OTTAWA FIRE!

Estimate of Ontario's Biggest Blaze.

Investigation of Idaho Troubles Continues.

Fatal Collapse of Frame Work of Building in Alabama.

WEEKLY BANK STATEMENT.

OTTAWA, Ont., April 28.—An estimate is made of the effect of the fire at Ottawa and Hull, which runs as follows: Homeless, about 15,000; destitute, about 8,000; fatalities, 7; through out of work by destruction of industries, Ottawa, 3,000; Hull, 20,000; value of buildings destroyed, \$2,500,000; personal property, \$4,000,000. These figures do not include the lumber burned.

THE FIRE SITUATION.

OTTAWA, Ont., April 28.—At a mass meeting it was decided to instruct the city council to ask the Ontario legislature for leave to borrow \$100,000, by issuing debentures to aid the sufferers from the fire. It was decided to build two shelter buildings in Hull. Orders for blankets, bread and other necessities were given. The needs of relief are pressing. E. B. Eddy's entire insurance is placed at \$500,000, while his loss is about \$2,000,000. The insurance is principally in American companies. Several car loads of provisions, clothing, etc., contributed in Montreal, have been received.

GEN. MERIAM TESTIFIES.

He Gives His Testimony in Court of Idaho.

Washington, April 28.—The examination of General Meriam was continued in the Court of Idaho. The testimony of the military committee of the house today. He explained in detail his instructions. In the telegram of May 21, Secretary Alger referred to Meriam's "original instructions" as to the alleged salute made the Filipino flag by Admiral Dewey, was passed without discussion. Pettigrew called up the resolution expressing sympathy for the South African republic and our best hopes for the full success of their determined contest for liberty.

FROM THE WAR!

British Following the Boers Northward.

The Flood in Texas Causing Much Anxiety.

Damage to Railroads and Crops Will be Immense.

THE WOOD WORKERS' UNION.

London, April 28.—The British in the Orange Free State are still, presumably following the Boers northward, but at this hour, there is no word from the most interesting field of operations.

A dispatch from Ladysmith says

there are only small parties of Boers in the Tintwa pass, but hundreds are guarding Van Reenen's and Over-shook passes. Commandants DeBelaars and Van der Merwe are in charge. Their forces have been so disposed that a whole body can be massed at any place.

A dispatch from Dewetdorp says

the residents of that place claim the strength of the Boer force, which recently evacuated that place, was 6,000 men, with six guns, under German officers.

NO SIGNS OF RECEEDING.

Texas Rivers on the Rampage, Sweeping

Everything Before Them.

Dallas, Tex., April 28.—The floods

show no signs of receding. On the contrary most of the Texas rivers are rising.

A Port Worth telegram says

the Trinity river is overflowing and doing much damage to property. The people are alarmed for the safety of the waterworks, which are seriously threatened. A nine-foot rise is sweeping down from the headwaters of the Trinity.

A bulletin from Waco says

the list of dead there will reach ten to fifteen. The property damage in the city will exceed \$100,000. The telegraph lines of both companies are gone south of Dallas, isolating more than half the state.

Railroad movements are absolutely

suspended south of Dallas on almost every line. The loss by flood and hurricane since yesterday morning is estimated to reach three to five million dollars, including damage to railroads and crops. The damage to railroads is immense in Hill, McLennan, Williamson, Bell, Colorado, Bastrop and adjoining counties. Reports received from southern and central Texas state that great destruction has occurred.

A bulletin from Galveston at noon

says: "The government weather bureau reports the whole state visited yesterday by the greatest precipitation, especially in the Texas country, where it approximated six inches. Three boys in a boat in Galveston bay are believed to have perished. Another storm to last two days was at noon predicted by the weather bureau. The Brazos valley is expected to be flooded from Waco to the gulf. The water at Seale is up to the highest point reached in the disastrous flood of last July."

A bulletin from Denison says

the Canadian river, in the Indian Territory, is rising fast and threatening heavy damage to railroad and other property. The people are alarmed at a fearful flood. An overflow of the river at Denison is considered sure. The river is already risen ten feet.

WOOD WORKERS' UNION.

Will Strike on May 1st if Demands are

Not Conceded.

Minneapolis, April 28.—The Wood Workers' union of Minneapolis and St. Paul voted unanimously to strike on May 1st if their demands are not conceded by the employers. The men demand unions, of the shop, semi-monthly wages of \$1.75 for a nine-hour day; extra pay for overtime; use of union label and stamp; and board of arbitration.

AT REST.

Funeral of Jose Andria Salazar of Old

Albuquerque.

At the Spanish Methodist Episcopal church in Old Albuquerque impressive funeral services were conducted over the remains of the late Jose Andria Salazar by Rev. Thomas Harwood, assisted by T. M. Harwood and J. B. Sanchez. A large number of friends and relatives of the deceased were present and paid their last tribute to the memory of the dead. The First Regiment band was present and rendered several appropriate selections for the occasion. Members of the Mutual Protection society, of which order the deceased was the worthy vice president at the time of his demise, were at the church and followed the remains to Fairview cemetery, where final interment was made. The deceased leaves to mourn their loss a devoted wife and a sister—the latter a resident of Trinidad, Colo.

Convention Date of New York Democrats Changed.

Jury in Case of Attorney Anderson Failed to Agree.

CHICAGO LABOR TROUBLES.

Constantinople, April 28.—The United States legation has not yet received the port's answer to the note handed the Turkish foreign minister by the American charge d'affaires, regarding the indemnity claims, and the impression is gaining ground that the reply will be in the negative or even that no reply will be made. The general opinion is that without a display of force the port's answer will not pay the claims, because it wishes to show to the Moslem world it only yields to force. It is not considered a simple rupture of diplomatic relations will render the port easier to deal with, but a rupture of formal relations is not thought necessary as the sending of a warship to the Mediterranean would suffice to obtain a settlement in less than twenty-four hours.

NEW YORK DEMOCRACY.

Time and Place of Convention Changed—

New York, April 28.—The state committee of the Chicago platform democracy, at a meeting held last night, ratified the action of its convention committee in changing the time and place of the state convention from May 21, Albany, to May 19, this city. In the address issued under the caption, "Of Interest" to Democrats of New York State, the committee says it is the intention of the coming convention to select delegates to the national convention because the regular organization is controlled by men who did not support Bryan in 1896, and are in reality antagonistic to democratic principles.

Failed to Agree.

Denver, Colo., April 28.—The jury in the case of Attorney Anderson, charged with attempt to kill H. H. Tammen, of the Post, failed to agree and was discharged.

Pushing Right Along Through Mineral Sections of Arizona.

INTERESTING ARTICLE ON THE SUBJECT

Special Correspondence.

Chloride, A. T., April 21.—The Arizona & Utah branch railroad from Kingman here, has lately pushed its line four miles further in the direction of White Hills and the Colorado river, and supported short in the Sacramento valley. This short extension has just been completed, and was done to save the payment of taxes for ten years in which they would build and equip thirty-five miles in Mohave county within a year from time of beginning of the first work, or from a certain specified date. As to its further extension in the direction of the Colorado river and Utah, is a matter of conjecture which the people are giving no consideration or thought, and the railroad company itself is doubtful as to the need of it. It is a matter of fact that a railroad, the rate of taxes on shippers in order to make it pay expenses and declare monthly dividends to the stockholders is quite heavy, and should it extend its line to the Colorado river and into Utah, the passenger and freight tariff would have to be proportionately increased according to the work done, and there is little, if any, business waiting for these in that region. And the little burden of taxation by the railroad on traffic will have to remain in operation until the building of the country through which it is to pass before a reduction can be hoped for. The future is cloudy for those who are looking for lower rates of travel and freight, and one in which the people stand in dismay in trying to penetrate the foregoing future.

The Hattie Bell mine, situated close to the Elkhart, has broken into a body of ore which averages 500 ounces silver to the ton by the carload. The mine has been followed in a shaft seventy-five feet deep with a fifty foot drift from the surface level. The shaft is its great value in silver, and returns have been had that give \$10 in gold and about 20 per cent copper per ton. Jack Wilson, one of the three owners of the property, has made the statement that their new find was to be worked for all it was worth, and is taken to imply a new steam heat and the working of quite a good force of men.

The Diana Gold and Silver Mining company, of Los Angeles, has incorporated under the laws of Arizona, has recently levied an assessment on its stockholders to the amount of \$25,000, and the money all paid in. The sinking of a 200-foot shaft will be the first step to engage their attention to make connections with underground workings, and by or before the middle of summer erect a new concentrating plant. The ore in sight, both in value and quantity, will fully justify the venture.

Mrs. Frank Thompson has just returned from a very pleasant and enjoyable trip to friends and acquaintances at Kingman, Arizona. She has built up an enormous business both at home and abroad, at times shipping fruit to buyers by wagon to Utah and Nevada.

May 1 is to see the biggest time here that Chloride ever had. This will be the occasion of a celebration given under the auspices of the local miners' union. A well-planned and skilled program has been gotten up both for indoor and outdoor amusements, and sets forth in streaming banners of yellow paper of prodigious size. The day will be spent in outdoor sports and amusements, and the whole to wind up at night with a fine ball and supper.

Some one spoke about going over to Williams Fork prospecting the other day, and Charlie King of this city, up and told this story of his experience in that part of Arizona: "I went over there to help put up a mill a few years ago," he said, "and I was there about three months. The beginning of my journey was in the early spring, but when warm weather came on, so did every species of reptiles known to the neighborhood. Rattlesnakes, of course, we could guard against, but the scorpions, and many were killed—great big rusty-looking fellows. But, then, there were tarantulas, the stinging scorpions and the centipedes, which we could not look after so closely, because they were smaller and could hide anywhere and everywhere—even in our pockets. They would crawl up the posts and get in our hands, either at night, and tuck themselves away so nicely away from the blankets."

"Finally this smaller class of reptiles got so numerous and so annoying, that we got to shaking our blankets before retiring to retire for the night. As far as one man would pull his blankets off and the reptiles would follow to the floor, where they would get at the other men would be ready with their clubs and knock them in the head. This was kept up for several nights, but the varmints got onto our racket and began shaking themselves away on the wall plates and secreting themselves in knot holes. At night, when the candles were burning, we would look up and see them exchanging observations. The centipedes, which were the biggest round and longest I have ever seen, would hang through the knot holes with most of their bodies on the outside, hardly showing their heads, and that only to get over. The stinging scorpions did likewise and they were hard to see, but they had a fine head on us, and don't you forget it."

"The tarantulas were more high-toned than their smaller neighbors and would roost up on the wall plates of the house, which were about 18 in width and thickness. They would array themselves in long lines along the edge of the board like chickens on a roost, but thickest directly over our bunk. Sometimes they would stand on their hind feet and cut the air with their fore paws and hairy feet toward us vigorously. At other times two would engage in a wrestling bout and a third one would run up and stop the play. Again two would look their long hairy limbs together and go through something like a round dance and then as quickly quit and take their places on the edge of the board and resume their observations below."

"The next thing that was to inaugurate a new movement against them. This was commenced by some of the men going round on the outside with long poles and pushing them through on the floor, and as they felt were at once despatched by those on the inside. Sometimes this would result hurtful to one or more of the crew. The weather was at its hottest, and during the combat the men would be drenched about the neck, and in the flying and swinging of clubs in the fight would come in contact with the weapons. Sometimes it was with the head, arms or legs, but most generally it would be directly on the shin bone between the knee and ankle joints."

"The lesser reptiles were destroyed in much the same manner as those of the larger variety, and finally, after

this program had been kept up several nights in succession, their roosting place and promenade boards were well broken up, but even then we thought it best to keep a weather eye out for 'em."

"Then there were the house flies in swarms of countless legions that came in for a big share of tormenting, and at the table we had to keep our hands and arms going like windmills while eating."

"At the end of my three months' work I got my check and rode over to signal in the wagon with Hoggins, the mine and mill boss. On the way over he got to coughing me to go back with him; said he would give me any position I wanted about the mine or mill. 'Look a here, Hoggins, I said, I want to tell you something. If you was to give me the best rocking chair you ever seen and two fingers, one to hold an umbrella over me and the other one to fan me, I wouldn't go back to Bill Williams Fork with you. And more than that, if you was to give me my choice between going back or to hell, I wouldn't go back and figure to see which I'd take.'"

STOP WOMEN

from exercising common sense? You can't do it. As the old rhyme runs:

"The man's a fool who tries by force or skill
To win the most expert physician's skill
For if he will, she will, you may depend on't
And if he won't, she will, no need to wonder."

Common sense tells a woman that when she's sick she needs a doctor. Common sense tells a woman that in disease the first question is not of man or woman, but of recognized medical ability. Common sense applied to advertisements which invite women to "write to a woman" because she is a woman and understands what it's no use to write to any woman about disease unless that woman is a physician.

Common sense used in the reading of advertisements will discover that no claim is made in them to a physician's knowledge or diploma. And that is not because the claim would be morally culpable as a lie, but because it would be legally punishable as a fraud. The law permits you to masquerade as a doctor in an advertisement, just for using a real doctor's name to claim to be a doctor, or put M. D. after your name. That's why the advertisement is worded "write to a woman" instead of "write to a doctor."

He is a doctor, he is a regular graduate, legally empowered to practice and with thirty years of experience in the treatment of diseases of women, which he has made his specialty. The offer of free consultation by letter made by Dr. Pierce is a real offer, not a trick. It is an offer backed by a medical institution with a world-wide reputation. A staff of nearly a score of regular graduate physicians, a practice which reaches every state and territory, a record of more than half a million cures, and a record of more than half a million cures, and a record of more than half a million cures.

Sorois are the greatest shoe success of this age because they deserve to be. It is a clear case of determined merit proved by years of

The Acme of Perfection

Is a description which is but slight praise when speaking of our Shirt Waists. They are ideal, embodying as much honest and intrinsic value as is capable of being crowded into any one garment. Their style is chic; their fabric novel; their workmanship the best, and their fit perfect. This is not only our opinion, but that of the wearers of these garments. Accompanying cuts portray but two representative styles. Space does not permit of more.

FANCY LINEN WAISTS.

Our line of White India Linen Waists is immense. Special prominence is given this season to those made of fine all-over embroideries, of which we have a vast assortment. Above cut shows a very fine India Linen Waist, with four rows of Swiss insertion, the entire back being of very narrow tucking, and the sleeve an elaborate dress sleeve. It sells for the low price of \$2.25. We show a very pretty line, ranging from 90c to \$3.00.

This is the representation of one of our most popular styles. It comes in most hand-some patterns; is made with plain or bias French back—it is genuine sterling value. We have a dozen numbers at this price for your selection.
