The Sixteenth National Irrigation Congress Has Come to a Close After a
Most Successful Meeting, But the

INTERSTATE INDUSTRIAL EXPOSITION

IS JUST GETTING WELL UNDER WAY

In addition to the Magnificent Assemblage of the Products of the Irrigated
Districts of the Great West; in addition to the Manifold
Attractions of the Exposition Buildings for

THE NEXT SEVEN DAYS

Every Afternoon's Program at Exposition Grounds Will be Full and Complete
and Exciting From Start to Finish; Consisting of

**Baseball, Races,
Military Maneuvers,
Cavalry and Infantry Drills, Sham Battles
and Military Contests, Indian Races and
Sports and Cowboy Relay Races**

In the Afternoon and in the Evening Fire Dances by the
Band of Navajo Indians and Most Magnificent Panoramic
Display of Fireworks Ever Attempted in the West

Arrange to Attend the Exposition During the Coming Week. Albuquerque is Prepared to Enter-
tain All Comers. On the Streets at Night Will Be the Carnival, Confetti Battles and Good, Old
Time Fun. ALL ROADS LEAD TO ALBUQUERQUE FOR THE NEXT SEVEN DAYS

FOREIGNERS WILL VISIT GREAT PECOS VALLEY

Several of the Delegates From Other Nations Will Leave Tuesday for Roswell, and the Government Projects Near by; French Delegates Depart for Grand Canyon; South Africans Off for Far Away Homes.

SEND LETTERS AND TELEGRAMS OF APPRECIATION TO SEC. ROOT

A trip is now being arranged for several of the foreign delegates to the National Irrigation congress, through the Pecos valley of New Mexico and to visit the national irrigation projects at Roswell and Carlsbad. Several of the representatives of other nations have expressed a desire to make the trip and Dr. E. McQueen Gray is now completing the details. He will probably accompany the delegation as will Hon. H. J. Hagerman of Roswell and several other well known Pecos Valley men.

Yesterday afternoon, M. Tavernier, representative of France, left for the Grand Canyon with a party of friends. He will study irrigation works, and conditions in Arizona and California before returning home.

Herr J. A. Schoeman and Herr O. A. Oosthuizen, of Cape Colony, will leave this morning for their far away home, visiting several states in the north and middle west before sailing.

The foreign delegates have expressed themselves very cordially to the people of Albuquerque and to the congress for the reception accorded them and the courtesies extended, and yesterday all members of the foreign delegation addressed a joint telegram to Secretary of State Elihu Root, thanking him and through him the government for the invitation to attend the congress and for the reception accorded them.

The foreign delegates also addressed a joint letter to President Goody, thanking him and through him the congress for courtesies shown.

The banquet given Friday night at the Alvarado by the visiting delegates from foreign countries to the engineers of the United States reclamation service and a few other guests was one of the most notable gatherings and one of the most interesting and enjoyable social events held in connection with the irrigation congress.

Wishing to express their appreciation of courtesies which had been shown to them and to further cement the bonds of international friendship based upon a common interest in the

problems of irrigation, the distinguished conference who have been representing foreign governments at the irrigation congress acted as hosts at this dinner to their American colleagues. The appointments of the dinner were perfect and the company not only distinguished but congenial. The guest of honor was Dr. E. McQueen Gray, to whose intelligent efforts is due the presence of so large a representation from abroad, and to whom the visiting delegates from foreign countries felt particularly indebted. Dr. Gray's incomparable success as a linguist, served to bridge the gulf between men of different languages, and the task was no light one, in view of the fact that the English, French, German, Spanish, Portuguese and Dutch languages were in constant use about the board and in the speeches which were made. It is safe to say that a more widely international dinner was never given in Albuquerque, and that no company of men ever had a better time in its language. Each person at the table responded to a toast and the company ended by toasting the friendship of the nations represented.

The following were the hosts: M. Rene Tavernier, representing France; Herr G. Plohn, representing Germany; Senor Barta Neves, representing Brazil; Senor Carlos Camacho, representing Chile; Mr. J. A. Schoeman and Mr. O. A. Oosthuizen, representing South Africa; Senor Larrinaga, representing Puerto Rico; and Dr. Nacumun, representing the Italian ambassador.

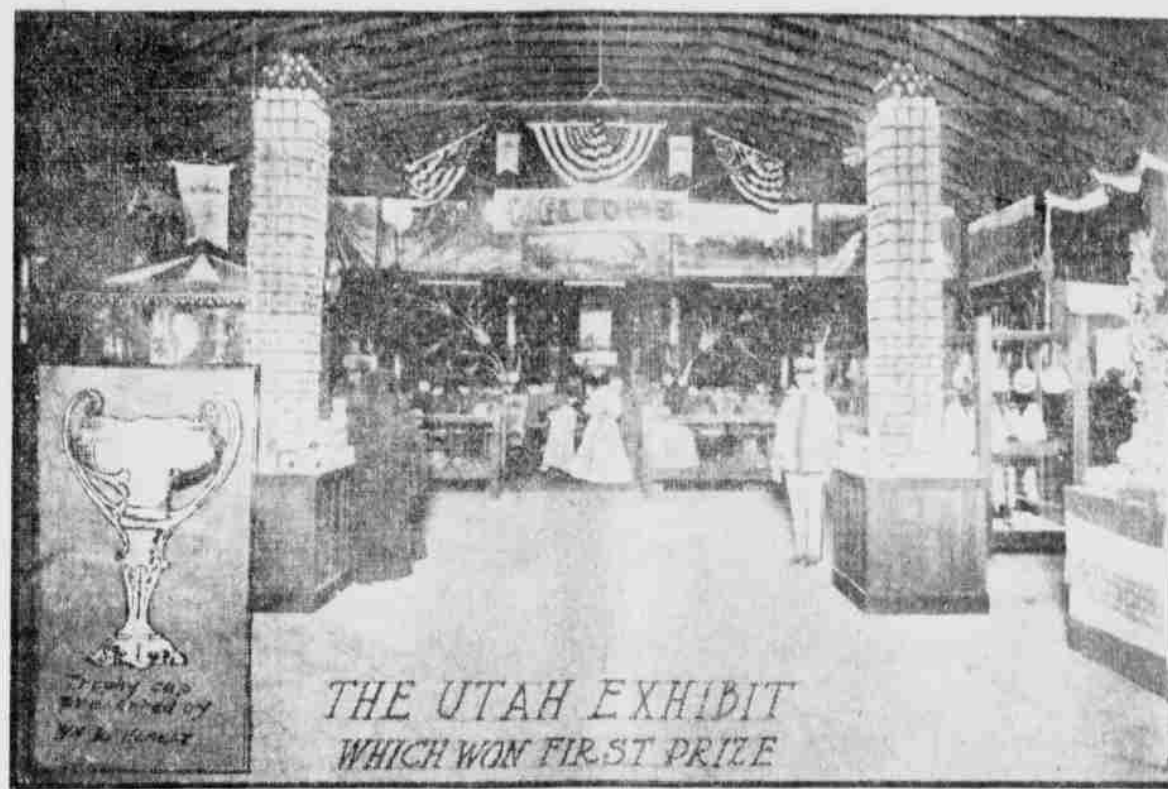

The guests were: Reclamation Service—Mr. A. P. Davis, Mr. Louis C. Hill, Mr. D. M. Reed and Mr. W. W. Follett, engineer of the Rio Grande boundary commission; President Garrison of the Agricultural college, Modesto Park, and Dr. McQueen Gray of Carlsbad.

The following were invited to attend but were unable to do so: Mr. Geo. C. Oils, director of the geological survey; Mr. Vernon Sullivan, territorial engineer; Mr. Blanchard, statistician of the reclamation service.

part that the Senastika company has played in the development of the resources of Colfax county. A huge pile of Senastika coke, adjacent to the coal columns, also attracts favorable attention from a large number of visitors. The coke is of a superior burning and lasting quality, and there is universal demand for it among the mining and smelting industries.

Upon entering the building, the visitor is greeted by two pictures, one an excellent life size photo of Governor George Curry, of New Mexico, and the other a reproduction of an old photograph of Governor Brent, the first American governor of New Mexico, who was assassinated at Taos, in the Indian uprising, in the year 1847. A card underneath the two pictures bears the following significant inscription: "Photographs of the first and last governors of the territory of New Mexico. The inference is that the people of Colfax county are confident that New Mexico will be a state before very long. One of the most interesting exhibits in the Colfax building and the only one of its kind on the exposition grounds, is that made by C. W. Hague, a well known naturalist and taxidermist of Raton, Mr. Hague is certainly an artist in his line, a fact which is amply proved by the magnificent display of skins and mounted birds of all descriptions which are to be seen in his booth. Rattlers, snakes, eared and tanned, there are in large numbers, some of them being ten and twelve feet in length. Stuffed birds of all descriptions, deer heads, deer horns, stuffed wild cats, coyotes and wolf heads, and in fact, the skin of nearly every wild animal native to New Mexico is included in the exhibit. At Raton, Mr. Hague maintains the largest taxidermist establishment in the southwest.

The exhibit of the Maxwell Irrigated Land company, a company which has over 22,000 acres of land under irrigation in the center of Colfax county, is one of the most complete and interesting on the grounds. Cucumbers, squash, wheat, oats, sugar beets, alfalfa, large watermelons, cauliflower, Hubbard squash, cab-

UTAH WINS HEARST TROPHY FOR BEST STATE EXHIBIT OF VERY ARID VALLEYS

New Mexico Second in Contest With Slightly Smaller Percentage Than the Winning State, Which Also Captured the Hearst Prize Last Year; Eddy County Gets Trophy for Best County Display; Bernalillo Makes Splendid Showing in Latter Competition.

The state of Utah was yesterday declared to be the winner in the contest for the magnificent silver loving cup, worth several thousands of dollars, donated by William H. Hearst, to the irrigation congress as a trophy for the state displaying the best agricultural exhibit at the exposition. Utah last year captured a similar trophy awarded by Mr. Hearst. The decision of the judges yesterday made with general approval, as Utah's exhibit is a splendid one, and an impressive demonstration of the marvelous agricultural development of the arid and fertile valleys in that state.

New Mexico has the high honor of winning the second place in this contest, with an exhibit which took the greatest profit in this territory. In a few years New Mexico will be in a position to give any state in the west a fast run for its money in an agricultural exhibit contest.

Eddy county is declared the winner of the contest for the silver cup awarded for the best county exhibit. Bernalillo county's percentage is only slightly smaller than Eddy county's, and it is believed that the Bernalillo county exhibit had been kept fresh by replacing it in the case of numerous other exhibits, her chances would have been still better. When it is considered that this county's exhibit was gathered almost haphazard at the last moment, the county's showing is one to be proud of.

Keen Brothers, of Grandview, Colo., are winners of the trophy for the best individual exhibit of farm products.

The judges in the agricultural contest were Wilhelm K. Winterhalter, of Rocky Ford, Colo.; George Austin, of Salt Lake City; and M. W. Mills, of the Pecos valley. Fred J. Kiesel, of Utah, who took the place of Mr. Austin, who was obliged to leave the city.

In the state contest fruit was included, as the judges considered products of orchards on as large scale as farm products. The points received by the various competing states were as follows:

Utah, 82; New Mexico, 82.5; Colorado, 78.25; California, 74.5; Arizona, 75; Nevada, 42.

Utah's individual classification showed 31.2-3 points for quality, 10 points for appearance, and 41.3-1 points for classification of products.

Keen Brothers, of Colorado, winners of the Hearst cup for the best individual exhibit, represented the irrigation congress as a trophy for the state displaying the best agricultural exhibit at the exposition.

Utah last year captured a similar trophy awarded by Mr. Hearst. The decision of the judges yesterday made with general approval, as Utah's exhibit is a splendid one, and an impressive demonstration of the marvelous agricultural development of the arid and fertile valleys in that state.

WATER RESOURCES OF VERY ARID VALLEYS

Prof. Smith of Tucson, Tells of Utilization of Moisture in Typical Dry Valley of Southwestern Arizona.

"Water Resources of Very Arid Valleys" was the subject of an address before the irrigation congress by Prof. E. C. Smith of Tucson, Arizona, a recognized authority on such matters. Following is a brief of his address.

Much is said of the larger irrigation enterprises, those of big reservoirs and extensive tracts of land. My subject relates to smaller projects in very arid valleys. Such areas on first appearance seem desiccating and forbidding. Dry and parched for months at a time, without one drop of water for man or bird or beast, and especially through the hot months when water is most needed, no rainfall, no rivers, and furthermore, no possibility for reservoirs. This description applies to one-third of Arizona, nearly all of that portion south of the Gila river. Taken together such areas constitute a problem with great possibilities. And to what extent can they be profitably reclaimed? And to what extent are they being reclaimed? The questions which demand a careful investigation.

The Santa Cruz valley.

The present of this is based largely on investigations made in the Santa Cruz valley, which is a typical arid valley. It will be briefly described. Topographically, there is a narrow strip of bottom flanked by high slopes and surrounded by mountains forming a basin to 7,000 feet above the valley. The total length of the valley is 214 miles and the drainage area 2,000 square miles.

Only the highest mountain tops are forested. Above they are surrounded by forest reserves, this protection of forest cover with continuous exposure the mountains exhibit all the characteristics of rapid and severe erosion, bare broken down rocks, steep slopes, and deep narrow canyons at the mountain base are the typical symptoms of arid regions—long slopes of even gradient, either surface by the mountain base at the mountain base of themselves cut by the waters which drain away from the high forested slopes.

The depth and extent of the valley all are astounding. No well has reached bottom in any part of the valley, though several wells 1,500 feet deep have been drilled.

The annual rainfall varies from 5 inches at Guadalupe to 10 inches at Tucson to perhaps 25 inches on the highest mountain tops. The annual evaporation from the valley is five times the rainfall. It would be if there were any water to evaporate. The amount of the water is too small and the rainy season too short to be of great value on the land. Rainfall from the mountains is small. The water which runs down the mountains is small. The water which runs down the mountains is small.

The heavy summer is the most independent of the irrigator. Thus runoff is sporadic and irregular. The streams are mostly dry and are totally unfit for the establishment of the ordinary stock or even, yet, particularly though it may seem, these floods should be considered as the hope of the water. It is useless for one to stand by a running flood in such valleys and depend on the water of water. The water which runs down the mountains is small. The water which runs down the mountains is small.

MOTT TELLS HOW SPOKANE WENT AFTER THE CONGRESS

The Northwest City Started Its Fight Early and Kept Right on the Job, Realizing Yesterday the Results of Almost a Year of Systematic Effort.

PUEBLO IS DISAPPOINTED BUT CORDIALLY AGREES WITH RESULT

Spokane landed the sixteenth National Irrigation Congress yesterday by unanimous vote after Pueblo, seeing the inevitable withdrawal from the contest, voted for Spokane and like the good fellows they are promised to do everything they could to make the best congress a success. Pueblo is a long way from being out of the game and will be heard from at Spokane.

C. W. Mott, the veteran general irrigation agent of the Northern Pacific railroad, told the Morning Journal yesterday how Spokane went after the congress and in view of the work that was done and the effort put forth it is not surprising that Spokane had an easy victory.

We went to work, immediately after the congress at Sacramento, said Mr. Mott, and we have been working ever since. That is the whole story of our success. Soon after the congress at Sacramento closed I took up the matter of the next congress with the men who are leaders in the irrigation congress movement and found many of them ready to help. The Spokane people took an active hand in the work and for several months have been in communication with men interested in the congress and have kept a close line on the delegates so that when we came to Albuquerque we found sentiment already burning in our favor. I was early on the ground, myself, and I have to thank the newspaper men for the kindly way in which our claims were put forward. Spokane will do everything in her power to see that the sixteenth congress is properly entertained, and I believe it will be a most successful meeting. The great northwest is worth seeing and it is to be hoped that New Mexico will follow up the advantage she has gained from this congress by coming to Spokane with a great delegation.

I am in the publicity business, to part of my work and am in a position to speak from many years of experience and I can assure you that the benefits New Mexico and Albuquerque will receive from the publicity given through this congress will be of almost incalculable benefit. Your city and territory have been more talked of and read about during the past sixty days than ever before, and the result is bound to be of tremendous value to your development in the immediate future.

I think that Albuquerque in particular will follow up this advantage by sending a big delegation to Spokane next year, which will surely retain another harvest of the right kind of publicity.

For a small city I have never seen arrangements better made than were those in Albuquerque. The exposition of the Pueblo delegation numbered about twenty-five men with the Elks' band of Pueblo, which has done very much to make the musical features of the congress a success and which has been most generous to the public with its excellent music. The Pueblo men are good losers and the present attitude will do much to secure for them the meeting year after next.

WONDERS OF PUMPING IN SEMI-ARID NEW MEXICO

Deming Man Tells What Has Been Accomplished in the Mimbres Valley by Hard Work and Intelligent Effort and Predicts the Future of the Pumping Plan.

Edwin C. Elk, of Deming, who has taken a prominent part in the work of the irrigation congress, had prepared a paper on irrigation by pumping, to be read to the congress, but decided not to deliver it, because of the conflict on his time as chairman of the committee on permanent organization. Mr. Elk's paper is a strong one and he has pronounced it given in full before.

Among the marvels wrought by man in the desert places of the wilderness it is recorded that he smote the rocks of Horeb and streams of water poured forth. We have read of the wonderful works of the ancient Egyptians and are but beginning to rediscover many of the lost arts which were known to their civilization. It has sometimes almost seemed to me that Moses must have brought with a contrived pump and channel engine, and that the manna upon which the people fed was an early product of irrigation.

Pumping for irrigation purposes has been practiced to a considerable extent in the arid irrigated districts of this country for a number of years and from very early days water has been lifted by raised in India, China and Egypt, sometimes by hand, sometimes by cranes, forms of water wheels, or some of the more modern devices. It has come, however, for the people and the courage of American inventors to develop larger lifting systems and to install

throughout New Mexico and Arizona, our valleys, alternating with mountain systems, are frequently underlaid by one or more strata of sand spring water percolating through gravel beds, free from silt and uncontaminated by injurious salts. It was perfectly natural that the first comers into these regions should see in the flowing streams the earliest and easiest promise of agricultural wealth; that they should have directed their efforts toward taming the mountain torrents and harnessing them to the plow. Many of these undertakings have been stupendous in their magnitude, leaving investments from the older and richer communities of the east and west; others starting modestly, for purposes of economy in operation or in the use of the water or to secure a more equitable or judicious distribution of the same merged and extended other irrigation systems either by private subscription or through public aid, and from small beginning systems revealing the most ambitious ones have been developed. The little gravity plant which diverts a few hundred gallons of water per minute from a never failing stream is ideal in its simplicity and in its economy; but the many commercial ideals it does not often exist in reality; and the gravity systems of today are attended by more or less of annoyance, expense

MAGNIFICENT EXHIBIT FROM COLFAX COUNTY

Showing in Unique Building Adequately Portrays Vast Resources of Northern New Mexico in Minerals and Agricultural Products.

Undoubtedly one of the most handsome and complete exhibits on the exposition grounds is that of Colfax county. The Colfax building is a magnificent structure, eighty by forty feet, well built of rough lumber, showing the original bark of the trees from which it was hewn. The building is well lighted and well ventilated, and the exhibits on the inside are shown to the best possible advantage. The approach to the building from the main walk is an imposing one. Massive columns of coal, coke and other materials of the county are much in prominence. On the outside of the building adjacent to the main thoroughfare is a large and stately pyramid, constructed entirely of soft coal mined from the Yankee Fuel mines of the Yankee Fuel company. The monument is quite high and can be seen from nearly all parts of the exposition grounds. Two immense blocks of coal, each of them weighing over a ton, are placed in position on top of the pyramid and accurately convey to the visitors the wonderful coal producing resources of Colfax county. At night this pyramid is illuminated with one hundred electric lights and the effect produced is beautiful. The lights are cleverly concealed in the interior of the pyramid and from a distance the pillar looks like a huge blaze of burning coal. The Yankee Fuel company exhibit is in charge of Mr. J. E. Southwell, general sales agent of the company. The Yankee Fuel company maintains offices in Raton, but the mines are located at Yankee, nine miles distant from the State City. The mines have been in operation but two years, and the coal mined is of such a good quality that it is already in much demand, and large shipments are made daily to Arizona, Colorado, New Mexico, Texas, California and Old Mexico.

The Senastika Coal company, owned and operated by the St. Louis, Rocky Mountain and Pacific Railway company, also has an extensive exhibit of their products of coal and coke. Two immense columns of coal, built high into the air, are an ever present reminder to the thousands of people who pass them daily, of the important

part that the Senastika company has played in the development of the resources of Colfax county. A huge pile of Senastika coke, adjacent to the coal columns, also attracts favorable attention from a large number of visitors. The coke is of a superior burning and lasting quality, and there is universal demand for it among the mining and smelting industries.

Upon entering the building, the visitor is greeted by two pictures, one an excellent life size photo of Governor George Curry, of New Mexico, and the other a reproduction of an old photograph of Governor Brent, the first American governor of New Mexico, who was assassinated at Taos, in the Indian uprising, in the year 1847. A card underneath the two pictures bears the following significant inscription: "Photographs of the first and last governors of the territory of New Mexico. The inference is that the people of Colfax county are confident that New Mexico will be a state before very long. One of the most interesting exhibits in the Colfax building and the only one of its kind on the exposition grounds, is that made by C. W. Hague, a well known naturalist and taxidermist of Raton, Mr. Hague is certainly an artist in his line, a fact which is amply proved by the magnificent display of skins and mounted birds of all descriptions which are to be seen in his booth. Rattlers, snakes, eared and tanned, there are in large numbers, some of them being ten and twelve feet in length. Stuffed birds of all descriptions, deer heads, deer horns, stuffed wild cats, coyotes and wolf heads, and in fact, the skin of nearly every wild animal native to New Mexico is included in the exhibit. "Seaship" Oysters are sold from a display carrier like this.

Old Ocean Makes the Oysters Good

"SEALSHIPT"

PATENT CARRIERS

Keep Them So

They are shipped in a carrier like this

By the "Sealship" System the oysters are shucked into steel containers then sealed airtight and packed with ice *around* the container but *not* touching the oysters. No water comes with "Sealship" Oysters. You get what you pay for—all solid meats.

The water bloats them, bleaches them and destroys their delicious natural flavor. The ice mangles and breaks them.

"Sealship" Oysters are perfect, firm and clean. All the real oyster taste is retained—that indescribable salt sea tang—that delicate, distinctive savor you are accustomed to get only in oysters eaten at the seashore.

"Sealship" are the only bulk oysters that have it. "Sealship" Oysters are taken from the choicest beds. The foremost shippers in the country handle them. When you get "Sealship" you get solid meats. You don't pay for half water. It is the only economical way to buy oysters. A pint of "Sealship" oysters goes as far as a quart of ordinary tub Oysters.

Sold by the following dealer:

San Jose Market

The genuine "Sealship" Oysters are always sold from a White Porcelain Display Case bearing the "Sealship" trade mark in blue. This is for your protection—look for it. Get the interesting little book "Sealship Sense." It tells why "Sealship" Oysters are best and gives some appetizing new recipes by famous cooks. Any dealer who handles "Sealship" will give you a copy. "Sealship" Oyster Carriers are protected by patent. Infringement will be prosecuted to the full extent of the law.

TODAY'S IDEAS
There's a certain luxury about our Clothes
that a Man fully appreciates when he's inside
of them.
Our Suits express a certain style and ex-
clusiveness in conservative as well as in ex-
treme models.
They Are Clothes of Today!
The broad collar and lapel, the artistic drapery of the coat
outlined to the form—the perfect hanging Trousers, the skillful
tailoring of each garment, together with the new and exclusive
fabrics form a combination nothing short of perfection in Clothes
building.
Suits at \$15.00, \$20.00, \$25.00
\$30.00 or \$32.50
EVENING CLOTHES
Our Evening Clothes are correct by all the
requirements of good form.
They are Fashioned by Expert Designers
and tailored by skillful workmen.
The man, who is "going out" and has
neglected to provide a new Dress Suit, need
not wear the old one again for we can fit him
out in short order.
He can step right into a perfect fitting
Dress Suit and Save one-half the exclusive
Tailor's bill.
Full Dress Shirts, Ties, Collars, Shirt Fronts and all other
Requisites of the new latest mode.

EVELYN NESBIT SAYS MRS. THAW BACKED UP

Declares Harry's Mother Has Never Paid Her a Cent.

New York, Oct. 2.—Mrs. Evelyn Nesbit Thaw, in a signed statement given out by her husband in the presence of her attorney, Gustaf O'Reilly, makes the claim that for the past two months Harry K. Thaw has not contributed to her support, and that contrary to general opinion, no sum of money has ever been settled upon her since the trial.

Contrary to general opinion, no sum of money has ever been settled upon her since the trial.

That if I, through my counsel, brought about annulment, present-

ings, a living sum would be given me and an income per year for life.

"In this agreement Mrs. William Thaw pledged her word that this money would be paid upon the signing of annulment papers. No sooner were the papers signed than Mrs. Thaw conveniently forgot all about her word. Naturally my counsel withdrew the suit at once.

"As for the bankruptcy proceedings they are merely a pretext to get Thaw out of New York and into Pennsylvania, other proceedings will be brought to keep him there."

Thaw Incommunicado.

White Plains, N. Y., Oct. 2.—The jail warden here refused reporters permission to see or correspond with Thaw tonight.

Case Has Cost \$50,000.

New York, Oct. 2.—The total cost to New York in account of prosecution of H. K. Thaw, for the shooting of Stanford White, has been \$50,000, according to figures submitted by District Attorney Jerome to Justice Mills

at Newburg today. The purpose of Mr. Jerome's application to Justice Mills was to have the approaching trial on the question of Thaw's mental condition transferred from Westchester to New York county. Mr. Jerome said in the papers that the trial in Westchester county would entail much greater expense than if held in New York county. He stated that under the circumstances he can not go to Westchester county to take part in the trial, because he has been fixed by Justice Mills as the date for the trial. There will be no jury.

Forecast.

Washington, Oct. 2.—New Mexico and Arizona: Fair in south; rain in north portion; Sunday-colder; Monday fair.

Owen A. Kane, Santa Fe operator at Laguna, returned yesterday from a five weeks' visit to his home in Lima, Ohio, and will remain here a couple of days, attending the fair.

INDUSTRIAL PARADE THE BIG THING OF THE WEEK

AN IMPOSING ARRAY OF DISPLAYS FOR EVENT

Grand Military Pageant and Display of Industries Takes Place Tuesday Morning October 6.

Perhaps the largest thing in a week-cramped full of spectacular attractions now beginning will be the mammoth industrial and military display and parade on Tuesday, October 6. The following is the complete line of march and order of parade as issued by the Morning Journal by Grand Marshal John Borraale last night.

Line of March.

From place of formation, west on Central avenue to Seventh street, south on Seventh street to Gold avenue, east on Gold avenue to Fourth street, south on Fourth street to Silver avenue, east on Silver avenue to Third street, north on Third street to Gold avenue, east on Gold avenue to First street, north on First street to Central, west on Central to Sixth street, south on Sixth street to Gold avenue, east on Gold to First, north to Central avenue, west on Central to Fifth street, north on Fifth, when parade will be dismissed.

Divisions.

First division forms on Central avenue, facing east, right at Ninth street.

Second division forms on Copper avenue, directly in rear of the second division.

Fourth division forms on Tenth street, right resting at Fourteenth street.

Fifth division forms on Tenth street, directly in rear of Fourth division.

Sixth division forms on Twelfth street, right resting on Tenth avenue.

Formations.

City police.

Marshal and aids.

Fourth division: W. A. George, T. S. Scully.

Fifth division: George A. Koseman, Prof. W. G. Tught.

Sixth division: Col. Perfecto Arango, A. Grunfeld.

Major J. E. Elder and Capt. M. O'Donnell as aids.

Marshals assigned will have their respective divisions ready to march promptly at 10:30 a. m.

JOHN BORRAALE, Marshal.

Former Mint Superintendent Dead.

Denver, Oct. 2.—Col. William J. Puckett, who was appointed superintendent of the Denver mint by President Cleveland in 1883 and served in that position four years, died today of stomach trouble, aged 62.

FIRE BURNS VALUABLE HORSE IN SANTA FE

Barn Belonging to District Attorney Gortner Destroyed with Thoroughbred Horse—Democrats Meet and Adjourn.

Santa Fe, N. M., Oct. 2.—Fire at 1 o'clock this evening destroyed a large barn belonging to District Attorney Robert C. Gortner of this city. A valuable horse which was highly prized by Mr. Gortner and valued at several hundred dollars was burned in the barn, together with a lot of harness and saddlery, the entire building and its contents being consumed.

The democrats of Santa Fe county met in county convention today, elected a temporary organization and then immediately adjourned to meet

again later at the call of the chairman. They failed to nominate a ticket at this session.

WILL ISSUE FOLDER ON NEW MEXICO

Santa Fe Men Plan to Write Up Whole Territory From Raton to El Paso for "The Earth" in Next Few Months.

F. L. Vanover, of the Santa Fe advertising staff, who has been acting as secretary of the publicity committee of the Irrigation Congress, left last night for California, where he will join Charles L. Bagley, general advertisement agent of the system, in a trip to the San Joaquin valley of California to gather some material for Santa Fe advertising matter and

The Farmer's Wife

Is very careful about her churn. She scalds it thoroughly after using, and gives it a sun bath to sweeten it. She knows that if her churn is sour it will taint the butter that is made in it. The stomach is a churn. In the stomach and digestive and nutritive tracts are performed processes which are almost exactly like the churning of butter. Is it not apparent then that if this stomach-churn is foul it makes but all which is put into it?

The evil of a foul stomach is not alone the bad taste in the mouth and the foul breath caused by it, but the corruption of the pure current of blood and the dissemination of disease throughout the body. Dr. Pierce's Golden Medical Discovery makes the sour and foul stomach sweet. It does for the stomach what the washing and sun bath do for the churn—absolutely removes every tainting or corrupting element. In this way it cures flatulencies, eruptions, scrofulous swellings, sores, or open eating ulcers and all humors or diseases arising from bad blood. If you have bitter, nasty, foul taste in your mouth, coated tongue, foul breath, are weak and easily tired, feel depressed and despondent, have frequent headaches, dizziness, grinding or distressing stomach, constipated or irregular bowels, sour or bitter risings after eating and poor appetite, these symptoms, or any considerable number of them, indicate that you are suffering from biliousness, lurid or lacy liver with the usual accompanying indigestion, or dyspepsia and their attendant sufferings.

The best agents known to medical science for the removal of these symptoms are Dr. Pierce's Golden Medical Discovery, of leading druggists and practitioners of all the several schools of medical practice. Have been skillfully and laboriously compounded in Dr. Pierce's Golden Medical Discovery. That this is absolutely true will be readily proven to your satisfaction. If you will but mail a postal card request to Dr. R. V. Pierce, Buffalo, N. Y., for a free copy of his booklet of extracts from the standard medical authorities, giving the names of all the ingredients entering into his world-famed medicine and showing what the most eminent medical men of the age say of them.

General View of the Exposition Grounds.

The Yavapai county, Ariz., mineral exhibit, in the mining building at the exposition, is one of the most complete and exhaustive collections of specimens of the mineral wealth of northern Arizona ever gathered together. Yavapai county produces \$12,000,000 worth of mineral wealth per year. A feature of the Yavapai exhibit is a large number of specimens from the new copper country along the Arizona & California railroad, which is known as the Northern Arizona district. This new copper district, which has been but recently opened for development, has already 200 miles in active operation. It is perhaps the richest district in Arizona and an account of the fact that it has been but partially developed the people who are interested in developing it are of the opinion that it will within a few years be the greatest mining belt in the country. In addition to gold, silver, lead and copper, there are also claims in the Northern Arizona exhibit, pieces of polished mica, marble and exhibits of asbestos, iron ore, building stone, natural paint, diatomaceous earth, and many other ores which indicate the wonderful hidden wealth of Arizona. Another feature of the Yavapai exhibit is one of the most interesting one on the grounds and a visit to it

Silver City Public schools, Socorro County schools, San Miguel County schools, Mora County schools, Santa Fe County schools, Grant County schools, Taos Public schools, St. Catherine's Indian school, Santa Fe, St. Joseph's school, Old Albuquerque, Immaculate Conception school, St. Vincent's academy.

NEW MINING PAPER IS PUBLISHED

"Southwestern Mines," Devoted to Mining Interests of the Territories, Is Now From the Press.

"Southwestern Mines," a five-page periodical devoted to the mining interests of the great Southwest, edited by Prof. Payette A. Jones, the well known mining expert, with John B. McManis as manager, has been added to the list of Albuquerque publications. The first number being just off the press of the Morning Journal. It is a bright, new publication, full of fresh mining news and will be invaluable to persons interested in the mining development of the territories. The handsome mining district of Arizona county is featured in the first issue with photographs, and there are

interesting articles by well known writers on the Gila, Santa Rita, and other properties, with a lot of general mining information of most readable interest. There is also a splendid article on the great mineral exhibit at the exposition here.

INFANTRY REMAIN UNTIL CLOSE OF EXPOSITION

Boys From Fort Logan Will Be Paid Off This Week and Are Looking Forward to a Jolly Good Time Until October 10.

One of the best attractions of the exposition and fair entertainment program this week will be the daily drills and exhibitions of the boys of the Infantry of the Twenty-first Infantry from Fort Logan, who will be paid off this week and are looking forward to a jolly good time until October 10. "We are boys to stay all through the week and are looking forward to a good time," said an officer of the regiment last night. "Sometime this week the boys will receive their pay from the paymaster and they will mean the spending of several thousand dollars in Albuquerque." "We are having the best kind of a
