WASHINGTON MATTERS.

RELIEVING THE SUPREME COURT.

WASHINGTON, April 3.—A subcommittee has reported to the house judiciary committee a general bill which will be perfected in its details when reported to the house. It is to relieve the United States supreme and circuit courts. In a measure, it proposes to increase the circuit courts by the addition of one judge in each circuit.

FLORIDA APPOINTMENTS CONFIRMED.

The senate disposed of the nominations of Judge Swaine and Attorney Shipley of the northern district of Florida, after an executive session of five and a half hours. They were confirmed by a strict party vote. The nomination of Merrill to be marshal is still before the judiciary committee.

DUTYABLE CATTLE.

The collector of customs at Ft. Benton, Mont., informed the treasury department that a large number of foreign cattle strayed into the district from British America about three years ago, and have remained ever since. He asks whether they are liable to duty. Asst. Sec. Fletcher replied that when the increase in the number of animals which may naturally have occurred since the arrival of the herd in the United States is not liable to duty, being of domestic production, animals which strayed across the border are properly subject to duty.

NEW COINAGE BILL.

The silver advocates in both the senate and the house have been quietly canvassing the situation for the past few days in order to test the strength of their cause in both branches of congress. It is understood that they have concluded to cut loose from all the bills now pending and unite upon a bill to be formulated based upon the bill reported by Senator Jones of Nevada from the senate finance committee, but without the limitation of silver purchase to the amount of \$4,500,000 monthly. In other words, it is proposed to provide for the monthly purchase or deposit of all bullion to be obtained and issue certificates thereupon receivable for public duties and with full legal tender capacity. The bullion, however, is not to be withdrawn from the treasury, but to remain there as security for outstanding certificates.

A TOWN ANNIHILATED.

HOPKINSVILLE, Ky., April 3.—Reports of a most distressing nature continue to be received from this and adjacent counties that were swept by the cyclone. In some places entire farm houses, barns and fences were laid waste. The loss in property is beyond computation. The town of Caledonia was entirely destroyed. A great deal of valuable stock was killed in every section of this county. There are also reports of a number of persons being injured by falling trees and houses.

BRICE THOMAS SYNDICATE.

NEW YORK, April 3.—Official announcement is made that the East Tennessee, Virginia & Georgia railroad had contracted for purchase of the Erdinger system, comprising about 1,200 miles of road, at a cost of \$5,500,000. The main object of the East Tennessee company in the purchase is to make their line a leading north and south line, starting from Cincinnati and reaching to Jacksonville, Florida, Mobile and Gulf, Shreveport, New Orleans and Memphis.

MORE HIGH TONED STEALING.

MEMPHIS, Tenn., April 3.—The grand jury brought in twenty-four indictments against Ben Pullen Jr., ex-city register, for embezzlement of \$5,703. He has disappeared. Pullen is a brother of ex-Sec. Pullen, now on trial for embezzlement and larceny of a large slice of the city's funds.

CONGRESSIONAL.

SENATE.

WASHINGTON, April 3.—Edmunds, from the judiciary committee, reported back the anti-trust bill in the form of a substitute and said that as soon as the Montana election case was disposed of the bill will be taken up.

The conference report on the urgent deficiency bill was presented and agreed to.

The house recedes from disagreement to the senate amendment as to irrigation surveys, with the proviso that no part of the amount be expended in sinking wells or the construction of irrigation works, and that the government will not be committed to any plan of irrigation.

The senate then proceeded to the consideration of the Montana election, the election majority report being in favor of Wilbur F. Sanders and Thomas C. Powers, and the minority report in favor of Wm. A. Clark and Martin Maginnis, and have stated the case on the part of majority of committee. The whole matter turns upon the question whether onset of delegates who voted with twenty-five Republican delegates for Sanders and Powers were largely elected from the county of Silver Bow or whether the other set who voted with the twenty-four Democrats for Clark and Maginnis were legally elected delegates.

HOUSE.

Baker, of New York, called up the bill to authorize the construction of a bridge and approaches at New York city across the Hudson river; to regulate commerce over such bridge between the states of New York and New Jersey, and to establish such bridge as a military and post road. The bill was passed.

The house then proceeded to the consideration of the Idaho admission bill.

PECK'S BAD BOY.

MILWAUKEE, April 3.—Geo. W. Peck,

the Democratic editor of Peck's Sun, has been elected mayor over Mayor Brown by a big majority.

CATTLE LOSSES.

OMAHA, April 3.—The losses of cattle in Alberta and other districts in Canada have been severe, and now probably equal 50 per cent of the cattle north of the line west of Manitoba. In Oregon and Washington losses must equal fifty 25 per cent and may go higher. In northern California, where the snow fell deep among the mountains, the losses are equal to those in Oregon. In parts of Idaho and Nevada losses have been over 50 per cent, and take the whole of the territory and state the losses will reach 25 per cent or more. Western Wyoming and western Colorado have also suffered, but not heavily. In Montana there have been severe losses in a few localities, but take the state all over the losses will not more than equal those of an average winter.

AGAINST AMERICAN CATTLE.

LONDON, April 2.—At a meeting of the associated chambers of agriculture a resolution was adopted declaring that relaxation of the regulations prohibiting the importation of American cattle would be extremely dangerous.

FOR THE MINES.

THE BAR AGAINST FOREIGN CAPITAL TO BE REMOVED BY CONGRESS.

WASHINGTON, April 3.—Delegate Smith, of Arizona, has prepared a report upon the bill to amend the alien land act, which has been a read to by the house committee on mines and mining. The bill exempts mining claims from the operation of the act.

Delegate Smith, in his report, says that the reasons leading to the passage of what is known as the alien land act, were based upon the fact that large areas of agricultural lands were being purchased and held by aliens to the great detriment of American citizens.

The reasons leading to this wise legislation regarding agricultural lands can not apply to mineral lands. The employment of foreign capital in mines has not led and can not lead to any permanent holding of real estate by foreigners. The mining area occupied by foreigners is very small and can never be large. Foreign capital has assisted the poor mine owners at times when but for such assistance the miners would have ceased operation and labor been thrown out of employment. Its investment has given employment to many laborers at large prices and has proven beneficial to both the American laborer and manufacturer. Foreign capital thus employed develops measurably the mining resources of our country, furnishes employment to many American laborers and the maintenance of many needy families.

Since the passage of the alien act English capital for investment in mines has been driven from our country into Mexico, the British colonies and South Africa, to the great detriment of the American manufacturer and laborer.

It is not generally known that to develop a limited portion of our land, to provide the necessary timber, hoisting works, reduction works, pumps, horses and tools requires from \$200,000 to a sum aggregating millions, as in the case of the Anaconda mine in Montana, the Clinton mine in Arizona and various others.

Under the present law the miner can not mortgage his mining claim to any foreign corporation or person and is left to the mercy of the American corporation, which will probably refuse to lend in order to purchase at an outrageously inadequate price.

The individual miner in a territory should be accorded the same rights and privileges which persons and corporations in the states freely enjoy. He should have the right to go abroad as United States railroad companies or other corporations do to the cheapest mining market, and by so doing manage to retain a larger interest in the property that has cost him years of toil.

THE CATTLE TRAIL.

Southern Colorado Producers Will Make a Fight Against Trail Movements.

DENVER, April 3.—A strong effort is being put forth by cattle men in the southern portion of the state to prevent the movement of Texas cattle by trail across the range to Wyoming and the north. Some years ago this way was a favorite practice of drovers and it was only discontinued when the local owners banded together for a vigorous opposition to the use of their ranges for common trails and bed grounds for these through herds. This obstructive tactics of the local ranch men has not been in practice for the last few years as the movement was measurable, but the conduct of those who drove last year, in getting range cattle into their herds and driving them a long distance from home, as well as in stopping their herds en route whenever the fancy seized them, has aroused the Colorado man's ire, and he is again banding with his fellow-sufferers for protection. Petitions signed by every stock owner of the border counties are about to be filed with the quarantine board, urging the latter to enforce its regulations to the letter. The effect of such in force, will be to tie these trail cattle on the state line for a period of ninety days. The local owners are not wholly dependent upon the quarantine officials. The latter will act only in so far as disease may be threatened through the introduction. In the matter of the protection of their ranges they propose to use the local courts and proceed by injunction, using every legal method available to carry out their policy of obstruction, and thus make the blockade effectual and permanent. Appearances now indicate that the lot of the Texas drover after he strikes the Colorado line will be decidedly unpleasant. No objection will be offered to the movement of these cattle by rail.

WAYS AND MEANS.

General Satisfaction With the Republican Tariff Bill.

WASHINGTON, April 3.—The Republicans as a rule express general satisfaction with the tariff bill. There is some dissatisfaction from California over the action of the committee in reference to sugar, and from those New Englanders who do not like to have duties on the suitable list. The Republicans generally are pleased with the duties on farm products, and say it will give the farmer a home market. The Republicans generally feel that the situation is such that the agricultural interests must be sustained wherever it is possible.

The Republican members of the committee say they will endeavor to have a brief general debate so that the bill can be got into the committee of the whole for discussion by sections under the five-minute rule at an early day. They promise that there will be very few long speeches.

A large majority of the Democrats are in favor of standing by the Mills bill, and some of the Democrats have been urging upon the minority of the committee on ways and means a policy of cutting out some of the more objectionable features of this measure; but this they will not do, preferring to make their fight on the old issue.

The McKinley bill, as agreed upon does not contain the provision in regard to the suppression of trusts that had been promised. An attempt was made to have it included in the bill, but it was thought better to allow the matter to go over and bring up the proposition in the house. This will probably be done by Representative Harrows, who will present an anti-trust section combining the main features of the various bills on the subject of trusts that have been before the committee all the session.

SANTA VALLEY NOTES.

DEL NORTE, April 3.—Ex-Senator Bowen and Schuff Bros. have sold, or agreed to sell, a small slice of their mining property at Summitville to an English syndicate for \$1,000,000.

Colorado Springs capitalists have withdrawn in the past six weeks quietly taken up all the vacant land in and about Wagon Wheel gap, and it is said by those in the secret that their scheme is to establish there one of the finest summer resorts in the southwest.

The certificate authorizing the First National bank of Del Norte to commence business has been received and the new bank will open on the first floor of the Masonic building about May 1. The officers are: President, W. H. Cochran; cashier, Charles W. Thomas; of Fort Smith, Ohio; vice president, Robert H. Sayre. The new institution has a strong and popular backing and will do an immense amount of business.

Work will commence on the abutments for the state bridge across the Rio Grande in about ten days. The rock is being shipped from Amargo, near the New Mexico line.

WOMEN KNOCKED OUT.

TORONTO, April 3.—At Salina, Kas., the female suffragists nominated a woman candidate for the school board. A colored woman was run by the anti-suffragists. The suffragists were defeated, and the colored woman was elected by an overwhelming majority.

At Leavenworth, women nominated a candidate for council and three for school board on the Republican ticket. Over 100 women were registered, but one-half of them voted. The Democrats ran a straight male ticket, and it was elected with the exception of the councilman. All the women were defeated.

At Emporia Mrs. Jackson was re-elected a member of the school board.

At Topeka about 750 women were registered, but little over half of them voted.

IN HONOR OF GARFIELD.

CLEVELAND, April 3.—Ex-President Hayes and Hon. Amos Townsend, president and secretary of the Garfield Memorial association, have issued an address stating that the memorial structure in this city will be dedicated May 30, and inviting all organized bodies in the United States, military, Masonic and ex-soldiers and citizens generally to participate in the ceremonies. Arrangements are being perfected with railroad companies for reduced rates of fare.

ILLINOIS CITY ELECTIONS.

CHICAGO, April 3.—The Democrats have made a clean sweep in all officers in principal township elections to-day. Republicans had previously had north and south town officers.

Democrats also made decided gains among aldermen. The new city council will stand, 44 Democrats and 31 Republicans; 2 independent Democrats and 1 independent Republican.

VICTIMS OF THE CYCLONE.

CHATTANOOGA, April 2.—A dispatch from Garrettsville, Tenn., gives the following news: The ravages of the cyclone losses aggregate \$250,000. Milton college and all the churches and 200 houses are in ruins, and the people homeless, destitute and suffering. Subscriptions started to-day for suffering at Fayetteville and nearly \$1,500 were secured.

TRAGEDY IN A DENVER SALOON.

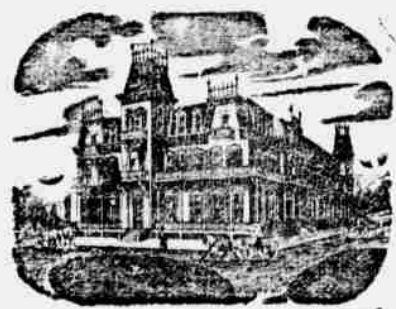

DENVER, April 2.—A man named Schumacher, recently from California, entered a saloon at 157 Larimer street yesterday and sat down in a chair, and blew his brains out in the presence of a dozen men. Despondency and failure to get work was the cause. He expected his wife to arrive from the west last night.

MOST FAMINE IN BERLIN.

BERLIN, April 3.—In consequence of a great famine the purveyors are urging the bundersrath to repeal the law against the importation of foreign meat. Restaurants raised the price of meat 20 per cent to-day.

MUST GO FURTHER.

Most Favorable Outlook for Artesian Water-The Directors Inspect the Work.

The artesian well directors visited the well yesterday and made a careful examination of the work. They witnessed the drill in operation and took measurements which showed that the well was a little over 1,000 feet in depth, and they announced that the contractors have in every respect faithfully complied with their contract.

The visitors were also much encouraged by their inspection and they this morning decided that, all the indications being so favorable for artesian water, it would never do to allow the experiment to cease at this juncture. A number of citizens have also been consulted and the general opinion is that at least 200 to 300 feet further must be sunk.

The main reason for this renewed feeling of encouragement lies in the fact that the formation encountered by the drill during the past few days is very different from that heretofore penetrated. There seems to be no doubt whatever that now the sandstone formation has been passed and bedrock has been touched for a certainty. Just after going through the red sand rock a strong water vein was encountered which brings the water up in the hole several hundred feet. Below this was a vein of talc which every geologist says rests upon bedrock, and chips of limestone were also brought up with the drill yesterday, showing pretty conclusively that the bedrock is composed of limestone, which is the best indication in the world for an abundance of water. When Contractor Lelever observed these favorable indications he said he felt such an interest in the work as to prompt him to go down at least 100 feet more on his own responsibility. His theory is that underneath bedrock will be found a full and complete reward for all the expense and energy of the citizens in behalf of this enterprise. The bedrock may be twenty feet in depth, and it may be 120 feet, no one can guess as to that, but there is really little hope of success until it is determined.

Mr. Lelever is in town today for the purpose of a final settlement for the first 1,000 feet, and the committee is rounding up all of the delinquent shareholders to the end that the settlement shall be made promptly and in a business like manner. Generally there is a very hearty response on behalf of subscribers. Up to noon some \$2,300 of the required \$3,000 had been paid in. When this work is settled for Mr. Lelever will make a proposition in writing to further sink the well, receiving his pay by the foot.

The intention is, if the citizens will back it, to go at least through bedrock. If that doesn't develop an artesian flow the enterprise will doubtless collapse.

The wonderful revolution that would be worked to the Santa Fe valley by the finding of artesian water just beneath bedrock is almost beyond estimate. The great depth at which bedrock exists in the present instance is no argument against it, for undoubtedly at almost any point near town and along the base of the mountains bedrock is from 400 to 600 feet deep, and the sinking of wells elsewhere will not be near so costly as in the present experiment. The town is certainly worth striving for, because Santa Fe has simply got to get water if it would have her interests prosper.

The press speaks highly of Bosco. Go see him, have a laugh and carry home a used prospect.

JUDGE HAZLEDINE AT WORK.

Our Statehood Movement at Washington
—The Democrats Dead Against
New Mexico.

A letter just received from Judge Hazle-
line by Gov. Prince, as to prospects of
statehood, says:

"Your friend, Mr. Baker, of New York,
has been an untiring worker in the cause

has been an untiring worker in the committee on territories in the interest of New Mexico, and I feel under ten thousands obligations to him for what he has already accomplished. Yesterday I presented the memorial to the house asking for action upon our constitution adopted

ast fall. The committee has now passed the following resolution: (The New MEXICAN published this resolution yesterday.) It is surprising how the Democrats have now changed front. A little while ago they said they favored statehood, now they oppose admission, unless they

they oppose admission unless after long delay and the expense of another convention. Our people ought to understand that the Republicans in congress are now earnest for admission, and that all efforts should be used to bring about the result under the excellent constitution al-

ready framed. Things are now stated right and with the aid of good men, to come on and make a favorable impression upon the members of the committee, we have an excellent show for success.

Bosco to-night at Gray's opera house.

ROUND ABOUT TOWN.

Donoghue yesterday began work on August Kirchner's new south side residence. It will cost about \$5,000.

Another thirty Kansas farmer has located in east Santa Fe county, having taken a lease on Joe Rauldridge's farm near Glorieta.

The Santa Fe society marched to the cathedral in a body this morning and attended services in observance of Holy Thursday.

The local Odd Fellows are preparing to celebrate the seventieth anniversary of Odd Fellowship, which occurs the latter part of this month.

Hon. Pedro Sanchez, newly appointed census supervisor, arrived last night from Taos. He will open an office here and make this city his headquarters.

Jefferson Reynolds, principal owner of the Lincoln-Lucky, went to San Pedro yesterday with several surveyors. Improvements are to be made at the Lincoln-Lucky.

On Monday evening, April 7, a social hop will be given at Gray's opera house. All nice people are hereby invited; ladies free. Capt. Gray will see that everybody has a good time.

Signor Bosco gave a very entertaining exhibition of legerdemain at Gray's opera house last night. The audience was large, and there was great sport when it came to the distribution of presents. The entertainment will be repeated to-night.

The body of young Mr. Boudinot, of Vincennes, Ind., was shipped east last evening, his sad mother accompanying the remains. The young man was an only son, and was journeying at St. Vincent's in hopes of securing relief from consumption.

C. L. Gould, of the White Ash Coal company, Cerrillos, was in town this morning. He says the Cash Entry has just placed three 8-horse power boilers for running its hoisting and pumping plants, and it is the talk that a sweater plant is soon to go up there.

C. F. A. Fischer returned from El Paso last night. He didn't find the proper sort of ice machine down there and this morning telegraphed to St. Louis ordering a plant to be shipped forthwith. The machine will have a capacity of seven tons of ice per day and when in place at the brewery will cost about \$12,000.

And still the petitions for the establishment of a national park between Santa Fe and Las Vegas come rolling in. Today Surveyor General Hobart forwarded to Washington the first petition, signed by over 600 citizens from various sections of the territory. The document was sent to Mr. Joseph with a request that he present it to congress.

T. P. Gable returned this morning from Trinidad, where he went to look after the Crowell tragedy. He says everybody seems to think it was a cold blooded killing without any provocation, and from the vigorous prosecution of the case by the law officers he thinks it will go pretty hard with the ex-police officer, McSeman.

To-morrow, being Good Friday, there will be services appropriate to the day in the church of the Holy Faith at 11 a. m., when all persons are urged to be present. Good Friday is the most solemn day in all the Christian year, for then the crucifixion of the founder of Christianity is commemorated, his sufferings rehearsed in the gospel lessons and psalms, and the faithful are taught to behold in them the terrible wickedness of sin and the bitterness of its consequences.

PERSONAL.

Mr. Alonso Potter and Miss C. S. Potter, whose respected father is the Episcopal bishop of New York, left the Palace this afternoon for their eastern home, having had a most delightful visit to Santa Fe.

P. A. Kroshus, of the Caledonia (Minn.) Journal, passed Lamy yesterday for Los Angeles, where a cousin of his is foreman of the composing rooms in the Tribune office, Gov. Lionel A. Sheldon's paper.

Henry G. Dishrow and wife, of Brookline, are at the Palace. Mr. D. says he made up his mind fifty years ago to see the historic city and he is glad he is here.

H. C. Brown, agent for the Santa Fe, and O. B. Morris, manager of the St. Helen's smelter, from Trinidad, passed down the road to-day going to Silver City to buy ores.

Chas. E. Jones, of Pueblo; H. Seligman, San Francisco; P. H. Arnold, San Francisco, are commercial men at the Palace.

H. H. Armisted, whose pipeline scheme in south Santa Fe county is doing much these days, has gone to New York.

Jake Levy, a popular merchant at Los Lunas, has been in the city several days on a visit to his uncle, A. Gold.

Chas. McMonagle, foreman of the Rio Arriba Land & Cattle company's ranches, is in the city buying supplies.

Peter Powers, of Glorieta, who looks well after the comfort of all Pecos valley tourists, is at the Exchange.

Sheriff Sever got in at noon from Colfax county, coming on business with the territorial officers.

Mrs. B. B. Borden, one of Las Vegas' really good women, is here on W. C. T. U. business.

V. A. Greenleaf, district attorney for the Albuquerque district, is at the Palace. Meers, F. C. Plume and Geo. H. Bibb left yesterday on a visit to Boston.

Mrs. Van Vleet and son are visiting at Las Vegas hot springs.

THE CONFESSION OF FAITH.

The Presbytery Discussing the Revision Question Proceeded to the Assembly.

The Presbytery of Santa Fe met yesterday in the Presbyterian church at 9 a. m. After devotional exercises the business of the session was entered upon. The moderator named several committees to which various matters of business should be referred and reported on. The day was occupied in hearing the annual reports of ministers, licentates and evangelists, also of the teachers of mission day and boarding schools throughout the field of the Presbytery. The report showed that good and zealous work had been done and that the increase of the membership of the number of pupils in the schools was highly pleasing.

A vote was taken on the question as to the place of next meeting of Presbytery, April, 1891. Invitations from Raton and Oate were presented, the result of the vote being in favor of meeting at the latter place.

In the evening a popular meeting was held in the church which was well attended. Addresses on the subject of "The Christian's Duty" were given by Rev. Frank S. Bush and Mrs. Borden of Las Vegas. Afterward the subject of "Home Missions" was discussed by Rev. Dr. Hill, now visiting Santa Fe in the interest of these missions of the Presbyterian church.

Yesterday afternoon a committee of Messrs. White, Lock and Curtis was named to prepare a report on the question of the revision of the confession of faith, a subject that is now agitating the brethren of this church all over the union.

To-day this committee made a unanimous report against revision, and this afternoon a lively debate is in progress on the adoption of the committee's report. Those who are in favor of revision are led by Revs. G. G. Smith, F. S. Bush and J. J. Gilchrist, and those opposed are led by the members of the committee. A vote will be reached some time this afternoon.

Iron Battling for the Plaza.

J. W. Franklin, an energetic man from Pueblo, has been in the city for a week or two and has been doing an excellent business in the line of setting tombstones, monuments, iron railings, etc. He shows his appreciation of this business by inserting a large advertisement in these columns. His stock of iron railings is so attractive, and can be laid down here at such a reasonable cost, that many business men have suggested the feasibility of undertaking to have the present ramshackle wooden fence around the plaza replaced with a fine iron railing. The opinion is prevalent that the county should be prevailed upon to see the wisdom of this suggestion and perhaps make terms of a very liberal nature with Mr. Franklin. He also shows neat designs for iron benches, which would greatly improve the plaza.

POLITICAL AND OTHERWISE.

"Whenever a candidate effusively holds out his hand to me for a shake," said an Edly citizen recently, "I feel like hitting it."

The Pinos Altos Miner has come out flat-footed for statehood. That's the winning ticket henceforth. Watch the prediction.

What's the matter with Hon. T. D. Burns for representative in congress from the sovereign state of New Mexico? He's all right.

In the municipal elections on Tuesday Albuquerque voted \$50,000 in bonds for sewerage and Las Vegas \$30,000 for school purposes.

The people of Rio Arriba and San Juan counties can do no better than to return their senator in the next legislature, Hon. Pedro I. Jaramilla.

Postmaster Welter has under consideration the appointment of his chief deputy. To-day he is making out his bond. It calls for \$14,000.

The Silver City Sentinel now calls him Col. A. H. Morehead—a sure sign that the colonel will be a candidate for the legislature on the Republican ticket.

Mayor-elect Mandell is out looking for the eleven men who gave him a majority. He intends presenting each one of them with a house and lot. Fred Kent is helping in the search, and intends to insure the property—Citizen.

A strong effort is being put forth in New Mexico to get into the sisterhood of states. Let her in, and give her a law that will bring about a speedy settlement of the Spanish and Mexican land grants and she will get along all right. Nothing like putting responsibilities upon a people in order to secure progress. The greatest trouble in New Mexico is, the people are too much restrained by a distant and extraneous power.—Los Angeles Tribune.

Tom Burns of Rio Arriba.

Hon. T. D. Burns, one of northern New Mexico's best and most influential citizens, dropped in on his Santa Fe friends to-day. With his family he has been on a three months sojourn in Southern California, spending most of his time in Los Angeles, which he considers a grand and beautiful city. Business generally is quiet there, but the city scarcely contains less than 200,000 tourists and capitalists are getting ready for a lively summer. Major Burns says Gov. Sheldon is doing nicely with his Daily Tribune; in that office recently he met Major Bailhache also and he was looking well. Dr. Longwell is there, too, playing wicket on the crowded streets, and will likely invest in property. Major Burns was greatly benefited by the trip. To-morrow he goes to Denver and thence in a few days returns to his Rio Arriba home. He expresses great pleasure at the outlook for statehood, and regrets that his long absence from his business will preclude the possibility of his going to Washington with the big delegation on the 12th inst.

ARMY ORDERS.

Adj. Gen. Kelton has addressed the following order to paragraph 46 of the regulations, the major general commanding the army directs us to inform you that in all cases involving extensions of leave of absence which require his action or that of the secretary of war, he desires that the application for leave, with the reasons of the extension, be forwarded by the division commander to the adjutant general of the army. He desires me to invite your attention, in this connection, to paragraph 47 of the regulations requiring the purpose to be stated when the application for leave is for a prolonged period.

The commanding officer Ft. Wingate has been ordered to send Private Frank Dumont, troop H, 6th cavalry (an insane soldier), under escort of a reliable non-commissioned officer and one private, to Washington, D. C., to be reported to the adjutant general with view to his admission to the government hospital for the insane.

St. like Euded.

LONDON, April 2.—Michael Davitt has completed terms for a settlement of the Liverpool dock strike. Both sides agree to resume work immediately.
