natural resources journal

Published four times per year by the University of New Mexico School of Law

Vol. 28, No. 4

Fall 1988

October 1988

The isolation of scholars in various fields concerned with resources problems continues to be a principal impediment to progress. . . . Resources problems are so complex that traditional lines of approach prove inadequate. . . . Rarely do we find the work of the lawyer and the non-lawyer appearing side by side. . . . The primary function of this [new] Journal is to meet this need. . . .

from the Foreword of Volume 1, No. 1, 1961

CONTENTS

C. O. Okidi	645	The State and the Management of International Drainage Basins in Africa
Tiyanjana Maluwa	671	Legal Aspects of the Niger River Under the Niamey Treaties
Raymond Hill	699	Problems and Policy for Pesticide Exports to Less Developed Countries

Charles T. DuMars and Salvador Beltran del Rio. M.	787	The Air and Water Quality Laws of Mexico: An Historical and Legal Analysis

THE UNIVERSITY OF NEW MEXICO SCHOOL OF LAW

ACCREDITATION

The School has met the standards of the American Bar Association and of the Association of American Law Schools. It was approved by the American Bar Association on February 24, 1948. Membership in the Association of American Law Schools was granted in December, 1948. The School is fully accredited.

AIMS AND METHODS

The lawyer who functions in his profession, whether as private practitioner or as public servant, is an integral part of the system by which a democratic society governs itself. If he is properly to discharge the responsibilities of this role, his education for the profession must be both broad and intensive. In its breadth it must encompass a full understanding of and belief in the democratic respect for the individual personality and the democratic processes designed to allow the individual to develop and participate in a free, self-governing society. In its intensification it must impart a high degree of competence in the craftsmanship of the law—in those skills and insights essential to an adequate performance of the lawyer's function as advocate, judge, legislator, teacher, administrator, or civic leader.

Such education neither begins nor ends in the law school, and the School of Law is continually concerned not only with its own curriculum but also with the quality of pre-legal education and with the continuing self-education which should be pursued by all members of the profession. In consequence, it is urged that students enter the School with as broad a cultural and educational background as it is possible for them to obtain. Accordingly, the basic requirement for admission is now a baccalaureate degree from an approved college or university.

The student will spend the equivalent of six semesters of study in the law school in courses designed both to bring the teachings of history, philosophy, and the social sciences to bear upon the solution of legal problems and to develop the skills and insights essential to research, analysis, synthesis, criticism, and exposition. Due to the low ratio of students to teachers (less than 15 to 1), substantially more individual and small group work is possible in the School than in most law schools.

Environmental Dispute Resolution

GUIDELINES FOR MANUSCRIPT SUBMISSION

Natural Resources Journal is an international, interdisciplinary forum devoted to the study of natural and environmental resources. The emphasis is on research directly related to public policy. A principal goal of the Journal is to overcome the isolation of scholars in various disciplines concerned with natural and environmental resources by providing a wider audience for research from different disciplines. The Journal is policy oriented, and seeks to make research available not only to fellow scholars, but also to decision makers who mold natural and environmental resource policy.

Form for text: Manuscripts and abstracts should be submitted in triplicate. All should be *nonreturnable*, clear photocopies. All material including notes, block quotations, and abstracts should be double spaced. Manuscripts ordinarily should be no longer than 35–40 pages. Material submitted should be original and previously unpublished. Do *not* place the footnotes at the bottoms of the text pages. See footnote instructions below.

Tables and figures: Place each table or figure on a separate page from the text. Outside dimensions must be no greater than 4½" × 7", with headings placed inside those dimensions. A glossy original will be required if the paper is accepted for publication.

Footnotes: Place all footnotes in a section following the text. Type double-spaced. Follow A UNIFORM SYSTEM OF CITATION (14th ed. 1986), available from the Harvard Law School, for all citations. Examples of more common types of footnotes:

BOOK: ¹F. POLLACK & F. MAITLAND, THE HISTORY OF ENGLISH LAW 518 (2d ed. 1898).

ARTICLE: ²Frankfurter, *Some Reflections on the Reading of Statutes*, 47 COLUM. L. REV. 527 (1947).

CASE: ³City of Burbank v. Lockheed Air Terminal, 411 U.S. 624, 626 (1973).

STATUTE: ⁴National Environmental Policy Act of 1969, § 101(a), 42 U.S.C. § 4331 (1970).

REPORT: ⁵HOUSE COMM. ON UN-AMERICAN ACTIVITIES, GUIDE TO SUBVERSIVE ORGANIZATIONS AND PUBLICATIONS, H.R. DOC. NO. 137, 82d Cong., 1st Sess. 12 (1951).

Extensive mathematical formulae and theorems, as much as possible, should be placed in the footnotes rather than in the text. The Journal has compiled a style sheet for authors which is available upon request.

Abstract: Include an abstract of approximately one hundred words, on a separate page.

Address manuscripts being submitted for consideration to:
