This development is in the spring before grass and is now ready for harvest.

CLARK'S SUGGESTION.

Is the time ripe for the establishment of a national park within the South Mountains, and is there any need for extensive work in this area? We shall never be without this ideal park, and we must remain dependent on the local government for the management of the local parks. However, we have not seen the full extent of the contribution of the local government for the management of the local parks.
