PRINCETON BEATEN BY DARTMOUTH IN HARD GAME

After Eleven Outplayed on Water-Soaked Field; Yale Held to No Score by Washington and Jefferson.

Princeton, N. J., Oct. 25.—Dartmouth defeated Princeton in a hard-fought football game today at Princeton. The game was played on a water-soaked field, and Princeton was the most outplayed team of the game. The game was a hard-fought one, and Princeton was the most outplayed team of the game. The game was a hard-fought one, and Princeton was the most outplayed team of the game.

Harvard 29; Penn. State 0. Cambridge, Mass., Oct. 25.—Pennsylvania State college's first invasion of the Harvard gridiron in many years ended in a hard-fought game today. Harvard, with a comparatively easy win by 29-0. The Crimson team scored four touchdowns and a field goal, and captured the ball on downs on the Harvard line.

Colorado Miners 7; Utah 0. Salt Lake City, Oct. 25.—Seven of their feet in the first few minutes of play the University of Utah eleven went down to defeat before the Colorado School of Mines. The game was a hard-fought one, and Princeton was the most outplayed team of the game. The game was a hard-fought one, and Princeton was the most outplayed team of the game.

Colorado 16; Aggies 7. Boulder, Colo., Oct. 25.—Colorado University, in a with the Aggies game today, defeated the Colorado Aggies here today by a score of 16-7. A muddy field, a steady fall of snow and much fun were marked features of the game. The Aggies were unable to score, except in the last quarter. Then by a series of steady plunges the Aggies pushed Divillon, quarterback, across for a touchdown and Murphy kicked the goal.

Yale 0; Washington-Jefferson 0. New Haven, Conn., Oct. 25.—With Yale field a quagmire and a putting rain falling during the game, Washington and Jefferson held Yale to a 0-0 score this afternoon. Playing conditions could scarcely have been worse and both teams played below par in consequence.

Pittsburgh 20; Cornell 7. Ithaca, N. Y., Oct. 25.—Outplayed throughout the first half with the score 7-0 against it, the University of Pittsburgh football team turned the tables on Cornell with a vengeance in the latter part of the game today, winning 20-7. The field was muddy and all of the Pennsylvania touchdowns were made on fumbles. In the final period Barrett dropped a

point and Wagner picked the ball up and ran fifty yards for Pittsburgh's third touchdown.

Chicago 6; Purdue 0. Chicago, Oct. 25.—Pete Russell, Maroon quarterback, weakened Purdue's hopes for the conference championship and earned a place among the University of Chicago's immortals. His two drop kicks scored the only points in a hard fought game today. The Maroon won, 6-0 today.

Poor generalship was partly responsible for the defeat of the Maroon. The last part of the last quarter was practically a procession toward Chicago's goal, forward pass after forward pass moving the ball from one end of the field to the other, but there was not time for a touchdown. Had Coach Smith's men tried the pass earlier to the game they might have made a better showing but they depended on straight football and Stagg's players stopped that game. Campbell and Applegate, dashing themselves in vain against the Maroon line.

The result of the game and the tie to which Purdue held Wisconsin last week, makes Chicago's favorite for premier honors in the "Big Nine."

South Dakota 42; Denver 0. Sioux Falls, S. D., Oct. 25.—Outplayed from the first minute until the end of the third, where they finally held the Coyotes to small gains, the University of Denver this afternoon was defeated by the University of South Dakota by a score of 42-0.

Denver was outplayed all along the line. In both offensive and defensive play, never breaking away for big gains at any stage of the battle. Charley Rowe, left halfback for South Dakota, featured the game with a startling eighty-yard run across the field for a touchdown from a kick-off by Denver.

Ray Breaks All Records. San Francisco, Oct. 25.—Playing with splendid judgment and control, and missing nothing on the greens, Edward Ray, world's champion golfer in 1912, broke all records for the course today at the San Francisco Golf and Country club links, making the thirty-six holes in 123 strokes. Harry Vardon, four times champion of the world, was second, with a score of 125.

Princeton Crew Beats Yale. Princeton, N. J., Oct. 25.—Princeton's eight-oared crew defeated Yale this afternoon over a one mile and five-eighths course on Lake Carnegie by a scant two lengths. The time for the Princeton boat was nine minutes 46.2 seconds.

MATTHEWS TO BOX THIS AFTERNOON AT GYMNASIUM

Fans Invited to Be Present to See St. Louis Lightweight in Action; Shafer Starts Training in Few Days.

Pierre Matthews, the St. Louis lightweight, who has been scheduled to box Harry Shafer, the local lightweight, ten rounds November 4 at Ellis theater, will work out this afternoon at the New Mexico A. C. gymnasium.

The fans are invited to be present this afternoon to see Matthews in action. He is said to be a class beginner and a fighter with a reputation, having lost some of the best boys in the business during his career.

Shafer will start training in a few days. He does not anticipate any trouble in beating Matthews, for they who know the St. Louis boxer's record say he will give Shafer one of the toughest battles he has ever engaged in.

Matthews this afternoon will box with several boys. He hopes again to put on the gloves with him.

Famous Racer Retired to Stud. London, Oct. 25.—The famous racing colt, Tracery, belonging to Admiral Belmont of New York, has been retired to stud, according to announcement made here today. The colt, for which \$200,000 was paid by his owner on September 20 last, is to be retired immediately to the stud. He was retired to stud because of a severe injury when he was scratched from his next week's engagement.

Congregationalists Den Prejudice. The Congregational Sunday school football team defeated the Presbyterian team 25-0, yesterday morning at Association park.

Attorney Wilson Is Advised of Decision. Santa Fe, N. M., Oct. 25.—Today to the recent decision of the United States supreme court, affecting the future of the Pueblo Indians of New Mexico, Attorney Francis J. Wilson, of this city, special attorney for the Indians, has received the following telegram, which is self-explanatory.

Washington, D. C., Oct. 24. "Francis J. Wilson, Santa Fe, New Mexico. Victory complete. Enabling act constitutional. Conditions imposed which require power over Indians which ignores state boundaries. You have secured the future of land (its and possible) relationship. Joseph case distinguished as in our brief. L. G. BISHOP, Interior Department."

RECORD PINON CROP SOLD AT MOUNTAINAIR

Mountainair, N. M., Oct. 25.—One of the largest crops of pinon in Santa Fe county has been sold today. It is estimated that three cars will be shipped from this point alone and many others are heading to Moriarty, Espanola and points in the San Mexico. Central. The pinon is sold at a price of \$25 per car. The Mountainair Lumber company for its largest lot for the fall work. The Mountainair pinon is much larger than usual and are well-filled with the absence of cankers and holes which were almost a complete failure in this locality. The pinon is a life-saver.

PRESIDENT RIPLEY SAYS SANTA FE WILL RETRENCH THIS YEAR

Tepeka, Kan., Oct. 25.—Tepeka, then will be the policy of the Santa Fe during the next year, according to President E. P. Ripley, of that system, who was in Tepeka this week to attend the annual meeting of Santa Fe stockholders. The head of the Santa Fe system declared that the railroad for the railroad is not at all over with employees and dealers in materials asking more money all the time and legislatures and the interstate commerce commission reducing rates and requiring costly expenditures by the railroad.

Retirements and extensions will have to wait for more favorable conditions, when money is more plentiful and to be had at lower rates of interest and other conditions are improved, he said.

"We are not going to spend any money during the next year, except what we really have to spend," said President Ripley.

"We don't expect to have to spend according to the present outlook. I fear we will have about all we can do to earn our dividends and pay our interest charges. From present indications I am prepared to see our gross income fall off five or six millions of course, I shall be mighty well pleased if they do not, but that is the present outlook."

"The railroads are being languished by the labor organizations on the one hand and by the legislature on the other until it is pretty hard for the railroads to live."

"I don't look for the new tariff to affect the railroads to any great extent, nor do I believe that the commerce bill will do any harm because of the tariff. I am rather inclined to favor free trade myself, and so I am glad to see the tariff lowered."

Miss Kay reads past, present and future truthfully and accurately all affairs of life, love, health, wealth, marriage, health, journeys, patents, etc. Has read in all the principal cities from the Atlantic to the Pacific. Highly spoken of in press and public. Is giving entire satisfaction to the public in general. At Secor's N. M., for the past week.

MATHEWSON LOSES TO LEVERENZ BY 4 TO 3 SCORE

Chicago Americans Win From New York Nationals in Exhibition Game at St. Joseph; Hal Chase Injured.

BY MORNING JOURNAL SPECIAL BUREAU ST. JOSEPH, Mo., Oct. 25.—The Chicago American league baseball team defeated the New York Nationals tonight here this afternoon by a score of 4-3. In the eighth inning, Hal Chase, first baseman of the Cubs, suffered an injury to his ankle and was replaced by White.

Score: Chicago 100 102 000-4 11 2. New York 000 010 010-3 2 2. Batteries: Leverenz and Schmitt; Mathewson and Meyer.

VARSITY GRIDIRON WARRIORS DEFEAT INDIANS 44 TO 0

Coach Hutchinson's Men Surprise Most Optimistic Supporters by Fast Play; Redskins Put Up Good Game.

Playing a hard, versatile brand of football, the University of New Mexico eleven overwhelmingly defeated the Albuquerque Indian school team 44-0, yesterday afternoon on the Association park field. The Redskins outplayed about ten points to the Indians and without the services of their old linemen, the Redskins were quickly outplayed. But they put up a pretty, creditable game all the way.

Coach Hutchinson's men surprised most optimistic supporters by fast play. The Redskins put up a good game. The Indians were outplayed about ten points to the Redskins and without the services of their old linemen, the Redskins were quickly outplayed. But they put up a pretty, creditable game all the way.

The Indians kicked off against a strong wind in Haskell. The varsity walked the ball down the field rapidly, both Haskell and Haskell gaining ground consistently. Haskell's line was not as good as the varsity's. The varsity's line was not as good as the varsity's. The varsity's line was not as good as the varsity's.

DEPUTY SHERIFF IS KILLED IN FIGHT WITH STRIKERS AT TRINIDAD

John Nimmo, of Denver, Found
Dead Beside Railroad
Tracks After Battle Between
Miners and Guards.

MORE THAN THOUSAND SHOTS ARE EXCHANGED

Severe Blizzard Raging Over
Country Prevents Threat-
ened Attack on Deputies at
Ludlow.

Trinidad, Colo., Oct. 25.—In a battle between striking miners and guards this afternoon which lasted from 2 o'clock until 5 o'clock, John Nimmo, of Denver, one of the guards, was killed. After the battle was over and the guards were checked up, Nimmo was found lying on the ground, his head having been struck by a bullet. He was found by the guards, who had been ordered to search for him. He was found lying on the ground, his head having been struck by a bullet. He was found by the guards, who had been ordered to search for him.

A strike, a shooting, a battle, a death. The battle started when deputies who had gone to the depot to meet the train were fired upon by strikers who had left the colony and entered themselves at the railroad bridge of the Colorado & Southern. A half mile south of the depot, over a thousand shots were fired and that more were fired until it was in the fact that most of the shooting was done at long range.

Miners gained circulation here tonight that the miners from the entire colony were gathered at Ludlow, but the severe blizzard that is raging here is believed to have sent them to their homes. The storm is the most terrific experienced in this territory in some time and it is expected that it will be here to stay for some time.

MRS. EATON TAKES STAND IN HER OWN BEHALF

Widow of Admiral, After Re-
viewing Story of Her Life,
Enters Vehement Denial of
Poisoning Charge.

St. Louis, Mo., Oct. 25.—An incident denied that she ever gave her husband poison of any sort brought to a dramatic close today the direct examination of Mrs. Josephine Eaton, widow of Rear Admiral Joseph H. Eaton, with whose murder she is charged.

Sitting in the witness box, where she had passed the day reviewing the story of her life, Mrs. Eaton leaned forward in her seat and said: "I have still here a trace of the habits I was while in my husband's house. I have still here a trace of the habits I was while in my husband's house. I have still here a trace of the habits I was while in my husband's house."

"Do you know anything about poison?" she was asked.
"No, sir," she replied.
"Did you administer any white arsenic to your husband?"
"Why, that is the most absurd thing I ever heard of," replied the witness. "No, sir, never in my life."

"Did you ever see your husband with any other poison?"
"No, sir."

Attorney Moore continued at this point that the direct examination was ended, and cross-examination was taken up. Moore asked the witness if she was certain that she had not administered any poison to her husband.

Putting down of her six days in the witness box, Mrs. Eaton described her life from the time she arrived in St. Louis from her husband's house, the latter in which she was living. She described that she had been married for 15 years.

GERMAN CITIES BUY RADIUM TO TREAT CANCER VICTIMS

Initial Appropriations Already
Reach Astounding Total of
Six Hundred Thousand Dol-
lars.

Berlin, Oct. 25.—In view of the promising results obtained in the treatment of cancer by radium, German cities have voted money for the purchase of radium and its use in the treatment of cancer.

The first appropriation was made by the city of Berlin, which has voted \$100,000 for the purchase of radium. Other cities have followed suit, and the total amount of appropriations for the treatment of cancer by radium is now \$600,000.

Public interest in these substances has created a rare opportunity for the purchase of radium at a low price. The German government has recently ordered the purchase of radium at a low price.

Master's Absence and Die.

Philadelphia, Oct. 25.—Hornes, the orang-utan, which Dr. William H. Furness, of Washington, had educated to a high degree of intelligence, is dead. Belling, the chimpanzee of Borneo, also is dead.

Dr. Furness learned at his last hour his return from a summer's vacation in Europe. The orang-utan was estimated at \$5,000, the chimpanzee at \$10,000. The animals died in September—Belling, of pneumonia, and the absence of their master caused death.

The eyes of the psychological world were fixed upon the remarkable mental progress made by Borneo, even "Belling," the chimpanzee, never attained the status of Borneo. The animal probably did more to trace the marked similarity of the human and monkey brain than any of the Darwin experiments.

Borneo and Belling were purchased on the island of Borneo by Dr. Furness in 1904. The animals were trained, made family pets, and then the tedious task of teaching began.

Borneo, 3 years old, was the best pupil. She readily learned to pick up a bunch of certain keys with which to open a lock. To turn off a water faucet, to play tricks on Belling and Mimi, the educated chimpanzee, to throw a needle and to pick pockets, soon became daily accomplishments.

Then she learned the alphabet. The monkey could read any designated letter, or start at the first and go through the alphabet to the last letter without an error. Wooden letters were used.

After learning the alphabet, she began to speak. The words "papa" and "mama" were perfectly pronounced. The animal then learned to distinguish colors and could pick any color in a room or from a box of blocks. She could understand Dr. Furness in many of his commands.

The experiments were purely scientific. The secrets of the laboratory were carefully guarded. Only scientific and personal friends knew of the progress made in the investigations. The mental life of Borneo will probably be the subject matter of an extensive book.

Belling, a male child of four years, was not brilliant. She was sympathetic and affectionate, according to Dr. Furness, but never was an apt pupil. The chimpanzee, however, between the two animals was of great scientific value.

Mimi, the chimpanzee, alone remains. When Dr. Furness walked into the great observatory last week, she immediately recognized him and came running, hugged him tightly and kissed him repeatedly. Her price of delight could be heard over the entire estate. Today, within an hour of Borneo's death, she was the most intelligent animal in captivity, and the one which Dr. Furness said could continue study and teaching.

A 1908 representative yesterday was permitted to accompany the psychologist into the cage. Mimi, who stands about four feet high, extended her hand in greeting. She fairly beamed. Furness took her to the kitchen and walked into the garden. There a little black dog began romping with the animal. A broken tin can, an enemy of the chimpanzee, she picked up and threw it.

Mimi then was fascinated and attracted to a long cord. This is a new and a revolutionary measure, as the animal enjoys climbing trees. While she always returns, even an educated chimpanzee with a chimpanzee face has no charm for a stronger, particularly when an entirely new group of human, which break an arm. Mimi, however, is a docile, tender-hearted and kind.

A tour of the estate was then made. Mimi called on the cook, did a little dance for her, picked up chocolate on the lawn, a few apples, screamed at a hired man and again chased the broom dog. Part of the time she walked about, part of the time on all fours.

Then came the varicolored blanket. She took a distinguished color. Then she pointed to objects named by Dr. Furness. She knows the names of many parts of the body and general objects about the cage; she can open

IN ONE MINUTE CLOGGED NOSTRILS OPEN—COLDS AND CATARRH VANISH

Stops Nasty Discharge, Clears Stuffed Head, Inflamed Air Passages and You Breathe Freely.

Try "Eli's Cream Balm."

Get a small bottle anywhere, use it to try it—Apply a little in the nostrils and instantly your clogged nose and stuffed-up air passages of the head will open, you will breathe freely, and the headache disappear. By inhaling the catarrh, cold-in-head or catarrhal nose throat will be gone. And such relief now! Get the small bottle of "Eli's Cream Balm."

At any drug store. This sweet, fragrant balm dissolves by the heat of the nostrils, penetrates and heals the inflamed, swollen membrane which lines the nose, head and throat; clears the air passages; stops nasty discharge and a feeling of choking, soothing relief comes immediately.

Don't be awake to-night, struggling for breath with head stuffed, nostrils clogged, hacking and blowing. Inhale of a cold, with its running nose, foul mucus dropping into the throat, and raw dryness is distressing, truly needless.

Put your faith—just once—in "Eli's Cream Balm" and your cold or catarrh will surely disappear.

HE WILL BE AT THE ORPHEUM THEATRE TONIGHT

SELLERS PRESIDENT OF THE OCEAN TO OCEAN HIGHWAY

National Association Honors
Albuquerque Mayor; Frank
McKee, Treasurer and John
Becker, Jr., Secretary.

SPECIAL DISPATCH TO MORNING JOURNAL.
Los Angeles, Oct. 25.—The national association of presidents of the Ocean to Ocean Highway, D. K. R. Sellers, of Albuquerque, N. M., was today elected president of the Ocean to Ocean Highway association in annual convention here, succeeding C. A. Wilbur, of New York. Other officers elected were John Becker, Jr., of Berkeley, N. M., secretary, and Frank McKee, of Albuquerque, N. M., treasurer. The custom being to elect these officers from the same section to facilitate their work. The association's work for the next year will be directed from Albuquerque, where headquarters will be established.

The association elected Fred T. Collier, vice president from Arizona, and C. O. Barker, vice president from California. The executive committee for New Mexico includes J. A. French, of Santa Fe; W. M. Horrold, of Magdalena; and H. M. Dougherty, of Socorro.

The Los Angeles Chamber of Commerce extended the visiting delegates a hearty welcome. The Southern Automobile association yesterday took the delegates for a fifty-mile automobile ride over the city, and today the delegates will be taken to the next convention of the association, which will be held at Yuma, Ariz., in 1914, and in 1915, the association will meet at Springfield, Ariz.

It was stated by delegates attending the convention that over \$1,000,000 are now available for work this year on Arizona and California portions of the Ocean-to-Ocean highway. The delegates will be guests of the Los Angeles Chamber of Commerce tomorrow on a trip to San Diego. Colonel Sellers, in his speech of acceptance, declared that New Mexico had more good dirt roads than any other western state, the only difficulty being that they were not bonded to the motor car tourist could find them. He gave Governor McDonald and State Engineer French special credit for the road improvement so far accomplished.

UNITED STATES IS GUARDING WATER POWER SITES

Permits Issued to Companies
Require Fixed Amount of
Low-Priced Current to Be
Supplied to Consumers.

SPECIAL DISPATCH TO MORNING JOURNAL.
Washington, Oct. 25.—Something of the future of the water power industry in the intermountain states, and through light on the policy of the conservationists, is that the water power streams shall remain the property of the government for the benefit of the whole people, is shown in the official statement just made by the department of agriculture that the unused water power in the national forest reserves is capable of developing between 10,000,000 and 15,000,000 horsepower in the form of low-priced electric current. It is perhaps impossible for the average individual to comprehend fully the quantity of power expressed in these figures, but when it is said that the great dam recently completed across the Mississippi river at St. Louis, La., at a cost of about \$25,000,000, will generate about 250,000 horsepower, or enough to supply the major part of the power demands of a large radiating territory, and that a portion of that power is already being used in the pumping of St. Louis, almost 200 miles away, some inkling will be had of the tremendous value of the water powers of the Rocky mountains located inside federal forest reserves.

There is enough of this power for instance, to electrify every railroad crossing the mountains from the Great Northern on the north to the Southern Pacific on the south, without appreciably diminishing the amount of power available to the general public. "In many of the districts adjacent to these natural sources of power," says Assistant Secretary Callaway of the department of agriculture, "there is not yet a large enough demand for current for use in existing commercial activities to warrant power companies in paying high rentals and building expensive plants for the delivery of current to such users. It has been found, therefore, that to bring about the immediate establishment of power plants and thus to avoid the continued waste of this water power in many sections, permits must be granted power companies upon terms under which the current can be developed cheaply enough to be used in building up new industries which would be unprofitable without a supply of cheap power."

Under a plan which has been agreed upon between the secretary of the interior and the secretary of agriculture, the people at large will be able to get cheap power, as the maximum rate which the power companies may charge is definitely fixed in the permit.

The departments have also surrounded their permits with provisions which prevent power companies from getting control of those public water powers merely for the purpose of promoting the sale of stocks and bonds. The permits, therefore, have been framed to make certain that companies desiring waterpower rights shall supply a given minimum of current at specified rates to outsiders.

"In order to make certain that power companies cannot exercise a monopoly and use the entire current for their own purposes, the departments require these power companies to sell at least one-half of the power they develop as rapidly as outside users request its delivery."

It is the policy enunciated in the

statement by Assistant Secretary Callaway which will be depended upon to prevent a monopoly of this great water power treasure of the western mountains. All permits for power from this time on will be based on the basis of the new policy, and ultimately the water power in question should be developed with an opportunity for the small user just as great as that for the large user.

To show concretely how this new policy will be put in effect, it will be interesting to observe how it was applied in the contract for power recently made by the government with the International Power & Manufacturing Co., for the development of the water power of the Poudre river in Idaho. In the district around this water power site there is at present no demand on the part of private consumers for large amounts of current. The contracting company, however, held that it could obtain a satisfactory permit if it would be able to use at least one-half the possible power in the manufacture of nitrates. After careful investigation the government decided to issue the permit to the company reserving the other half of the possible power for the use of private consumers or electric railways.

Under the contract the International Power & Manufacturing Company must erect and operate, within three years, a plant capable of developing regularly at least 50,000 of the 120,000 horsepower which can be developed at this place. The rental for horsepower charged to the company during the time it develops only 50,000 horsepower will be four times the rental per horsepower that will be charged when it develops the full 120,000 horsepower. The term of rental is made indeterminate, but definite provision is made for readjustment to meet changed conditions once in twenty years.

Under the plan outlined, power companies, if it is desired by the government, will be entirely willing to invest their capital in the building of power plants and private current mains and thus gradually to develop to its maximum the water power resources of the Rocky mountain region.

NEW MEAT MARKET TO OPEN AT 319 SOUTH FIRST

Andreas Romero, a Well
Known Citizen, Will Again
Engage in Business, Opening
Shop Tuesday, Oct. 28.

On Tuesday, October 28, a new meat market will be opened for business at No. 319 South First street, between Silver and Lane streets, with Andreas Romero as proprietor. Mr. Romero is thoroughly in touch with the butcher business, and for many years, while in business on Gold avenue, was the leading dealer in fresh meats in the city. Up to a year ago, he conducted a meat market at the above address, when he voluntarily closed up to attend to other matters, and now returns to engage again in the business at the new location. He has many friends. He will deal in the best of fresh meats to be obtained, and hopes to receive, as has always been his good luck, the patronage of the old and new friends, with their orders.

They will serve a fine Turkey Dinner at the Myers Cafe Sunday, Oct. 26, from 5:30 to 8 o'clock. Regular price, 35 cents. Everybody invited. No. 122 West Central.

Watch for our opening special. The Famous.

EDITOR DARNELL NOT
GUILTY OF CONSPIRACY
TO BURN ELIDA PLANT

SPECIAL DISPATCH TO MORNING JOURNAL.
Portland, Oct. 25.—J. R. Darnell, a newspaper man, today was found not guilty of the charge of conspiracy to commit arson by a jury in the district court. The case was a result of the burning of the Elida News plant last July.

Does Your Stomach Trouble You?

MAYR'S Wonderful Stomach Remedy
Is Successfully Taken in Cases
of Stomach, Liver and
Intestinal Affections
And One Dose Has Often Dispelled
Years of Suffering

MAYR'S Wonderful Stomach Remedy can really be termed a wonderful remedy, and the benefits that it gives in many of the most chronic cases of Stomach Trouble has spread its fame from one end of the country to the other. No matter where you live you will find people who have suffered with Stomach, Liver and Intestinal Affections, etc., and have been restored to health and are just in their prime of life. There is no day but what you hear of the wonderful results obtained from this remedy and the benefits are entirely natural, as it acts on the source and foundation of the trouble, removing the poisonous material and bile secretions, taking out the inflammation from the intestinal tract and assisting in restoring the same to normal. Sufferers are urged to try one dose—which alone should relieve your suffering—and convince you that MAYR'S Wonderful Stomach Remedy should restore you to good health. Put it to a test today and the results will be a revelation to you and your family. Send for a free trial bottle and you will know the facts of the case. Send for booklet on Stomach Affections to Geo. H. Mayr, Mfg. Chemist, 156 Whittington street, Chicago, or better still, obtain a bottle from your druggist.

For sale in Albuquerque by Ditt's Inc. and druggists everywhere.

HEALTHSEEKER RUN RUSHING WORK OF OVER BY FREIGHT TRAIN, DIES

Ray Cramer, Who Came Here With Tuberculosis, Succumbs to Injuries After Four Days of Suffering.

Ray Cramer, a healthseeker who had been in the city for some time, died at 4 o'clock yesterday morning at St. Joseph's hospital from injuries sustained when a Santa Fe freight train passed over him on the tracks at the intersection of the city street and the railroad tracks. Cramer's right leg was cut off cleanly as if by a knife and the left leg was broken. He had been lying on the ground for some time before the train passed over him. The body was taken to St. Joseph's hospital and the leg was amputated. Cramer was brought from the scene of the accident by a switch engine. Although the train was made up of freight cars, it was moving at a high speed. Cramer was nearly dead when he was found. The fact that he, ill with tuberculosis, lived as long as he did, was a surprise to the doctors.

DEMING MAN BACK FROM CANAL ZONE; TRAVERSED CHANNEL

Deming, N. M., Oct. 25.—A. Lindauer, who returned from an extended trip to the Panama Canal zone, is now in the city. Lindauer, who is a well-known local man, spent several days in the canal zone. He was the first man to traverse the canal from end to end. Lindauer was accompanied by a number of men who were also interested in the canal. They were all well and returned safely. Lindauer was very tired but very happy. He was able to see the canal from end to end and was very impressed by the work that has been done. He was able to see the canal from end to end and was very impressed by the work that has been done.

INDIAN WITH A CRUSHED RIGHT FOOT IN HOSPITAL

An Indian, whose name could not be learned, was brought here on Sunday from the Santa Fe hospital. His right foot was crushed and will be amputated this morning. The Indian was injured by an engine at Gallup.

BARTLETT PEARS ARE ADAPTED TO SOUTHWEST

Deming, N. M., Oct. 25.—William Bartlett, a well-known fruit grower of Louisiana, Mo., is a letter to the secretary of the chamber of commerce, says "Planting of Bartlett pears is being made all over the southwest. Particularly in this region, where the climate is so well adapted to them. Many there have made excellent returns in the last several years from this variety. In fact, I remember of seeing one orchard just out from here which netted the owner \$20,000 for his season's crop, there being seventeen acres in the tract. Another man just adjoining him had an eight-acre tract of young pears three years old, for which he received \$100,000. There is no reason why the same results cannot be accomplished in the vicinity of Deming. You have the climate conditions, ideal soil and above all the people of that locality are inclined to look for everything that is good which should make a high-class fruit growers' association, and one capable of marketing their crops to the best advantage."

NEW YORK DRAMA

Those who look at the great white way I never could abide. I do not care to see a play. That needs formaldehyde.

A TUNEFUL THING

The latest thing for ladies is a semi-sweetwater—Fashion Item. Now that does sound like real fun. For that we will go all. The latest thing for ladies is a semi-sweetwater.

FIRST WINTER TERM OPENS NOV. 3 AT BUSINESS COLLEGE

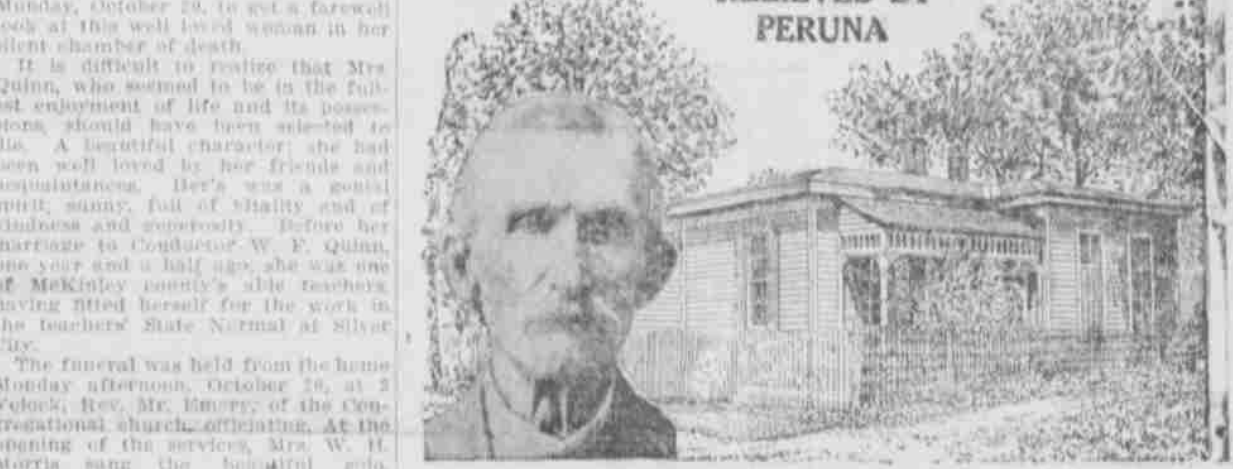

Many Business Firms Demanding Graduates From Albuquerque's Popular Business School.

Owing to the large number of applications from those desiring to enter the Albuquerque Business College will start an early winter term, beginning Monday, November 20. Applications for desks should be made in advance as the school is filled to almost full capacity. Calls from business firms for office help, and the demands for commercial teachers have been very numerous this fall, many students having been urged to accept positions even before graduation. Every graduate of the college is well known to the business community and has been taken an examination has passed and has received an appointment.

GALLUP MOURNS DEATH OF ESTIMABLE WOMAN

Gallup, N. M., Oct. 25.—The death of Mrs. Nellie Quinn, wife of Conductor W. F. Quinn, of this city, came as a terrible shock to family and friends, when a telegram was received by Edna Winters, father of the deceased, bearing the sad news that his daughter, Nellie, had died at 2 a. m., Saturday, October 19, in the Santa Fe hospital in Albuquerque after an operation on Monday, October 13, which later developed into pneumonia and caused death.

SUFFERED TWELVE YEARS CATARRH OF STOMACH

W. H. Shanks' Scottsburg, Ind., Home.

Most of our testimonials are old acquaintances. That is to say, we have known in correspondence with them for fifteen years.

Mr. Shanks, however, is a new name. He is an old friend of Peruna. He never called our attention to the fact until very lately. We were glad to hear of him. We were glad to hear of him. We were glad to hear of him.

It affords me great pleasure to inform you of the good results I have derived from the use of your excellent remedy, Peruna. I had catarrh of the stomach and bowels for twelve years and tried many remedies with only temporary relief. I was induced to try Peruna, and after taking one bottle I was completely relieved. I had taken almost three bottles before I could see that I was receiving any benefit, but when I had taken the six bottles I was completely relieved, and I feel very grateful to Peruna, and I have recommended it to quite a number of my friends. I will take a bottle every spring. My wife has used it with good results. You can see this or any part of it if you see fit.

I enclose photo, also photo of my house. Yours, W. H. Shanks.

Mr. Shanks' story is very similar to many others. A long space of catarrh catarrh. A long list of failures in medicine.
