Too Many Goods, Not Enough Money.

That's The Truth!

If it's necessary to give some excuse for offering goods at half or less, we prefer to tell the truth, and the truth is tersely told above.

Bought twice as much as usual. Can't afford to carry any goods. But the story of our sincerity is best told by the price list following.

RACE A CYCLONE.

Exciting Experience of a Passenger on the Winfield, Kansas, last week in an encounter with the cyclonic storm.

April 25, 1896, at 4 o'clock in the morning, a passenger sitting in the second box in the rear of the Winfield, Kansas, train, looked towards the east and saw a billow of dust and smoke coming into the engine room. At 4 o'clock his watch. The train was 60 miles from the border of Kansas, and the passenger, whose name is not known, was one of the members of the crew of the engine. He had just accepted a good position as conductor of the Winfield, Kansas, and was on his way to the future. In the course of the storm, the wind became so violent that the car in which the passenger was sitting was almost blown off the track. He was wounded in the head and arm, but was not killed. The storm lasted for four hours, and the passenger was able to make his way to the station, where he was met by a doctor and taken to the hospital.

SUMMER COMFORT.

Get Ready For Warm Weather.

Summer is almost here, and the time to start preparing for it is now. Here are some tips on how to stay cool in the heat:

1. Wear light-colored, loose-fitting clothing.
2. Stay indoors during the hottest part of the day.
3. Use fans or air conditioning to cool your home.
4. Drink plenty of water.
5. Avoid strenuous exercise.
6. Take short, cool showers.

**The Bad Boy’s Bowel Blessing**

**Contributed by Jerome H. Whyte, Editor.**

Nature provides every species, not only of the low form, but of ourselves as well. Our Creator’s mechanism is nothing but a machine. We are too often inclined to think of it as one thing or another. But the fact is that all the natural workings of the human system are connected in one way or another.

We have learned that the bowels are an essential part of the body, and that they are necessary for good digestion and proper elimination of waste material. But what many people do not realize is that the bowels are also connected to the brain. The brain is the organ that controls the functions of the body, including the gastrointestinal system.

When a person has an obstruction in the bowels, the brain is forced to work overtime to compensate for the lack of proper elimination. This can cause a variety of symptoms, such as constipation, diarrhea, and even mental confusion.

In the case of the bad boy, his bowels were so clogged with waste material that his brain could not function properly. He was unable to think clearly and was prone to making bad decisions.

We can all learn a valuable lesson from this. We must always strive to keep our bowels healthy and free of obstructions. This will not only improve our digestion and elimination, but it will also help to keep our minds sharp and our decisions sound.
