WASHINGTON MATTERS.

ARMY LEGISLATION.
WASHINGTON, July 24.—Representative Cushman, of Michigan, from the committee on military affairs has reported adversely the following bills affecting the personnel of the army: To regulate the promotion of the heads of the staff department of the army; to authorize the promotion of certain assistant surgeons after twenty years service; to increase the efficiency of the ordnance department; to retire certain officers for disability and for relief of officers who have served continuously in the grade of lieutenant for fifteen or twenty years without promotion.

AVAILABLE MILITIA.
According to the report of the census the schedule of militia population is 206,308, an increase during the last decade of 90,731.

THE FISHERIES BUSINESS.
The president yesterday sent to the house of representatives, in answer to the resolution introduced by Representative Hitt, the official correspondence between the government of the United States and the government of Great Britain touching the seal fisheries of the Behring sea. In his accompanying letter of transmittal to the president, Sec. Blaine, under date of Bar Harbor, July 19, regrets the delay in transmission which the president directed on the 11th instant, and says that the correspondence is still in progress. The correspondence includes thirty separate papers, beginning with a letter from Mr. Edwards, first secretary of the legation and charge de affairs, with Minister West's reply dated August 14, 1889, and closing with one from Secretary Blaine to Sir Julian Pauncefote, the British minister, dated July 19, 1889.

THE TARIFF DEBATE.
Several Weeks to Pass Before the Senate will Reach a Vote.

WASHINGTON, July 24.—Now that debate has opened in the senate on the tariff bill there is more or less speculation as to how long it will continue and what course it will take. There is a sort of tacit understanding among the Republicans to talk as little as possible on the bill, with the hope of hastening a vote on it, and also an understanding that the Democrats will talk as much as possible, with the double effect of postponing a vote on the tariff bill and of deferring action on the election bill.

It is generally supposed that about five or six weeks will be consumed in the discussion of the tariff, with other matters sandwiched in as the occasion may require. The most interesting feature of the debate will be that which will arise over Senator Hale's reciprocity amendment. There seems to be a general understanding now that this will be confined to the sugar schedule. As for the western senators and others, they have made a very vigorous protest against letting down the tariff to lead wool and other raw materials. This will, however, afford a wide scope for discussion and a general oratorical spread may be expected when this is reached.

POWELL'S SCHEME.
Favorable Outlook in the House for Agreement with the Senate.

WASHINGTON, July 24.—The opinion is growing that the house will accept the senate amendment to the sundry civil bill, repealing the act of 1888 concerning the irrigation and segregation of the arid lands. It is said that the house committee on appropriations has received new light on the subject since they passed upon the matter originally and will not contend long for the retention of the appropriation of \$750,000, as made in the bill when first reported for continuing this work.

Chicago's Big Fire.
SPRINGFIELD, Ill., July 24.—Pursuant to a call by Gov. Eder the general assembly met in special session at noon yesterday to consider three subjects, namely: A constitutional amendment authorizing the city of Chicago to add \$5,000,000 to its bonded debt for the world's fair, to pass such laws as may be needed to authorize the north, south, west side, or city parks for fair sites and to allow park commissioners to issue bonds for fair purposes; and to give to the city the right of eminent domain to condemn property which may be needed for uses connected with the fair.

The meeting was watched with a good deal of anxiety by the various committees that have the responsibility for the successful management of the fair. If the legislature evinces a similar spirit to the fair as was exhibited by the city council of Chicago, then it would be better for the reputation of the city and its continued prosperity if New York or even St. Louis had been selected as the site for the exposition. As a constitutional amendment has to be published at least three months prior to the day of election, the legislature must get through with the city bond question so that the publication may begin by the 2d or 3d of August. This gives the members only about eight days to do this part of their work.

FRUIT IS NOW FRUIT.

The Eastern and Southern Crop a Failure—Facts for New Mexico Producers.

New York, July 24.—The New York Commercial Bulletin says a call was made on leading fruit receivers in this city, and they were questioned in regard to the crops, as outlined by the advices of their correspondents. The reports in all cases were poor, and in very many instances they quoted total failures. The damage has, it seems, been general to all parts whence the east usually draws her supplies. Commencing in Georgia, which last season produced an elegant crop of peaches and this year has none, and following along up the coast the same state of affairs prevails through the several states until Maryland, Delaware and New Jersey are reached, where the absolute failure of the peach crop for the present year is so generally known that it is hardly necessary to mention it. It is stated on good authority that not a dozen car loads of peaches will reach this season. This is in strong contrast to thirty to fifty car loads regularly received daily in previous seasons.

Even New York state, which usually produces heavy crops of the various fruits, in tone with her southern neighbors. Up to June 1 this large one, but now the most doleful reports are being received from the western part of the state from the five large apple producing counties, to the effect that the fruit has fallen from the trees to such an extent as to warrant them in determining that the crop is a virtual failure. From other parts of the state come similar reports, and it is added that much of the fruit will be wormy.

Pears, peaches and plums will, it is said, be a very small crop, and most of the reports claim very poor quality. It is not yet definitely known whether the grape crop in the western part of the state will give a full yield or not, because the heavy rains last month are said to have seriously injured its keeping qualities. Many letters received from prominent growers state that in their judgment the grape crop will show much rot before reaching the market.

Reports from the eastern states in regard to apples are quite similar to those of New York state, and even Canadian reports are that this year fruit is falling from the trees. The sum of the whole matter appears to be that the fruit crops of all the coast states, from the gulf to Canada are virtually failures this season.

The supplies for consumption therefore, must come from the west, or California. It is fortunately that California has good crops this season, especially of peaches, plums, pears and grapes. There is one factor in the situation that will militate against very heavy receipts from California this season, however. This is the heavy demand there for canning, drying and evaporating purposes. Indeed, it is reported that 3 cents a pound is freely offered for peaches on the trees—a higher price than has ever before been known in that state. The California fruit seems to be carrying well this season, however; so it appears very likely that the eastern states will receive far more than ever before.

A COLORADO STORM.

Cloud Bursts and Floods Cause a Disastrous Wreck on the Rock Island Road.

COLORADO SPRINGS, July 23.—Yesterday two enormous clouds loaded with hail and torrents of water burst near Lyons, just east of here on the Rock Island road. The water rushed down the dry arroyo in volumes ten feet high, undermining the bridges which crossed it. The eastern express which left here at 7:45 was there along at the usual speed to reach the junction on time where this train is consolidated with the Denver train for the east. Without any warning the engineer dashed onto the weakened structure, when the timbers gave way and the engine, tender, baggage, express car, smoker and chair car piled on top of each other in the mud and water, a mass of wreckage and human bodies.

The engine turned over on its side, catching Engineer Bob McCormick underneath and crushing him to death. The fireman was thrown from the cab into the water and carried down the bank half a mile before he could reach the shore. He then hurried to the station and gave the news of the accident. A relief train was immediately sent out. One man, name unknown, was killed beside the engine. It seems miraculous that others were not killed.

The following are the names of the injured, all of whom will recover: A baggage master and express messenger, Hendrick, bad scalp wound; Raw falling, colored porter, severe scalp wound; Miss Annie Patterson, Mankato, Kas.; H. S. Baggs, Lincoln, Neb.; John Yates, Riley, Kas., shoulder, breast and back injured; H. Ball, news agent, face, head and legs badly injured; Mrs. Mary Travers, New York city, side and head badly bruised; Mrs. Elizabeth Keaton, Ezra, Kas., head cut. Of these Mrs. Travers is the most seriously injured.

CANON CITY, July 23.—About 4 o'clock yesterday afternoon a cloud burst in Grand canon, a few miles above this city, and soon afterward great waves of water came roaring down the Arkansas river with terrific force. The Rio Grande track washed out in several places, and considerable damage resulted to property along the banks of the river.

One hundred head of cattle were caught by the torrents in the canon and were washed down the river and drowned.

DENVER, July 23.—Yesterday morning there occurred a terrific catastrophe that has temporarily isolated the towns in Clear Creek canon from intercourse with the world.

At that hour there was an immense cloud burst, the forks of the creek pouring a deluge of water within the narrow walls of the canon.

It completely demolished the two iron railway bridges at the Forks, and as far as can be learned annihilated all of the other structures in the vicinity. The restaurant, the depot and all of the out houses were swept away in the flood. It is believed that no lives were lost. The immense volume of water laden with wreckage went tearing down the canon with the result that to-day from the Forks to Golden there is scarcely a vestige of the railroad left. The greater portion of the road bed is washed away and all means of communication are destroyed.

Cyclone Near Fargo.
MINNEAPOLIS, July 24.—A special to the Tribune from Fargo, N. D., says a cyclone passed over the north part of the county yesterday evening and seven persons were killed. Particulars are not known.

Alarm in Buenos Ayres.
BUENOS AYRES, July 24.—This city is greatly agitated in consequence of the discovery of a plot to overthrow the government. The palace is garrisoned by 4,000 troops and armed policemen. The bourse is demoralized.

Crops Maturing Finely.
ALAMOSA, Colo., July 24.—Several days since the water was turned out of the Empire canal as all the crops watered by it have had their last irrigation and are well advanced.

This is a marked contrast with last year, when more than half the crops here at this time needed one more, and many of them two irrigations.

Stencils, burning brands, seals, steel stamps, rubber stamps, and stamping inks of all descriptions, for sale by the New Mexican Printing Company.

For superior work in the line of book binding call at the New Mexican office. Orders by mail given prompt attention.

Harpers, The Century, Scribners, the North American and all other magazines bound in first-class style and cheap at the New Mexican bindery.

The New Mexican has facilities for doing first-class job work of all kinds and as cheap as can be had in any city in the country. There is no excuse for sending such work out of town, to Denver, Kansas City, Philadelphia or any other point. Keep the money at home.

THURSDAY, JULY 24.

Constitutional Convention Call.

LOS LUNAS, N. M., June 15, 1893.

In pursuance of the authority conferred by a resolution of the constitutional convention assembled in Santa Fe, N. M., in September, 1889, I hereby call a meeting of said convention to be held at the territorial capital in Santa Fe, N. M., on the 18th day of August, 1890, at 10 o'clock in the forenoon.

J. FRANCISCO CHAVEZ,
President of the Constal. Con.

During the Democratic administration, from 1885 to 1889, the expenses of the territorial prison amounted to \$52,000 per annum. During the first year under a Republican regime, from March 4, 1889, to March 4, 1890, the expenses, with the same number of prisoners, were \$29,000. It is plain to any person who can read and understand that the management under the Democratic administration was dishonest, and the management under a Republican administration is honest. That is all.

During three and a half years of the Ross boodle administration of the territorial penitentiary there was received from the labor of convicts and the feeding of United States prisoners the sum of \$7,500. During the first twelve months of the present Republican administration from March 4 1889, to March 4 1890, (there being about the same number of prisoners in the institution year per year, from 1885 to 1890) there was received the amount of \$8,000, from the same source. Facts are facts and these facts mean that the present administration of the territorial prison is honest and economical and efficient, and that the Democratic administration under ex-Gov. Ross was dishonest, extravagant and inefficient.

The people of New Mexico must not forget that under the Ross boodle administration, from 1885 to 1889, when this territory was cursed with corrupt judges and dishonest federal and territorial court officials, the cost of running the courts was \$160,000 per year; the people must not forget that, owing to wise and benevolent legislation passed by a Republican legislature over the veto of that boodle governor, put into office by Grover Cleveland, and owing to a just and honest administration of the courts, the entire expense of their administration for the first twelve months of the present Republican regime, amounted to only \$60,000, in which sum there is included an estimate of a deficiency in the pay of jurors, etc., of about \$10,000; this means that under the Democratic administration the people of New Mexico were systematically and constantly robbed by corrupt judges and dishonest court officials.

Thank you, thank you; the NEW MEXICAN is gratified to know that its course meets with the approval of all good citizens of New Mexico.

Let us have honest elections and a fair count throughout this broad land.

In twenty days the New Mexico state constitutional convention will re-assemble.

THANKS to a Republican congress and a Republican administration, silver is on top. The New Mexican lead and silver miner must remember this on election day.

THE NEW MEXICAN's low line brought about quite an improvement in the local mail service, and what is more it will in the near future help improve it some more.

The 28th legislative assembly passed some very wholesome and excellent legislation for the benefit of the people. Now let the people elect another Republican legislature and still more beneficial and timely legislation will be passed.

The Denver papers and the Denver business men should aid us in securing more prompt mail communication between Denver and Santa Fe. Both cities will be greatly benefited. The NEW MEXICAN is doing its share of the work in that line.

ORGANIZATION and loyalty to the ticket will win the day. Therefore the Republicans of New Mexico must organize. Bickerings and personal quarrels can be very well left over till after election, but on election day and during the campaign the utmost harmony should prevail. Take heed, gentlemen.

The wool growers of New Mexico have had a prosperous year and the wool they have raised, has brought them excellent prices. They must remember, that the protection policy of the Republican party has caused this favorable result to a large extent and should vote for that party, the one that stands by them and protects them and their interests.

The sentiment in favor of the adoption of a measure by the next legislature providing for the office of county surveyors is gaining ground throughout the territory. It is a subject that the next assembly should not fail to act upon. It will prove all around most beneficial, especially aiding in the collection of taxes and the perfection of land titles.

As we have remarked before, the sheriff of this county has paid nothing into the territorial treasury since February 12, 1890. The law requires that all territorial and county funds on hand on the 10th day of each month should be paid into the treasury of the county and territory then and there. Why is this law not obeyed?

MR. C. C. PUTNEY, who has charge of railway postal matters in Colorado and New Mexico, in accordance with the suggestions of the New Mexican, has ordered the much desired change in the transmission of mails between the chief cities of New Mexico as mentioned in this paper yesterday. The thanks of our business men and of the NEW MEXICAN are hereby extended Mr. Putney for his prompt and beneficial action in the premises. He seems to be an official who is ready to act for the best interests of the people and of the service.

The inventive genius of this country and Europe is at present engaged in efforts to practically apply the force of electricity to the treatment of ores. Already it may be counted a success, but still science and mechanics are striving to simplify the methods and that they will succeed there is not the least doubt. The processes so far discovered are especially valuable in the treatment of copper and zinc ores. There are vast quantities of imperfectly worked ores throughout the west which will some day be made to yield a grand revenue under the electrical system of treatment.

The farmers in the country are beginning to come to the front. They are holding the balance of power in the solid south. In Georgia they have caught the Democracy; in Alabama their opposition may defeat the Democratic ticket, and in South Carolina Capt. Tillman, the farmer's candidate, is waging a vigorous and hot war on the blue blooded Charleston aristocracy, that has ruled the state for years and has feathered its own nest at the expense of the people. The farmers' movement in the south will prove beneficial to the country.

THE REPORTS ON SAN PEDRO.

The NEW MEXICAN, as usual on the lookout for any and everything that can do the county of Santa Fe and the territory any good, will publish on Saturday a full report of the experts, who recently examined the vast property of the Santa Fe Copper company at San Pedro. The paper, containing the reports, will prove of great and material benefit to the mining industry of New Mexico. The report is a very exhaustive, correct and intelligent one, and the main report was prepared by that well known scientist, Prof. Cazin. Marked copies put in wrappers and ready for mailing, can be obtained after Saturday at the publication office of this paper.

GIVE THE NEWSPAPERS DUE RECOGNITION.

At the coming session of the legislature some very necessary legislation, changing the methods and the law in the matter of advertising legal notices of all kinds, must be had. The law as it stands now, favors the money lender entirely too much. All legal notices and all advertisements of sales under mortgages, orders of court, etc., should be advertised for at least four weeks in newspapers and the fullest publicity should be given to such things, both in order to keep all persons interested fully informed of what is going on, and because public policy would be subserved thereby. The newspapers of this territory can have the existing laws changed in the proper direction, if they take hold of the matter as they should. It is about time that it were acknowledged by the people of New Mexico that the newspapers of this territory, as a rule and with the exception of a few sheets not worthy the name of newspapers, are a very potent factor in the building up and advancement of this territory. The people as a whole, the business men, the lawyers, the miners, stock raisers, the farmers and the politicians, last but not least by a great deal, must be brought to realize this fact, and if the respectable papers of New Mexico get together and stand together, some greatly needed and good legislation in their behalf can be and will be secured at the coming session of the legislative assembly.

LET'S THINK ABOUT IT.

It is only a question of time, and not long, either, before the United States will have to extend its territory, and if it is possible to now acquire the island of Cuba, as the Spanish government has hinted it is possible to do by the payment of, say, \$100,000,000, it would appear good policy to do it. At the present rate of growth—the population of the United States will verge close to 100,000,000 during the next twenty years. In fifty years from now these figures will double. What's going to become of the people? When Gen. Sikes was minister to Spain he had almost closed negotiations for the purchase of Cuba by this government when the sudden death of Gen. Prim by assassination put a stop to it. Within a few days two representatives of the Spanish government have arrived in Washington to confer with the authorities on this subject, and their coming has aroused fresh interest in it. Outside of its rich soil productions upon which we now pay a duty, the island has twelve harbors, all of them superior to New York harbor. The navies of all the world could be hidden away so that it would require a search to find them around the Cuban shores. Cuba is almost as large as the state of New York and ten times more fertile. She can support and feed within her own borders 15,000,000 people. Her sugar crop within three years would repay us in duties, should we continue to collect them, the price of payment, assuming that payment to be \$100,000,000. More than all this, the road, and the broad open road to South America, would be opened at once to us. Our exports to the southern countries would have to travel less than one-half the distance now covered. This in itself is worthy of consideration in these trying times of over production here.

EDITORIAL COMMENTS.

THE COURSE OF THE NEW MEXICAN A WISE ONE.

The NEW MEXICAN calls attention to the fact that the fruits of the lower Rio Grande valley ripen fully six weeks before they do in Colorado and suggests that a market might be opened for the product in this state. The same is true of vegetables, and there is no reason why these early products should not be sold in this city in preference to those from California and the south. To this end the NEW MEXICAN suggests that a display be made at the coming state fair at Pueblo in order that the capacities of the Rio Grande valley may be advertised to Colorado and the world. The NEW MEXICAN wisely remarks that only "the choicest fruits should be sent for Colorado herself is going to make her best horticultural display there." It is only in early fruits and vegetables that New Mexico would be able to hold the Colorado market. When our own season comes on we have an abundance and to spare. The lower Rio Grande valley, however, is from four to six weeks earlier than Colorado in its seasons, and it is of this fact that its fruit growers and truck farmers should take advantage.—Denver News.

THE WAY DEMOCRATIC CONGRESSMEN ARE GIVEN A MAJORITY IN THE SOLID SOUTH.

WASHINGTON, July 18.—Robert Bullock and J. D. Alderson, who respectively misrepresented in the house the 2d Florida and 3d West Virginia districts, were today declared by the committee on privileges and elections to possess no title to their seats. Frederick S. Goodrich and James H. McGinnis, Republicans, on the other hand, were proclaimed the legal representatives of these districts in congress, and the committee recommended that they be sworn in. The ceremony is likely to follow soon after John M. Langston succeeds Venable. To-day's action makes it a total of sixteen cases decided by the committee this session, ten awarding seats to Republican and six to Democratic members. Bullock, according to the returns of the Democratic state board of canvassers, received a majority of 2,105.

The testimony taken shows that this majority was secured by ballot box stuffing and stealing and the intimidation of

voters by armed mobs. In many instances regulators seized the boxes before the votes were counted, carried them away, destroyed the tickets bearing the names of the Republican candidate and made the returns alone upon those inscribed with that of the Democratic candidate. In not a few districts men armed to the teeth marched to the polling places and threatened to shoot any one who protested against the failure to hold an election. The false registration was something almost unparalleled in the history of the state. Democratic election judges were armed with revolvers and shotguns, and, despite the protests of Republicans, struck from the lists hundreds of names of Republican voters. The committee reports that the Republican candidate has really over 700 majority.

According to the returns filed with the governor of West Virginia, McGinnis, Republican, had 33 majority over Alderson. Nevertheless the Democratic governor awarded a certificate to the latter. On a recount, made shortly after the election, enough further frauds were discovered to give McGinnis 218 majority. Notwithstanding this fact, Gov. Fleming declared Alderson regularly elected.—New York Press.

Try the NEW MEXICAN's new outfit of material and machinery when you want fine job printing or blank book work.

Improve the sidewalks and clean up the streets. Where is the chain gang that it is not kept at work on the public thoroughfares?

Job Printing.

Merchants and others are hereby reminded that the NEW MEXICAN is prepared to do their printing on short notice and at reasonable rates. Much of the job printing now going out of town should come to the NEW MEXICAN office. There is no better excuse for sending out of town for printing than there is for sending away for groceries or clothing. Our merchants should consider these things. The NEW MEXICAN is acknowledged the leading paper of this section. The patronage of the people will enable us to keep it so.

THE SPRINGER SPOUTER.

Further Particulars Regarding the First Discovery of Artesian Water in New Mexico.

Some further particulars touching the first discovery of artesian water in New Mexico are at hand from Springer. The find was made by John C. Taylor on land recently purchased of the Springer Land association and adjoining the well known Rock ranch at the junction of the Cimarron and Red rivers. The well is six miles below Springer, and the land is about 100 feet lower than the town.

Flowing water was struck at 250 feet. The first twenty-five feet was soil, then 200 feet of shale and blue limestone. The next fifty feet was hard sandstone. L. S. Preston, a civil engineer, inspected the flow and the surrounding country Monday, and he says the flow is 220 gallons per minute. The water contains soda, salt, sulphur and perhaps iron. Mr. Taylor has commenced work on an other well at his residence about one mile from the well just bored.

Many people from Springer and Raton have visited the spouter within a few days, and all are jubilant over this first find of flowing water in New Mexico. The Springers are particularly jubilant, and have taken steps to organize a corporation for sinking wells in the town. Now that the first well has been struck there others will feel encouraged to sink wells and in a short time, no doubt, that whole region will be pierced with a view to ascertaining the extent of the artesian well belt in northern New Mexico with Springer as its center.

This discovery is of untold value to all New Mexico, but it is of special worth to the Springer Land association, of which Col. Dwyer is general manager, and to the Maxwell land grant.

Hood's Saraparilla is in favor with all classes because it combines economy and strength. 100 Doses One Dollar.

THE MAIL SERVICE.

Another Communication from Chief Clerk Putney in Explanation of Suggested Changes.

The following self-explanatory letter is at hand to-day:

RAILWAY MAIL SERVICE,
 Office of Chief Clerk,
 Denver, Colo., July 23, 1890.

To the Editor of the New Mexican:
 Sir: Referring to my letter of yesterday, I would say that I am just in receipt of a letter from Postmaster Weltmer, of Santa Fe, in which he expressed a desire to assist in any way possible in the matter of improving the service. It is possible that when the matter was taken up before, it was with his predecessor; I do not now remember as the papers went to the department, but it seems proper to make this statement that his position may not be misjudged.

Referring to the inclosed, as I stated yesterday, there is no unnecessary delay to mail between Denver and Santa Fe. Mails are dispatched from Denver at 5:00 p. m. and 11:30 p. m. and arrive at Santa Fe at 4:50 p. m. and 8:25 p. m. next day. The first dispatch via La Junta, the second via Antonito. They leave Santa Fe at 7:30 a. m. and 1:30 p. m., and arrive at Denver at 9 a. m. and 10:30 a. m. next day, the first dispatch via Antonito, the second via La Junta. This is all that can be done under the present schedules. The greatest hardship is the Denver morning papers, which can not leave Denver until twelve hours after issue and which go into New Mexico by the same train as those from Kansas City and only four hours in advance of those from St. Louis.

Very truly,
 F. A. PUTNEY, C. C.
 Postmaster Weltmer was seen on this subject and states that his predecessor was the one who reported against the suggestion of placing an exchange pouch on the 1:30 afternoon train. He not only urged the necessity of this improved service, but has also suggested that another railway mail car be put on from La Junta southward so that the Denver morning news shall arrive here in the morning instead of at 4:50 p. m. as now.

SAN JUAN RAILWAYS.

Enterprises on Foot to Tap the A. T. & S. F. and the A. P. Lines—Surveys Begun.

Mr. V. D. Simar, chief engineer of the Rio Grande & Utah railway, laid before the San Juan county board last week a request that in some way San Juan county should aid the construction of the road to Algodones. An extended discussion developed that the commissioners can do nothing except to recommend a general subscription among the citizens, and that later in the year would be a better time to take the subscription. So a resolution was adopted by the board recommending such subscription and appointing a committee of leading citizens, one from each precinct, to arrange for a public meeting at Aztec some time in court week the first week in September to devise and set on foot the best method for securing a liberal subscription toward the end requested.

Another line, apparently inaugurated in opposition to the Durango-Algodones enterprise has now surveyors in the field running south from Durango. Major Hanna, who is manager of the Montezuma valley irrigation canal built by the Havemayers and other New Yorkers is in charge of the scheme. John Harper, of Durango, chief engineer and a surveying party are now at work in northeastern New Mexico on this line and their object is to secure the shortest connection between Durango and Coolidge, on the A. T. & S. F. road. This week the party will start south from Cortez, around Mesa Verde to Olio and Farmington, and from the latter place start southeast and thence along the eastern line of the Navajo reservation. Returning, they will run from Farmington to Durango.

Major Hanna gives the following figures as covering the mileage of the proposed road: Durango to Olio, 60 miles; Cortez to Olio, 50 miles; Olio to Coolidge, 80 miles; being a distance 140 and 130 miles respectively from Durango and Cortez to Coolidge.

Major Hanna is now in Durango and says that eastern capital has been secured for the work contingent upon the length of line, cost of construction and volume of traffic which can be safely relied upon to accrue to such connection upon its completion.

Try the celebrated Heston creamery butter in pound prints at Bishop's.

Spring chickens at Bishop's.

SECOND ANNUAL CONVENTION.

Representative Republicans of the New Mexico League to Assemble in Santa Fe To-morrow.

The second annual convention of the New Mexico branch of the national Republican league of the United States will be held in Santa Fe to-morrow.

Through the untiring efforts of Hon. A. L. Morrison, the president of the New Mexico branch, this organization has grown rapidly in numbers and influence during the past eighteen months, and it is expected that at least sixty delegates representing every county in the territory will be on hand to-morrow.

The convention will be called to order in the court house at 11 o'clock to-morrow forenoon.

Among other matters of business to be attended to are the reading of reports, the appointment of executive committees for the promotion of party interests in the various counties, the more perfect organization of the Republican party, the election of officers, etc. The gathering has absolutely nothing to do in the line of pushing any man's candidacy for office.

After the labors of the day are over the delegates will be treated to a banquet in the evening. This will take place at the Hotel Capital dining hall and will be prepared by G. M. D. Davis, proprietor of the Alamo hotel.

Best 5 cent cigar in town at Bishop's.
 Salt mackerel, white fish, sliced ham, bologna and breakfast bacon at Bishop's.

PERSONAL.

Robert Douthitt, of San Pedro, is at the Exchange to-day.

Hon. Eugenio Romero, assessor of San Miguel county, is in the city chatting with friends.

Theo. Seth, a prominent citizen of Park View, Rio Arriba county, is at the Exchange.

B. B. Buell, representing the Buell manufacturing company, St. Joe, is at the Palace.

James Gatchel, New York; John C. Gillan, Chicago, are among the arrivals at the Palace to-day.

Mr. L. C. Tetard is over from Las Vegas. He finds many here to sympathize with him over the death of his wife.

Hon. Juan Santistevan, merchant, banker and respected citizen, is in the city from Taos. He will remain a day or two. His business is of a private nature.

The very best Patent Flour in the city at Emmert's.

Milk 10c a quart; 5c a glass, at Colorado saloon.

ROUND ABOUT TOWN.

In the archbishop's garden are English walnut trees that will yield 25 worth of nuts per tree. They are a pretty sight.

There is considerable activity among Santa Fe mechanics at this time. It is the busiest summer the builders here ever had.

By order of Messrs. Trinidad Alarid and Anto. Ortiz y Salazar the break in Don Gaspar avenue was repaired yesterday afternoon.

Another welcome rain this afternoon—a good deal of a soaker. Range men say these rains have been general all over northern New Mexico, and that the prospects for plenty of winter grass are good; in fact, the range promises to be better than for five years past.

It is impossible to find adjectives to picture the beauties of a basket of fruit which Mrs. Manderfield kindly sends the New Mexican to-day. Her orchard and garden is a bower of luscious beauty at this time. The late Judge Manderfield was one of the pioneer fruit growers in New Mexico; in fact, it was Judge Manderfield and Archbishop Lamy who introduced into this region the best of the choice fruits which our people now are permitted to enjoy.

Judge Stephen E. Booth, chairman of the San Miguel county board, and one of the most companionable of gentlemen, is here from Las Vegas to-day, registering at the Palace. It was away back in New Haven, Conn., that Judge Booth earned his title, and he is worthy of it. He it was who acted as magistrate at the preliminary hearing of the noted Malley boys, accused of the murder of the beautiful young girl, Jennie Cramer. Dr. Malley who fell from his horse at Aspen, Colo., the other day and was killed, was, as reported in the papers, implicated in this crime. He was a brother of Walter Malley, one of the accused parties, and the other young man implicated was James Malley, a cousin of Walter. The boys were kept in jail a year by Judge Booth's order, and were finally acquitted by a higher court.

Try those fine teas at Emmert's.

Bountiful Rains.

Northern New Mexico along the Rio Grande valley and the southern portion of the San Luis valley in Colorado have just had a baptizing of which the oldest inhabitants have no knowledge of the like as taking place in midsummer. It was a steady downpour lasting for four hours, and thoroughly saturating the ground.

About La Jara the deposit of moisture was the greatest, leaving large ponds, pools and puddles of standing water that will remain for several days. Many farmers had just finished irrigating their wheat for the last time, and they now fear damages to their crops from excess of water. There is no danger of this with the oats and barley and these crops are doing grandly.

The beautiful showers of the past few days have delayed haying, and this delay will prove an advantage. By the first of next week there will be several large outfits at work in the field cutting grass in this section.

Hay signs at this date are all more of an improvement than a month ago, and better than an average yield is now expected from all quarters.

What It Does.

1. Purifies the blood.
2. Creates an appetite.
3. Strengthens the nerves.
4. Makes the weak strong.
5. Overcomes that tired feeling.
6. Cures scrofula, salt rheum, etc.
7. Invigorates the kidneys and liver.
8. Relieves headache, indigestion, dyspepsia.

TERRITORIAL TIPS.

Much land is being located in the Folsom land office district.

There are eighty-five guests at the Phoenix hotel, Las Vegas hot springs.

Mrs. Lobato, of Rancho de Atrisco, dropped dead yesterday. Heart disease.

The San Juan county Ladies' Aid society is preparing for an entertainment to be given at Aztec during court week.

The mail from Elizabethtown to Taos has been discontinued by order of the postmaster general. A petition has been sent asking the establishment of the same again.

Last week the county boards of San Juan county, N. M., and La Plata county, Colo., held a conference at Durango, and entered into an equitable arrangement for taxation of stock ranging in both counties.

James E. Wall, better known as "Mexican Jim," is in the city looking for men to work on the Durango & Dallas road in Colorado. He wants 100 men, and promises good wages. He goes down the road this evening.—Albuquerque Citizen.

Mr. Desloge, of St. Louis, came to the city last Saturday and is the guest of Dr. T. E. Owen, at the Herford Park ranch. He says he had in St. Louis a number of men, and he came here for a fresh breath of our pure mountain air.—Folsom Metropolitan.

C. C. Fitzgerald has returned from Deming, N. M. He has purchased the Cumming mine, of Cook's Peak, terms private. He reports American mine of Hatchita as OK, and also has received good news from his Surprise mine, of Cook's Peak, N. M.—El Paso Bulletin.

At Albuquerque all water tax must be paid at once or the water will be shut off. The hours for sprinkling are from 6 to 8 o'clock a. m., and from 7 to 9 o'clock p. m. Hereafter anyone using the water for sprinkling other than the regular hours will have the water shut off without further notice.

The Gallup strike of the coal miners has been settled and work on all the mines was resumed yesterday. All grievances are left with a board of arbitration. The operators selected Ben. L. Jones, the miners Rev. J. D. Bush, and these two gentlemen will select a third party. Everyone is elated over the outcome and satisfied that justice will be done to all concerned.

Las Vegas note: The total assessed valuation of the county is \$6,081,824.41. The assessment of precinct 29—East Las Vegas—is \$1,427,389.50. Precinct 5, \$417,561.48; precinct 26, \$424,431; making a total for West Las Vegas of \$871,992.48, and a grand total for East and West Las Vegas of \$2,299,381.98, showing that Las Vegas proper pays over one-third of the entire taxes of the county. The land grants situated in San Miguel county are assessed at \$771,125.75.

Socorro, N. M., considering its population and the means invested within its limits, is as prosperous as any point in the southwest. As for its future, the mines that surround her, the rich agricultural lands in which she nestles like a gem and the area of her pasturage that extends beyond the vision, from the summit of her highest peak, is a guarantee that in time those who have remained to struggle for her advancement will reap the reward of their constancy and courage.—El Paso Bulletin.

Fresh vegetables and fruits received daily at Emmert's.

Building Tactics.

Mr. Cayetano Rodriguez, a peaceable and hardworking and honest man, a citizen of precinct 3, in this county, has been furnished with the following notice:

Mr. Cayetano:—We have been informed that you are one of those who favor and support the Republican party, the fence law and reserve law. We do not want you to continue obeying your children's orders, for if you do it, you will have to suffer the consequences of an angered people. Should you still insist in supporting the persons who are against the poor people, a rope for your neck will be your reward. Should you remain in the political party to which you have to this date belonged, together with your sons, you will suffer the punishment. We want justice, and want you and your sons to do what every rational being will do or we will hang you on the first pine tree near your house.

[Signed] "LOS DE SAN MIGUEL." The New Mexican does not know who the idiots were or the idiot was who make these threats, but it will be very well for any and all persons to understand that such business will not be tolerated here and the Democratic bosses had best haul off their underlings, if they know what is good for them.

Try those fine candies at Bishop's.

Advertising Does It.

A gentleman writing to a Santa Fe business man from New York city says: "I am about leaving this city on a western trip and in course of it think of coming to Santa Fe. I am informed by New York parties that great prospects are about to be realized in and about Santa Fe and the northern part of your territory, and that enterprise with capital would not only be profitable but appreciated." Thus it is that Santa Feans ought to feel encouraged to advertise our resources here. If the truth can be known there will be no lack of capital coming here to improve and build up a beautiful city.

ARMY ORDERS.

No officer has yet been assigned to command the department of Arizona, and since Gen. Grierson's retirement, Gen. Miles, division commander, is in charge. Lieut. Van Vliet leaves on Sunday for Fort Bayart to assist in conducting the department rifle competition. Among those on the department team are 1st Sergt. C. E. Green, company D, and 1st Sergt. Wm. Gleason, company I, of Fort Marcy.

Hospital Steward Frederick Schumacher will be relieved from duty at Fort Bennett, S. D., and proceed to Fort Union, N. M., for duty.

Two months of the sentence of general court martial, department of Arizona, are remitted in the case of Lewis H. Jackson, late private company C, 24th infantry, now in the Kansas City penitentiary, Lansing, Kan.

Private Christ Christensen, company E, 9th infantry, now at Fort Lewis, Colo., is transferred to troop E, 4th cavalry, stationed at Vancouver, barracks, Wash.

In compliance with instructions of the secretary of war, a board of officers will convene at Whipple barracks, A. T., to examine into and report upon the qualifications of such enlisted men for appointments as post quartermaster sergeants as shall be ordered before it. Detail for the board, Major Richard Combs, 9th infantry; Capt. George B. Russell, 9th infantry; 1st Lieut. George Palmer, 9th infantry.
