THIS IS THE DAY FOR THE BIG TRADES PARADE

ANNUAL TRADES DISPLAY
TAKES PLACE THIS MORNING

Will Move Promptly at 10:30
o'Clock Covering All Central
Part of the City in the Line of
March.

The annual Albuquerque day trades display parade will occur this morning at 10:30 o'clock with every indication that the big procession will be quite as interesting as usual. The divisions, as outlined by the marshal's instructions, show a long line of floats which promise to be unique and attractive. The American Lumber Co., the Santa Fe shops and the traveling men are expected to make exceptionally prominent showings. The line of march will cover all the central part of the city. The formation of the parade, the line of march, are given in full in the following order of Colonel John Borradaile, marshal in charge.

Formations.

First Division—Form on West Silver street, right at Sixth street.
Second Division—Form in rear at first division. West Silver street, right Fourth street.
Third Division—Form on South Sixth street, right at Silver street.
Fourth Division—Form on South Fifth street, right at Silver street.
Fifth Division—Form on South Fourth street, right at Silver street.

Sixth Division—Form on South Third street, right at Silver street.
From place of formation north on Sixth street to Gold street, east on Gold street to First street, north on First street to Central street, thence passing reviewing stand west on Copper street to Second street, south on Second to Central, west on Central to City park, where marshals will dismount their divisions.

Formations.

City police.
Marshals and aides.
First Division.
The Elks band.
The National Guard of New Mexico, Major H. Ruppel commanding.
Fourth Division—First United States Volunteer cavalry.
Squadron Fifth United States cavalry, Colonel George K. Hunter, commanding.

Second Division.

Troop of Young Ladies.
New Mexico Volunteer Firemen.
Albuquerque Fire Department, under Chief Purcell.
Fighting the Flames fire department under Chief Roberts.

Third Division.

United States Indian School band of Albuquerque.
Battalion United States Indian school cadets.
Albuquerque United States Indian School aggregation.

Fourth Division.

Santa Fe United States Indian School band.
Benevolent societies.
Commercial Travelers association.
Retail Merchants display.

Fifth Division.

Leonard and Lindemann boys band.
University of New Mexico.
American Lumber Company aggregation.

Sixth Division.

Cowboy aggregation.
Manufacturers display.
Aitchison, Topeka and Santa Fe Railway company display.

Assistant marshals are hereby assigned to their regular divisions:
First Division—Major C. M. Carr, Dr. J. R. Cutler.
Second Division—M. L. Stern, Alfred Grunfeld.
Third Division—Perfecto Armijo, Jesus Romero.
Fourth Division—Dr. L. H. Chamberlin.
Fifth Division—W. H. Bahr, Dr. T. H. T. H.

Sixth Division—W. W. Strong, J. E. Haines.
Major J. E. Elder, Captain M. O'Donnell, aides.
Marshals assigned will have their divisions ready to march promptly.

By order,
Assistant marshals will report at 117 Gold street at 10 a. m.
JOHN BORRADAILE,
Marshal.

FORD STRING OF HORSES WINS RELAY RACE

GILBERT HAS THINGS
ALL HIS OWN WAY

Secures Lead in First Heat and
Maintains Distance to the
Finish—Three Strings of
Horses Are Entered.

The first relay race of the fair program at Traction park yesterday afternoon was won by J. A. Gilbert on the Ford string of fast cow ponies and won handily. Gilbert got a lead of several hundred yards at the start and by dint of good riding and fast saddling maintained it to the finish. There were three other strings entered in the event, the H. W. Enright string, ridden by H. Grimsley, the J. L. Jassater string ridden by Jassater, and the O. L. Grimsley string ridden by O. L. Grimsley. Grimsley's horses were smaller on the average than the others but were fast enough to show a clean pair of heels all the way around.

All the riders showed themselves masters of the gentle art of guiding all the speed their horses were capable of, but for the quick getaway of Gilbert at the start the relay race was a different one. The might have been an exciting event as a good relay race always is, and the winning was superb. The secret of winning a relay race is in stopping your mount while going at full tilt, getting

off while the horse is ten feet in the air, and dragging the saddle with you, throwing the leather on top of a wild-eyed bronk that screeches in an erratic circle while you are saddling, leaping in the middle before it is quite on the horse's back and catching it up when you are half way around the neck lap. It takes the quickness of a cat and unerring judgment if you want a chance of winning. There will be more cow pony races this week and that they will prove among the most popular features of the program is proven by the applause which greeted the beginning and end of each last yesterday.

SPEEDY RACES ARE ON PROGRAM FOR TODAY

ALBUQUERQUE DERBY
GOES THIS AFTERNOON

Thousand Dollar "Veve Clicquot" Stake Race Biggest
Harness Event of the Meet-
ing—Yesterday's Results.

Just as this will be the big day in horse racing in everything else, so it will take the lead in the races offered at the fair grounds this afternoon. The big "Veve Clicquot" Champagne stake race, good for \$1,000, and placed on the 2:12 pace is to be the first event with nine entries, as follows:

1—Monkey Mack, b. g., Coe and Budworth, East Las Vegas.
2—Clara H. b. m., Joseph Barnet, Albuquerque, N. M.
3—Chilly the Chopper, br. h., P. S. Byer, Denver, Col.
4—Joe C. br. g., John E. Muen, Denver, Col.
5—Brewer's Kid, b. g., Joseph Brewer, Pueblo, Col.
6—Kiowa, b. g., F. G. Peck, Colorado Springs, Col.
7—Ava E. b. m., James Whitner, Grand Junction, Col.
8—Katherine, b. m., D. W. Francis, Flagstaff, Ariz.
9—Lambert J. br. g., James T. Johnson, Albuquerque, N. M.

This race will be followed by the Albuquerque derby, the big running race of the meeting in which there are more entries than ever before and several other running events, including a relay race with four strings entered. It is a program which will gladden the heart of the racing man.

Yesterday's races were good enough for any meeting in any country. The 2:20 trial, good for \$1,000, the Denver Post stake, was won by Charlie M. owned by Tom Collins of Albuquerque, although it required five heats to do it. Eddie M. was second, Day Break third, and Dyke fourth.

Junia, a strong favorite, won the 1 1/2 mile race with ease from Benefice with Dixie II a strong third. Vandalia won the 5 1/2 furlongs, Alhambra second and Quaint third.

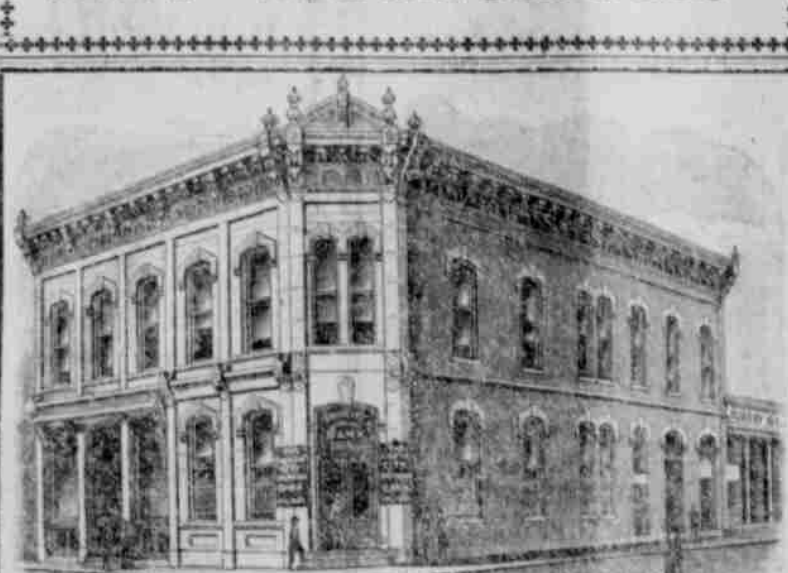

NOTICE

The Albuquerque - Estancia Auto Co. have made headmasters with the Springer Transfer Co. of 100 Gold ave., who will receive checks, handle express and furnish any information desired relative to rates, schedules, etc.

ALL TRAVELING MEN, WHETHER VISITING OR LOCAL, ARE REQUESTED TO MEET THIS A. M. AT O'CLOCK AT ZIEGLER'S CAFE FOR THE PURPOSE OF TAKING PART IN PARADE.

M. Mandell.

The Silver City National Bank, one of the oldest banks in New Mexico, established 1888.
Capital, surplus and undivided profits, \$95,000.00; deposits of near three-quarters of a million dollars; total resources of almost one million.

Interest paid on time deposits.
Silver City Savings Bank in connection, with a capital of \$15,000.00 and deposits of \$70,000.00.

There are no more solid institutions in New Mexico than these two banks, and they invite business from all sections, and guarantee the best of care and attention to all customers.

OUR NEW AUTUMN SILKS

It is no longer necessary for you to send east for your dress goods and silks, as the immense and varied assortment carried by the Economist, compares creditably with those carried by the best stores in the east. New silks, smart looking mixtures, crepes, and wools, mantles, children's frocks, and many other things, in fact almost everything that you might ask for that is new in the fabric line. This entire stock is again with beauty, style and good quality of American silks. An extensive showing of exclusive plaids from the best domestic manufacturers for waists, suits and gowns. Monogram plaids of dark color, combinations in silk and tulle, plaids in Persian design and other effects. Black plaids in fancy color combinations, pompadour and French plaids in stripes and tulle. Prices per yard from \$1.00 to \$2.00.

A COMPLETE STOCK OF BLACK SILKS ALWAYS AT PRICES CONSISTENT WITH GOOD QUALITY.

COLORED TAFFETA, 36 YARD—This is one of the strongest and best wearing silks we carry, especially good for jackets, dress skirts, etc. Every desirable color as well as black, cream, white. Very special, the yard, \$1.00.

MILLINERY

The grand success of this department's business with the millinery buying public during the present season leaves no doubt as to the efficient service it is extending, and to the people's recognition of it.

The most particular success of the class who demand the highest, whatever the price, are constantly and satisfactorily served, while those whose tastes and requirements are of less value, but who must buy conservatively, find our capable designers and milliners competent to supply, with artistic manipulation of materials, what must be limited of costume.

This week we will make an extraordinary display of entirely new winter millinery in popular prices. Our specially selected styles will show four distinct collections at four degrees of price—\$5, \$10, \$15 and \$20. The distinguishing feature of these gatherings is the remarkable showing of style and artistic beauty at prices never asked for the ordinary stereotyped effects. In addition to the new hats as small prices we will place on sale our entire stock of pattern hats at one-third of regular price. To those who haven't yet bought their fall hat this is an opportunity of saving one-fourth the regular price.

Ladies' Neckwear

NEW ARRIVALS—FIRST FLOOR.
Latest creations of smart neckwear for women. From high class manufacturers, presenting most beautiful designs in chiffon and lace fabrics. \$5.00 to \$7.00.
Silk lacy neckties, \$5.00 to \$7.00.
Lace stock neckties, \$5.00 to \$7.00.
Silk lacy and embroidered ties in all the newest shapes, \$5.00 to \$7.00.
Fine baby Irish linen collars and cuffs, \$5.00 to \$7.00.
Large Chemise collars, \$5.00 to \$7.00.
Fine embroidered and lace lapel collars, \$5.00 to \$7.00.
Lingerie silk and net hose, \$5.00 to \$7.00.

Women's Autumn Outer Wear

SUITS, GOWNS, COATS, SKIRTS, FURS, AND WAISTS.
A beautiful display of stylish creations, in the authoritative and accepted modes direct from the designers of fashion. A display that will at once appeal to every woman who loves individuality and exclusiveness.

New Models in Long Black Coats

A splendid assortment of head-to-toe and knee-length coats in three-quarter and seven-quarter lengths, both in the loose and semi-fitting mode. Some strictly plain, others trimmed with fur, velvet, or lace. Make your selection from a hundred garments priced from \$10.00 to \$25.00.

Caricel Cloth Coats, \$25.00

We are specializing a number of pretty coats at this popular price. They are all top length, light and semi-fitted. Nothing is more practical for durability and modishness than these smart little jackets of CARICEL cloth, the most popular coat of the season. Special \$25.00 to \$35.00.

Smart Afternoon Frocks

These dainty frocks are just brimful of style and it really fits a long fall when you are able to select from a large assortment of dresses suitable for street or afternoon wear at such modest prices. The materials are velvet, silk, fancy wools and silk. The styles are especially attractive for the season, ranging from \$10.00 to \$25.00.

New Autumn Waists

An attractive showing in alluring lace, silk, wool and wash waists, elaborate and simple styles now being offered at prices that increase the desire for possession.

New Wash Waists \$10.00 to \$15.00
New Wool Waists \$15.00 to \$20.00
New Silk Waists \$20.00 to \$25.00
New Lace Waists \$25.00 to \$30.00

The New Skirts Are Arriving

The skirts for fall are mostly plaited and trimmed with one or more folds. Our new skirts have been selected with care that you will find the fashion, tailoring and a touch of fantasy that makes them different and out of the ordinary. These showing the smart styles, with or without trim, are priced from \$10.00 to \$25.00.

Girls' Man-Tailored Coats

Fall and winter models now ready for inspection and selection. Reverses and long coats in stripes, checks and plaids, as well as plain blue, all made up of great wools. All sizes for ages 4 to 14. Jackets, \$5 and up. Long coats \$10 and up.

Silk Stocking Sale--For Women

An exceptional quality for the price, and one which a prominent manufacturer turned over to us as good and reliable customers. Of pure thread silk in all of the most popular autumn colors, including black and white, special per pair \$1.50.

In the Leather Goods Section

First Floor.
Art and beauty combined with durability, marks the elegant bag display. Here bags, all styles and sizes. The new light-colored leathers are novel and unique. We are showing a few exclusive patterns, also better elegant, practical, and fancy leather goods, bags, purses, etc.

Belts

The newly tailored length belts to match your costume. Crisp and fancy styled, and made to perfection.

FOR CONVENIENCE OF VISITING SHOPPERS THIS STORE WILL BE OPEN EVENINGS DURING FAIR WEEK

UNDERWRITING NOTES

Some Interesting Details in Regard to the Record That is Being Made by a Remarkably Strong, Useful and Successful Institution—The Occidental Life Insurance Company, of New Mexico and Arizona—Its Authorized Capital Stock is \$1,000,000, and It Has Over a Dozen Bankers of New Mexico and Arizona on Its Board of Directors—It Expected to Write a \$1,000,000 Worth of Business This Year, and Has Written \$1,192,000 in Nine Months.

Remarkable in the extreme is the record that is being made by the life insurance interests of the United States. Life insurance has to do with the consequences of the gravest fact in life—our departure from it; and the administration of its affairs includes transactions of enormous magnitude, affecting directly the banking, real estate and other leading departments of modern business enterprises. That it shall be conducted with the necessary grasp, ability and honor is of supreme moment to tens of thousands of families constituting the best citizenship of the country. In short, there is no possibility of exaggerating the value that ought to be given by an intelligent public to the utmost vigilance in the observation of the methods pursued by the many companies which are keenly competing for new business.

And the statistics of life insurance are very gratifying, regarded as a whole. There is evidence in the large figures presented of thrift in the people, of well established confidence in the companies now in the field for business, and generally of an intelligent appreciation of the principle of insurance. This indeed is far less a subject of treatment in the advertising literature put out by the companies than it used to be. A well informed public sees readily the advantages of an investment which secures at once an estate large enough to insure comfort for a bereaved family in return for a premium which, in its amount—thanks to the power of getting the little together and making a large whole of them—is small and can be regarded, as it is regarded, as among the indispensable expenditures of the family. The literature of insurance is more than ever statements by the various companies, pointing out the advantage claimed by each one for itself over its competitors. Never before was this method of competition more keenly and ably displayed and enforced, which is an excellent thing for the public, and, as we have said, is gratifying proof of a more general appreciation of the advantages of insurance on its part.

Not but what there is abundant scope for an enormous increase of life insurance business in all parts of this country of eighty millions of people. Hundreds of thousands of new families are being founded all the time, and the future must be provided for by all of these young people who take a correct view of their parental obligations. The importance of this must be brought home to the people—by means of a local company which is entitled to their respect and confidence, so much the better. Hence we are very pleased to note the increase and gratifying success of companies in numerous centers of population—companies which are home companies to the people whom they insure and whose patronage they are seeking, which cordially promote local investments and improvements, and are identified in the requirements of their organization, with local legislation. These features of the business are excellent, in making certain a larger increase of insurance than is possible by the solicitations of foreign companies, and promoting in important ways other substantial local interests. This country is so vast, its population is so largely increasing, that such a company as the Occidental Life Insurance Company, of New Mexico and Arizona, has a field of practically unlimited enterprise and success opened to it.

This is an institution to which it is proper to refer in this connection at some considerable length. It has its headquarters at Albuquerque, New Mexico, and is not a very old institution, but it has made remarkably rapid progress from the first, and it has today as brilliant prospects for the future as any life insurance company in the country. It has an authorized capital stock of \$1,000,000, but the men who control its affairs as officers and directors and stockholders probably represent an aggregate wealth of not less than \$100,000,000, as will be seen from the following list of names as Directors: Joshua S. Reynolds, President of the First National Bank, Albuquerque; and also of the First National Bank of El Paso; Alonzo B. McMillen, Attorney; W. M. Flournoy, Vice President First National Bank of Albuquerque; Dr. James H. Wroth, physician, Albuquerque; R. J. Palen, of the First National Bank of Santa Fe; James Graham McNary, Banker, El Paso, Texas; Henry D. Bowman, Banker, Las Cruces; W. D. Murray, President Silver City National Bank; Solomon Luna, President Bank of Commerce, Albuquerque; C. N. Blackwell, Cashier First National Bank of Raton; Mark A. Rogers, physician, Tucson; L. B. Christy, Banker, Phoenix; E. A. Cahoon, Cashier First National Bank of Roswell; T. E. Pollock, President Arizona Central Bank, Flagstaff; E. W. Wells, Vice President Bank of Arizona, Prescott; John R. Hulett, merchant, Holbrook; M. J. Cunningham, Cashier Bank of Bisbee, Bisbee; John W. Poe, President Citizens' National Bank, Roswell; Frank McKee, Cashier First National Bank, Albuquerque, and J. H. O'Reilly, insurance.

It will be seen that there are over a dozen bankers on this board, and it is not at all too much to say that there is no institution of the kind under stronger or more competent control than this one. The officers are as follows: President, Joshua S. Reynolds, President of the First National Bank of Albuquerque; President of the First National Bank of El Paso; a financier and capitalist of sterling worth and integrity, and a man who is looked up to and respected by everybody, and a tower of strength to what ever he is identified with.

Vice President: Hon. Solomon Luna, President of the Bank of Commerce, Albuquerque, N. M., and one of the wealthiest sheep owners of the Southwest; also a leading politician and financial power in the Southwest whose word is as good as his bond, and R. J. Palen, President of the First National Bank of Santa Fe, a capitalist and banker of extensive reputation.

The Secretary and General Manager, Mr. J. H. O'Reilly, is one of the best posted and most popular insurance men in the country, a man with extended experience with some of the giant insurance companies of the world; a natural born organizer and handler of men (capable of writing insurance, and a gentleman of character and ability.

The Attorney for the company is the Hon. A. B. McMillen, one of the leading attorneys of the Southwest; a man of wealth and high commercial standing.

The Executive Committee are: M. W. Flournoy, capitalist; A. B. McMillen, capitalist; Sol Luna, capitalist and banker; J. H. O'Reilly, and Joshua S. Reynolds. Dr. J. H. Wroth, one of the prominent medical men of New Mexico, is Medical Director of the Company.

As already indicated, this company has made exceedingly rapid progress from the first, and it is learned that it expects to write at least about \$1,250,000 worth of business this year. The plan of campaign, so to speak, upon which it is operating, was mapped out, it is understood, by Secretary J. H. O'Reilly, and the influence of his sound judgment and wise methods is everywhere evident. The company is writing all the most acceptable forms of policies, and its rates are in every sense of the words strictly reasonable.

It can be predicted with certainty that under the wise and conservative, and yet progressive, management of President Reynolds, Secretary O'Reilly and their colleagues, the company will play a most important and useful part in the underwriting history in time to come. It is an institution of which great things may be expected. It is founded upon absolutely sound principles, and its system embodies features of usefulness not to be found in the system of any other organization that we know of. It is from every point of view entitled to the complete confidence of intelligent men and women. It has before it prospects that leave nothing to be desired. It bases its claims to public confidence and consideration upon its financial strength, upon the experience and practical knowledge brought to bear by the men who are its active managers: upon the soundness and conservatism of its methods of doing business, and upon the promptness and liberality with which it meets its engagements for the payment of losses when due. In short, the methods of this company are business-like and up-to-date in every particular, and its officers have demonstrated its policies to be as desirable as those of even the oldest and largest of its competitors. Those who purchase them are assured of perfect security and indemnity. We do not know of any life insurance company more justly entitled to public confidence than the Occidental Life.

You have tried the East, now try the West and keep the money at home. The Occidental loans to the people of New Mexico and Arizona already exceeds the combined loans of all the eastern companies in the two territories. This alone should appeal to your patronage.

ROYAL STOCK SHOW TO BE GREATEST ON RECORD

Cattle and Sheep Men of the West Getting Ready for the Big Exhibit Week in Kansas City.

The ninth annual American Royal Live Stock show will be given at the Kansas City stockyards, October 14 to 19. This is the national show of the breeders of fine stock, cattle, horses, swine, sheep and goats, the various departments are under the direction of representatives of these national organizations of breeders, and the directors of the associations represent such national organizations. The American Royal is always held at the close of the fair season, and the winners of state and interstate fairs go to the Royal for the final competition for the awards which show which are the best in their classes in the United States.

Sales of stock, in which some of the prize winners are usually offered are held in connection with the show. Breeders from every part of the country, and from foreign lands, attend these sales, to get stock which they need to supply certain deficiencies in points of their herds, or to secure the foundation for herds.

The number of entries as far received is far in excess of the entries of any previous Royal, and in some sections the number will exceed those of any general live stock show held in this country. The Herefords have already 254 entries in the single classes, nearly 70 more than at last year's Royal, which was itself a record-breaker. The Shorthorns will have as many or more than the Herefords, the Angus will be represented by nearly 200, a remarkable showing for this breed, and the Galloways will be more numerous than ever before. And this does not include the herd and the carload divisions.

An unusual interest is being taken this year in the carload lot show, and the number of such lots on exhibition and in the competition will be far greater than in previous years. Cattle have been doing well this year, both on grass and grain; every year sees an expansion in the use of pure-blood animals, and therefore a greater scope to the pure-blood live stock industry. There are more stockmen now who have herds fit to exhibit at a big show, and there is wider appreciation of the advantages of bringing such herds into competition with other similar herds from various parts of the United States.

Perhaps the most interesting of the competitions, and the one in which

the contest will be keenest, is that for the prize of \$500 offered by A. Weber of Kansas City for the best carload of fat cattle, any age, averaging 1,400 pounds or upwards, and showing a preponderance of either Hereford or Shorthorn blood.

The carlot competition will include classes for feeders that have had no grain, classes for grain-fed cattle, and special prizes for fat steers or heifers. In the carlot classes the cattle must show a preponderance of the blood of the breed in the division where they are entered.

The national association of the four leading swine breeds, Duroc Jersey, Poland China, Berkshire and Chester White, join with the Royal this year, and the display of hogs will be notable. In addition to the usual classes for aged and young hogs and sows, and boars, there will be numerous specials.

One of the three leading breeds of sheep will have big representation, also, the Cotswold, Hampshire and Shropshire. A feature of the sheep show will be the champion Shropshire sheep of the English Royal show, held in Lincoln, England, in June.

The national Angus goat exhibit of the year will be a part of the Royal. It is in charge of John W. Fulton, of Helena, Mont., who reports entries from every part of the country where Angoras are raised and fed.

The horse department of the Royal will be of special importance and interest this year, because it will include the features of the annual horse show which, until this year, has been held in convention hall, Kansas City. In the breeding division the four leading breeds, Belgian, German, Dutch, French coach and Percheron will each have the usual classes for stallions, mares and groups, with extra classes for groups and individuals, and competitions based on action. Liberal prizes are also offered for draft horses in action, singles, pairs, fours and sixes. A recent entry in this latter class is Arthur's famous six-horse team of draft greys, which were exhibited at the Olympic horse show in England this summer. McLaughlin Bros. offer prizes for students of agricultural colleges and farmer's sons, for proficient work in judging draft horses.

A department of student judging

has also been added to the Royal, covering all classes of live stock.

The mule department will include colts, yearlings, two-year-olds, three-year-olds and four-year-olds and over in various single, pair and four-hand sections.

The Royal will be notable this year for the number and variety of its features. The evening matinees were so successful last year that they are to be continued, and their scope expanded. Four night programs will be given, largely devoted to entertainment. Their chief item will be the parade of prize winners, and these parades will be liberally interspersed with special numbers. The horse show of saddle and driving animals will be the most important of these classes, have been arranged for saddle horses owned in Kansas City, for gentlemen's and for ladies' driving horses, for boy and girl riders and for high school performers. The Stock Yards derby, of which racing will be a part, will be the most exciting feature; entries must be saddle horses used at the Kansas City stockyards, and they must go through evolutions

which make a horse useful at the yards.

A pony show will be given at several of the afternoon and evening programs, consisting of fifteen points ridden and driven by a little girl.

The Kansas City fire department will show at each afternoon and evening program the team of horses which is now considered the quickest in hitching and other maneuvers of fire-horse work. The team, Irish and Scotty, are said to be the fastest that the department has ever had, succeeding in hitching and pulling, which were shown in London in 1905 and at St. Louis world's fair; Dan and Charley, the previous star team, and Dan and Joe, the team which first made Kansas City known the world over for the fine work of its fire department. Dan, nearly 30 years old, a member of the department for twenty years, will work with Irish and Scotty at the Royal.

Exhibitions, in addition to those of the competitions, will be given by the four-horse and the six-horse teams, a feature that always arouses enthusiasm.

A part of one of the pavilions has been set aside for a floral display, where local florists will arrange thousands of cut flower bouquets, potted plants and shrubbery, with avenues for the convenient viewing of them.

A complete display of agricultural implements will be arranged with men who will demonstrate the points of the latest things in farm machinery.

They Make You Feel Good. The pleasant purgative effect experienced by all who use Chamberlain's Colic, Cholera and Diarrhoea Remedy, and the healthy condition of the body and mind which they create makes one feel joyful. Price 15 cents. Sample free at all drug stores.

Yes, wife, I am going down to the Surges hotel and investigate that new lock and maybe will make you a present of one thousand shares of stock.

OUR NEW TELEPHONE NUMBER IS FORTY-SIX 146. REMEMBER THERE IS ALWAYS A COFFEY'S CLERK READY TO TAKE YOUR ORDER. NO MATTER HOW SMALL. F. C. PRATT & CO.

Have you seen those new combination locks at the Surges hotel.

FOR SALE—200 Registered Dalmatian Hams and Eggs. Good size, quality and form, covering fine staple, strong in bone and constitution. No better chance ever offered to find a flock. The best flock in Ohio, and prices are reasonable. J. C. Tobias & Son, Bucyrus, Ohio.

GO TO BELEN

The Future Railroad Center of New Mexico

LOCATED ON THE BELEN CUT-OFF OF THE ATCHISON, TOPEKA & SANTA FE RAILWAY. THE NEW CITY OF BELEN IS 31 MILES SOUTH OF ALBUQUERQUE, N. M., IS AT THE JUNCTION OF THE MAIN LINES OF THE SANTA FE SYSTEM—LEADING EAST AND WEST FROM GALVESTON AND CHICAGO TO SAN FRANCISCO AND LOS ANGELES. FROM THE NORTHERN STATES TO EL PASO, TEXAS, AND THE REPUBLIC OF MEXICO.

The Belen Town and Improvement Company

(INCORPORATED)

Are the owners of the Belen Townsite, consisting of 1000 Business and Residence Lots, size 25x142 feet, fronting upon 80 and 70-foot streets and avenues, right in the business center of the new city and directly upon the Santa Fe Railway Depot Grounds. The Atchison, Topeka & Santa Fe Railway Company is now grading its extensive depot grounds yard limits 800 feet wide and a mile long (capacity of 70 miles of side track) to accommodate its immense passenger and freight traffic, Harvey eating House, round house, coal chutes, water tanks, machine shops, etc.

THE CITY OF BELEN has a population of 1500, and several large Mercantile Houses, the Belen Patent Roller Mills with its 150 Barrels a day capacity, winery, etc. It is the largest shipping point for flour, wool, wheat, wine, beans, hay and fruit in New Mexico. From its location upon the great trunk line leading north, south, east and west, to all points in the United States and Mexico its future growth as a Commercial point cannot be estimated. All fast limited, mail, express and freight trains will pass through Belen to Chicago, Kansas City, Galveston and the Pacific Coast. The water is good and climate unsurpassed. Belen has a \$16,000 public school house, two churches, a commercial club, three hotels, restaurants, etc. It needs right now a good up-to-date newspaper and a good hotel. The lots offered are low in prices and terms easy. One third of purchase money cash; two-thirds may remain on note and mortgage for one year with interest at 8 per cent per annum. Title perfect and warranty deeds given. Come early if you wish to secure the choice lots. For further particulars and prices of lots call in person or write to

WESTERN GIRLS SAY CAPITAL BELLES ARE STORE-MADE

SPLENDID EXAMPLES OF
ARCHITECTURE AND ART

Alleged to Possess a Vacuous
Stare and an Enamored
Laugh—The Real and the
Imitation.

Washington, Oct. 6.—To approach twenty-five young women is no joke for a mere man at any time, particularly if he is alone, but the very thought of being confronted by twenty-five breezy western girls, who ride and shoot and are many miles from the sobering influences of home, is almost too much to ask, even of a newspaper reporter, says the Washington Herald.

There doesn't seem to be much difference between the girls from Washington state and Washington City to the untutored masculine observer, but several of the western girls, with subtle criticism, consented to analyze the line of demarcation and to point out with no uncertain emphasis the genuine and unattractive features of Washington femininity.

Miss Irma Dunford, a statuesque brunette hailing from Benton county, and Miss Grace Crooks, likewise of Benton, but of distinctly blond type, and with each other in their keen fling at the "pomp, stateliness and vacant expression" of the feminine parade which was passing the Elliott House on its way down F street and back, and down again.

Real Girls and Near-Girls.
"The main difference I see between our western girls and your boasted beauties of the effete east," said Miss Dunford, "is that when you see our girls you see our girls, but when you see a Washington girl you really can't be sure."

"They are drug store ladies," added Miss Crooks.
"Drug store ladies?" asked the reporter. "That is somewhat vague and carries no very distinct meaning."
"It means, if you must have the indefinite expression, that they are all paint and powder and are heaven knows what modern inventions to improve their appearance," answered Miss Dunford.

"They are all gotten up, made up," elucidated Miss Crooks.

"They are not even artificially made

up," came from the first western girl.
Footish, Foolish Man?
"They are brights and I don't see how the men can be fooled so," the second western girl voice remarked.
"They all seem to be almost perfectly ill with ennui; they seem to suffer as they walk; they are painfully blasé," Miss Dunford continued.
"They have a vacuous stare and an enamel laugh—they are artificial, and one would think that they were always on the stage. They do not seem to have a natural mien. They wouldn't last a minute with the people of the west," Miss Crooks expounded.

And then both girls realized that they were talking for publication, and asked that they be allowed to go and write some nice complimentary things about the local beauties, but the reporter was adamant, and the girls finally asked that the fact be emphasized that they were not speaking through envy. And they pushed naturally, of course, displaying to best advantage their unhome-made complexions.

Figures Like Lady Contortionists.
"How about the figures?" the reporter timidly asked, knowing that he was treading on dangerous ground. But the girls came back strong, and talked both at once, and the gist of their observations was:

"The figures are certainly snug and nice. That is some of them, but there are others who, if they were seen on the streets of our western towns, would be taken for lady contortionists. We have no such things as corseting waists or three-inch waists. And yet, with all the exercise we get, we western girls ought to have good figures. We have too, but they can't appear in the same street with the figures of your eastern girls, for most of them are the most symmetrical I have ever seen."

"But, I'll let you into a secret about them. They are changeable and carefully planned. Dressmakers are compelled to turn midnight all over them. The Washington girls, as a class, that is, the ones I have seen on F street, and at night after the theaters, are painted and padded; but they know how to do it, and it really makes them beautiful. They are the best-dressed women I have ever seen, but I can't like them. They are cold, snappy, prepossessing, and look as conceited as actresses."

The Poor, Dear Men.

"The men are all good, hard-working looking souls, oppressed and bent over. There are few big men and most of those that look big are afflicted with the same pads as the women. Why, I have seen ten with corns on their feet, and I suppose in the height of the season one could see fifty in a day. Those that I've talked to are nice enough, but they are not the big, brave fellows that we grow in our corner."

"Outside of the men and women the city is all right, isn't it?" the reporter asked, afraid that several other misdemaneurs would be charged to the capital.

"Oh, yes, the public buildings are just lovely."
The girls are in Washington on a newspaper trip from Washington to the guests of a leading farm paper of the coast. They are under the

guidance of Phillip S. Bates, the proprietor of the paper, who is making his second such trip. Each girl is firm in the conviction that her own county of her own state is the garden spot of the universe, and though they all admire the things they have seen, they are loyal to Washington state.

How to Cure a Cold.
The question of how to cure a cold with-out unnecessary loss of time is one in which we are all more or less interested, for the quicker a cold is gotten rid of the less danger of pneumonia and other serious diseases. Mr. H. W. L. Hall of Waverly, Va., has used Chamberlain's Cough Remedy for years, and says: "I firmly believe Chamberlain's Cough Remedy to be absolutely the best preparation on the market for colds. I have recommended it to my friends and they all agree with me." For sale by all druggists.

THE METALS.

...CRESCENT LUMBER CO... SILVER CITY

The Crescent Lumber Co.'s yard and warehouse is one of the busiest places in Silver City, and fills a long-felt want in this section of the country. Although the Company has been in existence for only about three years, it is already known throughout the entire southwestern part of New Mexico. The Officers of the Company are all men whose business ability is known over the entire Territory.

I. A. Dye, of Albuquerque, is president; W. H. Hahn, vice president; J. B. Herndon, treasurer; O. N. Marron, secretary, and Geo. J. Salee, manager. Mr. Salee is a practical lumberman and is thoroughly familiar with the requirements of the trade in New Mexico, having been "born and raised on a pine stump."

The yard occupies an entire block of ground, and, in addition, there is a warehouse 75x100 feet, which is the largest single warehouse used for similar purposes in New Mexico. At present the Company is carrying a stock of about 750,000 feet of lumber in addition to a large stock of flooring, ceiling and finishing stock.

In the warehouse is carried a complete stock of Portland cement, lime, plaster, fire brick, fire clay, corrugated iron, doors, sash, glass, building paper, turned work of all kinds, paints, oils, and the best equipped stock of builders' hardware in the city.

That the accommodations and conveniences of the yard are appreciated is forcibly shown in the fact that the Company has more than doubled its business during the last ten months. Their working force consists of from twelve to fifteen men and three delivery wagons which are worked to their fullest capacity.

The Company maintains a well equipped planing mill in connection with its yard, where all special orders for sash, doors, frames, turned work, etc., are done. This department is under the management of Mr. I. W. Salee, a contractor who enjoys the confidence of the company's patrons and who has materially increased the company's business in this department.

Practically every mining camp in Grant County is supplied with timber from the company's yard.

Controlling, as they do, the entire production of the Continental Lumber Company's plant, eighteen miles from Silver City, they are in a position to fill any order received for special sizes in timbers on very short notice. This feature is much appreciated in this section where, previous to the installation of the Continental Mill, all special sizes in timbers had to be freighted by rail for a distance of several hundred miles, which necessitated a delay of several weeks. The Continental Mill produces and ships to the Crescent Lumber Co., an average of 15,000 feet of pine lumber every day.

It is a rare sight in this country, where timber is scarce, to see a train of fifteen to twenty wagons loaded with lumber and drawn by from four to eight horses, but such is a sight that may be seen any day, on the road from the Continental Mill to the Crescent yard.

The Crescent Lumber Company has the exclusive agency in Grant County for Hercules Powder, and keeps a large supply on hand at all times.

They are also exclusive agents for the celebrated Eluterite and "Malthoid" roofings which are so widely used throughout the western states.

The prices maintained are as reasonable as good business judgment will permit, and special attention is paid to mining companies and contractors.

Should you be in the market for lumber or building material of any kind you will find the Crescent Lumber Company not only able to take care of your requirements, but always courteous and obliging and appreciative of your business.

OPPORTUNITY KNOCKS AT YOUR DOOR NOW. We are compelled to convert these books into money at once. To protect our interests as finance agents, we have assumed control and offer without reserve the remaining sets of the Publisher's latest and most important publication—**"Library of Universal History,"** fifteen sumptuous volumes, over 5,000 pages, 100 specially engraved maps, 700 beautiful illustrations, copious marginal notes and chronological index. This is a new publication from cover to cover, prepared by a staff of the most famous historians of the world. Cost to produce nearly \$250,000.00. Positively the first edition printed from these new plates, made from type cast expressly for this work. Each volume is 2 inches thick, 7 inches wide and 10 inches high.

Read Our Offer: Beginning with the dawn of recorded thought and tracing the progress of mankind, these Sixty Centuries of Progress leads us step by step through Ancient, Medieval and Modern Times. In this great panorama we see the birth, growth and development, the decay and death of races and nations. The pure, simple and enchanting language used in depicting these great events makes this story of human progress more fascinating than fiction. Young folks will use this work and read it with delight, charmed by its splendid pictures and vivid style.

Our Offer! We send the books, complete set, 15 volumes, prepaid, to you at once for five days' free examination. If found satisfactory, send us 50 cents within five days and \$2 monthly for 10 months for Silk Cloth binding. (This is \$20.50 for the 15 volumes, while the publisher's price was \$45.00.) For 3-4 Red Morocco binding, send us 50 cents within five days and \$2.75 monthly for 10 months or a total of \$28. Publisher's price was \$60. Cut out and mail the coupon herewith, or a copy of it, now. If the Library is not perfectly satisfactory after five days' examination in your own home, notify us and we will have it returned at our expense. You run no risk whatever, but act promptly as the sets are going fast.

New Mexico's Agricultural College; a Flourishing Institution That Has a Great Future Before It

JUST NOW ENTERING UPON A PERIOD OF RAPID AND GRATIFYING DEVELOPMENT

Aimed to Teach Young Men and Women of the Territory in the Practical Application of the Useful Arts and Crafts and to Fit Them to Become Potent Factors in the Development of the Community.

EXPERIMENT STATION HAS DONE GREAT THINGS FOR TERRITORY

Practical Experiments in Farming With and Without Irrigation and an Intelligent Study of Plant Life and Soils Directed Toward Aiding in Advancing Scientific Farming.

AN IRRIGATION CANAL.

When the main building was first occupied the only other building within a mile of it was a part of what is now the seed house. Mesilla Park consisted of the railroad station and ten (mostly empty) little frame cottages, built by the railroad company.

Now there are on the campus proper the main building, science hall, the engineering buildings and the buildings of the boys' club, fastidiously called Klondike. The new Y. M. C. A. building is already in course of construction and work on an agricultural building and an academy building will be begun soon. Besides these there are the seed house, the greenhouse, the corrals and the women's hall at different places on the college farm, and a grand stand on the athletic field. And Mesilla Park has grown in proportion, for it now boasts perhaps fifty houses, three general stores, a new \$6,000 public school building and a flourishing Episcopal church. And notwithstanding all this growth there is still insufficient room for the accommodation of those who wish to take advantage of the school.

Some idea of the growth of the institution may be gained by comparing the faculty and other officers in 1891 with the present force of instructors and experiment station workers. At that time there was a president, a clerk, a professor of agriculture and horticulture, a professor of natural science (who was also botanist and

1901 145
1902 155
1903 165
1904 175
1905 185
1906 195
The present year promises to be the banner year in respect to numbers for the total enrollment is already 270 and more will enter before the end of the year.

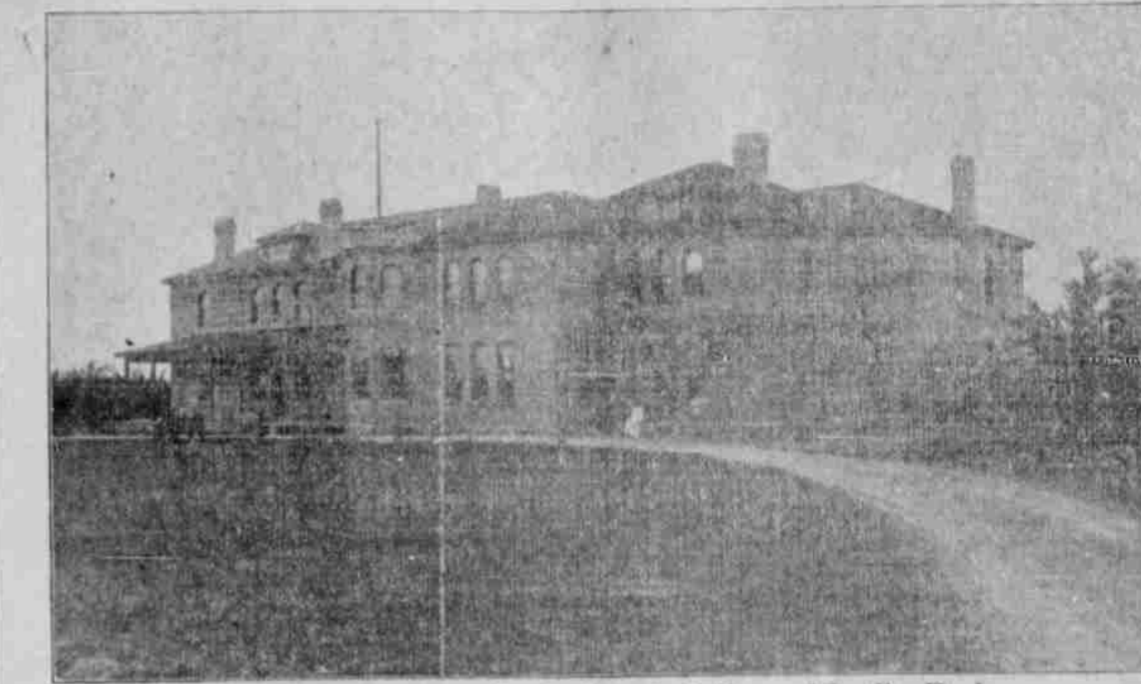

Laboratories and Equipment.
The various laboratories of the College are exceptionally well equipped. At one time all of them were located in the basement of the only building then on the grounds. Now they are scattered through some four buildings.

The chemical department has probably the most extensive scientific laboratory of the institution, occupying almost the whole lower floor of Science Hall. The mineralogical rooms with gas furnaces for assay work in one and desks, apparatus, and hoods for wet analysis in another; the large weighing room and library; the large Experiment Station laboratory equipped with every necessary piece of apparatus; large and commodious students' working laboratory with practice assaying and weighing rooms adjoining; and finally the large recitation room with lecture desk and chemical stock room adjoining—all go to make this department an exceptionally strong one.

The Domestic Science laboratory also on the lower floor of Science Hall, is equipped with twelve gas burners, a large gasoline range, working tables, china closets, refrigerators and cooking utensils. Specimen drawers are served by the young women and students of this department are usually important members of committees that cater for entertainments and picnics.

The young women also have a comfortable room fitted up for the practical work which all goes under the name of sewing. Here they have sewing machines, cutting boards and tables, charts, and material for the actual work besides the necessary fitting rooms with accommodations for trying on. The department gives an exhibition of its work about commencement time, which is in the nature of an afternoon tea and is a thoroughly enjoyable occasion.

The physical laboratory occupies part of the second floor of Science Hall. This room is equipped for the extensive operations in soil investigation

Girls Dormitory, Agricultural College, Mesilla Park

construction materials. In this room are found various pieces of electrical apparatus besides models, blue prints, charts, and the vast equipment necessary in teaching engineers their professions.

The agricultural and horticultural departments are becoming well supplied with equipment. The demands upon these departments grow daily and it was necessary to send east the past summer to purchase a carload of high grade pedigreed stock to add to the present herds. Class work in live stock covers the care and judging of cattle of different breeds, swine, sheep, goats and horses. The large corrals, stables and fields give abundant opportunity for the study of live stock and field crops. The greenhouse, with flower gardens adjoining, make the college grounds attractive as well as furnishing ideal work grounds for the boys. The agricultural department has nearly one hundred acres under its control. The boys' department has nearly thirty acres devoted to orchard, vineyard, and plots of melons, chile, sweet potatoes, and other vegetables which are being grown and experimented with.

The opportunity here offered for young men to become acquainted with farm machinery and to learn how to handle it has been observed by manufacturers over the country and during the past four or five months over fifty worth of farm and dairy equipment has been given to the college for first class demonstration work. The new agricultural building will furnish much needed laboratory, class rooms, and museum space for these departments.

The department of stenography and typewriting also has what may be called its laboratory where the noise of sixteen typewriters of various makes may be heard at almost any hour of the day. And the result of this practice along with other work is a kind of operator that the business men of this country find valuable in their offices. The department also is equipped with a number of the latest types of office stationery, furniture, and labor saving devices which are used by students in the course called office practice.

Courses of Instruction.
The subjects taught in the institution are divided into courses and in these courses are classified studies which pertain particularly to the line of work desired by the student. The college offers four full four-year courses, namely: Agriculture, Engineering (including Mechanics), Electrical and Irrigation Engineering, Domestic Science and Art, and a General Science Course. These courses are complete and lead to a degree of Bachelor of Science on graduation from the institution.

The college makes provision also for those who wish to take the regular four-year course. Several courses are provided in stenography, typewriting, bookkeeping, practical mechanics, and a two-year course in agriculture.

This year a still shorter course than any of the others has been outlined for the college is to be in the fall. This is the shortest course of agriculture and household economics which the college has ever offered through its practical and bookkeeping departments as beginning October 24, 1907 and ending March 14, 1908. This course covers instruction and practice in dairying, elementary agriculture, live stock, fruit and vegetable growing, farm mechanics and machinery, bookkeeping, house sanitation, and farm home work.

This short course is prepared and offered especially to those who are busy all summer and fall until about the middle of October and are more or less free until the spring work begins on the farm and range. There is no limit for admission to the

chosen of this course, except a student must be at least fifteen years old.

Activities of Student Life.
The student activities of the college are numerous and are, for the most part, well developed. This year has seen the beginning of a most creditable weekly paper bearing the name of "The Round-up." It will compare favorably with similar publications in western schools. Once a month a literary supplement is added to the paper and the students are stimulated to efforts along all lines of writing by the monthly offer of a prize of five dollars. The "Round-up" is the successor of two former value publications—the "Collegian," a monthly issued by the Columbian Literary society from the earliest days of the institution, and the "College Weekly," a newspaper founded by the Stenographers' association about a year ago.

There are now three literary societies carrying on their work: the Columbian society, which has been in existence for a number of years; the Athena, which is just about to celebrate its fourth anniversary; and the Lithian, the membership of which is made up of academy students. In these societies practice is afforded in essay writing, declamation, oratory, and debating, and literary contests are to be one of the features of the work for the coming year.

A dramatic club, under the auspices of the English department, gives students who have talent along these lines the chance to develop it. The play for last year was Goldsmith's "She Stoops to Conquer," and was by all odds the best performance given by the club in its four years' existence. It is not yet certain what will be presented this year, but it is not improbable that a Shakespearean play will be attempted.

The musical department has this year organized a choir club, and also an orchestra, among the students, and the prospects for these seem very encouraging.

Religious work among the students has had an encouraging development in the last two years. The Young Men's Christian association has a membership of over a hundred, and holds six bible classes every Sunday morning with an approximate total attendance of seventy. During the past year about \$12,000 has been raised by students and their friends throughout the territory and in El Paso for the purpose of erecting an association building on the college campus. There is no similar institution in the United States, west of Kansas, which has such a building. This building, as has already been mentioned, is in course of construction. The college had five representatives at the Y. M. C. A. student conference in Lake Geneva, Wisconsin, this summer.

Within the past year the Young Women's Christian association has been organized in the school, and bible classes are held among the young women. These of the college girls attended the Y. M. C. A. conference at Colorado, Colorado, during August of this year.

On Sundays the college hack runs to Las Cruces to take students to the Catholic, Presbyterian, and Methodist churches which are found there. In Mesilla Park there is a flourishing Episcopal church within a stone's throw of the college property. Here a choir of twenty-two, consisting entirely of college men, gives the full choral service every Sunday morning; and this year, upon the arrival of the new \$1,334 organ, which has just been purchased for the church, another choir of college boys, numbering twenty-five, will sing the evening service. This brings the total number of students in the choir up to nearly fifty. Last year's choir gave a burlesque comic opera at the end of the season, which was a great success.

The work of the college in athletics is well known in the territory. For years the championship in football has been held by the students. It is expected that this year will prove no exception. It certainly will not if it is to depend upon the enthusiasm and faithful work of the football squad. Girls' and boys' basketball teams have been organized and will be ready to dispute the supremacy with all comers. The desire of the students in athletics is not so much to train a few good men for winning teams, as to encourage all the men and women of the institution to engage in some form of healthful exercise. In the spring track work and baseball divide the interest of the athletes. The majority of the territorial records are held by the college, and there seem

The recent rapid growth of the New Mexico College of Agriculture and Mechanic Arts at Mesilla Park, or as it is more familiarly known, the Agricultural college, has served to attract special attention to that institution, which is doing so much for the development of the territory and what is more important, in preparing young men and young women so that they may take a practical and active part in furthering that development. The work of the college experiment station has long drawn the attention of farmers and agriculturists all over the country, and the institution is just now entering on the period of its most rapid development in all departments, when it is reaching out for young men and young women from all parts of the territory who are ready to take advantage of the inducements it holds out to those who desire to fit themselves for the real work of living and doing.

It is an interesting institution, aiming as it does to teach men how to cultivate the land, to raise live stock and to run machines; to become engineers and mechanics and farmers; to teach young women to be capable, efficient housekeepers, and if need be, to fit them for caring for themselves. A brief review of the purposes of the institution, its work, its equipment and a glimpse into its future are therefore of very considerable interest to all the people of New Mexico.

Foundation and Purpose.

The New Mexico College of Agriculture and Mechanic Arts was established as the result of an agreement between the territory of New Mexico and the United States government. In this contract the territory agreed to furnish a farm of some 200 acres, buildings sufficient for the needs of the school and experiment station work, and enough money to pay for furniture, care of equipment, and managerial expenses. The United States government agreed to furnish certain sums of money, annually which may be used for the purchase of apparatus, materials, books and all necessary equipment both for teaching and experimental work, and payment of salaries of men hired for either or both these purposes.

Thus it is seen that the institution is by virtue of its very plan of organization a strictly territorial institution, and its benefits should and do accrue to all citizens of the territory who take advantage of them. It is in no sense a local institution, though as a more consequence of convenience of position it can be used more readily by those who live near it.

In order to render it more readily available to those whose homes are at some distance, the regents have recently established a plan by which individuals who wish to live near the college for convenience in educating their children, can do so at a minimum cost.

The purpose of the college is to furnish collegiate education of an economic nature, to the people of the territory, the fields of agriculture and engineering being especially designated in the original legislative act, but other kinds of scholastic work are not prohibited, and correlated pure science is especially included. The work of the experiment station, which is by the act a department of the college, consists of the original investigation of all subjects of an agricultural nature which may be hoped to be of advantage to the people of the territory, and the free distribution of the published reports of the results of such investigation. This work is to all paid for by special appropriation of congress and is a direct gift to the territory.

The board of regents of this institution have carried out this policy as extensively as they knew how and as extensively as the funds and equipment would permit. The college is now in its eighteenth year, and while it is by no means what it will be as the years go by and New Mexico grows as she must and will, it is without doubt fairly one of the leading educational institutions of the southwest.

Its Growth and Development.

In 1890 the college began work in the old Las Cruces college building and in a rented private house in Las Cruces with about sixty students. In September of that year the corner stone of the first building was laid, and in February of the following year what is now the main building began its service. For another year the basement of this building was not completed and the first class in qualitative chemical analysis did its work in one of these unfinished rooms without either a gas or water supply.

Avenue Leading to Main Building, Agricultural College

chemist of the experiment station, at least in name; a professor of mathematics, a professor of zoology (who was ornithologist of the experiment station); a professor of mechanical engineering; a professor of languages; a principal of the preparatory department, who had one assistant, a music teacher, and one man of all work on the farm. Janitors, librarians and all other assistants were selected from among the students.

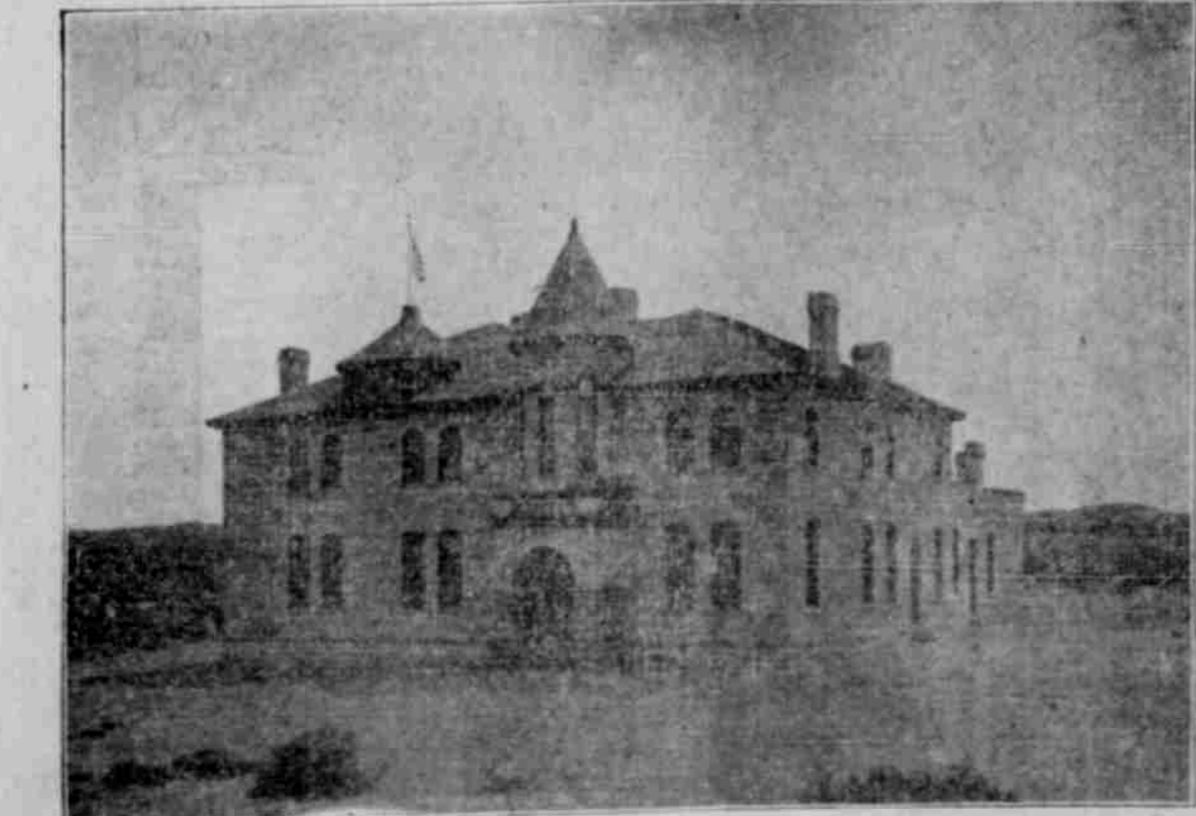

Today there is a force of thirty-three professors, instructors, assistants, etc., not including the janitors, dormitory servants or workmen upon the farm.

The total enrollment of students for the separate years is as follows:
1890 25
1891 35
1892 124
1893 109
1894 84
1895 160
1896 132
1897 152
1898 215
1899 270
1900 284

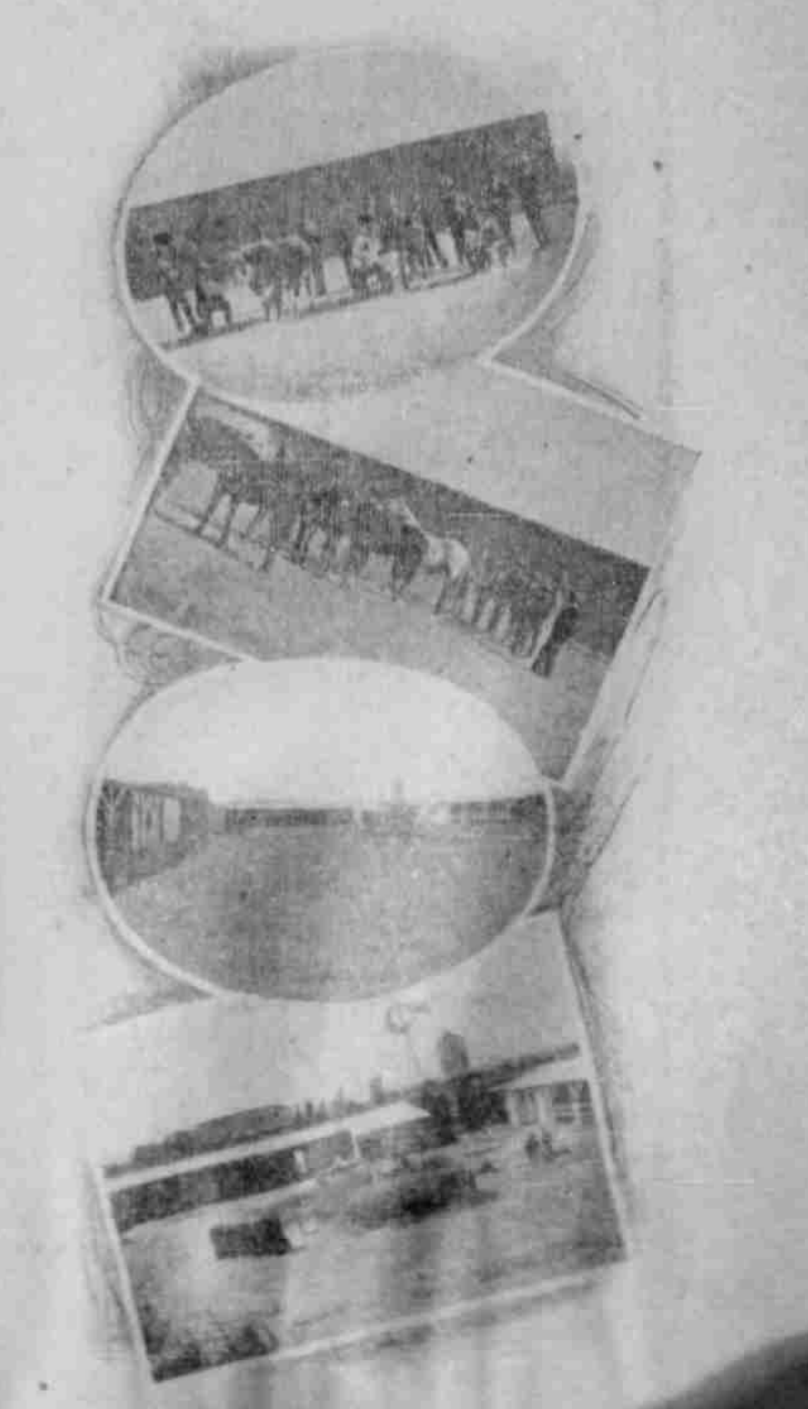

For which the laboratory is well known over the territory. The physical laboratory is equipped with the usual work tables and the cases are filled with thousands of dollars worth of instruments. A dark room affords opportunity for photographic work and studies in light. The meteorological work of the station is under the supervision of the Physics department, which collects, rainfall, etc., is given close attention and an idea of the work is given in results published in Bulletin No. 49.

The Biology and Botanical laboratories occupy the remainder of the floor. One large room is devoted to the herbarium and nowhere in the southwest is there a more complete collection of botanical specimens. For fifteen years the head professor has given his attention to the collecting and classifying of the flora of New Mexico. Special attention has been given to range work and a large number of the native grasses have been brought together. Attention has been given to the valuable grasses and other forage plants as well as the injurious ones. Another room of this laboratory contains a collection of New Mexico birds and several thousand insects which have been collected from time to time. This room also serves as geological work room and is supplied with geological specimens suitable for class work. The biological laboratory is supplied with desks, some fifteen microscopes of the best makes, two good microscopes, charts, casts, skeletons, etc. The shelves and cabinets are filled with preserved specimens of value.

The advantage afforded by the laboratories of the Engineering department is one of the leading attractions of the college. The laboratory occupies an entire building. One room is equipped with twelve modern blacksmith forges supplied with compressed air, a brass furnace, and a modeling room, another is crowded with wood lathes, carpenter benches, saws, planers, and sample cases. Adjoining the wood turning room is the most elaborately equipped room in the building. Here are metal lathe of half a dozen makes, a forty horse power steam engine, a fifteen horse power oil engine, a fifteen horse power gasoline engine, several one and two horse power engines, metal saw, pump, compressors, planers, an electric dynamo, and motor. In other several other machines with names too much for the layman. Steam is furnished from a forty horse power boiler and all the large machines are geared as to drive from a single shaft. The drafting and office rooms are complete in their furnishings, having up-to-date working tables, comprehensive libraries, and all manner of testing instruments and devices. One laboratory contains a testing machine of \$5,000 purchase price which is used for determination of the strength of all kinds of

One of the Important Duties of Physicians and the Well-Informed of the World

It is to learn as to the relative standing and reliability of the leading manufacturers of medicinal agents, as the most eminent physicians are the most careful as to the uniform quality and perfect purity of remedies prescribed by them, and it is well known to physicians and the Well-Informed generally that the California Fig Syrup Co., by reason of its correct methods and perfect equipment and the ethical character of its product has attained to the high standing in scientific and commercial circles which is accorded to successful and reliable houses only, and, therefore, that the name of the Company has become a guarantee of the excellence of its remedy.

TRUTH AND QUALITY

appeal to the Well-Informed in every walk of life and are essential to permanent success and creditable standing, therefore we wish to call the attention of all who would enjoy good health, to the fact that it involves the question of right living with all the term implies. With proper knowledge of what is best each hour of recreation, of enjoyment, of contemplation and of effort may be made to contribute to the end and the use of medicines dispensing with generally to great advantage, but as in many instances a simple, wholesome remedy may be invaluable if taken at the proper time, the California Fig Syrup Co. feels that it is alive important to present truthfully the subject and to supply the one perfect laxative remedy which has won the approval of physicians and the world-wide acceptance of the Well-Informed because of the excellence of the combination, known to all, and the original method of manufacture, which is known to the California Fig Syrup Co. only.

This valuable remedy has been long and favorably known under the name of—Syrup of Figs—and has attained to world-wide acceptance as the most excellent of family laxatives, and as its pure laxative principles, obtained from Senna, are well known to physicians and the Well-Informed of the world to be the best of natural laxatives, we have adopted the more elaborate name of—Syrup of Figs and Elixir of Senna—as more fully descriptive of the remedy, but doubtless it will always be called by the shorter name of Syrup of Figs—and to get its beneficial effects always note, when purchasing, the full name of the Company—California Fig Syrup Co.—plainly printed on the front of every package, whether you simply call for—Syrup of Figs—or by the full name—Syrup of Figs and Elixir of Senna—as—Syrup of Figs and Elixir of Senna—is the one laxative remedy manufactured by the California Fig Syrup Co., and the name hereunder known by the name—Syrup of Figs—which has given satisfaction to millions. The genuine is for sale by all leading druggists throughout the United States in original packages of one size only, the regular price of which is fifty cents per bottle.

Every bottle is sold under the general guarantee of the Company, filed with the Secretary of Agriculture, at Washington, D. C., that the remedy is not adulterated or misbranded within the meaning of the Food and Drugs Act, June 30th, 1906.
