

(cont. from page 21)

ter and 6 inches thick. The under-surface of the top stone was smooth for grinding while the top of the bottom stones had shallow grooves chiseled in it to carry off the ground meal or flour. After the stones were finished, he could only haul one stone at a time on his small cart back to the millsite.

After the death of Mr. Acorcino Cordova, the mill became the property of his son, Laureano Cordova, present owner and miller. Mr. Laureano still dresses the stones, replaces rotted logs, and keeps the mill in excellent condition and in operation. □

# ChemComp doesn't shrink from any job.

When you want minimized shrinkage cracking for absolute structural integrity, durability, and beauty, the concrete answer is ChemComp, Southwestern Portland's expansive cement. ChemComp is finished cement, not an additive or partial replacement. It greatly reduces maintenance and repair costs due to cracks. It generally eliminates the need for waterproof membranes or surface sealants. Check ChemComp's many advantages.
