## Taft to Visit Alaska Next Summer

PROMISES TO LOOK INTO NEEDS OF TERRITORY.

President an Interested Visitor at Live Stock Department of Seattle Exposition Says Panama Canal Will Open in 1915.

(By Morning Journal Special Leased Wire) Tacoma, Oct. 1.—After spending two days in and around Seattle, President Taft came to Tacoma tonight and received from an audience that filled the big armory, one of the most cordial greetings of his trip. The president was entertained at dinner at the Union club, after making the trip from Seattle on board the yacht El Primo, owned by Chester Elmer. The torpedo boat destroyer Perry escorted the yacht.

Before leaving Seattle, the president paid a last visit to the exposition to view the big live stock exhibit. All the prize cattle, horses, hogs and sheep were on view, their heads and horns decorated with blue ribbons. Mr. Taft apparently found great interest in the exhibit and spent more than twice the length of time originally allotted to it. He asked many questions of the breeders.

From the exposition grounds the president motored to the Seattle Country club, where he took luncheon and spent the early afternoon on the golf links. The sail on the sound from Seattle to Tacoma occupied two hours.

President Taft promised today to attend another exposition on the Pacific coast, in 1915, in celebration of the completion of the Panama canal. Mr. Taft said today this was beyond his term of office, but that his interest in the Panama canal and in the extension of trade on the Pacific had been so great that he readily gave his promise to attend.

The invitation was extended by Colonel D. C. Collier, director general of the Panama-California exposition, which is to be held in San Diego, Cal. President Taft's unqualified statement in his speech delivered here that the Panama canal would be completed in 1915 aroused great enthusiasm as the entire Pacific coast is expecting to profit greatly by the short all-water route from the eastern seaboard and the opening of European markets to this section. All South and Central American countries, especially those of the west coast, are to be invited to take a part in the Panama exposition.

When the president left here at midnight and headed south, he had completed 5,000 of his 13,500-mile journey. His journey was less than one-third completed.

In the time he has been "on the road," the president has made eight speeches of first importance, which have clearly set forth his views on nearly every question of importance. He announced tonight that he had completed the list of set addresses which he had planned before leaving the remainder of his trip will be entirely extemporaneous and will consist largely of reference to and amplification of those he already has made.

The president's outspoken opposition to self-government for Alaska unquestionably created something of a sensation on the heels of the dispatch of a monster petition from Alaska asking his support in favor of home rule in that territory. The speech has been widely discussed and has attracted greater interest in Alaska than any announcement that he would personally visit Alaska next year to see conditions for himself. It is understood that the president will make no specific recommendations to congress for legislation affecting the territory until after his visit. The president has taken particular pains to let it be known that he feels the people there have been somewhat neglected in the past. His position in favor of government help in building railroads to help open up the vast area of territory has been received with enthusiasm.

The president will arrive at Portland at 7 o'clock tomorrow morning, and after spending two days there, will continue his journey to the southward.

The turn toward the east will be made at Los Angeles the night of October 12.

## CHILDREN SAVED FROM BURNING ORPHANAGE

Wheeling, W. Va., Oct. 1.—The children narrowly escaped. Although Belmont county, Ohio, was partially destroyed by fire today and many children narrowly escaped. Although belmed in on three sides all were rescued by Miss Grace Green, a nurse.

Deposed Shah Goes Into Exile. St. Petersburg, Oct. 1.—Mohammed Ali Mirza, the deposed shah of Persia, sailed from Anzali, on the Caspian sea, yesterday, on his way to exile in Russia. He will be taken to Odessa. His movements are being kept as secret as possible, as the caucuses are swarming with Persian revolutionists and attempts at assassination are feared.

## CLYDE FITCH BURIED AT WOODLAWN CEMETERY.

New York, Oct. 1.—Clyde Fitch, playwright, was buried today in Woodlawn cemetery. Funeral services at the church of the Ascension were attended by one of the largest gatherings of actors and literary and theatrical people that ever met in this city. The church was filled with flowers.

The honorary pallbearers included John Drew, John W. Alexander, E. H. Basfield, William de Chase, John Corbin, E. A. Ditmar, Daniel Frohman, Tod Gallooly, Robert Herrick, Matthew Luce, Brander Matthews and Dr. Perry Turner, all men of wide reputation in the theatrical literary and artistic world.

September Treasury Receipts. Washington, Oct. 1.—A total of \$52,347,659 in ordinary receipts for the month of September and \$22,845,442 in ordinary disbursements for the month were announced by the treasury department today. This makes ordinary disbursements so far this fiscal year beginning July 1, exceed the receipts by \$21,134,112 against \$29,620,374 for the same period last year.

## UGLY TRAGEDY ON MOJAVE DESERT

INDIAN ELOPER, PURSUED, SLAYS HIS SWEETHEART

Body of Unfortunate Girl Found at Waterhole Dead from Bullet Fired by Desperate Lover; Murderer Escapes.

(By Morning Journal Special Leased Wire) San Bernardino, Cal., Oct. 1.—Developments today in the chase across the deserts of San Bernardino county after "Willie Boy," a "bad" Plute Indian, form as thrilling a chapter in the story of desert life as ever written into a "dime novel."

"Willie Boy" murdered in cold blood his 14-year-old sweetheart, whom he carried away from the home of her father at Banning, four days ago, after he had killed her father, Old Honeyface, a reservation Indian, whom the latter refused to let his daughter run away with the young Plute. "Willie Boy" of desperado led by Sheriff Wilson, with five Indian trackers to guide them across the wide stretches of desert and through the tortuous mountain passes, came at daylight today on the body of the girl at The Pipes, a waterhole, fifty-five miles away, two hours after she was shot.

There was a bullet hole through the girl's heart and her body was cruelly torn by the thorns and rocks and her feet billeted and cut from the long and hurried flight over mountain and desert.

Footprints around where the body lay told something of the desert tragedy. Indian trackers were able to tell that "Willie Boy" had partly carried and partly dragged the girl there after she was no longer able to walk by his side. He had gone on a little way without her and then came back and shot her rather than let her fall into the hands of his friends alive.

For three days and nights the Indian and the girl had kept ahead of their pursuers, the Indian showing all the cunning of his race in the contest with the sheriff and his posse. "Willie Boy" is believed now to have made his escape to the Arizona border. The Indian trackers returned to the reservation at Banning, bringing the body of the girl.

Three officers and two Indian trackers left today for Daguerre, hoping to head off the Indian or pick up his trail.

## LIPTON COMING TO CHALLENGE FOR CUP.

New York, Oct. 1.—Joseph Garrettson, managing editor of the Cincinnati Times-Star, among the passengers to arrive on the Mauretania last night, brought word from Sir Thomas Lipton that he would sail from England for New York on October 5, to make a tour of the country and to issue a challenge to the New York Yacht club.

Referring to his plans, Sir Thomas said: "I will race for the cup if I am permitted to do so on even terms. But I will not engage to sail a marine freak across the ocean to compete against a skimming ship."

When the Skimmer crossed the ocean, she came within an ace of sinking with all hands, and I shall never ask another man to subject his life to such useless risks."

Sir Thomas further said that he hoped the New York Yacht club would permit a race under conditions he would suggest.

August Customs Statistics. Washington, Oct. 1.—According to a statement made public today by the bureau of statistics of the department of commerce and labor, August imports amounted to \$117,181,189, those of August, 1908, being valued at \$91,182,526. Exports for August were valued at \$109,619,227; for August, 1908, \$119,143,955.

## PEARY HAILED AS HERO IN NEW YORK

PROGRESS UP HUDSON CONTINUOUS OVATION

American and Foreign Warships Dip Colors as Good Ship Roosevelt Steams Majestically Past Cheering Line.

(By Morning Journal Special Leased Wire) New York, Oct. 1.—New York city and state today gave Commander Robert E. Peary a welcome homecoming such as few returning heroes can hope to receive. From the bridge of his Arctic ship, Roosevelt, Commander Peary was the most prominent feature of the sixty-mile Hudson-Fulton naval parade, from New York to Newburg.

Captain Bartlett was kept at work so incessantly with the whistle cord, answering salutes of passing craft, that Chief Engineer Wardwell came up from the engine room that he would not have steam enough to move the vessel if they did not stop the whistle.

Having successfully buffeted the ice packs of Smith's sound and proven herself so stout a ship that no sea or ice could turn her back, the Roosevelt met with an accident in the most tranquil part of the Hudson just below West Point, this afternoon. She parted her port tiller rope and came to a stop. The mishap was quickly discovered by Commander Peary and anchor was dropped while the rope was spliced.

But there was a delay of nearly an hour before the boat proceeded toward Newburg.

"It has been most gratifying to have taken part in the parade," said Commander Peary tonight, "and I am deeply appreciative of the reception which has been given to the officers and crew of the Roosevelt and myself. It was magnificent."

At Newport, N. H., on his big steam yacht Corsair, with a party of friends, gave Commander Peary and the Roosevelt a graceful greeting, at Stony Point.

The Roosevelt dropped anchor near the United States militia of about 100 men, and the Roosevelt and the boats of Newburg in the evening. The hundreds of the hour did not diminish the noisy greeting from vessels there. Commander Peary and party boarded a tug and went ashore at Stony Point, where they took a train for New York.

Peary declined to talk about the Cook controversy except to say that General Hubbard would issue a statement on the subject early next week. Commander Peary had scarcely mentioned the bridge of the Roosevelt today and headed her upstream when the long and foreign and American battleships at anchor dipping their colors as the Roosevelt passed.

The Roosevelt moved slowly up stream with crowds on passing excursion boats swarming to the rail and cheered. Hands on the pleasure craft played patriotic music, while one excursion boat, crowded with people from Brooklyn, where Dr. Cook lives, gave Peary rousing cheers.

## SCENE OF CELEBRATION MOVES UP THE RIVER

Newburg, N. Y., Oct. 1.—With the Half Moon and Clermont swinging at anchor off shore tonight against a background of illuminated warships and fireworks, Newburg rounded out one of the greatest days in her history.

The vessels which have played so prominent a part in Hudson-Fulton week were formally turned over today to the keeping of the celebration's "upper Hudson commission" by General Stewart L. Woodford, president of the lower Hudson commission. Mayor Benjamin McClung welcomed the distinguished guests to Newburg and Governor Hughes paid his tribute in a brief address.

Leutenant Lam, impersonator of Henry Hudson, Charles S. Bullock, the Robert Fulton of the present Clermont, and representatives of the Netherlands were also introduced in the brief ceremony at the pier.

The steamer Trojan, carrying members of the legislature and state officials, was the first of the big river boats to appear. She was followed by the Robert Fulton, bearing Governor

## FOREIGN FLEET HEADED FOR SAN FRANCISCO.

Honolulu, Oct. 1.—The British, German and Dutch cruisers Bedford, Marlborough and Noord Barabant, respectively, will leave next week for San Francisco, where they will participate in the celebration of the discovery of San Francisco by Gaspar de Pantoja. It is believed here that the Japanese cruiser Idzumi, which has already left Yokohama, has some direct.

Anti-Asiatic Resolution Rejected. Chicago, Oct. 1.—Delegates to the National Women's Trade Union league voted down tonight a resolution demanding that Japan and all Asiatic races be excluded from the United States.

guests. They were greeted by Mayor McClung and former Governor Odell and were escorted by a detail of mounted troopers to the pier, where the formal transfer of the Half Moon and Clermont took place.

Besides the Clermont lay the Norwich of Roundout, N. Y., the "oldest steamer in the world," which for seventy-six years has been in active service. With her low hull no higher above the water than a shingle and her "saw-plate" engine, she presented a figure but little less curious than her prototype.

The parade was similar to the one in New York yesterday. The sailors and marines of the United States scout and armored cruisers received a great ovation.

It was not until after the second division of the parade had passed the reviewing stand that the Roosevelt, Commander Peary's Arctic exploration ship, appeared far down the river with a tug alongside. She had been delayed by a mishap but finally reached an anchorage not far from where the Clermont and Half Moon were lying.

Tomorrow the Half Moon and Clermont, with their naval escort, will weigh anchor for Poughkeepsie, where another day of celebration awaits them on Monday.

## COOK DECLINES CHALLENGE TO PROVE CLAIMS

Brooklyn Explorer Turns Down Invitation to Submit Records and Data of Dash to Pole to American Scientists.

RESOLVED TO LET DANES DECIDE CONTROVERSY

Commander Peary's Ready Acceptance of Plan Had Led to Hope of Early Settlement of Polar Dispute.

(By Morning Journal Special Leased Wire) New York, Oct. 1.—Dr. Cook's refusal to submit his observations, notes and other data at once to a competent scientific commission is all that stands in the way of compliance with the suggestion of the National Geographic society today that such a step—on the part of both Cook and Peary—should precede any official recognition of the explorer's claims.

Correspondence made public here tonight shows that Commander Peary has already formally signified his willingness to comply with the condition, but Dr. Cook, in a letter to Archer Huntington, president of the American Geographical society, has declared that he will continue in his determination to lay all his records and instruments first before the University of Copenhagen.

Professor I. A. Rasmussen, president of the Johns Hopkins university, was asked several days ago by Henry F. Osborn, president of the American Museum of Natural History, and by Mr. Huntington, to appoint a committee of astronomers, geographers and zoologists, to whom the records of Peary and Cook should be submitted.

Dr. Rasmussen, in reply, telegraphed as follows: "It would be idle for me to appoint a committee to investigate the North pole problem unless it were clearly understood that Commander Peary and Dr. Cook are willing to submit their evidence to such a committee. If they are willing to do so, I shall not hesitate to appoint such a committee as you suggest."

Mr. Osborn at once took steps to obtain the consent of Peary and Cook. He received the following dispatch from General Thomas H. Hubbard, on behalf of Commander Peary:

"Peary willing and desirous to submit all his records and data to National Academy committee or other scientists impartially selected."

Dr. Cook at first fell in with the suggestion. He agreed with Mr. Huntington that there would be no better person to call together a number of scientists than Professor Rasmussen, but later reconsidered and sent the following to Mr. Huntington:

"In pondering over the problems which you were kind enough to present to me yesterday it appears to me an injustice to the Danes to consent to the appointment of another board of examiners after I had definitely agreed to submit my material first to the University of Copenhagen."

"I therefore ask you, and following the Danish custom, to have the records we sent to the geographical societies of the world, after which it becomes public property. I appreciate the good offices of the American Geographical society, the friendly attitude of its president and its members and will promise that they will have an early opportunity to go over the entire data of my polar campaign."

## FRIENDS RALLY TO FORESTER'S SUPPORT

MINING CONGRESS NOT LOOKING FOR TROUBLE

Delegates Decide That Hostility to Men Whose Support They Seek is Not Best Method Gaining Ends.

(By Morning Journal Special Leased Wire) Goldfield, Nev., Oct. 1.—The American Mining congress, in the closing hours of its convention here today refused to adopt the report of its forestry commission, which asked for an emphatic condemnation of the practices of the forestry service of the United States government.

The censure by inference of Chief Forester Gifford Pinchot thus was forestalled.

The defeat of the movement, which threatened to cause the adoption of the committee report was accomplished only by the personal exertions of Judge J. H. Richards of Idaho, retiring president of the congress. Judge Richards threw into the balance all his personal popularity and influence, even to resigning the chair and addressing the delegates from the floor when his effort to defeat the committee report by resolution had seemed to fail. His address was a cool survey of the inconsistencies of the report, which had immediate effect upon the delegates. He was seconded by M. E. Johnson of Idaho, Nevada, who protested against the effort to "throw salt in the face of the government from which you are seeking aid." The motion to adopt the report was withdrawn under the pressure brought to bear by Oscar Smith of Idaho, chairman of a state subcommittee on forestry, who was the leader of the opposition to Pinchot.

The matter was brought up this morning when Chairman Smith's report was read. The response of W. W. Dear of Washington, D. C., who appeared as the personal representative of the forestry service, did much to smooth out affairs.

The session closed with an address by J. Ross Smith, president of the mining congress, on the progress of mining development.

Illustrated lectures on important mining subjects and receptions to delegates occupied the night session. With the report of the resolutions committee, tomorrow, the convention will close.

## MINING MAN'S INTEREST IN LAND CLASSIFICATION

George Otis Smith, director of the United States geological survey, delivered an interesting address on the "Mining Man's Interest in Land Classification" at the afternoon session, which was listened to with marked attention by the delegates. Mr. Smith said, in part:

"In the complex civilization of today no industry stands alone. Because he has to sell an output the mining man has a real interest in the prosperity of his neighbor, and good crops and the farmer's activity in reaping his buildings has steadied the demand for that metal which is a mine. Mining development depends largely upon the availability of the fuel, timber and water supply than upon the adequacy of ore deposits. In a word, the future of the mining industry will be controlled by the utilization of all resources."

"The classification of the public lands was authorized by congress in 1879 and the work was specifically assigned to the geological survey, which was also entrusted with the investigation of the mineral resources of the country. The relation of land classification to the mining industry appears to have been uppermost in the minds of those active in the creation of the survey. Land classification work as now prosecuted serves two important ends, one administrative, the other legislative, and I am convinced that both were contemplated by congress at the time of the creation of the survey."

"The work of the survey since 1880 on the public land has been constant. It has been a contribution to land classification. The government coal lands are now valued on an estimated tonnage basis, the price ranging from 15¢ to 25¢ a ton, which, however, averages less than one-tenth the actual value paid in the west. As the coal lands are now administered, the honest coal entrepreneur need no longer fear the unfair competition of his less scrupulous neighbor who enters 100 acres of coal land as a homestead. The present policy is the square deal to both coal land purchasers and fuel users, and indeed to operators and consumers not only of this year and decade but also of the next century."

"In the western oil fields the classification work by the survey has resulted in protecting the oil man from the agricultural claimant and with a better law the reports of the survey geologists would also protect the oil prospector from the claims of the agribusiness man."

"The public land problem embraces first, the determination of the best use to which the public domain can be put, and second, the disposition or reservation of the land now belonging to the nation so as to assure that no principle is more fundamental to real conservation and at the same time more beneficial to the mining industry than this of giving preference to the nation."

Suicide Leaps From Bridge. New York, Oct. 1.—In sight of several thousand persons assembled to view the Hudson-Fulton naval parade today, John H. Bell, killed himself by leaping from the top of the Riverside drive viaduct, 100 feet high.

## SOLDIERS SUCCUMB UNDER FORCED MARCH

Cincinnati, Oct. 1.—While 500 men of the Second infantry, U. S. A., were returning to Fort Thomas, Ky., today, on a forced march of 42 miles from Fort Perry, Ohio, many dropped in the ranks from sheer exhaustion.

Lieutenant C. W. Dawes, surgeon of the regiment, faintly and fell from his horse. He is said to be suffering from appendicitis.

One army ambulance, over-crowded with disabled men, broke down in the city limits.

The regiment, under command of Colonel Mansfield, made the forced march under orders from the war department.

## BRYAN SCORED BY SENATOR BAILEY

Peerless One Told to Work in Nebraska Where Converts are Needed to Secure Democratic Delegation in Congress

(By Morning Journal Special Leased Wire) Port Worth, Texas, Oct. 1.—United States Senator J. W. Bailey, replying to recent tariff declarations of William Bryan, told Mr. Bryan to look to his own assertions in his address at El Paso.

Mr. Bailey denied assertions concerning the Nebraska which Mr. Bryan had made in a recent speech at Dallas and which brought forth a heated retort from Mr. Bryan in his El Paso address.

Mr. Bailey declared Mr. Bryan asserted that the only real reform attempted in the tariff was while democratic quarreled among themselves to protection of the industries in their respective districts. Mr. Bailey described this as a "terrible indictment of the democratic party," and said it would be used by republican speakers in the next campaign.

The senator declared the indictment "almost mendacious," and said that with a single exception (Senator McKernan of Louisiana) every democrat in the senate had voted for lower duties than were proposed in the republican bill which Senator Bryan, of Iowa, declared "bad as it was, better than any bill the democrats could make." He maintained that equal distribution of government burdens and declared he would not vote to take the tax off that which the manufacturer pays, while taxing that which the manufacturer sells, but he would vote to reduce that tax to a revenue basis which he declared to be the doctrine of true democracy.

In answer to Mr. Bryan's declaration that he was seeking the election of a democratic congress, the senator asked why he came to Texas, where the delegation to congress is solidly democratic, and advised him to go to Nebraska and exert his influence.

Mr. Pinchot said he had never seen the forests in a more satisfactory condition. The personnel of the service is at a high standard and the district plan of organization in operation since December last is in admirable condition.

Mr. Pinchot said the recent trip of Secretary Wilson through the west had had an admirable effect in fostering conservation sentiment.

"Have you anything to say on the question of conservation?" Mr. Pinchot was asked.

"Yes, I have," he replied. "I wish to announce that I have come back to continue my work in conservation and forestry without change in either policy."

Mr. Pinchot will remain here for a few days, when he will go to St. Louis to meet President Taft and accompany him on his river trip to New Orleans.

## CHAPTER OF ACCIDENTS ON PENNSYLVANIA LINES

Youngstown, O., Oct. 1.—While entering Youngstown under full steam, a Pennsylvania passenger train was struck by a train of cars backed out of a local steel plant tonight, the collision separating the passenger train from the freight train. Fireman, Kent Stafford and engineer Collins were injured.

For two miles the engine ran wild through the city. Near the Carnegie steel company it struck a switch engine, knocking it off the track. The engine engine was seriously injured, an ambulance being driven rapidly to the scene of the wreck, spilling the doctors out on the street.

## CHEYENNE INDIANS REPORTED RESTLESS.

Cheyenne, Wyo., Oct. 1.—Unusual restlessness among 3,000 Cheyenne Indians on the reservation near Sheridan, noticeable for several days, has caused serious apprehension among white settlers.

While this far there has been no actual outbreak, the redmen have been engaged for four days in the Sun and Willow dances. The government recently distributed \$400 among the Indians, which when indications of restlessness have been apparent.

## WATER POWER TRUST MUST BE CURBED

WILL FURNISH PROBLEM FOR COMING CONGRESS.

Gifford Pinchot Back in Washington, Declares Monopoly Should be Nipped While in Formative Stage.

(By Morning Journal Special Leased Wire) Washington, Oct. 1.—Unquestionably asserting that a monopoly is being formed with the object in view of obtaining possession of the water power sites of the country, Gifford Pinchot, chief forester, who returned today from an extended inspection of the west, declared remedial legislation must be enacted at the coming session of congress if this great natural resource is to be preserved to the people. The problem of how best to prevent the nation's water power sites from being gobbled up by such combinations, Mr. Pinchot predicted, will be one of the biggest issues before congress. The question of how best to prevent a monopoly in that product.

Another big problem confronting congress will be the disposition of vast areas of land lands in the west, principally in Alaska. It is important that congress should take prompt action on this important matter. Mr. Pinchot said, for the protection of the country's natural resources and also to prevent a monopoly in that product.

Any thought as to whether Mr. Pinchot would continue to advocate the policies for which he has fought so hard, was set at rest by him today. As a result of his western tour he is as fully determined as ever to continue his policies regarding the conservation of the country's natural resources and the great national forest reserves. He declared President Taft is thoroughly imbued with the conservation movement, and that the people are more aroused than ever. President Taft, Mr. Pinchot said, has expressed himself in favor of a conservation commission and added that he (Pinchot) was also in accord with the suggestion.

For some time Mr. Pinchot has been discussing the so-called Ballinger-Pinchot controversy over the conservation question. That he has no intention of relinquishing his position as chief forester as the result of that incident was reiterated when he declared emphatically, "I am not going to resign."

After declaring that "there is a water power trust certainly in the process of formation," Mr. Pinchot added:

"In my judgment, the tendency to consolidation now running through all industrial enterprises, will necessarily lead to the consolidation of the water power interests immediately as it has to the consolidation of steel and oil interests. There has got to be legislation on this water power business. President Taft has indicated his intention of asking congress for legislation governing as I understand it, the disposal of water power sites on the public domain, so that the whole water power question naturally will be taken up before congress. The question is, are we going to give these power sites in perpetuity?"

"Is it possible to head off this trust?" Mr. Pinchot was asked.

"The government cannot probably prevent formation of such a monopoly," he replied, "but it can control it."

Mr. Pinchot said he had never seen the forests in a more satisfactory condition. The personnel of the service is at a high standard and the district plan of organization in operation since December last is in admirable condition.

Mr. Pinchot said the recent trip of Secretary Wilson through the west had had an admirable effect in fostering conservation sentiment.

"Have you anything to say on the question of conservation?" Mr. Pinchot was asked.

"Yes, I have," he replied. "I wish to announce that I have come back to continue my work in conservation and forestry without change in either policy."

Mr. Pinchot will remain here for a few days, when he will go to St. Louis to meet President Taft and accompany him on his river trip to New Orleans.

## NO TRACE OF BANK LOOTERS AT GLENWOOD

Glenwood Springs, Colo., Oct. 1.—Local officers failed to find any trace of the robbers who looted the Citizens' National bank Wednesday on this, the second all-day search. It is generally believed tonight that the bandits succeeded in making their escape from this vicinity.

Detectives working on the case today again took biohounds to the spot where Wednesday's clash occurred, hoping that the animals would pick up the scent and give a more definite idea of the direction taken by the two men, but these efforts were futile.

No information has been secured connecting the bank robbers with the recent attempt to rob a Denver & Rio Grande train near Leadville.

Murphy Demands Pleading.

Chicago, Oct. 1.—Charles W. Murphy, president of the Chicago National Baseball club, recently fined \$500 for alleged tampering with a Toronto pitcher, today entered a demand that the national commission open the case. He declared that he was given no chance to defend himself.

## Young at Ninety-One.

The adventures of the "too old at 10" principle have not had things all their own way lately. In fact, old age has developed an unexpected capacity for self-defense, and that not in words—on which youth is too apt to rely—but by deeds. We have the case of Sir John Graham, now in his seventieth year, who is showing his colleagues in the law courts that the only way to reduce errors is by working on them. Lord Malsbury, again, does marvelous things at ninety-one, while, in crown and Lord Wrenbury yesterday celebrated his ninety-first birthday, after sixty-eight years of more or less strenuous parliamentary life, by taking a walk on Hampstead Heath.

The three instances we have quoted are all of hard-working men, whose energy, although great, has been concentrated. They have not desisted from their work in a multitude of interests, nor have their energies been expended in violent exercises, whether physical or mental. Probably they all feel as young today as many "under forty" are. As a matter of fact, of course, a mere counting of years is no guide at all to a man's real age. What he will be like at any, seventy, depends entirely upon how he has spent his life until then. The best signposts on the road are moderation, not only in drink, but in all things—moderation in a healthy mind and a settled interest in life. Armed with these and a good constitution, there are few who might not be as young at ninety-one as Lord Wrenbury. —London Express.

## THE STROBEL AIRSHIP IS A REAL SHIP OF THE AIR THAT FLIES

It has taken all the big money at half a dozen national and international expositions and is the most famous dirigible balloon in the history of flying machines. The Strobel Airship will make three to six ascents daily, all during the fair and will afford the people of New Mexico their first chance to see a real airship in operation. TEN THOUSAND DOLLARS in prizes will be given away at the Twenty-Ninth Fair. \$7,500 in purses is hung up for the biggest horse racing tournament ever seen in the southwest. \$1500 in prizes is offered in the great baseball series with teams entered from every part of the southwest. Magnificent silver cups and cash prizes are offered in the cattle and sheep exhibits, which will be the largest on record; big prizes are offered for agricultural and mineral displays; the Southwestern Marathon will be the first long distance endurance race ever run at a New Mexico Fair. Push Ball—the first push ball tournament ever seen in the west, with a six foot ball, will be entered by teams from the Fort Wingate cavalry who will be seen in daily maneuvers, fancy drills and sham battles. Seventy-five automobiles will participate in brilliant pageants. The Trades Displays parade will be a gorgeous feature. Carnival attractions day and night; bronco busting; Indian sports; a score of territorial conventions in session. SOMETHING DOING EVERY MINUTE, SIX SOLID DAYS AND NIGHTS. The railroads have cut the price so that it is cheaper to go than to stay at home.

## IT IS WELL.

It would be much better for New Mexico if Mr. Taft could pass through the territory in the day time but as it is he will see enough to remove any doubt that he is not a meddling man. He will see enough to remove any doubt that he is not a meddling man. He will see enough to remove any doubt that he is not a meddling man.

## AFTER BRYANISM WHAT?

The Springfield, Mass., Republican, which is one of the most careful and conservative journals in the country, regards the disruption of the democratic party as hopeless, and it calls attention to the fact that the efforts of Mr. Bryan have not been sufficient to bring about a reformation of the party. It says that even in Texas he must fight for recognition as the leader of the party. It says that even in Texas he must fight for recognition as the leader of the party. It says that even in Texas he must fight for recognition as the leader of the party.

## THEY COULDN'T HIGH.

Every headless from a battlement of the Breckinridge type, seen in round figures, \$10,000 for the powder and shot and the guns are capable of discharging six rounds per minute. The wear and tear of the gun has been such that at this rate of discharge a 12-inch rifle will be rendered useless by half in four hours. That is to say, the 12-inch rifle, which was most of our big ships, have been retired and not used for more than one hundred discharges. This is due to the erosion of the bore caused by the high velocity of discharge, which cuts away the rifling, so that the projectile leaves the muzzle with no spin of rotation. The consequence is that the projectile is not accurate.

As a consequence, the loss of the projectile fails to remain true to the line of flight of the barrel, and the projectile itself begins to turn and wobble and to wobble the target. The result is that the target of the rifle is supposed to be in the line of the barrel, but the projectile is not in the line of the barrel. The result is that the target of the rifle is supposed to be in the line of the barrel, but the projectile is not in the line of the barrel.

## INJURIES AND DAMAGES.

Some interesting statistics regarding railroad accidents are given in the report of the Interstate Commerce Commission for the year 1908. It shows that the number of accidents involving passenger trains was 1,000, and the number of accidents involving freight trains was 1,500. The total number of accidents was 2,500. The total number of injuries was 10,000, and the total number of deaths was 1,000.

jured were \$21,462,594. The compiler of the statistics makes this comment: Where the gross earnings of the railroads have a little more than doubled in ten years, their payments on account of "injuries to persons" have more than tripled, and on account of "loss and damage" more than quadrupled. The differences in these percentages and the railroads over \$12,000,000 last year, without adding one cent to their earnings of 1908.

The object of the publication of the statistics apparently is to show that the railroads are the victims of a general conspiracy to make them pay out and receive damage claims. And, in exchange, says the report of the Interstate Commerce Commission, values are given to the railroads, which are not given to the public. The railroads are the victims of a general conspiracy to make them pay out and receive damage claims.

## FAMILY CONGRESS.

The 28th annual session of the National Congress will meet in Raleigh, N. C., this session will open Wednesday afternoon, November 3, in the National Hotel. It is the largest gathering of the kind in the history of the country. It is the largest gathering of the kind in the history of the country.

Resolutions will be presented during the first two days of the meeting, and will be referred to the committee without debate. It will facilitate the work of the congress if those introducing resolutions would have them typewritten. As it is not wise to take time in discussing and passing resolutions which merely reaffirm what the congress has already decided, it is suggested that resolutions be introduced which are new and original. It is suggested that resolutions be introduced which are new and original.

## CONTRACT CLOSED FOR PUMPING PLANT ON MIMBRES

Will Mean Much for Prosperity  
of Deming and Surrounding  
Country; Fine Exhibit for El  
Paso Fair.

(Special Correspondence to Morning Journal)  
Deming, N. M., Sept. 29.—A telegram was received here Thursday afternoon from Wichita, Kan., signed by B. P. Shull, to the effect that a contract has been closed for the installation of a central power pumping plant at Deming to irrigate the agricultural lands in the Mimbres valley adjacent to this city. Mr. Shull has been in Wichita for several weeks past handling the negotiations for the deal. The fact that he has been successful will be hailed with widespread enthusiasm here. The building of the plant to furnish cheap power for pumping for irrigation will mean much more rapid development of Deming and the Mimbres valley. Some ten thousand acres will come under the plant for a start.

Deming will have a fine exhibit at the El Paso fair. A special meeting was held Monday night at the Adolph club rooms for that purpose. A large crowd was out and enthusiasm ran high. Arrangements were made for agricultural, horticultural and mineral displays.

Rev. W. E. Foulke, who has been pastor of the M. E. church here for the past four years, was appointed to fill the church at Las Cruces at the conference just closed at El Paso. He is succeeded by Rev. J. R. Goodell.

The Deming lumber company has filed articles of incorporation, with \$25,000 capital.

More Than Enough Is Too Much.  
To maintain health, a man or woman needs just enough food to repair the waste and supply energy and body heat. The habitual consumption of more food than is necessary for these purposes is the prime cause of stomach troubles, rheumatism and disorders of the kidneys. If troubled with indigestion, revise your diet, eat less, and not appetite control and take a few doses of Chamberlain's Stomach and Liver Tablets, and you will soon be all right again. ## BUSY WEEK AHEAD FOR PEOPLE OF CARLSBAD

District Court, Firemen, Editors, Pharmacists, Circus and Baseball Among the Attractions in Pecos Valley City.

(Special Correspondence to Morning Journal)  
Carlsbad, N. M., Sept. 29.—Next week, will be a busy one at Carlsbad. The fall term of district court opens on Monday, Judge Wm. H. Pope presiding. The New Mexico Association of Firemen and the Association of Fire Chiefs will convene on Tuesday for their annual meeting and tournament, continuing for three days. The Pecos Valley Press association will meet on the 25th and 26th of October for their annual gathering. The editors of New Mexico have been asked to attend. The territorial board of pharmacy will also hold a session in Carlsbad during the week. Carlsbad has made careful preparations for the entertainment of its guests. The main business part will have a double row of lights for the occasion. The business houses are already being decorated and when the guests come every thing will be ready for their reception. The Santa Fe railway has granted a low rate, being effective on the 5th. The Commercial club will give the visitors a reception. The Chamberlain Brothers show will furnish entertainment on Tuesday. There will be baseball games and other amusements, in addition to the tournament. The visitors will be given an opportunity to see the irrigation works installed by the reclamation service.

For Chapped Skin.  
Chapped skin whether on the hands or face may be cured in one night by applying Chamberlain's Salve. It is also unequalled for sore throat, burns and scalds. For sale by all druggists.

## NO INDICTMENT FOR THE IRWINS AT CLOVIS

Alleged Blackmailers Released  
by the Court; City Attorney  
and Police Judge Indicted for  
Bribery.

(Special Correspondence to Morning Journal)  
Clovis, N. M., Sept. 30.—A grand jury in the district court here concluded its labors last night, and, contrary to the general expectations, failed to make any case against the Irwins, who have been the center of attraction in the Black Hand cases, since Mrs. Irwin was caught early in the spring, when she had gone to recover what was supposed to be a package of currency left by one of the blackmailers. The defense of the Irwins has always been that Mrs. Irwin acted only according to instructions contained in a letter addressed and mailed through the Clovis office to her, telling her to go to a designated spot and get a certain amount of money that would be there in a package. She went alone at night and was captured. So far there has been no other tangible evidence by which any other parties could be connected with the affair and the Irwins have already been released by the court.

It is now claimed that those people will likely bring suit against E. B. Leary for damages. Mr. Leary was the man who hid the dummy package when Mrs. Irwin was captured by a posse of citizens led by Leary to search the place. It is alleged that Mr. Leary was abusive in his conduct toward the woman when she was brought to police headquarters, the night she was captured, and it will be upon this ground that damages will likely be asked, if any action is taken at all.

The grand jury last night found true bills against City Attorney Fred McDonald, both being charged with bribery in the conduct of their respective offices. Some think that the outcome of the work of political machines, yet others assert that there is some strong evidence against both.

## TIMBER ON LINE OF PROPOSED ROAD BEING CRUISED

Highway May be Constructed  
Through Northern Arizona  
From Clifton to Springville;  
Forest Service Investigating

In view of the proposed Clifton-Springville road in northern Arizona, timber cruising has already begun on the portion of the Apache forest that will be made accessible by the road, which will extend from Clifton, Graham county, to Springville, Apache county, a distance of about 105 miles. Of this, 94 miles are through the Apache national forest. At present there is practically no road north of Metcalf, and in places it is even difficult to get through with a pack horse. The timber extends to within about twenty miles of Clifton, but due to the difficulty of getting it out the local market is supplied entirely from Alamogordo and Texas. Three companies in Clifton and vicinity alone use 15,000,000 feet B. M. annually, chiefly for mining timbers. Crude costs from \$8.00 to \$12.00 per cord in Clifton because it has to be packed in on burros. The road will reduce the cost of cordwood 50 per cent and of timber at least 25 per cent. The route will probably follow the old road through Metcalf to near the head of Juniper creek, from there almost due north along the eastern edge of Pine Flats, around the western side of Rose peak, through Hamilton meadows, and along Beaver creek to near its junction with Black river, then up Black river to Slaughter's ranch. From Slaughter's it will follow the old road, pass the lake and down Water canyon to Springville. Although passing through rough country, the grade reaches a maximum of 15 per cent in only two places. Going south with timber of wood it would be practically a down grade all of the way. The western yellow pine begins about twenty miles from Clifton and extends practically to the Blue range, where the Douglas fir begins.

The party, consisting of five cruisers, in charge of Aldo Leopold. Only that portion of the timber which is accessible from the road is being examined. The timber is being estimated in stumps and logging as well as in B. M. Although the crew has been handicapped by thick brush and lack of trails, the prospects are bright for a speedy and successful examination of the timber in order to fully inform prospective purchasers just what stumpage is available.

## "MELON DAY" TRAIN BADLY WRECKED AT MELROSE

Two Men Seriously Injured  
When Engine Turns Turtle on  
Cut-Off and Overturns the  
Caboose.

(Special Dispatch to the Morning Journal)  
Melrose, N. M., Oct. 1.—Bacon Howard, a real estate man of Portales, and Percy Jones of the same place were seriously injured when an excursion train from this city bound for the "Melon Day" celebration and fair at Fort Sumner, was wrecked one mile west of Melrose at 8:50 this morning. Both men were riding in a caboose attached to the tender of the engine and ahead of the passenger coaches. The engine turned turtle, dragging the caboose over with it, and smashing it up badly. Four other passengers in the caboose were slightly hurt.

Howard is internally injured and Jones had his shoulder broken. Both men were brought to Clifton for treatment and it is thought they will soon recover.

The excursionists continued their trip later in the day.

## MERCHANT STABBED AT MONTAINAIR

J. P. Dunlavy Victim of Ugly Affray; Assailant in Jail for Attempted Murder.

(Special Dispatch to the Morning Journal)  
Mountainair, N. M., Oct. 1.—The first cutting scene in the history of Mountainair occurred here this morning, when J. P. Dunlavy, one of the principal merchants and proprietors of the town, was stabbed by G. A. Humphrey, a carpenter. The stabbing was done with a pocket knife, a deep slash being cut in Dunlavy's left side. Humphrey was immediately arrested and placed in jail, where he will be held pending the outcome of Dunlavy's injuries, which he will be given preliminary hearings. According to those who saw the encounter, Humphrey was the aggressor and forced the fight on Dunlavy. It is said that Dunlavy had been drinking between the two men for some time. When this met on the street, the morning Humphrey took a fancy to Dunlavy, who was returning home, and stabbed him with his knife. Dunlavy was taken to the hospital in the left side, making an ugly looking wound in the left side above the armpit and just below the ribs.

Johnston, Oct. 1.—Today has brought forth the best results yet attained in aviation work. M. Roques, who succeeded in completing the distance, landed, covered 120 rounds of the course in fine and strong style and finally landed in general on account of darkness. The distance traversed was 20.6 miles and the time 2:41:50. The height during the flight was from 100 to 1400 feet.

Heard Roques competing for the record and altitude prizes, covered 51 miles in 1:21. Flying low between 20 and 25 feet he sailed around the course with great regularity, making circles three times in two minutes and forty seconds.

M. Roques, in paying for the long distance prize, made 10.4 miles in 34 minutes and then had trouble with the motor.

## WALL STREET.

New York, Oct. 1.—The call money market today showed the effect of special requirements upon it and the higher interest rate or the limitation of funds offered, which caused it to hold the speculation in a strait. The further rise in United States Steel to new higher records helped hold prices elsewhere against the influence of the dull demand. Attention also was at a new high record under the impression of intimations regarding the chances for an advance in the dividend rate next week. In some other stocks that have advanced on dividend profits doubts of an increase were asserted and the stocks suffered accordingly.

A sharp advance in the private discount rate in London today gave point to the speculation which came from the fact that the Bank of England raised its official discount rate before the end of October.

As to our own interior banking situation the compilation just published of reports to the controller of conditions as of September 1, shows how well loaned up were the national banks of the country at that date. The loan item had increased nearly \$100,000,000 since June 23 of this year and over \$375,000,000 since September 23, last year, the deposits had increased \$111,716,000 and \$461,758,000 for the same periods respectively, while the cash holdings had fallen off in the shorter periods some \$31,800,000 and in the longer period \$14,200,000. As a consequence the percentage of reserve September 1 was 21.67, compared with 22.37 June 23, and 22.97 September 23, last year.

Money on call opened at 4 per cent today and then ran off to 3 per cent with increasing effect on the speculative tone. There was some small response, however, to the strength of United States Steel, Reading, Atchafalpa and a few others and when the call loan rate stiffened to 4 per cent in the day it had a weakening effect on the whole market. ## FROM SAMOS ISLE TO FIND HOMES IN NEW MEXICO

Interesting Party of Turkish  
 Vineyardists Travel Thou-  
 sands of Miles to Find Loca-  
 tion.

Professor Platarides Pictorides, a  
 citizen of Turkey, whose home is on  
 the island of Samos in the near east,  
 arrived in Albuquerque yesterday in  
 course of a trip through New Mexico  
 in search of a home for himself, his  
 family and several Turkish families  
 from the same island who are intend-  
 ing to follow him to the far south-  
 west.

Some three months ago one of the  
 little pamphlets issued by the terri-  
 tory bureau of immigration found  
 its way into the hands of Prof. Pic-  
 torides in his far away home. It in-  
 terested him and he wrote for more  
 information. It was sent to him and  
 he decided that New Mexico offered  
 the opportunity for which he had  
 been looking. He landed in New  
 York on July 30 and arrived at once  
 for the west. He spent several days  
 in Colorado and some time in San  
 Juan county. Finding conditions  
 there not quite to his liking he came  
 on to Albuquerque. Yesterday he  
 spent in the vegetable gardens near  
 Old Albuquerque and left this morn-  
 ing for Las Cruces, where he expects to  
 locate. With him are his two sons,  
 a friend who has also two sons, and  
 he will be followed as soon as he is  
 located by a number of his people  
 from the island of Samos.

"Possibilities of this country  
 are marvelous," said Prof. Pictorides  
 yesterday, in the very good English  
 he has mastered during his brief  
 stay in the United States. "The op-  
 portunities for the poor man are great  
 and I have found what I am seeking  
 in New Mexico. We of the island of  
 Samos are very poor growers and we  
 have the finest vineyards in the  
 world. Almost every foot of the  
 island is under cultivation, which you  
 can see when I tell you that the en-  
 tire island is not more than three  
 miles square and there are sixty thou-  
 sand people living on it. I myself  
 owned one of the largest vineyards  
 and it occupied but two acres. My  
 friend and myself have sold our build-  
 ings there and have brought our  
 money to buy land here. You people  
 here have not even guessed at the  
 means of intensive cultivation. In  
 my country very little of the soil is  
 made to produce its highest value.  
 Our grapes on Samos sell for three  
 pounds for one cent in your money.  
 Here the whole price is three or  
 four cents a pound. The opportuni-  
 ties are very great to us. This terri-  
 tory will eventually be culti-  
 vated as intensively as our land is.  
 Then it will be very valuable."

"It is my purpose and that of my  
 friends to renounce our citizenship  
 to Turkey and become American citi-  
 zens. Conditions in our country are  
 not good. In the recent Turkish revo-  
 lution have been coming on for a long  
 time. Many of us have been perse-  
 cuted and there are many people who  
 are now coming to what seems to us  
 a land of promise."

Then they came back.  
 It is understood the bishop stated  
 afterward that it reminded him of the  
 colored preacher who was reading the  
 words pronounced upon Jerusalem  
 "Babylon is a city that is built upon  
 blood and is full of violence, she will  
 be laid waste like Sodom, for she has  
 despised the word of the Lord her  
 God, she has despised his counsel, she  
 has despised his voice, she has despised
