WAR IN CHINA!

No News from the Foreign Ministers.

Leaders of a Chinese Mob are Beheaded.

Chinese Continue the Bombardment of Tien Tsin.

MISSIONARIES PLEDGED PROTECTION.

Washington, June 29.—The navy department this morning received the following cablegram from Admiral Kempff:

Choo, June 29.—Peking relief expedition now in Tien Tsin, with 200 sick and wounded. Foreign ministers and Peking party not with them. No news from them.

The department also was advised that Admiral Horney on the Brooklyn had arrived at Hong Kong en route to Taku. The Brooklyn will sail tomorrow for Taku via Nagasaki.

Leaders of a Chinese Mob Beheaded.

Paris, June 29.—The minister of foreign affairs, Delcasse, has informed the cabinet council to-day that the viceroys of Yunnan telegraphed that Francois, French consul and party who left Yunnan Sen, June 24, reached Tong Hai half way to Tonquin on June 27, safely.

The viceroys, it was further announced, had caused the ring leaders of the mob which attacked the Francois party on June 7, to be beheaded.

The French government, Delcasse further said, was in receipt of a cable dispatch saying that the viceroys of Nankin and Hankow had guaranteed the safety of the foreigners in the central and southern provinces, where order, it is asserted, thus far is undisturbed.

Later it was announced that the Chinese legation here had communicated to the French government the text of a document cabled by the viceroys of Nankin and Hankow, June 27, which is an agreement between the viceroys and consul at Shanghai, whereby subject to certain conditions, the viceroys undertake to protect the missionaries and foreign merchants in the south and east of China. The document was sent for ratification by Delcasse.

Believed by Remey.

New York, June 29.—A special to the Tribune from Washington says: Admiral Remey is expected to relieve Admiral Kempff next Sunday. Official dissatisfaction with Kempff has been displayed frankly by all the authorities here.

ALLIED FORCES.

Combined Armies That Will Crush the Rebellion in China.

Paris, June 29.—The Associated Press was informed to-day that as a result of negotiations between the powers, an agreement was arrived at which provided for the maintenance of the status quo in regard to spheres of influence and commercial agreements, also respecting the nature of guarantees of compensation to be demanded from China. According to the understanding the international army of occupation will consist of 80,000 men. Russia and Japan will provide 12,000 each, Great Britain, 10,000; France, 8,000; Germany, American and other powers, 5,000 each. The Russian army corps in Siberia, set mobilized, will only cross the Chinese frontier in the event of the crisis being aggravated.

Bombardment Continued.

Berlin, June 29.—The German consul at Che Foo, wires, under date of June 28, that nothing is known concerning the foreign ministers. The railroad between Taku and Tien Tsin was still threatened and the bombardment of Tien Tsin on the west continues, though the Chinese shells explode badly. It was also said that three residents were killed or wounded.

Fourth of July Celebrations.

On the Fourth of July Albuquerqueans will be found pretty well scattered all over the southwest. Some of them will take in the celebrations at the various towns along the Santa Fe

WASHINGTON MURDERER HANGED.

London, June 29.—Outside of minor conflicts in the Orange River Colony, showing continued Boer activity in the Senekal district, telegrams from South Africa merely indicate preparations for it is hoped, final operations in the tediously prolonged war.

Cape Town reports President Kruger still at Mafeking, afraid to move lest the bridges are undermined.

Another Vice Presidential Candidate.

Kansas City, June 29.—Thomas Maloney, chairman of the Washington delegation, is here as custodian of the vice presidential candidacy of James Hamilton Lewis. Maloney says that the states of Oregon, Washington and Idaho are for Lewis, and it is expected that the six additional votes of Alaska will be given to him.

BIDS OPENED AND WORK LET.

Co-Operative Building and Loan Association Will Improve "The Metropolitan."

The Metropolitan building, corner of First street and Railroad avenue, and which is now owned by the Co-Operative Building and Loan association, will be greatly improved in the next sixty days. The annex on Railroad avenue, and which was occupied by the Rico cafe, will be made into a two-story, also the annex of First street, now occupied by Moore & McCowan, ticket brokers. The bids were opened the other day and are as follows: James Archer, \$6,480; W. W. Strong, \$6,586; Bliss & Weir, \$6,785; J. W. McQuade, \$7,125; Gus E. Gustafson, \$7,550. Plumbing bids were as follows: Brockmeier & Cox, \$543.40; Whitney company, \$666.35; Thomas A. Barry \$730. The contracts were let to James Archer, as the main contractor, and to Brockmeier & Cox.

FIVE HUNDRED DOLLARS!

A Liberal offer—Hall and Larnard are not only willing, but insist that the truth be known.

A gentleman in conversation with Messrs. Hall & Larnard mentioned that he had been told that the Chickering Bros. piano, which is meeting with such popular favor among our musicians, was not what it was represented to be, but an inferior make, in fact a stencil. To explain, a "stencil" piano is another name for "stencil," on it than that of the maker. This is not the first time this rumor, industriously circulated, has reached the ears of Hall & Larnard. We take it for granted that the originator of this rumor is or ought to be, well posted and has proof to bear out his assertions. Surely no responsible party, without proof, would misrepresent, or wish to ruin either the reputation of the Chickering Bros. piano, or, failing in that, as a circulator of false reports, care to receive the judgment of the public. Nor do we believe any one would intentionally injure the reputation of Hall & Larnard, who have only been in business in Albuquerque a few weeks, but during that time have shown a liberal spirit and have taken an interest in the welfare of the city and territory which is to be their future home. In conclusion, Hall & Larnard wish to state that this day a check of five hundred (\$500) dollars has been made payable and deposited in the hands of Mr. M. W. Flournoy,

of the First National bank, who will upon receiving conclusive proof that the Chickering Bros. pianos are Stencil pianos turn over this check to the Hospital fund, or any other charitable institution in the city designated by the party, who tracing the rumor to its original source and receiving therefrom the conclusive proof of the circulation of much sure home. This is a rare opportunity for any one who has been told that Chickering Bros. pianos are Stencil pianos, to do a kind favor, or charitable act for a deserving institution, and the city of Albuquerque. Simply ask the party making the statement for proof that Chickering Bros. pianos are Stencil pianos. In order to trace this rumor to its foundation, Hall & Larnard will leave this offer open for ten days. Anyone who has read Hall & Larnard's statements in the papers know who makes the Chickering Bros. pianos, and those who have examined these pianos can easily understand their present enviable reputation not only in Albuquerque but throughout the United States. Write Hall & Larnard, the square music dealers for catalogue and information.

ALBUQUERQUE - JUNE 29, 1900

National Republican Ticket

For President—
WILLIAM MCKINLEY,
OF OHIO.
For Vice President—
THEODORE ROOSEVELT,
OF NEW YORK.

There are five presidential tickets all-
ready in the field.

The chances are that the democratic
ticket will be Bryan and Sulzer.

Ex-Senator Hill, a still a democrat
but he is not so big as he was four
years ago.

Political smart: Grant County has
twelve names named McKinley and
nine named Bryan.

The estimated population of Ten-
Tain is one million, and the estimated
population of Pekin is 1,200,000.

The United States needs a commercial
city and naval coaling station on
the coast of China, and now is the
time to get it.

This city will visit with Santa Fe on
the Fourth and help the patriotic
people of the territorial capital properly
celebrate the day.

The time for taking the census in
New Mexico has been extended to July
15, and it will be the fault of the enu-
merators if anyone is overlooked in the
count.

The act providing a civil government
for the territory of Alaska is said to be
the most voluminous measure ever
passed by congress.

The time for taking the census hav-
ing been extended fifteen days, every
effort should be made to secure an ac-
curate count of the people of this city.

The Philadelphia Call estimates that
75,000 visitors remained in Philadelphia
during convention week, besides those
who came in and went out each day
put down at 150,000.

A battle ship larger than Rhode Is-
land is to be named for that state.
The guns of the big vessel could prob-
ably throw projectiles from one side of
the state to the other.

At the state gun factory in China,
where about 4,000 workmen are em-
ployed, the average daily output
amounts to one rifle. But even with
this slow progress the Chinese have
accumulated guns enough to make
them think they can whip the Caucas-
ian world.

An ad to a proper understanding
of Chinese geography and names of
places which appear frequently in the
telegraphic dispatches from the east of
it is well to remember that Kiang
and he means river, hai, sea, pe,
north, kin, west, si, south, tsai,
south, pei, white, tsin, place, tsen,
hau, hen, chow, north, of river,
as Hankow; hsing, yellow; yang,
ocean; te, son, fu, provincial depart-
ment capital; significance residence
of district official.

FACTORIES RULED CITIES.
The way for any community to in-
crease its population and prosperity
lies in the development of its manu-
factures. There may be boom schemes,
immigration schemes and many other
plans undertaken, each meeting with
more or less success, usually the lat-
ter, but the cities and towns that have
grown and developed are those whose
citizens early went to work to secure
within their limits manufacturing in-
stitutions—such as would not only
give employment to many people but
would also manufacture the raw ma-
terial produced in their respective lo-
calities, and lessening the price of the
finished article to the home consumer.
Such places have prospered, everyone
of them, while the cities and towns
whose people have stood around and
talked of what they were going to do,
have made a very poor showing when
the census enumerators came around.

THE CHINESE SOLDIER.
The American troops, together with
those of the Chinese, are taking part
in the Chinese attack on the forces
for the first time a new sort of army
and a new kind of soldier. The Chinese
military system, it is known, is in-
competent and very corrupt. But if the
native ordinance and the native officers
are inadequate, the "man behind the
gun" remains to be reckoned with. If
the testimony of some of the most care-
ful observers of Chinese conditions is
accepted, he is, man for man, wholly
outclassed by soldiers of western na-
tions, and the strength of the Chinese
resistance must depend not upon sol-
dierly qualities, but upon sheer weight
of numbers.

Physically the Chinese soldier is by
no means to be despised. The rank
and file of the army show an average
stature much greater than that of the
Japanese, while many of the soldiers
are big men. They are sober and doc-
ile, and can put up with hardships.
At times they develop a sort of fan-
tasy which answers for daring and
an indifference to death, which is
a substitute for intelligent courage.
Beyond their list of soldierly attri-
butes does not go.

LUMBER SUPPLY.
After thorough research and careful
estimates, the Boston Herald concludes
that at the present rate of consump-
tion the lumber supply of the United States
is likely to be exhausted within 25
years. The amount of lumber now used
is 3,000,000,000 cubic feet for making
paper, while three times that amount,
or 10,000,000,000 cubic feet, is burned in
stoves, fireplaces and furnaces, and the
wood in fences and for railroad ties is
increasing. The forest products an-
nually consumed in the United States
are estimated to be worth \$1,000,000,000,
nearly twice the value of the output of

TOOK HIS OWN LIFE.

Charles Moore White is a fit of despon-
dency shoots himself.
At a little after 7 o'clock last night
Charles E. Moore took his own life by
shooting himself in the head with a
revolver. The deceased was in the
last stages of consumption, and de-
pendency over his condition is pre-
sumed to be the cause of the deed. At
the time of his death Moore was board-
ing at the Overland hotel and had re-
sided in the city about three months.
From papers found among his effects
it is learned that he was a native of
his health. He was unmarried and had
leaves a mother and sister residing on
Shattuck avenue, Boston, Mass. At
the time of his death he was in his
25th year. The deceased was a cook
by trade, but while here was unable to
do any work.

It was known of Moore as he was
inclined to be reticent and volunteered
no information concerning himself.—

A Thousand Tongues.
Could not express the rapture of An-
nie E. Springer, of 1125 Howard street,
Philadelphia, Penn., when she found
that Dr. King's New Discovery for
Consumption had completely cured her
of a hacking cough that for many
years made life a burden. All other
remedies and doctors could give her no
help, but she says of the royal cure:
"It soon removed the pain in my chest
and I can now sleep soundly, something
I can scarcely remember doing be-
fore. I feel like sounding the praises of
this wonderful cure to the whole world."
So will every one who tries Dr. King's New Dis-
covery for any trouble of the throat,
chest or lungs. Price 50c per bottle. Free
trial bottles free at J. H. O'Reilly &
Co.'s drug store. Every bottle guar-
anteed.

THE CATTLE SHIPMENTS.
Animals in Better Condition Than Ever
Before.
The cattle of Eastern and Southeast-
ern New Mexico are in better condition
than for many years, says the Russell
Record. The frequent rains have fill-
ed up the pastures and kept the grass
growing at a rate that has been suffi-
cient to keep the old cattle fat and the
young ones growing finely. A much
larger per cent than usual of the cat-
tle are putting through and if the con-
ditions continue 1900 will be a banner
year in the history of industry, both
in the valley and on the open range.

Cattle shipments so far this year are
something enormous, aggregating
200,000 head. Of this number Canon
City handled a majority, being ac-
credited with fully 20 per cent, the re-
mainder about evenly from the other
points along the road. From May 9 to June
12 Chaves shipped 16,697 and the former
16,277 head.

The eyes of cattlemen all over the
country are turned to the Pecos valley
this year, and the fine record of the
season will draw a large number of the
wealthier classes to grow the cattle in
this section. While practically all of the
water is taken up, there is a vast field
for development, and there is also every
probability that there will be a large
number of transfers of established prop-
erties this fall.

How to Cure a Sprain.
Last fall I sprained my left hip while
digging some heavy boxes. The doc-
tor I called on said at first it was a
slight strain and would soon be well,
but it grew worse and the doctor then
said it was rheumatism. It continued
to grow worse and I could not get
around to work. I went to a drug
store and the druggist recommended
me to try Chamberlain's Pain Balm. I
tried it and on the first day I was
able to get about. I now feel as well
as I did at first. P. A. Bagcock,
Brie, Pa. It is for sale by all drug-
gists.

REFILES FOR CHINA.
Two Car Loads Pass Through Albuquerque.
and out to the Pacific.

Two car loads of Remington rifles
and field ammunition passed through
Albuquerque over the Santa Fe Wed-
nesday night en route to the Pacific
coast. The ultimate destination of the
arms and ammunition is the United
States war ships now on the coast of
China and the rifles will be used by
the marines in the campaign in the
Celestine Kingdom.

The confinement was sent out of New
York over the Erie and arrived in Chi-
cago Monday afternoon. It was there
taken care of by the Santa Fe, and
it is expected that the rifles and ammu-
nition will be on the way across the Pacific
ocean by Saturday.

Would Not Suffer so Again for Fifty Times
Its Price.
I awoke last night with severe pains
in my stomach. I never felt so badly
in my life. When I came down to
work this morning I felt so weak I
could hardly work. I went to Miller &
McCord's drug store and they recom-
mended Chamberlain's Colic, Cholera
and Diarrhoea Remedy. I worked like
magic and one dose fixed me all right.
It certainly is the finest thing I ever
used for stomach trouble. I shall not
be without it in my home hereafter.
For a whole lot of relief the suffer-
ings of last night again for fifty times
its price.—G. H. Wilson, Livermore,
Burgettstown, Washington, Co., Pa. This
remedy is for sale by all druggists.

Diarrhoea at Santiago.
Charles H. Marks, while acting in the
capacity of nurse at the Second divi-
sion hospital of the Fifth Army Corps
at Santiago de Cuba, used a few bot-
tles of Chamberlain's Colic, Cholera
and Diarrhoea Remedy for diarrhea and
found it to work like a charm. For sale
by all druggists.

"A Penny Saved is a Penny Earned."
Economy is the lesson taught by this
saying. It is true economy to take
Hood's Sarsaparilla at this season be-
cause it purifies, enriches and vitalizes
the blood and thus prevents sickness
and puts the whole system in a state of
health for the coming season. Every
bottle of Hood's Sarsaparilla contains
100 doses—proof positive that it is econ-
omy to take only Hood's.
Constipation is cured by Hood's Pills.

EXHIBIT FROM MEXICOLA FAIR.

New Mexico's College of Agriculture
and Mechanical Arts, located at Me-
xicola Park, has a large and complete
display in the Chamber of Commerce,
in charge of Professor Francis E. Low-
ry, of the business department, and
Professor J. L. Larkins, of the prepara-
tory department. The collections repre-
sent the four scholastic branches
taught in the institution.

The preparatory department's exhibit
which was selected from the work of
125 students, is perhaps the most inter-
esting. The specimens are 25 in num-
ber, having been fashioned by hand out
of clay, the pupil using nothing more
than a wooden tool, and in a few cases
models to work from. There is a va-
riety of miniature pots, jars, birds and
samples of tastefully designed tiling.

This work is regarded as being won-
derfully helpful in developing the stu-
dent's mental precision and ability to de-
sign.

The agricultural specimens are differ-
ent varieties of fruit, grown on the
punta Prieta, and of the cereals which
are in the department, but not neces-
sarily a great interest in them. The
department of mechanical arts is in-
charge of Professor Francis E. Low-
