WILLIAM JENN BRYAN’S MESSAGE

WILLIAM JENN Bryan, who speaks here on the Chautauqua pro-
gram, MONDAY, MAY 23rd, brings to Chautauqua audiences
what might be termed a semiofficial message from the government of the
United States, according to recent press reports. Upon the declaration
of the United States Congress that a war of existence exists between
the United States and Germany Mr. Bryan immediately
wired the president that he was ready to enter as a private or to
serve the government in whatever capacity he was needed.

A few days later he had a confer-
ence with President Wilson and the
president authorized to come to the
heads of the various departments of
the government and ask them of the
messages they wished to deliver to the
people of the state and, as plans, methods
and means by which everything could be
helped in the war, even though they were
not able to talk about their own
nations’ defense, says the Associate
Press.

Military authorities are agreed that
never before has there been a war
where victories were to be won just
senselessly on the main fronts, in the
victories, and through the efforts of
charities, investors and financiers as
in the struggles with Germany. Mr. Bryan, in his address to the
people of his country whom he may do the greatest good, will thus tell the people, in
his vigorous and stirring manner, how
each man may do the task most
needed for his country in these trying
times.

While Mr. Bryan’s contract states
he will be released from his speaking
engagements on the coast of his home state in
other lines of work for his coun-
try. President Wilson evidently
believes that Mr. Bryan’s greatest
message now right is to appeal to the
country for its greatest patriotism
and its greatest effort to succeed in
the war, both by truing its soldiers
and by spreading the good

tion to a great part of the entire

The usual interest was manifested at the Home Guards meeting at the Odd Fellows hall last night, as the crowd present, as at former meetings, with the different squads with each other and the officers of the various companies were not only in evidence but had the effect of raising the level of the meeting and quieting the fears of the more timid of our city in these stirring times.

FARMERS MEET AT LOVING

An enthusiastic meeting of the Loving branch of the Eddy County Farm and Live Stock Improvement Association was held at Loving last night.

The usual programme in connection with meetings of this character was carried out. Plans were suggested as to the future interests of the organization and short talks were made on corn, beans and cotton culture and all farmers were administered to plant and with good results a bumper crop suitable to the character of the soil and of the hand.

Emphasis was laid by all speakers on the serious shortage of grain, because of the extremely dry weather. Too much soil cannot斯坦 upon the importance of cutting now as this crop is almost gone and we must plant next winter if it is to make our city a half mile from the corner where those Norwegians were killed by the Mexican bandits.

Before farmers go to the store at the switch it would be wise to go about the store will be six months or more before the harvest. Should farmers go to the store at the switch it now will be too late to plant appreciably increase on all farmers in the valley the gravity of the situation and to take the necessary steps to prevent the present serious crisis. Judging from the crop reports that come to our office that language fails to describe the danger we are in.

We must begin the present effort to increase the efficiency on account of the importance of the question.

Quite a number joined the organization and all present promised to give their best support to their people in the present emergency.

J. W. Pollard and wife from Artesia are also Michigan, and will be there. Mr. and Mrs. Bass are the old family, and will be there. That was because it was the last.
