NUMBER 104.

GENERAL BOTHA!

The Boer Officer Has
Surrendered.

Gen. DeWet and Force Wait-
ing on Orange River.

Attempt to Assassinate an Official at
St. Petersburg.

NEW YORK COURT DECISION.

New York, Feb. 28.—The London correspondent of the Tribune cables that he learns from good source that General Louis Botha, commander of the Boer forces, surrendered to the British until commander De Wet can be persuaded to lay down his arms. However, hostilities must proceed.

London, Feb. 28.—The Sun says it is officially announced that General Botha, commander in chief of Boer forces, surrendered to Kitchener this morning.

London, Feb. 28.—The Pall Mall Gazette credits the news of the Botha surrender, but the Associated Press learns that neither the foreign office nor the colonial office have any information to confirm the report.

De Wet's Force.

De Wet, Feb. 28.—The latest advice indicates that only a few of General De Wet's men succeeded in crossing the Orange river. General De Wet, former President of the Republic, and his forces, including Herzog's command, are camped on the south bank, waiting an opportunity to cross. Indications are that De Wet intends moving eastward. Thorneycroft is pushing from the west, while several columns are ready to meet the Boers in every direction.

Attempt at Assassination.

St. Petersburg, Feb. 28.—The man named Karpovich, who shot at and wounded a minister of public instruction, M. Bogoloff, yesterday, while the latter was holding a reception, has been arrested. Bogoloff had ordered strict enforcement of the law punishing obnoxious students with military service. This probably is the reason for the attempted assassination.

A Big Saving.

New York, Feb. 28.—More than \$30,000,000 may be saved this city by the decision of the court of appeals in the case of Contractor William A. Rogers, who refused to pay prevailing rates for labor by the municipal experts, this decision means not only the prevailing rate of wages fixed by law received through the city, but all additional rates to pay employees prescribed salaries are unconstitutional.

WILL GO TO BELEN.

The Fuller Brothers Will Leave the City This Evening.

The famous New Yorkers, the Fuller brothers, will leave tonight for Belen. The "bad man," with whiskers over his refined face, was introduced at the Citizen office this afternoon, and he stated, in a cultured voice, that he was not near as bad as he had been painted. He offered his little white hand, which was clasped in true hospitable western style, and the bloody chamois, which separated the Citizen and Fuller, was at once bridged over by the white hand, Fuller declaring that he and his brother had no intention of committing murder, or "shooting up to town," in a little while, but that they were going to the city to pay employees prescribed salaries are unconstitutional.

He Left for Santa Fe.

Stedman Naughton, known throughout the southwest by every man, woman and child as "Gunsy," left for Santa Fe this morning as a charity patient, that good man, Rev. Mandulini, interesting himself in his case. The patient is rapidly declining in health, and for the past few weeks has been indeed a very sick man. "Gunsy" has coughed it, sleeping outdoors and eating at his regular hours—for many years, and

REVENUE BILL!

Report Shows Compromise on Many Items

Result of Conference of Senate and House.

Charleston Exposition Will Receive No Appropriation.

NATIONAL LEGISLATION.

Washington, Feb. 28.—Conference of the senate and house upon the war revenue reduction bill today announced the result of their deliberations. Report shows compromise on many items. The bill, as amended, changes of the present law being as follows:

Tobacco—Twenty per cent discount of original tax, 12 cents per pound.

Cigars—On those weighing more than three pounds thousand, rate \$3 per thousand, fixed at against \$2.50 in present law. On those weighing less than three pounds thousand, rate 18 cents per thousand, as against 14 cents in existing law.

Cigarettes—On those weighing more than three pounds thousand, rate 18 cents per thousand, as against 14 cents in existing law.

Beer—House rate, \$1.50 barrel and repelling, 7 1/2 per cent discount retained.

Commercial Brokers Tax—Retained.

Certificate Stock Transfers—Rate 2 cents for each \$100 retained and transactions, banked shops included.

Sales Products at Exchanges—Senate amendment exempting sales merchandise in actual course transportation was accepted, but rate cut for each \$100, as fixed by present law, was retained.

Bank Checks, Certificates, Promissory Notes and Money Orders—Tax repealed.

Exchange, Foreign—Rate fixed 2 cents for each \$100.

Receipts and Telegram Messages—Repealed.

Miscellaneous Bonds—Repealed except upon bonds indemnity.

Certificate Damage and Certificates—Repealed.

Charter Party—Repealed.

Conveyances—Exempted below \$2,500; above \$2,500, 25 cents for each \$500, in accordance with senate action.

Telephone Messages—Repealed.

Leases—Repealed.

Manifests—Repealed.

Mortgages—Repealed.

Steamship Passage Tickets—Exempted below \$50 and rate fixed for 50 cents for each \$50 and over.

Power attorney, protest, warehouse receipts, proprietary medicines, perfume, cosmetics and chewing gum—Repealed.

Legacies—Law modified so as to exclude from taxation legacies charitable, religious, literary and educational character.

Total reduction revenue as made by the bill as amended upon the revenue of 1900, \$41,000,000, as against reduction \$40,000,000, as it passed house and \$45,000,000 as amended by senate.

Provisions of the bill as agreed upon will take effect July 1 next.

Exposition Conference.

Washington, D. C., Feb. 28.—Conference on the Louisiana purchase exposition bill today agreed upon amendments to close gates on Sundays and disagreed to appropriation for the Charleston exposition.

SENATE.

Washington, D. C., Feb. 28.—Aldrich interrupted the consideration of the river and harbor bill to present the conference report on the war revenue reduction bill, which is published as follows:

The senate agreed to conference report on the war revenue reduction bill. There was no objection.

Resolutions offered by Allen of Nebraska calling upon the secretary of the navy for copies of Gunner Chas. Morgan's letter to Rear Admiral Sampson, seeking promotion, and the admiral's endorsement thereon, together with all correspondence bearing upon the matter, was adopted.

Conference reports on military academy appropriation bill, agricultural appropriation bill and bill creating commission for the adjudication of Spanish war claims were agreed to.

The river and harbor bill was then taken up.

HOUSE.

Washington, D. C., Feb. 28.—The conference report on postoffice appropriation bill was rejected by the house and sent back to the committee.

Aggie's Proclamation.

Washington, D. C., Feb. 28.—The recent edition of the organ of the Filipino insurgents at Madrid contains a proclamation issued by Aguinaldo November 29, 1900, ordering all traitors summarily shot. It is also subscribed all priests shall yield allegiance to Filipino authorities. Mar. Chapelle is declared "infamous prelate," from the moment he adorned his pulpit with the American flag.

President Interested.

Special Commissioner Rockhill at Pekin has been instructed to make it known to the foreign powers that the president strongly deprecates any action that would tend to delay the present negotiations there and especially is he desirous that there shall be no further unnecessary bloodshed. It is confidently believed our commissioner will be able to secure support sufficient in number of other ministers to insure cessation of punitive demands.

MARKET QUOTATIONS.

Market quotations and review, furnished by W. P. Metcalf, 5 Crownwell block, received over the private wire of F. G. Logan.

New York, Feb. 28.—Stocks: The market was very irregular today, with the principal trading in railroad stocks.

Of these St. Paul was active and within limits of about two points. St. Louis and San Francisco issues were again strong and there are more of some sort of a deal, but they have not taken definite shape. Sugar was the leader in industrial, but did not hold its advance. Tobacco stocks

were also strong, steels were quiet, without change. There was more business in copper stocks at a higher range of prices. Demand sterling, 187 1/2. Total sales, 735,100.

Closing Quotations.

Chicago, Feb. 28.—Wheat: Wheat market has been dull. Wheat liquidation by holders caused a decline early in the price, although at this writing it has been regained. A prominent buyer interest has been a liberal payer. The pit sentiment is decidedly bearish and they lost no opportunity to hammer the price. The important interests in wheat appear to be waiting for conditions to change more to their favor before taking the aggressive trade.

Domestic trade is improving. The price current reports general wheat conditions better than last year at this time.

May wheat closed 75 1/2. Corn has been moderately active. The bull interest led by Phillips has been supporting the market. Sellers have not been aggressive. Country offerings small. May corn closed 40 1/2.

Mass Meeting.

A mass meeting is called for Saturday evening, to be held at the Commercial club building, to consider proposition of the Albuquerque, Santa Fe and Pacific railroad.

Henry-Bush.

In the parlors of the European hotel this afternoon Mrs. Royce, the wife of Blind and Arthur A. Henry of this city, were united in marriage by Rev. E. H. Bush, pastor of the Congregational church. The event was witnessed by a few invited guests, who stepped forward at the conclusion of the ceremony and wished the newly-wedded couple much joy and happiness.

"THE SKY PILOT."

At the Colombo Hall, by Miss Oliver. Next Tuesday Night.

"Have you read 'The Sky Pilot'?" No, through the kindness of the author of life I missed the book. But through good fortune which sometimes sets us down in a sunny spot just at the right time, I heard Mr. Katharine Oliver read it, and Miss Oliver is one of the best readers in America. I had not seen so many people wiping their eyes in a long while. It was a fearful time with interludes of side-shaking fun. Miss Oliver's fine feat of memory in reading through the book without a page of it before her is some indication of her vigorous mental power. But greater than all is Miss Oliver's power of impersonation and interpretation. The scenes with which she presents 'Broche' is quite surpassing; but equally surprising is her sudden transfiguration into the girlish character, pretty face and cheery tones of the young heroine of the book. It was a wonderful performance. And, perhaps, that is what the forward movement needs—preachers who can stir human hearts and call out all gifts and graces.—The Advocate.

Miss Oliver will give 'The Sky Pilot' next Tuesday at Colombo hall. Tickets on sale at 30 cents tomorrow morning at 9 o'clock. Seats 50c. It will cost you no more to have reserved seats, for general admission has been placed at 10c. Seats 50c.

Many say that if they were sure of going, such as satisfied, Miss Oliver has been heard here and universally appreciated. There will be no mistake in hearing one who has returned from the Atlantic to the Pacific and beyond the seas.

MONEY TO LOAN.

On diamonds, watches, etc., or any gold security also on household goods, secret with me; strictly confidential. Highest cash prices paid for household goods.

T. A. WHITTEN, 114 Gold avenue.

FRESH dressed Turkeys, Geese, Ducks and Chickens at the San Jose market tomorrow.

THE LEGISLATURE

Council Busy With Committee Reports.

Several Important Measures Introduced and Passed.

Bill to Improve System of Elections and Make Them Fair Introduced.

DEATH OF WILLIAM M. EVARTS.

Special to The Citizen.

Santa Fe, N. M., Feb. 28.—The principal business of the council this morning was the reception of committee reports.

Senator Harrison introduced a very important measure, council bill 87, requiring executors and administrators to make reports to the probate court of money received and disbursed from Indian depositions claims. Passed unanimously.

Conceded joint resolution No. 9, by Crutcher, authorizing the transfer of \$222 from "interest" to "militia" fund also passed.

Domestic trade is improving. The price current reports general wheat conditions better than last year at this time.

May wheat closed 75 1/2. Corn has been moderately active. The bull interest led by Phillips has been supporting the market. Sellers have not been aggressive. Country offerings small. May corn closed 40 1/2.

Mass Meeting.

A mass meeting is called for Saturday evening, to be held at the Commercial club building, to consider proposition of the Albuquerque, Santa Fe and Pacific railroad.

Henry-Bush.

ALBUQUERQUE, — FEB. 25, 1901

RUMOR UNFOUNDED.

The people of Albuquerque were unnecessarily alarmed yesterday and today, when the rumor was spread that the territorial legislature would pass a law to increase the limits of this city, taking in the entire Albuquerque and Santa Fe. The rumor is entirely unfounded. The territorial legislature has no jurisdiction over the city limits of Albuquerque. The city limits are fixed by the territorial legislature, and the city of Albuquerque is a separate entity from the territory.

NECESSARY PRECAUTION.

The secretary of the state board of health has issued the following instructions to consumptives and their friends:

"Consumption is the most destructive disease, the number of persons dying annually from this cause in Michigan amounting to about 3,000. Consumption is a contagious disease, the most dangerous to the human race. One consumptive may spread the disease to very many healthy persons. It is a disease which exists in the expectation of the consumptive person, and if this expectation is carefully destroyed before it is dried, little danger need be feared. Consumptives should be instructed not to spit upon the sidewalk, the floor, the street, the public hall, street and railway car, and other vehicles, nor where fowls or dairy cows may take in the sputum, or the dust of it, with their food. They should spit in pieces of cloth, or receptacles made for the purpose, containing a saturated solution of carbolic acid (one part of carbolic acid crystals to about 15 parts of water). Such pieces of cloth should be destroyed by fire before the sputum comes dry, and other receptacles should be cleaned with scalding water, their contents having been destroyed or otherwise carefully disposed of. Handkerchiefs which have been used for necessity should be boiled for half an hour before washing. It is best that all persons who have a cough should carry small pieces of cloth (each one just large enough to receive one sputum) and use them to receive the sputum, and then destroy them by fire. Remember that sputa must never be allowed to become dry."

CAUSE OF UNEASINESS.

The new star is now the brightest member in the constellation Perseus. It was easily found in broad daylight with the big telescope which was sent to the observatory. Its arrival may be intelligible to professional astronomers, but to amateurs it is a new star. The new star is a variable star, and its brightness is increasing. It is a star of the 10th magnitude, and it is a star of the 10th magnitude. It is a star of the 10th magnitude, and it is a star of the 10th magnitude.

THE LEGISLATURE

COUNCIL.

In the legislative council yesterday morning the following bills were introduced, read and referred to proper committees:

Council bill No. 81, by Mr. Hughes, requiring that all public buildings of the territory shall be insured to three-fourths of their estimated value. The Council bill No. 82, by Mr. Harrison, taxing male dogs and she dogs \$1 and \$2 in incorporated cities, and to be protected and registered for a much larger number of persons follow these avocations.

A Fortune for Charity.

A rich man's statement that he intends to devote his entire fortune to charitable works has aroused much discussion. This is because it will amount to a great deal of money. It is a statement that is a great deal of money. It is a statement that is a great deal of money. It is a statement that is a great deal of money.

This is What They Say.

Those who have heard of the Sarsaparilla for scrofula, eczema, eruptions, catarrhs, rheumatism, and other skin diseases, have also heard of the Sarsaparilla for the blood. It is a medicine that is a great deal of money. It is a medicine that is a great deal of money. It is a medicine that is a great deal of money.

IN MEMORIAM.

Resolutions of Respect Adopted by the Territorial Supreme Court.

JUDGE LELAND - ATTORNEY FINICAL.

At the opening of the supreme court Tuesday morning the chief justice, Hon. William A. Mills, in behalf of the court, read the following memorial on the death of the late Hon. Charles A. Leland, a former member of said court.

Judge Leland - Attorney Finical.

The supreme court, having met to express its profound sorrow in the death of its late associate, Hon. Charles A. Leland, a former member of this court, does make the following record of its appreciation of his character:

Judge Leland - Attorney Finical.

FOR A CHILD

who is "not doing well"—the condition occurs now and then with all children.

Scott's emulsion of cod-liver oil is a food that begins to build you up at once—course, it don't show at once.

Not doing well means that the child is not getting the good of his food. Not today, or this week; it may have been going on for a month; before it begins to show in the child's condition.

You want him to get back to turning his usual food into strength.

You want the food that begins to build, up at once.

We'll send you a little to try, if you like.

SCOTT & BOWNE, 90 Pearl Street, New York.

PARK ADDITION

40 Bran New Lots

One block from the beautiful grounds and buildings of the St. Vincent Academy, and two blocks only from the Fourth Ward School, is the south line of the above addition, the lot's of which are now offered to the public for the first time. A fine street, running north and south has just been graded, while two streets are opened to the east and to the west connecting with Keleher avenue. These

make the lots easy of access from every direction. The owner expects to sell every lot within a few days, and to do so has named a price that eclipses anything ever offered in the City of Albuquerque, either during good times or bad times.

FOUR LOTS AT \$150 EACH.

FOURTEEN LOTS AT \$125 EACH.

TWENTY-ONE LOTS AT \$100 EACH

These prices would be cheap for regular sized lots, but when we tell you that these lots are 50x120 FEET EACH

you can easily see that they are bargains. If you don't want to pay all down \$25 will do. Six months for the balance at 10 per cent interest. Title perfect and warranty deeds will be given.

Syrup of Figs

An Excellent Laxative.

The pleasant method and beneficial effect of the well known remedy, Syrup of Figs, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinal, laxative and purgative. It is the one perfect strength giving laxative, clearing the system effectually, dispelling colds, headaches and fevers, and keeps the system in a healthy condition. It is the one perfect strength giving laxative, clearing the system effectually, dispelling colds, headaches and fevers, and keeps the system in a healthy condition. It is the one perfect strength giving laxative, clearing the system effectually, dispelling colds, headaches and fevers, and keeps the system in a healthy condition.

In the process of manufacturing figs are used, as they are pleasant to the taste, and the medicinal qualities of the figs are obtained from the seeds and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get the best results, please remember the full name of the company on the label of every package.

La Grippe Cured.

In the winter of 1888 and 1889 L. was taken down with a severe attack of what is called la grippe, says F. L. Brewster, a prominent druggist of Winfield, Ill. "The only medicine I used was two bottles of Chamberlain's Cough Remedy. It broke up the cold and stopped the coughing. The medicine, and I have never since been troubled with grippe." Chamberlain's Cough Remedy can always be depended upon to break up a severe cold and ward off any threatened attack of pneumonia. It is pleasant to take, too, which makes it the most desirable and one of the most popular preparations for use for these ailments. For sale by all druggists.

W. B. correct from corsets, all sizes.

In white, drab and black; several different styles to choose from. B. H. Field & Co.

There is always danger in using counterfeits of DeWitt's Little Early Bitters.

The original is a safe and certain cure for piles. It is a soothing and healing salve for hemorrhoids and all skin diseases. Berry Drug Co. and Cosmopolitan drug store.

To California for \$25.

Numerous profitable business openings in California. Buy a home on the ticket via Santa Fe route and investigate conditions here. Only \$25. Albuquerque to California, Tuesday, 10 April 30. Inquire at depot.

Glorious News.

Come from Dr. D. R. Cargile, of Washita, I. T. He writes: "Four bottles of Electric Bitters has cured Mrs. Brewer of scrofula, which had caused her great suffering for years. Terrible sores would break out on her head and face, and the best doctors could give no help; but her cure is complete and her health is excellent." This shows what thousands have proved—that Electric Bitters is the best blood purifier known. It's the supreme remedy for eczema, leather, scrofula, ulcers, boils and running sores. It stimulates liver, kidneys, bowels, expels poisons, helps digestion, builds up the strength. Only 50 cents. Sold by J. H. O'Reilly & Co., druggists. Guaranteed.

Millions of people are familiar with DeWitt's Little Early Bitters.

A carload of that fine Gallap egg coal which will dispose of at \$4.00 per ton; half ton, \$2.25, delivered. John H. Beaven, Albuquerque, 299, Colorado, 4.

Pneumonia Can Be Prevented.

This disease always results from a cold or an attack of the grip and may be prevented by the timely use of Chamberlain's Cough Remedy. That remedy was extensively used during the epidemics of la grippe of the past few years, and not a single case has ever been reported that did not recover or that was a certain preventive of that dangerous disease. Chamberlain's cough remedy has gained a world-wide reputation for its cures of colds and grip. For sale by all druggists.

Like bad dollars, all counterfeits of DeWitt's Little Early Bitters are worthless.

The original quickly cures piles, sores and all skin diseases. Berry Drug Co. and Cosmopolitan drug store.

Dissolved Partnership.

Charles Grande and Angelo Parenti, proprietors of the Washington House, 26 South First street, Albuquerque, N. M., have dissolved partnership to take effect March 1st. Charles Grande will continue the business, collecting and paying all firm accounts.

CHARLES GRANDE.

A. PARENTI.

THE LINOTYPE AND ITS WORK

Operations of the Wonderful Invention Now Installed in The Citizen Office.

It Is So Arranged as to Use Nonpareil, Brevier and Small Pica, Especially Adapted for Brief and Transcript Work.

ITS PLAN OF OPERATIONS.

Years of continuous experiment and the expenditure of a million dollars were required for the invention of the Linotype.

The Linotype is pronounced by the London Engineering to be "the most remarkable machine of this century." Its invention and introduction are effecting a revolution in the business of printing newspapers and books which is scarcely second in importance to the wonders wrought by electricity.

It marks the first and only successful departure from the long-established forms of type composition. The last great improvement was the production of a machine in which the linotypes were produced instantly and ready for use on the press by the mere fingering of keys like those of a typewriter.

The principal factory is located on Ryerson street, Brooklyn, N. Y., and the offices of the company are located in the Tribune building, New York City.

The Linotype is not a typesetting machine in the ordinary sense of the word. On the contrary, it is a machine which, being operated by finger keys like a typewriter, creates or produces type matter ready for use on the press or stereotyping table.

The machine shown in Fig. 1 marks a wide departure from the ordinary method of using single line letter type. It produces and assembles side by side metal bars or slugs, as shown in Fig. 2, each the length and width of a line of type, and having on the upper edge the type characters to print an entire line. These bars, having the appearance of solid lines of type and answering the same purpose, are called "linotypes." When assembled side by side, as shown in Fig. 3, they constitute jointly a "form" composed of ordinary type.

After the line of matrices is thus composed it is transferred, as shown by the arrows in Fig. 6 and 7, to the race of a vertical mold wheel (K), through which a slot or mold proper extends from the front to the rear face, as shown in Figs. 7 and 8. The entire row of characters in the matrix line is presented, directly opposite the face of the mold or slot, so that when the mold is filed with metal, it produces a slug or -otype, the metal will flow into the matrices, which produce their respective type characters in relief on the edge of the casting.

Behind the mold wheel there is arranged a pot (M), in which type metal in a molten condition by a flame from the gas burner (N) thereunder. The pot has a delivery mouth or channel adapted to fit against and close the rear face of the mold. With-

in other words, a matrix bearing any given letter differs, as to the number or arrangement of its teeth, from a matrix bearing any other letter, and these teeth are relied upon as the means for effecting distribution. As shown in Figs. 6 and 9, a rigid metal bar (T), is fixed in position above the open upper ends of the magazine channels, and is formed at its lower edge with longitudinal teeth or ribs (U), adapted to engage the teeth of the matrices and hold the latter in suspension. The ribs of the distributor bar vary in number and arrangement at different points in its length. There is a special arrangement over the mouth of each channel of the magazine. The matrices to be distributed are simply pushed horizontally along the bar at one end, so as to hang suspended therefrom, and then moved slowly along it over the

mouth of the channels. Each matrix will remain in engagement with and be suspended from the teeth of the bar until it arrives over its proper channel, where the arrangement of teeth permits the matrix to disengage so that it falls directly into the channel. This falling action of certain matrices is continuing until the course along the bar to their proper points of delivery. The movement of the matrices is effected by means of longitudinal screws (V), which lie below the distributor bar in position to engage the edges of the matrices and slide them along the bar.

This Linotype Dashes. The publisher may produce dashes of forward out of the mold and select the linotype machine at a trifling cost. The contrivance consists of a block

containing an engraved pattern or matrix for a dash. When this block is placed in position in the machine, and the latter operated continuously, it will produce type-metal dashes, and assemble them in the galley in the same manner that linotypes are assembled. In order to change the pattern it is necessary only to remove the strip or matrix proper and substitute another of different pattern.

By the use of this contrivance, the publisher may produce substitutes for the ordinary expensive "brasses" in any required quantity.

Four Mold Disks. In order to meet the demand of book and job offices requiring very frequent change of measure or body, special mold disks are made, each containing slots for four molds, which may be of any length and size, removal and adjustment of molds is avoided, as four molds may be retained in the machine at one time, and either brought into operative position in an instant, as the face, measure or body may demand.

The disk will receive molds of all sizes, whether of the fixed or adjustable pattern.

After the casting operation the line of matrices, having answered their purpose, is lifted vertically as indicated by dotted lines in Fig. 6, and then shifted laterally until the teeth engage the teeth of the plate (R). This plate then rises as indicated by dotted lines, lifting the entire line of matrices to the distributing mechanism at the top of the magazine. The spaces remain behind when the matrices are lifted to the distributor, and are transferred laterally to the box or holder (H), to be used again.

The distribution of the matrices to their proper channels is effected by a mechanism of extreme simplicity, as follows:

Each matrix has the teeth (b) arranged in a peculiar order or number, according to the letter which it bears.

and adapted to be used in the same manner. After being used the linotypes are returned to the melting pot, to be recast into other lines, thus doing away with distribution.

The production of the linotypes is effected as follows:

The machine contains as its leading members a large number of small brass matrices. The cut of one of these matrices looks like a big letter Y, and it is used for that letter at the beginning of this article.

These matrices consist each of a flat plate, having in its vertical edge a female letter or matrix (a), and in the upper end a series of teeth (b). There are a number of matrices for each letter or character represented in the keyboard.

The machine is organized to select

rating arm (R) advances the linotypes one after the other along the galley, into which they are thus assembled side by side in column form, as shown in Fig. 8, ready for immediate use.

After the assembled matrices have answered their purpose in front of the mold it is necessary to distribute and return them to the magazine, from which they are again in due time discharged in different order for use in succeeding lines.

After the casting operation the line of matrices, having answered their purpose, is lifted vertically as indicated by dotted lines in Fig. 6, and then shifted laterally until the teeth engage the teeth of the plate (R). This plate then rises as indicated by dotted lines, lifting the entire line of matrices to the distributing mechanism at the top of the magazine. The spaces remain behind when the matrices are lifted to the distributor, and are transferred laterally to the box or holder (H), to be used again.

Behind the mold wheel there is arranged a pot (M), in which type metal in a molten condition by a flame from the gas burner (N) thereunder. The pot has a delivery mouth or channel adapted to fit against and close the rear face of the mold. With-

in other words, a matrix bearing any given letter differs, as to the number or arrangement of its teeth, from a matrix bearing any other letter, and these teeth are relied upon as the means for effecting distribution. As shown in Figs. 6 and 9, a rigid metal bar (T), is fixed in position above the open upper ends of the magazine channels, and is formed at its lower edge with longitudinal teeth or ribs (U), adapted to engage the teeth of the matrices and hold the latter in suspension. The ribs of the distributor bar vary in number and arrangement at different points in its length. There is a special arrangement over the mouth of each channel of the magazine. The matrices to be distributed are simply pushed horizontally along the bar at one end, so as to hang suspended therefrom, and then moved slowly along it over the

mouth of the channels. Each matrix will remain in engagement with and be suspended from the teeth of the bar until it arrives over its proper channel, where the arrangement of teeth permits the matrix to disengage so that it falls directly into the channel. This falling action of certain matrices is continuing until the course along the bar to their proper points of delivery. The movement of the matrices is effected by means of longitudinal screws (V), which lie below the distributor bar in position to engage the edges of the matrices and slide them along the bar.

This Linotype Dashes. The publisher may produce dashes of forward out of the mold and select the linotype machine at a trifling cost. The contrivance consists of a block

containing an engraved pattern or matrix for a dash. When this block is placed in position in the machine, and the latter operated continuously, it will produce type-metal dashes, and assemble them in the galley in the same manner that linotypes are assembled. In order to change the pattern it is necessary only to remove the strip or matrix proper and substitute another of different pattern.

By the use of this contrivance, the publisher may produce substitutes for the ordinary expensive "brasses" in any required quantity.

Four Mold Disks. In order to meet the demand of book and job offices requiring very frequent change of measure or body, special mold disks are made, each containing slots for four molds, which may be of any length and size, removal and adjustment of molds is avoided, as four molds may be retained in the machine at one time, and either brought into operative position in an instant, as the face, measure or body may demand.

The disk will receive molds of all sizes, whether of the fixed or adjustable pattern.

After the casting operation the line of matrices, having answered their purpose, is lifted vertically as indicated by dotted lines in Fig. 6, and then shifted laterally until the teeth engage the teeth of the plate (R). This plate then rises as indicated by dotted lines, lifting the entire line of matrices to the distributing mechanism at the top of the magazine. The spaces remain behind when the matrices are lifted to the distributor, and are transferred laterally to the box or holder (H), to be used again.

The distribution of the matrices to their proper channels is effected by a mechanism of extreme simplicity, as follows:

Each matrix has the teeth (b) arranged in a peculiar order or number, according to the letter which it bears.

and adapted to be used in the same manner. After being used the linotypes are returned to the melting pot, to be recast into other lines, thus doing away with distribution.

The production of the linotypes is effected as follows:

The machine contains as its leading members a large number of small brass matrices. The cut of one of these matrices looks like a big letter Y, and it is used for that letter at the beginning of this article.

These matrices consist each of a flat plate, having in its vertical edge a female letter or matrix (a), and in the upper end a series of teeth (b). There are a number of matrices for each letter or character represented in the keyboard.

The machine is organized to select

rating arm (R) advances the linotypes one after the other along the galley, into which they are thus assembled side by side in column form, as shown in Fig. 8, ready for immediate use.

After the assembled matrices have answered their purpose in front of the mold it is necessary to distribute and return them to the magazine, from which they are again in due time discharged in different order for use in succeeding lines.

After the casting operation the line of matrices, having answered their purpose, is lifted vertically as indicated by dotted lines in Fig. 6, and then shifted laterally until the teeth engage the teeth of the plate (R). This plate then rises as indicated by dotted lines, lifting the entire line of matrices to the distributing mechanism at the top of the magazine. LOCAL PARAGRAPHS.

Ralph Halloran, the prominent life insurance representative, left for the northern territorial towns this morning.

Ben Helweg, who is one of the best grocery clerks in the city, is no longer employed at the Jafa Grocery company.

Mrs. Leckley returned from Jerome, Ariz., last night with her son, who has been sick at that place for some time past.

Prohibition address tonight at Knights of Pythias hall by Oliver W. Stewart, chairman of prohibition national committee.

Jose P. Torres, probate judge of Socorro county, was among the number who passed through Albuquerque today on route to Santa Fe.

C. T. Brown, the prosperous miner and business man of Socorro, was here a short time today and met a number of his acquaintances. He continued north to Santa Fe.

Samuel Akers left for Allamogosa this morning, after a brief visit in this city with his family. He is the master mechanic in the milling plant of the Cochiti Gold Mining company.

On Saturday evening the usual dance and concert will be held at Orchestra hall, and at 3 o'clock Sunday afternoon a grand concert will occupy attention at the same place. All are invited.

Marshall McMillan has collected \$172 in fines for the short month of February. For the year the marshal's report will show a total of collections of more than \$5,000, an exceedingly good record for that office.

Do you think it nice to ride a bicycle and think how much nicer it is to ride a bicycle than to walk to work and think how much nicer it is to ride a bicycle than to walk to work?

W. L. Trimble & Co., the enterprising second street live-stock men, are today building the foundation for a 12-ton Fairbanks scales. They will be placed at the second street stable, and will be in readiness for use in a few days.

Just Berger, daughter of Editor William Berger of the Santa Fe Capital, arrived here from a short visit with friends in Socorro, and remained in this city today as the guest of Mrs. Thomas Leggett and family in the Highlands.

A convenient, up-to-date lunch counter has been installed at the Palace club rooms on Railroad avenue. J. J. Johnson, the obliging proprietor, is trying to make it a place of resort for his patrons, and is succeeding well.

Word was received in this city yesterday by J. H. Kuhn from his wife, who is in California with the children, Joe. She stated that the health of Joe was very much improved since their arrival at a lower altitude, and it is believed he will entirely recover in a few months.

E. Shollenberger, an engineer on the Rio Grande division, with headquarters in San Marcial, came up from the south this morning. He will be present at the meeting of the Fraternity commandery No. 3, K. T., and will be initiated in the mysteries of that order tonight.

At the red barn on Copper avenue today nine head of fine driving horses were auctioned off to the highest bidder by Scott Knight. Some of the animals brought good prices and others did not fare so well. The total sum realized was \$1,295, or a little better average than \$14.

Don J. Hankin, who went to Chicago last week in the interest of the southwestern Brewery and Ice company, is expected home tomorrow evening. He was accompanied by his wife as far as Lawrence, Kan., where she made a short visit with friends, and she also will return on Friday.

Will Moore, familiarly called "Spot" Moore, is again in the employ of the Electric Light company. "Spot" is one of the best and most accommodating employees that has ever been a position with the above company, and Superintendent Fisher will find him a first-class fireman, always ready to work day or night.

S. E. Aldrich, a prominent merchant of Gallup and Manalito, and owner of one of the finest sheep ranges in the southwest, is here today on a business trip. Since the heavy rains and snowfalls in the past few weeks he says the grass is coming up nicely and the indications for a prosperous year were never brighter.

Get Pino for that cough. Matthew's drug store.

The famous Quaker Vapor Baths cure head colds, rheumatism, la grippe, sleeplessness, nerve and blood diseases. Reduces obesity. Symptoms of la grippe, pneumonia, etc., broken up and eradicated from the system in one night. Left on trial free to responsible parties. Address C. D. Garvey, agent, 411 South Armo street.

Notice.
I am now prepared to fill all orders for Gallop egg coal, \$4.00 per ton; half ton, \$2.25. John S. Beaven, Automatic Phone, 266, Colorado, 4.

W. R. C. Attention!
There will be a special meeting at Whitson's Music Store tomorrow (Friday) evening, at 7:30 sharp. All members requested to attend. By order of the president.

ALBA ISHERWOOD, Secretary.

We are filling all orders for the best grades of coal. Better put in some more fuel as the cold weather is not yet over. Hagah's Coal Yard.

We have just received our 1901 bicycles. All the latest improvements and the largest stock in the city. Albuquerque Cycle & Arms Co., 115 Gold Avenue.

Big bargains in silk waists, golf skirts and tailor-made suits, at the Economist.
