Fifty Million of English Money Go Into America's Necessaries of Life.

Chicago, Sept. 30.—The expenditure of \$50,000,000 by two English syndicates for the control of an extraordinary aggregate of industrial enterprises in the United States, was completed in the city Saturday. The syndicates include in their membership a great number of British bankers and trustees of large estates in the United Kingdom. No business was acquired for them in the United States which has not paid at least 12 1/2 per cent for the past year. Grain elevators, flouring mills and breweries have been the favorite investments. The management of each of the various enterprises will be placed under an American board of directors, subject to the control of the board in London.

A representative of the syndicate here, when asked to explain this does not look like the establishment of a large British trust, said: "No. Each enterprise is operated separately. The plan is not one of aggression but of conservative, sure investment. Hostile legislation, it is learned, has been cleverly evaded in careful manners. The deal embraces a chain of elevators from the Minnesota and Dakota wheat districts to Chicago. The syndicate's flouring mills are at Minneapolis and the breweries in Chicago. The purchasing committee, it is understood, left Chicago this evening, en route to the north-west, and intending to go from there to Omaha and Kansas City where further purchases are now being considered.

Among properties already turned over to the syndicate are a number of breweries in Chicago, Albany, Detroit, Newark, Jersey City, New York, Baltimore, Rochester and Syracuse. Also the Star Elevators of Minneapolis, seventy-six in number. The Vandusen system of elevators of Rochester, Minn., are now in the number. Cargill Bros., elevator system, Minnesota and Dakota, Bradstreet Hancock iron mines, Hancock, Mich., are also included. Arrangements for the purchase of Pillsbury flour mills and Washburn mills, of Minneapolis, have been completed, and the transfer will take place in a few days. Negotiations for two extensive elevator systems in Chicago are well advanced.

The City Contract company, of London, with a capital of \$50,000,000, and the Trustees & Executors company, of London, with a capital of \$37,500,000, are the syndicates making these purchases. Lord Mayor Isaacs, of London, is the president of the latter company. Trusted agents first made lists of desirable properties, and then options were obtained. Expert examinations followed, then came a report from an advisory committee, and lastly the work of the purchasing committee. Among the members of the advisory committee was D. G. Macrae, editor of the London Financial Times.

**Deming's New Line.**  
DEMING, N. M., Oct. 1.—Thirty-six car loads of rails passed through Deming yesterday, from Galveston to Texas. The remainder of the shipment for the construction of 250 miles of the Sonora, Sinaloa & Chihuahua railroad at the Guaymas end will be made by water. The construction of the Sonora, Sinaloa & Chihuahua railroad will necessitate the building of 1,000 miles of road, and the most of the work will be done from the Deming end of the line. Rails, ties and other material will soon arrive in Deming. The Rosefield Construction company, of Denver, Colo., has the contract for the laying of the track to the Mexican line, and they have commenced to Deming their construction outfit for that purpose.

**Mexico News.**  
CITY OF MEXICO, Oct. 1.—The force of the great storm which visited Ajo county is abated. The second crop of corn is a partial loss. It will entail great suffering. The fields in the vicinity of Leon are under water. The loss in Ajo county is over \$500,000.

A new boy and a butcher fought a duel yesterday with knives. The butcher was dismembered and killed.  
Three young ladies of Maraca, who lost their fortune at gaming, committed suicide.  
Floods at Celaya and Lagos continue. The National railroad train will not be able to go through for several days. Passengers and mails are being transferred.

**Electric Bitters.**  
This remedy is becoming so well known and so popular as to need no special mention. All who have used Electric Bitters sing the same song of praise. A purer medicine does not exist and it is guaranteed to do all that is claimed. Electric Bitters will cure all diseases of the liver and kidneys, will remove pimples, boils, salt rheum and other affections caused by impure blood. Will drive malaria from the system and prevent as well as cure all malarial fevers. For cure of headache, constipation and indigestion try Electric Bitters. Entire satisfaction guaranteed or money refunded. Price 50 cents and \$1 per bottle at C. M. Creamer's drug store.

**Coming Home.**  
SAN FRANCISCO, Sept. 30.—The steamer Alameda, from Sydney and Auckland via Samoa and Honolulu, arrived Saturday. Admiral Kimberly and staff left Ajo on the Alameda and stopped at Honolulu. The admiral was given an ovation at Honolulu. The British man of war Caroline, and the Japanese man of war stationer there fired a salute upon his arrival. He will return home on the United States Nipis. The admiral was given a reception at Honolulu by American residents, at which resolutions eulogistic of the conduct of naval officers at Samoa were adopted. The political situation at Samoa remains quiet.

**After the Contractors.**  
DENVER, Sept. 30.—Gov. Cooper this afternoon addressed a communication to Atty. Gen. Jones, instructing him immediately to bring suit against Collier & Cleveland, public printers; Lawrence & Co., state stationery contractors, and Graham & Webber, furniture contractors, and their bondsmen, for the purpose of recovering the money they are alleged to have received from the state in excess of contract prices. The contractors, together with the secretary of state, were recently indicted for conspiracy to defraud the state. The amount illegally received is in the neighborhood of \$40,000.

**Mormon Matters.**  
WASHINGTON, Oct. 1.—John A. McClelland, of the Utah commission, has submitted a minority report giving his season for non-concurrence in the report with his colleagues. His general animus, particularly in its distinction between the opinion and actions, is the subject of

legislative punishment. The existing laws, he says, are working well. Further aggressive legislation touching upon civil and political privileges would be injurious rather than beneficial. No religion was ever finally declared by armed or unarmed prosecution.

**Base Ball.**  
New York, Oct. 1.—The New York syndicate of the base ball players yesterday leased two blocks of ground lying between 157th and 159th streets, and 9th avenue for a term of ten years, at an annual rental of \$24,000. They also leased the new polo grounds at 155th street, now occupied by the New York team, for a term of ten years, subject, however, to the lease now held by Day for two years.

**W. C. T. U.**  
SAN FRANCISCO, Oct. 1.—The Woman's Christian Temperance Union superintendents met in convention yesterday. The members will hold a grand harvest home festival in honor of Miss Frances Willard's 50th birthday. The work of the union is to be extended into the territories.

**AN UNFAVORABLE REPORT**  
An Expert Engineer Does Not Think Well of the Santa Fe.

OMAHA, Oct. 1.—A special from the New York Times says: "It is stated that a report just made to Messrs. Baring Bros. & Co., of London, who are by long odds the most prominent and most influential factors in the Atchison, Topeka & Santa Fe financial situation, gives a very unpleasant picture of the property's condition. This report, it is said, is made by an engineer of high standing, who was selected by the Baring brothers because of his long experience and conservative character. He has made a careful survey of the whole system, it is added, and in a straightforward statement he is represented as very strongly advising Baring Brothers & Co. against placing too much faith in any favorable statement which they may have hitherto heard. At the office of the Kidder, Peabody & Co., the New York representatives of Baring Brothers & Co., it was admitted that a report upon the Atchison property had just been made by an expert engineer, that the firm was not, however, willing to make public the text of the report.

**Anarchists.**  
CHICAGO, Oct. 1.—A convention of the socialist labor party began here Saturday. Various labor topics were discussed. The delegates are all Germans. The general talk among them so far has had reference to the hanging of the anarchists two years ago, which is as usual denounced as murder.

**Bound for Topeka.**  
GALVESTON, Sept. 30.—Thirty strong was the delegation that left here yesterday for the Topeka deep water convention. They occupied two special sleepers and several baggage cars. The sleepers were handsomely decorated.

**CONDENSED NEWS.**

Ex-Gov. John A. Martin, of Kansas, is dying at his home in Atchison.

The Wyoming constitutional convention adjourned yesterday after a banquet by the citizens of Cheyenne.

Secretary Noble has had several conferences with the president in the last few days. No changes likely to occur.

Secretary Tracy denies emphatically that Commander Kellogg, of the Osage, asked to be relieved from the command of that vessel because Minister Douglas was so ill for Hayti on her.

A large package containing different varieties of forage plants has been received at Washington by Dr. Vasey. The package is the department of agriculture from the experimental grass station at Garden City, Kas. The luxuriant growth attained by many of these species in a soil identical with that of the arid regions gives a most encouraging promise of the successful introduction of new forage plants in the arid region.

Interpreter Murray, of the Iowa tribe, sends word to the Guthrie News that the Otoes have commenced to take up land in the Iowa reservation and abandon their reservation near Red Rock. It will be remembered that a council between the chiefs of these two tribes was held in this city last spring and that an understanding was concluded that the Otoes and Missourians should consolidate with the Iowas. The government was asked to arrange the details for the consolidation, but was too slow and the Indians fixed it up themselves.

William H. Treseott, of South Carolina, assistant secretary of state under President Buchanan, and Hon. John B. Henderson, of Missouri, are candidates for the presidency of the international congress. Three languages besides English will be spoken in the congress. They are the French, Spanish and the Portuguese. It is now admitted that the best reason for the chairman a man who can comprehend clearly, fully and readily all of these languages, and Mr. Treseott assumes to be familiar with Spanish, but those who best know his attainments say that his Spanish is a very tame affair.

The place for the holding of the New Mexico Spanish mission has been changed from Taos to Albuquerque and will begin October 18 and probably continue until the 20. Bishop Foster will preside. As some twenty-four of the members and several visitors will attend, Rev. Harwood expresses thanks to the kind people of Albuquerque for the invitation of said conference to their city with the promise of entertaining the members and visitors. The reason of the change is Bishop Foster's age. It was feared he could not stand the over land trip from Embudo, the nearest railroad station to Taos.

A. C. Sloan, of this city, returned Saturday evening from Columbus, Mo., where he served as a delegate from New Mexico to attend the session of the sovereign grand lodge of the world of the order of Odd Fellows. Mr. Sloan was one of twenty-seven delegates upon whom was conferred the grand decoration of chivalry, the highest that can be conferred by the order and given only for distinguished services.—Optic.

**Job Printing.**  
Merchants and others are hereby reminded that the New Mexican is prepared to do their printing on short notice and at reasonable rates. Much of the job printing now going out of town should come to the New Mexican office. There is no better excuse for sending out of town for printing than there is for sending away for groceries or clothing. Our merchants should consider these things. The New Mexican is acknowledged the leading paper of this section. The patronage of the people will enable us to keep it so.

Try the New Mexican's new outfit of material and machinery when you want fine job printing or blank book work.

**DEEP WATER.**  
The Topeka Convention Opened To-day— Gulf Harbor Statistics.

TOPEKA, Oct. 1.—The second annual convention of the Western States Deep Water Harbor association opened here this afternoon. Delegates are present from Kansas, Missouri, Arkansas, Nebraska, Texas, Colorado, Wyoming, New Mexico and Indian territory. Senator Plumb opened the convention with an appropriate address.

Col. R. H. Ropes, of New York, arrived yesterday afternoon. Mr. Ropes is the chief advocate of the three harbor scheme. Although interested in Arkansas pass, which he naturally believes to be the best point on the coast, he favors the improvement of Arkansas pass, Galveston and Sabine pass as against the power of the trunk lines to build up a monopoly.

His argument is that at present the port trade at Galveston amounts \$75,000,000, \$12,000,000 of which is foreign export and import. Give that one harbor deep water, and all the trunk lines and the port business to and from the central states would be over \$50,000,000 annually in value. He claims that if the railways running to one port had this business a few years competition would be absolutely ruined, and by a combination the railway companies would reap all the benefits of the water land by charging greater rates, and that the farmer and producer would be just where he now is.

Without regarding what he believes to be the superior advantages of Arkansas pass and Corpus Christi, which he is personally interested, he will antagonize any attempt to make one port on the coast, even if that one port is Arkansas pass. His judgment is in favor of three ports, so that there must always, from diversity of interests, be full and free competition. Such competition, he claims, will save the six states mostly interested more than \$75,000,000 annually. He believes the sum of \$10,000,000 appropriated at once for the completion of the three ports will be the only proper way to accomplish the greatest good.

The trouble heretofore has been that the smaller appropriations have been exhausted after a few months' work, and nature has undone all that science and skill have accomplished, and then the work has been done over and over again. He believes that with the money appropriated at once to the three ports each will derive more immediate results, while the farmers and merchants of the central states will, within a short time, receive the benefits of the water haul. He claims that Galveston should properly be a great city, and that it will and also that there will be another great city at Arkansas pass, which will in no wise, in its vigorous growth, interfere with the development of beautiful Galveston.

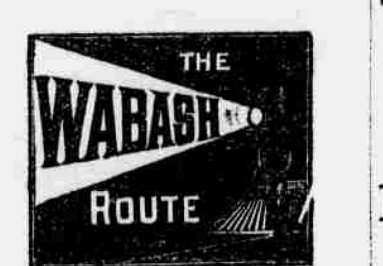

Sabine pass, which he believes should also be improved, will probably be slower in growth than either of the other places, but there is no reason why there should not be a good town there also. Arkansas pass probably has the advantage of being surrounded by hills, nature thus aiding in protecting the harbor, but the energy of man will do much for the other places, which has already done for Galveston. One thing already is developed, there are several powerful towns. Site syndicates interested, and if they can unite their interests they will be a power in the contest that is inevitable between the people of the west and the great railway corporations east of the Mississippi river, which will oppose all attempts to take business away from them in this wholesale manner.

Mr. Ropes has commenced this work of unification with fair prospects of success, leaving to the future the prospects of the respective points, believing that in breaking away from the present eastern railroad combination a new and greater monopoly should not be built up in the north and south roads to one port.

The convention promises to be of even greater interest that way than the convention held in Denver, and the attendance is greater.

Commencing Monday, October 15, 1888, the WABASH ROUTE, in connection with the Union Pacific railway, Kansas division, will run new and elegant Buffet Pullman cars daily between Cheyenne, Denver and St. Louis, via Kansas City without change of cars. This makes the shortest route between those points from 120 to 130 miles. Only one change of cars between Cheyenne, Denver and Cincinnati, Louisville and all points south, Chicago, Detroit, Niagara Falls, Buffalo, Rochester, Albany, New York, Boston and points east, Indianapolis, Akron, Columbus, Pittsburg, Philadelphia, Baltimore, Washington and all middle and seaboard states points. This makes the shortest, fastest and most complete route in all respects between the west and the east. The Pullmans are fresh from the shop and are of the most elegant and modern design. All connections at St. Louis are made in the Union depot. The official schedule will be published later.

**Filigree Jewelers**  
OF NEW MEXICO.

Carry the largest and richest assortment of goods to be found at any point in the southwest. Native Opals, Navajo Garnets and Turquoise in great variety. We employ only native workmen, and invite strangers to our workshops. Diamonds, American Watches, Silverware, Clocks and Optical Goods also a specialty. The only place in Santa Fe where a fine watch can be repaired properly.

PALACE AVE., Opp. Gov. Prince's  
SANTA FE, New Mex

**ARE YOU LOOKING**

For a place you can call home? You are tired, perhaps, of "quarter-section farming," even though broad acres of the fairest portions of Uncle Sam's domain yet tempt you to change your base of operations further west. Ten, twenty, thirty or forty acres of Rio Grande valley land will furnish you an ample and varied arena for the display of muscular ability, while common sense, taste and a modest capital will in three or four years produce results eminently satisfactory to a man who, to a laudable desire for a reasonable pecuniary return for his labor, carries with it a purpose that the balance of his days shall, with his family, be spent amid pleasant and healthful surroundings. With these remarks, point we to

**The Mesilla Valley!**

He must be blind indeed who can not see that it is a most favored section. Seekers after health, profit and pleasure, after a thorough search from the lakes to the Pacific coast are finding their El Dorado in New Mexico; and to these new comers, as well as to everybody else, the

**RIO GRANDE LAND COMPY**

extends a cordial greeting, and invites a careful and thorough inspection of its **FINE COLONY LANDS**. Some 2,000 acres of which are subdivided and platted into ten and twenty acre blocks (from which incomes can be produced equally as great, not greater, than the average farms of eighty and 160 acres in the western and northwestern states), and all within a radius of one and one-half miles of the railroad depots at

**LAS CRUCES AND MESILLA PARK**

Some of these blocks are cultivated, or have bearing orchards and vineyards; others not. Some have tasteful and modern cottages upon them; in others Nature has undisturbed dominion. It's merely a question of choice—and money—although the latter does not cut such a figure as one might suppose in these days of booms; and our "long term payment and low interest" plan often adds a little spice to a transaction to one who has an eye to the future. Warranty deeds given. Write or call for plans and prospectus. Communiads for carriages or other carriages within our power to give.

Entered as Second Class matter at the Santa Fe Post Office.  
The New Mexican is the oldest newspaper in New Mexico. It is sent to every Post Office in the Territory and has a large and growing circulation among the intelligent and progressive people of the southwest.

## CITY SUBSCRIBERS.

Mr. H. O. Ladd has sole charge of the city circulation of the New Mexican, and all subscriptions must be paid to him or at this office. City subscribers will confer a favor by reporting to this office all cases of non-delivery of papers.

TUESDAY, OCTOBER 1.

The weather is very fine, but the political atmosphere is very much agitated and murky.

Boulangier prefers to stay in London and fire manifestos at the French government. Sensible Boulangier, he.

Our humble advice to New York city, if she really wants the world's fair in 1892: Money makes the mare go, and money makes the fair go.

If you want to see an example of an exceedingly distasteful and worthless county government, just look at the Democratic county of Santa Fe.

And now the Democratic papers are kicking themselves because Harrison's administration is to last at least forty-one months longer. They are indeed hard to please. What in the mischief's name do they want?

No honest objection can be made to the constitution as framed. In a couple of years, let us hope, that the constitution as made a couple of weeks ago will be the supreme law of the state of New Mexico.

The governor of North Carolina is after Secretary of War Proctor. But Sec. Proctor can stand it. This is not the first time that a Democratic governor has been after the secretary of war during the past thirty years.

A solicitor general may and may not be appointed this week. The case is a good deal in the position contained in a recent head line over a telegraphic dispatch in the New York Herald, which read "Peace or War Assured."

The sentiment among tax payers to resist the levy and collection of certain taxes is growing. It ought to grow. The taxes of this county go where the woodbine twines, and the people derive no benefit from them. Now, why should the people pay taxes?

The base ball season is over, the flies and mosquitoes are taking their departure and the people of this great and glorious union may be happy yet. In Santa Fe, about the only spot in this country, we have neither base ball, flies nor mosquitoes, hence the people are always happy.

The Democrats of Virginia are abusing Malone because he was a brigadier general in the confederate army. However they are parading up to the sky every candidate on their ticket who has a confederate record. What is sauce for the goose is sauce for the gander, even in Virginia.

Is Virginia the Democrats are running a protection platform and free trade man for governor; in Ohio they are running a protection man for governor on a free trade platform. You take your money and pay your choice, and vote one way in Ohio and another way in Virginia. Great is democracy!

The New Mexican's correspondent at Washington writes that the matter of the appointment of a United States marshal for New Mexico is again under consideration and that the chances seem to be in favor of Col. Richard Hudson, of Grant county. Be that as it may, the sooner the appointment is made the better for the people and the interests of the government.

The constitution recently framed for this territory will be adopted by the people when submitted to them. Nothing can change this. A foregone conclusion is a foregone conclusion. No use kicking, any and all of you opposed to the statehood movement. Progress, advancement, justice and the rights of the people have carried the day in this country for a hundred years and will be successful in the second century of the country's existence. The world moves.

"It is my opinion that irrigation will be the means of doubling the population of every western state and territory within the coming ten years," says Gen. John B. Bowman, of Las Cruces, in the Kansas City Times. "I fully believe that in the east, where the rainfall is heavy, but uncertain, irrigation will ultimately be resorted to in order to insure a greater regularity of crops. Four-tenths of the area of the United States, not including Alaska, require irrigation. This territory includes part of California, Texas, Kansas, Nebraska, Nevada, Oregon, all of Arizona, New Mexico, Utah, Wyoming, Montana, and portions of Dakota and Washington. Through this vast territory there flow a number of streams with narrow valleys capable of cultivation. In these valleys settlers have taken up their abode, cities have been built, and now the cry is for more room. The room is there, and the only thing needed to make the broad sunburned plains live with valleys is irrigation. The sentiment in favor of this method of reclaiming lands is growing strong, and I predict that ten years will witness a revolution."

## THE FREE LEAD QUESTION.

To the Editor of the New Mexican.  
The ruling of the treasury department that silver lead ores, more valuable for silver than for lead, may be imported free of duty, has not yet been changed, and still there has been an intense falling off in the importation of these ores from Mexico, and the border smelting companies are raising heaven and earth to secure the absolutely free import of such ores. The rumored intention to reverse that ruling and instructions to collectors of customs to stop smuggling has had this effect. By misrepresentation, undervaluation and false classification a very large percentage of these ores, imported in the last two years from Mexico free of duty on the lead, did not come under the ruling referred to, but were virtually smuggled.

Let us illustrate: Suppose that the customs laws permitted the import free of duty of a cow, and that the calf by her side was also admitted free. But the importer brought in with the cow a pig, fat, 3-year old best steer, unquestionably her calf. Was not this smuggling?

The silver-lead ore imports were exactly similar and the government wisely took measures to ascertain the size of that calf. The result is apparent in the greatly reduced imports.

It is claimed that these ores are a necessity as a flux in the reduction of the dry ores of the mines of New Mexico, and that our local silver-lead mines can not supply the required flux.  
How is this known? Will the Kelley mine, those at Organ, Cook's Peak, Tres Hermanos and Hatchita be worked for the lower grade ores or new mines be opened and developed while the product of peon labor at 50 cents to 75 cents per day can be imported by the smelting companies free of duty? On the other hand, the outlook for the future of such imports has already caused the resumption of work upon some of these mines, and the prospective sale and development of others. And a reversal of the treasury ruling will result in the opening of scores of mines producing such ores, bringing prosperity to the territory. The smelting companies display limitable gall in threatening to increase their charges for the treatment of dry ores, when for the past two years with practically free lead ores their charges for such treatment have been little short of robbery, and notwithstanding the great difference in freight rates, ores have been shipped to Pueblo, Denver, Omaha, St. Louis and even Pittsburgh, and more satisfactory returns received.

By the way, a statement under oath of the per centage of dry ores from the American mines reduced by our local smelters and their charges for the treatment thereof for the past two years would be interesting at this time in determining the necessity for such coveted quantities of fluxing ores. The producers of dry ores are urged to rally to the support of the local smelting companies in their demand for free lead ores to save themselves from the monopoly of the Colorado smelters.

A smelter located directly upon the border, operated by Mexican brass-tax, contract labor at from 90 cents to \$1.25 per day, might pay the required duty of \$9 per ton on 30 per cent lead ores, \$12 on 40 per cent and \$15 on 50 per cent ores, and with reasonable profits compete with the Colorado smelters operated by American labor at fair wages, hundreds of miles away, if it be true that sufficient fluxing ores can not be obtained from our local mines, which is by no means acknowledged.

The whole issue is one of smelter profits and wages. Could the ores of the Kelley, Cook's Peak, Organ and other silver-lead camps be mined by labor at from 50 to 75 cents a day, the wait of the smelting people for free lead would be hushed and still. These gentlemen are handling a two-edged sword. If it is right and just that these fluxing ores be admitted free of duty in order that cheaper rates of treatment may be given in the reduction of dry ores, it is evidently equally right and just that the white lead trust, the cartridge factories and the shot towers of the east shall supply the demand in this country at such prices as will leave the lead product of the smelters upon their dumps as valueless as their slag, the pig lead required to furnish the people cheaper paints, cheaper cartridges and cheaper shot. Should this be proposed, the loudest howlers for protection would be these same smelting companies who are now shedding oceans of tears over the prospective loss of free lead ores.

That the Democratic papers of the territory should champion the cause of the smelters was to be expected. Free lead ore means, in so far as it goes, free trade in their cardinal principle. And yet it is an unhappy bird which betrays its own nest, even to be consistent. And while their editorial columns are burdened by pleas for free imports of lead ores, their local columns note with satisfaction the increased activity in surrounding mining camps caused by the prospective suspension of such imports.

The Las Vegas Optic says that there is no party politics in this question and favors free lead ores. A casual acquaintance with the columns of the Optic for several years has caused me to observe that it occupies the political ground from "sucking doves" Mugwump to the intelligent, honest Democracy during all the time, except in the heat of a political campaign, when it becomes enthusiastically Republican. This has always been inexplicable to me except upon the theory that it pays.

If there is no party politics in this there is none in the principle of protection. More plausible arguments were advanced last year in favor of the free importation of wool than have yet appeared in behalf of free lead ores. If the silver-lead mines of southern New Mexico are to remain idle and undeveloped to advance the interests of the smelting companies of the border and the Mexican railways, the woolled flocks of northern New Mexico should be led to shambles and converted into mutton, and the factories of the east supplied with foreign wools free of duty. There is no schedule or part of schedule in the whole tariff law in which the vital principle of protection is more involved than in the import of these ores, with or without the payment of duties. The development of the mineral resources of our country or those of Mexico, and the standard of labor, whether fairly paid, intelligent and free, or peoned without hope of escape from bondage because of the miserable pitance doled out to them for their work, ignorant and debased, are the questions at issue.

I believe that a large majority of our people are in accord with me on this issue, but, just at the present time, the free traders, the smelting people and a few selfish 7x7 dry ore Republican statesmen are making all the noise and causing it to be made manifest that the free importation of these ores is desired by the mine owners, miners, business men and in fact all the people of New Mexico.

It is not time, Mr. Editor, that steps were taken to show the falsity of such an assumption and meetings be held throughout the territory to demand the enforcement of the laws and the reversal of the treasury ruling of D. P. CAN.  
Georgetown, N. M., Sept. 30, 1889.

The Albuquerque fair will be a success.

**DR. PRICE'S CREAM BAKING POWDER**  
FULL WEIGHT PURE  
MOST PERFECT MADE

Its superior excellence proven in million 1 houses for more than a quarter of a century. It is used by the United States Government. It is the best of the great Universities as the strongest, purest, and most healthful. Dr. Price's Cream Baking Powder does not contain Ammonia, Lime, or Alum. Sold only in Cans. PRICE BAKING POWDER CO. NEW YORK, CHICAGO, ST. LOUIS.

**SYRUP OF FIGS**  
Combines the juice of the Blue Figs of California, so laxative and nutritious, with the medicinal virtues of plants known to be most beneficial to the human system, forming the ONLY PERFECT REMEDY to act gently yet promptly on the bowels.

**KIDNEYS, LIVER AND BOWELS**  
Cleanse the System Effectually, TO THAT—  
PURE BLOOD, REFRESHING SLEEP, HEALTH AND STRENGTH

Naturally follow. Every one is using it and all are delighted with it. Ask your druggist for SYRUP OF FIGS. Manufactured only by the CALIFORNIA FIG SYRUP CO., SAN FRANCISCO, CAL. NEW YORK, N. Y.

**FIRST GUN CLOTHING**  
Grand Display of  
FOR FALL AND WINTER.

We want the people to understand that our garments are guaranteed to be the latest in style, of the best manufacture, of the best material and cheapest in price. We do not sell shoddy, auction double and then give 50 per cent off. We do business on business principles. We buy and sell more clothing in our Denver and Leadville stores than any other two concerns in the state. We discount all bills and give this profit to our patrons.

**NEW CATALOGUE FREE.**  
We send goods to responsible persons subject to examination and return if not satisfactory. Write for samples of cloth and prices. We make a specialty of Mountain Clothing, Rubber and Leather Coats, Heavy Lace and Top Boots, Heavy and Long Ulsters, Flannel Shirts, Blankets, etc. We are complete outfitters for the male sex.

# THE MAXWELL LAND GRANT

**Farm Lands!**  
UNDER IRRIGATING DITCHES.  
Choice Mountain Valley and Lands near the Foot Hills  
**FOR SALE.**

For the irrigation of the prairies and valleys between Raton and Springer one hundred miles of large irrigating canals have been built, or are in course of construction, with water for 75,000 acres of land. These lands with perpetual water rights will be sold cheap and on the easy terms of ten annual payments, with 7 per cent interest.

In addition to the above there are 1,400,000 acres of land for sale, consisting mainly of agricultural lands. The climate is unsurpassed, and alfalfa, grain and fruit of all kinds grow to perfection and in abundance.

The A. T. & S. F. railroad and the D. T. & Fort Worth railroad cross this property, and other roads will soon follow.

Those wishing to view the lands can secure special rates on the railroads, and will have a rebate also on the same if they should buy 100 acres or more of land.

**Warranty Deeds Given.**

AMONG THE MINES.

Working Work on the Lincoln-Lucky.

Business at Cerrillos—Camp Cerrillos.

Major Randall came in from the mines last night and is quartered at the Exchange. He accompanied John King as far as Cerrillos and the latter received a telegram announcing that 1,000 feet of iron rails for the Lincoln-Lucky railway would reach Cerrillos this morning. Mr. King was coming through to Santa Fe, but upon receiving this telegram he remained over to have the iron sent at once to San Pedro. The mineral cave has been opened so that ores can be readily extracted and the ties are laid and cars ready to begin work the moment the rails can be spliced down, which will require but a few hours after they are once on the ground. It is thought that by tomorrow the mine will be in readiness to begin its present output. Mr. King is very anxious to work the property to its fullest capacity during the three months he has, and if the present plans are carried out about forty more miners and some fifty teams will be employed in and about the Lincoln-Lucky mine during the present week. With the vast quantities of ore in sight Major Randall thinks it will be no task at all for him to clean up for himself at least \$25,000 within the next three months.

Development during the past two weeks in the San Pedro carbonate deposits has proved very encouraging. Besides the large ore body which was recently struck in the Lincoln-Lucky mine, considerable work has been done on the Tres Hermanos group, which is showing that the Tres Hermanos company control mining properties that are very likely to prove as surprisingly rich in carbonate ore as the Lincoln-Lucky when development has been pushed in on the ore chute to the proper distance—Optic.

Cerrillos is growing very rapidly these days; building operations of all kinds are in hand, real estate is in demand, and everybody is up to his eyes in business. It is a sight good to look upon, the depot and yards of the A. T. & S. F. at that point. Ten or fifteen cars of coal are loading daily; hundreds of teams are moving in and out, and the coal platform is piled with freight, all indicating, as nothing else can, that prosperous condition which prevails in our mines.

"A railroad to San Pedro is assured," says the Las Vegas Optic, the appearance of a dispatch received in that city a few days ago. Of course it is a railroad to San Pedro is assured to run from the city of Santa Fe to the new plant at Cerrillos. The Santa Fe Southern people have the cash to build the road already at their command. It will prove a great day for Santa Fe when the first shovelful of dirt is thrown for this extension.

Now that the free flanking ores, carrying lead, zinc and iron, have been discovered at San Pedro in such large quantities, what's the matter with pulling for a big smelter plant at Cerrillos, where fuel and ores are plentiful? Cerrillos is today the best location in the west for extensive reduction works. Will somebody please try and deny this assertion?

The New Mexican was led to state a few days ago that the Bullion claim was shipping ore. This is incorrect. The claim looks well, but it has never shipped a pound of ore, and only two men are at work in it. Albuquerque parties are largely interested in this claim.

Bartholomew & Co., are miners from Arizona who seem to have fallen on a good thing at Cerrillos. Mr. B. located the Silver Queen claim a few weeks ago, and on Saturday he shipped his first carload of ore. It promises to be a steady producer.

The San Pedro Outlook has made its appearance. It subsequent numbers of the paper fulfill the promise of the first issue, San Pedro camp need have no fear but what its interests will be well guarded.—Las Cruces Republican.

C. Arlington, Thomas Penrel and Richard Hicks, Colorado miners, are in the city today en route to San Pedro. They have heard of the great carbonate belt and propose to investigate it.

San Pedro town building has been resumed with a vim. The growth of the new Leadville will be upon an actual industrial basis from this time henceforth.

J. D. O'Brien left this morning on his return to Pedro. He is working a group of claims not far from the Lincoln-Lucky with the most flattering prospects.

B. Tott, the Golden merchant, yesterday paid Richard Dwyer \$100 for the Pearl prospect, located three-quarters of a mile from Golden.

Produced from the luscious and nutritious juice of California figs, combined with the medicinal virtues of plants known to be most beneficial to the human system, acts gently on the kidneys, liver and bowels, effectually cleansing the system, dispelling colds and headaches, and curing habitual constipation.

New Mexico and with Santa Fe, which he thinks is destined to be the great capital city of a great state. At home he is a stock raiser, and he finds that the Kansas man who has to feed seven months in the year gets very little if any more for his feed than the range stockman who does not feed at all. It is a state of affairs brought about by the building of railroads into the range country, and he thinks it is gradually working a revolution in favor of the western range producers which the states feeders will be soon to succumb under. It is with a view to looking over New Mexico's advantages as a breeding country that he is here to-day. He has been south along the Rio Grande as far as El Paso, but finds the water problem almost insurmountable there, hence he concludes his best bet is to try and secure lands on the headwaters of northern New Mexico streams where the water supply is more stable.

A Good Appetite is essential to good health; but at this season it is often lost, owing to the poverty or impurity of the blood, derangement of the digestive organs, and the weakening effect of the changing season. Hood's Sarsaparilla is a wonderful medicine for creating an appetite, toning the digestion, and giving strength to the whole system. Now is the time to take it. Be sure to get Hood's Sarsaparilla.

ROUND ABOUT TOWN.

W. J. Birchell, late of Socorro, a jolly little marketman who makes friends readily, is behind the counter at Dobbin's Fulton market.

Elías Brevoort yesterday received notice from Washington that he had been appointed interpreter at the Pueblo Indian agency. He entered upon his duties to-day.

The material for Surveyor Gen. Hobart's residence is on the ground and the work of putting it together is in hand. It is to be ready for occupancy by November 1.

October comes in smiling. This, to many people's idea, is counted the grandest month in the year. In Santa Fe October weather simply means perfection itself.

Nothing definite is yet at hand as to the report that the D. & R. G. would run a weekly train once to Espanola after today. The train men, however, say the order has been revoked and regular daily trains will not be disturbed.

Sergeant Major O'Brien has purchased a nice little home on Albuquerque road and will soon have served his twentieth year with the army, when he will settle down and make his home in Santa Fe. He bought the Manuel B. Apolaca place, paying \$800 therefor.

E. L. Snowden, who some time since bought out Dr. L'Engle's dairy, is busily engaged in making all manner of improvements about his place on lower "Frisco" street. He is an energetic and industrious citizen, deserving of a fair share of the public's patronage.

Agent McClure says there are 8,000 pueblo Indians in New Mexico, and that they hold U. S. patents to 802,845 acres of land. These copper colored sons of the valley ought to get along very well in life with over 1,000 acres of land for each man, woman and child.

Three more adobe business houses were vacated today for the more stylish brick. Mr. Spitz' jewelry establishment has gone into the east side of the Kahn block; Mr. Kahn occupies the west half, and the Masonic fraternity's efforts are going into the hall on the second floor.

Paul Dyer, representing the general agency for the Edison Electric Light company, is in the city to locate his southwestern headquarters. He will travel from this point through New Mexico and Arizona, and also has some encouragement toward putting in a plant in this city.

County Clerk Garcia has bought a fine young orchard of 200 trees in the Jojoque valley and has gone out to put it in order for winter. Lands along that valley are coming in demand because of the abundant water supply. In fact all lands where the water is permanent are gradually increasing in value hereabouts. In Santa Fe county there are six or eight little valleys that in a few years will be dotted with fruit farms.

PERSONAL.

J. T. Forsha, of the Exchange, is laid up with rheumatism.

O. F. Perry leaves tonight for San Pedro to look after his mining interests there.

H. S. Nash, C. K. Sanborn, Chicago; A. N. Randall, Golden, are registered at the Exchange.

Jas. Mulliken and a party of Kentucky speculators are booked to arrive in Santa Fe in a few days.

Henry J. Young and wife, of Cerro, Taos valley, came in last night and left this morning to attend the fair.

Mrs. E. L. Ferris, Mrs. Henry Lea, Miss Agnes Cummins, Miss Claudia Lea, W. L. Ferris, of Wilmington, Del., comprise a pleasant party of tourists at the Palace.

At the Palace: G. T. Ingersoll, Boston; H. A. Tassig, California; A. O. Hendley, Newark, N. J.; Chas. Shepard and wife, Illinois; J. R. Lehmer and wife, Omaha; H. J. Young and wife, Cerro, N. M.; G. W. Abbott, Springfield, A. L.; Gallaher, Chicago; H. Hilbrunner, Philadelphia; John Mason and wife, Fairfax county, Va.; G. W. Williams, St. Louis.

Tia is New Mexico. At Petaca, a small Mexican village some twelve miles west of Tres Piedras station, where most of the mica mines are, similar veins of ferruginous ore are found with the mica beds. Specimens of this ore, taken almost from the graminee (these veins have not been opened more than four or five feet down) have been assayed and proved to carry from one-fourth of 1 to 1 1/2 per cent of tin.

A thorough investigation of these deposits will no doubt develop an industry that will pay largely and at the same time supply a metal of which the United States is in great need, and for which at present about \$25,000,000 is annually sent to England.

The country in the vicinity of Tres Piedras station and of Petaca is very rich. It has an immense quantity of fertile agricultural ground and fine timber, unequaled pasturage and abundance of water. It has a superb climate, healthy and invigorating, and with its railroad facilities will no doubt very soon attract capital, which will bring into this as yet very little known section of New Mexico the blessings and civilization of American enterprise and civilization.—San Francisco Chronicle.

MORE WATER.

Another Simple Solution of a Mysterious Question—A Little Wonder.

Elder Bros., of Lamy, who are now engaged in putting up Star windmills here for Mr. Catron, County Clerk Garcia and others, yesterday completed arrangements whereby they become Santa Fe county agents for the celebrated Huffer pumps, irrigation wonders, manufactured at Greeley, Colo. If half the claims made for this pump are true the available supply of water is practically trebled or quadrupled. More water flows under the surface than in the channels of streams. The pump is designed to get water from wells or streams to any reasonable height, and in any volume required. The owner of city lots or acre land has only to find a well of ample supply, when the successful irrigation of the tract becomes simply a question of the cost of a pump and the cost of coal. It is claimed that one bushel of coal will raise 60,000 gallons of water twenty feet high.

With this pump, so simple and cheap, the great wealth of water under our hills and valleys, should be speedily utilized, and thousands of acres made beautiful with homes, harvests and trees. The cost of a pump of capacity to irrigate four to eight acres is quoted at \$100. Larger sizes at higher prices up to \$800 for a pump of capacity for 340 acres. Elder Brothers have a long lease of 10,000 acres of land near Lamy, and there they will soon have two of these modern wonders in operation.

FAIR NOTES.

There are more horses on the ground than at any previous fair. And less mind.

Master Mechanic Hackett, of the San Marcel shops, has a cotton plant in full bloom on exhibition.

Judge Whiteman left this morning for a trip to his family at Albuquerque, where he will also see the fair.

Mrs. Bernardino Roca and sister, Miss Maria Juarez, are guests of Albuquerque friends during the fair.

The Albuquerque newspapers don't make much of a showing of fair news, and the all important first day has come and gone, too.

The idea that Santa Fe can be represented by a girl who is afraid to show her face is too preposterous. Santa Fe isn't that kind of a girl.

Yesterday was a season of great preparation, and hurrying to and fro. At this distance it begins to look as though the fair would be a success.

The brass band failed to show up yesterday till the afternoon performance. The visitors think the band should be given two opportunities daily to air itself.

The local dealers have combined to raise the price of beer during fair week to 10 cents, the Santa Fe visitors will take whisky straight only—they can't drink that water.

It is the opinion of many that Sec. Hawley did wrong yesterday by throwing the doors of the hotel hall open to visitors. No one should have been allowed within except those preparing their exhibits.—Citizen.

Mr. Arthur Boyle, who is vice president of the fair association, took down a very handsome display of Santa Fe fruits last night. Two to one Albuquerque's fruit girl won't dare show her face when this exhibit is in place.

Two races came off yesterday afternoon. There was little or no betting. The first was a mile contest by trotters, won by May Queen, J. T. Johnson owner, in 3:34 1/2. The second was a half mile dash won by Geo. Starley's Fritz in 50 1/2.

TERRITORIAL TOPICS.

There is only one prisoner in the Sierra county jail, which speaks well for the morals of that county.

There are rumors afloat that the freight division of the Atlantic & Pacific road, now at Coolidge, will soon be removed toward putting in a plant in this city.

The Dona Ana grand jury shows that Sheriff Asante has collected only about 25 per cent of the taxes delivered to him for collection.

Santa Fe has to come to this city for her lumber. S. A. Clements has just sold five car loads of lumber to a Santa Fe firm.—Las Vegas Optic.

P. J. Kennedy, of St. Louis, father of the late N. J. Kennedy, arrived in the city yesterday, on a visit to his relatives here.—Las Cruces News.

Married:—Gerome P. Cessano, of El Paso, and Miss Katie Griggs, of Mealla; J. W. Prude, of Weed, and Miss Mattie E. Bennett, of Agua Chiquita.

At Albuquerque James Wall, a section boss of the Atlantic & Pacific, tried to hang himself yesterday from the transom of his house. He was discovered and cut down before life had become extinct. Liqueur. Jailed.

The funeral of Milton H. Stapp, which occurred from the family residence in Albuquerque yesterday afternoon, was largely attended. The United States flag on the pole in front of the Exchange hotel, was floating at half mast in honor of the old soldier.

Tom Roe, the Chicago Herald champion bicyclist, reached Mojave last night, and left there at 6 o'clock this morning on his trip across the desert. He is reported to be in excellent trim and feels confident of beating Steven's time on a bicycle from San Francisco to Chicago.

Las Cruces has put a good spoke in the wheel of irrigation in forming the Jornada and El Paso Canal & Reservoir company. The list of subscribers will be found in another column, and we desire to be among the first to welcome an enterprise that promises well for the country's future. Irrigation is a subject that is worthy of the support of every citizen.—El Paso Herald.

The success of the limited fruit canning establishment at Las Cruces will be hailed with delight all over New Mexico. It should be engaged in, however, on a more extensive scale, and thus keep the money in the territory which is annually sent to California and eastern states for fruit. Silver City makes \$1,000 every month for canned fruits, all of which should remain in the territory.—Enterprise.

The trust clause in the constitution is supposed to be intended for such monopolists as Allan H. Macdonald and J. E. Curran. To be sure Curran has only one bean time when he owned as many as three papers. This is too great a combination of wealth and power in the hands of any one man, and 'tis well the convention took the matter in hand.—Enterprise.

**ROYAL BAKING POWDER**  
Absolutely Pure.

This powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and can be sold in competition with the multitude of low test, short weight, alum or phosphate powders. Sold in every city. Royal Baking Powder Co., 100 Wall Street, N. Y.

Is Consumption Incurable? Read the following: Mr. C. H. Morris, Newark, Ark., says: "Was down with abscess of lungs, and friends and physicians pronounced me an incurable consumptive. Began taking Dr. King's New Discovery for Consumption, and now on my third bottle, and able to oversee the work on my farm. It is the finest medicine ever made." Jesse Middlewert, Decatur, Ohio, says: "Had it not been for Dr. King's New Discovery for Consumption, I would have died of lung troubles. Was given up by my doctors. Am now in best of health." Try it. Sample bottle free at C. M. Creamer's drug store.

Wanted. A good cook and laundry woman. Wages \$21 per month. Inquire at office of Capt. Summerhayes, Spiegelherk block, up stairs.
