BOOKS RECEIVED

Access to Justice in Environmental Matters in the EU. Accès à la justice en matière d'environnement dans l'UE. Edited by Jonas Ebbesson. New York: Kluwer Law International, 2002. Pp. 499. \$138.00 hardcover. Presenting the state-of-the-art of access to justice in environmental matters in the European Union (EU) and providing a thematic and comparative introduction of the topic, followed by thorough descriptions of European Community law and the law of each EU member state.

Biotechnology, Agriculture and the Developing World: The Distributional Implications of Technological Change. Edited by Timothy M. Swanson. Northampton, MA: Edward Elgar Publishing, Inc., 2002. Pp. 281. \$90.00 hardcover. Providing an economic analysis of the industrial and distributional impacts of new biotechnologies and addressing in detail the significant consequences for developing countries.

Conserving Forest Biodiversity: A Comprehensive Multiscaled Approach. By David B. Lindenmyer & Jerry F. Franklin. Washington, D.C.: Island Press, 2002. Pp. 351. \$70.00 cloth, \$35.00 paper. Arguing that the conservation of forest biodiversity requires a comprehensive and multiscaled approach that includes both reserve and nonreserve areas and bringing together the latest scientific information on landscape ecology, forestry, conservation biology, and related disciplines.

Deep Injection Disposal of Liquid Radioactive Waste in Russia. Edited by Michael G. Foley & Lisa M.G. Ballou. Columbus, OH: Battelle Press, 1998. Pp. 206. \$49.95 hardcover. Telling the story of the first forty years of work in the former Soviet Union to devise, test, and execute a program to dispose of millions of cubic meters of liquid radioactive wastes by deep injection.

Disused Offshore Installations and Pipelines: Towards "Sustainable Decommissioning." By Morakinyou Adedayo Ayoade. New York: Kluwer Law International, 2002. Pp. 244. \$90.00 hardcover. A study of the regulation of offshore decommissioning that looks forward to the next stage of this unfolding evolutionary process: sustainable decommissioning.

Ecological Climatology: Concepts and Applications. By Gordon Bonan. New York: Cambridge University Press, 2002. Pp. 678. \$150 hardcover; \$60 paper. An interdisciplinary framework to understand the functioning of terrestrial ecosystems in the climate system, examining the physical, chemical, and biological processes by which landscapes affect and are affected by climate.

Endangered Species: Legal Requirements and Policy Guidance. Compiled and edited by Danny C. Reinke & Lucinda Low Swartz. Columbus, Ohio:

Battelle Press, 2001. Pp. 468. \$65.00 paper. Developed to assist environmentalists in the use of existing source materials related to the Endangered Species Act and the Marine Mammal Protection Act and to help them better understand what is expected and required for ESA and MMPA compliance.

Garbage Wars: The Struggle for Environmental Justice in Chicago. By David Naguib Pellow. Cambridge, MA: The MIT Press, 2002. \$24.95 cloth. Describing the politics of garbage in Chicago and showing how garbage affects residents in vulnerable communities and poses health risks to those who dispose of it.

The Greening of Conservative America. By John R.E. Bliese. Boulder, CO: Westview Press, 2002. Pp. 339. \$33.00 paper. Contending that the adherents to any well-considered conservative political philosophy should, on first principles, support pro-conservation, pro-environment policies and demonstrating with repeated examples how environmental protection policies actually benefit business by stimulating greater efficiency and innovation and by spurring the creation of green products and services for new markets around the globe.

High Altitude Energy: A History of Fossil Fuels in Colorado. By Lee Scamehorn. Boulder, CO: University Press of Colorado, 2002. Pp. 232. \$27.50 hardcover. Examining the causes and effects of the emergence of fossil fuels as major American industries and illuminating the history of coal production through boom and bust and its relationship vis-à-vis the success of other fossil fuels.

The Institutional Dimensions of Environmental Change: Fit, Interplay, and Scale. By Oran R. Young. Cambridge, MA: The MIT Press, 2002. Pp. 237. \$21.95 paper. Exploring theoretical concerns such as the relative merits of collective-action and social-practice models of institutions and addressing problems such as institutional fit, interplay, and scale, problems identified by the Institutional Dimensions of Global Environmental Change Science Plan.

Justice and Natural Resources: Concepts, Strategies, and Applications. Edited by Kathryn M. Mutz, Gary C. Bryner, & Douglas S. Kenney. Washington, D.C.: Island Press, 2002. Pp. 368. \$55.00 cloth, \$27.50 paper. Offering a concise overview of the field of environmental justice and a set of frameworks for understanding it and expanding the previously urban and industrial scope of the field to include distribution of the burdens and access to the benefits of natural resources, broadening environmental justice to a truly nationwide concern.

Marine Issues: From a Scientific, Political and Legal Perspective. Edited by Peter Ehlers, Elisabeth Mann-Borgese, & Rüdiger Wolfrum. New York: Kluwer Law International, 2002. Pp. 334. \$94.00 hardcover. A collection of essays and articles from experts in various fields connected to marine environmental issues meant to enhance the awareness of the reader about the importance of responsible ocean and coastal management based on ocean science.

The Moral Austerity of Environmental Decision Making: Sustainability, Democracy, and Normative Argument in Policy and Law. Edited by John Martin Gilroy & Joe Bowersox. Durham, NC: Duke University Press, 2002. Pp. 382. \$69.95 cloth, \$22.95 paper. Challenging the dominant influence of market principles and assumptions on the formulation of environmental policy, emphasizing the concept of sustainability and the centrality of moral deliberation to democracy, and examining the possibilities for a wider variety of moral principles to play an active role in defining "good" environmental decisions.

Natural Wetlands for Wastewater Treatment in Cold Climates. Edited by Ü. Mander & P.D. Jennssen. Southampton, UK: WIT Press, 2002. Pp. 248. \$139.00 hardcover. Presenting up-to-date contributions about the potential and use of natural wetland ecosystems for wastewater treatment in cold climate areas.

Nature and Agriculture in the European Union: New Perspectives on Policies that Shape the European Countryside. Edited by Floor Brouwer & Jan van der Straaten. Northampton, MA: Edward Elgar Publishing, 2002. Pp. 299. \$95.00 hardcover. Demonstrating how economics and ecology can play a critical role in maintaining and sustaining the relationship between nature and agriculture as they shape the European countryside.

Northwest Arid Lands: An Introduction to the Columbia Basin Shrub-Steppe. By Georganne O'Connor & Karen Wieda. Columbus, Ohio: Battelle Press, 2001. Pp. 218. \$18.95 paper. Exploring the rich variety of life in shrub-steppe lands of the Columbia River Basin, from the talus slopes of the Saddle Mountains to peachleaf willows at Rattlesnake Springs, this book will serve as a useful guide.

Nuclear Legacy: Students of Two Atomic Cities. By Maureen McQuerry & МорінМакКвірі. Columbus, Ohio: Battelle Press, 2000. Pp. 305. \$22.50 hardcover. About making connections—connections between cultures and communities; between the past, the present, and the future; and between students and scientific and business communities in two different countries,

Ukraine and the United States, a unique collaboration of and on two nuclear cultures.

Safescape: Creating Safer, More Livable Communities through Planning and Design. By Al Zelinka & Dean Brennan. Chicago: Planners Press, 2001. Pp. 285. \$75.00 hardcover. Challenging planners and citizens alike to create vibrant, integrated, self-policing, and sustainable communities, examining aspects of the urban environment that influence crime and the fear of crime, and recommending strategies for building—or rebuilding—communities where citizens feel safe and are safe.

Texas Natural History: A Century of Change. By David J. Schmidly. Lubbock, TX: Texas Tech University Press, 2002. Pp. 534. \$39.95 cloth. Comparing the survey of the status of mammals in Texas, published in 1905 by Vernon Bailey, chief naturalist for the U.S. Biological Survey, with the status of mammals in the state today and providing a look back at what happened to the natural environment of Texas during the twentieth century.
