Report: More Than 92,000 Communities Lack Electricity

by Carlos Navarro
Category/Department: General
Published: Wednesday, December 16, 1992

On Dec. 9, Guillermo Guerrero Villalobos, head of the Federal Electricity Commission, (Comision Federal de Electricidad, CFE) reported that 92,500 communities in Mexico are still without electricity. According to Guerrero, most of these communities are in remote areas of the country and could represent as many as 10 million people. Of these communities, 80,000 have fewer than 100 inhabitants. Guerrero estimated that by 1994, 95% of Mexico's homes will have electricity. The government's National Solidarity Program (Programa Nacional de Solidaridad, PRONASOL) claims to have provided 11 million Mexicans with electricity during the Salinas administration.
