# A SELECTED BIBLIOGRAPHY ON PUBLIC ENVIRONMENTAL POLICY AND ADMINISTRATION

By  
DANIEL H. HENNING\*

Numerous universities and colleges are now establishing and implementing a variety of environmental courses and programs. Environmental affairs are now a permanent and dominant policy issue of the General Public, Executive Branch (some 80 agencies are directly and indirectly involved), Congress, State and Local Government, and Court Systems. It is hoped that this selected bibliography will be of value in acquainting the instructor, student, official and citizen with some of the literature available in Public Environmental Policy and Administration and Related Areas. The writer is particularly indebted to the Legislative Reference Service of the Library of Congress, through Senator Mike Mansfield and Senator Lee Metcalf, for their assistance and materials in compiling the bibliography.
