Suspension.
NEW YORK, Nov. 25.—The suspension of Edward Brandon was announced on the stock exchange yesterday. He is one of the oldest and most prominent members of the exchange, having been admitted on September 8, 1872, and was considered one of the wealthiest brokers on the board.
Pittsburg.—Thomas Fawcett & Sons, one of the largest coal firms in the city, made an assignment to the Central bank yesterday. The liabilities are estimated at \$400,000. It is claimed by the members of the firm that the assets will exceed this amount at least \$150,000.

Gen. Stanley's Opinion.
SAN ANTONIO, Texas, Nov. 25.—Gen. D. S. Stanley, commanding the department of Texas, United States army, said today that he had received no notification from the war department to hold his troops in readiness to take the field against the Sioux, as reported by the Associated Press. Gen. Stanley also stated that he did not believe there was any danger of an Indian outbreak in the northwest. He lived among those Indians for eight years and knows that the mass of them are peaceable. This is the regular season for their annual ghost and sun dances, and if not provoked by too timid or too impetuous soldiers, the reds will do no one any harm. In brief, Gen. Stanley considers all the rumors of a threatened outbreak the merest booh, superinduced by fright.

The Northwest Indians.
CHICAGO, Nov. 25.—A special from Pine Ridge says: At Medicine Root, White River and White Clay the dancing still goes on and the Indians are not inclined to come to the agency for any purpose. Monday is the day for issuing rations, and Wednesday the beef supply for two weeks will be given the Indians. Red Star and several of the other Indians who are inclined to be defiant agree with Little Wound in his declaration that they will not come in unless they are forced to do so. Here at the agency the feeling is a nervous one. Nearly everyone agrees that there will be trouble. The Indians assembled probably number 800 or 900.
Washington.—Several dispatches from Gen. Miles were received at the war department yesterday and taken by Secretary Proctor to the White House for the president's inspection. The substance of them is only a confirmation of the news already received from the west. The situation at Standing Rock agency shows much the same condition as Saturday. Just what the Indians will do is not known to the army officers. A band of Indians is said to be gathered, it is thought to attend the ghost dance. Gen. Brooke, who is in command here, says he is sure in his position and that the friendly Indians are coming to the agency in increased numbers.

CONDENSED NEWS.

The First National bank of Alma, Kas., has suspended payment.
The lead and zinc output in southwest Missouri is still satisfactory.
The Transcontinental association has ordered a general advance of 10 per cent in Pacific coast rates.
The Union and Northern Pacific lines will take off some of their trains and lengthen the running time of others.
Jay Gould's stock purchases during three weeks have cost \$10,000,000.
Baring Bros will reorganize as a limited liability company.
Lord Wolsey denies that he forced Bartlett's services on Stanley.
The Kaiser seems to think Prof. Koch's remedy a special gift of Providence to his army.
Gladstone will probably decide whether Parnell remains as leader of the Irish party or not.
Hon. N. M. Fishback has written an open letter to Senator Jones, of Arkansas, proposing to leave the senatorial contest to the voters.
Gov. Fifer has reopened the pardon case of Oscar Neebe, the Chicago anarchist.
A meeting that was to have been held at Dublin to express confidence in Parnell has been forbidden by the government.
James Tucker, an electric-wire man at New York, had a fit while at work and fell across a wire. The shock killed him.
A special session of the New Hampshire legislature has been called.
The river Neva is frozen over and navigation to St. Petersburg closed.
Fire Commissioner R. F. Tobin, of Boston, died of Bright's disease. He was senior vice commander of the G. A. R.
Diphtheria is raging at Garner, Iowa. The schools are closed and many deaths are occurring.
The United States Rolling Stock Co. has applied for a receiver. Assets, \$6,000,000; liabilities, \$4,000,000.
Mrs. Charles Coombs committed suicide at the Pierpont house, New York, by leaping from a window on the sixth floor.
The heirs of Isaac Bernstein, of New York, are suing for a one-sixth interest in the Louisiana Lottery company, in which he was at first interested, but upon reorganization was left out. It is worth presumably \$1,000,000.
That Attempted Steal.
To the Editor of the New Mexican.
SAN PEDRO, Nov. 23.—It seems strange that so much political commotion exists in Santa Fe and so little real cause for it, but it must be a source of amusement to all, especially to the candidates regularly

elected; it is to me, at any rate, and I am one of the victims.
I never heard it doubted that I was honestly elected, and by a good majority, neither have I heard it once hinted that any of the candidates were elected by fraud, nor a ballot cast and counted that was illegal.

I have often heard that success in games was largely due to the cheating, but this is certainly the exception. How ludicrous indeed it would seem to see these non-elected candidates attempting to fill a position not elected to fill; to see them skulking through back alleys to escape the curious gaze of honest people; to discharge the duties assigned to honest men, (not them) to perform; and if two of them should happen to meet, imagine the wink that went from one to the other, and as Socrates once said, "I should think they would burst with laughter." It would be a good scheme if the merchants of Santa Fe would put in a good stock of umbrellas for the occasion, for they would need them, even if it did not storm, to cover their faces, and if they did not use them or masks there is more brass among them than I ever dreamed of.

I have been looking for the same number in Santa Fe county ever since this fass came about, to come up like honest men and denounce this proceeding, but so far I have heard none in it, and only one outside of it, and that is my friend Childers in Albuquerque. I extend him my hearty congratulations.
It takes a great amount of boldness for a set of men to come out openly and in broad daylight before an intelligent community and insist upon disfranchising hundreds of honest men, and in consequence, I advise people not to be out late "o' nights."

Had this election management been under control of Republicans there might have been some extenuating circumstance connected with it, but as it was, it was Democratic through and through. Democratic judges of election, Democratic commissioners, Democratic managers, Democratic recorder of deeds where the ballots were honestly left, Democratic everybody, and Democratic everything, and not a Republican handled a single vote after being cast, then I say let it be put where it belongs, this whole business; and step down and out as you must.

You may hang on to the tail of the kite, but the longer you hold on the further you will drop, for she is going up all the time, and you'll hear "something drop soon," and the prices will be small, if found. And now, leaders and managers of the "club," take a bath and get some of the smut off, there will be another election after a while and you must be clean and be prepared for the supper and pie.

A Real Railroad.
The railway surveying party that has for some time past been this side of Durango, reached Aztec with the work yesterday and passed on down the Animas. The camp of the party is still at Center Point, on Mr. James Stowell's place, where it will remain until Saturday when it will be removed to some point down the river.
This survey is for the Rio Grande Southern railway, which is now building toward Durango from Dallas, and is in operation to El Estero, a point about fifty miles south of Dallas. On Monday Mr. Otto Mears, the president of the company, and Mr. W. H. Wigglesworth, its chief engineer, came down to inspect the survey and look over the country. They passed on to Bloomfield that evening, made a fly-trip to the Junction City country the next day, and passed Aztec en route for Durango, late Tuesday afternoon. The engineers state that the orders given by Mr. Mears are to continue their survey down the east side of the Animas, around the point of the mesa, two miles above Junction City, and up the San Juan, with Albuquerque as the objective point.—San Juan Index.

Married.
The marriage of Miss M. C. Counselman, the handsome niece of Mrs. Maynard, and a lady well known in army and social circles here, takes place this evening at St. John's church, Albuquerque, and the lucky bridegroom is Lieut. C. D. Rhodes, 6th cavalry, stationed at Fort Wingate, but now on order to proceed to the department of the Platte. It is an old love match and the contracting parties have a large circle of friends throughout the west to congratulate them.

A Possible Clue.
Some fifteen days ago Mr. A. Jones, cousin of Mrs. J. B. Dawson, of Colfax county, left the Dawson ranch for his home, about seven miles distant. Since that time he has not been seen or heard of by his friends. He was between 55 and 60 years of age, worth considerable property and lived a somewhat secluded life.
About one week ago a man whose age was about 55 years, was found dead in the mountains north of Las Vegas. Only very meagre reports concerning the finding of his body have been published. Possibly it would be well for the friends of Mr. Jones to investigate this clue.

The best job work for many a hundred miles done right here at the New Mexican printing office; brief work, record work, all kinds of printing, binding, book work and the like is to be had here at the lowest possible prices and in first-class shape; patronize home industry and do not send your job work to St. Louis and Chicago. Keep it here and help yourself and the town along.

A DOCTOR'S CONFESSION.
He Doesn't Take Much Medicine and Advises the Reporter Not to.
"Humbly?" Of course it is. The so-called science of medicine is a humbug and has been from the time of Hippocrates to the present. Why the biggest crank in the Indian tribes is the medicine man.
"Very frank was the admission, especially so when it came from one of the biggest young physicians of the city, one whose practice is among the thousands, though he has been graduated but a few years," says the Buffalo Courier. "Very cozy was his office too, with its cheerful grate fire, its Queen Anne furniture, and its many lounges and easy chairs. He stirred the fire lazily, lighted a fresh cigar and went on."
"Take the prescriptions laid down in the books and what do you find? Poisons mainly, and nauseating stuffs that would make a healthy man an invalid. Why in the world science should go to poison for its remedies I cannot tell, nor can I find any one who can."
"How does a doctor know the effect of his medicine?" he asked. "He calls, prescribes, and goes away. The only way to judge would be to stand over the bed and watch the patient. This cannot be done. So, really, I don't know how he is to tell what good or hurt he does. Some time ago, you remember, the Boston Globe sent out a reporter with a stated set of symptoms. He went to eleven prominent physicians and brought back eleven different prescriptions. This just shows how much science there is in medicine."
There are local diseases of various characters for which nature provides positive remedies. They may not be included in the regular physician's list, perhaps, because of their simplicity, but the evidence of their curative power is beyond dispute. Kidney disease is cured by Warner's Safe Cure, a strictly herbal remedy. Thousands of persons, every year, write as does H. J. Gardner, of Pontiac, R. I., August 7, 1890.
"A few years ago I suffered more than probably ever will be known outside of myself, with kidney and liver complaint. It is the old story—I visited doctor after doctor, but to no avail. I was at Newport, and Dr. Blackman recommended Warner's Safe Cure. I commenced the use of it, and found relief immediately. Altogether I took three bottles, and I truthfully state that it cured me."

The New Mexican has facilities for doing first-class job work of all kinds and as cheap as can be had in any city in the country. There is no excuse for sending such work out of town, to Denver, Kansas City, Philadelphia or any other point. Keep the money at home.

The New Mexican is the oldest newspaper in New Mexico. It is published every day except on Sundays and public holidays. It contains the latest news from all parts of the world, and is a valuable source of information to all who read it.

TUESDAY, NOVEMBER 25.

Improve the territorial school law.

The present revenue law should be amended in several instances, especially in the matter of the accountability for public funds by the collector, and in the law is defective.

Pass a law providing for the establishment of the office of county surveyor and for the survey of all lands and real estate in the several counties. It is about time that something modern was done in this direction.

Our Democratic friends are beginning to talk statehood for New Mexico now; just hold on a place until a few weeks ago the majority against the statehood movement was something like 9000. Give the people a chance to decide.

Looking the field over carefully and considering the character and dishonesty of a good many of the Democratic leaders in this county and territory, it is probably as well that the constitution was defeated; therefore it might be well to give thanks for that defeat on Thursday next.

They were bound to have a vindication; and they could not get it from the people, by the great boom spoon, they endeavored to obtain it by stealing ballot boxes and throwing out honest and legal returns. There are lots of other ways of killing a dog, besides choking him with butter balls.

These Democratic bosses and lawyers here, regardless of all law, right and justice, and simply bent on carrying out their own nefarious plans are of the opinion, that they will take a hand in organizing the coming legislative assembly, by seating men as members, who were not elected; well, they will have a fine time carrying out their evil intentions.

The regular Democratic majority in the house of representatives will be according to the latest compilations, 132; to this may be added the votes of twelve Farmers' Alliance men with Democratic tendencies and that will make the Democratic majority 144; the people ought to give thanks that the majority is no less; a large majority shows the temper of a party a great deal better than a slim one possibly could do; the people will have a chance to become well acquainted with the temper of the Democratic party during the sessions of the 25th congress.

There is no doubt but that events in financial circles of the world have lately shaken up England's single standard policy within the past few weeks. The fact that the removal of \$5,000,000 of gold by Russia from the barings should make them fall, and cause the banks of England, Ireland, France and Germany to be called to the rescue to meet \$15,000,000 acceptances, payable in gold, is significant. It simply means that silver must take its place soon as a part of the money of the country; indeed it means more, for bimetalism is sooner or later sure to come and this action can only tend to hasten it.

Take the express companies in New Mexico, doing business here and making a good deal of money out of the people, upon their gross receipts and compel them to help bear the burdens of government; this is simple justice. This is one of the subjects that ought to be attended to by the coming legislative assembly.

In view of the circumstances and in consideration of all the facts it looks as if the Democratic leaders and bosses here over-reached themselves just a little bit, in the matter of the conspiracy and the steal of the Galisteo ballot box and returns. The more decent Democrats in many sections of New Mexico do not seem to care to help the gang along to carry out the conspiracy.

Again it becomes our solemn and bounden duty to announce, that if you want a good, fearless, honest and energetic newspaper, that gives you the latest, most important and best territorial, political, mining and general news of interest to New Mexico, you should subscribe for the Santa Fe New Mexican, either the daily, weekly or the Spanish edition. Bear this in mind and do it and be duly benefited.

CALIFORNIA has a working delegation in congress, hence has no scruples about asking for appropriations. The next session of congress is expected to furnish \$150,000 for the Sacramento postoffice making \$300,000 received in all—\$15,000 for the marine hospital at San Francisco, \$50,000 to complete the quarantine station at Angel island, \$35,000 for a new light at Point Arguello, \$33,000 for a light and fog signal at Point Buchanan, \$5,000 for a light and signal at San Pedro, light at San Joaquin river \$10,000, light near Point Reyes \$30,000, land for depot at Monterey \$2,000, new cistern at Mare Island \$3,000, artesian well \$20,000, gate and guard house \$10,000, gun and mortar battery at San Francisco \$74,000—and southern California to hear from.

One queer thing about Koch's cure is that the Berlin scientist's followers are much more enthusiastic over its results than is the originator himself. It has just leaked out that several patients have died from the severe blow following inoculation, and among the more conservative men in the medical profession there is apparent a very commendable inclination to give Prof. Koch more time in which to experiment with his discovery. In the mean time to quietly study his methods themselves. As for the physicians in this country, they have a representative now en route to Berlin, drawn there by reports of Koch's cures, who will be long giving them something reliable on the subject; reference is had to Dr. Alexander C. Abbott, assistant professor of bacteriology and hygiene at John Hopkins' university, who has just sailed for Germany on this mission.

THE WIZARD'S WORK.

The eyes of the financial men of all the world are again centered on Jay Gould. Every few years the "wizard" goes into the market to play even, and he is now engaged in one of these little games with results more wondrous than anything, probably, he has yet achieved. This was to be expected, for during several years past a great deal has been going on with Gould practically out in the cold. There were Villard and Brice, and Magoun, and Francis Adams, Kidder-Peabody & Co., and a whole lot of nervy and ambitious men getting to the front quite too easily; but when all England shook with the failure of the Barings, Gould saw that his time had come and he took advantage of it. He has secured control of the Union-Pacific and President Adams steps down and out; Villard loses his grip on the Northern Pacific; George Gould, instead of Huntington, again controls Pacific mail; Brice's Richmond Terminal stock dances on Gould's string of scalps, while even the A. T. & S. F. is now ready to obey his behests. The crisis in England was just what the famous Wall streeteer was waiting for and he comes out of the melee several millions ahead and practically master of the situation in the west and southwest. But in thus helping himself, Gould, consciously, no doubt, has rendered great service to the financial interests of the United States, for he led the hosts that promptly bought \$100,000,000 of American securities from foreign holders when the English crash came, and in taking up this enormous sum these Americans have demonstrated to all the world that they have with in their own institutions and have the nerve and money to protect them. The effect abroad can but be most beneficial.

Jones and Gonzales are Money. There is a marked contrast between the course pursued by the Democratic members of the board of county commissioners in this county and that pursued in Santa Fe county, in the matter of canvassing votes. Messrs. Jones and Gonzales did not require an order to compel them to declare the will of the people expressed at the polls.—San Marcial Reporter.

PALACE :: HOTEL

First Class. RUMSEY & BURNHAM.

Santa Fe, New Mexico

No Santa Fe Democratic Methods Wanted. Let the grand jury investigate that Nacimiento affair, no matter whose corns it steps on. We don't want any Georgia or Santa Fe methods in this county. There should be a full and free vote in every precinct, and the man who prevents it should be punished.—Albuquerque Citizen.

Envy and Jealousy Again. The Santa Fe New Mexican is already dictating to the 25th legislature what it must do. Luckily for the territory what the New Mexican may say will have very little weight with the 25th legislature. Many of the villainous schemes of the immortal 25th were fathered and sanctioned by the New Mexican.—Roswell Register.

They Want the Exemption Repealed. The New Mexican legislature should repeal the \$300 taxation exemption law. No good citizen should object to paying his portion of tax for the support of the government. The present law is being taken advantage of by many property holders in such manner that large amounts of property escape taxation entirely. The law has not one redeeming feature.—Stock Grower.

The repeal of this law will materially increase the property return of the territory, and can not work as a hardship on anybody. Let the law be repealed by all means.—Silver City Enterprise.

Public Schools.

There are lots of things that the next legislature can do for the benefit of the territory, but there is no other one thing it can do which will result so much in the general good as to give us the necessary amendments to our public school laws. No state, territory or community can hope to "keep up with the procession" in this age of the world, without a good public school system. Our school system, as present provided, for first-class except in a few particulars. In these particulars it ought to be amended by the legislature at its coming session. If that body does not desire to make amendments that will be applicable to the whole territory, let it, at least, make them applicable to incorporated towns, so that those communities that desire to keep up first-class public schools can have them. New Mexico must put herself abreast with the progressive public spirit of the age. Nature has done more for us than for any other section of the country. We must do a little for ourselves. Let us have a public school system that we will not have to apologize for.—Albuquerque Citizen.

Job Printing.

Mercantile and others are hereby reminded that the New Mexican is prepared to do their printing on short notice and at reasonable rates. Much of the job printing now going out of town should come to the New Mexican office. There is no better excuse for sending out of town for printing than there is for sending away for groceries or clothing. Our merchants should consider these things. The New Mexican is acknowledged the leading paper of this section. The patronage of the people will enable us to keep it so.

1891.

Some people agree with the Sun's opinions about men and things, and some people don't; but everybody likes to get hold of the newspaper which is never dull and never afraid to speak its mind.

Democrats know that for twenty years the Sun has fought in the front line for Democratic principles, never wavering or weakening in its loyalty to the true interests of the party it serves with fearless intelligence and disinterested vigor. At times opinions have differed as to the best means of accomplishing the common purpose; it is not the Sun's fault if it has seen further into the millstone.

Eighteen hundred and ninety-one will be a great year in American politics, and everybody should read the Sun.

THE MAXWELL LAND GRANT

Farm Lands!

UNDER IRRIGATING DITCHES.

Choice Mountain Valley and Lands near the Foot Hills

FOR SALE.

For the irrigation of the prairies and valleys between Raton and Springer some hundred miles of large irrigating canals have been built, and are in course of construction, with water for 75,000 acres of land. These lands with perpetual water rights will be sold cheap and on the easy terms of ten annual payments, with 7 per cent interest.

In addition to the above there are 1,400,000 acres of land for sale, consisting mainly of agricultural lands.

The climate is unsurpassed, and alfalfa, grain and fruit of all kinds grow to perfection and in abundance.

The A. T. & S. F. railroad and the D. T. & Fort Worth railroad cross this property, and other roads will soon follow.

Those wishing to view the lands can secure special rates on the railroad, and will have a rebate also on the same if they should buy 100 acres or more of land.

THE PECOS VALLEY!

THE GREAT FRUIT BELT of NEW MEXICO!

1000 Miles Nearer all Eastern Markets than California.

The canal system of the PECOS IRRIGATION AND IMPROVEMENT COMPANY covers 300,000 acres of MAGNIFICENT LAND in this MATCHLESS LOCALITY. The land is all PUBLIC DOMAIN and enterable at the Government price, of

\$1.25

ONE DOLLAR AND TWENTY-FIVE CENTS PER ACRE!

Either under the Desert Act, Timber Culture, Pre-emption or Homestead Laws. The soil is a rich, chocolate-colored, sandy loam, from six to twenty feet deep, underlaid by lime-stone. In fact it is a lime-stone region UNSURPASSED IN RICHNESS by the famous Cumberland Valley. With an altitude of 3,500 feet above sea level, it has—A CLIMATE WONDERFULLY EQUABLE AND HEALTHY!—No snows; no Northerners; no dampness; no malaria; no consumption! PURE, and ABUNDANT WATER; so here produces five cuttings of alfalfa the year, and two crops of grain; wheat, oats and barley being harvested in June and corn then planted on the same land being cut in the Autumn. For further particulars, address,

"THE PECOS IRRIGATION AND IMPROVEMENT COMPANY," Eddy, Eddy County, New Mexico.

UNDER ADVISEMENT.

Brief Outline of the Arguments in Proceedings Against the Sheriff for Contempt.

In the matter of the proceedings against Sheriff Chavez for contempt in failing to obey the order of District Judge Seeds and confining Commissioners Sloan and Martinez in jail, for being in contempt of court, the arguments continued all day yesterday, closing at 4:30 last evening, when Judge Seeds took the matter under advisement.

On behalf of the sheriff it was argued that the district courts were created by statute and could therefore exercise no powers except those expressly granted by statute and that no authority had been expressly given by congress or the New Mexico legislature for such a proceeding as the present one. Counsel called attention to various statutes of the territory as to the duties and liabilities of the sheriff and contended that they were exclusive of any other punishment for neglect to perform his duty. It was further claimed that the writs of commitment which the sheriff refused to serve were void and that therefore the sheriff could not be punished. The grounds for claiming that the writs were void were that the court rather than the judge, had no power to find parties guilty of contempt and order their commitment in vacation and that the provision in the statute about mandamus as to the imposition of a fine not exceeding \$250 was exclusive of any other punishment for the contempt committed by the commissioners. It was stated by counsel for the sheriff that proceedings in mandamus were purely statutory in their character and could not be had in the absence of statutory authority.

On the other hand it was argued that while the courts were created by an act of congress, yet so far as the legislature of New Mexico was concerned and so far as their jurisdiction was assailed they were constitutional courts, as the Organic Act was to be considered as a constitution for the territory, as has been repeatedly held by the courts of various territories and by the supreme court of the United States. It follows, necessarily, that those courts are courts of general unlimited common law jurisdiction, and can not be shown of any portion of that jurisdiction by acts of the legislature which has only power to regulate the exercise.

It was contended that the statutory provisions as to the punishment of sheriffs and of the county commissioners for official misfeasance might be exclusive of other punishment. But it was claimed that proceedings in contempt were of two kinds, one punitive and the other coercive; that in the present case the punitive proceedings were limited and defined by the statute, but that those statutes did not deprive the court of the necessary power to enforce obedience to its orders; that the guilty parties might be punished under the statutes in other proceedings in addition to being forced to obedience. As to the power of the court to act in the other side were correct and illustrated by numerous examples the ruinous effects of such a doctrine. Many cases might arise in which public officers would very gladly pay the fine of \$250 rather than perform a duty commanded by the court, especially if large amounts of money or important political interests were involved. There can be no doubt that in the present case the money for the payment of such fines would be readily forthcoming if by their payment the court could be paralyzed, as claimed on the other side, and rendered powerless to enforce obedience to its orders.

ROUND ABOUT TOWN.

Hon. A. Joseph, delegate to congress, arrived last night from Ojo Caliente, accompanied by his family and left this afternoon for Washington. He was interviewed by several citizens this forenoon relative to the appropriation for developing artesian water on the various government reservations here and said he would take pleasure in pushing the matter as far as lay in his power. He notes with pleasure the improvement made on the adobe palace and says he will do his best to secure additional funds for still further improving this historic structure.

What this town needs, and that right badly, is a number of cottages for rent. Hardly a day passes but what strangers who wish to locate here, temporarily, hunt the town over for residences, and always with disappointing results. They can find a few adobe rooms, huddled away in back streets where "sweetness and light" are limited, but these are not wanted. Neat, brick cottages, with modern conveniences and ground enough for a garden and grass plat are the kind that rent at right prices.

Sports Afeld, a handsome Denver publication devoted to all that its title implies, and now in its fifth volume, comes to the New Mexican this week, its leading article being a well written and entertaining article by Mr. F. T. Webber, entitled "Winter on the Plains, Life in a Dog-out in the Day of Prairie Schooners." The thrilling experience of those days, which Mr. Webber evidently accepted with great equanimity and some fun, fits him all the better for enjoying and appreciating the superb climatic conditions prevailing in the Santa Fe valley.

The meeting of the shareholders of the Santa Fe Electric Light & Power company takes place this evening at Mr. Gildersleeve's office, at which time a board of directors for the ensuing year will be named. This board will then appoint a general manager and superintendent, after which the work of constructing the Edison electric system is expected to go rapidly forward. Truly, this is progress for the capital city.

Passengers from the south this morning say they were greatly surprised to find the sun shining so delightfully and the air so balmy in Santa Fe when the whole lower country is suffering "from a spell of frigidity." Snow has fallen as

far south as El Paso, and throughout the Black Range and all along the Rio Grande valley a chill wind prevails, covering the ponds with ice.

The sportsmen find ducks and geese exceedingly scarce these days. Cooley Beaver and a party returned last night from Algodones, having only killed "a few fish ducks." They say it is much colder down there than at Santa Fe and game is scarce. At Rincones, however, away down the Bravo, they understand that ducks and geese are plentiful, although, as a rule, they are wild.

John Morton has added another feature to his fruit, vegetable and commission business. He is working up such fruits as will not stand transit, into jellies, preserves and catups, and hopes next season to start a regular preserving and canning factory.

Judge Morrison calls attention to the fact that it was just 300 years ago today that the treaty was signed surrendering Grenada to Ferdinand and Isabella, of Spain, one year later Columbus sailed on his expedition to discover America.

The Wells-Fargo Express company has refused to longer pro rate with the D. & R. G. company at this point on an interchange of business. Evidently there is a row brewing between these two companies somewhere up in Colorado.

Mondragon Bros. to-day received a handsome new safe from St. Louis for their jewelry establishment.

PERSONAL.

Dr. Joseph Richards, of Cerrillos, is in the city to-day on business.

George Bannister, who has been ill for several weeks, is able to be out to-day.

Hon. Trinidad Alarid, territorial auditor, has returned from an official visit to Albuquerque.

John J. Sayles, of the firm of Sayles Brothers, charcoal men at Lamy, is in the city on business.

Mat. Clark, known far and wide as the mayor of Hamilton City, is here to-day from the Pecos valley.

Louis Haffner returned last night from Cincinnati, where he has been visiting his brothers, who are great brewers.

J. W. Cooper, the well known Pecos lumber man, is here on business before the land office. He stops at the Palace.

Louis Lumbert, of Bernalillo, who distinguished himself at the last territorial fair by showing E. L. Miller's fruit, is in the city to-day accompanied by his family.

W. J. Mills, Las Vegas attorney, came over from the Meadow city last evening; he is accompanied by H. C. Spears, a Chicago attorney, who is here on business.

At the Palace: J. P. Dorr, Lincoln, Neb.; H. J. Spears, Chicago; J. W. Cooper, Pecos; W. J. Mills, Las Vegas; W. Noble, Los Angeles; W. G. Pollock, New York.

Mr. M. T. Chase, the energetic traveling freight agent of the Union Pacific system, is in the city to-day soliciting business from our merchants. He is a rustler and gets the business.

Hon. Eugenio Romero, assessor of San Miguel county, is in the city on business. He is accompanied by his son-in-law, Mr. Tranquilino Labadie, who is favorably known in this city.

At the Exchange: J. J. Keller, Dallas, Texas; L. Haffner, city; E. J. Pynn, Tres Pidas; Dr. Richards, Cerrillos; Mrs. M. E. Bruce, El Paso; A. Joseph and family, Ojo Caliente.

Brigadier General McCook, accompanied by his aid de camp, Lieut. Baker, left this morning for Fort Union. Thence he goes to Chicago on a short visit and returns to his headquarters at Los Angeles, Cal.

The Census. Some days since the New Mexican announced that Gov. Prince had taken steps to have corrected the figures sent out from Washington and purporting to show the population of New Mexico. The following has been received.

DEPARTMENT OF THE INTERIOR, Census Office, Washington, D. C., Nov. 29, 1890.

Dear Sir: Your letter of the 26th instant addressed to Mr. Childs has been received, and in his absence referred to me for a statement as to the population of New Mexico. It seems through the inadvertence of some person unknown to me that the portfolios containing the enumeration of the Pueblo Indians were sent direct from the Mail division to the Indian division of this office instead of being sent to the Population division for tabulation, and to be included in the count of population. These schedules have, however, been secured, and the proper correction will be made in the population of New Mexico as originally announced. Very respectfully,

WM. C. HEST, Special Agent in Charge of 4th Division.

Hon. L. BRADFORD PRINCE, Governor of New Mexico.

Bids for Coal.

Wanted, eighty tons good merchantable bituminous coal delivered at the capital building as needed, not more than one carload at a time, said coal to be free from dust, dirt and sulphur, and of first-class quality. Bids shall be directed to the undersigned at the First National Bank, Santa Fe, N. M., up to 7 p. m., December 1, 1890. "Bids for Coal."

R. H. LOXWELL, Temporary Secretary.

TERRITORIAL TIPS.

A gang of telegraph constructors are near Las Vegas. They are putting up a copper through wire for commercial business from Denver to San Francisco. They began at Denver and are this far on their way to the golden gate.

The school of mines building at Socorro is in course of erection. The contractors are now engaged on the foundation walls. The building will be an ornament to Socorro, and the school of mines a great benefit to the whole territory.

An effort is being made to arrange a half-mile foot race between J. E. Hussey, of Silver City, and Link Bolich, of Deming. Stakes, anything up to \$500. Both are well known as speedy men on their feet, and quite a little interest is being worked up over the match.

Highest of all in Leavening Power.—U. S. Gov't Report, Aug. 17, 1889.

Royal Baking Powder

ABSOLUTELY PURE

Let There be Light. Prof. I. Aronson, the practical optician who visited Santa Fe last week begs to announce his second visit to our city on the 28th instant, and that he will remain two days.

The readers of the New Mexican who are in need of optical aid should consult the professor as his work has proved a success all throughout the neighborhood, and as he promises to all his patrons to supply them with the necessary lenses in the future. He carries a record of all cases wherein he has fitted glasses; refers to City National Bank, Austin, Texas, and American Loan Protective association of Minneapolis, Minn. All who wish to consult him at their residence or office will please leave a card at the Palace hotel.

NEW MEXICO MINES.

Splendid reports continue to come from Magdalena.

The U. S. mine and the Virginian at Kingston are shipping fine ore.

A boom is bound to strike the Cerrillos and San Pedro districts before spring. The big mill at Pyramid, Grant county, idle for six years, is again at work.

None of the up-country papers have anything to say about the Mora copper mines.

Jonas Nelson has secured a lease for one year on the famous Handspraddle mine, near Socorro.

Mining matters are very quiet about White Oaks and Nogal and will remain so until that rich locality is penetrated by a railroad.

At Hillsboro Thompson & Galles' mill has been idle for some days past on account of a lack of fuel, but got in a supply and started in on Friday last.

Quite a number of strangers are in town, the majority of whom are on the lookout for "business chances"—our mines being the leading attraction.—Hillsboro Advertiser.

The machinery of the Last Chance Mining company is being moved from the Silver City depot to the mine on Silver Creek as fast as it is possible to secure teams.

The shipments from Mexico through the Deming custom house are growing quite large, owing to the development of mines in Mexico, which are rapidly increasing.

Stephens & Faddis are making the dirt fly on the excavation for the foundation for the steel of mines at Socorro. The stone, cement and materials are being placed on the ground and in a little time the foundation will be completed.

H. H. Coates, a mining man from Butte City, Mont., has just given a contract to Messrs. Vernon and Thomas for a 100-foot shaft, has just settled with Messrs. O'Brien and Layton for a 100-foot tunnel.—Lordsburg Liberal.

T. F. Chapman, superintendent of the Lady Franklin mine, returned from Old Mexico last Tuesday, and says that he is going to pump the water out of the Lady Franklin if it takes the largest pump on earth and has to irrigate the entire lower country.—Kingston Shift.

Black Range note: Hon. A. F. Childs and wife, of Washington, D. C., arrived in Chloride last Friday. Mr. Childs is largely interested in mining in this district, and will, after a short jaunt east, return and remain for some time and watch the working of the new mill and the mines.

The machinery of the new Chloride concentrator is all in place and is ready for business. The machinery of this mill is of superior quality and manufacture. The Fort Scott laundry being the builders. Messrs. Childs and Blain propose to have this mill running on ore day and night in a very short time.

J. J. Dodd, general manager of the Alhambra Silver Mining company of Silver City, was in Socorro on Wednesday last, with about three tons of ore from the famous mine taken from the shaft while sinking a distance of a little over ten feet. The ore, we should judge, is worth from \$5,000 to \$6,000.—Chief-tain.

Excavation having progressed sufficiently to justify the step, construction work on the Richmond Gold Mining company's mill was commenced last week at Hillsboro. The general office of the company is in Chicago, where a majority of the stockholders live. Twenty-five first-class miners are employed at the mine, with C. H. Meyers as foreman.

Mr. Chas. Eneu Johnson, of Philadelphia, a prominent member of the Charles Eneu Johnson Printing & Lithographic company, the largest institution of the kind in the United States, while Mr. Wright is one of the most prominent and successful men known in the mining circles of America, and who was at one time interested in the great silver mines at Lake Valley. They bought mines in the Black Range.

Thomas Holton, of Lone Mountain, is the latest to strike it rich. On Wednesday of last week Mr. Holton took out twenty-one sacks of ore which it is thought would average about \$3,000 per ton. Several assays have been made running into the thousands. The True Blue is situated northeast of the Lucky, which has made such a name for itself and the camp during the past summer. When the strike was made Mr. Holton was offered \$5,000 for a one-half interest in the claim by Wm. Beall, which was promptly refused. It is rather remarkable that two exceedingly rich finds should be made within a few months of each other in as old a camp as Lone Mountain.—Silver City Enterprise.

Catarth. In the head is a constitutional Disease, and requires A constitutional remedy Like Hood's Sarsaparilla, Which purifies the blood, Makes the weak strong, Restores health. Try it now.

Hill and Conway, Jr. Type-writing and translating. Office, Griffin's block. Northeast corner plaza.
