government farm, are shown the products of the soil and what crops thrive best by alternating the varieties. Here is given instruction in tree planting in such ways as to protect the farm from the severe western winds. Shade trees of all varieties are shown and instructions are given for their planting and culture.

In the Palace of Horticulture can be seen the finest fruits produced in the United States and Canada, and many valuable pointers in fruit growing may be obtained from a visit to the general state exhibits in this building.

Farm machinery of every kind is shown in the Palace of Agriculture and every kind of labor-saving device imaginable can be studied there, so that farmers have the whole world before them from which to select the best machinery for their farms to plant.

In the model poultry farm, just east of the Palace of Agriculture, can be seen the finest chickens, ducks, geese and poultry of all kinds, with instructions guiding the farmers in the improvement of their poultry. The several live stock exhibits give the farmer the best ideas of the improvements in stock breeding. He can see what variety of stock to secure and how to improve his breed. In fact, the farmer will find in the World's Fair a world full of information that is well worth the time and money the trip will cost. He will be enabled to see at a glance the advancing world and to share in the fruits of progress and improvements. He can reap the reward of the study and labor of individuals and government and garner a harvest of knowledge that will make him richer, happier and better and will lighten his labors and sweeten the fruits of his industry.

OUR LOCAL HORSES

THEY SECURED SOME PURSES AT THE COLORADO SPRINGS MEET.

Yesterday afternoon late, W. L. Trimble and Emil Mann heard from Colorado Springs, Colo., that the telegram gave them the information that in the free-for-all pace Stranger O., owned by Joseph Barnett, took third place, while Exodus, owned by Emil Mann, got a fourth. In the free-for-all pace the result was Stratton, first, Laura Spur second, and Stranger O., third. Best time, 2:15.

W. L. Trimble was especially pleased

ed with the performance of Bonnie Treasurer, a horse he owned himself, and one of the favorite pacers of this city. In the 2:14 pace Bonnie Treasurer, now the property of J. W. Coffey, of Colorado Springs, took first; Danter J., second; Phoebe Elmont, third; Exodus, fourth. Time, 2:14 1/2.

Messrs Trimble and Mann inform The Citizen that the string of horses at Colorado Springs this week, left this afternoon for Denver, where the Overland race course meet opens tomorrow, and will be continued for ten days or two weeks. Next Monday Stranger O., will make his debut at Denver, and during the week the other Albuquerque horses will perform.

MEN LET OUT.

Reports Received Indicate a Reduction of 3 per cent in Employees.
Returns from sixteen roads in the general managers' association of Chicago, with a trackage of 36,920 miles and employing 54,835 men, report a net reduction of 6,742 in their forces, compared with the figures of June 30, 1903, or somewhat less than 1 per cent. Of the roads five reported no reductions, three decreases, five no material change and three slight increases. If a like percentage of reduction would amount to about 11,000. Between 1899 and 1903 the number of employees of the Chicago roads increased 63 per cent, while their compensation increased 80.6 per cent.

The way to convince a girl you think she is pretty is to look at her so she can guess you are thinking it.

KENNEDY AT EL PASO.

No Building Yet—Has Not Resigned as Chief Engineer.

A. G. Kennedy, connected with the Pennsylvania syndicate of capitalists known as the Mimbre River Water company, came in from El Paso and leaving this morning, and proceeded on to Santa Fe at 8:30 a. m. Mr. Kennedy, while at El Paso, was interviewed as follows by the Times:

A. G. Kennedy, who is at present chief engineer of the Mimbre River Water company, and who has until lately been occupying a similar position with the Santa Fe Central, scouts the idea that the road is doing any building, notwithstanding a dispatch to that effect received by the Times from Torrington, N. M., a couple of days ago.

"The road has only one party in the field at present," said Mr. Kennedy to a Times man yesterday, "and they are merely running a preliminary line from Willard to El Paso, following a reconnaissance which I made last year. This party is under charge of J. R. Farwell."

"Is it true that you have resigned as chief engineer of the railroad company?" was asked.

"No, I have not," he replied.

"Then do you still hold the position?" said the reporter.

"Well, all I can say is that there is at present no chief engineer to the road and still I have not resigned."

"Then you are practically on a lay off, as it were?" persisted the scribbler. And the engineer indicated his assent by a nod. In other words he didn't want to make his position plain, or rather, is not ready yet.

You can never make a man believe there is any sort of housekeeping in his house when he comes home late and finds the decanter empty.—New York Press.

No one would ever be bothered with constipation if everyone knew how naturally and quickly Burdock Blood Purifiers regulates the stomach and bowels.

When a woman is mad clear through sometimes you can tell it by the extra sweetness in her smile.

NOTICE OF PUBLICATION.

In the District Court of the Second Judicial District, County of Bernalillo, Territory of New Mexico.

Eva W. Tuttle, plaintiff, vs. Elmer Tuttle, defendant.

Said defendant, Elmer Tuttle, do hereby certify that a suit has been commenced against him by the said plaintiff Eva W. Tuttle, in the district court of Bernalillo county, New Mexico, for divorce from the bonds of matrimony now existing between said parties on the grounds of desertion, abandonment and non-support; that unless he enters his appearance in said suit on or before the 19th day of August, 1904, judgment by default therein will be taken against him.

W. E. DAME, Clerk.

THOS. N. WILKERSON, Attorney for Plaintiff, Albuquerque, New Mexico.

They are Here.

Two distinguished Frenchmen arrived in the city yesterday. They are Gaston Alberti, a commissioner from the Republic of France, to the St. Louis exposition, and Paul Demachy, editor in chief of "Le Steele" the leading political paper of Paris. They spent the day visiting the historic spots about Santa Fe, and also paid a brief call on Governor Miguel Otero this morning. Monsieur Alberti is also secretary to the general commissioner of France. The two are en route for San Francisco and from there they will return to St. Louis having completed the court of the United States—New Mexican.

The "faithful real estate horse" of Col. E. H. Dunbar, finding himself unhitched this afternoon, created some excitement on Railroad avenue near the Sturgis European and started off on a run. Will Clifford, who has gained some reputation as a sprinter made after the horse, and soon had the animal quieted. Mr. Dunbar was very grateful to Mr. Clifford for stopping the animal, thus preventing another smashup for the real estate agent.

A JOKE TRANSLATED

English Version of One of Mr. Depew's Favorite Stories.

CHAPPIE DID HIS BEST

"When the average Englishman attempts to narrate a characteristic American humorous story he is almost certain to make a hash of it," remarks a Washington clubman who spent a good deal of his time abroad, to a star reporter. "The fact was instanced in a funny way in the smoking room of the steamer upon which I last returned from England. A middle-aged Englishman, a civil engineer, I believe he was, was called upon to do his share of the entertaining—we were making a late sitting of it—and he started in to tell a story that he had heard Senator Channey (Depew) narrate at a dinner in London. Now, I had heard Mr. Depew tell that story, too, and it went about this way:

"A New York lawyer, named Strange, noted for his wit, was upon his last bed of sickness. He knew that his end was near, and so he called his wife to his bedside to give her a few final directions.

"'Little woman,' he said to her, 'I know that I am going to die, and I am ready to go. But I could not die in peace if I thought there was going to be a lot of fuss and bother made over me after my death. I don't, as you know, believe in resurrection as applied to the dead. Now I don't even want my name carved on my headstone. I wish you'd just have a modest headstone erected over my grave with these words carved on it: 'Here lies an honest lawyer.'

"The dying man's wife demurred at this.

"'How,' she asked her husband, 'will people visiting the cemetery know from the inscription on the headstone who lies in the grave?'

"'Oh, they'll know, all right,' replied the passing man of law, with a faint smile.

HERE LIES AN HONEST LAWYER

a faint smile. "They'll read the inscription, and then they'll say: 'That's strange.'"

"Now, Mr. Depew told this story in England because he knew how dearly English people love stories that hinge upon a play of words. The story always tickled his English listeners immensely.

"Well, this Englishman in the smoking room of the steamer started off to tell that story something in this wise:

"'Well, you know, I heard of one your fellow—man named Depew—senator or something—told a deuced good story, 'pon my word, at a dinner awhile ago—deuced good. I declare. It appears, 'know, that a New York fellow—man of law, y'know—barrister, I believe—was dying, y'know. Don't seem to remember the fellow's name, let me see, what the deuce was the fellow's name, anyhow? Well, 'pon my word, if I haven't clear forgot his name! However, no matter. Well, this chap, y'know, was dying, and he was blooming good natured about it all, y'know, and he wanted to make his wife feel less shocked over it all, y'know, and so he called her to his bedside.

"'My dear,' says the chap to her, 'I don't want to have a lot of botheration and kickup business, y'know, after I'm gone. I don't want my name—deuced annoying that I can't recall that chap's name!—engraved on my headstone. Just put a small stone at the head of my grave, y'know, and have carved on it these words: 'Here lies an honest lawyer.'

"'Well, y'know, the legal chap's wife didn't like the idea of this, and she told him so.

"'But,' she said to him, 'how will folks, y'know, that read the inscription know who rests in the grave beneath the headstone?'

"'Well, y'know, this legal chap was a deuced humorous fellow, you know, and he was bound to have his final joke, y'know, and so he answered her: "'Oh, don't bother about that. They'll read the inscription on the headstone, and they'll say to each other, y'know: 'That extraordinary, y'know.'"

"Col. Albright as you have spent considerable time in Arizona, would you mind giving us something on its resources and political conditions?" "I saw most of Arizona during the past year and am pretty well acquainted with its resources. Agriculture is suffering immeasurably on account of the protracted drought and especially so about Phoenix in the world-wide famous Salt River valley, where its people are almost entirely dependent upon the product of the soil. Three-fourths of the inhabitants about the capital of the territory have been short of water for tri-

gating purposes, and should the people not get relief soon from a good heavy rain, there will be much suffering and many farmers will abandon their homes."

"What sort of a country is Yuma valley?" "The Yuma valley has been pronounced the most fertile soil on the continent and owing to abundance of water furnished by the Colorado river is designed to be the most prosperous agricultural section of Arizona. They cut eight good crops of alfalfa there every year and it brings rarely less than \$5 to \$14 per ton. Their lemons and oranges are first in market and their oranges are much sweeter than the California orange, and the grape fruit is unexcelled. Contrary to the report that Yuma is the hottest place on earth—on account of the gulf breeze it is at least 8 to 10 degrees cooler, the year around, than Phoenix."

"Is there much doing in mining?" "Oh yes, Arizona is slowly but surely coming to the front as a leading producer of all precious metals, and the section of country which has turned out more 'well fixed' men worth from \$50,000 to a half million dollars is Bisbee, the wonderful copper mining district which carries from 10 per cent to 20 per cent gold to the ton. The greatest producer, which has made perhaps two thousand men wealthy is the Copper Queen having 150 miles underground railway to carry ore to the surface. Everybody has money there, even the newspaper man, Douglas with its two immense smelters, the liberality of the big operating and smelting companies, together with the inexhaustible store of mineral in Sonora, Mexico, which can rightly be classed as a resource of the border town will make it a permanent and prosperous city."

"What about Prescott, is it still improving?" "There is where you mention a gem among the towns of Arizona. It is now and always will be classed with the substantial of the southwest. With its ideal—all the year around climate—great mining resources contiguous, will make Prescott grow. There are no less than twenty-five mining properties that are paying the pay roll of two thousand miners and the cost of supplies are tributary to the city."

"I may add that there is not a mining district in the entire territory that has not improved more or less during the past year. The Gold Road district, twenty-eight miles from Kingman is now and perhaps will be in future, one of the most permanent. It is a gold camp, the principal properties being worked by a French company. This company has been leasing to individual miners and nearly all of them are making big money. At Morenci a low grade copper district to which place the federal troops were ordered one year ago to quell a strike has the distinction of possessing two of the largest and most perfect concentrators in the world. The Detroit Copper company not very long since displaced an out of date concentrator and put in a new one with a capacity of 1,000 per day, and as this modern piece of machinery has given lucrative returns in treating two per cent ore the company decided to put in another which has a capacity of 2,500 per day. With the big smelter to treat the ore after the 3 per cent rock has been refined to 20 per cent by the concentrator, the little 22-inch railroad carrying ore and concentrates to and from the mill and smelter, a boiler and industrial lot of miners in a town of 3,500 inhabitants with not a street in it, gives the reader some idea of a typical and the most picturesque mining camps in the territory."

"Did you talk statehood to any of the prominent citizens?" "I talked and advocated joint statehood and insisted that New Mexicans were eager to have the marriage nuptials performed, but my arguments at that time fell upon them with little force. I discovered, however, during my recent visit to Phoenix and Tucson that a change has come over many who opposed this statehood alliance some months ago. It was stated to me by a power in the political councils of the republican party that Gov. Brodie was invited by President Roosevelt to come to the White House. Since this visit, friends of the governor don't holler so long and so loud against joint statehood, and it is even claimed that administrative republicans in Arizona would not come out boldly for it were they not in deadly fear that the democrats would take hold of the popular movement against it and elect Mark Smith delegate. Both parties in the territory are sparing for political advantage and it looks now as if the edict of the powers in Washington has gone forth and the republican party of the territory will support it. The democrats are expected to be against it, because they wish two United States senators from Arizona and two from Oklahoma, thus gaining two in the United States senate if single statehood is attained, which the republicans will not permit, and I verily believe that the republican party can and will make two states of the four territories, democratic obstruction to the contrary notwithstanding. The large monied interests of both territories are for it. In other words a great majority of those who bear the burden of taxes want it. The enabling act will pass during the short session of congress, a constitutional convention will be held, the autonomy of the state of Arizona will be adopted, and these republicans in this territory who don't get into the band wagon while there is yet time, will have signed their political death warrant."

Hon. W. S. Hopewell, who was on a visit to his cattle ranch in Sierra county, passed up the road for Santa Fe this morning.

LADIES IN GLASS GOWNS

AN ENTIRE BRIDAL OUTFIT OF PURE GLASS ON EXHIBITION AT THE WORLD'S FAIR.

St. Louis, June 15.—Glass textiles is one of the developments of the skill of modern glass workers. At the World's fair one of the most wonderful exhibits is the process of glass weaving, a delicate and fascinating operation. The operator takes a small glass rod half an inch in diameter and exposes the point to the blue flame of a couple of lamps. When at a white heat he draws out a thread almost as intangible as that spun by the fateful Atropos. An attendant flings this glistening filament over a great iron wheel which makes 300 revolutions a minute. It is so fine as not to be perceptible until a number of strands have been wound. When ready for removal water must be thrown on the wheel lest the thread, on account of its extreme lightness, fly away and be lost. Three hundred of the original filaments must be put together to make the thickness of ordinary cotton thread.

The finished fabric is of an exquisitely beautiful texture, somewhat resembling the rich stuffs of gold and silver used for sacerdotal vestments and altar cloths. It is unusually white and as lustrous as satin, the surface reflecting the light with somewhat of a metallic lustre. Blue, pink, Nile green and other delicate colors are manufactured.

The material is sufficiently pliable to be manipulated by the dressmaker, the needle passing through without any difficulty. It can be made up into exquisite costumes, and has little affinity with any of the weavers known to commerce. On account of the peculiarity of the texture it lends itself admirably to the puffs and tucks now so fashionable. A lovely gown is fashioned with the full gathered skirt of the 1820 period, the foot being finished with half a dozen volutes of the shining stuff, the corsage matching it in style. Some times an all white dress is relieved with pipings or cordings on faint tones of rose or baby blue. One great advantage this fabric enjoys over silk or linen is that it does not have to submit to the ministrations of the laundress, for all that is necessary when soiled is to wipe off the surface with soap and water.

In order to illustrate the practical utility of "glass or crystal cloth," the exhibitors have erected a stage with footlights on which everything is of this intangible fabric. The floor is covered with glass carpeting, which is not injured by use. The domed ceiling and walls are decorated with white glass cloth, tacked and studded at regular intervals with roses of every color, which look like so many bright-hued flowers growing from out of a bed of the purest white. The very furniture is upholstered with glass, in different colors, while American flags in realistic coloring are set at each end. The picture is completed by a group consisting of six figures, a bride and her attendant, bridesmaids, all robed in the purest white and in gowns illustrating the latest fashions. The display cost \$25,000. It is whispered that one of the smartest women in the smart set of St. Louis is desirous of acquiring one of these wonderful glass robes. Attired in such unique style, she no doubt will excite the envy of her rivals and set the fashion of wear for glass gowns.

Almost every article of feminine wear or ornament may be fashioned of "glass cloth." There are sofa pillows, cushions, braids for trimming dresses and millinery, in all of the latest styles are made in every respect as beautiful as those manufactured from silk. Being cheaper, they bid fair to rival those made from wood fibre so successfully exploited last season.

While the textiles made of glass are by far the most interesting part of lamp make, small covers and even pin the exhibit, there are other things to arrest the attention of the curious. It is said that there is but one man in the world who with a single breath can blow a bubble from ten to sixteen inches long. When this breaks it forms itself into a vaporous iridescent substance most as ethereal as air, and finer than the finest gold. This is used for decorative purposes, and when crushed between the fingers nothing remains but a powder as fine as diamond dust and of all the colors of the rainbow.

B. H. Briggs & Co. and S. Vann & Son ask the readers of this paper to read the value of Kodol Dyspepsia Cure. These persons who have used it and who have been cured by it, do not hesitate to recommend it to their friends. Kodol digests what you eat, cures indigestion, dyspepsia and all stomach troubles. Increases strength by enabling the stomach and digestive organs to contribute to the blood all of the nutriment contained in the food. Kodol Dyspepsia Cure is pleasant and palatable.

Reputation is a bauble that man blows and then punctures. Most men would rather get the short end of an argument than keep quiet.

It is because a man doesn't know a woman that he asks her to marry him. A fool envies another man's luck and a wise man envies his pluck.

The man who has an office on the top floor is no nearer heaven than the man in the basement.

It isn't what the average man knows about the hereafter that frightens him; it's what he doesn't know.

Most people who think they are deceiving others only succeed in deceiving themselves.

A fond mother may consider her son the flower of the family—and the neighbors may consider him a blooming idiot.—Chicago News.
