SPEEDY RELIEF TO INJURED WORKMEN URGED

**American Mine Congress Hears
Able Argument for Adequate
and Liberal Federal Employ-
ers' Liability Law.**

CLAIMED IT WOULD COST
LESS THAN DAMAGE SUITS

Direct Compensation to Industrial Victims Instead of Expensive Litigation as Solution of Perplexing Problem.

Goldfield, Nev., Sept. 30.—The American Mining congress devoted today's sessions to receiving the report of the special committee on the revision of the Alaska mining laws, adopted resolutions endorsing the Roosevelt conservation of natural resource policy and urging the creation of international and waterways commis-

The congress refused to recognize Dr. Frederick A. Cook as the discoverer of the North pole, the committee on resolutions declining to act upon a resolution to this effect, introduced early in the day. The congress took the position that it had neither evidence that Cook discovered the pole nor competence to consider such evidence.

The principal address of the day

The expectation that the report of the special committee, which investigated the Alaska mining laws, would be sensational met with disappointment. While the Alaskan coal lands and the laws applying to them were discussed at length, there was not the slightest reference, direct or indirect, to the Alaskan coal land contract.

The resolution introduced by Senator Newlands of Nevada, calling for the creation by congress of a depart-

front offices with a mining secretary in the president's cabinet, is still under discussion in committee. Opposition is the idea of Senator Newlands, Judge Richardson of Idaho, president of the congress, today introduced a regulation approving a bureau of mines instead of a department.

David Ross, Illinois commissioner of labor, advocated the establishment by federal enactment of a fund, the burden of which should fall wholly upon trade and industry, without a

Mr. Huns cited the provisions of the British Workmen's Compensation act, which requires in case of death by accident a compensation equal to three years average earnings, and declared that, on a similar basis, the addition of less than one per cent of the valuation of the products of the country would furnish sufficient revenue, including the cost of administration, to satisfy the claims of the killed and injured, and their dependents.

"Surely," he added, "the ultimate consumer, whose welfare everyone is eager to protect, would not object to this very slight increase if assured of the purpose for which it was made."

Man, he said, "should be placed industrially upon an equality with the machine, and that the cost of a broken bone or other injury, like a broken

"Aside from the principle, there is a certainty about this method which should command the endorsement of every employer of labor," he continued. "In the more dangerous trades, the number of accidents are so regular, whether figured on the basis of men employed or work performed, as

"A consideration of the subject from this viewpoint must necessarily reject the proposition that any part of the

(Continued on page 2, column 4).

TEENAGERS WILL SOLICIT FOR THE HIGHLAND LINE

TWENTY-FIVE MEN WILL WORK FOR PROPOSITION

Enthusiastic Meeting Held in Library Last Night Develops Sentiment Which Indicates That System Will Be Built.

That the citizens of the Highlands are interested in the proposed street car system for that section of the city, and are determined to make every effort to have it built, was demonstrated at a meeting of the Highlanders held in the library building last evening, when twenty-five men volunteered to serve as solicitors, without compensation, to canvass stock subscriptions for the enterprise for the next week, or as long thereafter as their services would be needed. The meeting last night, which was held for the purpose of considering ways and means of securing additional subscriptions for the car system, was very enthusiastic and the men who have been foremost in promoting the scheme were much encouraged as the result of the gathering. The twenty-five volunteer solicitors will begin work today and canvass every part of the Highlands, reporting at a meeting to be held in the library building Thursday night, to which the women will be invited. The Highlanders will be blocked off into twenty-five different sections, each solicitor working thoroughly over the section assigned to him. To give an impetus to the soliciting, Ed. B. B. Sellers, announced at the meeting last night that he would buy a \$5 but for the man who secured the largest amount of subscriptions before Thursday evening. Mr. Cushman, of the Washburn company, followed Mr. Sellers' lead by declaring that he would give a \$5 skipper to the man who will secure the second largest number of stock subscriptions before the next meeting. It is believed by the Highlanders that if a thorough canvass is made by the solicitors who will start out today, the additional \$15,000 worth of stock necessary to finance the enterprise will be contributed and that the work will be started without unnecessary delay.

JEAN VALJEAN AT THE CRYSTAL THEATER

The life of Jean Valjean, Victor Hugo's greatest character, which furnished the subject of Bishop Queney's lecture Wednesday evening, can be seen depicted in pictures at the Crystal theater today. The "Fading of the Shroud," a beautiful biographical film, is another picture to be seen at the Crystal today.

BRYAN DECLINES TO DEBATE WITH BAILEY

Believes Exhibition of Democratic Dissension Would Lessen Chances of Party Success in Congressional Campaign.

[By Morning Journal Special Leased Wire] Lincoln, Neb., Sept. 30.—In explanation of his position on the proposed debate with Senator Bailey of Texas at Atlanta William J. Bryan today addressed a letter to Clark Howell, editor of the Atlanta Constitution. The letter follows:

"I wired you last night that I would communicate with you by letter, my reasons for believing a debate inadvisable.

"When a joint meeting was suggested at El Paso, Texas, I replied to the effect that I am trying to aid in the election of a democratic majority in the next congress; that to such end I have suggested a brief but specific tariff plank which I ask Democratic candidates to accept, reject or amend.

Hay's Hair Health

ACTUALLY, POSITIVELY, INVARIABLY RESTORES GRAY HAIR TO THE COLOR AND VIGOR OF YOUTH.

You can't look young if your hair is gray, faded, dull and lifeless. Hay's Hair Health will bring back the natural color, just as it was when you were young. Stops dandruff and falling out. Makes the hair bright, silky and full of life and beauty—not a dye—won't color or soil your skin.

31 AND 50c. BOTTLES, AT DRUGGISTS. Hay's Hair Health cures eczema, red, rough and chapped hands, and all skin diseases. Keeps skin clean and soft. Druggists send a free booklet, "The Care of the Skin." The Care of the Hair.

Pat. Hay Spec. Co., Newark, N. J. J. H. O'REILLY CO.

and that believing a debate would tend to turn attention from the issue to individuals I would not consider the proposition unless it came as a personal request.

"I might add further reason that a debate between two democrats would accentuate the tariff differences that have embarrassed our party in congress and give Republicans newspaper a chance to dwell upon democratic dissensions instead of devoting their time to the contest now being waged between the progressive republicans and standpatists. A debate might be pleasing to participants and entertaining to the audience but I think that the subject which I am endeavoring to present is worth of calm and serious consideration.

"Very truly yours,
"WILLIAM J. BRYAN"

BAILEY HAS NO FEAR OF WRECKING HIS PARTY

Gainesville, Tex., Sept. 30.—Other than to express regret that the debate would not occur, Senator Bailey made no statement tonight when informed of the letter of W. J. Bryan explaining why he could not consider a joint debate as to tariff issues advisable at this time. Senator Bailey will speak in Fort Worth tomorrow, in reply to an address of Mr. Bryan at El Paso.

SPAIN MUST RULE ROAD TO FEZ

Madrid Paper Warns Government Against Inactivity Following Victory of Gurug Heights.

[By Morning Journal Special Leased Wire] Madrid, Sept. 29.—The Correspondencia Militar says it is an error to consider the campaign ended by the recent victories.

To exercise effective dominion over the region, it adds, military action must be extended from the River Guadalequiv to the Malaga on the east, the frontier comprised between these points being of the greatest military importance on account of its position on the highway from the Mediterranean to Fez.

The Correspondencia Militar also considers essential the punishment of the turbulent tribes who for the past six months have been making daily attacks on Alhucemas and other places.

THIRTEEN VIEW VICTORS FROM SAFE DISTANCE.

Madrid, Sept. 30.—The Spanish troops which yesterday succeeded in planting their flag on the summit of Mount Gurug Heights, retired from their advanced position today as these were deemed of no strategic importance.

The Spaniards occupied a position on the Beni Enzar ridge after a short but sharp engagement in which there were a number of casualties.

The occupation of Mount Gurug was accomplished without opposition, the Moors having vanished on the Spanish approach. Their whereabouts could not be ascertained by scouting parties, but today there appeared in large numbers, the tribesmen gathering on the neighboring heights.

PERSIAN PREDICTS ANGLO-GERMAN WAR

New York, Sept. 30.—"War between England and Germany is inevitable and the sooner it comes the better for England, because it will develop such strength that it will be impossible to defeat her."

This was the alarming message given tonight by H. H. Topkayan, Persian consul general here, in an address to the Albany Burgess corps, the members of which were Mr. Topkayan's guests at a dinner at the Republican club.

SAD SURPRISE FOR SHORTS IN WHEAT

(Continued from page 1, column 2).

bushels of it. Little wheat came out until \$1.15 was reached. At this figure and above, a neat profit was garnered, deliveries amounting to 615,000 bushels going to scattered interests. It was necessary to extend the delivery period three times before the last account was squared. The hour for delivery of actual wheat is from 1:30 to 2 p. m. It was 3:35 before the last transfer had been made.

While several firms are reported to have profited by the deal, common report credited control of September to an eastern man. This trader is said to have bought around a dollar and to have recouped nicely money lost two years ago in an attempted "squeeze" which failed. He is likewise said to have been the man who made July shorts come to his terms at New York last summer. In some quarters it is insisted that the deal was manipulated by Chicago interests.

A furor in the oats pit monopolized attention during the forenoon session, but its later was dimmed later by the excitement in wheat. Covering of about 2,000,000 bushels of September oats sent the price of that cereal up to 50 cents, 1 1/2 cents higher than the previous close. A top price elevator interest sold heavily and the market reacted to 44 cents, where it closed.

Taft Opposed to Making Territory of Alaska

(Continued from page 1, column 5).

Justified in making such a recommendation. The territory will develop much more rapidly and the boon of self government will come much more quickly under such a system than the government is being carried on at present.

"The future of Alaska is big with prospects, and great productivity, but it needs intelligent legislation to

develop it quickly and in the right way, and I know no better method of securing such a result than by a properly constituted commission.

"I am especially interested in Alaska because her development has been delayed by a lack of appropriate legislation and because I know something of the needs of a land so far distant.

"Free trade with the Philippines has now established between the islands and this country will develop an exchange of business between the two countries, which will be greatly to the advantage of both.

"The Panama canal will be completed on or before the first of January 1915, and with its completion the trade between the eastern and western coasts of this country will be revolutionized, for the carriage of heavy bulk merchandise between the Pacific and the Atlantic coasts is almost certain to be by water. It will reduce the transcontinental business to the carriage of the more valuable classes of merchandise, which can profitably pay a higher rate of transportation. More than this, it will change the avenues of international trade, will bring the eastern coast of America closely in touch with the western coast of South America, and will greatly facilitate the direct transportation from the west coast of America to European ports.

"China is waking up. She is approaching a period of development that cannot but increase her trade and augment her importance as a customer and as a trader with this country while Japan and all the other Oriental countries are moving onward with giant steps in the commercial competition of the world. Under those conditions it behooves us Americans to take steps to repair a condition that exists in respect to our merchant marine that is humiliating to our national pride and more burdensome to us in competition with other nations in obtaining international trade.

"We maintain a protective tariff to encourage our manufacturing, farming and mining industries at home and within our jurisdiction, but when we assume to enter into competition on the high seas in trade between international ports our jurisdiction to control that trade as far as the vessels of other nations are concerned, of course ceases. The question which we have to meet is how we shall enable that merchant marine to compete with the marines of the rest of the world.

"We earn a profit from our foreign mails from \$6,000,000 to \$8,000,000 a year. The application of that amount would be quite sufficient to put on a satisfactory basis two or three Oriental lines and several lines from the east to South America.

"From my observation I think the country is ready now to try such a law and to witness its effect in a comparatively small way upon the foreign trade of the United States. If it is successful, experience will show how the policy can best be expanded and enlarged and the American commercial flag be made to wave upon seas as it did before our civil war."

"This is not the only question at hand, for it will be found on examination of the methods pursued in other countries with respect to their merchant marine that there is now extended by way of subsidies by the various governments to their respective ships upwards of \$25,000,000 and this offers another means by which, in competition the American merchant ship is driven out of business and finds itself utterly impossible to bid against its foreign competitors.

"Were we compelled to go into a war today our merchant marine lacks altogether a sufficient tonnage of auxiliary unarmed ships absolutely necessary to the proper operation of the navy and were a way to come on we should have to purchase such vessels from foreign countries and this might, under the laws governing neutrals, be most difficult.

"The trade between the eastern ports of the United States and South America is a most valuable trade and now carries something like \$25,000,000, but European nations have by subsidies so increased the sailings of large and well equipped vessels from Europe to the ports of South America as to vitally affect the proportion of trade which is coming to the United States.

"I need not tell you of the inadequacy of the American shipping machine on the Pacific coast and the growing power for commercial purposes in this regard of the empire of Japan. Japan is one of the most progressive and generous countries in the matter of subsidies to its merchant

marine that we have, and the effect is only too visible in an examination of the statistics.

"For this reason it seems to me that there is no subject to which congress can better devote its attention in the coming session than the passage of a bill which shall encourage our merchant marine in such a way as to establish American lines directly between New York and other eastern ports and South American ports and between our Pacific coast ports and the Orient and the Philippines.

"EVERYTHING FREE" AEROPLANE WEEK IN ST. LOUIS

Public Will Not Be Taxed to See Glenn H. Curtiss, Champion Aviator of World in Centennial Flights.

[Special Correspondence to Morning Journal] St. Louis, Sept. 27.—The public will not be required to pay an admission fee to see the Centennial Week aeroplane flights of Glenn H. Curtiss, the champion aviator of the world. After a conference of officers of the Aero club of St. Louis, host of the only Gordon Bennett international aeronautics meet ever held in America, and officers of the St. Louis Centennial association, it has been decided to throw the aeronautic field open to everybody.

The three afternoons of Centennial week set aside for the aeroplane flights are those of Tuesday, October 5th, Wednesday, October 6th and Friday, October 8th. Curtiss is scheduled to fly each of these three afternoons from Art hall, in Forest park, where still stands the permanent section of the St. Louis World's fair palace of fine arts, now the home of the St. Louis Museum of Fine Arts.

Art hall is surrounded by other buildings, which during the World's fair, were crowned with buildings of different states, and which during the aeroplane races of the week celebrating the 100th anniversary of the incorporation of St. Louis as a town, will serve as a natural grandstand with a capacity for half a million people. This monster grandstand of nature obviates the danger from fire, collapse, etc., that would result from an artificial grandstand sufficiently large to accommodate comfortably, as this grandstand will, everybody in the United States sufficiently interested in aeronautics to attend.

"Everything Free" is the slogan of the St. Louis Centennial association, a municipal institution, whose president is the Hon. Frederick H. Kneemann, mayor of the city. In accordance with this slogan, the city authorities have decided to throw the aeronautic field open to everybody.

The use of Norelco-Ritz versus the city of Albuquerque, which has been before the district court for the past three days, was continued again yesterday, the majority of the day being devoted to arguments of counsel on motions and the presentation of evidence in rebuttal by the plaintiff.

Containing no "free" alkali, it can be used without fear that it will make the hair brittle.

RUIZ CASE MAY GO TO JURY TODAY

\$25,000 Damage Suit Against City of Albuquerque May Be Decided Before Night.

The case of Norelco-Ritz versus the city of Albuquerque, which has been before the district court for the past three days, was continued again yesterday, the majority of the day being devoted to arguments of counsel on motions and the presentation of evidence in rebuttal by the plaintiff.

Judge Abbott took the matter under advisement and will announce his decision this morning. Ruiz is suing the municipality for \$25,000 as the result of the death of his son on September 6 last. Ruiz alleges that the boy was killed by a fall from a Norelco-Ritz street bridge, which it is claimed was in a dangerous condition on account of the negligence of the city authorities.

GOVERNOR CURRY TO MEET PRESIDENT AT GALLUP

Taft to arrive here about five o'clock

Doesn't Want Any Pale-de-Foie-Gras or Other Complicated Dishes; Latest Plans for Visit.

[Special Dispatch to the Morning Journal] Santa Fe, N. M., Sept. 25.—That President Taft distinctly doesn't want any fancy dishes with complicated French names when he comes to the Alvarado in this city on the night of October 12, is one of the things carefully explained by E. C. Wheeler, of the United States treasury department who arrived in Santa Fe today to confer with Governor Curry and others regarding the arrangements for President Taft's reception in Albuquerque. According to Mr. Wheeler, Mr. Taft's present schedule will bring him into Albuquerque between four and five o'clock in the afternoon so that while there will be time for all the features of his reception as planned, it will be a rather late evening for all concerned and the committee on reception and arrangements in Albuquerque will avoid the strenuous life while the president is there. He will be met at Gallup by a party consisting of Governor Curry and staff and a number of other officials, including a posse of New Mexican sheriffs, which will form a picturesque part of the president's entourage en route to Albuquerque. The president will spend four or five hours on a riding at Williams to get a little natural sleep free from the constant jolting of travel as he is joined on the Santa Fe.

It is planned to make the public reception to the president at the Commercial club, a little shorter than originally desired, as he wants a brief rest in his room at the hotel before the banquet at the Alvarado begins. The president, it is said, will insist on the good old fashioned breakfast and spend with possibly the family and staff and a number of other officials to cut out the lobster, and other substantial dishes, though the fact is, he is not easily disgusted by a chief executive who is undergoing an arduous trip.

A speech will be delivered at the Alvarado immediately after the president's arrival and from that time on he will be exceedingly busy. It is possible that although his arrival in Albuquerque will be a little later than planned, everybody will have a chance to see the nation's chief, grasp his hand and back for a brief moment in the justly celebrated Taft smile.

The governor and his staff will leave with the president on the midnight train for El Paso to participate in the reception to him and President Diaz in El Paso and Juarez.

\$1000 REWARD FOR MURDERER OF SARAH HATTON

Santa Rosa Citizens Will Pay Big Sum

Long and Arduous Search for Clues in Los Tanos Honor Has Failed of Positive Results.

[Special Dispatch to the Morning Journal] Santa Rosa, N. M., Sept. 25.—The long and arduous search for a clue which will bring to justice the brute who murdered and murdered Mrs. Sarah Hatton between here and her home at Los Tanos has so far failed of results. Barred, but not discouraged, the effort will be kept up by the citizens and authorities until every last possible clue to the fiend has been run to earth. As an indication of the state of feeling which still exists, dozens of Santa Rosa have offered a reward of a thousand dollars for the finding of the murderer. The mystery deepens with each succeeding day, but it is believed that the guilty person cannot escape the prolonged and constant vigilance of the citizens and authorities.

The most careful watch will be continued in all quarters and it is tentatively hoped that a ray of light will penetrate the dark mystery before many days and bring to punishment the human monster who committed the most unendurable crime in the history of this section.

BOARD OF PHARMACY IN THIS CITY OCTOBER 13

[Special Dispatch to the Morning Journal] Santa Fe, N. M., Sept. 25.—The Territorial Board of Pharmacy will meet in Albuquerque October 12, during the fair, according to present arrangements. The board will previously examine candidates for registration, October 7 and 8, and in October 10 and 11, according to the schedule.

Under the supervision of M. Martinez, president, the board will receive applications for registration and examine candidates for registration. The board will also receive applications for registration and examine candidates for registration.

SCOTT & BOWNE, 409 Pearl St., New York

NEW MEXICO SOON TO BE GREAT COPPER PRODUCER

GREAT GRANT COUNTY DISTRICT TO DO THE WORK

Experienced Copper Operator from Michigan Declares Burro Mountain County Will Astonish the World.

Judge Norman W. Haire of Houghton, Mich., arrived in Albuquerque last night and spent several hours here, leaving at midnight for Silver City, in company with J. E. Salm, who is associated with him in the Mangus Development company, which has just taken over an important group of claims in the Burro Mountain district. The Mangus has not yet been incorporated, but the incorporation will be completed today in Silver City when the papers will be drawn incorporating the company, with 100,000 shares at par value of \$5 each.

The stock of the company is already subscribed by Michigan capitalists who are associated with Judge Haire and Mr. Salm in the enterprise, and Judge Haire will be the president and the active manager of the property. He is one of the most experienced copper men in the country and has managed such famous properties as the Tamarack, Isle Royal and Onondaga.

It is not possible to promise things from under the ground, said Judge Haire last night. "We cannot say that we are going to have a great copper producer in the Mangus, but we believe we are. The property is well located, in a district which will undoubtedly soon become one of the great copper producing sections of the world, and we have every faith in the property. We will be able to say more of our own property in a short time. In the meantime there can be no question as to the future of the district. I shall be surprised if within the next three or four years New Mexico does not take rank with the rest of the copper producing states."

New Mexico is going to get started next year," continued Judge Haire. "Sentiment in the east has changed toward this territory. Its claims are now recognized as just and I have no doubt that the territory will be admitted at the next session of congress."

"I shall be surprised," said Mr. Salm last night, "if New Mexico does not have a copper production of 100,000,000 pounds a year within the next four years. There are three great properties in Grant county which alone will give the territory rank as a copper producer. Few people realize the great extent of work which has been done. The Santa Rita copper company has no less than a million tons of ore blocked out."

"The Mangus has at least four million tons of ore blocked out and there is a single body of ore 800 feet wide by 1,500 feet long which is not less than 200 feet thick. The Burro Mountain has five million tons of ore blocked out and has done no less than 20,000 feet of underground workings. Seventy-five million pounds a year is a conservative estimate of the production of this district within four or five years and 100,000,000 pounds is not excessive."

BOTH BOYS SAVED.
Luis Lopez, a leading merchant of New Mexico, writes: "Three bottles of Foley's Honey and Tar absolutely cured my boy of a severe cough, and a neighbor's boy, who was so ill with a cold that the doctors gave him up, was cured by taking Foley's Honey and Tar." Nothing else is so safe and certain in results. J. H. O'Reilly & Co.

Texas pretends to be a prohibition state, but a man down there breaks down and gives to this Joe Healey for president—Hottelbrook Angus.

Mr. F. G. Fritz, Oneonta, N. Y., writes: "My little girl was greatly benefited by taking Foley's Cherry Lozette, and I think it is the best remedy for constipation and liver trouble." Foley's Cherry Lozette is mild, pleasant and effective, and cures habitual constipation. J. H. O'Reilly & Co.

NATIONAL MOHAIR MEN ORGANIZE AT SILVER CITY

CENTRAL WAREHOUSE TO BE ESTABLISHED SOON

Ninety Day Prisoner Wounded in Hip by Officer in Desperate Attempt to Make Escape.

[Special Correspondence to Morning Journal] Silver City, N. M., Sept. 25.—An important step in the mohair industry of the west was taken in this city this week with the organization of the National Mohair Growers' association, which is planned to include all the mohair growers in the country. The main objects of the organization are the establishing of a central warehouse and selling agency for the marketing of the American clip of mohair. The forming of this organization will mean much to the development of the industry in New Mexico where the raising of mohair goats has already assumed large dimensions.

The following officers were elected: President, T. S. Grant, Dallas, Texas; 1st vice president, J. E. McCarthy, Dublin, Texas; 2nd vice president, W. C. Bailey, San Jose, California; 3rd vice president, W. R. Lockwood, Lake Valley, N. M.; 4th vice president, O. E. Webster, Thatcher, Ariz.

Finance committee: Wm. Riddle, Monmouth, Ore.; F. O. Landrum, Laguna, Texas; and W. R. Lockwood, Lake Valley, N. M.
Executive board: T. S. Grant, Dallas, Ore.; J. E. McCarthy, Dublin, Texas; Wm. Riddle, Monmouth, Ore.; J. J. Ford, Sonoma, Texas; W. W. Wright, Los Banos, Cal.; Johnathan Robertson, Del Rio, Texas; W. C. Bailey, San Jose, Cal.; Chas. Schreiner, Kerrville, Texas; O. E. Webster, Thatcher, Ariz.; J. P. Landrum, Laguna, Texas; J. B. Harbette, Globe, Ariz.; J. D. Peterson, Rock Springs, Tex.; J. E. Holder, Dunsmuir, Ariz.; W. R. Lockwood, Lake Valley, N. M.; Geo. M. Bishop, Kansas City, Mo.; W. A. Heather, Silver City, N. M.; N. A. Gwin, Lawrence, Kan.; Aubrey Gibb, Carlsbad, N. M.; and S. O. Baker, Silver City, N. M.
A meeting of the executive board will be held at San Antonio, Texas, November 25th, at which time the location of the central warehouse will be decided, and other matters of importance discussed, relative to the marketing of mohair, a full report of which will be published later.

Any further information, copy of the by-laws, etc., can be secured by addressing S. O. Baker, secretary-treasurer, National Mohair Growers' association, Silver City, N. M., or any member of the board.

PRISONER WOUNDED IN ATTEMPTED GET-AWAY

William Harris, a colored prisoner in the county jail serving a ninety-day sentence for trespassing on railroad property and delaying trains at Lordsburg, was painfully wounded in the hip by Deputy Sheriff E. D. Nixon while Harris was making a desperate break for liberty.

Harris got a start while the officers were being turned and ran clear to the outskirts of the city with Nixon in pursuit and firing as he ran. After half a dozen ineffectual shots and just as the prisoner was about to reach the shelter of the hills, Nixon stopped him with a bullet in the hip.

C. R. Klinger, the Jeweler, 1666 Virginia Ave., Indianapolis, Ind., writes: "I was so weak from kidney trouble that I could hardly walk a hundred feet. Four bottles of Foley's Kidney Remedy cleared my complexion, cured my backache and the irregularities disappeared, and I can now attend to business every day and receive commendation from my friends for all my efforts, as it cured me after the doctors and other remedies had failed." J. H. O'Reilly & Co.

Fall colds are quickly cured by Foley's Honey and Tar, the great throat and lung remedy. The genuine contains no harmful drugs. J. H. O'Reilly.

Work in the Kober building on Mon-
 day, October 4.

C. V. Plant has returned to Albu-
 querque after a three months' visit
 in Los Angeles.

Miss Clara H. Olsen, secretary to
 Governor Curry, arrived in Albuquer-
 que last night for a brief visit.

Miss Lydia E. Lippitt, of Los An-
 geles, arrived yesterday for an extend-
 ed visit with her sister, Mrs. Coral P.
 Roberts.

Miss Millie Selfert, of Detroit, Mich.,
 has arrived in the city for a several
 weeks' visit with Mr. and Mrs. Julian
 J. Stegkall, 349 North Fourth street.

Miss Catherine Smith, of El Paso,
 left last night for her home after a
 week-end visit in Albuquerque, the guest
 of Mr. and Mrs. John Baird of South
 Fifth street.

E. H. Kramer, formerly in the
 shoe department of Bonawille's, has
 accepted a position with the new Pratt
 shoe company, which opens for busi-
 ness soon in the new Simon Stern
 building.

Dinner service will be held in Tom-
 pkins Albert this evening, as usual, com-
 mencing at 7:45. Ralph Chapman will
 officiate and preach. Everybody will
 be welcome.

A special train carrying a num-
 ber of delegates en route to the En-
 dersons' National convention, will
 arrive in Albuquerque, October 12,
 en route from the Pacific coast to
 the east.

Mr. Olive Harrington, who has
 made her home in Albuquerque for
 the past year, left last night for Bel-
 ton, from which place she will go to
 the ranch home of Mr. Earl for an
 extended visit.

E. H. Paul, auditor of the New
 Mexican Central railroad, with head-
 quarters in Santa Fe, is here on a
 brief visit. Mr. Paul recently returned
 from an eastern trip.

Mrs. Mabel M. Gahan left last night
 for her home in Los Angeles, after visit-
 ing for several weeks with her par-
 ents, Mr. and Mrs. P. H. Thompson, of
 412 West Pacific avenue. Mrs. Gahan
 was accompanied by her son, Cyril.

A small blaze in an outbuilding in
 the rear of H. E. Fox's residence at
 Twelfth and Tenth street, caused out-
 break of fire in the morning. The fire
 was extinguished by the fire company
 shortly before midnight last night.
 The fire was extinguished with but
 small loss.

William White, of the Bank of Com-
 merce, and Vincent Winkler, of Tron-
 ter & Hawking, left yesterday noon
 for San Francisco, Seattle, Tacoma
 and other north Pacific cities. They
 expect to be absent from Albuquerque
 about four weeks.

There will be a regular meeting of
 Adlai chapter, No. 2, Order of the
 Eastern Star, at Masonic Temple this
 evening at 8. The Grand Worthy Mat-
 ron is to be present, and all members
 are urged to attend. By order of the
 W. M. Nora Putnam, secretary.

Louis C. Gumbiner entertained a
 few friends at a star party last evening
 at his home, 224 North Seventh
 street. An appetizing lunch was serv-
 ed. Music, both vocal and instrumen-
 tal, and other forms of entertainment
 resulted in making the party a very
 pleasant and enjoyable affair.

"Barrows Method of Teaching" will
 be demonstrated by Mrs. Stewart with
 her kindergarten class at the regular
 meeting of the Women's club this
 afternoon, following an hour or so of
 business, which is to be transacted.

One of the brightest features of
 the position today, especially to Aus-
 tralians, is the knowledge that trade
 in the United States is back to normal,
 with a prospect of further expansion.

Wool is still badly wanted in that
 country, where over 1200 woolen mills
 are busy, and most of them very large
 mills at that, and as Australia is the
 main source of the American de-
 mand, and will have a splendid clip
 to put before buyers during the com-
 ing year, with from 75 to 80 per cent,
 of the total Australasian clip available
 here, it seems probable that the Ameri-
 can market for wool is expanding.

There is a prospect of further expan-
 sion. Wool is still badly wanted in that
 country, where over 1200 woolen mills
 are busy, and most of them very large
 mills at that, and as Australia is the

UNCLE SAM BIGGEST 3000 PEOPLE WILL WOOL CONSUMER EAT MELONS AT IN THE WORLD FORT SUMNER

Australians Cheered by Fact That Trade in United States Is Back to Normal; Annual Wool Review.

Under date of August 1, 1909, Com-
 mander General John P. Bray, of Sydney,
 transmits a copy of Dalgety's Annual
 Wool Review for Australasia, for 1908
 and 1909, from which the following
 statistics relative to the United States
 are taken:

"The United States of America, with
 a wealthy population of nearly 90,-
 000,000, is now the largest wool-con-
 suming country in the world. It is
 claimed that the wools earned in
 North America are double those in
 Great Britain, two and a half times
 greater than in France, and three
 times what they are in Germany. For-
 tunately for Australia the heavy im-
 port duties levied upon wool, though
 enabling the United States flock mas-
 ters to obtain more for their domes-
 tic clip than it is intrinsically worth,
 have not resulted in any material in-
 crease in the locally (American)
 grown wool, which in 1904 amounted
 to 291,783,022 pounds and in 1908 to
 311,138,321 pounds.

"Of the wool imported into the United
 States from the United Kingdom
 the major portion is grown in that
 country, for the American buyers have
 long ago made Australasia their di-
 rect source of supply for class 1 wool.
 For instance, during the year 1908
 the total purchases of Australasian
 wool in London for the United States
 amounted to 449,069 bales, where-
 as during that year they secured 119,-
 300 bales in the Australasian mar-
 ket. The imports of the United States
 from the River Plate during the same
 period amounted to 28,000 bales. The
 total imports of class 1 wools into the
 United States during the last five
 years were as follows, in pounds: 1904,
 45,775,992; 1905, 169,388,258; 1906,
 268,819,267; 1907, 32,962,116; 1908, 45,-
 789,392.

"It will be seen that during 1908
 the United States took but little more
 than half the average quantity of class
 1 wools that she had been accustomed
 to take during the four preceding
 years, on account of the financial crisis.
 This great nation finished the
 year 1908 in comparative prosperity
 and at the time of writing is again
 enjoying a period of good trade.

"All things considered, then, it is
 not surprising that before the past
 selling season in Australasia had pro-
 ceeded far the strong United States
 demand, which gave such a flip to
 the auctions, asserted itself.

"The past clip contained such a
 small proportion of superwool that the
 Americans were forced to operate
 with wools which in ordinary years
 they would have rejected. They
 were not able to secure anything like
 the quantity which they were in a po-
 sition to buy, consequently the de-
 mand on United States account has
 continued unabated until the present
 time, as has been evidenced by their
 purchases at the big Brisbane sale
 less than a month ago, and also by
 their operations at the last London
 series, when they took 23,000 bales, as
 compared with 6000 in 1908, 5000 in
 1907, and 2000 in 1906. Figures are
 too hard which disclose the fact that
 during the nine months ended on
 March 31, 1909, the imports of class 1
 wool into the United States amounted
 to 85,272,181 pounds, as compared
 with 25,746,725 pounds for the cor-
 responding period of the previous year.
 Notwithstanding these heavy im-
 ports, dealers and manufacturers
 were so keen to get hold of the do-
 mestic clip that they contracted for it
 on sheep backs months before it was
 ready to be shorn.

"One of the brightest features of
 the position today, especially to Aus-
 tralians, is the knowledge that trade
 in the United States is back to normal,
 with a prospect of further expansion.
 Wool is still badly wanted in that
 country, where over 1200 woolen mills
 are busy, and most of them very large
 mills at that, and as Australia is the
 main source of the American de-
 mand, and will have a splendid clip
 to put before buyers during the com-
 ing year, with from 75 to 80 per cent,
 of the total Australasian clip available
 here, it seems probable that the Ameri-
 can market for wool is expanding.

"There is a prospect of further expan-
 sion. Wool is still badly wanted in that
