WASHINGTON MATTERS.

SILVER IN THE HOUSE.
WASHINGTON, Jan. 10.—The house committee on coinage, weights and measures held its first meeting at the capitol yesterday. All the members of the committee except Messrs. Knapp and Carter were present. The committee organized by the selection of W. O. Payne, of Iowa, as clerk.

The chairman of the committee was instructed to refer all bills touching individual members of the committee as he may see fit for examination, this report to govern the full committee. It was decided to hold regular meetings of the committee on Monday morning at 11 o'clock.

No further business was transacted and there was no expression of opinion as to questions which will come before the committee.

There are eight bills already before the committee which provide in different language for the free coinage of silver. These will be referred to some member whom Chairman Conger will designate. It is a foregone conclusion that Mr. Conger will not name a free coinage man for this purpose.

THE BIG FIGHT FOR THE FAIR.
The big fight before the Hancock committee will come off on Saturday. There are a half dozen rumors abroad as to why New York asked for delay in the hearing and was given Saturday. The most popular, most widely circulated, is the opinion that the shrewd lawyers who will represent Gotham recognize the advantage to be gained by what would practically be a rebuttal argument. Another alleged reason for the delay is the story that the New York legislature, now in session, would before Saturday pass a bill authorizing the city of New York to issue \$1,000,000 in bonds, which would, with the subscriptions already promised, make quite a respectable guarantee fund.

The Chicago people, however, were not inclined to allow the representative of the metropolis to have things all their own way on Saturday, and have secured a division of time with the New Yorkers on that day. The Chicago men are already on the ground. New York expects to send 400 representative citizens, prominent among whom will be Chauncey M. Depew.

THE CENSUS OFFICE.
The office of the superintendent of the census is at present the Mecca of the office seekers. There is no Chinese wall of civil service reform around it, and the man who wants place knows that the permission is to be reached by the longest pole of influence.

The largest, sweetest plums which are now being scrambled for are the superintendencies. There are to be 175 of these offices, and since congress has raised their pay from \$200 to \$1,000 the number of applicants has perceptibly increased. There are already over 1,100 applicants for the 175 places, and each mail swells the number. The superintendent of the census will in a few days transmit all the papers to the president, and it is expected the appointments will be announced by the 10th of February.

THE CURE REMOVAL.
Mr. T. C. Graden, of Durango, has arrived here and will remain about a month. While not here for that special purpose, he will incidentally give some attention to the removal of the southern Utes and help out where he can.

He represents the people of his section as greatly interested in the matter and anxious for the wheels to move.

JUDGE PARKER IN THE LEAD.
Judge Parker, district judge in Arkansas, is said to be in the lead of all other candidates for the circuit judgeship of the eighth circuit, left vacant by the appointment of Judge Brewer to the supreme bench.

Germany's Sorrow.
BERLIN, Jan. 10.—At the opening of the reichstag yesterday the president formally announced the death of Dowager Empress Augusta, and paid a high tribute to her memory. The house adopted a resolution requesting the president to convey its sympathy to Emperor William, and adjourned as a mark of respect. The emperor has ordered the court to go into mourning for three months, and has fixed the period for general mourning at six weeks, and has also ordered the theaters and other places of amusement to be closed one week. The body of the empress will be taken to Schloss at midnight to-night and the funeral will probably take place Saturday.

Judge Hallett for the Circuit.
DENVER, Jan. 10.—A special from Washington to the Times says: Senators Teller and Wolcott called upon the president this morning in the interest of Judge Hallett as the successor to Judge Brewer as circuit judge. They had heretofore filed a strong letter urging Hallett's fitness and claims, and had made other visits to the president and attorney general. The impression is gaining ground here, however, that the president's feelings lean decidedly to Judge Parker, of Fort Smith, Ark.

Kansas Cow Men in Convention.
TOPEKA, Jan. 10.—The cattle men of Kansas met in convention here to-day. Resolutions were passed condemning the "dressed beef combine" and demanding of congress that laws be passed making it a conspiracy for buyers of cattle to agree upon a price for their purchases and for packers to form a combination to raise the price of dressed meats beyond reasonable figures.

Spreading.

NEW YORK, Jan. 9.—The la grippe is spreading in this city as shown by yesterday's mortality list, which records 250 deaths up to noon. This is the largest

number known in the history of the health department in any twenty-four hours during winter months, and is more than any summer month since July 2, 1872, when 251 deaths occurred, sixty-eight of which were from sunstroke. Four of yesterday's deaths were due directly to influenza.

Water is King.

DENVER, Jan. 10.—Articles of incorporation of the Colorado Land & Canal company, with a capital stock of \$1,000,000, were filed with the secretary of state yesterday. This company, of which T. C. Henry, of this city, is president, has been organized for the purpose of developing one of the most gigantic irrigating enterprises ever undertaken in the country. It contemplates no less an undertaking than the extension of the Pueblo ditch system, through Pueblo, Otero, Kiowa and Cheyenne counties, east to the state line, a distance of 225 miles, and will bring within the line of cultivation over 1,000,000 acres of naturally the most fertile lands in the state. It is estimated that the completion of the proposed ditch will cost not less than \$1,000,000, one-half of which is to be expended during the coming season.

A Conservative Southerner.

NEW YORK, Jan. 10.—William P. St. John, president of the Atlantic National bank and vice president of the Southern society, to-night tendered his resignation as member of that society because of its action last night. He said: "I think them bold, indeed, who assume this to be the time and place and themselves the men, or the generation, in which to write an epitaph of Jefferson Davis. In terms alike acceptable to all Americans. Accordingly I look upon the call for last night's meeting, because unnecessary, as utterly out of place."

Will Make Iron Pipe.

PUEBLO, Jan. 10.—Having thoroughly tested by experimental use the superior quality of iron pipe which can be made of Colorado iron, the C. C. & I. company have ordered plans drawn for a pipe foundry on a scale larger than any west of the great cities. The company intend to manufacture all kinds of iron pipe, and are sure they can control the trade of the entire great west.

The Funds Running Low.

BISMARCK, N. D., Jan. 10.—Gov. Miller sent a special message to the legislature asking how current expenditures are to be met, and stating that the present deficiency has almost reached the constitutional limit of \$200,000, and that the state auditor can not issue evidences of indebtedness beyond that sum.

Church and State Separated.

RIO DE JANEIRO, Jan. 10.—An official decree just promulgated proclaims the separation of church and state, guarantees religious liberty and equality, and continues the life stipends granted under the monarchy.

Below Zero in Nevada.

WELLS, Jan. 10.—Mercurial thermometers here indicated 22 degrees below zero last night. Thermometers at Elko indicated 50 below.

Judge Kelley Slowly Sinking.

WASHINGTON, Jan. 10.—Judge Kelley is slowly sinking. There is no hope for his recovery.

Won't Listen to %

LONDON, Jan. 10.—The Chronicle's correspondent at Rome says that Portugal has suggested that the pope act as arbitrator in the dispute between herself and England, but England has refused point blank to accept arbitration.

Not Up to Contract.

NEW YORK, Jan. 10.—The Times says that the new postal cards are not up to the contract. The material is so bad that the ink spreads like on a blotter. Al. Daggett, a Brooklyn politician is the contractor.

The Copper Market.

Copper has shown increasing strength. Lake can no longer be had at any price under \$14.50, and the trade seems to take it up readily at that figure, while Calumet and Hecla is so short that they have advanced their price to 15 cents. Some others who are pretty well sold out have followed suit, but the step has not been universal, and some copper can still be had at \$14.50 spot and \$14.75 for February. An estimate of the year's production at the lakes places it at 90,000,000 pounds. While the holders of the surplus in Europe are confident of the future, they have been disappointed at seeing the visible stock run down for the last half of December to only 1,200 tons. Chili bars were quoted at 250 most of the week, with \$50 7/8 at the top notch. The share holders of the old Comstock have accepted 24,000,000 francs from the new company as a final settlement. The fire in the Anaconda is reported to be still burning slowly although practically out.

Does Experience Count?

It does, in every line of business, and especially in compounding and preparing medicines. This is illustrated in the great superiority of Hood's Sarsaparilla over other preparations, as shown by the remarkable cures it has accomplished. The head of the firm of C. I. Hood & Co., is a thoroughly competent and experienced pharmacist, having devoted his whole life to the study and actual preparation of medicines. He is also a member of the Massachusetts and American Pharmaceutical associations, and continues actively devoted to supervising the preparation of and managing the business connected with Hood's Sarsaparilla. Hence the superiority and peculiar merit of Hood's Sarsaparilla is built upon the most substantial foundation. In the preparation there is represented the knowledge which modern research in medical science has developed, combined with long experience, brain-work and experiment. It is only necessary to give this medicine a fair trial to realize its great curative value.

MORGAN'S CONFIRMATION.

The Committee Hears Charges and Votes to Sustain Mr. Morgan.

WASHINGTON, Jan. 10.—At a meeting of the senate committee on Indian schools yesterday to hear the reply of Commissioner Morgan, to hear the charges filed against him by Father Stephen, director of the Catholic board of missions, it was presented and read. At the conclusion of the discussion which followed, the committee by a vote of six to one, ordered the nomination of Thomas J. Morgan to be Indian commissioner and D. R. Doehner to be superintendent of Indian schools, which was reported favorably to the senate.

Five Miners Crushed at Trinidad.

DENVER, Jan. 9.—A telegram from the Victor coal mines, near Trinidad, says a cave-in occurred at the mine yesterday, and five men were buried under rock and earth. Physicians left Trinidad immediately upon receipt of the news, but it was feared the miners were dead.

Russia Makes Complaint.

BERLIN, Jan. 10.—It is reaffirmed that Russia has sent a circular note to all the powers that signed the treaty of Berlin in regard to the violation of that treaty by the present condition of things in Bulgaria and particularly by the pretended sovereignty of Prince Ferdinand.

PERSONAL.

Try that Mocha and Java coffee, at Emmer's.

Milton Fisk and Sam Paxton, of Dolores, are at the Exchange.

Dr. Sloan returned this morning from Georgia, where he was called on to attend Mrs. I. N. Stone, who is quite ill.

Hon. W. B. Childers, of Albuquerque, arrived to-day to look after his extensive clientele before the supreme court.

Hon. Frank Springer left for Las Vegas yesterday. He returns next week, having business before the supreme court.

OPEN DAY OR NIGHT

TENDENCY OF THE TIMES.

Gov. Ritch's Views—Separation of Church and Politics—Sentiment of American Catholics.

Hard Work of the Progressive Element Necessary to Overcome Apathy and Opposition.

In speaking yesterday of the state movement Hon. W. G. Ritch, of Engle, said a reaction from pronounced opposition to either indifference or tacit support was plainly observable. "The priest of the Catholic church is opposed to statehood, of course," said Gov. Ritch, "to the non-sectarian educational provision in the constitution already framed. Some of the Protestant clergy also are opposed because of the little faith they have in the good faith of the convention in giving such unanimous support to the absolute control of public schools and school funds by the state. Between the active opposition of the priesthood and the apathy of many citizens I believe," continued Gov. Ritch, "there is danger of defeat at the polls. Opposition on the ground of lack of good faith in the native element giving unanimous support to the educational clauses in the constitution I believe to be an error on the part of those entertaining it. The whole history of the

SPANISH-AMERICAN ELEMENT upon the American continent has during the past half century shown a gradual disintegration of church control in politics until today, since the recent collapse of the Brazilian empire, there is an unbroken line of republics from pole to pole, leaving in its train the freest religious toleration, and in many instances, as in our own country and the republic of Mexico, an absolute divorce of church and state. "The tendency of the day is to self assertion and a breaking of the bonds of the church in politics is nowhere more pronounced than among the Spanish-Americans of this territory. Hence the unanimous support of every member of the recent constitutional convention of the iron-clad, non-sectarian school clauses adopted by that convention. That support I believe to be genuine and sincere. "The people of New Mexico fully evinced their

LOYALTY TO THE UNION By furnishing their full quota of volunteers, not drafted men, to suppress the war of the rebellion; this while in such states as Arkansas, Mississippi, South Carolina and other states, wherein in addition to armed rebellion to the government there exists a degree of illiteracy as great if not greater than can be charged upon New Mexico. I therefore submit that when a country evinces a willingness to shed the blood of its citizens in behalf of its parent government it offers the highest evidence of its capacity for self government. "The independence of New Mexicans in voting for non-sectarian schools finds at least a partial parallel in the November centennial held in Baltimore by the lady of the Catholic church of the United States. It will be remembered that this assembly passed resolutions among others to the effect that

THEY ARE COMMITTED to the American public school system, and that next to their religion it was the best promoter of good citizenship and an enlightened civilization. In addition this assembly of American Catholics declared there was no conflict between the church and the laws of the United States. "If the people of New Mexico," added Gov. Ritch, "show themselves to be in favor of a state government I am clearly of the opinion that congress will rise to its plain duty in the premises and admit the territory as a sovereign state of the union."

Gov. Ritch also paid a tribute to the high character of the native citizens who participated in the recent constitutional convention and said their conduct during the entire deliberations of that body had been such as to inspire the fullest confidence in their earnest work to better the condition of the masses in New Mexico.

Its Excellent Qualities Commend to public approval the California liquid fruit remedy, Syrup of Figs. It is pleasant to the eye and to the taste, and by gently acting on the kidneys, liver and bowels, it cleanses the system effectually, thereby promoting the health and comfort of all who use it.

THE DISTRICT COURT.

Where Will it Sit?—List of Jurors for the Term to Open February 3.

The regular term of the district court for the Santa Fe district will open on the 3d of next month. By that time all the new furniture, gas-fixture, etc., will be in place in the federal building and the elegant U. S. court room will be ready for occupancy. Will it be occupied, is the question. Some have thought that Judge Whiteman would attend to territorial business at the county court house and then remove to the U. S. court chamber in the federal building and there carry on the business that pertains strictly to the federal government. This would be a very inconvenient arrangement, however, and is not likely to be resorted to. Both the U. S. and territorial business will be carried on at one place, either at the county court house or at the federal building. The matter seems to bring on the question as to whether or not this is more of a U. S. district court than a territorial district court. The United States government names and pays the judge, and pays the jurors also, which would seem to justify the conclusion that this is a United States court in the true sense of the term. At any rate this is "a district court," and such being the case it devolves, as long as New Mexico remains a territory, upon the United States and not upon the county of Santa Fe to furnish court accommodations for the people of this district, outside of this county.

The above indicates the arguments pro and con that one hears on this subject at this time. Appended is the list of grand and petit jurors selected by the jury commissioners to serve at the forthcoming term:

GRAND JURORS. Juan M. Romero, R. J. Palen, Miguel Martinez, L. A. Hughes, Miguel Ortiz y Ortiz, Sol. Spiegelberg, Amado Lucero, Francisco Gonzalez Lopez, Francisco D. Martinez, Thomas Salazar, H. Lindheim, C. H. McHenry, C. F. Easley, Jesus Montoya, Antonio T. Gallegos, Bonifacio Barron, C. M. Conklin, C. W. Uptegrove, W. H. Nesbitt, Thos. C. Jones, Francisco Lopez Segundo.

PETIT JURORS. Jose Pablo Sanchez, David Lobato, Carlos Sanchez, W. C. Tomlinson, Henry M. Davis, J. D. Allan, M. T. Moriarty.

Julian Romero, Thos. Creamer, Perfecto Trujillo, Remulo Benavides, Jose Rosendo, Candelario Montano, Aniceto Martinez, Sabino Salas, Andres Romero, Juan Ant. Gonzalez, Benito Martin, Raf. E. Montoya, Victor Giron, Pablo Gonzalez, Luciano Montoya, Jose de la Cruz Quintana, Jose de Agüero.

BRICE NOMINATED.

The following telegram was received this morning by C. M. Creamer: COLUMBUS, Ohio, Jan. 9.—Brice nominated on the second ballot without opposition. Give it to the boys and charge it to me. [Signed] L. M. MEELY.

The finest line of candies, at Emmert's.

Supreme Court. In the supreme court this morning Mr. Catron argued the case of the Exchange of Dallas, Texas, vs. W. W. Tuttle, a stockman, suit on a promissory note, which involved the taxing of attorney's fees. Other cases thus far argued and submitted are: Bent vs. Thompson, involves the probate of a will in case county; Laury vs. Catron, attorney's fees; Leyser vs. Field, growing out of a Socorro county attachment suit; Candelario vs. Sanchez, involving the question of jurisdiction of the district court in appeal cases. The cases on the docket so far as set have all been argued and submitted, but no opinions have been handed down. At noon to-day the court adjourned to 10 o'clock to-morrow.

Go to Emmert's to buy your groceries.

ROUND ABOUT TOWN.

E. P. Bradley and son, of Jetmore, Kas., write for information relative to New Mexico, and the Santa Fe valley especially. The Tres Piedras lumber mills will resume operations in March. They have now in their mill yards 1,500,000 feet of lumber, and are making regular shipments to this city.

A six inch steam pump is being erected on the Central mine by the Cerrillos Mining company, limited, and when this is in place the work of sinking to the 600 foot level will be resumed.

Word comes down from El Rito to the effect that the wife of Lee Dimmick died there a few days ago, after a lingering illness. Mrs. Dimmick was a most estimable young woman and there are many in Santa Fe who will learn of her demise with sorrow.

Col. John N. Isgrig, representing a St. Louis drug house, and largely interested in mining enterprises in this territory and Mexico, is at the Palace to-day. Col. Isgrig was one of New Mexico's delegates to the national silver convention held in St. Louis recently.

The American Building & Loan association is preparing to start a branch at Cerrillos. W. H. Nesbitt, president; E. B. Ames, treasurer; S. F. Loughborough, secretary. The directors are all Cerrillos men of high standing. About 300 shares have already been taken at 100 per share.

The Building & Loan association made a loan of \$800 last night to Mrs. J. K. Hanson at 12 per cent, and voted to issue a second series of stock, provided subscriptions should justify it. Messrs. F. Delgado, Grant Rivenburg, John Digueo and Roy Windsor were appointed to solicit subscriptions in Santa Fe, and C. F. Easley to perform similar duty at Cerrillos.

Receiver Morrison, of the local land office, to-day received a letter from a citizen of Springer, also a package containing a splendid sample of crude alum, the writer making inquiry as to how he could locate the ground containing the mineral. It is said a large vein of this alum has been discovered near Springer, and it is so, the find will no doubt be a valuable one. The proper method of location is under the placer mining law.

"If you don't see it, ask for it," at Emmert's.

500 FEET OF WATER.

Samplers of Sand and Water Brought in from the Well, now 500 Feet Down.

C. M. Creamer visited the artesian well camp yesterday afternoon and brought in a sample of the water thus far developed, and also a quantity of the coarse sand in which the drill is now working. The well is 500 feet deep and there is now 500 feet of water in it. Yesterday the drill passed the 500-foot point by going through the soft sandstone in which it has been working since Saturday, and encountered a coarse sand which required immediate casing, as it caves whenever the water from above comes in contact with it. While this sand indicates water, it lays so loosely that it does not warrant an artesian flow. The contractors have great curiosity to learn what the next formation below will turn out to be, for it is now time that hardpan, clay or rock strata should be struck, between the layers of which it is hoped to find sufficient pressure to produce a flow. It is mostly pressure now and not so much water that is wanted. There is enough permanent water in the well now to constantly fill a six inch discharge pipe if a pump were brought into use. The water, notwithstanding the increased depth, continues to stand within about 100 feet of the surface. Even if an artesian flow should not be struck before the 1,000 feet is finished the work already done is sufficient to show that the whole Santa Fe valley is underlaid with water enough to justify the prediction that no distant day will find it dotted with wind mills supplying water for stock and agricultural purposes. But the contractors say there is no reason for discouragement and that artesian water is almost certain to be had. Mr. Creamer states that there is an odorless air constantly escaping from the well which has puzzled the contractors not a little to know what it is and whence it comes. They have never encountered it before in any wells they have put down. Later—Mr. Levey came in this afternoon and goes to Denver tonight to buy more casing. He says there is every indication that an artesian flow will be developed within the next 100 feet.

THE UNIVERSITY OF NEW MEXICO. The business department of the university of New Mexico will open on Monday, January 20, with bookkeeping and penmanship branches. The tuition for the bookkeeping will be \$2.50 per month, and for penmanship \$1 per month. All names should be in before the 15th. Inquire of W. H. NEWMAN, or MISS JOSIE B. PLATT, Superintendent Business Department.

TERRITORIAL TIPS.

Las Cruces, Albuquerque and Las Vegas all boast of having the influenza. Miss Gerlie Lee, who has been for four years in the family of Mr. S. M. Folson of Albuquerque, died there Wednesday at 4 p. m., of typhoid fever.

Rothgeb, the Las Vegas brewer man, has begun cutting ice for his brewery. His pond is just on the edge of Las Vegas, and the ice is six inches thick.

Las Cruces note: "Don Telesforo Chavez, who has been for several weeks past dining a well on the plain about twenty miles southwest of this place, struck water last Saturday."

John Dobbin, the boy miner of Water canon, has struck a bonanza at last in the Stonewall mine. The vein is five feet thick, the ore is free milling and runs way up.—Socorro Chieftain.

The recent discoveries of large nuggets of free gold made near the summit of the Magdalena, is creating a great deal of excitement among the people of that camp at the present time, and is giving new activity and life to the mining interest generally.

It is the opinion of many that an inquest should be held over the body of Michael P. Cody, the young man who was run over and killed in the Santa Fe yards Tuesday night, and a rigid investigation of the manner in which his death was brought about be made.—Citizen.

Died, at the residence of Major Arthur Morrison, west side of the plaza, at midnight of the 7th inst., Dona Isidora Dominguez de Ortega, after a prolonged illness. The lady was 76 years of age at the time of her demise. She was the mother in law of Major A. Morrison, also of Benigno Romero.—Optic.

The Las Vegas Optic says: "We intend to have religious toleration in New Mexico. No high civilization was ever achieved without it. Any special form of religious creed vain and shallow enough to suppose that it owns the people of New Mexico will be taught a lesson by the logic of events that will do it good."

At Albuquerque to-day Nicolas Hill, adopted son of John A. Hill, and his wife, Augusta, the daughter of Cristobal Romero, are to be married at the cathedral. This young couple were zealous converts from the mother faith to Methodism, and it was supposed at one time that Nicolas would take orders and become a shining light in the Methodist church of New Mexico. Both have renounced their adopted religion, and to show the sincerity of their repentance are to be remarried in the cathedral with great display.

The Keeler smelter is most completed; also one of the latest improved wire transway one and one-half miles long in connection with the smelter. Mr. Colman Keeler informs a Chieftain writer that within the next eight days the smelter and tramway will be ready for operation. This smelter will treat the ores of the Woodland group Nos. 1, 2 and 3, also the Sulphuret. The operation of this plant and the mines will give employment to about fifty men, besides the coal burners and a number of other outside laborers.—Socorro Chieftain.

It is learned that the Santa Fe management at its next meeting will decide for all time whether or no to extend its Magdalena branch to the Mogollons and Arizona, or abandon the project altogether at that point, and in lieu thereof extend the Silver City branch to the district mentioned. The Santa Fe people feel that there is no time to be lost in reaching the new mining country, in view of the steady progress of the Silver City, Pinos Altos & Mogollon railway in that direction, together with the envious glances cast there by the Southern Pacific people. It is said to say, therefore, that the Santa Fe will shortly commence to build to the Mogollons either via Magdalena or Silver City.—Silver City Enterprise.

Worthily Represented. Jesse N. Wheelock, of Albuquerque, paid the New Mexican a call to-day and left a handsome standing advertisement for the Northwestern Mutual Life Insurance company, for which he is the general agent in New Mexico. Mr. Wheelock yesterday designated W. M. Berger as agent here for this company. During the three years he has been connected with this company its business has increased rapidly throughout the territory. It is a very strong corporation and stands out and challenges all competitors for liberality toward patrons. This company's popularity may be inferred from the fact that in New York state alone it shows a gain of \$857,000 of business over the New York Life company, and in 1888 wrote in New York 253 more policies than the Mutual Life company.

GRATEFUL. COMFORTING. Seasonable Temperance Drink. CREEDMOOR CHOCOLATE.
