MADERO ELECTED IN ITALY DETERMINED TO ADMINISTER MEXICO; CLAIMS VICTORY FOR SUAREZ

First Free Balloting in Republic Characterized By Perfect Order, Showing Confidence Was Well Placed.

CLAIMS MADE FOR OTHER SECOND CANDIDATES

Adherents of Both Dr. Gomez and De La Barra Will Not Concede Defeat Till Complete Returns Are In.

[By Morning Journal Special Leased Wire.] Mexico City, Oct. 1.—Basing his belief upon information received from various parts of the republic, Francisco I. Madero, whom the people of Mexico today officially elected president, declared tonight there was no doubt that his candidate for the vice-presidency, Jose Pino Suarez, of Yucatan, also had been elected.

At the headquarters of the Catholic party, Gabriel Fernandez Somelera, chairman of the central committee, said he believed Francisco de la Barra had been elected vice-president.

"We have won by a big majority in the capital," said Madero.

"We have carried almost every district for de la Barra," said Somelera. The only thing that appears reasonably certain tonight was that Dr. Francisco Vasquez Gomez, independent candidate for the vice-presidency, was snatched under in the federal district.

No disorders had been reported up to 6 o'clock.

"Naturally, I am gratified, that the people should have elected me for the presidency," said Madero, "but I am more than pleased that the people have proved my assertion that they were able to hold open elections. Personally I expected no serious trouble. The passing of men like Bernardo Reyes, relieved the last chance for disorders."

Madero announced tonight that at least one of the present cabinet, Ernesto Madero, the minister of finance, would remain. Minister Madero demurred, it is said, on the ground that it might raise the cry of Neopotsim, but today he consented to retain the portfolio. The portfolio of foreign relations has been offered to de la Barra, but tonight he expressed his unwillingness to accept.

At 9 o'clock, Madero's central committee claimed seventy per cent of the federal districts for the Madero-Pino Suarez ticket. A third of the vote remained to be counted.

The electoral college will have no less than twenty thousand delegates and party leaders announced that if the vote today indicates defeat, they will not cease working to change this in the vote of the electors on October 15. Mounted police and rurales, patrolled the streets in the districts where the population is largely of the lower element, but were little needed. The confidence of the authorities that people would not convert their first day of free voting into a day of rioting was not misplaced.

Early in the day it became evident the race in the capital for the vice-presidency was between de la Barra and Suarez. In the poorer sections de la Barra led, notwithstanding the popular impression that the ignorant, voteless, so-called, would take without questioning the advice of Madero and vote for his choice.

Tonight politicians explained it on the ground that the people had been advised by the priests to vote for the candidate of the Catholic party.

Up to midnight no news of disorder in any part of the republic had been received and the authorities and party leaders expressed great gratification that the presidential elections resulting in the election of Francisco I. Madero were held in an orderly manner.

MADERO AND GONZALES WINNERS IN CHIHUAHUA

Juarez, Mex., Oct. 1.—The election for presidential electors passed off quietly in this city today, a heavy vote being polled. The one hundred and twenty electors from the districts of Bravos, Galana, Iturbide, Camargo and one-half of Benito Juarez, embracing one-fourth of the state of Chihuahua, will be unanimous for Madero for president and Governor Abraham Gonzalez for vice-president. As Gonzalez is not a candidate, the vote will ultimately probably be given to Dr. Francisco Vasquez Gomez.

The electors will meet in Juarez on October 15 to cast their vote. There is no report tonight of any disturbances having occurred in any portion of the state of Chihuahua, which has unquestionably gone for Madero and Gonzalez.

GOMEZ LEADS SUAREZ IN CITY OF GUAYMAS

Guaymas, Mex., Oct. 1.—This town gave Francisco Vasquez Gomez a majority over Pino Suarez.

TO ADMINISTER LICKING TO TURKEY

While King Emanuel's Government Pushes Offensive Campaign Vigorously, Sultan Appeals For Intervention.

GERMANY AND AUSTRIA MAY STOP HOSTILITIES

Rumors Conflicting As to Wiping Out of Turk's Naval Forces; Tripoli Evacuated; Tribesmen Grow Restless.

[By Morning Journal Special Leased Wire.] London, Oct. 1.—Out of a maze of conflicting reports and rumors, it is impossible to sift the grains of truth concerning the opening days of the Turkish-Italian war. It appears doubtful whether there has been an actual occupation of Tripoli and it is practically certain that there has been no bombardment by the Italian warships.

It seems certain that the reported destruction of the Turkish fleet is untrue. The fact is the only result of the first three days' hostilities which can be vouched for is the destruction of the Turkish destroyers by the Duke of the Abruzzi's ships of Prevesa. The Tripoli cable is sealed so that it is impossible for the outside world to know what is going on there.

The Ottoman government clearly is not in a hurry and the most significant news of the day is the decision of the Turkish council again to appeal to the powers and in the meantime to suspend offensive measures. Late tonight this new appeal had not reached the British government and there is nothing to indicate that the attitude of the powers has undergone any change.

According to the Daily Telegraph's Rome correspondent, however, Germany and Austria already have made unofficial representations to Italy of their displeasure at her procedure and have intimated that if these representations are ignored they will be followed by the humiliation of Italy.

According to information from diplomatic sources, the landing of the Italians in Prevesa is resented by Austria and Germany and had much to do with their reported change of attitude towards Italy.

Said Pasha, the new grand vizier, continues his efforts to form a coalition ministry, but finds the task extremely difficult.

The Daily Chronicle's Constantinople correspondent says:

"News of both disaster and victory reached the capital today. The fighting spirit of the Turks is rising to a spiritual height. A wireless message to the admiralty says that two Italian cruisers have been sunk off an unnamed point in the Archipelago.

"Rigorous precautions are being taken to thwart the movements of the Italian fleet in the Archipelago.

An excited crowd at Samsoun today attacked the Italian postoffice. An Italian steamer with a valuable cargo was captured near the entrance to the Paphos.

"It is rumored that Prevesa" in European Turkey, has been taken by the Italians and several Turkish ships without coal have been seized.

"Much is hoped for from intervention by the powers but it is said that the sultan's personal appeal to King George has elicited a reply to the effect that it is too late for the powers to take such political action as Turkey desires.

"Volunteers are enrolling in great numbers. All around the frontiers is unrest and hasty preparation. Turkey's chronic trouble, the lack of ready men has become acute. She is facing the war with ridiculously small sum in the treasury. The Ottoman debt institution has been asked to provide \$50,000,000, but it is informed the government that there is no more money available. Therefore the nation goes to war with about 25,000,000.

"A rumor says tonight that only one cruiser of all Turkey's navy is left afloat. News comes from Tripoli that the hinterland is inhabited by fierce tribesmen and that the Bedouins of the Tibesti districts and other tribesmen are already on the march toward the coast determined to defend Tripoli."

UNITED STATES READY TO PROCLAIM NEUTRALITY

Washington, Oct. 1.—The American declaration of neutrality in the Italian-Turkish war only awaits the president's formal approval. Without his personal signature the state department can not issue the proclamation, which, however, is expected to be promulgated tomorrow.

Efforts were made today to get in communication with the president. The proclamation is ready for issue as soon as approved. Acting Secretary of State Adee having prepared it at the first intimation of hostilities.

Do You Want a Clean New Mexico and a Clean Bernalillo County?—Attend the Mass Meeting Tonight and Say So

The forces of evil in New Mexico politics have thrown down the gauntlet to the decent citizenship of the state.

They have issued their call to the people of this progressive and enlightened community; the city of Albuquerque and the county of Bernalillo.

What are you going to do about it, decent citizens?

The Republican Progressive league has called a mass meeting of protest at the Elks' theater for 8 o'clock tonight.

Every citizen of Albuquerque, of Bernalillo county and of New Mexico, who is interested in the cause of government by and for the people; of a clean New State, and in the repudiation of the arrogant, flagrant and high-handed attempt of Frank A. Hubbell and the political corruption which he represents to hand this county over to the rotten element of the republican party; such men are urged to attend this meeting and thereby register their protest against misgovernment and political infamy.

Francisco A. Hubbell, from whose rule of coercion this county has emancipated itself; aided and encouraged by a corrupt state machine, in defiance of the wishes of the people of this county, has again been "vindicated."

His creatures have been nominated

for state offices, the republican party and the state has been grossly insulted by having his name and that of his financial backer, W. S. Strickler, placed on the roster of the state central committee. His belt from the republican party has been recognized brazenly by H. G. Burman and his gang; the regular republican organization of this county has been thrown out of the state council; FRANCISCO HUBBELL HAS AGREED THAT HE WILL DELIVER THIS COUNTY FOR THE ELECTION OF THE DISREPUTABLE STATE TICKET and he will spare no money, his bankers and other backers will spare no money, to see that the will of the people is abrogated and to see that, by whatever indirect methods are necessary, the VOTES ARE DELIVERED.

Mr. Business Man, you remember when you did not dare raise your voice against Francisco Hubbell and his rotten county government for fear your taxes would be raised and your rights and your business would be otherwise insulted and injured. You remember when the school funds were used for the benefit of the gang; you remember when the county was bankrupted in order that they might live high.

If you do not want any more of that kind of government; if you want to repudiate the grafters and the bait box buffers, the intimidators and the vote buyers and the bulldozers; if

Transmission)—Fire was opened by the Italian fleet upon the forts this morning. It ceased almost immediately, the Turkish troops evacuating Tripoli with the object, as it appears, of preparing for resistance in the interior.

TURKISH NAVY NOT WIPED OUT AS REPORTED

Constantinople, Oct. 1.—An official announcement is made that the Turkish squadron returned from Beirut without loss.

ITALIAN EXPEDITION WILL TOTAL 35,000 MEN

Naples, (via Frontier), Oct. 1.—The Italian expedition which will soon start for Tripoli, will be under the command of General Canova. The central organization of the proposed expedition is in Naples and will comprise a corps of 35,000 men in two divisions.

NAVAL BATTLE RAGING IN THE DARDANELLES

Paris, Oct. 1.—The Agency France-Press at midnight sent out the following Rome dispatch dated October 1: "A telegram from Constantinople to the Tribune says that all the consuls at the Dardanelles have telegraphed that a naval battle is going on in the straits. Reports of guns are heard as far as the Bosphorus."

"At 1:30 o'clock this morning, the same agency sent out a Rome dispatch dated October 2:

TWO DEAD; TWO MORE BATTLE SHOT IN FIGHT

Lake Charles, La., Oct. 1.—Two dead, two fatally shot and four less seriously wounded, is the net result of a free-for-all fight at Oakdale last night. The tragedy occurred at a negro boarding house. A negro woman and a white man were killed. All the wounded were white.

GENERAL TERROZAS REPORTED VERY LOW

Juarez, Mex., Oct. 1.—General Luis Terrozas, one of the wealthiest men of the republic of Mexico, former governor of the state of Chihuahua, are reported to be the largest ranch owner in the world, is lying dangerously ill at one of his ranches in the northern part of the state of Chihuahua.

Bryan to Welcome Taft

Lincoln, Neb., Oct. 1.—When President Taft arrives in Lincoln at noon Monday, one of those who will welcome him to Lincoln, will be William J. Bryan. Mr. Bryan will participate in the luncheon for the president immediately after his arrival.

CALL FOR A PROGRESSIVE REPUBLICAN CONVENTION

Pursuant to a resolution adopted by the state Progressive Republican league, a convention of the progressive republicans of the state of New Mexico is hereby called to assemble at the city of Santa Fe, New Mexico, on the 4th day of October, 1911, at 10 o'clock in the forenoon of said day, for the purpose of taking into consideration the action of that progressive republicans of the state shall take in the present campaign and for the consideration of such other matters as may properly come before said convention.

JESUS ROMERO, President

"R. B. HANNA, Secretary."

you want a continuation of clean business government in this county and if you stand for public and official and political decency, turn out at the opera house tonight and register your protest and your condemnation.

Ex-Governor Herbert J. Hagerman, the clean young exponent of honest politics and government for the people, will be one of the speakers. You know Mr. Hagerman and his record and you know that he will voice your sentiments. Other prominent citizens who stand for the same things as Mr. Hagerman will address you, including Jesus Romero, president of the progressive league.

Among the speakers from outside the city will also be Hon. Levi A. Hughes, Col. G. W. Prichard and H. Hanna of Santa Fe, with a number of other progressive republicans and Albuquerque business men.

The opening of a vigorous campaign to drive the rascals out will be discussed and steps taken toward organized effort.

If you are indignant at the spectacle given by the republican machine in Las Vegas, and if you are indignant at the desperate effort of Francisco Hubbell to engraft his unscrupulous incursion upon this county; turn out tonight and let it be known. Ladies are especially invited to this gathering which will start the ball rolling for a CLEAN New Mexico.

SHOW THEM WHAT YOU ARE GOING TO DO ABOUT IT.

When He Found He Had One Too Many Wives, He Made Away With His Latest Bride; Confesses Crime.

[Special Correspondence to Morning Journal.] Chicago, Oct. 1.—Dr. Harry Elgin Webster, a Rush Medical college graduate student, and interne at the Poly-clinic hospital, in a confession to the police late today, admitted that he murdered one of his two young wives, Bessie Kent Webster, of Chicago, in the woods ten miles from Dixon, Ill., September 16.

The accidental discovery of Bessie Kent's body Friday, almost two weeks after she had been killed, was followed by identification Saturday and the arrest today of Webster.

Webster declared that he was married first to Zoe Varney at Cedar Rapids, Ia., January 4. He returned to Chicago and found complications arising from a love affair of his college days. He stated he was forced into a marriage with Bessie Kent, January 11, under threats that his alleged relations with her would be exposed and he would lose his position.

"I married Bessie Kent under her promise that she would divorce me immediately after the wedding took place," said Webster. "She then refused to divorce me and that was the beginning of all the trouble."

On a drive the two quarreled and the physician alleged that his wife struck him and then jumped from the buggy, saying she would see his parents and expose his relations with her.

"When my wife jumped from the buggy," said Webster, "I threw a suit case at her and then I jumped from the buggy and gave chase. She stumbled near a ravine and fell."

"I pulled out my pocket knife and stabbed her four or five times in the back of the neck as she lay on the ground."

Webster continued his work at the hospital and three or four days later reported to Captain Baer of the Chicago police that his wife was missing. In the next ten days Webster consulted with the police several times regarding the search for his wife.

At no time did the police suspect him until after the body had been identified.

NEWSPAPER MAN FALLS TO HIS DEATH

Indianapolis, Ind., Oct. 1.—Harold Brown, a newspaper man here, fell from a window in a hospital in which he had been taking treatment for a nervous disease and was instantly killed today. Whether death was accidental or suicidal is not known. He was a correspondent of the Associated Press from 1903 to 1908 and previously editor of the Indianapolis Sentinel.

Bernalillo Republicans To Name Candidates For County Offices

That the fight against Hubbellism in Bernalillo county will be continued relentlessly until that element is driven into political oblivion will be good news to the republicans of this county and of the Second judicial district.

Undismayed by his apparent setback at the Las Vegas convention, Chairman W. H. Glenwater and the members of the regular republican central committee have decided to at once call a meeting of the committee. At this meeting arrangements will be made for the calling of a primary election at which the voters will choose delegates to a county convention to nominate a full judicial, county and legislative ticket. That the men named by this convention for the various offices will win the almost solid support of the voters of this district and county there can be no doubt.

Bernalillo is the banner republican county of New Mexico and the recognition of a little band of place seekers and political nondescripts by the Las Vegas convention, secured, as it was by the machinations of an over audacious and unscrupulous machine politician and a committee unfamiliar with local conditions, will not affect the strength of the party here.

The people of Bernalillo county, after a long and, at times, apparently hopeless struggle, freed themselves from the baleful influence of the political court and gang rule, and cannot be tricked into placing themselves for five years at the mercy of a band of political pirates. Years of terrorism and misrule have taught the people of this county their lesson, and no recognition from any outside authority can ever induce them to place Don Francisco again on the throne of power.

The voters of this county cannot be bogged, as were the delegates who were taken to Las Vegas by Frank Hubbell. The property owners who suffered for years from the assessment cinch, the parents who year after year witnessed the looting of the school funds, and the humble citizen who was haled into court and indicted upon false charges and threatened with the penitentiary if he did not agree to vote "right" have had their fill of this kind of business.

The men who will have charge of the affairs of this county for the next five years must be men of unquestioned ability and integrity.

The judge who is to preside over the court of this district must be a man who does not owe his nomination to a discredited and repudiated boss.

The district attorney must be a man who will fearlessly enforce the laws and who owes no allegiance to the man who once threw the county into bankruptcy and made its name a hissing and a by-word in the councils of the republican party of New Mexico.

The republicans of Bernalillo county can be trusted to take care of the affairs of Bernalillo county, and all the state central committees or sub-committees on earth can never swerve them from their purpose to see to it that the clean government and impartial courts which have been maintained here since the overthrow of the Hubbell regime, are continued for ever.

CHICAGO DOCTOR DEATHS IN AUSTIN DISASTER LESS THAN THREE HUNDRED

Preliminary Canvass By State and Local Authorities Shows First Estimates Were Exaggerated, Due to Panic.

[By Morning Journal Special Leased Wire.] Austin, Tex., Oct. 1.—The curtain of night, which was run down on the Austin flood last night, has revealed the true situation. The survivors, spectators fully realized how great a tragedy the elements of water and fire had enacted in the natural amphitheater of the Allegheny mountains here, was lifted at dawn today, revealing a ghastly scene of death and devastation.

RUINED TOWN PLACED UNDER MARTIAL LAW

Constabulary Guards Wreckage While Rescuers Search For Bodies; Food and Shelter For Injured and Homeless.

Austin, itself, yesterday a busy mill town of 3,000 people, many of whom were enjoying the fine autumn afternoon as a Saturday half-holiday, is only a ghost of a town today.

Torn to pieces by water, and eaten by fire, the charred remnants of its buildings, believed to hold the remains of two hundred or more persons, were strewn along the valley's edge, piled in rows where the main street section was, or swept in scattered masses far down the ravine.

Spectators, many of whom barely escaped being victims of the disaster, and hundreds of persons from surrounding towns, looked down from the steep hillsides on Austin and Castello through a veil of fog this morning to see the wreckage here of some four hundred houses, a score of business blocks, three churches and several large lumber mills, and three miles further down the river at Castello the ruins of more than fifty buildings.

The flood did not spend its force until it raced more than ten miles from the reservoir. Wharton, still further on, suffered somewhat, but is practically intact. The loss of life at Castello, where the residents had warning, is believed to be but three.

The furious flood let loose when the Bayless Pulp and Paper company's dam crumbled yesterday afternoon, picked up a huge battery of heavy timbers in the mill yards at the foot of the dam and with these thousands of planks and logs, rammed a path through the town with terrible havoc.

At the hospital today there were but six injured for the care of the small army of persons and nurses who poured into the devastated town all night and today. The medical supplies remained unused in the cars rushed here by the railroads.

The state constabulary arrived this afternoon and took charge of the situation which seemed too appalling for the local committee which worked all night. Immediately orders were issued to the railroads to bring no more sightseers to Austin and signs placed on the chief roadways permitting no one to pass but workmen. Hundreds of automobiles and carriages were turned back.

During the night searching parties with engine headlights, automobile lamps, pine torches and improvised lanterns of every sort poked their way into every pile of wreckage that was possible, seeking any who might be alive, but scarcely a body was found in which life was not extinct. The night had been one of horror which severely tested the mettle of the men whom circumstances had pressed into service as first aid rescuers. Men who shuddered at the touch of a dead body set about indifferently searching mangled bodies for papers of identification.

The immediate scene of obliteration of Austin covers an area three-eighths of a mile wide and one and three-quarters miles long. This comprised the business section and the valley residence portion and was bounded by Main, Ruckaber and Horn streets and Castello avenue, crossed by lesser thoroughfares.

Nearly a mile above stood the mammoth concrete dam of the paper and pulp company, six hundred feet long, fifty-two feet high and thirty feet thick at the bottom, tapering to a thickness of three feet at the top.

Back of this dam yesterday lay a reservoir of water a mile and a half long and an average of thirty-five feet deep. Directly in front of the dam stood the plant of the Bayless company with four main buildings. Stacked high nearby were 700,000 cords of fifty-inch wood and slabs, and also a portion of the company's immense lumber stock totalling in the Austin valley, 15,000,000 feet of hardwood and 25,000,000 feet of hemlock. This was a five-year supply, practically the last large cut of the region. It was valued at \$2,000,000.

A mill stream, Freeman Run, flowed through the town into Sinesquehoning creek, leading to the Susquehanna river. The town proper was a

place of comfortable frame houses and more substantial business buildings along the main street, which ran from side to side across the ravine.

The principal business buildings included the brick structure occupied jointly by the Austin bank and the postoffice, the department store of A. H. Buck, the Goodyear hotel, and the commercial houses and numerous stores.

Five minutes after the dam burst, this stage had been swept of its buildings. Along the foothills were houses, some of which were of brick, some of wood. At other ends of Main street, brick buildings acted as buffers as the twenty-five foot wall of water rushed toward the town with its mass of debris, almost high hills. Composed of wood, stone and brick and a mixture of the contents of stores and homes and of varied lengths of timbers and sticks.

The wreckage of the dam had been as complete as it was sudden. There were no sections from top to bottom, a hundred and fifty feet wide, were thrown out bodily like the immense gates of a canal lock. The outward swing was more than fifty feet and on either side the remaining structure began gradually to crumble away. Repairs last spring had consisted of a patch of cement fourteen feet square. The break yesterday began at that patch.

The cause of the break is a matter which the district attorney of the county will investigate. The Haystack dam was examined by experts more than a year ago and recommendations were made looking to its safety. The district attorney has secured the names of the experts who submitted the report and will summon them to testify at an inquest, which is to be held in the responsibility for the disaster.

Belief work has not been systematically organized, but it is hoped that by morning the chaotic condition will have been relieved somewhat.

Shortly after 11 o'clock this morning the first fire bell train arrived. Fair quantities of food and medical supplies from the state arsenal composed the relief train. This was ordered by Governor Tenor. The train left Harrisburg at 1:30 this morning in charge of Major Finney.

At Subury, Pa., twenty-one men of Troop C, of the state constabulary, all the available men at hand, were taken aboard and a delay of an hour was caused by the loading of this troop horses. It was shown that there is need of a strong hand to guard the town. Pillagers had been at work during the night, following a rumor that the vaults of the Austin bank and the safes of several stores had been wrecked. The rumor was not true.

The firemen and volunteers did effective work in keeping off would-be plunderers. In several cases the guardians had hand-to-hand conflicts with the marauders in which the latter were wounded.

The survivors of the flood had not recovered from the horror of the situation this morning and for many hours men and strangers visited the ruins. As the day progressed small knots of survivors met and visited the site of the ruined town.

Credit for the quick spreading of the alarm was given to Lena Blackley, a telephone operator. Upon the receipt of the message from the cliff house that the dam had broken, she pushed the alarm button connecting with the fire department and engineers' office of the Goodyear hotel.

The fire bell train arrived. The fire bell train arrived. The fire bell train arrived.

Five hundred or more men were working in the ruins late this afternoon. Heavy logging ropes were tied

to the street surrounding the burning ruins. The dam was broken, and the water rushed down the hillside at the north end of Main street. Turning toward the valley, the water rushed down the hillside at the north end of Main street.

"From where I stood," she said today, "the wall of water seemed fifty feet high. Above it rose a great flood of spray, houses were forming, spinning and jumping as they fell to pieces or were swept out of my sight. The noise was appalling."

"When I fled from Main street there were scores behind me, many of them children. They did not seem to appreciate their danger. Some turned into stores as if to make a purchase. While I was looking down upon them, helpless to give further warning, the flood of mist that seemed to precede the flood hid them from view and a moment later the green water buried the houses from my sight."

Chief of Police Baker took an informal census today and from his list calculated that at least three hundred were unaccounted for. Barker, Seibert, chairman of the citizen's committee, and Michael Murrin, pointed out that this reckoning necessarily is inaccurate because many of those who escaped the flood are wandering about trying to house themselves and those dependent upon them. Burgess Murrin said that in his opinion not more than 150 lives were lost.

"It is possible that this figure will cover the loss," he said, "and it is possible that there will be not more than one hundred dead."

It is thought that when the wreckage is cleared away it will be found that a large number of the dead are children.

Boyd Lockhart, a young business man of Austin, had a narrow escape. Mr. Lockhart said that when he heard the alarm he thought some one was playing a practical joke and he went into the street to watch the actions of the populace. He looked in the direction of the dam and saw the oncoming flood was but three blocks away.

Through came to the town today from all points in the valley. Heed Austin to ascertain the extent of the damage and to find friends and relatives. The rush of waters had carried away every means of wire communication. J. C. Hornard, who lived within a half mile of Costello, said that when the crest of the flood swept past his home there were no signs of human beings or their houses in the debris.

"The entire surface of the flood was covered with newly saved timber and pieces of lumber. It was five or six minutes before pieces of house tops, broken furniture and other evidences of the destruction of the town began to appear."

"The people of Costello," he said, "received ample warning from Austin that the dam had broken and although forty or fifty houses were demolished only three fatalities occurred."

The greatest loss of life by fire occurred at a sharp turn of the valley below Main street, where the debris was caught and compressed by the terrific current of the flood.

The wreckage of the upper part of the town was carried to that point, and from uprooted stoves and lamps it caught fire. It is believed that scores of persons are buried under from ten to twenty feet of wreckage and the task of recovering them will be difficult.

In a drizzling rain today, which changed to a heating storm, hundreds of volunteers carried on the work of rescue, while many, yet hysterical, viewed the mangled corpses, anxious to know if any of them were loved ones.

First lists were burning thickly in some portions of the wreckage this afternoon, although it had been under control several hours.

The Buffalo and Susquehanna railroad found a way into Austin today, by connecting with the Keating Summit spur, a branch track that followed the hill. By this route they landed several fire companies from Glen, Giletton, Ikenova and Sutherland.

Not a manufacturing industry is left standing and not a business place is intact. A few cheaply constructed wooden houses occupied by foreigners and located on the hillside are all that remain of the residential portion. A fortunate exception to the general destruction is the fact that the little hospital remained undamaged on the hillside. The school building also was saved.

Chief of Police Donald Baker, one of the survivors, with the assistance of Ernest Hamilton and a number of constables from nearby towns, maintained good order as could be expected throughout the night and until the arrival of a company of the state constabulary this morning.

There were eighty mounted men in the state squad, but on account of the wreckage in the valley, it was not practicable to picket the ruins of the valley in horseback. Lines were established and only workers and searchers were allowed to pass.

There was little pillaging. During the forenoon, Chief Baker discovered a man and a woman, removing a watch from a man's pocket. To attempt to arrest them was useless and the pair got away after some rough handling by the crowd. In the wreckage of three stores he found that the cash registers had been looted. One man with three watches was locked up in a freight car.

A primary election was in progress in the town hall when the flood broke. A hatless man dashed by yelling to the crowd about the bank something about the dam bursting and the election inspectors and voters ran out and took to the hills, leaving their ballots unmarked. Some escaped, but many were whirled into the debris which forced a man of 71 to self just below Main street. The dam of debris at this point was approximately five feet high and three or four blocks long.

In this mass the bodies of the majority of the victims are believed to be mangled and buried. The houses, twisting telephone poles, huge sections of brick walls, trees and timbers are so interwoven that the rescuers have to fight their way into the debris inch by inch.

Five hundred or more men were working in the ruins late this afternoon. Heavy logging ropes were tied

to the street surrounding the burning ruins. The dam was broken, and the water rushed down the hillside at the north end of Main street. Turning toward the valley, the water rushed down the hillside at the north end of Main street.

"From where I stood," she said today, "the wall of water seemed fifty feet high. Above it rose a great flood of spray, houses were forming, spinning and jumping as they fell to pieces or were swept out of my sight. The noise was appalling."

"When I fled from Main street there were scores behind me, many of them children. They did not seem to appreciate their danger. Some turned into stores as if to make a purchase. While I was looking down upon them, helpless to give further warning, the flood of mist that seemed to precede the flood hid them from view and a moment later the green water buried the houses from my sight."

Chief of Police Baker took an informal census today and from his list calculated that at least three hundred were unaccounted for. Mr. Lockhart said that when he heard the alarm he thought some one was playing a practical joke and he went into the street to watch the actions of the populace. He looked in the direction of the dam and saw the oncoming flood was but three blocks away.

Through came to the town today from all points in the valley. Heed Austin to ascertain the extent of the damage and to find friends and relatives. The rush of waters had carried away every means of wire communication. J. C. Hornard, who lived within a half mile of Costello, said that when the crest of the flood swept past his home there were no signs of human beings or their houses in the debris.

"The entire surface of the flood was covered with newly saved timber and pieces of lumber. It was five or six minutes before pieces of house tops, broken furniture and other evidences of the destruction of the town began to appear."

"The people of Costello," he said, "received ample warning from Austin that the dam had broken and although forty or fifty houses were demolished only three fatalities occurred."

The greatest loss of life by fire occurred at a sharp turn of the valley below Main street, where the debris was caught and compressed by the terrific current of the flood.

The wreckage of the upper part of the town was carried to that point, and from uprooted stoves and lamps it caught fire. It is believed that scores of persons are buried under from ten to twenty feet of wreckage and the task of recovering them will be difficult.

In a drizzling rain today, which changed to a heating storm, hundreds of volunteers carried on the work of rescue, while many, yet hysterical, viewed the mangled corpses, anxious to know if any of them were loved ones.

First lists were burning thickly in some portions of the wreckage this afternoon, although it had been under control several hours.

The Buffalo and Susquehanna railroad found a way into Austin today, by connecting with the Keating Summit spur, a branch track that followed the hill. By this route they landed several fire companies from Glen, Giletton, Ikenova and Sutherland.

Not a manufacturing industry is left standing and not a business place is intact. A few cheaply constructed wooden houses occupied by foreigners and located on the hillside are all that remain of the residential portion. A fortunate exception to the general destruction is the fact that the little hospital remained undamaged on the hillside. The school building also was saved.

Chief of Police Donald Baker, one of the survivors, with the assistance of Ernest Hamilton and a number of constables from nearby towns, maintained good order as could be expected throughout the night and until the arrival of a company of the state constabulary this morning.

There were eighty mounted men in the state squad, but on account of the wreckage in the valley, it was not practicable to picket the ruins of the valley in horseback. Lines were established and only workers and searchers were allowed to pass.

There was little pillaging. During the forenoon, Chief Baker discovered a man and a woman, removing a watch from a man's pocket. To attempt to arrest them was useless and the pair got away after some rough handling by the crowd. In the wreckage of three stores he found that the cash registers had been looted. One man with three watches was locked up in a freight car.

A primary election was in progress in the town hall when the flood broke. A hatless man dashed by yelling to the crowd about the bank something about the dam bursting and the election inspectors and voters ran out and took to the hills, leaving their ballots unmarked. Some escaped, but many were whirled into the debris which forced a man of 71 to self just below Main street. The dam of debris at this point was approximately five feet high and three or four blocks long.

In this mass the bodies of the majority of the victims are believed to be mangled and buried. The houses, twisting telephone poles, huge sections of brick walls, trees and timbers are so interwoven that the rescuers have to fight their way into the debris inch by inch.

Five hundred or more men were working in the ruins late this afternoon. Heavy logging ropes were tied

to the street surrounding the burning ruins. The dam was broken, and the water rushed down the hillside at the north end of Main street. Turning toward the valley, the water rushed down the hillside at the north end of Main street.

"From where I stood," she said today, "the wall of water seemed fifty feet high. Above it rose a great flood of spray, houses were forming, spinning and jumping as they fell to pieces or were swept out of my sight. The noise was appalling."

"When I fled from Main street there were scores behind me, many of them children. They did not seem to appreciate their danger. Some turned into stores as if to make a purchase. While I was looking down upon them, helpless to give further warning, the flood of mist that seemed to precede the flood hid them from view and a moment later the green water buried the houses from my sight."

Chief of Police Baker took an informal census today and from his list calculated that at least three hundred were unaccounted for. Barker, Seibert, chairman of the citizen's committee, and Michael Murrin, pointed out that this reckoning necessarily is inaccurate because many of those who escaped the flood are wandering about trying to house themselves and those dependent upon them. Burgess Murrin said that in his opinion not more than 150 lives were lost.

"It is possible that this figure will cover the loss," he said, "and it is possible that there will be not more than one hundred dead."

It is thought that when the wreckage is cleared away it will be found that a large number of the dead are children.

Boyd Lockhart, a young business man of Austin, had a narrow escape. Mr. Lockhart said that when he heard the alarm he thought some one was playing a practical joke and he went into the street to watch the actions of the populace. He looked in the direction of the dam and saw the oncoming flood was but three blocks away.

Where They Play Today.

National League.		
Chicago at St. Louis.		
Boston at Philadelphia.		
New York at Pittsburgh.		
Cincinnati at Brooklyn.		

American League.		
Boston at Washington.		
Philadelphia at Cleveland.		
St. Louis at Chicago.		

Bad weather prevented more than two of the National league clubs from playing a game Sunday, but these two happened to be the leaders in the pennant race. The game resulted in a victory for New York by a shut-out score, making the series an even break.

It increased New York's lead over Chicago to fifty-six points. New York's advantage now being so great that should Chicago win all her remaining seven games, New York will have to win but three of her remaining twelve to capture the flag. Should Chicago win all and New York but two, a tie for the pennant would result.

NATIONAL LEAGUE.

New York, 5; Chicago, 0. Chicago, Oct. 1.—Chicago's pennant hopes were shattered today again by New York, when the visitors shut the locals out. About the best Chicago can expect now is to tie the easterners for the pennant, as New York is 7 1/2 games in the lead, and Chicago has only seven remaining games on the schedule, while New York has twelve games to play.

Today's game was a pitcher's battle between "Rube" Marquard, who was easy for the locals in one of the previous games, and Richie, who won the opening game with ease. But Marquard showed his old form and was almost invincible. He allowed the locals but six scattered hits, while Richie, who held the easterners to three hits up to the eighth, weakened and was hit hard.

Seven hits in the last two innings netted five runs for New York. Merkle opened the eighth with a double to the left field circus seats, which were set up for the expected overflow crowd which did not come out. He was sacrificed to third and scored on Fletcher's double. Fletcher advanced a base on Myers' out and scored on a single by Marquard.

Not being satisfied with their lead, New York scored three more runs in the next inning. L. Doyle singled, but was forced by Snodgrass. Murray fanned and Merkle got a single. Herzog singled and Snodgrass counted. Fletcher doubled to right center, scoring Merkle and Herzog and was himself put out when he tried to stretch his hit into a triple.

Chicago got a man as far as third in the second inning and again in the second inning when all the bases were filled. Once again they got a man as far as third in the ninth.

Score: R. H. E.
Chicago.....000 000—0 6 1
New York.....000 022—5 10 3
Batteries—Richie and Archer; Marquard and Myers.

Cincinnati, Oct. 1.—Cincinnati-Boston game postponed, rain.

St. Louis, Oct. 1.—Brooklyn, St. Louis double-header postponed, rain.

NIGHT SERVICE AT FASHION CAFE

Continuing tonight and continuing through the winter season, the popular Fashion cafe, will be open nights and special attention will be given to this department. It is the intention of Manager Dave Combs to pay especial attention to the late diners, and now that the theater season is about to open, an after-the-theater supper at the Fashion will be the proper thing. In keeping with the high standard maintained by this cafe, the night service will be par excellence, with all the delicacies the market affords, served in a manner best calculated to please the palates of the fastidious diners. To enumerate would be an endless task, but rest assured the Fashion will do its part, and all you have to do is to make your wants known. Remember, the new service commences tonight, and its an all-night service, too. Remember the place, and Manager Dave will guarantee to please you.

SEATTLE WRESTLER IS VICTOR OVER MEXICAN

Juarez, Mex., Oct. 1.—C. L. ISAAC BARTH, President.

JOHN B. McMANUS, Sec'y-Mgr.

IS RUNT WALSH THE MOST VERSATILE PLAYER?

Philadelphia National Utility Man So Regarded By Experts; Has Covered Every Position Except the Slab.

New York, Sept. 29.—Runt Walsh, the Philadelphia Nationals have a player who has filled every position on the team except pitcher this year, and before the campaign ends Manager Doolin says he intends to put Walsh in the box just to prove that he is the most accomplished all-around ball player in the profession. Walsh started his career on the diamond as a catcher. Then he became a pitcher, after which he played shortstop for the South Bend, Ind., club. In that position he showed so much skill that a Philadelphia scout signed him, as extra infielder, he soon attracted attention to Quakersville, substituting Knabe, Douglass, Lobert and Ludrus, and playing each position with sterling ability. He covered left field while Sherwood Magee was under suspension last summer, and also pitched center and right fields when Paskert and Titus were indisposed.

When the Brooklyn were in Philadelphia several weeks ago the Quakers were seriously crippled behind the bat. Madden and Spencer, who had been doing the catching with Doolin and Moran on the hospital list, were banged up, and Carter wasn't in shape. Suddenly the Quaker manager got Walsh behind the bat, much to the amazement of the fans. Walsh lost no time in proving that he was perfectly at home in this position. He caught superbly and threw out three would-be base stealers, although with the bases filled. Lobert threw the ball to him at the plate for a force and Walsh promptly returned it to Lobert for the third out.

Since that successful debut Walsh has caught Alexander, Chalmers and Moore with marked skill, which is no mean feat, considering the fact that he is a right-handed pitcher. In addition to his ability as a fielder Walsh is a strong batsman and a fast runner. In Philadelphia the critics believe he is the best all-around player. In either major league, and there is plenty of ground for this contention. All-around players are not numerous. In the National league, in addition to Walsh, Artie Holman of the Cubs, is a star in this respect because of his ability to play both infield and outfield positions. Boston has covered all the bases and has played in the outfield this year. Brooklyn has John Thurmond, who has played in the first and second bases and in the outer garden. The Giants have an all-around first base and catcher here as a catcher, Roger Bresnahan, who continues his work to catching exclusively, has played infield and outfield positions and originally was a pitcher. Tommy Leach is Pittsburgh's best all-around man, having played short, third and the outfield.

The Highlanders exceed the other American league teams in possessing such accomplished players. Chase, the best first baseman in the business, can play any other position except catcher and he might do well even in that capacity. Jack Knight has displayed first-class skill at short, second and third, and also is able to cover first in bunt style. Crook has played the first and outfield. So has Daniels. Walter came here as a left-handed pitcher and first baseman but became a regular outfielder. Hartell can play second, third, short and the outfield. Childwell, in addition to his pitching skill, is a clever outfielder and a natural batsman.

The Boston Red Sox have a good all-around man in Clyde Knabe, who has played all the infield positions and also in the outfield. Nicholas of the Athletics can cover short or third in addition to his great work at the initial corner. Washington has Wad Conroy, expert in both in and out the field, also Henry, who can catch and play a good first base. Napoleon Lajoie for the Cleveland ranks high in this particular, for he is a star second baseman, has played short and is a top-notch first baseman and can hold his own in the outfield, also standing in the front rank of batsmen. Delahanty and Moriarty of the Detroit, can fill any of the infield positions.

Tenneloff of the White Sox is capable with another club. Looking back over the all-around stars of old times it can be said that John Merrill of the 1882 Boston was one of the best. So was Mike Kelly of the 1888 Chicago, who caught and played both infield and outfield positions. Buck Ewing of the 1889 Giants was the best catcher in the country that year, but he showed cleverness at second base, in the outfield and also pitched now and then. Hardie Richardson and Jim White of the 1887 Detroit were all-around stars. Richardson, an outfielder, played a fine second base, and White, a third baseman, caught now and then and covered first. Jack Doyle of the 1895 Giants caught and played as a shortstop and first baseman. Before either Doyle or Jennings was heard of the Philadelphia had a great all-around man in Charles Ferguson, a pitcher who could play anywhere. Many veterans still insist that Ferguson never has been equalled.

TIGERS DID NOT LAY DOWN ON HUGHIE SAYS JONES

Such Statements Sillyest Rot; Hard Luck and Not Dislike For Manager Jennings Cause of Detroit's Downfall.

Detroit, Mich., Sept. 29.—"There isn't a word of truth in the statement that Detroit players quit to get Jennings," said Davy Jones, one of the stay-at-homes. "I will say Jennings is not the most popular man on the team, but the Tigers would not permit their feelings to sway the desire to get into the world's series. "There are some players on the team who find getting along with the manager easy. And there are others who are in just an opposite position. Jennings is sarcastic and when things

do not go to suit him the offenders suffer. Jennings is an entirely different man on the bench from what he is in the field. In the field he is always shouting and cheering the men to success; on the bench he is cutting into them with sarcasm. "Some players do not understand his meaning. They cannot see that he is working for the best interests of the club. I believe that Hugh's heart and soul are with the Tigers, and when they are in defeat he feels it worse than any other. But he doesn't know how to handle the men. I do not blame him for not accepting the advice of players. But I do blame him for not listening to reason from others.

"For instance: In Patten last year, made four runs in the first inning. Our pitchers were rapped hard in the second and third innings, and when I came in from the field at the close of the first half of the third I remarked to Jennings that there should be a new pitcher."

"He's working well enough to suit me," returned Jennings with a sneer. "I didn't say anything more, and I never would say anything so long as I am on the Detroit team. The pitcher was hammered from the box in the next inning, and Jennings, by way of apology said, 'I guess he wasn't working right, was he?'"

"If I'm management that has lost the pennant to Detroit. It is the hard luck the team has played in. Injuries have crippled some of our best players, and just when we would get going right something would happen to push us back. "Jennings is not the best judge of a pitcher, but I will say he has been unfortunate in getting twirlers. Men who have started like stars have fallen down. Jennings believes in leaving a pitcher in—others take an opposite view. Hugh has a right to his own opinion, and sometimes it proves out right. "But Detroit players laying down to get the manager—that is the silliest statement imaginable. "There is only one player on the entire team who will fight for Jennings, and that is Cobb," continued Jones. "Cobb is one of the reasons for Detroit's position in the race. Cobb is permitted to do what he wants to. While there is no disputing the fact that Cobb is a wonderful player—perhaps the greatest the world has ever seen—it isn't the best thing for a team to permit that one player to do as he pleases.

Big Raymond-Whitcomb Ocean to Ocean Tour Starts From New York For Pacific This Morning

Seven Passenger Garford Touring Cars to Be Used Exclusively and Expedition Will Be Piloted By Pathfinder Westgard; Will Reach New Mexico Early in November According to Schedule.

(Special Correspondence to Morning Journal)

New York, Sept. 30.—Every preparation has been completed for the start of the first public coast-to-ocean automobile tour and early Monday morning the cavalcade of cars will leave this city bound for Poughkeepsie, which is to be the first night control of the New York-Los Angeles trip.

No pains have been spared to make this a tour de luxe in every respect. Big seven-passenger, 40-horse-power Garford touring cars are to be used exclusively and from five to seven hours will be ample time to cover each day's schedule of about 100 miles. Each Sunday is to be a day of rest, Buffalo and Chicago being the first two Sunday controls, and though fifty-one days will elapse between the departure of the cars from New York and their arrival in Los Angeles, November 22, there will only be forty days of actual touring. Hotel accommodations have been arranged for along the entire route with the exception of a few night controls in New Mexico and Arizona.

This tour has been organized by the Raymond & Whitcomb company who thirty-two years ago conducted the first public tour from New York to California. They will use the same machines as in their White Mountain tour last summer and the coming venture is to be conducted the same way only on a more elaborate scale.

The route has been selected by A. L. Westgard who will also act as pilot and the tour has the appropriation of the A. A. A. In company with Mr. Westgard, who will be one of several women on this trip. Mr. Westgard drove over the same route in October, 1910, and they did not have one rainy day the entire trip. By the first of November the tourists will be in New Mexico where the autumn weather is always ideal.

From New York the generally approved route to Chicago by way of Albany, Buffalo and Cleveland will be followed, a half-day stop being made at Elgin, Ill., where the tourists will be the guests of the Garford company at their factory there. From Chicago the road lies due west across Illinois and Iowa to Omaha, and from there it follows the Missouri river south to Kansas City.

At this point what is really the most interesting part of the trip begins for here the tourists will take up the historic Santa Fe trail and will follow it to Santa Fe, N. M., which will be reached November 1. For approximately a thousand miles across Kansas and through a part of Colorado and New Mexico this old road, which three-quarters of a century ago echoed the tread of a thousand ox teams, will be traveled in a manner never dreamed of in those early days. In all the boundaries of thirteen states will be crossed.

From Santa Fe to Phoenix the trip will be especially interesting and the two Garford trucks which will accompany the tour as baggage cars will be pressed into service as commissary wagons. Where hotels are out of the question Raymond & Whitcomb cars have arranged to have Pullman cars side tracked along the Santa Fe route where they will be used for sleeping quarters. But a full camping outfit will be carried on this part of the trip and many of the tourists are expected to avail themselves of it.

A special train will take the party from Phoenix to the Grand Canyon and back for a four-day sightseeing trip. The last leg of the journey, from Phoenix to the coast, will be covered in five days.

"While not directly concerned with the tour itself the Garford company is greatly interested in the success of the venture because both our trucks and our pleasure cars are on trial," said A. L. Garford, president of the company, who reached New York Friday to witness the start of the tour. "Our position is somewhat akin to that of the machine shop which turned out the engine that hauled the first transcontinental train. Personally I have every reason to believe the tour will be the first of what will later be a regular summer and autumn event."

The international exposition of dry farming products will occupy a building 300 feet in length and there will be extensive exhibits from almost every state west of the Missouri river from a half dozen foreign countries. The machinery exhibits will occupy an additional space 140x400 feet in size.

The International Congress of Farm Women, mentioned above, has yet to hold its first session. Authorized by the Dry-Farming congress this summer for the settlement of the farm home, the office call has not yet been made. A prompt response from every section of America and from many foreign countries that is now promised to be one of the most successful features of the great gathering. Already there has been organized a branch Women's congress in Pretoria, South Africa, with Viscountess Gladstone at the head, and other branches are in immediate prospect.

The plans for the Women's congress include trunk discussions of proper equipment for the farm home, laws of physical life in relation to the family, the cash value of rest, labor-saving devices, the economic value of the farm woman, the country school, together with demonstrations in cooking, home hygiene, emergency nursing and the care of infants and young children. Men and women of international reputation are on the program, which is being prepared by Mrs. John T. Burns, the secretary of the new organization, assisted by a working committee of prominent Colorado women. A special session will be devoted to the women writers on farm newspapers, whose influence is the greatest single factor in the life of the American farm-woman.

The Dry-Farming congress has as its head this year Dr. J. H. Wood, president of the North Dakota Agricultural college. Its active officer is Secretary-Treasurer John T. Burns, of Colorado Springs. Several cities are asking for the honor of the 1912 convention. Lethbridge, Canada, Salt Lake, Utah, and Prescott, Arizona, are the candidates.

ONE OF GEORGIA'S BEAUTIES

Mrs. Phinix Calhoun is said to be one of the most beautiful women of Georgia. She is the third daughter of Mr. and Mrs. William Lawson Peck of Atlanta, Ga., and, about a year ago, married Dr. Calhoun. The Calhouns and the Pecks go to Narragansett every summer, where, as well as at resorts in Virginia and Florida, Mrs. Calhoun is very popular on the score of her physical and mental charms.

RAILROAD STRIKE PROMISES BITTER STRUGGLE

Officials and Shopmen Spend Sunday Preparing For Labor War; Strike-Breakers Imported at Chicago.

(By Morning Journal Special Lensed Wire.)
Chicago, Oct. 1.—Railroad officials and shop men on the Harriman line who struck yesterday to enforce their demands for recognition of the newly organized shop federation, spent the day in preparation for the struggle, which will begin in earnest tomorrow.

The walkout, occurring before the Saturday half holiday, gave the railroads a full day and a half in which to make preparations to run the shops and it was said that in many of the shops a practically full force of men would be at work. The men at the shops also were made, "There was no sign of a demonstration, although a guard of policemen were constantly at the gates."

President Marikham of the Illinois Central said nothing had been done by the railroads during the day. "Saturday afternoon and Sunday is a holiday," he said, "but we expect the shops to open on time tomorrow."

Julius Kautsch, vice president of the Harriman line, spent most of the day preparing for the strike.

SIXTY PER CENT REMAIN AT WORK CLAIMS CALIF. SAN FRANCISCO, Oct. 1.—E. E. Cal-

vin, vice president and general manager of the Southern Pacific railroad, spent the day compiling a list of men at work and on strike in the territory under his jurisdiction, which reaches from Ashland, Ore., to Sparks, Nev., and El Paso, Tex. He gave out tonight his first set of figures on the situation. From all points were received reports of orderly meetings among the men. Everywhere trains were reported on time, or with no more than ordinary variations from schedule.

"Out of a total of 7,455 men employed in shops, 4,525, or sixty per cent, remained at work," says Mr. Calvin's statement. "The reduced extent of the general shops of the system at Sacramento shows that 2,405 men were in service Friday and that 1,625 remain at work."

Defections in other places are given as follows:

Town.	Employed.	Striking.
Los Angeles	1,125	46
Tucson	195	156
San Francisco	545	230
Oakland	1,066	322

A large number of men went out yesterday having expressed a desire to return to work, master mechanics and foremen have been authorized to re-employ under certain restrictions prescribed by the general superintendent of motive power. The statement adds that a number of applications for work have been received and accepted.

The figures given out vary greatly from the contention of the labor leaders, for the reason that the company's totals are based upon the total number of men of every description employed in the yards while labor leaders' percentage estimates are on the number of men involved. Thus, in San Francisco, where it is generally conceded that practically every man in the free shop craft unions favored by the strike, the company's figures still show 230 men at work, these being:

E. Le Roy Yott
Teacher of Violin, Harmony and Counterpoint. Studio room 39, Bannockburn Bldg.,
Tel 1287. P. O. Box 107

ing printers and general workmen, it was said.

Strikers at Los Angeles held a meeting today at which they were advised to stay at home and be quiet.

At Portland the six hundred men who finished their five day week Friday night, are due to return tomorrow, Monday. If they do so it will be in face of the strike order. Union men say that with the exception of about thirty men, almost at pension age, all will remain away from work.

CARMEN ORGANIZE AND WILL JOIN STRIKERS

New Orleans, La., Oct. 1.—The only development today locally in the strike situation was the organization of carmen employed at the Algiers shops of the Southern Pacific. Forty-two signed the charter and are expected to join the strikers.

STRIKERS BURN TRELLIS ON GEORGIA RAILROAD

Augusta, Ga., Oct. 1.—The burning of a wooden trestle 350 feet long near Douglas, Ga., and the reported flogging of a white fireman at Vidalia, Ga., were the developments today in the strike situation on the Georgia and Florida railroad.

STRIKE-BREAKERS ARE EMPLOYED AT HOUSTON

Houston, Tex., Oct. 1.—Sixty strike-breakers arrived here today to take the place of the strikers in the Southern Pacific shops. More are expected.

FIRE PREVENTION MOVEMENT IS A POPULAR ONE

Mayor Elder Issues Supplementary Proclamation, Urging Citizens to Join in Observing Day On October 9.

Mayor J. W. Elder of Albuquerque and the city council are exceedingly interested in the fire prevention movement that is at present being agitated over New Mexico and are determined to do all in their power to assist Governor Mills in the matter. Some few days ago Governor Mills issued a fire day proclamation and Mayor Elder has promptly come forward with a similar proclamation, urging Albuquerque citizens to do all they possibly can to co-operate in the movement.

Mayor Elder's Proclamation.
Hon. W. J. Mills, governor of New Mexico, has issued a proclamation calling attention to the great loss of life and property by fire and to the fact that the chief factor in causing this loss is carelessness and appointing Monday, October 9th, 1911, as Fire Prevention Day.

Therefore I strongly urge that every

citizen of Albuquerque give his hearty co-operation in the carrying out of the recommendations made in that proclamation.

Given under my hand and seal the 30th day of September, 1911.
JOHN W. ELDER,
Mayor.

Attest:
JOHN R. McMANUS, Clerk,
Fire Prevention Day Proclamation by the Governor.

The great annual loss of life and property by fire in this country is one that should command the serious attention of our citizens. The per capita loss in New Mexico during the past year from fire is over one dollar for every man, woman and child within our borders. The chief factor responsible for this loss is carelessness and the utter lack of personal responsibility in the removal of causes productive of fires.

In order that this matter may be promptly brought to the attention of our people, I do hereby appoint Monday, October 9th, 1911 to be Fire Prevention Day.

I earnestly recommend that property owners on said day give personal attention to the removal of rubbish and debris from their premises; that conditions which bring about fires be examined into and remedied; that the various boards of education throughout the territory and those in whose hands the lives and safety of our school children and the wards in our hospitals and institutions are entrusted, make special effort in the protection thereof.

The authorities of our cities and towns are urged to take such precautions as will tend to reduce the enormous waste; and I further recommend that appropriate exercises be held in our public schools and that instructions on the common fire hazard be given therein and that the day be made the occasion of "fire prevention" which is doing so much to remove hazardous conditions.

Done at the executive office this 21st day of September, A. D. 1911.
Witness my hand and the great seal of the Territory of New Mexico,
WILLIAM J. MILLS.

By the Governor:
NATHAN JAFFA,
Secretary of New Mexico.

Hopeless Case.
Hon. Ark. J. E. Freeman says: "I had a severe case of kidney trouble, and could not work, and my case seemed hopeless. One large bottle of Foley's Kidney Remedy cured me, and I have never been bothered since. I always recommend it."

J. H. O'Reilly.

AUCTION SALE!

Wednesday, October 4th, at 2:30 p. m., I will sell at auction a lot of good and up-to-date furniture at 720 South Arroyo street. Heavy Mission dining table with chairs to match, besides a good range, and all kinds of furniture.

J. M. SOLLIE, Auctioneer

GAS IN YOUR STOMACH OFTEN COMES FROM NERVOUSNESS

Rather, from a nervous, irritable stomach, and it takes a Remedy prepared particularly and especially for Stomach Gas to cure this.

Baummann's Gas-Tablets do this because they are prepared distinctly and especially for Stomach Gas, and particularly for all the bad effects coming from Gas Pressure.

That empty, gassy and gnawing feeling at the pit of your stomach will forever disappear in a few days; the anxious and nervous feeling, with heart palpitation, will vanish and you will once more be able to take a deep breath, so often prevented by gas pressing against your heart and lungs.

Your limbs, arms and fingers won't feel numb and go to sleep, because Baummann's Gas-Tablets prevent gas interfering with your digestion. That intense drowsiness and sleepy feeling after dinner will soon be replaced by desire for some form of entertainment.

Your distended stomach will reduce by inches, because gas simply cannot form after a few days' use of Baummann's Gas-Tablets.

Ask these people what they think of Baummann's Gas-Tablets?

SEVEN GOVERNORS TO ATTEND DRY FARM MEET

Agricultural Celebrities From All Over Country to Take Part in Sixth International Congress at Colorado Springs.

(Special Correspondence to Morning Journal)

Colorado Springs, Colo., Oct. 1.—The Sixth International Dry-Farming Congress will hold its sessions in this city during the five days from October 16 to 20, inclusive.

Behind this simple statement lurks what is probably the greatest single agricultural force the world has ever known.

The International Dry-Farming congress is an organization with working branches in nine countries of the world, with more than 15,000 individual members, scattered through fifty nations, and with an expense for agricultural propaganda, including the funds expended by its branches, of more than \$60,000 annually.

The Sixth congress will have as delegates in actual attendance, seven governors of states, ten presidents of agricultural colleges, fifty professors of similar institutions, fifty members of the staff of the United States department of agriculture, a half hundred agricultural authorities from foreign countries, and more than 2,500 prominent farmers and business men, all of them intensely interested in the great problem of reclaiming the so-called arid districts of the world.

These delegates, actually own and operate farms to the extent of nearly 60 million acres, and the problems they will meet to consider are vital to 60 per cent of the American continent and to more than 50 per cent of the entire earth's surface.

Five previous conventions have been held the first at Denver, Colo., in 1907, with an attendance of 300 people, and the last at Spokane, Wash., with more than 2,000 registered delegates and an actual attendance of double that number.

The congress is a unique organization. Its avowed objects are the cooperative, scientific study of agriculture and the development of better farming methods in the sub-humid or so-called "dry" districts of the world. It has no country to colonize. It has no lands to sell. Its work is utterly impersonal, and, as such, it

REGISTER.

The registration books of the second district of precinct 26 are now open at Yarn's drug store, corner of Second street and Gold avenue. All persons who wish to vote at the coming election should see that their names are properly registered at once.

CAMDEN MISS HELPED BY CARDUI

Miss Wilson Suffered For Nine Years, But Finally Obtained Relief By Taking Cardui.

Camden, Miss.—"About five years ago," says Miss W. E. Wilson, of this place, "I had to undergo an operation, and after that I had a hard time to stand on my feet or walk comfortably."

"I had suffered here or there, with womanly troubles, for more than nine years, and I was very weak and nervous."

"As soon as I commenced to take Cardui, I felt better. Now I am not taking any medicine for I don't need any."

"Cardui has done me more good than anything I have ever taken. It is the greatest medicine for women that was ever made."

"This remarkable letter from a lady who has actually tried Cardui, ought surely to convince you of the genuine merit of this successful medicine, and induce you to give it a trial for your own troubles."

Cardui is the ideal remedy for all weak, suffering, young or old.

Cardui acts speedily on the womanly constitution, preventing unnecessary pain, and building up strength where it is most needed. During the past fifty years, it has proven itself to be a reliable remedy for weak women. It has helped others, and should certainly help you. At all druggists. Try it.

N. B.—Write to Ladies' Advisory Dept., Chattanooga Medicine Co., Chattanooga, Tenn., for Special Instructions and 64-page book, "Home Treatment for Women," sent in plain wrapper on request.

W. C. LILLER WILL BE CANDIDATE FOR CONGRESS

President of National Democratic League of Clubs Brought Forward For Action of State Convention.

William C. Liller, president of the National Democratic League of clubs, will be a candidate before the democratic state convention at Santa Fe this week for the nomination of congressman from New Mexico. Mr. Liller, whose residence has been in New Mexico for a year or so past, is one of the best known democratic organizers in the country and is said to be warmly endorsed by the democratic leaders throughout the country. Mr. Liller's backers point out that if he is nominated, his wide acquaintance with the leaders of the party in congress and elsewhere will enable him to wield a strong influence for New Mexico. Mr. Liller has been extremely active in New Mexico since the beginning of the present campaign and has the reputation of being an exceedingly live wire.

HUNDREDS OF ELKS TO BE PLACED ON RANGES OF NORTHERN ARIZONA

Prescott, Ariz., Sept. 28.—Before leaving Prescott for northern Arizona a few days ago, E. W. Nelson, of the agricultural department at Washington, stated that one of the objects of his visit to Arizona was to investigate conditions in the mountainous regions at high elevations, to place several hundred head of elk on the ranges adjacent to the San Francisco mountains, the government being very anxious to solve a problem that is attending national consideration in the extermination of these animals every winter in the north. Mr. Nelson, at Flagstaff a few days ago, stated that the question which seemed most important to him was whether or not the animals would receive adequate protection from the hunters. If a guarantee would be given by the citizens generally, and the Order of Elks in particular, that the latter organization would co-operate to preserve these animals, it is very probable that a big herd would be shipped in this winter. He has authority to decide what course the government will pursue. From statistics given the department, it is stated that last winter over 15,000 elk starved to death in Wyoming out of a herd of 50,000. Beginning early in November these animals start drifting in large numbers from Canada to the south, and invariably make for their winter feeding grounds. In what is known as the Jackson Hole country in Wyoming, which is well sheltered from blizzards and which also until recent years was abundant in range feed. But during the past two years, the land has been taken up by numerous homestead locators, and is now under fence, with the result that feeding grounds are very narrowly restricted, while the elk have decreased in numbers substantially. The losses have reached national consideration and especially among those who urge humanitarian principles to be extended before the race is extinct. Mr. Nelson before leaving Arizona, will take the question up for further consideration, when his decision will be announced.

SIX INCH RAINFALL FLOODS ST. JOSEPH

St. Joseph, Mo., Oct. 1.—Following a rainfall of almost six inches today, St. Joseph was visited by the most disastrous flood in its history. A man is missing and hundreds in the packing house district are homeless. Rescuers worked for hours taking out families, marooned in their homes in boats and on rafts.

Attell Favorite Over Daley.
New Orleans, La., Oct. 1.—Monte Attell, former bantamweight champion, has completed two weeks of hard training at Bay St. Louis, Miss., for his ten-round fight tomorrow night with Johnny Daley at the New Orleans club. Attell has a shade better of the betting.

NO FALL TERM OF HIGH WATER DELAYS COURT AT ROSWELL PRESIDENT'S SPECIAL

Extra Long Sessions Have Depleted Fund; Dexter's Last Saloon Closes; Football Practice at Military Institute.

[Special Correspondence to Morning Journal]
Roswell, N. M., Oct. 1.—For the first time in its history, Chaves county will not have its regular fall term of court on account of a shortage in the funds. The court fund has been heavily taxed with sessions that have continued many more weeks than usual and it is stated that after the trial of Jim Lynch at Carlsbad, on a charge of venue, there will be insufficient money in the fund to warrant calling the regular term in November.

Hundreds of hunters left this morning for the open country, this being the opening day for shooting quail in New Mexico. There is an exceptionally large number of quail in the hills and rocky country around Roswell this year.

The one saloon of Dexter was closed last night at midnight, in compliance with the terms of the election of last June. The saloon did a thriving business the last few hours it was open. Takeover is now the only town in the Pecos valley between Roswell and Pecos with a saloon.

At a meeting of the Roswell Teachers' Institute yesterday a committee of five was appointed to take up the matter of forming a county association with all the teachers of the city and country districts as eligible members.

FAMILY OF THREE FOUND DEAD IN BED

Murderer Had Crushed Skulls of Victims as They Slept; No Motive Assigned For the Crime Nor Clue.

[By Morning Journal Special Leased Wire.]
Monmouth, Ill., Oct. 1.—William E. Dawson, his wife and one daughter were found dead in their beds today, the skulls of each crushed in.

Train Reaches Omaha After Day Spent in Crawling Over Submerged Tracks; Every Precaution Taken For Safety.

[By Morning Journal Special Leased Wire.]
Omaha, Neb., Oct. 1.—President Taft arrived here tonight from Sedalia, Mo., eleven hours late, after a somewhat perilous trip over flood damaged railroads.

The Taft special was caught in the center of a storm in northeastern Kansas and eastern Nebraska, during which it was estimated eight inches of water fell. Creeks were turned into torrents, rivers overflowed, and railroad travel was impeded in all directions. Several small bridges were swept away and during the early forenoon a portion of the tracks over which the president traveled were covered with more than a foot of water.

The Taft special was held at Rushville, Mo., for seven hours and there was a two-hour delay at Palls City, waiting for the flood to subside. Section hands along the Missouri Pacific were ordered out by the hundreds. In several places the tracks were lifted on jacks from the muddy waters and propped on piles of cross ties. To hold these in place many tons of rock were dumped into the roadbed.

Every possible care was taken to ensure the president's safety and before his train was sent over the dangerous stretches a pilot train pulled by the heaviest engine of the system had preceded it and a thorough test had been made of the emergency repairs. It was the most dangerous railroading situation the president has experienced during any of his travels.

Facts For the Farmer, Working-man and Taxpayer

Do You Know Who Will Be Affected By the Success of Prohibition?

The men engaged in the Brewing and Distilling business will be the first to be hit, of course. But the sweeping away of a billion and a half dollars of capital and its buying power, taxes and employment of labor, will bring disaster to every one, and ultimately the burden will fall on you.

ARE YOU A FARMER?

The distillers, brewers and maltsters last year bought over one hundred million bushels of corn, barley and rye, valued at over Ninety Million Dollars, or upwards of 22 per cent. of all grain marketed by the farmers of the United States. Remove these enormous buyers from the market and you will reduce by that much the price you can get for your grain.

ARE YOU A BUSINESS MAN?

The distillers, brewers and maltsters spent last year, One Hundred and Fifty Million Dollars for machinery, lumber, wagons, paints, advertising, insurance, rent and supplies of all kinds. Remove this buying power from the market and you will feel the loss in your own line of business and in others on which you are dependent.

ARE YOU A WAGE EARNER?

The distillers, brewers and maltsters employ half a million people. Throw these wage earners out of employment and you will suffer from their competition—particularly now when work is scarce.

One third of the entire taxes of the United States is paid by the liquor business. If you abolish this industry your TAXES WILL BE RAISED 25 PER CENT. to make up the deficit.

The liquor industry is the sixth largest industry in the United States, and its wages support 2,000,000 persons. If you wipe it out you make yourself responsible for the reduction in values, lack of employment, falling off in business and the hard times will inevitably follow.

THEY WILL LAY AN ADDED BURDEN ON YOUR SHOULDERS. ARE YOU READY TO TAKE UP THE LOAD?

More Drunkenness in Prohibition States Than in Those Which Have Licensed Saloons

STATISTICS FROM CENSUS REPORT BULLETIN NO. 45.

MAINE---Prohibition State.

Cities	Population	Arrests For Drunkenness	Saloons
BANGOR	22,675	1,236	0
AUBURN	13,461	98	0
AUGUSTA	12,921	109	0
BATH	11,002	215	0
BIDDEFORD	16,655	414	0
LEWISTON	24,379	374	0
ROCKLAND	8,159	285	0
WATERVILLE	19,438	126	0
TOTAL	118,541	2,967	0

Arrests for Drunkenness per 1000 Inhabitants—23
Saloons per 1000 Inhabitants—None

ILLINOIS---License State.

Cities	Population	Arrests For Drunkenness	Saloons
BELLEVIEW	18,120	161	119
BLOOMINGTON	24,278	266	75
CHAMPAIGN	10,976	435	28
DECATUR	21,772	403	62
FREETPORT	14,179	178	39
MATTOON	10,459	276	19
OTTAWA	10,888	171	43
PERKIN	9,041	117	28
TOTAL	118,813	1,995	398

Arrests for Drunkenness per 1000 Inhabitants—17
Saloons per 1000 Inhabitants—3.35

Bangor, Maine, with no licensed saloons, it being in a prohibition state, heads the list with 1236 arrests for drunkenness. The prohibitionists will say that the morals of license cities are of a lower order and that drunkenness is not looked upon as an offense.

That may be true, but bear in mind that arrests require officers of the law and jails, which the prohibitionist promised to eliminate from the list of taxpayers' burdens when prohibition was put into effect. Has this proved true in Maine or elsewhere?

The largest number of policemen are generally employed in cities that have no saloons. The reason is obvious. The absence of saloons creates blind tigers and different modes of clandestine selling of liquor and cheap substitutes. Furthermore, the destruction or curtailment of many industries, creates idleness and indolence, the plagues before which empires fall.

The prohibition politician claims that the Brewers and Distillers buy only 2 1-2 per cent of the corn crop—they try to mislead the public. The fact is that the Brewers and Distillers buy nearly 25 per cent of all corn MARKETED.

INDIAN PROTECTOR EXPLAINS WHY HE RESIGNED

William E. (Pussy Foot) Johnson Makes Grave Charges Against Superintendent Clinton J. Crandall of Santa Fe.

[By Morning Journal Special Leased Wire.]
Denver, Oct. 1.—William E. Johnson, of this city, whose office as chief officer of the department of Indian affairs, became vacant today by his resignation, issued a public statement in which he declares that his usefulness in the position which he is said to have created for the protection of the Indians had been practically nullified by an alleged cabal in the department of the interior at Washington and New Mexico.

In his statement, Mr. Johnson names Assistant Indian Commissioner F. H. Abbott of Nebraska, and Assistant Secretary of the Interior Samuel Adams, formerly a Chicago lawyer. "These two men," said the statement, "have done everything in their power to hamper, undermine and prevent the success of our efforts in catching reservation 'bootleggers.' I refused to be chloroformed, but these men finally got me so bottled up that I could do little, except mark time and draw my salary. I saw no other way to maintain my self-respect except to resign."

approximately half a million bottles of rum intended "for Indian stomachs" have been destroyed. He charges that for ten years the Pueblo Indians of northern New Mexico were systematically plundered of their pasturage, being kept in subjugation by the encouragement of drunkenness and debauchery.

Two years ago, Mr. Johnson declares, most of the Santa Clara Indians through efforts of the special service, became abstainers and assisted in gathering evidence against "speakeasies." The convert Indians are said to have secured evidence against an alleged liquor-selling drug store, at Santa Fe, Johnson alleges controlled by C. J. Crandall, superintendent of the U. S. Indian Industrial school at Santa Fe, N. M. No indictments were returned. Mr. Johnson states, because the foreman of the grand jury was a partner of Crandall's.

Johnson alleges that when Juan Cruz, one of his deputies, killed a man in self-defense, United States Commissioner Abbott ordered him to take no steps for the deputy's defense. Johnson says he appealed to superintendent Crandall and F. C. Wilson, attorney for the Pueblo Indians and said to be paid a salary by the government but both declined to assist in the defense. The W. C. T. U. eventually raised a fund for this purpose and Cruz was acquitted.

Johnson started out last night, he said, he was going to Chicago, but intimate friends here think he has gone to Washington to demand an investigation.

EIGHT CHILDREN PERISH WHEN HOME BURNS

Pennsylvania Village Scene of Horror Which Snuffs Out Lives of Sleeping Little Ones.

[Special Dispatch to the Morning Journal]

Indiana, Pa., Oct. 1.—Eight children of Mr. and Mrs. William Dias of Heshbon, near here, ranging in age from 13 years to 3 months, were burned to death today when fire destroyed the family home. The parents left the children in their beds and went to the first floor where they made an attempt to extinguish the fire.

ALBUQUERQUE, NEW MEXICO

THE LAND RING.

The chief menace to the people of New Mexico in the ticket nominated by the republican convention at Las Vegas and the men who forced that ticket through is the plan of the ring to control the disposition of the New Mexico lands.

That the members of this ring have been concerned in shady transactions regarding the public lands in the past has long been known, in a general way. That in many cases these transactions have exceeded the bounds of the law there is little doubt. But this does not mean that to victimize the people and the institutions of New Mexico it will be necessary to step over the edge of legality in the future. That the people may be virtually robbed of their birthright with out technical violation of the law if special interests control the public offices is the gravest feature of the situation. With men in office and controlling officials who are interested in these lands and who are seeking every means to accumulate vast areas of land for their own benefit, the public may lose thousands or millions of dollars without any legal redress. There is no one thing more important than to have in office men who are not thus interested, who are interested solely in seeing that New Mexico gets every possible cent of benefit from these lands; that great potential farming countries are not tied up by sheep and cattle barons or railroad interests.

New Mexico wants a governor who is not identified with the schemes of the big corporate interests and with the men who are now the landed proprietors of Socorro and Valencia counties and whose interests are first consulted; the men who take officials of the land department automobile rides over their principalities to show such officials what they want; who block the development of great fertile regions by selecting the strategic lands and water supplies and making it unpleasant or impossible for the small man to get a foothold. New Mexico needs a commissioner of public lands who is not the candidate of the land ring.

State officials are needed who will not give the big railroad corporations the best of the deal at the expense of the individual citizen and homeseeker. The people of New Mexico are not interested, for instance, in the increase of the flocks and herds and the lands of men like Francisco Hubbard and Solomon Luna and H. O. Bursum. The fact that the latter has generally come out at the small end of the horn, does not affect the situation; if he has been used by these men, he will continue to be used by them; if he has been under the influence of the corporate interests and the wealth-seekers he will remain under their influence. In any event his past affiliations make him the most dangerous candidate that could be found. The "pledges" under which he accepts the nomination constitute the most monumental bluff and hypocrisy on record. It is typical of the famous disregard the ring has for public sentiment and public intelligence that they heralded him as a "man of the people" because he smokes a pipe. If the pipe is the prime requisite for the governorship, you can find a man in every street corner in New Mexico who is fully as competent and fit and suitable as H. O. Bursum.

Bursum's hirelings shriek that it will be impossible for the governor or any one else to meddle with the public lands and that constitutional provisions fully protect them. There was never yet a law devised that could keep unscrupulous officials from abusing the power of public office; there never can be such a law and it is not the province of statutes to make public dishonesty impossible. With H. O. Bursum and his crowd in control of the administration of affairs in New Mexico, the commonwealth stands to suffer just as surely whether the ring oversteps the bounds of the law or not.

You know who Mr. Bursum represents; you know the influences which have forced his nomination on the party; you know that these men want and it is the rankest folly to tell intelligent men that Mr. Bursum will not help them get it.

EWIT—GAL. TWO

THE LIBERTÉ DISASTER.

The appalling catastrophe which resulted in the destruction of the French battleship *Liberté* and the death of some 400 of her complement of 732 men, has few parallels in naval annals. It recalls the sinking of the British battleship *Royal George*, in 1782, with the loss of 600 men, and such other British disasters as the loss of the *Captain* with 472 sailors in 1872, or that of the *Camperdown* in 1892, when 355 men perished. The Spanish *Reina Regente* went to the bottom sixteen years ago with 490 men. In the destruction of the *Liberté* in Havana harbor on the evening of February 12, 1898, 266 perished. Among the numerous misfortunes that have overtaken the French navy of recent years the closest parallel to the *Liberté* explosion is probably the loss of the battleship *Jena* on March 12, 1907, with 116 men.

An investigation in the case of the *Jena*, seemed to show that the explosion was due to the decomposition of the so-called B powder, "which might have been caused by the magazine being under the compartment containing the dynamite and by want of proper refrigerating apparatus, or, again, by some 50 per cent of the powder being more other than six years old." After the president of the investigating committee had demonstrated by mathematics that spontaneous explosion of B powder was impossible, and M. Ville, the chemist who invented it, had admitted it might explode into flames spontaneously while under observation of the committee," says Brassy's Naval Annual, and that seemed to settle the question. Further tests made plain the necessity of keeping this powder cool and keeping it fresh. It is a smokeless powder, made of gun-cotton mixed with barium nitrate and other substances, though it does not, like the DuPont smokeless powder, use nitrobenzene as a solvent. It seems more than probable that the fate of the *Liberté* was due to failure to maintain a comparatively low temperature in the magazines and to replace the stock of stale B powder with a new supply.

The *Liberté* was a magnificent vessel, and until 1903 she and her three sister vessels were the largest and finest ships of the French navy. She was launched in 1895 and completed in 1907 at a cost of \$5,022,000. She attracted a great deal of attention as she lay in the North river, off New York, with her sister ships, *Justice* and *Verite*, at the Hudson-Fulton celebration in October last. What that contemplated at that time the impressive spectacle of sombre power upon the sea could have forecast the *Liberté*'s terrible baptism of fire one year later?

The catastrophe, which has elicited the sympathy of the world, proving thereby the common humanity of those who erstwhile were mortal enemies, has also demonstrated the morale and discipline of the men of the French fleet. They did not perish in battle, but they gave their lives not the less in the faithful performance of their duty. In the case of the modern battleship, which is at once a storehouse and engineering of elaborate mechanism and a floating magazine of high explosives, the outbreak of war scarcely accentuates the constant perils to which her men are exposed in target practice and maneuvers. The sailors of the *Liberté* obeyed their orders to the last, even those whom the lightning fiery perils had driven into the sea tried to return aboard, and of the hundreds who perished the majority perhaps could have saved themselves had they not chosen to remain at their posts in the forlorn hope of preventing the destruction of the noble vessel. France mourns the fate of the gallant crew, counting the heavy financial loss as nothing by comparison, and with the grief of the stricken nation the whole world sympathizes, forgetting in the solemn truth of death itself the dread arbitrament of which 12-inch guns and armor plate are the visible reminder.

EFFECTIVE GARBAGE DISPOSAL.

Until lately American practice in the matter of garbage disposal has not been a matter for national pride. Two methods have been common: unsightly, malodorous piles of decomposing refuse have been—allowed to accumulate still are—allowed to accumulate in the vicinity of dwellings, or, cheap, ineffectual "disposal plants" installed and operated by greedy or dishonest private contractors have been run for a few years and then allowed to lapse into well-earned oblivion. Neither procedure is creditable to a civilized state. There is really no need for a continuance of the offensive and wasteful methods that have been commonly employed in this country, says The Journal of the American Medical Association.

At least two methods of garbage disposal have proved effective in typical American cities: incineration and reduction. In the incinerating type all kinds of refuse, ashes, paper, rags, scraps of food, kitchen waste, etc., are fed together into crematories and burned. In European works of this type the heat generated by the combustion with a forced draft is a source of considerable revenue. One of the best examples of an incinerator plant in this country is the Milwaukee incinerator, which has been in full operation since May, 1910. At the old Milwaukee plant the cost of disposal reached as high as \$1.27 per ton of garbage, while the cost at the new plant is less than 40 cents per ton. If the excess supply of steam generated at the plant is economically utilized the actual cost will be further greatly reduced.

In garbage reduction works the solid garbage is passed through various

digesters, tanks and roller presses with a view to extracting the valuable portions, especially the fat and the nitrogenous matters. The *Cholera* (colloid) plant, put in operation in July, 1910, is the first reduction plant in this country designed and constructed by a municipality. Successful financial operation of this plant appears in the fact that it netted \$2,000 a month for the first six months.

The reasonable and business-like way of approaching the garbage disposal question is the employment of a reputable and competent engineer to examine local conditions and report on such topics as the most economical routes for collection and transportation, the establishment and location of one or more centers for disposal and the final method of treatment—incineration or reduction—best suited to the amount and nature of the refuse gathered. Small towns should beware of the man with patented machinery. In all cases the expert adviser is better than the quack.

Madero seems to have scored his first point in the fight to restore the Diaz system of stifling opposition. If he can do this before his election to the presidency, it should be a simple matter for him to perpetrate it when in full command of the official machinery.

When the sword dropped from the hand of the statue of Bismarck, the superstitious peasants thought it meant war, others regarded it as meaning peace, but the local officials, after careful thought, have decided that it meant only that it was time to replace it.

An Oregon lawyer, who was married twelve times and divorced eleven, is finally dead. He leaves one widow, the kind the doctors make, and eleven the kind the courts make. Just fancy how long he would have lived had he remained single.

We learn with great joy that the whole power of the commonwealth of Kansas will be rallied to the support of Hinnewell's mayor. Maybe the mere men in the council will behave now.

"The Dangerous Age," the title of one of the latest imported novels, does not refer to eggs, but to woman. Presumably all ages are considered dangerous for men.

The Argentine Republic now has the two largest warships in the world—the *Rivadavia* and the *Moreno*, of 27,000 tons each. What will she do with them?

The thing most to be feared as the result of the rejection of reciprocity by Canada is Kipling's outburst of "I told you so" and "Alone, I did it!"

FOLEY KIDNEY PILLS.

Supply just the ingredients needed to build up, strengthen and restore the natural action of the kidneys and bladder. Specially prepared for backache, headache, nervousness, rheumatism and all kidney, bladder and urinary irregularities.

J. H. O'Reilly.

The Republican Czar.

(Hawell News.)

The die is cast and Hiram O. Bursum is the nominee of the republicans for the office of governor of New Mexico. This man is a well-known head of the old guard republicans, who have been in control of the affairs of the territory for more than a decade. What that branch of the republican party has represented, what has been its aims, what has been its methods in attaining those ends is all too well known to every citizen who has taken the trouble to inform himself. It may be said that Bursum is just the man and his methods, for the gang has taken his orders, for years now, as unquestioning as if they had come from on high. He has had to issue his ukase, and every puppet from Colfax to Crooks has with spontaneous alacrity sprang to do his bidding. That his absolute dominion has been as gall and wormwood to the better element in the republican party here in New Mexico is also well known. For fear of being accused of partisanship, the new states it is a fact, that there is a better element in the republican party, an element which is made up of right-minded, honorable gentlemen, men who are a credit to the citizenship of the state and who would be a credit to the citizenship of any state in this union. Let there be any misunderstanding the other way. The News adds that this better element has never a voice in the inner circles of the republican councils. This element is invited to the conventions and to the open meetings of the party houses, but it has no seat in the Sanhedrin, where the real machinations are evolved and where Bursum has presided as the high priest. This better element was at Las Vegas ready to support Nathan Jaffa, Miguel A. Otero or any other member of the party whose garments were unsold and who could so before the people with clean hands and a clear record.

But, no. The czar spoke. "Let none but loyal gangsters be put on guard." His ever ready henchmen say that the orders of their master were obeyed to the letter and respectable republicanism in New Mexico was notified to swallow the nostrum or take the consequences of his mighty displeasure.

James C. Dahlgren, "Cowboy" Mayor of Omaha, "Throws the Lariat." Mayor James C. Dahlgren started his career as a cowboy, and is at present Mayor of Omaha, and has the following record: Sheriff of Dawes county, Nebraska, three terms; mayor of Omaha, six years; and in 1870, candidate for governor of Nebraska. Writing to Foley & company, Chicago, he says: "I have taken Foley Kidney Pills and they have given me a great deal of relief, so I cheerfully recommend them." Yours truly, (Signed) JAMES C. DAHLGREN. J. H. O'Reilly.

WHAT THE FOREST RANGER NEEDS TO KNOW

Civil Service Commission Announces Examinations For Assistant Ranger in Forestry Service Last of This Month.

(Special Correspondence to Morning Journal)

Washington, D. C., Oct. 1.—The civil service commission will hold an examination for assistant forest ranger on October 23-24, 1911. The U. S. department of agriculture estimates that 400 eligibles will be needed during the field season of 1912. Assistant forest rangers are paid an entrance salary of \$1,100 per annum.

The examination will be held at National Forest headquarters in Alaska, Arizona, Arkansas, California, Colorado, Florida, Idaho, Kansas, Minnesota, Montana, Nebraska, Nevada, New Mexico, Oklahoma, Oregon, South Dakota, Utah, Washington and Wyoming. No examination will be held in Michigan.

The law requires that, when practically, forest rangers must be qualified citizens of the state or territory in which the national forest on which they are appointed is situated. Since the list of local eligibles must be exhausted before eligibles residing in other states can be appointed, the chance of citizens of outside states who go to national forest states and take the examination to secure an appointment is small.

The requirements and duties of forest rangers are thus described in "The Use Book," which contains the regulations and instructions for the use of the national forests:

"A ranger of any grade must be thoroughly sound and able-bodied, capable of enduring hardships and performing severe labor under trying conditions. He must be able to take care of himself and his horses in regions remote from settlement and supplies. He must be able to build trails and cabins, ride, pack and deal tactfully with all classes of people. He must know something of land surveying, estimating and scaling timber, logging, land laws, mining and the livestock business.

"On some forests the ranger must be a specialist in one or more of these lines of work. Thorough familiarity with the region in which he seeks employment, including its geography and its forest and industrial conditions, is usually demanded, although lack of this may be supplied by experience in similar regions.

"The examination of applicants is along the practical lines indicated above, and actual demonstration, by performance, is required. Invalids seeking light out-of-door employment need not apply. Experience, not book education, is sought, although ability to make simple maps and write intelligent reports upon ordinary forest business is essential.

"For duty in some parts of Arizona and New Mexico the ranger must know enough Spanish to conduct forest business with Mexicans.

"Where saddle horses or pack horses are necessary in the performance of their duty, rangers are required to own and maintain them. The forest service furnishes no personal or horse equipment.

"Rangers execute the work of the national forests under the direction of supervisors. Their duties include patrol to prevent fire and trespass, estimating, surveying, and marking timber, the supervision of cuttings, and similar work. They issue minor permits, build cabins and trails, oversee grazing business, investigate claims, report on applications and report upon and arrest for violation of forest laws and regulations.

"The examination will consist of questions regarding the use of the forest, supplemented by a field test to show the applicant's fitness to do the actual work of a ranger. Education and experience will be rated on the answers to the questions on those subjects in the application form and on the applicant's use of English in the written test. Horses for the tests in riding and packing will be provided by the forest service.

"The examination is under the control of the civil service commission, and not of the forest service. Information in detail regarding it, including the names of the places at which it will be held, will be sent to anyone applying to the United States Civil Service Commission, Washington, D. C.

AVIATOR RODGERS CONTINUES HIS FLIGHT

Daring Birdman Yesterday Risked Life Several Times; Expects to Fly to Chicago Today, Starting This Morning.

(By Morning Journal Special Leased Wire)

Huntington, Ind., Oct. 1.—C. I. Rodgers, who is contesting for a prize of \$50,000 in a flight from coast to coast, landed here this afternoon at 4:28 after a trip in which his life was endangered several times.

During the flight Rodgers ran into three rainstorms and for several hours was lost to view.

Rodgers says he will start for Chicago at 1 o'clock tomorrow morning.

BOY SCOUTS IN RAPID GROWTH OF RECENT YEARS

Movement Accomplishing Great Things For Welfare of American Boys Throughout Country; Great Social Leveler.

(Special Correspondence to Morning Journal)

Washington, D. C., Sept. 26.—S. A. Moffat, business secretary of the Boy Scouts of America, who recently made an extended trip to the middle west and the northwest visiting many organizations of scouts, has returned to New York enthusiastic over the growth of the Scout movement. It was his first trip of inspection and he was greatly surprised at the glimpse he got of the Scout activities in the different parts of the country. Despite that astonishment, he is convinced that the scout movement is just beginning to appeal to the boys and that its growth in the next year or two will be even faster than in the last year. The great need he says, is the employment of paid secretaries in each city to guide the scout activities. He says:

"I feel I have a larger vision of the possibilities of the movement, and have returned fully convinced of the permanency of the Boy Scout movement in this country. The relative value of the Scout movement in any community depends upon the efficiency of the local council, if the members of the council are fully alive to the opportunity which this movement presents for effective work among all classes of boys, and are willing to raise a sufficient budget to enable them to employ a local commissioner to give the work direction, there can be little doubt as to its permanency and its success in that community. If the local council, however, is not composed of men who have this vision and is indifferent concerning the questions of securing an employed secretary, then the work is bound to suffer as a consequence. Our Scout Masters for the most part are voluntary workers, and when they give one evening a week with perhaps a Saturday afternoon in addition to the boys in their care, they cannot be expected to do very much original work in preparation for the scout meetings.

"They need direction and want to feel that there is some one in the community who knows scoutcraft better than they and can help. If this advice and help is not forthcoming without a great deal of effort on their part, they become discouraged and give up the work.

"Where proper supervision is given the Boy Scout movement is doing more for the welfare of all classes of boys in the community, irrespective of class or religious distinction, than any other program of boys' work ever presented. There are cities in the middle west so thoroughly organized that every phase of boy life in the community is being reached by the influence of Scout activities. The movement is adapting itself not only to the wealthy boys of the community, but to the boys of the slums, to the new boys, and to the foreign boys alike. The Scout program is proving practicable as a civic enterprise, because it can be successfully introduced and promoted without the expenditure of a large sum of money for equipment and running expenses. A budget of from \$2,000 to \$5,000 a year will enable any community to set up an effective organization and employ a commissioner. It will be seen at once that the cost is infinitesimal compared with the possibilities for good citizenship which the movement affords.

"Although this movement has not recently been organized in this country, it was deeply impressed with the apparent effect that the Scout laws are already having in the lives of the scouts throughout the country. I have never met a class of boys of higher honor, better discipline, and more obedient to authority than the boys whom I have met on my trip. I have had abundant proof of the fact that a Scout's honor is to be trusted and that a Scout is obedient to those to whom obedience is due."

"As a social leveler, I do not know of any institution that is working out a better feeling among boys generally than the Scout movement. I have been told by boys in charge of institutions for boys, where in the past the authorities have had a great deal of trouble because of race distinctions that these same boys as scouts, know no class distinction, and are brothers in the truest sense of the word. The characters of boys of every class are being moulded by the scout teachings and precepts. I am convinced that the marvelous development of the movement in this country during the past year is but the beginning of a definite policy of work for character building, which will increase in efficiency during the coming years if carefully guided by the National and Local organizations."

BIG LINER ASHORE

FIERCE GALE RAGING

Dover, Oct. 1.—The Hamburg-American steamer *Koenig Friedrich August* is ashore between Galatz and Bourgas. Two tugs from Dover are proceeding to its assistance. A violent gale is raging in the channel.

On account of Holiday the Economy Store will be closed today. The goods advertised in Sunday's paper will be on sale Tuesday.

Grandstand Collapses: Fifty Hurt. Abbeville, La., Oct. 1.—Fifty persons were injured, a number seriously, and several hundred taken into a panic today when a grandstand at a west side park wrenched, bent and collapsed. Several had limbs broken.

SECRETARY FISHER ANSWERS CHARGES OF MONDELL

Interior Department Chief Defends Federal Policy For Handling Coal Lands; Prevents Monopolization.

(By Morning Journal Special Leased Wire)

Chicago, Oct. 1.—Maintaining that the policy of the United States government with relation to the valuation of public coal lands is not open to criticism and that it is designed to prevent monopolization and to encourage development, Walter L. Fisher, secretary of the interior, tonight made public his reply to protests against that policy submitted to him last June by Representative Frank W. Mondell of Wyoming.

Representative Mondell charged that prices fixed by the government were prohibitive, that they paralyzed the coal industry in the west, resulted in increasing the cost of coal to the consumer from fifty cents to one dollar a ton, and created a monopoly. Mr. Mondell also said that prices of coal lands in all the working fields run from \$150 to \$500 an acre, that millions of acres are at values above \$150 an acre, that prices in the better fields are in excess of those charged in commercial practice in the same fields or for better grade coal in eastern fields.

"All of these allegations," said Secretary Fisher, "are apparently based on misapprehension as to the basis on which the valuation is made. The prices placed on coal lands and as to the effect which the classifications have on the sale of public lands.

"The prices now fixed," he continued, "are designed not to create a monopoly in the lands of present owners of coal lands, but to prevent monopoly by making it unprofitable to purchase large areas for indefinite holding before development.

"This, in fact, is the constant aim of the department in fixing prices which it puts upon public coal lands—to make them low enough to encourage purchases for immediate development, yet sufficiently to discourage purchases for long time holdings for speculation or for monopolization.

"In view of all the facts, however, I am convinced that the prices now being placed on the public coal lands are neither unreasonable nor exorbitant, and that the increase in sales of coal lands for the four-year period subsequent to July 1, 1907, in comparison with the preceding four years' period, together with the present condition of the western coal industry, demonstrates conclusively that the present classification policy is not open to the criticism which you make."

Secretary Fisher suggests that a liberal but wisely protected leasing law might be found to promote development more vigorously than any system of outright purchase, such as has been the case in Australia and New Zealand and adopted by Canada in its Yukon territory.

Referring to Mr. Mondell's charge that millions of acres are at values above \$150 an acre as "the

Goes Farther, Costs Less, than Soap

For general household cleaning, soap in powder form is more economical and efficient than in the bar. Gold Dust, one of the first powders—and still the best—can be used more economically than soap, because the quantity desired can be measured out and no more used. In using soap in the cake there is waste, more being used than is really needed; the rest of the cake is water-soaked, causing the soap to lose its goodness. Moreover, Gold Dust contains other ingredients, which soften the hardest water and allow the soap to do its work with little rubbing.

BIG SHAM BATTLE AT THE FREMEN'S TOURNAMENT

Fierce Engagement Between
Militia and Fire-Fighters at
Clovis; Event Proves a Big
Success.

[Special Correspondence to Morning Journal]
Clovis, N. M., Sept. 30.—The firemen's tournament being held at this place, increases in interest and enthusiasm as the end draws near. Last evening's splendid showing with the militia and the sham battle on Grand avenue was unusual and very much enjoyed by all. The soldier boys showed the effects of the splendid training given them by Lieutenant Heering and responded in concert to every order given. The popping of the guns and the smell of the gun-powder, pictured the real battle with the exception of the blood.

After the militia had driven the armed fire boys from the street, and immense pile of boxes, papers, etc., saturated with oil, was set on fire and the wild cat whistle added to the popping of the carbines, made a noise calculated to make the hair stand on end. Chief Chaffant and his firemen responded to the call and made an excellent showing.

Today is the last and the "big day" of the tournament. The farmers are bringing in their exhibits, and this feature of the day's program under the management of Harry Armstrong, will in all probability play an important part in the general enjoyment of the day. The streets this morning at 10 o'clock are crowded with wagons loaded with farm products, that are a great surprise to the spectators.

Big Event.
Clovis, N. M., Sept. 30.—The fourth annual convention of the New Mexico association of firemen, which is in session in this city this week, is providing one of the biggest events in the history of the organization of the association, and all Clovis is turning every hand to do justice to the visiting delegates and their friends.

The firemen arrived yesterday and today, and will depart on Sunday, after having participated in the days of fun and frolic and business. President P. B. McElroy of Las Vegas, headed the Las Vegas delegation here and is cooperating with Clovis Chief G. H. Chaffant in making this one of the best meets ever held in the territory.

The program of the three days opened at the city hall Thursday night with the welcome address of Hon. T. J. Mabray, who, on behalf of the mayor of the city, turned over to the delegates the keys to the city. After the address came the response by President McElroy of the association and then followed short talks by delegates from Las Cruces, Santa Fe, Roswell and the delegates representing the Texas association, who came to join with the New Mexico boys in making this a big week for the firemen.

The school children, led by Superintendent V. L. Griffin, numbering nearly 700, marched behind the band, and the firemen followed in parade Friday, which proved a very spectacular show. Each grade was classed and the children carried banners showing the number of their grade.

There will be basket ball and foot ball and track work at the park 8:30 afternoon and the meet will end with the contest which will be pulled off today and the big "water-tight" scheduled for late this afternoon.

USING AIR DRILLS AT HILLSBORO

Statehood Mines Company and
Others Adopting Modern Ap-
paratus in Developing Sierra
County Properties.

[Special Correspondence to Morning Journal]
Hillsboro, N. M., Sept. 30.—That the Statehood Mines company intends to put in air drills is pretty well authenticated. The decision to place air drills in the mines, it is said, was reached after some very encouraging assays had been returned on the ore which was shown in the lower levels and which are now being timbered and placed in shape for active mining. The assays are considered to have run from \$25 to \$75 a ton, and it is calculated that with air power this ore could be extracted with profit. That it pays to mine ore of this value was by means of air drills was demonstrated by the Sigma Construction company on the Wicks mine near Hillsboro, where ore of similar and somewhat higher value was removed with a good profit. That these ores could be mined profitably by hand has been sufficiently and conclusively proven in the past by the failure of more than one company to make much high grade ore pay by hand drilling. The whole question of profit in the Hillsboro district resolves itself into one of cost of production, as it has been shown that this district has the ore. Experienced drill miners have been engaged to begin work on the Snake mine No. 1. Last week the statehood made a satisfactory run on some ore taken by levers from the three hundred-foot level in this mine.

A. G. Veis, former superintendent of the Sigma Construction company, who mapped out the work for the development of the Wicks mine near Hillsboro, expects to arrive in Hillsboro with his family in a few days. He is at present in Port Angeles, Wash., having concluded the construction work in which he was engaged in Texas City. The backers of the Sigma Construction company have heavy interests in and about Seattle.

SHERIFF BALLARD IN MARATHON

Pecos Valley Official Nabs Flee-
ing Prisoner in Six Block
Race; Big Wool Clips Sold in
Roswell.

[Special Correspondence to Morning Journal]
Roswell, N. M., Sept. 30.—When the deputy sheriff left the court room momentarily today, A. Gillon, who was on trial for assault upon Mrs. L. M. Spillman, bolted from the presence of his honor, Justice R. D. Bell, and made an attempt to escape. Sheriff Ballard was standing at the foot of the stairs and followed the prisoner soon after he was passed by the other man. The sheriff caught Gillon after a half-block run, but as soon as he was caught and had secured his second wind, the prisoner jerked loose and ran again. It was a five block race this time, but the sheriff was the final winner. Gillon was then brought back, tried and sentenced to thirty days for calling Mrs. Spillman "damned names" and making other salutations. Gillon will also be tried for resisting an officer and for an assault upon a 16-year-old girl. He has been driving the sprinklers. Both of the women are unacquainted with him.

Aeroplane Arrives.
The two Curtiss machines that are to piece the pure New Mexico air in Roswell during the Products Exposition October 5-6-7, arrived today, accompanied by James McCarthy, one of the birdmen. Waiting brothers, who complete the company, arrive tonight. Trial flights will be made as soon as the machines can be unloaded. The aeroplanes came in a special car from Junction City, Kas., where the last flights were made.

Big Wool Clip Sold.
During the past few days the following big clips have been sold and shipped to Boston from the Roswell warehouses: Louis Mencke, 80,000 lbs.; Kling Brothers, (1910-1911 clip) 69,000 pounds at 11 1/2 cents; C. C. Martin, 140,000 pounds; G. F. Billings, 125,000 pounds; E. Echeverry, 70,000 pounds; Ira Barney, 66,000 pounds; Zamas Land & Live Stock company, 50,000 pounds; total, 591,000 pounds. Echeverry's clip brought 16 1/2 cents. The clips of Martin, Billings and Mencke, composing a majority of the whole, brought 15 cents.

A Medicine That Gives Confidence.
Is Foley's Honey and Tar Compound. Mrs. T. J. Adams, 522 North Kansas avenue, Columbus, Kas., writes: "For a number of years my children have been subject to coughs and colds, so I kept it in the house all the time." Refuse substitutes.
J. H. O'Reilly.

YOUNG MAN IS ARRESTED FOR ASSAULT

Paul Ross Charged With Stat-
utory Offense By Josepha
Gutierrez, Pretty Alvarado
Laundress; Hearing Today.

On complaint of Mrs. Mary Gutierrez, Paul Ross, a young married man, was arrested last night by Night Marshal O'Grady for a statutory offense, alleged to have been committed upon the person of Josepha Gutierrez, a pretty native girl, who works at the Alvarado laundry, and is under the age of fifteen years.

The matter will be referred to the grand jury for Bernalillo county, which is now in session. According to the statement made by Mrs. Gutierrez to the police last night, immediately prior to the arrest of Ross, the little girl, Josepha, was proceeding to her home on Saturday evening, after completing her day's work, when she was stopped outside 420 South John street by the defendant, with whom she is well acquainted, with the request that she come in and see his wife. The girl who knew the wife of Ross very well, little suspecting the intention of the young man, went into the back room of the house where it is alleged she was forced to surrender to his wishes.

She was so frightened after this that she failed to tell her mother of the occurrence until yesterday evening, immediately after hearing the story from her daughter's lips, Mrs. Gutierrez hunted up the police, and made complaint against Ross, charging him with the offense.

Ross when arrested last night, took the matter coolly and stated that he was convinced from the talk of Josepha Gutierrez, that she would have no objection to his action, and, in fact, she herself, offered to go see his wife, otherwise he would not have attempted what he did.

The girl in the case, who has but just turned 14 years of age, was yesterday very sick as a result of the trouble in which she has become involved.

Mrs. Ross, the mother of the defendant, was arrested last evening by Officer Salazar charged with being intoxicated and disorderly. Both mother and son spent the night in the city jail.

A preliminary hearing in the case will probably be had today before Judge Crain.

YOUNG MAN IS MAY NAME MR. ELY FOR LEGISLATURE

Luna County Republican Con-
vention Meets and Selects
Nominees for County Offices;
Woman for Superintendent.

[Special Correspondence to Morning Journal]

Deming, N. M., Sept. 30.—The republican convention of Luna county met at the city hall in Deming this afternoon. C. J. Kelly, chairman of the central committee, called the convention to order at 3 o'clock. He was also elected as the temporary chairman for the meeting of today, and later elected as the new permanent chairman, committees on credentials, resolutions and permanent organization were appointed and the reports of these committees were read and adopted. A committee consisting of N. A. Bolch, D. D. Schulz and P. K. Conway was appointed to confer with Hon. R. C. Ely to ascertain whether or not he would accept the nomination for the legislature. The following were nominated for office: Commissioner for the first district, Harry V. Whitcomb; second district, A. O. Bailey; third district, J. M. Williams. The nomination of county judge was left to the committee appointed to await upon Mr. Ely. For county clerk, R. H. Case, Sheriff, D. B. Stephens, Assessor, Jno. Steinhorn, Treasurer and collector, Chris Rathel, Superintendent of schools, Sally C. Stone. County surveyor, H. E. Baldwin, Jr. Most of these nominations were made by acclamation. It took five ballots to decide on the nomination for county surveyor. All of the precincts in the county were represented except precincts 3, 4, 6 and 7.

F. W. Weizler was taken to the general hospital of the Santa Fe at Las Vegas Thursday night. Mr. Weizler is an operator who has been employed at Deming. He was bitten by some poisonous insect on the face which developed into a very severe case of blood poisoning. Raymond D. Gary of El Paso, Texas, is the new operator at the Santa Fe.

J. J. Oliver, who has recently been employed at Hurley came to Deming last night for medical attention. While he was working on the second story of the concentrator he fell to the ground and received a compound fracture of the left arm above the wrist.

After exposure, and when you feel a cold coming on, take Foley's Honey and Tar Compound. It checks and relieves. Use no substitute. The genuine is a yellow package always.

J. H. O'Reilly.

lands. The regiment was recently mustered in at Fort Leavenworth, Kan.

Deputy Sheriff Montoya informs the Journal by telephone that the article appearing in these columns a few days ago, stating that in the San Juan county republican convention two nephews beat up their uncle is a mistake. The facts of the occurrence are that Marcus de Bues bolted the convention, walked out and started insulting all to himself, and that there was no interference on the part of his nephews. In fact they actually enjoyed seeing their uncle develop progressive ideas.

DEMOCRATS TRAVEL IN SPECIAL PULLMANS

Pecos Valley Delegations to Santa Fe Convention Inadequate Albuquerque in Force; Chaves County Uninstructed.

Traveling in specially chartered Pullman cars, the eastern New Mexico and Pecos valley delegations to the first democratic state convention invaded Albuquerque last night, remaining here until this morning when they will leave for Santa Fe on train 10.

The delegation from Chaves county goes to Santa Fe absolutely uninstructed and several of the delegates called attention to an unfortunate error which appeared in a Roswell paper to the effect that the delegates were instructed for Ferguson (for governor). It is, they said, not the practice of the democrats of Chaves to instruct their delegates. Men are always selected who have the confidence of the party that they will vote for the strongest men, for the various places on the state ticket. Chaves county has two delegates who are considered as receptive candidates for office. These are W. A. Dunn of Roswell, for the supreme bench, and Lucius Dills for member of the corporation commission. John W. Poe of Roswell, is also mentioned as a possible candidate for governor, though so far as can be learned, Mr. Poe has given no intimation that he desires the nomination. Following is a list of the Chaves county delegation: John W. Poe, J. W. Stockard, T. D. White, C. C. Hill, L. B. Tamm, James Williamson, W. M. Atkinson, Juan Rubio, Dave Calderon, J. H. Madron, K. K. Scott, W. L. Rodney, O. A. Davidson, J. E. Hinkle, John L. Hinkle, M. L. Finley, W. E. Rogers, W. T. Joyner, Lucius Dills, W. T. Taylor, M. K. Rowden, F. L. Mohop, W. A. Dunn, W. L. Dadey, J. F. McClure.

The county delegation, which also arrived last night, is made up as follows: T. J. Mahy, successful candidate at the recent primaries for the nomination as state senator; H. D. Terrell, the unsuccessful candidate for the same position, who takes his defeat with the utmost cheerfulness; W. J. Curran, S. A. Jones, O. L. Owen, Charles Stead, H. L. Patton, S. L. Brown, Charles Brown and Samuel Stevens.

The Eddy county delegation, which goes to Santa Fe uninstructed, consists of Allan C. Board, F. B. Richards, Scott Elder, John L. Emerson, Joseph Cunningham and James Barber.

Roosevelt county has a favorite son for congress and has instructed her delegates to work for the nomination of Julius W. R. McGill for congressman, otherwise the delegates are uninstructed.

Following is a list of the delegates: W. R. McGill, E. P. Albridge, A. A. Boardman, A. J. Evans, J. B. Priddy, J. O. Wood, C. A. Foster, R. A. Bain, H. B. Ryther and H. E. Carter. H. B. Ryther and A. A. Boardman are the band commanders of the 10th Cavalry, who last night en route for San Francisco, where they will embark for a tour of duty in the Philippine Islands.

J. Porter Jones, once a well-known resident of Albuquerque, but now a confirmed Roswell booster, accompanied the Chaves county delegation. Mr. Jones has retired from participation in politics and is just now engaged in the somewhat strenuous

occupation of selling Pecos Valley farm and orchard lands for one of the leading real estate firms of Roswell. His mission to Albuquerque and Santa Fe is to see to it that the Roswell Products exposition is properly advertised. In this he has the cooperation of the entire Pecos valley delegation.

Biliousness is due to a disordered condition of the stomach. Chamberlain's Tablets are essentially a stomach medicine, intended especially to act on that organ, to cleanse it, strengthen it, tone and invigorate it, to regulate the liver and to banish biliousness positively and effectively. For sale by all dealers.

QUALIFICATIONS OF SUPERINTENDENTS

Important Resolution On Matter Passed By New Mexico Board of Education at Recent Meeting.

The following circular letter is being sent out by State Superintendent of Schools, J. E. Clark: Whereas, Chapter 97, Laws of 1907, entitled "An Act to revise and to systematize the school laws of the territory of New Mexico and for other purposes," was enacted by the 37th Legislative Assembly of the Territory of New Mexico, Section 18 of said act providing as follows, to-wit: "Sec. 18. County superintendents of schools shall be elected by each county at each general election, and shall enter upon the duties of his office on the first day of January following his election. Said county superintendents shall hold office for two years, or until his successor shall have been duly elected and has qualified, unless sooner removed for cause."

From and after the date of passage of this act, no person shall be eligible to the office of county superintendent of schools who is not a person of culture and practical experience and learning in those branches of education taught in public schools, as provided by law; and a person of good moral character, such qualifications to be passed upon and approved by the board of examiners of each county; provided, this section shall not take effect until January 1st, 1909.

Any person or persons who shall directly or indirectly cause any portion of the public school fund to be paid to any person for services as county superintendent of schools who shall not have filed with the county treasurer a certified statement of the qualifications hereinafter mentioned shall be guilty of a misdemeanor and upon conviction thereof shall be fined in the sum of not less than one hundred (\$100.00) dollars nor more than five hundred (\$500.00) dollars for each and every offense, and may be removed from office as provided by law.

In case no person having the qualifications as herein provided for county superintendent shall be elected in any county, then upon nomination of the territorial board of education, the board of county commissioners of said county shall appoint as county superintendent a person having such qualifications, who shall fill the office until a properly qualified person shall have been elected by the people of the county, or until a successor shall have been appointed and has been duly qualified. And,

Whereas, Chapter 121, Laws of 1909, entitled "An Act to revise and systematize the school laws of the Territory of New Mexico and for other purposes," was enacted by the 28th Legislative Assembly of the Territory of New Mexico, Section 11 of said act providing as follows, to-wit:

"Sec. 11. Section 18, Chapter 97, Laws of 1907, is hereby amended by substituting 'Territorial Board of Education' for the words 'board of examiners of each county' in line four thereof." And,

Whereas, the members of the territorial board of education, now assembled in the city of Santa Fe, New Mexico, on this 15th day of September, A. D. 1911, being desirous to prevent any complication that may arise from the people electing persons that may not conform to the provisions of the law as set forth in the above acts, make the following statement in reference thereto:

That any person to be eligible under said act for the office of county superintendent must show that he or she has been educated in the following branches: Reading, penmanship, orthography, English (grammar and composition), geography, arithmetic, physiology and United States history. "Practical experience in those branches taught in the public schools" is interpreted to mean that the candidate must have had at least one year's experience in teaching in the public schools or have had experience in supervising the public schools.

Yours very respectfully,
J. E. Clark,
Territorial Superintendent Public Instruction.

CHURCH COMPLETES CONFERENCE SESSIONS

Appointment of Preachers For Ensuing Year Announced By Bishop; Rev. Charles Oscar Beckman Remains Here.

The New Mexico English Mission and the New Mexico Spanish Mission conference closed their labors with the asking and answering of Question 12 in the routine of conference sessions. "Where are the preachers stationed next year?"

The general routine business of these conferences is always recorded in the form of questions and answers, and the last question to be answered, always answered by the bishop, is question 12. With the reading out of the appointments, the preachers set their faces toward the new year, many of them going to new charges, meeting new people and new conditions, breaking friendships that have been formed during their former pastorates, and otherwise exemplifying the itinerant, or traveling idea. The New Mexico Mission which has just closed is no exception to the rule, and yesterday's assignments contained some surprises for the preachers.

The lead avenue church congregation was unanimous in its request for the continuance of Rev. Charles Oscar Beckman as the pastor of the church for another year, and considering Mr. Beckman's success here, the bishop looked kindly upon the request and Mr. Beckman will continue as pastor of the First Methodist church.

The feature of the morning services, outside of the stationing of the preachers, was the ordination service conducted by Bishop Quayle, assisted by the other officers of the conference, and a number of leading elders of the Spanish Mission conference.

Rev. Hubert W. Clark, who was elected to deacon's orders during the sessions of the conference, was first called to the rostrum and asked the customary disciplinary questions; then Rev. C. E. Lindquist of Santa Fe, who was elected to membership in the conference, was called to the front, and Bishop Quayle took occasion to administer some timely advice to the young man, as to his conduct, and the ordering of his sash so as not to draw down upon him and the church the reproaches of the sneers and jeers of people who do not believe as he does.

At this juncture Bishop Quayle caused a general laugh to swell over the large audience by asking Mr. Lindquist plainly if he would abstain from the use of tobacco. Before the candidate could answer, the bishop cut in with, "Wait a minute. I want you to understand," said he, "that the

church does not ask you to refrain from using tobacco to be religious, but just to be decent, that's all."

Again when inquiring if the candidate would diligently preach the doctrines of the church, and visit its membership, and strive for its upbuilding, the bishop said, "We do not ask you to necessarily believe all the doctrines of the Methodist church, what we ask and require is, that while you are employed in the ministry of this church that you will preach its doctrines—not the doctrines of any other denomination. A man who accepts his living from the Methodist church and then preaches Unitarianism in Methodist pulpits, is a traitor."

"And further, young man, do not be afraid to use your legs, you have twice as many legs as you have head, and further the work of the Lord by using the numerous parts of you diligently and to good account. Further, as soon as you are able, take out some life insurance. Every preacher ought to consider it a religious duty, that he owes to his wife and the community in which he lives to take out life insurance. The church is not rich enough to take care of you altogether when you have gotten beyond the years of usefulness, nor to care for your wife when you are dead, and you have no right to make your wife's life harder after you are gone than it was before, nor have you a right to make it so easy for her when you die that she will not miss you, but provide for her after you are gone just as you would when you are here."

With the closing of this wholesome advice, Bishop Quayle called Rev. J. M. Shimer to the altar, and the three young men, who have been set apart for the ministry were ordained, to their respective orders, by the laying on of hands.

The closing resolutions of the conference thanking the people of Albuquerque for the entertainment of the sessions of the conference were adopted, and a further resolution thanking the Morning Journal for the excellent manner in which it had treated the sessions of the conference was also adopted.

Bishop Quayle preached the morning sermon, and following that the following appointments were announced.

New Mexico English Mission.
S. Alonzo Bright, D. D., superintendent.
Alamogordo—Ed. LeBreton.
Albuquerque—C. O. Beckman.
El Paso—To be supplied by J. M. Shimer.
Clayton—To be supplied.
Clayton Circuit—Supplied by C. S. Martin.

Columbus—Addis Ababa.
Des Moines, Folsom and Johnson's Mesa—L. F. Athey.
El Paso—C. J. Dickey.
Española—C. F. Lucas.
Estancia and Mescal—B. F. Summers.
Fort Sumner—S. E. Turner.
French and Maxwell—H. W. Clark.
Hillsboro—Supplied by C. H. Boddington.

Las Vegas—E. C. Anderson.
Nara Vista—C. E. Lindquist.
Raton—Bernard Gibbs.
Roswell—H. Van Valkenburg.
Roy—Supplied by T. A. Windsor.
Santa Fe—To be supplied.

Materials For Bathrobes

A good looking, inexpensive material from which to make warm bath robes is an eiderdown of thick fleecy cotton which closely resembles wool in texture.

It comes in a variety of colors and suitable designs—is 27 inches wide and is priced at 35c a yd.

Hair-Ribbons

Crisp Taffeta Ribbon, with wire edge, designed especially for hair-bows, in 5 and 6 inch widths, is priced at 25 and 30c a yd.

Buttons

Buttons are extensively used this season for trimming. Their distinguishing feature is their severe yet rich plainness. Possibly the most novel item in the collection is an agate made in a three-tone effect.

FERGUSON & COLLISTER
