On Sept. 9, the US Department of Agriculture (USDA) reported that Mexico had purchased 5,700 tons of sunflower seed oil at subsidized prices. The average subsidy per ton is US$112.84. Archer Daniels Midland (ADM) and National Sun Industries will deliver 700 and 5,000 tons of the oil, respectively, in November and December. Mexico's quota for buying subsidized sunflower seed oil from the US is now 8,940 tons. The USDA mentioned that Mexico has also purchased 540 tons of soybean oil, subsidized at US$57.99 per ton. The soy product was scheduled for delivery by ADM during the second week of September. Under Washington's Export Enhancement Program, Mexico can still acquire 48,892 tons of subsidized commodities.
