Report On Funding For Six Electricity Plant Projects

by Carlos Navarro
Category/Department: General
Published: Wednesday, November 25, 1992

On Nov. 22, the Federal Electricity Commission (Comision Federal de Electricidad, CFE) reported that construction of six new electricity plants over the next several years will be financed by development banks and private sources. The five plants will have a combined generation capacity of 5,060 megawatts. According to the CFE, the International Bank for Reconstruction and Development (IBRD) and the Inter-American Development Bank (IDB) will provide loans for construction of the Agua Milpa plant in Nayarit state and the Zimapan facility in Hidalgo state. Private financing will be used for the Adolfo Lopez Mateos thermoelectric plant in Veracruz state, the Topolobampo thermoelectric plant in Sinaloa state, the Carbon II plant in Coahuila state and the Petalco plant in Guerrero state.
