## WASHINGTON MATTERS.

## ANTICIPATES A RUSH.

WASHINGTON, Aug. 9.—Sec. Noble has requested the war department to take the necessary steps to keep intruders from the Sioux reservation. This action taken in anticipation of the rush of settlers, now that the success of the Sioux commission is assured.

## APPOINTMENTS.

The following appointments have been made: Thomas W. Blackburn, of California, chief of the educational division in the office of commissioner of Indian affairs; Frank M. Jones, of Iowa, special agent; and Henry S. Wilson, of Colorado, has been appointed a chief of division in the census office. Salary \$2,000.

## The Relinquished Land.

WASHINGTON, Aug. 8.—Sec. Noble has sent the following telegram to the Sioux commissioners: "My congratulations and sincere thanks for your able efforts and great success. You have done a great work for humanity. Indians included. Have sent your telegram to the president, who is in Boston today."

According to the act of congress under which the agreement with the Indians has just been consummated, the undersigned portion of the Sioux reservation is divided into six reservations, as follows: Standing Rock, Cheyenne River, Lower Brule, Crow Creek, Pine Ridge and Rosebud. It states that a large portion of the relinquished part of the reservation divides them into sets of two, one set being on the northern end of the reservation, another one on the eastern, and a third on the southern. The land thrown open to settlement will aggregate about 11,000,000 acres, and will be disposed of by the United States to actual settlers only, at the following rates: One dollar and twenty-five cents per acre for all lands taken within the first three years after the act takes effect; 75 cents per acre for lands disposed of within the succeeding two years; and 50 cents per acre for residue of lands then undisposed of. The act provides that the agreement as now entered into must be approved by congress at its next session for ratification. Mr. A. T. Lea, agent of the interior department, is now in Dakota, and has been ordered to proceed to take a census of the Indians, with a view of ascertaining how many are able to support themselves, and in their physical capacity to work lands owned or occupied by them either individually or collectively; the value of land, its nearness to market, its general productiveness, and such other facts and circumstances as will assist congress in determining how many Indians are capable of self-support.

## Marvelous Immigration.

WASHINGTON, Aug. 9.—Before leaving Buenos Ayres for home, United States Minister Hanna wrote a short report to the state department on immigration into the Argentine Republic. He says that the settlement from all countries of Europe of emigrants is marvelous. They were generally assisted by the Argentine government to the extent, at least, of having their passages paid from the starting point to their destination in the interior. The amounts thus paid in March is estimated at \$1,000,000, or at the rate of \$12,000,000 a year.

Already this vast influx, the minister says, is beginning to tell on exports of corn. Last year the country shipped 44,000 tons of corn. This year it will go above 2,000,000 tons. Mr. Hanna further says: "In the vast fleet of merchant ships and great steamers coming here to trade from every European port to the United States flag is rarely seen, but it is hoped and believed that the policy of the new administration on the subject of encouraging steam navigation between the United States and South American ports will successfully solve this embarrassment."

## Two Miles a Minute.

BALTIMORE, Aug. 7.—On a two mile circular track the startling speed of two miles a minute was yesterday maintained for about ten miles by a three-ton motor of the Electric Automatic Transit company, of Baltimore. This speed is equal to three miles per minute on a straight track. David G. Weeks, inventor, conducted the experiment. The company will build at once a five mile circular track on Long Island to demonstrate the practicability of the electric and automatic system which was tried today. It is intended only for light express packages, mail and newspapers. Edison pronounced it the greatest conception since the introduction of the telegraph. The road will be fenced in with barb wire to keep off cattle, and insulated wires will be used for telephone and signaling along its line.

## A Scrap of Paper Saves Her Life.

It was just an ordinary scrap of wrapping paper, but it saved her life. She was in the last stages of consumption, told by physicians that she was incurable, and could live only a short time; she weighed less than seventy pounds. On a piece of wrapping paper she read of Dr. King's New Discovery, and got a sample bottle; it helped her, she bought a large bottle, it helped her more, bought another, and grew better fast, continued its use and is now strong, healthy, rosy, plump, weighing 140 pounds. For fuller particulars send stamp to W. H. Cole, Druggist, Fort Smith. Trial bottles of this wonderful discovery free at C. M. Creamer's drug store.

## Sad and Peculiar Case.

St. Louis, Aug. 8.—Darwin W. Pratt, who was the S. Lou agent for the McCormick Harvesting Machine company, of Chicago, went to the state penitentiary at Jefferson City last night and surrendered himself. Post, the book-keeper, embezzled, and on his statement Pratt was indicted as an accomplice, tried and sentenced to three years in the penitentiary. This was several years ago, and the supreme court has just affirmed the decision, which sends Pratt to the penitentiary. It is believed that he is innocent, and that he will be pardoned by Gov. Francis. Pratt formerly was highly respected, and the case is a very sad one.

## Rather Sensational.

ELIZABETH, N. J., Aug. 8.—There is a mysterious man here known as "Jack the Peepster." It is thought he is a sort of monomaniac on the subject of gazing on chignons. Within the past four months he is known to have entered twenty-five houses. He goes armed, but his object is not robbery for he never takes anything. He always seeks out the women's bedrooms. In nearly every instance the inmates have been awakened by his entrance, but he always has managed to escape, and has thus far eluded the vigilance of the whole police force.

## Establishing the Boundary.

TORONTO, Aug. 8.—The geodetic survey

party sent out by the United States government to definitely determine and establish the Alaskan boundary is now at work. They stopped at Oumak, where soundings were made and the variation of the magnetic needle ascertained. The surveyors, with their stores, were backed at the mouth of the Yukon river and proceeded on their way. The interior department is thinking of sending an expedition to assist the United States party, but nothing as yet is definitely settled. It is believed the survey will be completed in about two months, and proceeding by boat up the Yukon, winter there and continue operations next year.

## The Irrigation Commission.

MILES CITY, Mont., Aug. 8.—Senators Stewart and Reagan, of the United States senate commission on irrigation, arrived here yesterday, accompanied by Major Powell, director of the geological survey. A meeting was held and many old irrigation questions as to the need of irrigation here and the results that would follow its adoption.

## Not Told.

LOUISVILLE, Aug. 8.—Gov. Beckner today received a photograph of the man arrested at Scottsboro, Ala., as ex-convict Tate. The only resemblance to the fugitive was in the mustache, and men who have known Tate for many years say that he could not possibly be the man corresponding to that photograph.

## Colorado Outlaws.

DENVER, Aug. 9.—No trace has been had of the Thompson Springs, Utah, train robbers. Both the Rio Grande railway and express companies will offer large rewards for the capture of the outlaws, and several well organized parties have left Grand Junction and Green River in pursuit. It is the opinion of the officers that the robbers are the same gang who some months ago successfully held up the Telluride, Colo., National bank for \$43,000.

## TERRIBLE SCENES.

A Yacht Explosion at Buffalo and the Destruction It Brought.

BEHRAID, N. Y., Aug. 8.—Yesterday afternoon the Steamer "Hesperus" left Buffalo on the foot of Perry street bound for two explosions in quick succession from the boat house of L. B. Crocker, superintendent of the New York Central stock yards, in which his pleasure yacht, the "Edgar Rice," was stored. Immediately following the explosion, the boat burst into flames, which soon made a furnace inside. Simultaneously with the explosion two or three persons were thrown into the water as if from the force of the charge. Caleb Polson got a lion and a pig, and a woman, Miss McLean, aged 28, from a water tank was badly injured and was taken to the hospital.

At this time the form of Mr. Crocker's young son was seen standing on the boat deck against the background of fire. Charlie Schmeitzel seized a pike pole and extended it to the little fellow until it almost touched his breast, and at the same time crying to him to grasp it and he would rescue him. But the little fellow seemed paralyzed, and in a moment fell back into the fire and burned to a crisp before the horrified gaze of the onlookers. Schmeitzel's arm was burned from his attempt to rescue the boy.

But now attention was directed to a carpenter clinging to a rafter just over the blazing boat. For a few moments he clung desperately on his perch and then, as if stupefied by heat and suffocated by smoke, he loosened his hold and tumbled down, another victim, into the furnace below. His name was John Rugenstein, 33 years old, married, and leaves a wife and five small children. Other children of Crocker, Leonard Lennel, a son aged 9 years and 10 months, and Ethel, a daughter aged 1 year and 9 months, perished in the flames. Another girl, Charlotte, aged 14, was blown into the water and rescued therefrom and sent along with Miss McLean to the hospital. The yacht is what is known as a naphtha launch.

The accident was caused when the engineer lit a match, for the ignition of fuel, by some gas which had leaked out. The family was preparing to go on a pleasure trip, and Mr. Crocker had taken his four children and Miss McLean, a lady friend from Detroit who is stopping with the family, to the river for an excursion. Crocker himself barely escaped with his life. He is almost insane with grief. His wife has been ill for some time and this grief will probably kill her. The condition of the other daughter and Miss McLean was reported serious, but not necessarily fatal at a late hour last night.

## Antonio Notes.

ANTONIO, Colo., Aug. 9.—Messrs. Jenkins, Ferguson & Co., contractors for building the new court house at Conchos, commenced excavating the basement last Monday. They also have a large force of men at work in the stone quarry of Antonio, seven miles distant.

The main building only will be completed this fall at a cost of \$14,000. The wings will be added as they are required. The fall will be in the basement. A great many new buildings are being erected at the present time in Antonio. Hon. Francisco Sanchez is erecting a large two-story brick, 2x75 feet, on Main street. The second story will be used for a Masonic lodge room; the ground floor for a wholesale and retail hardware store. A gentleman from Brooklyn, N. Y., has purchased a block of lots, and guarantees to erect sixteen residences within the next twelve months.

Messrs. Sampson and Butler, real estate dealers, are doing a rushing business in disposing of town lots.

The new Catholic church, located half way between the two towns, is being pushed to completion.

The Huntingt. n. seminary, under the auspices of the Presbyterian church, commences the first Monday in September. There are many strangers arriving in town daily, and buying property with a view of locating.

## The Maybridge Case.

LIVERPOOL, Aug. 8.—Thousands awaited the judge's departure from court yesterday after passing sentence on Mrs. Maybridge and howled with rage when he appeared. The shouting was incessant and there was frequent cries of shame. The crowd threatened to attack the judge's carriage, but the police interfered. The feeling over the result is intense. Steps are being taken to stay the execution, further medical evidence having been secured.

## Chaunoyus Topics.

CHATAQUA, N. Y., Aug. 9.—In a powerful and eloquent lecture on Pope Hildebrand, Dr. Frank W. Gussulius, of Chicago, yesterday traced the rise of "papism" in the church of Rome. He denounced the renewal of temporal power and declared that the ex-papine Wilkes Booth was caught entangled in the folds of the American flag, so many Roman pontiffs who aimed at temporal authority in the United States would be smothered in the ample winding of stars and stripes.

## AND STILL ANOTHER.

A Rush of Train Robberies in All Parts of the Country.

MINNEAPOLIS, Aug. 9.—The Wisconsin Central passenger train from Chicago to St. Paul passed Chippewa Falls, Wis., at 10 o'clock yesterday morning, was held up and robbed by a single man, between Chippewa Falls and Abbotsford a half hour before. At the hour named a man entered one of the sleeping cars of the train and compelled the conductor and porter to throw up their hands, then proceeded to go through them, taking all they had. One of the passengers was robbed and a shot or two was fired at the porter, but no one was hit. The robber pulled the bell rope as soon as he completed the robbery, and when the train came to a stop he jumped off and made good his escape.

The man is described as having the appearance of a woodman, wore a slouch hat, carried a gun and had a big knife in his belt. He entered the sleeper and drove the porter to one end of the car. The porter did some yelling to awaken the passengers, whereupon the robber fired. This put a quietus on the porter. The robber took from the conductor \$5 and a silver watch. From the porter a gold watch and a small amount of money and from a passenger some money and a watch. He neglected to take anything from the latter told him the conductor had all his money. As a matter of fact, however, the man had \$500 on his person at the time.

## Army Affairs.

The dress parades which take place daily at Fort Marcy are pleasant features of life in Santa Fe, and invariably attract a large company of spectators.

A tabulated statement of the rifle competition for the department of Arizona August 5, 6 and 7 is now issued. There were thirty-two competitors. A Robinson, sergeant company E, 8th infantry, made a total of 431, and B. G. Chisholm, corporal company F, 11th infantry, total 430. The lowest man was P. Hellman, company B, 10th infantry, total 292.

Capt. Montgomery, 13th infantry, and 1st Lieut. H. S. Bishop, 5th cavalry, are detailed as members of the general court martial convened at Fort Supply.

1st Lieut. A. C. Macomb, 5th cavalry, a distinguished marksman, has been ordered to Omaha, to report to the commanding general department of the Platte.

Major C. W. Foster, quartermaster, chief quartermaster of the department of the Missouri, will proceed to Fort Riley, Kansas; Logan, Crawford, Lewis and Lyon, Colorado, on public business.

## His Name was Moores.

Major F. H. Bogardus, of Wallace, writes that the name of the deputy sheriff who was killed at that place some weeks ago was not Moore, Moores, Morris but Warren H. Moores, and he was formerly a sergeant in Co. F, 11th Maine volunteers. He had no wife living, nor other family except a married daughter in Boston, Mass. This is given to correct many mistaken reports which are in circulation, some of which found their way into the papers.

## Make no Mistake.

By dispelling the symptoms so often taken for consumption, Santa Alba has brought gladness to many a household. By its prompt use for breaking up the cold that too often develops into that fatal disease, those who can be saved from an untimely grave. You make no mistake by keeping a bottle of this pleasant remedy in your house. California Cat-R-Cure is equally effective in eradicating all traces of nascently formed, and of the most virulent California remedies are sold and warranted by C. M. Creamer; \$1 a package, three for \$2.50.

## AUSTRALIAN LADY BUG.

An Insect that is Proving a God-send to California Orchardists.

Says the San Francisco Bulletin: There has been received at the rooms of the state board of horticulture from the ranch of Col. J. R. Dobbins in San Gabriel, a box containing specimens of the vegetable cardinalis, or Australian lady-bug or beetle. This insect is the terror of the cotton-cushion scale and has performed in a short time what all other methods that have been experimented with failed to do. Early lady bug was imported from Australia at the instigation of the department of agriculture at Washington. Ex-congressman McCoppin, commissioner to the Melbourne exposition, is entitled to some recognition in connection with the work, as it was he who set apart a sum of money for the expenses of the agent to Australia, Mr. Koebel.

Before the introduction of the bug the orchards in the southern part of the state were almost ruined, and had not this method of destruction of the pests been successful, it is beyond doubt that they would have been abandoned, as they were almost beyond reclamation.

When the bugs had been received in this country they were distributed. Mr. Dobbins receiving about 200, which were placed in his orchard at San Gabriel last March, at a time when the trees were very nearly destroyed by the scale. The bugs were placed on the trees and multiplied by the thousands, and they were distributed throughout the southern portion of the state to other orange-growers as soon as they propagated. Through the system of the state board of horticulture the scale is being slowly driven out. Upon the arrival of the box at headquarters, which was sent through the solicitation of State Quarantine Master George Rice, an examination was made and it was found that it contained thousands of the bugs.

Two years ago the orchard of Mr. Dobbins produced fruit, the value of which amounted in the neighborhood of \$12,000. Last year the scale had taken such a toll that practically no fruit was raised. In his letter to Mr. Rice, Mr. Dobbins best explains what the bug has done. He says: "I have not live scale enough on the ranch to put in the box for food for the larvae and could not catch enough bees in one afternoon, so concluded to send them in the pupa state."

The peculiarity of the bug is that the only thing they will feed on is the cotton-cushion scale, and when it is unable to secure that food they feed upon themselves. The insects will be distributed right away as they have nothing to live on and are propagating fast, and instructions will be issued to place them at once on the trees. The state quarantine officer left for Santa Rosa Friday evening, taking quite a number of the bugs with him, the intention being to distribute them to growers in attendance at a meeting of the horticultural society to be held there.

## ARE YOU LOOKING

For a place you can call home? You are tired, perhaps, of "quarter-section farming," even though broad acres of the fairest portions of Uncle Sam's domain yet tempt you to change your base of operations further west. Ten, twenty, thirty or forty acres of Rio Grande valley land will furnish you an ample and varied arena for the display of muscular ability, while common sense, taste and a modest capital will in three or four years produce results eminently satisfactory to a man who, to a laudable desire for a reasonable pecuniary return for his labor, carries with it a purpose that the balance of his days shall, with his family, be spent amid pleasant and beautiful surroundings. With these remarks, point we to

## The Mesilla Valley!

He must be blind indeed who can not see that it is a most favored section. Seekers after health, profit and pleasure, after a thorough search from the lakes to the Pacific coast are finding their El Dorado in New Mexico; and to these new comers, as well as to everybody else, the

## RIO GRANDE LAND COMPY

extends a cordial greeting, and invites a careful and thorough inspection of its FINE COLONY LANDS. Some 2,000 acres of which are subdivided and platted into ten and twenty acre blocks (from which incomes can be produced equally as great, if not greater, than the average farms of eighty and 160 acres in the western and northwestern states) and all within a radius of one and one-half miles of the railroad depots at

## LAS CRUCES AND MESILLA PARK

Some of these blocks are cultivated, or have bearing orchards and vineyards; others not. Some have tasteful and modern cottages upon them; in others Nature has undisputed dominion. It's merely a question of choice—and money—although the latter does not cut such a figure as one might suppose in these days of booms; and our "long term" payment and low interest" plan often adds a little spice to a transaction to one who has an eye to the future. Warranty deeds given. Write or call for plans and circulars. Command us for carriage or other courtesies within our power to give.

**FRIDAY, AUGUST 9.**

The Santa Fe Advertiser wants the new state of Santa Fe. All right. Go ahead.

The New York Sun is still trying to get the Democrats together. The job seems to be a very hard one.

The San Pedro boom is still on and growing daily stronger, better and more permanent. Long may it continue.

There are no lies on the constitutional convention project and it will prove itself of great good to New Mexico and her people.

NEW MEXICO'S CONSTITUTION makers will not have to wrestle with the woman suffrage business. There is one point gained already.

The department of agriculture has issued a 40 page book on the English sparrow. Whatever Uncle Jerry does is well. That is the kind of a man he is.

A CORRESPONDENT sends us an article clipped from the Albuquerque Democrat, with the request, "Please tackle." We beg to be excused. We are too busy with more substantial things.

It is said that within the past few days there has been a good deal of profanity in the office of the surveyor general of New Mexico. That may well be so. It is not the man who gets an office that does the swearing.

For the latest and most reliable mining agricultural, political and territorial news read the NEW MEXICAN. Besides, when you do so you will also read a live, straight and honest newspaper, strongly Republican and reliably so.

Before the flowers bloom in the spring trade we will have, in all human probability, direct rail connection with the mineral and coal producing regions of Santa Fe country. This can not happen any too soon for the good of all concerned.

We are no longer particularly interested in surveyor General Julian, but as faithful chroniclers of public affairs, we are bound to state that all over this area and wide territory the news of his removal gives true satisfaction. Right said this but nevertheless absolutely true.

A HALF dozen of the alleged murderers of Dr. Cronin are in jail in Chicago, and it looks as if the police had gathered sufficient evidence for the conviction of some of them, but there are so many slips of that city between the accusation and the punishment, that it will not do to be certain that the claims of justice will be satisfied.

The Santa Fe Copper company, doing business at San Pedro, in this county, is an institution entirely well managed, prosperous and of the greatest benefit to our business and mining interests of the county. Vim, brains, energy and knowledge of business will tell every time. Mr. S. E. Ranshauer, of Boston, is the general manager of the company.

"The mover whets his sythe," says the poet, and it is to be hoped that President Harrison is doing likewise, preparatory to the appointment of a new chief justice, a new United States attorney and a new United States marshal for New Mexico. The good people of this territory would relish that sort of a change with power and great glory.

AND now it appears as if the Democrats had stolen a march on the Republicans and placed a ticket for delegates to the constitutional convention in the field on Monday last and beaten the Republican nominees. If this proves to be a fact it serves the Republicans of Santa Fe right. There was a good deal of hanging back and skulking up there about the matter and the leaders seemed to take no interest. No more.

EX-POSTMASTER GEN. FRANK HARTON as editor of the Washington Post, is pitching into Civil Service Commissioner Roosevelt in a most lively fashion, and incidentally into the civil service law. So far he has had the best of the fight. There is no doubt that there is a good deal of clamor about the civil service movement. A little light upon the subject and a lively newspaper discussion about it can be but productive of good. Let her go, gallant!

The great rainbow chaser, Col. Calvin Brown, is sanguine that the Democrat will carry Ohio this fall. The colonel is an Ohio man and his heart is being used in the campaign, and he ought to know. On the other hand it is very singular that the Republicans of the state and the Frankers men certainly exhibit no symptoms of a likelihood of coming to defeat. In fact they are out of victory. Will history repeat itself and will the great rainbow chaser' predictions fail as they did last November? It looks that way.

A few days ago the Denver chamber of commerce held a meeting and took action upon the question of the importation, duty free, of Mexican lead ore. The meeting was largely attended, as the subject is one of the greatest importance to the miners of the Centennial state. One of the resolutions adopted, says: "It is plain common sense that ore carrying one and one-half pounds silver per ton and 1,000 pounds of lead, is not silver ore but lead ore, and should be so classified." In commenting on the matter, the Denver Times remarks:

This is so plain that it seems scarcely possible that any citizen could ever have failed, or refused to see it. Yet it has been persistently ignored for several years, and during all that time the 15 pounds of silver that pays no duty has been bringing in the 1,000 pounds of lead ore, when there is a duty of \$50 a ton on lead. Thus the government has been deprived of its revenues and the price of lead has been reduced to the excessive damage of the lead producing states and territories. They are now demanding that the absurd ruling be reversed and that they be a lower level protection for their great industry which the law clearly promises them.

In this connection it would be well and very probably of great benefit if the different boards of trade of this territory could lend a helping hand to the New Mexican lead miner and mine owner. The more flourishing the lead mining industry of this territory is, the better to all concerned. Meetings of the several boards of trade should be held and strong resolutions passed urging upon the treasury department that the free importation of Mexican lead ore, produced by pauper labor and imported fraudulently and to the detriment of the American miner, should be discontinued. The policy is a bad and pernicious one, and is an heirloom of the Cleveland administration, the sooner it stops the better.

FINANCIAL reports from the money centers show that since the announcement of the failure to form a salt trust a general depression has come over the shares of the leading monopolies of this nature that are already in operation. Sugar trust certificates fell from \$125 to near \$100, Cottonseed oil trust certificates from \$89 to \$53, distillers' trust shares from \$48 to \$43 and lead trust shares from \$35 to \$23. This general decline, however, was not owing to the collapse of the salt trust negotiations, but both were the natural consequences of the growing strength of the popular hostility against trusts of all kinds. The force of this adverse public opinion is making itself felt in many ways. The actions of legislatures, the decisions of courts and the many expressions of popular impatience all conspire to impair confidence in these forms of trade organization. It is felt that their very existence is precarious, and that at any moment they may be up against them, and consequently there is a natural hesitation to invest in their securities. That is why subscriptions to the salt trust did not come in as abundantly as had been hoped, and that is why the market values of other trust certificates decline, though in the latter use there is, of course, the further reason that recent disclosures as to capitalization have shown the insecurity of these certificates as legitimate investments.

WE are informed that sensible Democrats all over the territory are disgusted with the fact that the Democratic central committee, consisting of a few world-beaters, actual bootleggers and four-day statesmen managed to keep the democracy as a party from participating in the election for delegates to the constitutional convention. They recognize that a great mistake has been made in abstaining from voting and have concluded that the Democratic party has simply been used as a cat's paw. A good deal of dissatisfaction exists thereat and the rumors are deep and long. We have surveyed the masses of the Democrats of this territory against allowing themselves to be manipulated by the bootleggers who outdo the Democratic central committee. But none are so blind as those who will not see. It is too late now. The democracy of this territory has assumed the role of the enemy of progress, advancement and liberal ideas, and of the opponent of the prosperity and material welfare of the people of New Mexico. It shall stand or fall upon the record. The people shall be the judges.

ADJ. GEN. BARRETT is of the opinion that the militia of New Mexico has not been fairly treated by the legislature, hence the fact that but little interest is taken in militia affairs. There is something in his argument and it is right and proper that he should stand up and defend the militia men of the territory. However, that does not alter the fact that under the alleged reform Democratic administration of the past four years the militia, as well as everything else connected with that cursed administration, suffered considerably. The administration of the men appointed by Grover Cleveland is, however, at an end, the old Lord be thanked! There is a splendid chance to bring the militia system to a good state of efficiency. Gov. Prince will do the territory a great service by taking the matter in hand, reorganizing the militia and giving the subject the attention it deserves.

HEAR is fond for reflection for the free riders. Mr. George A. Janieson, a member of the British commission to investigate the depression of trade and industry in Great Britain, says in his report:

A wide distinction must be drawn between that protection which a foreigner resorts to in order to raise his revenue, or, under however erroneous a belief, to protect and foster his own industry, and that protection which is a duty which a state owes to its citizens to protect their industries from invasion and a government which confesses its impotence or professes its reluctance to add the duty adds to one of its primary functions.

RICHER THAN EVER.

Big Strikes of Copper and Lead Carbonates Unearthed at San Pedro.

The Camp in a Hum of Excitement—Doors in the Swim—Camp Notes.

A fresh revival of public interest in the wonderful mineral riches of Santa Fe county was developed to-day by the receipt of news from sources whose reliability can not be questioned, relating to several new and important strikes just opened. In concluding a business letter to the editor of the New Mexican, Mang. Raudenbush, of the Santa Fe Copper company, writing under date of San Pedro, the 7th instant, sends up this bit of good news:

FACTS ARE FACTS.  
I started to sink a shaft last week to work four of our copper mines, which have not yet been opened, at the same time through one and the same shaft, situated on the boundary of the Montezuma and Apex and Virginia lodes, and today after being down only ten feet we struck the richest carbonate of copper so far found in San Pedro, average 35 per cent copper, containing also some gold. When we located the shaft last week, my daughter, Matilda, insisted to have it called the Matilda shaft, it would bring us good luck so I did.

On the Apex lode we have run a tunnel 110 feet, and opened a big body of partly decomposed iron ore varying from \$10 to \$18 free gold. The deposit is twelve feet thick, and so far about thirty feet wide, we have not yet been able to ascertain the full width, but we are working day and night in this tunnel to find out. No ore will be taken out in quantity before all our machinery is here, which might take two months yet.

From the White mine we hoist at present between ninety and 100 tons of copper ore daily.  
Our shaft runs 55 to 65 per cent copper with \$20 to \$30 in gold per ton, and twenty-two ounces in silver.  
The camp is very lively, forty-six lots have just been sold by the new town site company.

I bought the Greyhorse gold mine for the company to-day. The Lucky-Lincoln does well.

GREAT BODY OF CARBONATES.

And similar reliable news, quite as cheerful, as the above only relating to another of San Pedro's rich properties, is also at hand to-day. It relates to the now famous carbonate producers, the Lucky and the Lincoln. For the past week the new strike of caliche and carbonates near the side line of these claims, heretofore mentioned, has been followed up by the miners with results that have created a sensation in camp—the facts leaked out from day to day. In one instance the miners knocked down a whole bank of caliche, that weighed half a ton and it had to be broken into three pieces before it could be taken to the surface. Later men encountered a body of carbonate ore that has served to fairly set the hundreds of prospectors thereabouts wild with excitement. Mr. James Cheves, one of the leading men of the Santa Fe district, and a man whom the people know to be careful in his statements, is here to-day, and he gives the New Mexican an idea of what the present situation is in the Lucky-Lincoln property.

"I went into the mine and personally inspected the find," said he. Mr. Cheves states that he saw a solid mass of iron ore from ten to twelve feet of carbonate in place, and he regards the strike as by all odds the most important ever made in Santa Fe county. The vein, he says, made a short turn downward after a strike well rock, and this vein followed for about twenty-two feet, and other cupping of iron was perceptible which opened to view this rich body of carbonate. He thinks this ten or twelve feet of carbonate will run from \$100 to \$175 per ton, or at any rate will easily average \$100 per ton, or \$2,000 per acre.

The facts in regard to this interest were not generally known in the town when Mr. Cheves left, but he predicts that ere this they have created something of a flare that will make the saws and hammers at work on the new town site sing a merrier song than ever.

A MOUNTAIN OF \$5 GOLD ORE.

Dolores, too, continues to keep pace with the spirit of the times about Santa Fe and comes up smiling with excellent mill returns from the Hattie or "Rock quarry" property. J. W. Benton came in from Dolores this morning. He states that the Wessell mill yesterday made a clean up after running through seventy-eight tons of Hattie ore, which yielded \$700. The mill resumed operations today on ore from the Ross mine, largely owned by citizens of Santa Fe. Mr. Benton says he is perfectly well satisfied with the results obtained from this run of Hattie ore. He has now a breast of ore in the mine that is forty feet high and fifty feet across and basing his opinion on the test just made, he calculates that it will average nearly \$8 per ton, half of which pays the expense of mining, hauling, and milling, leaving a very handsome margin in the shape of profits.

CAMP ECHOES.

The Lucky-Lincoln company paid off yesterday for the month of July.  
John T. Kelly, the pioneer placer miner, is up from Tucson on business to-day. His plant is in successful operation.  
The Santa Fe Copper company will turn \$32,000 loose in Pedro on Thursday next, in payment of its employees to date from July 15.

The Bullion has fifty tons of galena on the dump and expects to be a regular shipper in two weeks. The shaft is now down thirty feet.

Despite the treachery of our Altamirano, lately connected with the Golden Nine weekly newspaper, that spy little sheet comes up smiling. It is brim full of advertisements.

The narrow gauge surveyors are "hoofing" it toward the mines at a lively rate. Let the gold work go on. Give us direct railway connection with that rich section and Santa Fe's prosperity is assured.

A gentleman just from San Pedro, the great copper camp of New Mexico, reports things as lively and bustling there. Money and work are both plentiful, yet there, as in all other places, some people are without either.—Las Vegas Ojide.

The new strike of carbonate ore will necessitate the employment of a large number of miners and teamsters sooner than was contemplated. The executive committee of the Lucky-Lincoln company will have its hands full at its meeting on Tuesday.

Since it has been demonstrated that water can be had by boring there is no reason why the thousands of acres of placer ground about Golden and Pedro should not soon be producing buckets full of the yellow metal. Only capital is required, and this seems at last to have become interested.

County Commissioners.

The county board had a brief session

this forenoon, Messrs. Wyllis and Martinez being present.

The canvass of the county vote on delegates to the state constitutional convention was postponed owing to the fact that returns had not yet arrived from San Pedro and Chienegilla. This duty will be performed to-morrow.

Road overseers were appointed as follows: Tejanque, Julian Ortiz; Cerrillos, D. D. Hernandez; Golden, E. W. Baker; Canchito, J. W. Gurrile.  
Allen Young was appointed constable at Cerrillos.

For the Chilli precinct Filomena Mora was appointed justice of the peace and D. C. Sanchez constable. Adjourned to 2 p. m.

IT WON'T BAKE BREAD.—In other words, Hood's Sarsaparilla will not do impossibilities. Its proprietors tell plainly that it has done, submit proofs from sources of unquestioned reliability, and ask you frankly if you are suffering from any disease or affection caused or promoted by impure blood or low state of the system, to try Hood's Sarsaparilla. The experience of others is sufficient assurance that you will not be disappointed in the result.

ROUND ABOUT TOWN.

The excursion to Santa Clara on Monday on the occasion of that pueblo's great annual feast promises to be well patronized.

It is probable that the county board will continue in session to-morrow, and it is hoped that something will be done toward the improvement of the plaza. At present its condition is not creditable.

Bertram yesterday made a contract with Nacario Gonzalez to tear out the south and east walls at Conway's place, and substitute brick for the present adobe walls, which are sinking. Work will begin on Monday.

The Santa Fe Southern Railroad company paid off its monthly bills to-day—only a day ahead of the usual time. The daily load is doing a very satisfactory business, but just wait till it taps the mining districts!

In the district court to-day Judge Wainman sustained the demurrer moved by Judge Warren and argued yesterday, in the case of A. Stano vs. Don Bartu, relative to the delivery of certain stock under bond. The case will be carried to the supreme court by Mr. Stano.

Attention is called to the new advertisement of the San Felipe hotel, Albuquerque, its leading historic, historic in this case. Hon. G. W. Meyer has named the most popular hotel in the Rio Grande valley and the institution is in every respect a credit to the Duke city, doing many it honors.

And now another wanderer has returned. Mr. S. I. Reed got home from around last night. He has spent several months at Las Vegas and Trinidad, and he comes back satisfied that business, all around business and a future that is bright in the extreme, Santa Fe is a long way ahead of either of them.

Prof. Bauder left Wednesday morning to spend a month in Paso del Norte and vicinity in work for the Hemenway archaeological expedition. He will probably go for several months work in southern Mexico. There has been a reorganization of the archaeological expedition and new officers are in the directory.

James Duncan, of Las Vegas, drove across the mountains yesterday, accompanying a backboard drawn by a team of spanking grays. Sol. Lowitzki ever on the lookout for good and stylish rigs for his livery barn, tackled Mr. Duncan for a bargain, and as a result that team remains in Santa Fe. Mr. Duncan left for home last night with \$3.00 more money than he had when he came.

Hon. Justus Clark is in the city en route to his home in Iowa from his Socorro county ranch. He has shipped 500 rolling fat 3-year-olds which he will put on the Omaha market at 1,000 pounds each about Christmas, a third shipment will be made in a few weeks. He counts his New Mexico breeding farm a success in every respect. It costs \$7 per head to gather these steers and put them on the market. This is the 47th annual sale of farm products which Mr. Clark has put into the market. He takes a just pride in being an American farmer.

PERSONAL.

Ex-Secretary Ritch is upon a visit from his English ranch.

Donaciano Graham, of Colfax county, registers. At the Exchange.

Don Inocencio Valdez, editor of El Heraldito, Taos, is here on business in the district court.

H. W. Flagg, a prominent citizen from the Black lakes region, Taos county, is in the city on county business.

Messrs. Van Hall and J. Carruthers, prosperous miners from Pedro, are here on court duty to-day at the Exchange.

At the Palace: E. S. Waddles, St. Joseph; B. F. Haskins and son, La Junta, Colo.; Chas. Gardner, Las Vegas; D. N. Frazier, Wichita, are among late arrivals.

Horatio Ladd, the representative of the New Mexican, is in the city. Mr. Ladd will visit all the towns in southern New Mexico in the interest of that excellent paper.—Albuquerque Citizen.

A New Scheme.  
The News-Register has been informed by a reliable gentleman who knows whereof he speaks, that an English syndicate will soon send an expert agent to visit the mining camps along the line of the proposed Denning, Gallup and Durango railroad, in the Mongolian country, to investigate their extent and value. He will also report on the feasibility of the proposed railroad, and if the report is favorable, it is more than probable the building of the line will also purchase and develop mining claims along the line of the road in southern New Mexico. The investigation will be made at an early date and will be thorough and complete.—Gallup News-Register.

Auction.  
On the plaza at 9:30 Saturday morning I will sell at public auction a fine lot of household furniture, parlor, kitchen and bed room furniture, glassware, etc. People who desire goods at a bargain should be on hand. CHAS. WAGNER, Auctioneer.

OFFICIAL AND POLITICAL.

Ex-Gov. Ritch informs a representative of the New Mexican that probably not more than 200 votes were cast for delegates in Socorro county. Following are the figures as far as heard from: Pajarito, 12; San Marcel, 25; San Antonio, 10; Kelley, 16; New Socorro, 5; Smelter precinct, 33; Sabinal, 11, or a total of 107.

Returns from the county precincts continue to be received at the court house. The vote will be counted next Monday by the county commissioners, Messrs. May, Bert, Roca and Arriaga, but enough is now known to say with accuracy that the majority for the Republicans will reach 700 votes, a gain of nearly 400 majority over the last election. All the delegates to the constitutional convention are elected. Judge Trimble, of the old town, probably leading the ticket.—Citizen.

Adolph Guebel has a letter from Taos which says the Democrats there put a ticket in the field on Monday, which defeated the mixed ticket composed of Republicans and Democrats. The delegates elected are: Antonio Martinez, Juan Prujillo, Antonio Roca, Juan Martin, Manuel Chacon and Francisco Duran.

Under the new election law no marks of any sort can be placed upon ballots. Many of the judges and clerks have marked the ballots in the election just held with numbers just as they did under the old law. This is all wrong, and in case of Fe contest would render such marked ballots illegal.

The Washington dispatches announce that Judge Henry Welton, special Indian agent who had charge of the Jicarilla Apache transfer, and well known here, has resigned from the government service.

WIPED OUT.

The Santa Fe Mountain Club's Quarters on the Pecos Burned.

The following dispatch came to hand at 2 o'clock this afternoon:  
To E. L. Bartlett.

GLOBIETA, N. M., Aug. 9.—Club house burned this morning. The cook was badly hurt. All others safe and well. Will arrive home on first train.

J. B. Sencos, Wyandotte, Kas., who left here on Monday in company with his wife and daughter, Mrs. Bartlett, Mrs. H. L. Warren, Levi Hughes and others for a pleasure trip to the Pecos. They occupied the club house as their headquarters.

The cook referred to is a man named Geo. Williams, lately employed at the Bon Ton restaurant, where he was commonly known by the title of "Frenchy." The property destroyed was owned by a gentlemen's organization here known as the Santa Fe Mountain club. It was insured and was valued at about \$1,500.

BEGINNING TO HEDGE.

The A. & P. Can't Accept the Bonus—Longing Eyes at Our Baby Road.

As stated in these columns yesterday the A. & P. directory has practically decided not to consider the bonus of \$75,000 on paper which Albuquerque is trying to raise as an inducement for it to build as far as San Pedro. This looks out in a very cautious statement by the Democrat, and now that sheet, one of the avowed enemies of Santa Fe, and particularly the Santa Fe Southern railroad, is beginning to hedge with the evident purpose of attempting to make capital for Albuquerque out of the fact that surveyors are now in the field running a direct line from this city to Santa Fe county's mines. The idea that \$75,000 on paper in Albuquerque is anything of an "inducement" for any road to spend a quarter of a million dollars to reach that point seems like a joke, but it is no less absurd than the sheet's other statement that the backers of the Santa Fe Southern haven't "much money" to carry out any enterprise they may undertake to improve their property in Santa Fe county. Here is what the Albuquerque sheet has to say:

Gen. Melly and other moving spirits in the narrow gauge enterprise, are looking with longing eyes at the \$75,000 plan which is now hanging ripe at Albuquerque, and waiting to be plucked by some road company. The corporation which Gen. Melly represents has every energy to run a much bigger road, but it hasn't much money, and the Albuquerque subscription of \$75,000 is an argument that would have a very decisive effect in determining the future policy of the road.

It is generally believed that the subscription tendered by the people of Albuquerque will induce the Atlantic & Pacific company to commence the construction of its eastern division at this end and build as far as a point opposite San Pedro to the new carline camp which will extend its line to Albuquerque. We have every reasonable assurance that this is so, we do not positively know it, but we do know that if the Atlantic & Pacific can not see its way clear to build from this point to San Pedro, at present, Gen. Melly's company stands ready to extend its line to Albuquerque. The way of extension, in consideration of the bonus which our people have subscribed for the other company.

This eliminates every element of doubt from the situation, and gives us the gratifying assurance that a railway from this city to the new carline camp will very soon be built, for if the Atlantic & Pacific can not conclude to do the work in consideration of the aid which our people have subscribed, the other corporation is not only willing, but anxious to accept the subscription and extend its line to Albuquerque within twelve months.

Syrup of I-ga.  
Produced from the laxative and nutritious juice of California figs, combined with the medicinal virtues of plantain, is known to be most beneficial to the human system, acts gently, on the kidneys, liver and bowels, effectually cleansing the system, dispelling colds and headaches, and curing habitual constipation.
