## ROCKEFELLER ENGINEER DIES REALLY DID DOZEN HURT NOT KNOW IN WRECK

DISCLAIMS FAMILIARITY  
WITH OIL TRUST LOANS

William G.'s Testimony in Federal Suit to Dissolve Standard Oil Government Attorneys But Little Advantage.

[By Morning Journal Special Leased Wire.]  
New York, Oct. 18.—William G. Rockefeller, assistant treasurer of the Standard Oil company of New Jersey, was a witness today in the federal suit for the dissolution of the oil combine, and gave testimony regarding the large loans which appeared on the company's books as having been made to "interests other than Standard." He testified that these loans had been made to financial interests in this city.

The balance sheets of the Southern Pipe Line company from 1899 to 1906, show that loans amounting to many millions, were loaned to H. S. Kelllogg and charged to expense account.

"Do you know anything about these loans?" was asked.

"I really do not," answered Mr. Rockefeller.

Mr. Kelllogg then took up the loan account of the Standard Oil company of New York, in 1906, which reached \$22,000,000.

"Mr. Rockefeller, I find here among the items a loan to T. M. Barnard, of \$1,630,044. What was that loan for?"

"The money was paid out from time to time to Mr. Barnard, at the direction of John Archbold. The collateral was stocks and bonds of oil and gas companies in West Virginia and Pennsylvania."

"Of the whole loan of \$22,000,000 made last year, what amount was loaned to Wall street brokers and what to individuals?"

"Well, about \$19,500,000 was loaned to Wall street brokers and the rest to Mr. Barnard and to the individual."

replied Mr. Rockefeller. Said he:

"The Standard sometimes has large sums in the street, and again it has little at all interest. The collateral is safe stock exchange securities. We require a margin of 20 per cent at all times."

Mr. Rockefeller said that the Standard Oil company of New Jersey did not loan money in Wall street. He said he did not know why the subsidiary pipe line kept on deposit such vast sums of money except perhaps that it might be used in construction work.

"But, Mr. Rockefeller, those sums aggregate millions," said Mr. Kelllogg.

Mr. Rockefeller disclaimed familiarity with the accounts of the pipe line companies.

## STEAMERS CRASH IN DENSE FOG

Water Tight- Compartments Save Many Lives When Vessels Collide on Puget Sound.

[By Morning Journal Special Leased Wire.]  
Vancouver, B. C., Oct. 18.—In a dense fog the Canadian Pacific railway steamer Tatar, from Vancouver for Hong Kong, collided with the steamer Charnier, of the same line, from Victoria for Vancouver. The collision occurred at 6 o'clock off the Sandhead lights at the mouth of Fraser river, but on account of the fog the steamers could not get into Vancouver with the news of the accident until noon today.

The Charnier struck the Tatar squarely on the port bow, cutting through the Tatar's plates and crumpling the Charnier's bows. Both vessels began to fill, but the compartment bulkheads kept them from sinking. Both ships started back to Vancouver after the Charnier's passengers had been transferred to the Tatar. They remained outside of port with their pumps going until noon. Both vessels are seriously damaged.

The Charnier has arrived at Vancouver with her bow badly crumpled. The Tatar was beached at Kathlamet, near Vancouver, to prevent her sinking. She has twenty-eight feet of water in her hold. The Tatar was bound for Kobe, Japan.

Fairbanks Favors Waterway Project.

Chicago, Oct. 18.—The need of improving the navigable inland waterways will be the chief topic to be discussed by Vice President Fairbanks during his tour of Iowa and Texas, which opens at Sioux City tonight.

"There is no doubt," Mr. Fairbanks said while here, "that by deepening many of the inland streams the freight rates of transportation would be lowered in the same proportion as though the Mississippi project were completed, as I hope it will be."

Food Manufacturers Protest.

New York, Oct. 18.—Food manufacturers from all parts of the country in session here yesterday made a protest against abolishing the use of benzoate of soda as a food preservative. In a resolution the work of the government for pure food was commended and the harmlessness of benzoate of soda was asserted.

SANTA FE FLYER IN  
DITCH NEAR TRINIDAD

Two Giant Locomotives and Costly Equipment Plunge to Destruction; Rotten Ties are Blamed for Disaster.

[By Morning Journal Special Leased Wire.]  
Trinidad, Oct. 18.—Eastbound passenger train No. 4, the Chicago limited, on the Atchison, Topeka and Santa Fe railroad, was wrecked at 5 o'clock this morning at Earl, Colo., a small station twenty miles east of Trinidad, and the passengers were severely shaken up, though none were killed or fatally injured. Engineer John Thomas, Raton, N. M., was crushed to death under his engine, and Fireman Albert Boyington, of Trinidad, was fatally injured.

The train was a double-header, and Thomas and Boyington were in the forward locomotive. Both locomotives and all the cars, a composite car and a diner and three sleepers, were derailed, only the real sleeper remaining upright. A relief train was sent from Trinidad. The accident is attributed to bad ties.

The injured.

Tommy Burns, prize fighter, Oakland, Cal.; hip sprained.

Burns' manager, Billy Neal; ankle sprained.

A. Coulard, a retired merchant, San Francisco; injured about the hip by being thrown from berth.

Mrs. C. W. Cokerly, of Kankakee, Ill.; thrown violently from her berth; internal injuries.

Henry Smith, Tulare, Miss.; thrown out of berth and hurt about the back and ankles.

Nat Pipes, of Pueblo, Colo.; thrown out of berth; several severe bruises.

James Monroe, Portland, Ore.; fell on the head.

Mrs. William Smithers, Seattle, Wash.; a broken hip.

Mrs. Nancy Nolan, San Francisco; injured about the chest.

Mrs. Polly McFarland, Chico, California; serious bruises.

MAGILLS FOUND  
GUILTY

Verdict of Jury Frees Illinois Couple Charged With Murder of Woman.

[By Morning Journal Special Leased Wire.]  
Decatur, Ill., Oct. 18.—Acting under instructions from Judge Cochran, the jury tonight rendered a verdict acquitting Fred Magill and his wife of the charge of murdering Mrs. Pet Magill, the first wife of Magill. In his instructions the judge said the state had failed to prove the corpus delicti. The verdict was greeted with cheers in spite of the efforts of the court to maintain order. The crowd in the court room hurried forward and offered congratulations to the Magills. The jury afterward filed by and each shook hands with the defendants.

On May 21 last Mrs. Pet Magill was found dead in her home at Clinton, Ill., and a post-mortem examination held six weeks after her death showed that she had been suffocated by chloroform. On July 5, in Denver, Colo., Fred K. Magill, her husband, and Miss Fay Graham, a young woman who had been a close friend of the family, were married.

Four days later in San Diego, Cal., Magill and his second wife were arrested on a charge of murdering the first Mrs. Magill. They were brought back to Clinton and secured a change of venue to this city. In the trial the state claimed that Magill and Miss Graham, by their conduct, had driven Mrs. Magill to suicide, and were therefore guilty of murder. The defense introduced letters written by Mrs. Magill shortly before her death, in which she complained of "unbearable headaches" and constant "nagging" of her husband's relatives. Witnesses also testified that Mrs. Magill had often talked of committing suicide. In a letter written to him before her death Mrs. Magill asked him to marry Fay Graham in case anything should happen to her.

ALLEGED LAND FRAUDS  
HELD TO FEDERAL COURT

Prominent Wisconsin Citizens Must Face Jury at Denver.

Milwaukee, Wis., Oct. 18.—Six prominent Milwaukee men charged with conspiracy to defraud the government out of valuable coal lands in Colorado, were today held for trial at Denver, United States Commissioner Bloodgood having held that the government had made out a prima facie case. The men thus implicated are:

Guy D. Goff, Charles F. Hunter, T. J. Peres and J. M. Peres, of the Wisconsin Coal Mining company, and Chauncey Jones and Eli S. Arnold, of the Federal Coal and Iron company.

They were remanded to the custody of the sheriff here. Meanwhile the defendants secured writs of habeas corpus from Judge Quillen. In the

federal court, which are returnable October 28, and will give the attorneys an opportunity to appeal from Commissioner Bloodgood's ruling, and also if determined in the defendants' favor, to have their trials in Milwaukee, if anywhere.

The commissioner discharged C. S. Carter, C. E. Canright, W. S. Johnson and H. D. Weisner, against whom indictments also had been returned.

Episcopal Convention.

Richmond, Va., Oct. 18.—The selection of Rev. Edward Jennings Kight, of Trenton, N. J., to take charge of the missionary district of Western Colorado; the organization of a board of missions; refusal of the house of deputies to reconsider its position against the use of a revised version of the Bible and a host of other acts marked today's session of the triennial convention of the Protestant Episcopal church.

HAGUE CONFERENCE WINDS  
UP PROLONGED SESSION

The Hague, Oct. 18.—Joseph H. Choate, head of the American delegation, today signed the final act of the peace conference and the convention adjourned.

In closing his speech at this afternoon's session, President Nelidoff said:

"Thanks were expressed to the august initiator of the conference, his majesty the Emperor of Russia. The conference, I hope, will today render homage to the president of the United States, who first proposed the meeting of the second conference, by authorizing me to send the following telegram:

"The delegates to the second peace conference, having finished their work and remembering with gratitude the initial proposition made for its convocation by the president of the United States, present to him their respectful homage."

WARLIKE CHINKS IN  
BLOODY BATTLE

Rival Tongsmen in Philadelphia Use Pistols and Knives to Adjust Differences; Three Reported Dead.

[By Morning Journal Special Leased Wire.]  
Philadelphia, Oct. 18.—A fight between two Chinese in Chinatown this afternoon developed into a riot, the rival Tong societies taking sides. Pistols and knives were freely used in the crowd on the quarters, and it is reported that three of the participants were killed.

The police reserves from the tenderloin districts were hastily summoned, and had great difficulty in quelling the disturbance. Many arrests were made. One Chinaman was killed and several wounded.

There had been considerable trouble among the Chinese colony. Before policemen in duty there today could separate the men who were fighting in the streets, Chinamen poured from all the houses and a free-for-all fight ensued.

PLOT AGAINST TAFT  
PRONOUNCED FAKE

Manila, P. I., Oct. 18.—Reports were made to the local police yesterday by a priest that an attempt was to be made to throw a bomb at Secretary Taft while he was attending a reception at the Jesuit college, but a careful investigation failed to disclose any foundation for the statement. The secretary was closely guarded. Previous to taking part in a round of entertainments today the secretary held a conference with Governor General Smith, a member of the Philippine commission, and prominent officials of lower rank. The Philippine assembly is a completed organization of its various committees.

Farmers' Convention.

Oklahoma City, Okla., Oct. 18.—A large audience was present when the Farmers' National congress met today. H. B. Watson, of Kearney, Neb., delivered an address on "Dry Farming," showing how the principles developed could be used to advantage even in regions where the rainfall is usually sufficient.

President John M. Stahlin, in his annual address, said that the year has been one of unusual seasonal vicissitudes, reducing the crops yet because of higher prices the farmers of the United States will receive a billion dollars more than last year. The farmer's money, unlike that of capitalists of high finance, he pointed out, is clean and no other class is being so thoroughly and widely educated as the farmers of this country.

Mosquitoes Kill Thousands.

New York, Oct. 18.—"There are 250,000 deaths annually as a result of mosquito bites," said Dr. Edward A. Ayers at a meeting in the Academy of Medicine last night. He furnished astonishing figures in his lecture on "Mosquitoes as a Sanitary Problem." He said that five diseases, four of which are nearly always fatal in effect, are directly traceable to bites of that insect. These are malaria, yellow fever, beri beri, dengue and filaria.

The government is eliminating the mosquito danger by draining the swamp lands," he said.

Danish Steamer Ashore.

London, England, Oct. 18.—The Danish steamer Alfred Erlander was wrecked last night on rocks near Stabbehead, Scotland. She went ashore during a gale last night and twenty of her crew were drowned. The lifeboat, which spent the night looking for survivors, had a narrow escape from being frequently swept by heavy seas.

## HUGHES SEEKS NO HIGHER POLITICAL HONORS

Significant Speech by New York Governor Reviewing His Administration of Empire State's Affairs.

DISCLAIMS AMBITION TO  
POSE AS BOSS OF PARTY

Brilliant Executive Declares Himself Foe Alke to Blatant Demagogue and Corporation Sycophant.

[By Morning Journal Special Leased Wire.]  
New York, Oct. 18.—Governor Hughes tonight made a declaration of his attitude toward the presidential nomination when in the course of an address at a dinner given in his honor by the Republican club he said:

"I do not seek any public office. I have not sought nor shall I seek directly or indirectly to influence the selection or the vote of any delegate to any convention, and with reference to the election of any delegate to any convention there will be no suggestion or thought of influence, protest or reprisal in the executive chamber."

It was at this same club that Mr. Hughes announced his acceptance of the gubernatorial nomination, and his speech tonight was a review of his administration, particularly with reference to the legislation which had been accomplished for the state control of public service corporations and other important measures with whose execution and support he had been identified. Additional significance was given his speech tonight by reason of the fact that he took occasion to refer to his position in regard to the fusion of the republicans and the independence league on the New York county ticket. Governor Hughes said in part:

"One of the fundamental purposes of the administration is to vindicate the adequacy of our institutions to put an end to abuses, tumult or disorder, without injustice or demagoguery, and in a patient, deliberate but none the less vigorous manner; to insist upon the recognition and enforcement of public rights by availing ourselves to the utmost of the existing machinery of the government, and by making such new provision as the interests of the people may require."

"A difficult problem of first importance was presented in connection with our public service corporations. It was our object to remove them from the field of reckless speculations and to provide, to the fullest extent consistent with constitutional requirements, methods of investigation and redress through which the public obligations of reasonable, impartial and adequate service could be enforced and public safety and convenience be conserved. Means have been provided to prevent the repetition of the wrongs which have been committed in the past and through the use of the powers governing the issue of bonds and stocks, through inspection upon proper methods of bookkeeping, through the prescribed supervising of the transactions of these corporations, it is believed that necessary publicity will be secured, that the rights of investors will be safeguarded and that the public will be protected from the reckless exploits of the unscrupulous who hitherto have had their way without effective restraint."

"I believe in the reign of justice and in the patient consideration of every question to the end that it may be settled in a spirit of fairness. I have no more confidence in the vindictive methods and arbitrary legislation of those political grafters who endeavor to make selfish profit out of public wrongs, than I have in the sycophants of corporate power. Nothing is permitted but truth and justice. And to attain it, in view of our human imperfections and inherent limitations, we must address ourselves unceasingly to this end, content only with the award of our best judgment after a thorough understanding of the matter with which we attempt to deal."

In speaking of his political future, the governor said:

"To avoid any possibility of misapprehension regarding my own course, I may say this further word—I do not seek any public office. To me public office means a burden of responsibility, a burden of incessant toil at times almost intolerable, which under honorable conditions and at the command of the people it may be a duty and even a pleasure to assume, but it is far from being an object of ambition. I have not sought, nor shall I seek, directly or indirectly to influence the selection or the vote of any delegate to any convention, and with reference to the action of any delegate to any convention there will be no suggestion or thought, influence, protest or reprisal in the executive chamber."

In speaking of his attitude toward the New York county political situation where the republican organization has affected a fusion with the independence league, or Hearst party on the county ticket, Mr. Hughes said:

"Talking in this personal vein, I may say that I have steadfastly refrained from becoming associated in any manner with factional controversies. I have no connection with or interest in the ambitions or efforts of rivals for political preferment or political leadership, in any locality or in the state at large. I desire to see party activities conducted honorably, the freest expression of popular choice and to have party organization represent the untrammeled wish of the members of the party without any interference on the part of the executive. To this end I have favored the adoption of a plan for direct nominations and have favored a permissive bill, so that the plan could have a fair trial in the communities where it has the support of public sentiment. It is of great importance, in my judgment, that the discharge of the duties of the governorship should not be embarrassed by attempts at political management. Such is the power of the office that it tends itself easily to efforts at political control, and such use of the office is I believe, fraught with danger to the interests of the people of the state."

"I am frequently asked to express approval or disapproval of party action or of particular candidates. Should I do so it would fairly be incumbent upon me to pronounce upon such action of candidates in advance, and thus to attempt to determine the course to be pursued. If this were done in one case it would be inevitable that it should be done in many cases, with consequent responsibility. If such responsibility be assumed, it must be accompanied by action, by such attention to matters of management as would be commensurate with responsibility and would justify its assumption. The result is certain. Experience shows you cannot stop short of it. If such a course be taken either the governor (and he cannot separate himself from his office) will be in undisputed control of party management and become a party boss, or he will be involved in continual contests for maintenance of his political influence and prestige. Now I do not aim to be a party boss. I want simply to be governor during my term. The only alternative to the course that I have criticized is to divorce the governorship from political entanglements, to keep its influence free from control by parties that do not concern the office, and my conception of the duties, the responsibilities and the power for good of that office forbids me from throwing its weight or attempting to exercise its power except for the purpose of performing its constitutional functions."

FRESH INDICTMENTS FOR  
BRIBERY IN ST. LOUIS

Foodary Councilmen Fail to Take Warning From Fate of Folk's Victims.

St. Louis, Oct. 18.—Delegates Frederick W. Priesmeyer and Ferdinand Warner were arrested tonight on indictments for bribery. The indictments were returned at a special session of the grand jury after tonight's passage by the delegates of a bill granting permission to build a garage on Delmar boulevard. The men were taken to the Four Courts and locked up shortly before midnight. The indictments charge that the two delegates received \$500 to be divided between them for the passage of the bill. They deny the charge.

STUDENT SHOTS  
COMRADE

Enraged at Rejection of Challenge for Duel, Youth Mortally Wounds His Foe in College Class Room.

[By Morning Journal Special Leased Wire.]  
Portland, Oct. 18.—Lewis H. Wilson, a student at the Eureka theological seminary at Eureka, Ill., today shot and wounded John A. Welsh during the assembling of class for the recitation. Wilson fired a revolver point blank at his victim. The bullet lodged in Welsh's neck near the jugular vein. Welsh's condition is considered serious. Thursday afternoon Wilson challenged Welsh to a fight, which was rejected and Wilson purchased a revolver of a hardware dealer and practiced target shooting on the college campus just prior to the convening of the class. Welsh's home is at Sydney, Australia, and Wilson comes from a small town in Missouri.

DISGRACED PRINCESS  
GIVES UP HER CHILD

Florence, Oct. 18.—Acting upon the advice of friends and after conversation with an envoy from the court of Dresden, Signora Toselli, formerly Countess Montenegro, has finally consented to give up Princess Anne Maria Pia at the end of this month.

Signora Toselli will be allowed to have the princess with her one month out of every twelve, and she will see her other children once a year. Her confinement from the Saxon court will be continued. Signora Toselli is to leave here in January for a concert tour of the United States.

Emperor Passes Bad Night.

Vienna, Oct. 18.—While the physical condition of Emperor Francis Joseph improved somewhat during the last twenty-four hours, his malady, a catarrhal affection, remains practically the same. Court physicians declared this evening that last night was the worst the patient has passed since the beginning of his illness.

This evening the patient was still without fever, but he was coughing violently.

## NEGROES WITH RAZORS DEFY POLICE

LIVELY RIOT STARTS  
IN PRAYER MEETING

Brave Officer Loses Life in Attempt to Quell Disturbance in Darktown Quarter of New Orleans.

[By Morning Journal Special Leased Wire.]  
New Orleans, Oct. 18.—A party of negroes barricaded themselves in a downtown house tonight and started a small riot. One policeman was killed, several were wounded and one negro was wounded and five were arrested.

The trouble started in front of the Second German Presbyterian church at Clayborne and Annetie streets, during services tonight, when several negroes became boisterous. Patrolman Cambions, who attempted to arrest them, was killed. The negroes ran to a nearby house, which they barricaded. With shotguns, revolvers and razors, they assailed the police, a few of whom gathered quickly and stormed the house. Sergeant Wheatley was mortally wounded and Patrolman Wenck and Corporal J. W. Dunn received serious wounds. The negroes were captured after the house had been set on fire.

Patrolman Cambions was killed by a knife thrust, and his body lay for a considerable time in front of the barricaded house, no one daring to move it. About half an hour after his death a small detail of policemen made a rush upon the house, half a dozen of them falling to the pavement, shot by the negroes from the windows. The police were driven to shelter, carrying the wounded men with them. For more than a quarter of an hour the negroes were the masters of the neighborhood, while the police collected a force of twenty-five men to renew the attack. This larger squad surrounded the house so that no one could escape, and after finding that threats and shooting were of no avail, set fire to a fence behind the house. The smoke drove the negroes from cover. They broke for safety singly, the first one out—falling mortally wounded, while the next two rushed out with bloody hands held over their heads and begged for mercy.

EXAMINER IN CHARGE  
OF BUTTE BANK

Depositors, Mostly Working People, Remain Optimistic Despite Difficulties of Heinze Institution.

[By Morning Journal Special Leased Wire.]  
Helena, Mont., Oct. 18.—According to long distance telephone messages to the Associated Press from Butte, received tonight, there has been practically no developments in the State Savings bank situation there today.

State Bank Examiner Collins today assumed charge of the situation, and after making a hurried inspection of the books announced that from the figures at hand, the bank is in a better condition than when it submitted its last quarterly report to him. The whole question, however, is said to depend upon the value of the collateral which the institution holds on outstanding loans.

The depositors, who principally are working men and women, were cheerful today over the outlook.

Examiner Collins is making a thorough investigation of the bank's books and will later make a statement to the depositors.

The Silver Bow National bank, which is also controlled by F. A. Heinze, is said to be safe and will not be involved in the copper magnate's financial difficulties. There was no sign of a run on this institution today.

The officers of the State Savings bank tonight refused to make any statement, saying that the bank is now in the hands of the state examiner, and that any official statement given out must come from him.

SMALL NO LONGER  
TELEGRAPHERS' CHIEF

Deposited President Accepts Defeat; Will Hunt Job Next Week.

Chicago, Oct. 18.—Sylvester J. Small, suspended president of the telegraphers' union, tonight announced his retirement from the office and from the union. He said:

"I am down and out and will not make any further attempt to recover my position. I will look for a job next week."

Predict Strike Settlement.

New Orleans, Oct. 18.—Speedy settlement of the strike of ten thousand cotton bales was made possible tonight when both sides in the controversy made almost similar peace propositions. Definite action on both proposals is expected tomorrow.

# SLEUTHS SHADOW WEALTHY NEW YORKERS

## FIVE DETECTIVES ON TRAIL OF HARRIMAN

### Rage for Espionage Curious Development of Life in Big City; Gossip From Nation's Metropolis.

(Special Correspondence Morning Journal.) New York, Oct. 16.—The very latest style in New York is to have a shadow, and there is scarcely a man of prominence in the city, especially in the great financial district, who is without one. While they are worn at all times these shadows are not those cast by the sun, but real detectives disguised in second-hand frock coats and false whiskers. Never before has there been such a rage for having personal shadows and with enormous sums of money being paid to the person who has not a shadow on his trail does not amount to much. Surprisingly few persons, however, have been followed for more than a year, and strangely enough, E. H. Harriman has not the natural shadow of one shadow, but five. While the public adds two and two and makes shrewd guesses, each of these gentlemen refuse to say whom he suspects of having him shadowed. Controller Meek, who recently refused to shake hands with Police Commissioner Bingham, asserts that he was shadowed across the ocean and back again by the latter's shadow, while "Fingy" Connors, chairman of the democratic state committee, asserts that the shadowing emissaries have made themselves extremely obnoxious. It is also reported that Mayor McCellan is watched by the shadows of Hearst, and Wall Street daily swarms with them. There is no reason why any shadow should be without a job. The number of private detective bureaus in the city has more than doubled in the past two or three years, and all of them are kept busy. The New Yorker who has not a shadow nowadays is accredited with little standing.

The oftentimes bitten man in the world is the little claimed for Isham Lees, official dog catcher of New York who is dying from hydrophobia. There may be tramps who have felt the pressure of canine teeth against their faces, but if so they are unknown to fame, and this dog catcher's record of having been bitten by 261 dogs is likely to stand for some time. The two hundred and sixty-second bite proved fatal, however, and hydrophobia overtook the most bitten man in the world. Besides being the most bitten, Lees has been chewed by a greater variety of dogs than any other before him, no less than fifty-one different varieties ranging from the mastiff to the toy spaniel having lacerated him more or less seriously at various times in the last three and half years, during which period he was bitten on an average of nearly twice a week. Several times already he has been laid up with all symptoms of hydrophobia, but recovered every time, and until bite No. 262, which resulted in his death, he was believed to be immune.

Whether or not the discovery of gold, not in the form of bullion, but a real mine in the earth itself, in New York this week is to turn the city into a mining camp remains to be seen, but there seems to be no doubt that gold has been discovered and right in the heart of Manhattan, too. When nearly a year ago a similar discovery was made in excavating for the foundations of a skyscraper excitement was intense until it was discovered that the gold did not exist in quantities to make it valuable. The present discovery, however, has not only revived all the old excitement, but added to it many fold, since if the ore assays as much as the sample already obtained, its value as estimated by experts would be nearly \$25,000 a ton. The "strike" was made within half a mile of the city hall by a sewer construction company, which was making borings along the edge of the East river. For several days the drills have been bringing up quartz, a remarkable circumstance in itself, until finally a foreman looking at the material thus brought up discovered that it contained gold. Expert examination revealed the surprising value of the find. The ore as now located lies 100 feet below the mean water mark in the East river on the down town water front. Whether the ore is so blessed that it can be extracted profitably remains a matter of conjecture. Meanwhile no claims have been staked out, chiefly, perhaps, because only a few knew of the location of the discovery.

Although New York has held the opinion that there was not much left for it to learn in the promising line, it has discovered something absolutely new this week and has been much interested in the visit here of Dr. Richard Harlan, who is a son of Justice Harlan, of the supreme court, and who was formerly president of a western university. Dr. Harlan is an educational promoter for the present at least, and he is giving his time and energies to the task of securing the financial support necessary to make George Washington university, at Washington, the greatest center of graduate study in the country. In this Dr. Harlan says he is only carrying out the desire expressed by the Father of His Country, for whom the institution is named, to see a great national university at the federal capital. Those who are behind the present movement, however, believe that better results can be obtained if the institution is enlarged through a widespread popular endowment than if the government is asked to support it. From present indications the application of modern business methods, such as a non-commercial project as the development of a big national seat of

learning seems likely to prove as successful as it is novel.

Connecticut's wooden nutmeg mine now give way in New York's stone potato. In the particular field of furnishing this strange and adamant vegetable substitute, this city, it is asserted on good authority, leads the world. The stone potato, it should be understood, is not a new breakfast food, but in the small city markets where real potatoes are sold by the pound it is a source of much profit to unscrupulous vegetable dealers. One of these stone tubers adds weight in a manner calculated to rapidly enrich those selling them. The article itself, so large has the trade grown, is made from plaster of paris and colored properly. Fortunately, however, they can not be eaten, a fact which makes them less desirable than the groves which when added to beans to give weight has caused many a broken stomach. Persons who have suffered from these crooked practices assert that the nutmeg potato breakfast may be shortly expected.

Most of New York craved to meet this week when Ernest Capelle received \$1,000 for setting up one high hall in public. It was not of the alcoholic variety, however, but the one on the top of the flagpole crowning the lower Broadway, more than seven hundred feet above the street level. Like-wise Capelle is not a bartender, but a steeple jack, and by reason of his feat in finishing off the tallest habitable structure in the world, the leader of his profession, though little more than a boy. The feat for which he received \$1,000, and which was watched by thousands, consisted of shunning up the steel flagpole, which swayed like a reed under his weight, and crowning the remarkable structure with a gilded ball, which soon makes the highest point reached by skyscraper architecture. Curiously enough, Capelle, who spent about his perilous task with the utmost coolness, did not look like a fly to the gaping multitude below, but like a full-sized man when he finally gained his dizzy perch on top of the pole on account of the fact that there was nothing else in that part of the upper world to make him look small in comparison. Perhaps the strangest feature of the whole undertaking was the fact that Capelle had to give bonds to the city not to fall on anybody, although, as he remarked, it wouldn't make much difference to him if he did.

## MORE MONEY IN ZINC THAN IN ALL THE GOLD

### Marvellous Production of the Joplin Lead-Zinc District Soon to Be Scene of Mining Congress.

Joplin, Mo., Oct. 17.—The total production of the Missouri-Kansas lead and zinc district for the week ending October 11, was 11,799,219 pounds zinc, and 1,613,246 pounds of lead, valued at \$282,330, which is the

largest shipment since the shipment of the mines two months ago. The American Zinc, Lead and Smelt company finding their stock of ore on hand short, in order to secure the needed amount to keep their plant running, knowing that the only ore to be purchased was of the week's production, pushed the price to \$12.50 per ton, thereby securing 1,211 tons, which is 300 tons in excess of their usual weekly purchase. This made competition strong among the buyers, with an upward tendency in price, a direct result of the shut-down.

The actual value of lead and zinc in the district is more comprehensive by comparing it with the output of gold in this and other countries. If you were told that the district produced \$16,000,000 in gold last year, the migration to this section would surpass that of "49" in California, when gold was first discovered, yet this district did produce that amount in actual money, the medium being lead and zinc, instead of gold.

A task, according to the latest reports available, produced \$10,000,000 in gold, yet Alaska as a gold mining camp is known to every girl and boy as a most wonderful place to find money in mines. Why are not the lead and zinc mines equally as well known, since their output is larger, exceeding that of Alaska by \$6,000,000—expense gold seems more precious.

All the gold produced by the South American states combined, \$9,826,700 equals but little more than one-half of the output in lead and zinc of this district; while Central America produced but \$1,120,700 in gold; Japan, China and Korea combined produced \$1,484,000, and India alone \$1,435,500.

The actual output of lead and zinc of this district (\$16,000,000) equaled one-fifth of the amount of gold (\$320,000,000) produced in the United States in 1904.

The tonnage of the railroads shows the value of mining as an industry compared with other industries, giving tonnage to the railroads. The factories and manufacturing of the United States produce a tonnage for the railroads of one-seventh; the great forests give the railroads one-fifth of her tonnage; the farm products, of which we hear so much said about there being insufficient grain every year to move, so that other interests must step in for the purpose of moving the product, only produce one-ninth of the tonnage. While the mines produce more than one-half of the tonnage that the railroads haul from point to point and from city to city.

The American Mining congress, to meet in Joplin, November 11 to 16, has done much in its ten years of work to bring the mining business before the world as nearly its chief industry. Mining is aligned with more industries dependent on the mines for the raw material than any other industry in the world. And few of the metals have more uses than lead and zinc. Strangers visiting this camp for the first time are awed into silence at the richness and vastness of her mines, as well as the country itself.

The coming meeting of mining men includes the brightest men in that profession in the world, many of whom will visit this camp for the first time.

# HUNTING DOWN THE POISONOUS PLANTS

## Government Making Progress in Study of Poison Growth in National Forest Reserves.

That the poisonous plant investigation work now being carried on by the forest service in the different national forests throughout the west has awakened widespread interest is strongly illustrated by the increasing number of applications for new range examinations from users of the national forest.

Although this branch of the forest service work is still in its infancy, it being a comparatively short time since the plan was initiated, good progress has already been made. A thorough examination of the Mount national forest, in Utah, and partial examinations of the Huachuca, in Arizona, Black Hills in South Dakota, and the Holy Cross, in Colorado, have been made and much very valuable information in regard to the plants most dangerous to stock has been secured. It is the intention of the forest service to continue the work throughout the coming season, and it will undoubtedly result in a series of important discoveries that will lead to a reduction of the loss of range stock from poisonous plants to a minimum.

In an application for an examination of poison areas in the Park range and Sierra Madre forest in Colorado and Wyoming, it is reported that the value of sheep lost during the present season within a comparatively small area from poisonous plants is not less than \$15,000, the value of 738 head of sheep lost out of one band, 125 out of another, and a number of smaller losses from other flocks. Heavy losses of cattle are reported from Colorado also.

While the work of investigation has been confined to the national forests, the results obtained will be equally beneficial and applicable to the uses of unreserved public lands, as the poisonous plants are different species of two or three beneficent families and the discovery of an antidote for one is a means of eradicating or checking the growth of one species will apply equally well to the others.

Held on Horse Stealing Charge. According to address received at the headquarters of the mounted police, Romualdo Techillas was arrested at Farmington, N. M., Oct. 16, on Tuesday. Techillas is alleged to have stolen horses from Navajo Indians, five of which animals, it is alleged, he sold to parties in Santa Fe county. Of the eight horses all but one has been recovered. Two of them, it is said, were purchased at Albuquerque recently by a man from the Estancia valley. Techillas will be brought here for preliminary hearing.

Henry H. Jones, of Tampa, Florida, writes "I can thank God for my present health due to Foley's Kidney Cure. I had been suffering for years with kidney trouble and all kinds of kidney cures, but nothing did me much good until I took Foley's Kidney Cure. Four bottles cured me and I feel no more pain in my back and shoulders. I am 62 years old and suffered long, but thanks to Foley's Kidney Cure I am well and can walk and enjoy myself. It is a pleasure to recommend it to those needing a kidney medicine." J. H. O'Reilly Co.

## SALE OF CATTLE HAS CAUSED PADILLA MUCH GRIEF

TORRANCE COUNTY  
CLERK UP AGAINST IT

On Trial in District Court on Indictment Charging Cattle Stealing Resulting From Transactions Two Years Ago

Capitolo Padilla, probate clerk of Torrance county and chairman of the republican central committee of that county, is now on trial in district court on an indictment charging him with the theft of six head of cattle from a fellow ranchman more than two years ago. Behind the indictment lies a story which is filled with grief for Padilla and in which he seems to have rubbed up against the tough edges of the law in several different ways, no matter what the result of the present hearing may be.

The case had its origin one bright spring day when Padilla started across the Manzano mountains from his Torrance county home to some cattle to market in Albuquerque. According to the account given by Padilla he was overtaken about evening and when he had arrived within the boundaries of Bernalillo county he was told by a fellow ranchman who had six head of cattle which were also destined for the Albuquerque market. The men made camp together and next day came on into Albuquerque, where Padilla arranged for the sale not only of his own cattle but of the six head belonging to his companion of the trail and in that transaction he was the victor. He sold the cattle for a good price and the cattle, criminal proceedings would be begun against him. Padilla alleges that he had already settled for the six head, amounting to \$150. On receiving this notice he sought the advice of a friend, who advised him that since to defend a criminal proceeding would cost him lots of money he would do better to settle. Padilla then settled with the owner of the six head in dispute, according to the version of the affair and took his neighbor's note for the amount. At this point the transaction becomes most complicated. Padilla employed a lawyer, who afterward for the reason that he left New Mexico, gave up the case. Then Padilla hired another lawyer. The case has thus far proven a rather expensive one when the price of the six head of cattle is considered. The indictment against Padilla was secured shortly after the occurrence of the sale and has been pending, having been postponed from time to time through legal technicalities. Owing to Padilla's position the case is attracting some attention and twenty or more witnesses are here from Torrance county in connection with the case. The day from 11 o'clock was occupied with the examination of witnesses and it is not likely that it will be completed before noon today. District Attorney Chavez appears for the territory, while A. A. Sedillo of Chavez and Sedillo, appears for Padilla.

June Otero, charged with using abusive language while armed with a deadly weapon, which under the laws of this territory may be a penitentiary offense, was found not guilty yesterday morning by the jury after a brief deliberation.

**Asks Permission to Practice.**  
Manuel O. Vigil, who recently came to Albuquerque from Trinidad to practice law, yesterday made application before Judge Abbott for a temporary license to practice before the Bernalillo county bar pending the meeting of the supreme court when he will take the usual examination.

**New Suits Filed.**  
Suits were filed yesterday by I. A. Dye, doing business as the Rio Grande Lumber company against B. D. Starnell, on account of claiming damages in the sum of \$33,144. W. J. Granger and wife have filed suit against Clarita Algodon de Trujillo and Arthur J. Mitchell to quiet title to certain real estate in the Bernalillo addition to the city of Albuquerque.

## SAN MIGUEL SCHOOL FUNDS ARE SHORT

Loss of Revenue From Gambling Said to Mean Serious Embarrassment to County Government.

When gambling closes on January 1, what will the county do when it comes time to pay the school funds?

This is a question which the county must meet and settle and this time is fast approaching when nearly one-third of the school revenue will be dropped off.

At the present time there are nearly five school districts in the county, and for lack of funds there are eight school districts in the county. With this many school districts, it is because of a shortage of money, what will the county do when it comes time to pay the school funds?

In the county there are 1,634 children of school age, but from figures supplied in the office of the county clerk there are only about 1,225 chil-

ren enrolled in the public schools of the county at the present time.

The total amount of money received by the county annually from the retail and wholesale liquor licenses and the gambling is \$12,350, and this is available for the maintenance of the public schools in the county.

Of this amount \$2,250 has come from gambling licenses and it is this latter sum which will have to be made good to the school fund in some way by the first of the year.

In case no provision is made by which funds are secured to take the place of the revenue realized from gambling, there will be a great many more than eighteen schools in this county closed because of financial conditions. Of the \$2,250 realized from the various games of chance, East Las Vegas receives \$1,550 and the West side \$700. The schools which at the present time are closed are outside of the city, and if these outside schools which will suffer most unless a speedy arrangement is made by which additional funds are secured.

Right here the question of the disposal of the funds realized from the Las Vegas land grant seems to have a chance for settlement. The Las Vegas grant at the present moment has to its credit in the banks of this city nearly \$50,000, and in view of the present poor condition of the county schools, a suggestion that these grant funds be used for school purposes does not seem out of place.

It is understood that the question as to what use these land funds would be put to once came up before the grant board, and at that time a recommendation was passed by the board advocating the use of this money for the benefit of the schools located within the grant.

It was suggested by Judge Mills at the time that the Las Vegas grant fund be invested in county bonds, that the principal be kept intact and the interest devoted to the schools. A mass meeting of the people who live on the grant for the purpose of discussing this subject was also suggested, but so far as is known no meeting has ever been called.

In the meantime there are eighteen schools in the county closed. Schools closed because of insufficient funds, and this while the Las Vegas grant has lying idle in the banks, nearly \$50,000. If this money was properly invested the income would make a school fund that would insure all the children of the county an education. There would be no necessity for closed buildings and the county would be able to meet its obligations. It is true that the only schools that would be benefited by the use of the grant funds would be the schools that are located within the Las Vegas grant, but if these schools were taken care of with grant funds the county would be able to meet the expense of caring for the schools in the outlying districts.

The majority of the citizens on the land grant, it is safe to say, will favor the using of the Las Vegas grant funds for school purposes, but there are not many months for reflection, and the county can ill afford to close more of its school houses for the foreseeable reason that no money is in hand with which to pay the teachers.

**Buyers Meerschman Mine.**  
A Silver City dispatch says H. P. Dammel, of El Paso, formerly of Austin, has just been pending over two months, with W. P. Dorsey, of this city, the discoverer and owner of a meerschman mine located twelve miles from this place.

An analysis of the meerschman by expert mineralogists shows that the ore is absolutely pure and free from crystals and other substances that impair the value of meerschman. Mr. Dorsey discovered the mine many years ago, but only a short time ago did he learn its true character and great value. It is the richest mine of pure meerschman yet discovered on this continent and it is confidently expected that within a year it will develop into a property worth a million or more.

There are others associated with Mr. Dammel, but just what disposition will be made of the property has not been determined until Mr. Dammel returns from a trip to the eastern states, stopping off in San Antonio en route.

It is believed here the mine will be promptly developed. It consists of a group of claims covering an area of 120 acres, through which flows a beautiful stream of water, the head in the famous Pinos Altos gold district, about eight miles away. There are one or two placer gold mines on this stream, Mr. Dorsey owning claims from which he has taken \$90 in gold from a ton of sand and gravel.

Mr. Dammel while here went all over the meerschman property and he is enthusiastic and believes he has a great property. On it is found (illegible) granite stone that Mr. Dammel says may prove of great importance and add value to the property. The mine is sure to increase in value as the price of meerschman has recently advanced about 25 per cent.

## SOUTHWESTERN NEWS NOTES

The Howell Drug and Jewelry company will give a handsome silver loving cup as a premium for the next driver at the big horse show to be given during the Elks carnival. Fifteen applications for entry have been made already.

John Smith, a convict serving a four-year term in the Territorial penitentiary for burglary, was released last Sunday morning by his family. He had previously quarreled with a convict named Edwards and fractured the latter's skull with a heavy fist.

J. P. Lowe, of Elida, over in the Pecos county, has raised a best twenty-two inch long, nineteen inches around and ten pounds in weight. Pretty near as big as some of those Colorado valley beats at the territorial fair.

Antonio Martinez died in Kelvin, Ariz., the other day as the result of a gunshot wound in the abdomen inflicted by Deputy Sheriff Louis Mickey. Mickey shot to save his life and to keep from getting stabbed by a long, shiny frog-sucker carried by the Mexican.

Ask your doctor if he approves of this prescription for blood, impure blood. Accept his answer without question.

## WILEY WILL TRY IT ON THE DOG

Side of Beef in Cold Storage for 14 Years to Be Turned Loose for Experimental Purposes.

Washington, Oct. 18.—Dr. Harvey W. Wiley, chief chemist of the department of agriculture, is about to release from captivity a side of beef that has been held in a refrigerating plant for more than fourteen years. This is the story.

Two years ago Dr. Wiley, chief chemist of the department of agriculture, inaugurated a series of experiments with a view to determining the nutritive value of meat, game, poultry, eggs, butter, milk, cream and other food products kept in cold storage for indefinite periods. The results are about to be placed in the form of a report which will be submitted to congress at its coming session. The experiments demonstrate, it is understood, that meat kept in cold storage for three months or longer.

"When we started these experiments," said Dr. Wiley yesterday, "notice of our intention was sent broadcast to the managers of refrigerating plants. One of them in Cleveland informed the department that he had a side of beef that had been in refrigeration for more than twelve years. We asked the Cleveland man to contribute it for use in our scheme of experimentation. He did."

Dr. Wiley was asked if this long-lived piece of beef would be fed to the police squad, whose members have laid their stomachs on the altar of science and for several months have been devouring all sorts of foods, including the most objectionable. He is deleterious to health.

"It will not," said Dr. Wiley emphatically. "Why not?" he was asked. "We will first try it on the dog," he replied with a smile.

**Dangerous After They Emerge.**  
Then Dr. Wiley explained. Meat and other foods, if kept in cold storage for long periods without any apparent degradation in their nutritive value. But between the time they are introduced to the fed plume of a laboratory and the time they would make them fatal if taken into the human stomach.

The meat, poultry, game and other articles that have been in Dr. Wiley's laboratory for the last two years will

not, therefore, be fed to the police squad. Their condition will be tested by the chief chemist and his assistants in other ways. When put in the refrigerator plant in the first instance the steaks of the meat were carefully measured, and since have been remeasured at intervals.

**Santa Fe Gets Three Weeks Time.**  
Three weeks more will be given the Santa Fe before sentence is pronounced upon the corporation for granting concessions in rates to the Grand Canyon Lime and Cement company, says the Los Angeles News.

According to the news, the corporation is to consider what was to be done by them when sentence was pronounced, the attorneys for the corporation, Thomas J. Norton and A. H. Van Cott, was given until November of this month to prepare for the corporation to move to the position of the first fine the government will levy for a violation of the Elkins law in this section of the country.

"Why do you want time before sentence is pronounced?" indignantly asked the attorney, Lawrence Lawler, when the railroad lawyer's plea for delay was made. "I do not see why sentence should not be pronounced this morning."

Norton turned upon Lawler. These two attorneys have been at it for months, and have shown considerable personal animosity toward each other, since the beginning of the trial. "Mr. Lawler, the Santa Fe wishes to prepare certain documents before the sentence of the court is given. We must have ninety days," and I protest against this long time," declared Lawler.

Judge Lawler decreed that three weeks would be sufficient time for the railroad, and ordered the defendants to appear November 4 for sentence. Tomorrow, the second court against the railroad, that of granting relief to A. G. Schmitt and others in this city, will be begun.

**When Important Business Is Done.**  
New Mexico is aroused with a patriotic desire for statehood over base ball. But, then, New Mexico's statehood rally comes after her fair is over, and as soon as the people of Arizona can finish wallowing the stuff out of rival ball teams, their Arizona will turn her attention to some important effort for the development of the territory.—El Paso Times.

**Concealment or Publicity—Which?**  
Business enterprises may be roughly classed as those which will prosper by publicity, and those which will not. No successful business will prosper from concealment and secrecy. No worthwhile business will fail to prosper from the publicity which it attracts.

House-builders are not advertisers—house-builders are. Builders should prefer adequate concealment—merchants adequate publicity.

**REPAIRING A SPECIALTY IN BRICK WORK OR PLASTERING. RING UP 100.**  
ANGILO.

## Open Publicity

Insures a fair, square and honest deal. It characterizes the policy of Dr. Pierce as relates to the composition of his time-proven and most popular medicines. Their ingredients are on each bottle-wrapper, attested under oath and printed in plain English. Dr. Pierce's Favorite Prescription is the only medicine designed for the cure of woman's peculiar ailments and sold by druggists, the makers of which publish on each bottle-wrapper what the medicine contains.

Dr. Pierce's Favorite Prescription contains no alcohol, and no narcotics or other harmful or habit-forming drugs, as will be seen from its published ingredients. It contains only such native, medicinal roots as are most highly recommended by leading medical writers and practitioners of all the several schools of practice, for the cure of woman's delicate and peculiar ailments. It is safe for women to take in any condition of the system, as it assists Nature in restoring the healthful action of all the organs of the female.

**Nature's own cure.** In fact, "Favorite Prescription" is Nature's own cure for the many derangements and weaknesses peculiar to women. It is advised for no other diseases.

If you are a weak, tired, nervous, over-worked, broken-down, pain-racked woman, either young, old or middle-aged, suffering from frequent headaches, backaches, dizziness or fainting spells, gnawing or distressed feeling in stomach, perhaps see imaginary specks, or dark spots floating before the eyes, have dragging-down or heavy feeling in lower abdomen, or pelvic region, with, perhaps, pelvic catarrh, or other symptoms of functional or organic affections of the distinctly feminine organs, then you will make no mistake if you resort to the use of Dr. Pierce's Favorite Prescription.

The most advanced medical science knows no better agents for the cure of all such diseases than are happily and harmoniously combined in this widely-famed "Prescription" of Dr. Pierce.

You can't afford to accept any secret nostrum of unknown composition as of questionable merit as a substitute for this professionally endorsed and time-tested remedy of known composition, simply that some unprincipled dealer may make a little larger profit. Don't expect it to perform miracles but give it a fair, persistent trial and it is not likely to disappoint you. It won't dissolve tumors—no medicine will. It will cure a larger percentage of all curable ailments which especially afflict womanhood than any other medicine sold by druggists for any purpose.

As to Dr. Pierce's Golden Medical Discovery it has a very large range of application, yet it is by no means recommended as a "Cure-All." It possesses marvelous alternative, or blood-cleansing, properties and is at the same time a most invigorating tonic, or strength-giver. It cures a specific, cleansing, soothing and healing effect upon all the lining mucous membranes of the system; hence, its great curative value in all catarrhal affections, no matter where located.

In Chronic Nasal Catarrh, it is well to cleanse the passages two or three times a day with Dr. Sage's Catarrh Remedy fluid, while persisting in the use of the "Golden Medical Discovery."

The powerful alternative or blood-purifying properties possessed by the "Discovery" will naturally suggest its use for the cure of blotches, pimples, eruptions, or even skin diseases, and other skin affections in all of which it has made remarkable cures; also in scrofulous sores and old, open ulcers, or catarrhs of the throat, to heal the latter, use Dr. Pierce's All-Healing Salve as a local application, while taking the "Golden Medical Discovery" to correct the blood and cleanse the system. A box will be mailed to any address on receipt of fifty-four cents in stamps. If your druggist don't have it in stock, address Dr. Pierce, as above.

In Chronic Nasal Catarrh, it is well to cleanse the passages two or three times a day with Dr. Sage's Catarrh Remedy fluid, while persisting in the use of the "Golden Medical Discovery."

## HELP WANTED—Male

WANTED—A man who can collect and make collections. An A-1 position with salary for a man who will work. Address W. J. Johnson, care of Journal.

## KENDRICK HAS QUIT THE SANTA FE SYSTEM

SECOND VICE PRESIDENT  
ON INDEFINITE VACATION

C. W. Kouns, Superintendent of Transportation, Becomes Acting Second Vice President According to Semi-Official Announcement.

It has been semi-officially announced that Mr. J. W. Kendrick, second vice president of the Santa Fe system and head of the operating department, has resigned. Recently Mr. Kendrick asked for an indefinite leave of absence, and when it was granted Mr. C. W. Kouns, superintendent of transportation, was appointed acting second vice president, and in the event that Mr. Kendrick does not resume his duties, it is understood Mr. Kouns will retain the position. No cause is assigned for Mr. Kendrick's determination to take a rest from his duties, and no statement has been made as to the current rumor that he will not resume the position.

F. A. Lehman, who has been assistant to Mr. Kouns, in the transportation department, will become superintendent of transportation while Mr. Kouns has charge of the second vice president's duties.

No. 4, which was wrecked at Earl, Colorado, yesterday morning left here at 6:20 o'clock Thursday night on time in charge of Conductor Charles Oeder, who was in charge when the entire train went into the ditch. The California limited, No. 2, passed the Chicago limited at Trinidad, both being late, the westbound limited three hours and the eastbound train fifteen minutes.

The government has let the contracts for the erection of the new post-office in Los Angeles, and the contractors have made arrangements by which the Santa Fe railway will haul over 35,000 tons of steel to be used in the new structure. It will pass through Albuquerque soon.

The platform of the new Santa Fe storehouse is about completed and the carpenters are making fast progress, having only started in earnest this week. If the building material continues to arrive, the men will have the storehouse ready for occupancy by Christmas.

The new time card which will go into effect in November, will not affect the local trains, except that No. 16, which now runs from El Paso to La Junta will continue on to Chicago as last winter, and that No. 9 will run from Chicago to El Paso.

Payson Ripley, trainmaster of the Rio Grande division, is expected home tonight from Topeka, where he is called on business.

General Yardmaster G. W. Yocum is on the sick list, and it is reported he will not be out for some time.

## SANTA FE FIREMEN SCALDED TO DEATH

Fatal Wreck at Bagdad Results in Twelve Hour Tie-up of the Main Coast Line.

By the washout of a bridge near Bagdad, Cal., Thursday afternoon, a Santa Fe freight train eastbound, was wrecked and the main line was blocked for over twelve hours. According to passengers on delayed No. 2 which arrived here last night, twelve hours late, as first No. 8, the wreck was a peculiar one.

A small cloudburst had caused an arroyo to overflow and wash out the wooden bridge over a small culvert. The freight train was making considerable speed. After rounding a curve the engineer saw that the bridge was gone, and applying the air he yelled to the fireman to jump, doing so himself.

Before the fireman, whose name was not learned, could jump to safety the big engine toppled into the culvert, the engine and tender forming a V, and forcing the unfortunate fireman against the boiler, where he was scalded to death.

The train crew made a desperate effort to save the fireman, but on account of the number of box cars piled on top of the engine their efforts were futile.

No. 2 arrived at the scene shortly after the wreck and it waited twelve hours until the wreckage was removed.

## BIG BRICK PLANT IS NOW READY FOR BUILDERS

IMPORTANT PROJECT UNDER  
WAY NEAR ALGODONES

Enormous Deposits of Shale, Lime and Sandstone Make Tonque Valley a Promising District.

In its enormous deposits of shale and building stone the little Tonque valley lying in the Sandia mountains, six miles east of Algodones, is one of the richest sections to this part of New Mexico. Huge deposits of sand and building stone, gypsum, and shale form its walls and the site is an ideal one for the plant which the Algodones Pressed Brick and Tile company is building just north of the ruins of the Tonque Indian village. The project has everything in its favor. Shale for brick and tile is within an arm's length of the kilns, coal for operation can be obtained at the Hagan coal mines, three miles east, and water is obtained from a fine spring. Within a short time the Albuquerque Eastern railroad will have been built to within half a mile of the plant, affording quick and cheap transportation.

M. L. Schutt of Albuquerque, and a member of the company, with a Morning Journal representative visited the site of the new plant Thursday. The road from Algodones to the plant is rough, but is now being worked and will soon be ready for heavy hauling.

Surveyors for the Albuquerque Eastern have recently completed the new survey around the Sandias. It being the understanding that the Tigua canyon route has long since been abandoned as too expensive of construction.

Work on the brick plant is well under way. Yesterday the unloading and hauling of machinery from Algodones began, and Monday Nicholas Gonzales will begin to unload the big boiler which will be hauled across country to the plant, ten horses and as many mules having been secured for the motive power. A. J. Frank, manager of the company, has charge of moving the machinery.

G. J. Mace, of Albuquerque, who

has the contract for the building, yesterday sent out several more carpenters to join the force already at Tonque and it is expected that the entire plant will be ready for operating by November 1.

Most of the land in the Tonque valley, including the mineral deposits, is owned by the Algodones Petroleum, Coal Mining and Pipe Line company, whose company at Tonque was destroyed by a cloudburst three years ago. The Algodones Pressed Brick and Tile company has secured a twenty-five year lease upon the oil company's property and after the brick plant is in operation, a number of quarries are to be opened to mine the marble, sand, building stone and gypsum.

The shale bank from which the bricks will be manufactured, is 140 feet deep, thirty feet being visible. 2,200 feet wide and three-quarters of a mile in length, and across the Tonque arroyo is to be seen considerable oil shale, indicating that petroleum can be found in the valley.

The sand and building stone, according to Contractor Mace, is of a better quality than any quarried in Missouri, Arkansas or Oklahoma, and already orders for the stone have been received by the brick company.

Slightly Colder With Snow. The chest, as mentioned they readily lead to pneumonia, consumption or other pulmonary troubles. Just as soon as the cough appears treat it with Ballard's Horehound Syrup, the standard cure of Asthma. Use as directed—perfectly harmless. A cure and preventive for all diseases of the lungs. Price 25c. 50c and \$1 per bottle. Sold by J. H. Olney Co.

ALBUQUERQUE - NEW MEXICO

## GOOD RAILROAD SENSE.

President Robert Mather, of the Rock Island system, gave the country an exhibition of good, hard, railroad sense when, in his address before the Chicago Association of Commerce, a few days ago, he told his hearers that the time had passed for unyielding opposition to all policies of federal control of our carrying corporations; and the day has dawned in which to welcome that control. We may now expect to hear a chorus of "salvos" from the government ownership shouters and an extension of the glad hand to the Rock Island's head. He said more than that, however, and the whole outburst on this point must be heard before his position is made clear. "I feel," he explained, "that it would tend greatly to wisdom and justice and even to moderation if the people realized that the railroads would willingly submit to a plan of regulation that was wise and just. This point being gained, I believe it would be possible to convince the people that a wise and just regulation is possible only under a single and centralized authority."

Thus Mr. Mather puts himself directly in line with the policy of the present national administration. There is nothing that Mr. Roosevelt has said or done in his handling of the railroad problem, that foreshadows government ownership, or that looks to anything more than the same wise and just regulation to which the Rock Island president refers—while in and through it all is a distinct recognition, also, of the important fact that such "wise and just regulation is possible only under a single and centralized authority." And the bungling and blundering already on exhibition as the result of an attempt to reach the same end through the separate and frequently contradictory action of forty-five different authorities, is the most convincing testimony that could be given to the soundness of the policy of putting this great work under the absolute control of a "single and centralized authority."

## THE OFFICE OF PREVENTION.

The "tuberculin test," so much talked about, especially in connection with dairy cattle, is an operation that is resorted to for the purpose of ascertaining whether or not the animal is free from any taint of tuberculosis. "Tuberculin," so called, is a liquid prepared from cultures of the tubercle-bacillus, and for diagnostic purposes is generally administered by hypodermic injection; the word is also applied to the promaine formed by the action of the tubercle-bacillus; and if the test, as now applied in cows, determined beyond all question the absence of tuberculosis, every herder would no doubt be anxious to have his dairy cattle pass the test, if only as something to advertise on; but as yet the thing is too often meaningless and too often imposes an injustice. It is a step in the right direction, but we are without complete assurance that it has "got there," as yet.

## IMPORTANT BUSINESS.

President Roosevelt should hurry up and get out of the canyons, since there are matters more important than bears waiting for him at home. For instance, here is a case of nature taking that absolutely demands attention, and Loeb is not equal to it. The Washington Star tells of a meeting of fishermen somewhere out in the middle west, and then says:

"At the meeting Sam Peters told of the habits of catfish down on the Kansas bayou. He said that these catfish crawled out of the creek every night, galloped over his ranch, caught the rats in the barn and then climbed the back fence and mowed so loud that the only way to get rid of them was a fire that was full of buckshot."

"Another man at that meeting said he was fishing for trout in Oklahoma during the last cyclone season. A big trout leaped for the fly just as a cyclone hit the fish pond. The cyclone had upset a barnyard before reaching the pond and had blown all the feathers off the chickens. These feathers struck the trout as he was flying through the air and made him look like a porcupine. The man landed the fish, however, and next day

entered him in the county chicken show and took the blue ribbon for a new breed of duck."

Possibly some of the details given above may be doubted by the average reader, but the average reader has nothing to do with the matter; it is a case of nature taking that is up to the president, and a man who believes everything Llewellyn tells him has too much faith to balk at any little harmless prevarication like the foregoing.

In speaking of the effect of the new railroad law upon the business of the roads in Kansas, the Topeka State Journal says: "It is doubtful if the two-cent fare laws will interfere in the least with the railroad earnings, for the people will travel more at the lower rate. Cutting the freight rate will, of course, decrease the earnings from what they would be without the cut, but if the present increase in business keeps up—and there are no signs of abatement in this country, the increase in traffic will more than make up the decrease caused by lowering any freight rates. The Rock Island's increase this last year was over two and a half million dollars, and that will cover a large amount of freight reductions."

## WHAT JUDGE BAKER THINKS.

A New York Herald special from Omaha gives a report of interviews with a number of prominent Nebraska republicans on the matter of the presidency. Judge B. S. Baker, formerly of Albuquerque, was among the number, and is reported as follows:

"Roosevelt can not accept another term, nor can he be permitted to name his successor in office. There are no more reasons why Roosevelt should name his successor than that successor should name the man who follows him in office. The naming of a candidate should be a matter for the entire party, not a one man proposition."

"It would be the worst thing that could ever happen to this country that a precedent should be set permitting a president to name his successor in office, and would eventually end in an overthrow of our present form of government."

## BETTER RAILS DEMANDED.

It is now generally accepted that defective rails have been the cause of a large number of railroad accidents generally classed as due to unavoidable causes. What was previously a mystery has been explained in terms that have resulted in a demand on the part of practically every railroad company for better rails. Some weeks ago a joint committee of experts was appointed by the leading railroad corporations and the steel manufacturers to agree upon a new type of rail calculated to withstand the strain of heavy traffic. This committee, it is now understood, has failed to agree upon the chemical composition of the ideal rail, and will so report. Thus there is no immediate prospect that traveling public will be guaranteed a safer track.

The railroads demand a rail high in carbon and low in phosphorus. Such a rail, the manufacturers contend, can not be produced by the Bessemer process, now chiefly employed in rail manufacture. The open-hearth process will yield a low-phosphorus rail, but owing to the lack of such plants of more than 10 per cent of the rail tonnage produced in the United States can be manufactured on the basis. It will take time, the manufacturers declare, to change from Bessemer to open-hearth conditions, and meanwhile the railroads must wait for better metal.

There is one point of difference, however, which does not rest upon the matter of physical equipment to produce good rails. One of the chief dangers in modern rails, it is alleged by railroad men, is the tendency of the manufacturers to use too much of the original ingot in rolling rails. It is necessary to trim off a part of the ingot to rid it of the soft, imperfect metal that gathers there in the casting. If any portion of this soft section is left in form, in rolling, a cone-shaped core of bad metal at the end of the rail, thus weakening the rail at the joint and leading, it is firmly believed, to many breaks, derailments and consequent disasters. The railroad men demand that at least 25 per cent of the ingot be trimmed before rolling, to make certain that none of the soft metal is left. The metal interests resist this demand and insist that 10 per cent is sufficient. Microscopic examination of new rails is said to have disclosed that the defective condition exists in rails made from ingots trimmed on the 10 per cent basis.

It is to be hoped that the railroad companies will insist upon better rails. Even if they have to pay more for their metal they must get it. The lives of passengers are not to be lightly imperiled through the use of possibly defective rails under heavy traffic and high speed conditions which demand the most reliable metal that can possibly be produced. If the railroads and the manufacturers can not get together by agreement in this matter, it will become necessary for the state legislatures and possibly congress to take a hand and establish a standard of manufacture which will reduce the danger of the broken rail to a minimum.

It is said that Mr. Bryan is not urging government ownership of railroads at this time, the reply is that he believes firmly in the policy, and if

elected president would be at liberty to use his office to forward it. What great power pertains to that office need not be pointed out; and a skillful politician as Mr. Bryan would be at no loss to make headway in every direction he desired. And in eight years—four years in the White House would not satisfy such a man—he would be able to go far.

Major George P. Abern, chief of the forestry bureau of the Philippines, is reported from Berlin as stating to the German authorities that the value of the timber on the public lands of the archipelago is enormous. On one tract on the island of Mindanao he estimates that the "ripe" timber, ready for removal, is worth \$44,000,000.

"The railroads have been nearly ruined," wails Mr. Ripley, "and they are now worrying along the best they can." In view of the recent annual reports showing big gains in their profits, it must be admitted that they are doing a pretty good job of it.

One Kansas editor referred to a brother editor as a "two-by-four," and the brother editor waxed wrath about it. Whereupon a third brother butted in to say that the name was really a compliment, considering the high price of lumber these days.

In addition to having dodged his taxes, it is now asserted that George Washington bought votes, and the Topeka Journal fears that pretty soon he will be charged with having accepted rebates from the railroads.

The railroads have now discovered that federal regulation was what they wanted all the time, but an exchange says they did not know it until the state legislatures began to get after them.

Charles Oscar Jones' flying machine must be a lofty wonder, says the Washington Star, if it rose above those Hammond sport vineyards, with grapes as high as they are this year.

Uncle Eben is a philosopher. He says, "It am true dat procrastination am de chief ob time, but den de time ob de people what procrastinate ain't got much value, no how."

The man who discovered an affinity seemed to have things pretty well his own way until his wife announced that she, too, had located an affinity, and he was it.

It may be assumed that Mr. Taffie a number of things he did not understand and said a number of things which the nikado did not precisely comprehend.

Here is Washington humor right fresh from the Mucker: "The supreme court adjourned after transacting routine business; nothing of importance was done."

Our assistant secretary of state, Mr. Bacon, differs from the vice president according to Charles River dispatches. He takes water in his eye.

## MORE ATTENTION FOR THINGS OF VALUE

Correspondent From Kansas Wants to Know Why Territorial Fair Doesn't Show Something of Resources of the Territory.

Albuquerque, N. M., Oct. 18, Editor Morning Journal.  
Dear Sir:—It is quite likely that a Kansas tenderfoot should not be allowed to butt into that, which is, of course, none of his business; nevertheless strangers are at times allowed to speak out in meeting, even if their say amounts to little. I have become greatly interested in my short stay in this land of sunshine, in its climate, its people, its agriculture, its minerals, and so when I read the announcements of the recent "Big Fair" I rejoiced that I should have opportunity to increase my knowledge of the resources of the territory, but now that event is over, somehow it didn't come up to my expectations. The amusement features seemed to monopolize the whole affair and the real interests and resources of the territory in live stock, mining and agricultural matters, in educational things, in what would naturally attract the attention of a homemaker and induce him to tarry and perhaps make a home, were not even given the privileges and attention of an obscure side-show. Just think of it, \$25,000 for races and games, possibly \$200 for agricultural products, nothing for horses outside of the rack track, nothing for fine cattle, nothing for sheep.

Now it is not my purpose to decry the features of the race track or carnival. The fair is concerned to have a success financially and otherwise, as it was planned, and I am well aware that in the planning, it is the money side that has to be closely calculated. So that when the \$20,000 is hung up for prizes, premiums and prizes, the attractions must be sufficiently drawing to induce the public to cash up and make good. I understand that work is already in hand for the fair of next year. I know nothing of the plans but here is to the hope that the opportunity will be taken to show to the outside world as well as to the territory's own people some of the real things that New Mexico possesses in such large measure in the way of live stock, farm products, schools, mining wealth, growing towns, etc. In addition to amusement features it may use its way clear to offer sufficient inducement to bring out a good showing of the true wealth of the territory.

Yours, M. MATHEWSON.

People Tell Each Other About Good Things. Twelve years ago few people knew of such a preparation as a Powder for the Feet. Today after the genuine merit of Allen's Foot-Powder has been told over and over by a satisfied person to another, there are millions who would as soon go without a foot-bath as without the use of Allen's Foot-Powder. It is a clean, wholesome, healing, antiseptic powder to be shaken into the shoes, which have been worn and moistened by sweat and which feel as if parts of the world. It cures while you walk.

## MR. BRADY O'NEILL A TRIFLE GLOOMY

Arizona Man Didn't Find Much to Suit Him During Stay Here at the Fair.

(Phoenix Republican.)

Eugene Brady O'Neill returned yesterday morning from a visit to Albuquerque, partly to attend the fair and partly to be present at an important meeting of the Knights of Columbus. He offered no strenuous denial of the report that the real object of his mission was to secure the Bernalillo county delegation to the next Arizona democratic convention for the nomination of a candidate for delegate to congress. He said he secured at least the good will of the New Mexicans. He said Governor Curry, who had just returned from his tour of the Mississippi with the president and he has filled the New Mexicans with a hope of single statehood. He has presented the matter to them in an even stronger light than the dispatches did when they announced from Cairo, Ill., that the president has authorized Governor Curry to say that he would favor a bill for the admission of that territory. The governor himself said that the president had put it stronger than that; he had said that he would work for the bill and he had all but guaranteed admission.

Contemporaneous with the enthusiasm which is being wrought up over the statehood question is an effort to arouse enthusiasm in favor of sending a Roosevelt delegation of the next national republican convention. Governor Curry and the Roosevelt leaders there made no attempt to conceal the fact that it is to be a Roosevelt delegation with Taft as a second choice. The strength of the opposition is the movement will depend upon later developments. There is already some dissatisfaction over the appointment of the new warden of the penitentiary who, it is understood, was appointed at the request of the president. He is not a resident of the territory, though he had been there in a sort of pilgrim way until the breaking out of the Spanish war, when he became a Rough Rider. He afterward served in the Philippines.

Regarding the territorial fair at Albuquerque, Mr. O'Neill says that as a fair it was behind either of the two territorial fairs held in this territory. The strong feature of it was the racing department which was excellent. The base ball tournament which was really a part of the fair, was a strong attraction. In addition there was a street carnival and other shows which added much to the liveliness of the week.

## HEARS HIS PLAY FOR THE FIRST TIME

Author of "Under Southern Moss" Hears Hollingsworth Twins in Clever Comedy-Drama.

Orendorf's play, "Under Southern Moss," made the big hit of the present engagement of the Hollingsworth Twins at Elks theater last night. Mr. Orendorf, who is in Albuquerque as a treasurer of the Crystal Theater, was in the house and had the first opportunity of seeing the play which he wrote especially for and which he presented to the public some four years ago. There were numerous calls for the author of the piece and Mr. Orendorf was finally compelled to respond, thanking the audience in a brief pleasant speech for their acclimation of the play and their appreciation of the company producing it. Although last night's performance of "Southern Moss" is the fifth time it has been produced in this city within less than a year, it attracted and plainly pleased one of the largest crowds of the week. The play for tonight is "Texas," a brilliant drama of the west. "Texas" is the name of the leading character, Texas West, taken by Maud Hollingsworth. All the scenes are laid in Texas and while it is a really western play there is no shooting, no fighting and no bad men. It is a play of the west as it really is and is a clean, wholesome drama. This afternoon at 2:30 will be given a children's matinee. The company closes with tonight's play.

The Mirth King is coming. Hear Burdette at the Opera house next Tuesday evening. Subject, "Holidays."

STANDARD PLUMBING AND HEATING COMPANY.

## YOU WILL OFTEN BE Pressed for Money

Often Because You Have No Advertising Bills to Pay than Because You Have.

Many a business man has been surprised find that his biggest advertising bills were the easiest ones to pay.

That is always true, assuming that they were contracted in buying advertising space in the best newspaper medium in the field. It would, of course, never be true if poor judgment were used in the planning and executing of the advertising campaign.

In the cases of prosperous merchants it always happens that big advertising bills and big bank balances grow, together, out of the same publicity campaigns. Non-prosperous merchants—and half prosperous ones—may prove the truth of this matter in a practical way, and in their own experiences.

We are accustomed to seeing big stores filled with customers all the time—the direct result of big advertising expenditures. But we do not so often see the small stores and shops crowded. Too many of them are content to get the overflow patronage, the happened in people, the people who go to the nearest place.

Any little store whose advertising expenditures for newspaper space are doubled this year, will find its sales and profits correspondingly increased. Even a small increase of expenditure, in the right direction, for publicity, will bring a notable quickening of store activity, store profits.

Effective, adequate advertising in the Morning Journal not only pays for itself, it pays for an increased equipment and all that goes with a bigger store and growing store needs.

## POLICE ROUND UP LAST OF THE RUSTLERS

Mounted Men Gather in People  
Alleged to Have Run Off  
Horse Belonging to Navajos  
at Seven Lakes.

(Special Dispatch to the Morning Journal)  
Santa Fe, N. M., Oct. 18.—Mounted  
Policeman A. Rusk appeared in Santa  
Fe this afternoon, having in charge  
Redolfo Techilla who he captured at  
Lumberton, Rio Arriba county,  
charged with stealing horses. It is  
charged that Techilla stole eleven  
horses from the Navajo reservation in  
the neighborhood of Seven Lakes some  
time ago. Of the eleven horses stolen,  
seven were recovered a few weeks ago  
by the police after Techilla had sold  
them near San Pedro and Bonanza.  
Techilla will have a preliminary  
hearing here.

**Madril Case in Court.**  
The case against Jose Leon Madril,  
the Santa Fe commissioner, whom it is  
sought to remove from office on the  
ground that he has been sentenced to  
prison and is therefore ineligible, came  
up in court this afternoon and all the  
evidence was submitted. The case  
will be argued next Friday.

There is still much interest in the  
proceedings of the United States grand  
jury, the more because it is not known  
what is going on in the grand jury  
room. The officers in charge are un-  
able to communicate and whatever the  
has been kept unusually quiet.

**Bad Wreck in Spain.**  
St. Sebastian, Spain, Oct. 18.—  
Twenty-seven persons were killed or  
wounded in a railroad wreck today at  
Orlo, about six miles from here.

## BUSY DAYS FOR THE COLORADO FEEDERS

Feed Lots are Jammed Full of  
Lambs to Be Fattened for  
the Winter Market.

Denver, Col., Oct. 18.—Feeders of  
sheep, lambs, cattle and hogs are  
busy these days in Colorado. The  
feed lots in the northern part of the  
state are being filled with sheep and  
lambs, and it is thought that a normal  
number will be finished for the mar-  
kets there this winter and more cat-  
tle than ever before.

More attention is being given to  
hog raising in the San Luis valley, esti-  
mates placing the number of swine to come  
from that country this winter as  
high as 150,000, while the present  
outlook is for only about one-third  
as many shiners and hams as last  
year. In the Arkansas valley feeding  
operations will be lighter than usual,  
as hay is selling at \$8 per ton in the  
black, and the farmers are selling  
their hay rather than take chances  
on feeding.

In the Fort Collins district practi-  
cally all the alfalfa has been con-  
tracted at \$5.00 and \$7.50 and what is  
left is being held at the latter fig-  
ure. Corn is quoted at \$1.20 per  
hundred. With lambs averaging  
around \$6.50, freight paid to the  
river, it looks like a dangerous propo-  
sition, but the feeders figure that  
if they can get \$7.50 at the market  
they will come out all right, and they  
are banking on that price or better.  
The cattle and hog feeders have  
rather the best of the game this sea-  
son and feel sure that they are  
booked for good profits.

Both lambs and cattle are being  
started on beet tops. These can be  
had around \$1 per acre and are really  
worth about twice that amount as a  
feed ration. Practically all the feed-  
ing in northern Colorado will be  
done on corn and alfalfa, as the  
wheat, rye and barley is fully as high  
as corn and feeders claim that it is  
as cheap to ship in the corn. Both  
sheep and cattle are going into the  
feed lots in fine condition, and with  
an average winter good gains will be  
made and marketing will commence  
early.

## LOTS OF MINERS LAID OFF IN GLOBE

Drop in Copper Causes Big  
Slash in Working Force in  
Famous Arizona District.

According to reports from Globe  
hundreds of miners, possibly 800,  
have been laid off in the past couple  
of weeks in and about that city. It  
is understood that the Old Dominion  
has dropped about 500, while work  
has been stopped on the Copper Hill  
and Black Hawk properties of the  
Arizona Commercial. The latter  
company closed down yesterday. There was  
a rumor that the Old Dominion min-  
ing was to be closed down October 1,  
but the plant is running at full cap-  
acity still. Boston reports are to the  
effect that it costs 14 cents a pound  
to produce and market copper at the  
Old Dominion, a figure that would  
leave practically no margin of profit  
at present prices for the red metal.  
Most of the men being discharged  
are foreigners and practically all are  
unmarried men. The benevolent and  
the aid employees are being spared.  
Many of the Slovians are leaving  
bound for the Black Hills of South  
Dakota, where many of them came  
to Globe, driven by a fire in the  
Homestake mine at Lead and because

of the better wages prevailing. Word  
has come from the hills that men are  
wanted again and the demand is be-  
ing filled from the Globe camp. In a  
single day the outgoing sales of the  
Globe Valley railroad for miners' tick-  
ets aggregated \$1,175. Despite the  
metal and labor conditions, the peo-  
ple of Globe are confident that the  
season of adversity will be of short  
duration and that this camp will be  
known as the greatest copper produc-  
er of the southwest. The Old Dom-  
inion has never shown as well as at  
present, with enormous subside,  
the renewed carbonate ores above,  
and with a new and complete smel-  
ling plant paid for and in successful  
operation.

## JUDGE MANN GETS CINNAMON BEAR

New Mexico Judge Proves More  
Successful Than the Distin-  
guished Hunter Now Beating  
Louisiana Swamps.

While the Associated Press is send-  
ing on reports from the marshy par-  
ishes of northern Louisiana of the fa-  
tigue efforts of the president and his  
expert bear hunters to catch the fero-  
cious, reports come in of a very suc-  
cessful bear raid made by Judge E.  
A. Mann and Roy Prentice, of Albu-  
querque, who have been attending court  
up at Lincoln.

As evidence thereof, Mr. Prentice  
has now in his possession a young  
cinnamon bear three months old, and  
Judge Mann the skin of its mother,  
which was one of the largest bears  
ever killed in that vicinity.

Both report that bears are, quite  
frequently found up in the Capitan  
mountains and that out of five they  
bagged two.

Mr. Prentice says he expects to go  
on the road soon with the young bear,  
giving exhibitions, as the young ani-  
mal is quite intelligent and much  
smarter than a "Teddy Bear."

**Albion May Recover.**

William Allison, the engineer, who  
was so badly injured by a razor in the  
hands of Fireman Sloan, is still  
alive and chances are about even for  
his recovery, says the Las Vegas Oc-  
currence. Fifty-two stitches were taken in  
closing the wounds, and all hemor-  
rhage was stopped with little diffi-  
culty. The razor was not a clean one  
and there is some fear of blood poi-  
soning or meningitis. The patient is  
fully conscious. Sloan has been re-  
moved from the city lock-up to the  
county jail, but he has not yet been  
given a preliminary hearing.

The prisoner has retained the firm  
of Hunter & Luns, to defend him  
against any charges which may be  
made, and has been cautioned by his  
lawyers not to talk. Mrs. Allison  
states that she had only stopped into  
Sloan's room for a second, according  
to report, and that there was nothing  
at all improper in her action, and  
also says that the door was not lock-  
ed. It is the opinion of several at-  
torneys that had the door been lock-  
ed, Sloan was perfectly within his rights  
to break it down and enter the room,  
providing that he was legally mar-  
ried to the woman.

**Honor.**  
Had melancholy, probably caused by an in-  
active liver. A bad liver makes one cross  
and irritable, causes mental and physical  
disorder and may result disastrously.  
Bellar's Heroin is acknowledged to be  
the perfect liver regulator. If you are blue  
and out of sorts get a bottle today. A pos-  
itive cure for bilious headache, constipation,  
shins and fever, and all liver complaints.

## One of the Important Duties of Physicians and the Well-Informed of the World

is to learn as to the relative standing and reliability of the leading manufac-  
turers of medicinal agents, as the most eminent physicians are the most careful as to  
the uniform quality and perfect purity of remedies prescribed by them, and it is well  
known to physicians and the Well-Informed generally that the California Fig Syrup  
Co., by reason of its correct methods and perfect equipment and the ethical character of  
its product has attained to the high standing in scientific and commercial circles which  
is accorded to successful and reliable houses only, and, therefore, that the name of the  
Company has become a guarantee of the excellence of its remedy.

### TRUTH AND QUALITY

appeal to the Well-Informed in every walk of life and are essential to permanent suc-  
cess and creditable standing, therefore we wish to call the attention of all who would  
enjoy good health, with its blessings, to the fact that it involves the question of right  
living with all the term implies. With proper knowledge of what is best each hour  
of recreation, of enjoyment, of contemplation and of effort may be made to contribute  
to that end and the use of medicines dispensed with generally to great advantage, but  
as in many instances a simple, wholesome remedy may be invaluable if taken at the  
proper time, the California Fig Syrup Co. feels that it is alike important to present  
truthfully the subject and to supply the one perfect laxative remedy which has won  
the approval of physicians and the world-wide acceptance of the Well-Informed because  
of the excellence of the combination, known to all, and the original method of manufac-  
ture, which is known to the California Fig Syrup Co. only.

This valuable remedy has been long and favorably known under the name of—  
Syrup of Figs—and has attained to world-wide acceptance as the most excellent of  
family laxatives—and as its pure laxative principles, obtained from Senna, are well  
known to physicians and the Well-Informed of the world to be the best of natural  
laxatives, we have adopted the more elaborate name of—Syrup of Figs and Elixir  
of Senna—as more fully descriptive of the remedy, but doubtless it will always be  
called for by the shorter name of Syrup of Figs—and to get its beneficial effects always  
note, when purchasing, the full name of the Company—California Fig Syrup Co.—  
plainly printed on the front of every package, whether you simply call for—Syrup of  
Figs—or by the full name—Syrup of Figs and Elixir of Senna—as—Syrup of Figs and  
Elixir of Senna—is the one laxative remedy manufactured by the California Fig Syrup  
Co., and the same heretofore known by the name—Syrup of Figs—which has given  
satisfaction to millions. The genuine is for sale by all leading druggists throughout  
the United States in original packages of one size only, the regular price of which  
is fifty cents per bottle.

Every bottle is sold under the general guarantee of the Company, filed with the  
Secretary of Agriculture, at Washington, D. C., that the remedy is not adulterated or  
misbranded within the meaning of the Food and Drugs Act, June 30th, 1906.

**OPPORTUNITY KNOCKS AT YOUR DOOR NOW.** We are compelled to  
convert these books into money at once. To protect our interests as finance agents, we have  
assumed control and offer without reserve the remaining sets of the Publisher's latest and most  
important publication—"Library of Universal History," fifteen sumptuous volumes, over 5,000  
pages, 100 specially engraved maps, 700 beautiful illustrations, copious marginal notes and chrono-  
logical index. This is a new publication from cover to cover, prepared by a staff of the most  
famous historians of the world. Cost to produce nearly \$250,000.00. Positively the first  
edition printed from these new plates, made from type cast expressly for this work. Each volume  
is 2 inches thick, 7 inches wide and 10 inches high.

**Read Our Offer:** Beginning with the dawn of recorded thought and tracing the  
progress of mankind, these Sixty Centuries of Progress leads us step by step through Ancient, Medieval  
and Modern Times. In this great panorama we see the birth, growth and development, the decay and  
death of races and nations. The pure, simple and enchanting language used in depicting these great events  
makes this story of human progress more fascinating than fiction. Young folks will use this work and  
read it with delight, charmed by its splendid pictures and vivid style.

**Our Offer!** We send the books, complete set, 15 volumes, prepaid, to you at once for five  
days' free examination. If found satisfactory, send us 50 cents within five days  
and \$2 monthly for 10 months for Silk Cloth binding. (This is \$20.50 for the 15 volumes, while  
the publisher's price was \$45.00.) For 3-4 Red Morocco binding, send us 50 cents within  
five days and \$2.75 monthly for 10 months or a total of \$27.50. Publisher's price was \$60.  
Cut out and mail the coupon herewith, or a copy of it, now. If the Library is not  
perfectly satisfactory after five days' examination in your own home, notify us  
and we will have it returned at our expense. You run no risk whatever, but act  
promptly as the sets are going fast.

# GO TO BELEN

The Future Railroad Center of New Mexico

LOCATED ON THE BELEN CUT-OFF OF THE ATCHISON, TOPEKA & SANTA FE RAILWAY. THE NEW CITY OF BELEN IS 31 MILES SOUTH OF ALBUQUERQUE, N. M., IS AT  
THE JUNCTION OF THE MAIN LINES OF THE SANTA FE SYSTEM—LEADING EAST AND WEST FROM GALVESTON AND CHICAGO TO SAN FRANCISCO AND LOS ANGELES,  
FROM THE NORTHERN STATES TO EL PASO, TEXAS, AND THE REPUBLIC OF MEXICO.

## The Belen Town and Improvement Company

(INCORPORATED)

Are the owners of the Belen Townsite, consisting of 1000 Business and Residence Lots, size 25x142 feet, fronting upon 80 and 70-foot streets and avenues, right in the business  
center of the new city and directly upon the Santa Fe Railway Depot Grounds. The Atchison, Topeka & Santa Fe Railway Company is now grading its extensive depot grounds  
yard limits 800 feet wide and a mile long (capacity of 70 miles of side track) to accommodate its immense passenger and freight traffic, Harvey eating House, round house, coal  
chutes, water tanks, machine shops, etc.

THE CITY OF BELEN has a population of 1500, and several large Mercantile Houses, the Belen Patent Roller Mills with its 150 Barrels a day capacity, winery, etc. It is the  
largest shipping point for flour, wool, wheat, wine, beans, hay and fruit in New Mexico. From its location upon the great trunk line leading north, south, east and west, to all  
points in the United States and Mexico its future growth as a Commercial point cannot be estimated. All fast limited, mail, express and freight trains will pass through Belen to  
Chicago, Kansas City, Galveston and the Pacific Coast. The water is good and climate unsurpassed. Belen has a \$16,000 public school house, two churches, a commercial  
club, three hotels, restaurants, etc. It needs right now a good up-to-date newspaper and a good hotel. The lots offered are low in prices and terms easy. One third of pur-  
chase money cash; two-thirds may remain on note and mortgage for one year with interest at 8 per cent per annum. Title perfect and warranty deeds given.  
Come early if you wish to secure the choice lots. For further particulars and prices of lots call in person or write to

## MERCHANTS ASK A PUBLIC MARKET PLACE

SEEK TO SECURE GROUND ALONG THE SANTA FE

Petition Yesterday Liberally Signed Asking City to Lease Ground Opposite Alvarado, The Public Scales.

The question of a public market place for Albuquerque, controlled by the city and at which the farmers of the valley may market their produce, which has been agitated from time to time for several years, has now come up in definite form. The market place movement has assumed the shape of a petition to the city council asking that body to enter into negotiations with the Santa Fe for the sale or lease of piece of ground across Central avenue from the Alvarado hotel to be used as a public market under proper regulation and also as the site for the city scales at which produce and merchandise sold in Albuquerque may be weighed by the public weigher and full measure so insured.

The idea of the market place is one which is likely to meet with universal approval, and the need for it has been plain for years. That the business men appreciate the value of such an institution was shown yesterday in the fact that in less than an hour after the petition in question was started on its way more than fifty business men had signed it.

Frank J. Wilson, of the Blanchard Meat and Supply company, has the petition in charge and expects to have the name of every business man in Albuquerque attached thereto by this evening. He is a firm believer in the value of a public market and is pushing the matter for all it is worth.

The text of the petition to the city council follows:

To the Honorable Mayor and City Council of the City of Albuquerque:

We, the undersigned business men of the city of Albuquerque, respectfully request that your honorable body petition the Railroad Company and Santa Fe railway company to deed or lease to the city for a term of years the north half of its right-of-way in said city, and which is bounded on the south by Central avenue, on the west by First street, on the north by Tijeras avenue, and on the east by the railroad tracks of said company, and to acquire the said described property either by purchase or by lease for the purpose of establishing a public market place.

The said plot of ground has been used by our country people about Albuquerque for the purpose of a market place for many years. This plot of ground is the most convenient for the purpose stated, as the same is central, and the city of Albuquerque needs a place of this description for a public market to which the farmers about said city can bring their produce for sale. We further petition your honorable body to establish a public scale on this ground at which any purchaser of produce or merchandise can obtain the correct weight of said produce or merchandise so sold in the city of Albuquerque.

They Make You Feel Good.

The pleasant purgative effect experienced by all who use Chamberlain's Stomach and Liver Tablets, and the healthy condition of the body and mind which they create makes one feel joyful. Price 25 cents. Samples free at all drug stores.

Organize Football League.

The Colorado-New Mexico Inter-scholastic league has been formed, comprising the high schools of Las Animas, Las Santa Trinidad and Bataan. According to the constitution adopted the object of the league shall be to promote a greater interest in athletics, to foster pure amateur sport and to encourage higher intellectual development along the lines of declamation, oratory and debate. During the year contests will be held in football, basketball and track sports, oration, declamation and debate. Penalties will be awarded to the winners in athletic contests, and medals to those winning in the literary contests. The league football season will open today in Bataan with the game between Trinidad and Bataan.

How to Cure a Cold.

The question of how to cure a cold without unnecessary loss of time is one in which we are all more or less interested. For the quicker a cold is gotten rid of the less danger of pneumonia and other serious diseases. Dr. W. W. H. of Waverly, Mo., has used Chamberlain's Cough Remedy for years, and says: "I firmly believe Chamberlain's Cough Remedy to be absolutely the best preparation on the market for colds. I have recommended it to my friends and they all agree with me." For sale by all druggists.
