RIOTOUS FROLIC OF CARNIVAL NIGHT CLOSES TWENTY-NINTH ANNUAL NEW MEXICO FAIR

CLOSING DAY MOST SUCSESSEUL IN ANNALS OF ASSOCIATION

Hundreds of People Throng Downtown Streets, Masked and Covered With Confetti to Celebrate the End of Annual Good Time. Outcome of the Big Week Proves Satisfactory to Management of Association.

The Twenty-ninth Annual New Mexico fair came to a close last night with a celebration of the annual carnival night which brought hundreds of people into the downtown streets, masked and laden with confetti and prepared to have all of the fun which the annual occasion affords. It was not a noisy crowd. Bands paraded up and down the streets; automobiles decorated with Japanese lanterns and blarney with honk-honk horns ran through and through the crowd; merry maskers, throwing confetti until every man, woman and child in the streets was covered with the varicolored paper, but the crowd as a whole conducted itself quietly and had its good time in a way which left the police little to do but stand on the corners and watch the passing show. There have been carnivals in Albuquerque which have raised the echoes and filled the police station; but those days are gone and last night's crowd while as merry as ever could be, was orderly throughout. From the time the lights were lighted until midnight the five blocks of Central avenue from First to Fifth streets were filled with people while the carnival plaza was literally packed with pleasure seekers. It was a fitting close to one of the most successful fairs in the history of the Fair association.

"It is too early for us to say what the financial results of the fair will be," said Secretary John B. McManus last night. "We have had a good week and the attendance of several of the days has been most gratifying in the early part of the week. The crowds in the fair grounds were not up to our expectations, but the attendance of the last three days has more than made up for anything we may have lacked in the opening of the week and we hope and believe that the balance sheet of the association this year will more than compare favorably with other years."

The bills are not in as yet and until they are all in and accounted for we do not care to make any prophecy as to what the financial result will be, but we have reason to believe that it will be satisfactory. Certainly the program which the association has presented during the week has been satisfactory. The racing program by unanimous agreement, has been the best the association has ever presented and Saturday's program at the fair grounds, racing and other features, was a marked improvement. In included not only a baseball game which held the attention of the crowded grandstand from start to finish, but a racing program which was complete and satisfying and the Marathon race which started in time to give the crowd some idea of the tremendous endurance test which the runners were undergoing. The Marathon race was finished by daylight and while it did not establish a world's record it was not enough to make the event one of the big features of the week's program.

There was a Roman race which was right up to the mark in horseman's ship and which brought a very enthusiastic response from the crowd. The Saturday program was fairly representative of what has been offered during the week and from the beginning to the end it has been a week of good entertainment. The Fair association is to be congratulated on the offering it has made and the expressions heard on every hand last night are quite convincing that the people who have attended the fair are satisfied.

The exhibits at this fair have looked small compared to the far reaching exposition of territorial products shown at the exposition a year ago, when the whole territory came here with adequate representation of its natural resources, drawn by the inspiration of the national irrigation congress. Yet in the exposition hall this past week has been the greatest showing of apples ever made here, the greatest showing of dry farming products and a display which in every way has been representative of the territory's resources.

The twenty-ninth annual fair is over and the officers of the association are waiting for the bills to come in. Albuquerque has had its annual gala week and will settle down to work to the regular every day work of business and progress. It has been a good fair and one of which the managers and the people have come to be proud. Albuquerque's period of good time and display is closed for six months. At the end of that time preparation will begin for the thirtieth annual fair and when it begins the managers who undertake it will have in equaling the record for entertainment which has been established by the fair just closed.

President Traft and Secretary McManus have worked night and day

for many weeks to make the fair the success it has been and both of the officers last night received many hearty congratulations from the people who could reach them in the busiest evening of the week, upon the record they have made.

It has been a week of conventional, of big crowds and rush and hurry, and a big sigh of relief will go up this morning from a great many weary people who have been overworked during the six busy days. But every one of them will conclude after thinking it over that the week has been worth while.

Today practically all of the exhibits will be packed for shipment home or to other fairs. The carnival company will prepare to move Monday night, and the carnivalmen, who contributed so largely to the success of the week, will break camp Monday morning for the long overland march back to Port Wingate. Monday night will find the city restored to its normal quiet, with decorations down and business running in its accustomed groove. The fair is over but the conclusion finds the people satisfied with attendance, program and general results, and ready to undertake the next annual entertainment.

WRIGHT AEROPLANE IN RACE WITH FAST TRAIN

Swift Baltimore and Ohio Express Out-Speeds More Modern Device for Annihilating Space.

(By Morning Journal Special Leased Wire) College Park, Md., Oct. 16.—Wright today introduced an element of the spectacular in the otherwise monotonous training flights at the government aerodrome, when he raced his machine with a swift Baltimore and Ohio express. To the spectators it appeared that the train was gaining on the aviator. Outside of two flights, each of thirteen minutes made at sunrise, this was the only trip made in the aeroplane today.

POSSE BATTLES WITH DESPERATE CONVICTS

Salem, Ore., Oct. 16.—A battle in progress between the five convicts who escaped from the penitentiary here yesterday and a posse of nearly sixty men. The conflict is raging on the banks of the Willamette river near Buena Vista, fifteen miles south. Deputy Sheriff Johnson was shot in the leg in the fight and taken to Independence.

ELEVEN MORE BODIES OF STORM VICTIMS FOUND

Memphis, Tenn., Oct. 16.—The total death list of the destructive storm of Thursday was increased today by the belated reports to 46, eleven more dead being discovered. The storm swept Tennessee, Alabama and Georgia with a fury seldom if ever equalled in this section of the country.

McCarren Has Chance for Life.

New York, Oct. 16.—State Senator Patrick McCarren is holding his own and his physicians believe that he has passed the critical stage with a good chance of recovery unless complications set in.

Ferret Riots in France.

Paris, Oct. 16.—A score of demoniac ferret meetings were held throughout France tonight. Crowds marched to the Spanish consulate with cries of "assassins." At Lille many rioters were injured in collisions with the gendarmes and twenty arrests were made.

CHAMPIONSHIP CAPTURED BY PITTSBURG

DETROIT SHUT OUT IN FINAL GAME OF SERIES

Pitching for Pirates, Rube Adams Holds Tigers Helpless and Gets Off With Laurels of Deciding Contest.

(By Morning Journal Special Leased Wire) Detroit, Oct. 16.—Pittsburg won the world's baseball championship at Bennett park today by defeating Detroit by the overwhelming score of 8 to 0 in the seventh and decisive game of one of the greatest battles ever fought for the world's title. This gives the National league champions the victory by the count of four games to three. This is the third successive defeat of the American league champions in the world's series and consequently the third straight victory for the National league, the Chicago team having defeated Detroit in 1907 and 1908.

To Charles Adams, the phenomenal young pitcher from the Louisville American association team, belongs the lion's share of the credit for the victory, and his wonderful pitching has crowded Wagner, Leach, Clarke and the other Pittsburg stars into the background. Today's victory was his third of the series, and he held Detroit safely through the entire game. He allowed but six hits and in only four innings he retired the hard hitting American batters in one, two, three, or four.

The crowd was distinctly disappointing, as there were only 11,562 paid admissions. It was expected that the game would break all local attendance records because of its importance. The receipts were \$19,671, and this was divided \$12,677.70 to the National commission and \$6,993.30 to each club owner.

This brings the total attendance for the seven games up to 145,444, and the total receipts to \$188,302.50. The weather was far from ideal, but better than that which prevailed for the other three games played here. The thermometer was close to 50 degrees above zero and neither too cold for the spectators nor for the players.

The two twirlers upon whom Detroit had pinned its faith in winning the game were lacking when the crucial time came. "Wild Bill" Donovan lived up to his nick-name by passing six batters and hitting another in the first two innings. While this lack of control allowed Pittsburg to score only two runs, it had a bad effect on the Detroit defense and Pittsburg scored often after that. Donovan allowed a two-bagger and a single in the third, but a snappy double play stopped the Pittsburg team from scoring.

George Mullin was sent in to bat for Donovan in the third inning and took up the pitching after that. The Detroit man was unequal to the task of pitching four games of the seven and was easy for the Pittsburg batters, as Donovan had given them their start. Mullin was hit hard in the fourth and sixth and Pittsburg soon piled up a commanding lead.

The play was fierce in the early innings but Detroit grew discouraged as inning after inning went by and it could not score on Adams while Mullin was helpless in holding the National league champions.

Robert Byrne and George Moriarty were injured in a collision at first base in the first inning and both were forced to leave the game, although Moriarty remained until after he had hit a two-bagger in the second.

With Byrne on second and Clarke at bat in the first, the Pittsburg manager passed a hit and run signal to third. The third baseman started for third on the signal but Clarke missed the ball. Byrne made a desperate slide for third and his spikes hit Moriarty in the leg. He was called out but both men fell to the ground after the play. It was found that Byrne had a strained ankle and he was carried off the field. This necessitated a shift in the Pittsburg field and Leach was shifted to third base and Hyatt went to center field. Leach played a brilliant game at third while Hyatt also did well.

Moriarty's leg bothered him but he remained in the game until the next inning and when he went to bat in the second he hit a two-bagger into the right field crowd but could hardly limp to second base. Moriarty was sent in to run for him and finished the game at third base.

The winning of the Detroit pitcher is shown by the record of Fred Clarke. He had four bases on balls and a sacrifice hit in five times up.

The outlook for Detroit was decidedly dark from the first ball pitched. It could be seen that Donovan was wild, as he pitched a couple of balls to Byrne and then hit him. Leach sacrificed, Donovan to Tom Jones, and then came the play at third which resulted in the injuries to Byrne and Moriarty. Clarke drew a base on balls and stole second. Wagner also drew a base and Miller forced Wagner at second. Bush to Delehanty, ending the inning. The poor work of Donovan was even more pronounced in the second, and Pittsburg was presented with two runs. Abstein opened by drawing a base on balls and stole second. Wilson bunted in front of the plate and Abstein beat the throw to third, while Wilson was safe on first. Gibson pooped to Bush but Adams was given another pass and the bases were full. Hyatt sent a sacrifice fly to Crawford and Abstein scored. Leach received another base on balls and the bases were again filled.

Said another pass, was given to Clarke and he forced Wilson across the plate. Cobb saved Detroit by making a great catch of a hard drive by Wagner. There was no scoring in the third but it was prevented by a speedy double play. Miller opened with a single to center and went to third when Abstein drove a two-bagger into left field. Wilson hit a

AFFIDAVITS TO DISCREDIT COOK

FOUR MEN SWEAR HE NEVER REACHED SUMMIT

Men Who Accompanied Explorer on Mount McKinley Expedition Seek to Blacken Character of Former Employer.

(By Morning Journal Special Leased Wire) New York, Oct. 16.—Four affidavits were made public here today in connection with the investigation of Dr. Frederick A. Cook's expedition to Mount McKinley. Three of them are by members of the Cook party—Fred Printz, a guide; Walter Miller, photographer, and Samuel Beecher. Their testimony relates in detail to movements of the party, explaining that Cook and Barrill were alone together at the period in which Dr. Cook says he reached the summit of Mount McKinley. All three say that Barrill assured them later that Dr. Cook's story was false.

"I was called out by Henry Diston of Philadelphia, the baker of the expedition, to whom I related all the circumstances of the trip."

"So far as I am advised, Barrill is the only man who has personal knowledge as to whether or not Dr. Cook ascended to the summit of Mount McKinley."

"In May, 1908, I met Edward N. Barrill at Missoula, Mont. He then informed me for the first time that he and Dr. Cook had never reached the summit of Mount McKinley. I then said to him, 'Where were you?' when he remarked, 'We were on the first ridge of this side of the mountain.' I asked him about his picture shown opposite page 227 in Dr. Cook's book, when he replied, 'That is my picture, but that is not the top of the mountain.'"

Beecher affidavit: "The affidavit of Samuel Beecher, after describing the early experience of the party, tells of a trip which he and several other members of the expedition took from their 'base camp.' He says: "On July 22 we reached our nearest point to the mountain, the point being, as R. W. Porter said, 14 miles from the summit. On this trip we were mapping and taking observations of the country."

"At our last camp the elevation was in the neighborhood of 5,000 feet and from that point I could readily recognize all the pictures shown by Dr. Cook in his magazine article on the ascent of the mountain with the ex-

Simple and Democratic Is Meeting of Taft and Diaz

HEARST BELLING UNWORTHY OF ANSWER

This is Tammany Candidate's Reply to Accusations Hurlled at Him by Independence League Standard Bearer.

(By Morning Journal Special Leased Wire) New York, Oct. 16.—William Gaynor spoke in Brooklyn tonight, dividing his time between heaping ridicule on William R. Hearst and touching upon municipal issues. Otto T. Handard, the republican nominee, delivered a series of addresses in New York proper, he confined himself to a general attack on Tammany hall and an outline of what he expects to do if elected. Hearst did not speak tonight.

Gaynor's references to Hearst, some along lines he has touched upon before, namely, the editor's attempts to obtain the presidential nomination, his race for governor of this state with Tammany's endorsement, and the conduct of his newspaper. As to his former speeches the judge did not attempt to answer the charges that have been made against him, stamping them as baseless and lies that did not deserve reply.

The fourth affidavit is that of Dr. John E. Shore, a physician of Leavenworth, Wash., who tells of a conversation with Oscar E. Blankenship of the United States forestry service, in which Blankenship said that Dr. Cook's claims to having climbed Mount McKinley were false inasmuch as the feat was impossible in the short time in which Cook and Barrill were absent. Blankenship was located near Mount McKinley at the time Cook's expedition was there.

The affidavit of Fred Printz, the guide, is dated October 4. It says that at the time of Dr. Cook's alleged ascent of the peak he and several others had been sent on a side trip to hunt specimens for the Smithsonian institution. The affidavit continues: "The doctor picked up Dobson for a cook and taking Barrill left in the launch for Shushitna station. From there he said they were going up Shushitna, up the Cutima and up to the Tokostina to the head of navigation to explore the country for the route to Mount McKinley."

"Miller and I returned to Shushitna station September 11, where the doctor joined us with Barrill on September 22, saying that they had reached the summit of Mount McKinley."

"From there we left for home, on leaving the doctor at Seward, promising that part of my pay for the summer would be at Seattle for me, but on arrival there, and not finding it, I borrowed money to get home on and have written the doctor several times since for the amount due. Have received \$100, leaving a balance of \$825 due me at this date."

"In about a month after Barrill and I returned home from our trip with Dr. Cook in 1908 Barrill laughed and told me that he and Dr. Cook never got to the top of Mount McKinley."

Miller affidavit: "Walter P. Miller, in his affidavit, says he was with Printz on the side trip during the time in which Dr. Cook says he went to the summit of the mountain. His testimony continues: "Dr. Cook and Barrill took the launch and went down the Yetna, announcing their intention of ascending the Shushitna, the Schultana, and exploring the Tashetna glacier for a possible route for a future attempt to ascend to the top of Mount McKinley. He and I returned to the Shushitna station. On September 22 we met Dr. Cook and Barrill at the station and thence we all came together to Seward."

"I was called out by Henry Diston of Philadelphia, the baker of the expedition, to whom I related all the circumstances of the trip."

"So far as I am advised, Barrill is the only man who has personal knowledge as to whether or not Dr. Cook ascended to the summit of Mount McKinley."

"In May, 1908, I met Edward N. Barrill at Missoula, Mont. He then informed me for the first time that he and Dr. Cook had never reached the summit of Mount McKinley. I then said to him, 'Where were you?' when he remarked, 'We were on the first ridge of this side of the mountain.' I asked him about his picture shown opposite page 227 in Dr. Cook's book, when he replied, 'That is my picture, but that is not the top of the mountain.'"

Beecher affidavit: "The affidavit of Samuel Beecher, after describing the early experience of the party, tells of a trip which he and several other members of the expedition took from their 'base camp.' He says: "On July 22 we reached our nearest point to the mountain, the point being, as R. W. Porter said, 14 miles from the summit. On this trip we were mapping and taking observations of the country."

"At our last camp the elevation was in the neighborhood of 5,000 feet and from that point I could readily recognize all the pictures shown by Dr. Cook in his magazine article on the ascent of the mountain with the ex-

ception of the pictures shown as being the summit and the one on page 330, which are such as might have been taken at elevations of 5,000 or 6,000 feet.

"The point located by Edward Barrill as being the point claimed as the top of Mount McKinley from my position had an apparent elevation of approximately 7,000 feet."

"From our camp I had a view of nearly the whole route, as stated by Edward Barrill. I was present at all times when Mr. Barrill made his affidavit of even date here with all the facts stated in his affidavit covering the period I was with him are correct."

"From my point of view I recognized all the points mentioned by him and from my knowledge of the conditions as existing there it would have been impossible for the climb of the mountain to have been made in the time claimed by Dr. Cook."

"The reason for my making this affidavit is not from any personal animosity or ill will against Dr. Cook, but from a sense of justice to the public."

Shore affidavit: "During the summer of 1907 I was conversing with Oscar E. Blankenship, who told me that while near Mount McKinley he knew of Dr. Cook's alleged ascent of the mountain, but that from his very short absence from the launch it was impossible for him to have made the ascent and return in that time."

"Blankenship is now a forestry service man at Staplekin, Wash. Since having this conversation with me, I have been talking with him about the matter. He said to me: 'That is right, but he said they were not saying much about the feat that the ascent had never been really made.'"

COOK WILL HEAD OWN PARTY TO MOUNT MCKINLEY New York, Oct. 16.—Having failed in his effort to get Professor Henshaw, C. Parker and Anthony Fiala to accompany him, Dr. Cook has decided to head his own party to Mount McKinley.

(Continued on Page 2, Col. 4.)

JONES COMMANDS EXPEDITION TO TIBURON

ALBUQUERQUE MAN TO LEAD PERILOUS TRIP

Start Made From Bisbee Yesterday by Bold Westerners Who Will Brave the Savage Series.

(Special Dispatch to the Morning Journal) Bisbee, Ariz., Oct. 16.—In command of Dr. Payette A. Jones of Albuquerque, the expedition to the island of Tiburón in the Gulf of California left here today headed for Guaymas, Mexico, whence the party will start on a small vessel for the shores of the unknown island to brave the dangers of thieving and attacks by the savage Seri Indians inhabiting the wild interior of the rugged island.

A stop of one day en route will be made at Nogales for final preparation. Dr. Jones was unanimously selected as commander owing to his knowledge of conditions and people along the rugged western coast of Mexico. Dr. Jones having previously reached Tiburón on the Mexican shore a few miles from the coast of the island, where it is nearest the mainland. Furthermore, as the expedition is largely for the purpose of exploring the island, Dr. Jones' experience as a naturalist and his knowledge of the island's conditions, and his personal acquaintance with the Mexican Indians, is a man of personal courage, and resource, and will make the expedition win if any man can.

All the members, twenty-five in number, are heavily armed, carrying rifles and a brace of six-shooters, a pocket pistol and a dirk knife each.

Every effort will be made to pacify any Indians encountered, but in case hostile demonstrations are made the orders will be to fire at every head that shows itself. Every man in the party, which includes a number of former sheriffs and cowboys, is a dead shot, and Dr. Jones himself can handle firearms with the best of them. It is not expected, however, that serious trouble will be had with the Seri. The party is sufficiently large in numbers to take good care of itself and intimidate any Indians inclined to be hostile.

Whether or not the Seris have learned the use of firearms and have rifles is entirely conjecture. The theory is held to some extent that renegade Mexicans have escaped to the island and that supplies of firearms, ammunition and other things are secretly brought from Guaymas periodically. To gain up the situation, however, absolutely nothing is positively known of the interior of the island or its people and its size can be only guessed at, although it is known to be between forty and fifty miles long. Dr. Jones will make surveys to determine the island's dimensions and intend to secure a rough map of it as one of the results of the trip.

INTERNATIONAL EXCHANGE OF COURTESIES AT EL PASO

Clasp Hands in Greeting Which Sets New Precedent in Pan American Intercourse.

El Paso Packed With Visitors from All Parts of Nation Gathered to Greet Men Who Direct Destinies of World's Greatest Republics.

JUAREZ BANQUET IS BRILLIANT FUNCTION

(By Morning Journal Special Leased Wire) El Paso, Tex., Oct. 16.—The long expected meeting between President Taft and President Diaz of the republic of Mexico occurred here today. Outwardly it was attended with a display of soldiery, a flare of trumpets, a boom of cannon and a pomp of ceremony suggestive of supreme authority, but in the actual hand-clasp of the two executives and in the exchange of courteous words which passed from lip to lip there was simple but cordial informality. President Diaz was the first to speak. He assured President Taft of his warm personal regard and his high esteem of the man who had accomplished so much in the Philippines, in Cuba and elsewhere and who had now the honor to be the chief executive of so great a nation as the United States. President Taft, in simple American fashion declared he was glad to meet President Diaz. He was glad to know the president of such a great nation; especially glad to know the present president who had made the nation great. Both presidents dwelt upon the cordiality of the relations existing between the United States and Mexico. President Taft declared that today's meeting was not necessary to make stronger the bonds of friendship; it merely typified the strength of the bonds as they exist now. There were less than a score of persons permitted to witness the meeting of the two executives. Even these were excluded later when President Taft and President Diaz withdrew into an inner room of the chamber of commerce building, where the historic meeting occurred and were only attended by Governor Creel of the state of Chihuahua, former ambassador to the United States, who acted as interpreter.

The scene of the day's ceremonies shifted from time to time from this thriving little American city across the shallow, wandering Rio Grande to the typical little Mexican settlement of Ciudad Juarez. In the custom house there, President Diaz received a return call from President Taft and later this afternoon entertained the American president at a state banquet, which, in all its surroundings of lavish decorations of brilliancy in color, wealth of silver plate handed down from the time of the Emperor Maximilian and in every carefully considered detail probably was the most notable feast ever served on the American continent.

It was at this banquet tonight that the more formal and public expressions of regard toward the two executives as the representatives of the people of the United States and Mexico were exchanged. The banquet also marked the end of the day of international pageantry—a day of elaborate, rushing, cheering, crowding, less ebullient, journeying into foreign territory with a president of the United States for the second time in the history of the nation, of amity between the two great nations of the United States and Mexico, a day made unusual by the first visit to American soil of the chief ruler of a nation in any way approaching the prestige of Mexico.

The day was marked by but one unusual incident, a lad of 15 years being stepping into the path of a presidential limousine as President Taft was stepping from his special train upon its arrival in the center of the city at 8:20 o'clock this morning. The boys were in the crush of people gathered in the plaza and in pushing forward to catch a glimpse of the president he became involved in a fight. Not Mr. Taft, but a knife and before bystanders could realize what was happening Lawrence Wimer, 13, was being mortally wounded at the feet of the people, a red flow from his heart marking the oblique side of his life. Before an ambulance could reach the scene he was dead. The crowd about the place was so great that even the

wagon from the morgue could not make its way through and during most of the time President Taft was at breakfast the body lay on the pavement not forty yards away. Some thoughtful person finally tore down two American flags from the decorations about the plaza and spread them over the body. Morgan was arrested and held in the county jail tonight. He is utterly crushed and a heart broken boy.

The day's ceremonies began this morning with President Diaz in a state carriage with gold hubs, gold mounted doors, black horses and gay scarves crossed the international bridge with an escort of soldiers. The main body of Mexican troops were left behind at the bridge entrance. Here, Diaz was driven at a smart pace through the Chamaiz territory to be met at the boundary by the American troops and Secretary of War Dickinson. A salute of twenty-one guns was fired and President Diaz stepped from his own carriage into one provided by the American authorities. With an escort of two squadrons and three batteries of American field artillery the visiting president was taken through the streets of the city to the Chamber of Commerce building where President Taft awaited him, at double quick time.

Along the line of march President Diaz was cheered by the crowds. Secretary of War Dickinson rode beside him and an aide occupied the forward seat in the carriage. With President Taft when he greeted President Diaz were Secretary Dickinson and Postmaster General Hitchcock. Captain Archibald W. Butt, General Albert Meyer, U. S. A., Assistant Secretary W. W. Miesler and C. C. Wagner, of the White House staff.

President Diaz was accompanied by members of his cabinet and military staff. The private interview between the two presidents lasted fifteen minutes. It is officially stated that it consisted of an elaboration of the public utterances of Messrs. Taft and Diaz and that no matters of diplomacy were touched upon in any way. Secretary Dickinson in greeting President Diaz at the boundary said: "You are the first chief executive of a nation to cross our border. In this act you are giving not only to the people of your own and our country, but to the whole world the highest manifestation of the cordial relations existing between these contiguous sister republics and of your desire to make them, so far as you can, perpetual."

"We fully realize the honor of your visit and realize the magnificence of the noble purpose that inspired you. In behalf of the president and people of the United States, I give assurance of their cordial esteem for the republic of Mexico and its wise and beneficent president and welcome you to their country and its hospitality."

Those present at the interview between Presidents Taft and Diaz, in the Chamber of Commerce building, El Paso, were J. H. Dickinson, secretary of war; Frank H. Hitchcock, postmaster general; Governor Campbell of Texas, and other state officials. Captain Archibald W. Butt, the president's military aide, John Hays Hammond, Dr. J. J. Richardson and W.

dell Miesler and Charles C. Wagner, the president's assistant secretaries. President Diaz was accompanied by General Manuel Gonzalez, Coadjutor of war; Oscar M. Molina, minister of commerce, industry, Governor Croft, of the state of Chihuahua, formerly ambassador to the United States; Colonel Pablo Escandon, chief of the military staff of President Diaz and Ignacio de Barra, private secretary to President Diaz.

The interview follows:
President Taft: "I am very glad to welcome you, sir. I am very glad indeed."

President Diaz: "I am very happy to meet you and to have the honor of being one of the first foreign executives to come over the river with a hearty welcome."

President Taft: "It gives me not only great pleasure to welcome the president of the great republic of Mexico, but to welcome the president of the republic of Mexico who has made it so great."

President Diaz: "I am very proud to grasp the hand of the great statesman who has made such a record in his life—in the Philippines, in Cuba—and at present at the head of the great nation."

President Taft: "I wish to express to you my belief that this meeting is looked upon by both peoples with a great deal of interest as making stronger, and as typifying the strength of the bond between the two countries."

President Diaz: "My friendly relations and my personal acquaintance with you will make thousands and thousands of friends of the American and Mexican people, and streams of wonderful and beneficial development will have to follow for the good of the countries."

President Taft: "You have already met the secretary of war and the governor of Texas. I shall be glad to have the privilege of presenting to you the postmaster general." (The postmaster general was thereupon presented to President Diaz.)

President Taft: "I should be glad to have the privilege of meeting your staff." (The minister of war, General Manuel Gonzalez, was thereupon presented to President Taft.)

President Taft, addressing the minister of war: "I have been minister of war and therefore I have a sympathy with you."

President Taft and President Diaz, accompanied by Governor Croft, retired to an adjoining room for a private conference which lasted fifteen minutes.

Within less than an hour after the conference closed and President Diaz had returned to Mexico, President Taft left the Chamber of Commerce on his way to Juarez to repay the call. At the international boundary he had been extended to the chief executive of the republic of Mexico. The streets over which Mr. Taft journeyed from the bridge to the customs house had been converted into a veritable court of honor. The meeting followed the same lines as that in El Paso, President Diaz welcoming President Taft.

to Mexican territory and the American chief executive, expressing his appreciation in behalf of the American people for the cordial reception.

The interview ended, President Taft returned to El Paso and prepared for the banquet tonight. The speeches of Presidents Taft and Diaz at the Juarez dinner were given as topics from one to the other. President Diaz was first to rise, and as he gained his feet an impressive silence of expectancy succeeded the hum of general conversation which had engrossed the 150 guests.

President Diaz said:
"Mr. President, gentlemen, this visit which his excellency, President Taft, today makes to Mexican territory, will mark an epoch in the history of Mexico. We have had among us some very illustrious American visitors, such as General Ulysses S. Grant and the Honorable Messrs. Seward and Root, but never have we seen on our soil the first magistrate of the great American union. Such a proof of international courtesy, which Mexico appreciates and esteems in all of its worth and meaning, will be from today a happy precedent for Latin-American republics to cultivate constant and cordial relations among themselves, with us and with all the other countries of the continent."

"Inspired by these sentiments, which are also those of my country, I toast for the hope that the country of the immortal Washington may always enjoy all the happiness and prosperity which partly correspond to the intelligent activity and high civil qualities which characterize the manly glory of its heroic founders. I also toast for the personal happiness of the illustrious president, who has come to honor us with his presence and with his friendship, the manifestation of which will contribute to cultivate the common interests which bind the two neighboring countries whose respective elements of life and progress are mutually completed and magnified by association."

When the interpreter had concluded President Taft arose. It was a minute or two before he could proceed on account of the cheering. He stood in smiling appreciation until he was permitted to proceed and then said:

"Mr. President, gentlemen, responding as better this most auspicious occasion, I rise to express in the name and on behalf of the people of the United States the admiration and high esteem they hold for the great illustrious and patriotic president of the republic of Mexico. I also take this occasion to proclaim the hearty sentiments of friendship and accord with which my countrymen regard the Mexican people. Your excellency, I have left the United States and am my host in your great and prosperous country to emphasize the high sentiment and confidence, the feeling of brotherly neighborliness which exists between our two great nations."

During the banquet an orchestra made up of some of the most noted of Mexican musicians played the national airs and anthems of the two nations. President Taft made his way back to American soil in a perfect blaze of artificial light and with an escort which changed at the international bridge.

In token of remembrance of their historic meeting both presidents were presented at the dinner tonight with globes of pure gold, the gifts of the city of El Paso.

SAN ANTONIO PREPARES WELCOME FOR PRESIDENT
San Antonio, Tex., Oct. 16.—All in readiness for the entertainment of

"77"

Humphreys' Seventy-Seven
Famous Remedy for Grip &

COLDS

To reiterate, attend to the "first feeling" of a cold; lassitude and weakness; by taking a dose of "Seventy-seven" at once, the immediate cure will be certain.

If you delay until the sneezing, Coughing and Sore Throat set in, the cure by "Seventy-seven" will be just as sure but it may take longer.

Handy for everybody, fits the vest pocket. All Druggists, 25c.

Humphreys' Home, Medicine Co., Cor. William and Ann Streets, New York.

President Taft in San Antonio tomorrow and Monday. The president will arrive at 10 o'clock and be escorted to the St. Anthony hotel. At 5:30 he will go to Fort San Houston and participate in the dedication of a gold chapel, returning to his hotel at 10 o'clock. At 1:45 Monday morning he will go to the army post to review the troops. He will speak in San Antonio at 10:20. The start for the Taft ranch at Gregory will be made at 2:15 Monday afternoon.

AFFIDAVITS TO DIS-CREDIT COOK

(Continued from Page 1, Col. 6.)

Just an expedition to Mount McKinley, Dr. Cook announced here tonight that he would abandon his lecture tour as soon as possible and head an expedition himself.

Professor Parker stated positively his afternoon that he would have nothing to do with any expedition of Dr. Cook to Mount McKinley.

"Reinhold Brown and myself will endeavor to find the top of the mountain next year," said Professor Parker, "but our expedition will not follow the route Dr. Cook says he took. If we should find his records at the top we would bring them back."

AGRICULTURAL EXPERT AT THE FAIR

W. A. Carleton of the Department of Agriculture in Charge of Interesting Display.

One of the most interesting displays shown during the territorial fair just closed was that from the Manana farm at Nara Vista, Quay county, brought here and exhibited under the personal direction of Mr. M. A. Carleton of the United States department of agriculture. Mr. Carleton, who is one of the world famous agricultural exhibitors, came here especially to take charge of the Manana farm exhibit for Fred Lutz, superintendent of the farm, which is rapidly becoming famous for the quality and variety of its products. Mr. Carleton has a magnificent collection of seed grasses, corn, wheat, timothy and other crops in glass, which he has generously consented to turn over to the New Mexico committee in charge of the Chicago exhibit, and these will be packed and shipped from Albuquerque to the show at the Coliseum, which opens November 20. Mr. Carleton has had charge of several of the most important government agricultural exhibits, including the Paris exposition, the St. Louis world's fair and the Seattle exposition.

Library Tables in golden oak, curly English and mahogany, in endless variety.

ALBERT FABER,
208-210 W. Central.

WILD WEST SPORTS AT TRACTION PARK THIS AFTERNOON

Cowboys to Entertain Crowds With Bronco Busting, Gallo Racing and Other Like Events This Afternoon.

A number of cowboys, who have been in Albuquerque for the past week taking in the fair have secured the grounds for this afternoon and will put on a wild west show, the feature of which will be the bull throwing stunt by Will Pickett, known as the human bulldog. Pickett catches hold of a bull by the horns and then sinks his teeth into the bull's nose, throwing him to the ground with both hands in the air. Bud McDonald, former champion rider of the world, will do bronco busting stunts and there will be geyser races, roving and other features by other riders. The show is scheduled to begin at 2 o'clock.

MANUEL ROMERO IS SHOT IN WRIST

Altercation in Redlight District Results in Ore Native Being Wounded by Another.

As the culmination of a heated argument which is said to have resulted from the discussion of an old grudge, Manuel Romero of Old Town was last night shot in the wrist by Pete Lucero, the shooting occurring in the E. Gradi saloon on North Third street. Gradi, who was the proprietor of the saloon, was engaged in a red hot chewing the rag match, which quickly developed into something warmer when Lucero pulled a gun and started to pump lead into his opponent. Bystanders intervened until the arrival of Policeman Highberger, who hustled Romero off to the city jail, where he will be held until he is given a preliminary hearing tomorrow.

Romero's injury is not serious. The ball penetrated the fleshy part of the wrist, and it is expected that the arm will not be permanently disabled.

BACA GRANT SALE CONSUMMATED; COMPANY IS FORMED

Redondo Development Company Incorporated for Half a Million to Develop Rich Jemez Tract.

COL. W. S. HOPEWELL IS NEW MEXICO AGENT

Pennsylvania Men Headed by Governor Stone Purchase Vast Property; Means New Railroad to Albuquerque.

The deal for the sale of the Baca location No. 1 in the Jemez mountains, 100,000 acres of the most valuable land in New Mexico, has been consummated and with the final transferring of the deeds and other formalities possession of the property will be assumed by ex-Lieutenant Governor Charles W. Stone of Pennsylvania and his associates. Governor Stone, who is now in Albuquerque, would not give out any information last night pending the final legal transfer of the property and Colonel Hopewell, who has engineered the deal, was equally reticent. It is understood that the transaction will be finally completed at once.

This is one of the biggest deals in the history of the territory and it is current report, not officially confirmed, that a sum of over a half million dollars is involved in the transaction. Governor Stone, Mr. Wetmore of Pennsylvania and a number of other gentlemen arrived in the city the first of the week and have been in conference here for several days with Col. Hopewell and other local men concerned.

The sale of the Baca location, it is practically certain, means the building of a railroad from Albuquerque to the heart of the Jemez mountain country, one of the richest areas of undeveloped resources in the southwest, for years remote from railroad communication, full of the finest timber and minerals, with hot springs, magnificent grazing and agricultural land.

The building of a railroad into the mountains will mean much for Albuquerque, as it will make this city the center from which the development work is carried on.

That immediate steps will be taken to develop the Baca location is indicated by the incorporation in Santa Fe Saturday of the Redondo Development company, Col. W. S. Hopewell, New Mexico agent, headquarters of the company being in Albuquerque. The papers filed in the office of Secretary Nathan Jaffa show a capitalization of \$500,000, divided into 5,000 shares. Business will be commenced on \$212,000 subscribed, as follows: Charles W. Stone, Edward D. Wetmore and R. W. Rogers of Warren, Pa., 250 shares each; John B. Moore of Garland, Pa., 250 shares; Willard S. Hopewell of Albuquerque, 20 shares, these five being the directors; D. M. Howard and J. P. Jefferson of Warren, Pa., 50 shares.

AthleticsAlbuquerque Plays Slow Ball
and Exhibition Game Goes
to Socorro AggregationLOCALS UNABLE TO
GET STARTED FOR
FIVE INNINGSHIDALGO POUNDED FOR
EIGHTEEN TIMELY HITS"Red" Toner Had the Grays on
His Hip Yesterday and the
Gem City Team Won Out
Easily, 14 to 7.

The Grays were unable to connect to any great advantage with "Red" Toner's spit ball, and this, coupled with erratic fielding by the locals, was responsible for the defeat of the Albuquerque team by the Socorro aggregation at the fair grounds yesterday afternoon. The game and the 1500 purse going to the victors without any extraordinary efforts on their part. The final score was fourteen to seven. Albuquerque developing feeble batting streaks in the last four sessions, netting them seven runs.

Socorro made hay while the sun shone and garnered four runs in the second, two in the third, one in the fifth, four in the sixth and then pounded out another quartette of runs in the ninth just to make the game safe.

"Red" Toner was as fit as a fiddle yesterday and although nine hits were made of his delivery, managed to keep them well scattered. Backed by glib support Toner had a comparatively easy time of it and "Rube" Waddell, who had threatened to go in the box, was left to watch the game.

The feature of the contest yesterday was easily the hitting of the Socorro boys, who pounded Hidalgo for eighteen hits. "Red" pitched hard, but the Gem City bunch persisted in smashing the ball at will.

Things began to happen for Socorro in the second inning when Whittle singled and was sent to second by Durham's single. Toner hit for three bases, scoring Whittle and Durham and Curry singled, scoring Toner. Two more were netted in the third when Powell error, advancing Powell to second. "Rube" Waddell then put on demonstration his hitting ability against the final score by hitting for two bases, scoring both runners. "Rube" in the fifth, when he singled, scoring Kitchman who had got to first on a Texas leaguer and piffed second while the Grays were watching the horse racing. Toner started the big noise in the sixth when he singled and got to second on DeHass's error, who muffed a beautiful parabola, which Curry had hoisted to left garden. Donovan singled, scoring Toner and Curry. Donovan stole second on the throw in and Kitchman got to first on Salazar's overthrow. Donovan and Kitchman scampered to the plate when Powell singled. Socorro garnered four more for safety in the ninth. Durham and Toner singled and Curry scored both runners with a two base hit. Dow hit for two bases.

Scoring Curry. Donovan singled, scoring Dow. Things looked decidedly blue for Albuquerque until the sixth when Weeks hit for two bases and scored on Powell's error at first, one run being netted in this session. Two more were added in the seventh when Ambos singled and piffed second. Corhan got a pass and Pettus scored both on a Texas leaguer to right. Albuquerque made a determined effort to tie the score in the ninth inning, but the effort went the way nearly all eleven hour stunts go, although four scores were added. Corhan started things with a single, which stunt was duplicated by Briery. Pettus walked and Weeks followed suit, forcing Corhan home. Salazar then injected a little ginger into the situation by smashing one good for two bases, scoring Briery and Pettus. The score:

COAST LEAGUE.

Even Break at Los Angeles.

Los Angeles, Oct. 16.—Los Angeles and Sacramento split even today in two closely contested games the first going to Sacramento 3 to 2, and the second to Los Angeles 3 to 2. In the second game Butler retired in the sixth because of sudden illness. Only seven innings were played.

Fitzgerald was put out of the game in the fifth for disputing a decision. Score: First game, R. H. E. Los Angeles 3, Sacramento 2. Batteries: DeHass and Smith; Ehlman and La Longe.

Second game, R. H. E. Los Angeles 3, Sacramento 2. Batteries: Butler, Konner and Smith; Brown and La Longe.

Portland 10, Vernon 1.

Portland, Ore., Oct. 16.—After pitching a gift edge game up to the fifth, Vance suddenly weakened in today's game between Portland and Vernon and the locals piled up one run after another during the rest of the contest.

Score: R. H. E. Vernon 1, Portland 10. Batteries: Vance and Brown; Seaton and La Longe.

San Francisco, Oct. 16.—San Francisco defeated Oakland in today's game. Score: R. H. E. San Francisco 4, Oakland 1. Batteries: Eastley and Berry; Johnson, Wings and Thomas.

CHAMPIONSHIP CAPTURED BY PITTSBURG

(Continued from Page 1, Column 4.)

bounder to Bush and Bush's throw to Schmidt caught Miller at the plate. Abstein got too far off second base and was doubled up. Schmidt to Dehanty. Gibson forced Wilson. Bush to Dehanty, and the inning was ended. Mullin went on the slab in the fourth inning, but he was unable to stem the tide of Pittsburgh. Hyatt drew a base on balls and moved to second on Leach's single to left. Clarke sacrificed both runners along. Mullin to Tom Jones. Wagner was passed in order to bring up Miller. Miller upset the Detroit calculations by singling sending Wagner to third. Miller stole second but Mullin showed a flash of his form of the previous games of the series by striking out Abstein, ending the inning.

Pittsburg went out in order in the fifth but scored three in the sixth. After Hyatt went out Leach hit to left for two bases and Clarke walked. Wagner then smashed a three-bagger to left and scored on D. Jones' bad throw to third.

One more run was added to the Pittsburgh total in the eighth. Detroit threatened only two or three times. With one out in the second Dehanty walked and went to third on Moriarty's two-bagger to right. Tom Jones and Schmidt were away.

In the fourth Dehanty put a single to right with one out, and O'Leary popped to Wagner. Tom Jones sent another safe hit into the same place, putting Dehanty on second, but Schmidt's bounder to Leach forced Dehanty at third. Schmidt put a two-bagger to left with two out in the seventh and Dehanty did the same thing with two out in the ninth, but neither man got any further.

The score:

	AB	R	H	PO	A	E
D. Jones, lf	5	0	1	3	0	1
Bush, ss	5	0	0	2	5	0

Summary: Two-base hits—Moriarty, Dehanty, Abstein, Leach, Gibson. Three-base hits—Wagner. Hits—Off Donovan, 2 in 3 innings; Mullin, 6 in 6 innings. Sacrifice hits—Leach, Wilson, Clarke. 2 Adams, Sacrifice fly—Hyatt. Stolen bases—Clarke, 2; Abstein, Miller. Double play—Bush to Schmidt to Dehanty. Left on bases—Detroit, 7; Pittsburgh, 14. Bases on balls—Donovan, 6; Mullin, 4; Adams, 1. First on errors—Pittsburg, 1. Hit by pitcher Donovan—Byrne, Adams—Bush. Struck out—Mullin, 1; Adams, 3; Time, 2:09. Umpires—O'Loughlin, Johnstone, Evans and Klein.

FOOTBALL

Carelessness Feature at Omaha.

Omaha, Oct. 16.—Minnesota defeated Nebraska football team today by the score 14 to 6. The score hardly reflects the offensive playing of the two teams, as at least one of the Minnesota points resulted from carelessness. But no excuse can be made for the Nebraska team since this eleven excelled in all the material points of the game.

Army Loses to Yale.

West Point, N. Y., Oct. 16.—The Army lost to Yale today by the score 17 to 0. The caulets by hard play held the score down to nothing to nothing in the first half, but in the second they were overwhelmingly defeated.

The Army boys seemed helpless before the powerful running of Daly, Philbin and Vaughan of Yale.

Chicago Defeats Illinois.

Marshall Field, Chicago, Oct. 16.—Chicago defeated Illinois today 4 to 3 in a desperately played game. Chicago made the first score in the second half when Pace headed a punt on Illinois' 35-yard line and kicked a pretty goal from placement.

Fordham Beats Cornell.

Ithaca, N. Y., Oct. 16.—On two flukes due principally to the slowness and fumble of Cornell backs, Fordham won from the Red and White today, 12 to 6.

Brown Makes Good Fight in Vain.

Philadelphia, Oct. 16.—The University of Pennsylvania football team in a hard fought game today defeated

LEXINGTON HARNESS
RACE MEETING
CLOSES

Famous Horses From Kentucky
Track to Participate in Arizona
Territorial Fair Program
at Phoenix.

Lexington, Ky., Oct. 16.—The Kentucky Trotting Horse Breeders' association's thirty-seventh annual fall meeting closed this afternoon. A few of the horses will go from here to Phoenix, Ariz.

Summary:

2:06 class, pacing, purse \$1,000, 3 in 5—Major Mallow won in straight heats. Time, 2:08 1/2, 2:06 1/2, 2:06 1/2. Baron Whips, Eph Clinders, Texas Rooker, Mary Dillon also ran.

2:09 class, trotting, purse \$1,000, 3 in 5—Pensia Maid won in straight heats. Time, 2:06 1/2, 2:05 1/2, 2:08 1/2.

Stall stakes, purse \$2,000, 2:10 class, trotting, 3 in 5—Gonzalez H. won the third, fourth and fifth heats. Time, 2:12 1/2, 2:10 1/2, 2:10 1/2.

Results at Latonia

Cincinnati, Oct. 16.—Hannbridge won the feature event of Latonia today in easy fashion from the light weighted Dainty Dame with Richard Reed third. Results:

First race, 5 furlongs—San Francisco, 1 to 3, first Battle Fleet, second; Ossa, third. Time, 1:27.

Second race, 5 1/2 furlongs—Belle Clem won; Louist Bud, second; Claudia, third. Time, 1:37 4/5.

Third race, 1 mile—Hughes won; Creeps Beckham, second; Call, third. Time, 1:44.

Fourth race, handicap, 6 furlongs—Hannbridge won; Dainty Dame, second; Richard Reed, third. Time, 1:12 4/5.

Fifth race, 5 1/2 furlongs—Martin H. won; Top Nitch, second; Brandy, third. Time, 1:37 4/5.

Sixth race, 7 furlongs—Kennore Queen won; Anne McDee, second; Posing, third. Time, 1:24 2/5.

Long Shot Wins at Jamaica.

Jamaica, Oct. 16.—The Turk backed from 12 to 1, won the Lyabrook handicap for 2-year-olds here today. High Private won the Southold handicap by a head from Huck.

First race, 5 1/2 furlongs—Response won; Top Nitch, second; Amy L., third. Time, 1:38 2/5.

Second race, 1 1/8 miles—Queen Marguerite won; Black Mate, second; Patsy, third. Time, 1:48 2/5.

Third race, the Lyabrook handicap, 6 furlongs—The Turk won; Cheeryola second; Star Bottle, third. Time, 1:15.

Fourth race, the Southold handicap, 1 1/8 miles—High Private won; Huck, second; Firestone, third. Time, 1:44 4/5.

Fifth race, 5 1/2 furlongs—Martine H. won; Lou Lanier, second; Brandy, third. Time, 1:37 4/5.

Sixth race, 1 1/8 miles—Court Lady won; Campaigner, second; Lord Stanhope, third. Time, 1:49 2/5.

Brown University, 13 to 5.

New York, Oct. 16.—The Carlisle football squad here down on the Polo grounds today and defeated the Syracuse team, 14 to 11.

Lake Forest Proves Easy.

Bloomington, Ind., Oct. 16.—The Indiana University football team had little difficulty in defeating Lake Forest today, 27 to 5.

Princeton Forced to Fight Hard.

Princeton, Oct. 16.—Princeton won from the University of the South today, 26 to 9, after a hard fought contest.

Navy Goes Down to Defeat.

Annapolis, Oct. 16.—The Navy was defeated by the Villa Nova football team today, 11 to 6.

Harvard Outplays Maine.

Cambridge, Mass., Oct. 16.—Harvard defeated the University of Maine, 17 to 9, today.

SECTION TWO.

HITCHCOCK TAKES A LONG LOOK AT THE POSTOFFICE

NICE BUILDING SAYS THE POSTMASTER GENERAL

Demonstrates He Is a Mixer; Little Notes of the Notables on Albuquerque's Big Day.

"Nice building, Mr. Hopkins," said Postmaster-General Hitchcock admiringly to the local postmaster Friday as he stood and looked up at the new federal building now nearing completion at the corner of Fourth street and Gold avenue. Mr. Hitch-

cock didn't venture any prediction as to when the building would be finished and for that matter probably doesn't know much more about it than Mr. Hopkins. Anyway, he liked the appearance of it and said so. Mr. Hitchcock spent several hours with the postmaster looking over the local office and passing out the celebrated Hitchcock glad hand to the employees. Mr. Hitchcock is a mixer of the Al brand and showed it while in the city, making effective use of the near-Taft smile which has made him one of the most successful politicians of the administration. Mr. Hitchcock, who is 42, doesn't look it. He has a rather rosy youthful face, but you immediately know that he is a wise one when he begins to talk.

"Taft is a big man, big in every way," said Epes Randolph of Arizona in speaking of the President. "And he has a way of saying precisely what he thinks, whatever the sentiment of his hearers, that makes a hit with me." Mr. Randolph himself is a small man in one way—he is hardly five and a half feet tall—but as one of his Arizona compatriots said Friday, he is a giant otherwise. "Built a good deal like Harriman," said the friend alluded to, "and the same kind of an organizer." Randolph is a quiet,

unassuming man to meet, but according to reliable reports he is a galvanic battery when he gets to work.

"Forget it," said Colonel Powell of Douglas, Ariz., at the Alvarado Friday night. Colonel Powell is one of the most highly developed copper magnates in southern Arizona, a genuine copper plute, as it were, and looks the part. "I have been industriously trying to forget about mines on this trip," said Colonel Powell, in reply to a diplomatic query calculated to bring out a column interview.

"Anyway, he knows more about copper in a minute than I do in forty years," said Mr. R. A. Fowler, president of the National Irrigation Congress. Mr. Fowler for years was secretary of the irrigationists and is one of the most active and useful men in behalf of the development of the southwest. He has a good many friends in Albuquerque which he made during the irrigation Congress meeting here a year ago. He is an exceedingly pleasant gentleman to meet and in contradistinction to Colonel Powell knows more about irrigation in half an hour than the colonel does in a lifetime. Mr. Fowler said that everybody is busy down in Arizona and that the bringing of water on the land in the Salt River

valley and elsewhere is rapidly building up the population.

One of the prominent men in the Arizona bunch—prominent in any ordinary sized room at least—was the Hon. Marcus A. Smith, long the chronic delegate in congress from Arizona, and a leading politician in the territory, with a big following. "Our Mark," as he is popularly known in Arizona, is wide, stout and high up with a broad countenance which rivals the expansiveness of the Taft visage.

"The President is a safe man, pre-eminently so," said Mr. Griswold of the Chicago Tribune yesterday. "You will notice in every speech there is the same note of this is the law—observe the law—keep to the law—go slow—think about it carefully—don't be hurried into statehood. That is President Taft all over. The difference of the judicial, conservative temperament of the President, as compared to some preceding executive temperaments I think is interesting."

There is an equally good story of a New Mexico editor called to mind by the Taft anecdote at the banquet of the judge who was for the attorney's argument "in spite of it." This editor was the recipient of a letter from a

manager in the Taft campaign urging his support. "He is pledged to carry out the Roosevelt policies," said the letter. The editor wrote back that "in spite of the Roosevelt argument he was still in favor of Taft and would support him." The manager wrote in reply that he read the letter to the candidate for President and that the Taft smile developed into a resigning frown before it was over.

More Than Enough Is Too Much. To maintain health, a mature man or woman needs just enough food to repair the waste and supply energy and body heat. The habitual consumption of more food than is necessary for these purposes is the prime cause of stomach troubles, rheumatism and disorders of the kidneys. It results with indigestion, constipation, nervousness and not appetite control and take a few doses of Chamberlain's Stomach and Liver Tablets, and you will soon be all right again. For sale by all druggists.

M' Ewen the Master Magician Who Appears at Elks Theater Thursday Night

MASTER MAGICIAN AT ELKS THEATER THURSDAY

McEwen Hypnotist and Wonder Worker Will Play Three Night Engagement in This City.

The great McEwen, recognized as one of the master magicians of the world, and one of the greatest hypnotists, will demonstrate a three night engagement at the Elks theater in this city Thursday night of this week, October 21. McEwen is reported to give a good, clean hypnotic entertainment, entirely out of the ordinary line of such performances and unexcelled in baffling to the spectators. Manager McEwen says that the dramatic course of his acts has a distinct trend in store for them.

UNIQUE PRESENTS FOR PRESIDENT AT LAGUNA

Two or Three Thousand Indians and Others Gather at Ancient Village to Greet Mr. Taft.

[Special Correspondence to Morning Journal] Laguna, N. M., Oct. 15.—The greatest event in Laguna for many, many years was the visit of President Taft and party today. The special train was met by a delegation consisting of Mr. J. J. Manning, Earl Shuman and Samuel Allen, A. D. Allen, George H. Pratt, R. W. Gossard, Dr. F. C. Gilman, J. C. Thompson, E. R. Sherman, H. O. Morrison, Gus Webb and Superintendent Bartlett. Party of the Indian village at Albuquerque. The latter had a number of ceremonies and in addition the various members of the delegation contributed to the grand display by the committee who had then marched to the Indian village where the Indians of the pueblo of Laguna and Acoma received the president and party in a most impressive manner. The president was introduced with great ceremony to the Indian governor of Laguna and Acoma, William Pineda, and Laguna, Pineda. The party was then escorted to a conference room where the Indians were seated in two rows. The president and party were seated in the front row. The president viewed with great interest the old mission church and was shown through some of the houses and saw the Indians

gathering even and wheat as they have done it by hand for hundreds of years. There were some two or three Acomas and Mesquitos and Indians from the surrounding country present. One of the principal acts of the day was the unveiling of the Indian school pupils who greeted the president with songs and dances.

The following presents were made to the president:

Two Tons, two many years a wine and a fine carpet presented a beautiful Navajo blanket, with which the president was warmly pleased.

A novelty in the shape of a package of Indian bread was presented by young Stanislaus Weiss, with the following letters accompanying it:

"Presented to Hon. Wm. H. Taft, with the compliments of Stanislaus I. Weiss, seven years old, who lives New Mexico. He is 21 years old, he may have a chance to vote for president."

The following description also accompanied the bread, and is a facsimile of the letter that accompanied a gift to ex-President Roosevelt when he visited Laguna some years ago:

"This Indian bread is presented to Wm. H. Taft, President of the United States with the compliments of Stanislaus I. Weiss of Laguna, N. M. It is commonly called Homer's Nest Bread by people who only speak the English language. The Latin name of America is it is given; the Indians of the Pueblo of Laguna, Arizona."

"It is made of roughly ground corn meal and is baked on a hot stone. The two sides that the bread is for centuries before Columbus first crossed the Atlantic. It is baked as can be seen in shape like an eagle which are laid over each other until quite a considerable pile is made and then pressed together and folded like a newspaper. It is quite palatable and will keep indefinitely. It is good many years after it is baked as it is the next day."

"I love my again my hollow tree."

A gift of bread and liberty. From Mr. and Mrs. Gus Weiss came an eagle large Acoma Indian jar, made for the occasion by one of the most expert pottery makers of Acoma. The jar, which is one of the largest ever made in Acoma, is a beautiful piece of work and holds about twenty-five gallons. It is about six feet high and is the largest jar made by the Indians of Acoma.

Another handsome jar was presented to the president by the Indians of Acoma.

Silk and Bear Skin Bonnets at from50c to \$2.50

Quality is the First Consideration in this Store. Price is the Next

It is not a question of how much we can get for our goods, but what is the least we can sell them for and make a reasonable profit. We know we are selling goods, quality considered, cheaper than any merchant in Albuquerque. We are satisfied with a smaller profit. We believe that all of the people in this city of ours want a store that is dependable and to feel and know that they can buy goods at the lowest possible prices. That's why it makes it worth your while to pass all the other stores and do your shopping here. You know, our "Money Back" motto always holds good.

Perfectly Fashioned Apparel for Women, for Misses and for Children

The wide range of garments shown in our Women's Department makes this a distinctive Fashion Center for feminine apparel—a place where perfect assortments, perfect fitting facilities and perfect service are available to Women and Children alike. We have garments for Little Girls of 8 to 12, for "Juniors" of 12 to 16, for Misses of 14 to 20—and Women's garments in sizes 34 to 46. Comprehensive assortments of perfectly fashioned garments—Coats, Capes, Suits, Dresses—these await you here. In style, fabrics, in service qualities, in value—they are incomparable..

CAMEMBERT CHEESE WILL NOT FLOURISH IN AMERICA

Morning Journal Bureau
612 Main Building,
Washington, D. C., Oct. 14.

Efforts to establish the Camembert cheese industry in the United States have not been wholly successful, and it appears that this is largely due to the fact that climatic conditions of the year in most of the regions where factories have been located. It is believed, however, that the climatic disadvantages can be overcome by constructing factories in such a manner as to provide proper control of temperature, humidity and ventilation.

Camembert cheese is one of the best known and most highly esteemed of the European varieties of soft cheese, and large quantities are annually imported into this country. Efforts have been made to build up an industry for the production of this type of cheese in the United States, and to add in this direction investigations have been carried on for several years at Storrs, Conn., by co-operation between the Storrs agricultural experiment station and the United States department of agriculture. Numerous practical and scientific problems have been encountered, and these have been the subject of special study by Dr. Charles Thom. In a bulletin just issued by the bureau of animal industry of the department of agriculture, Dr. Thom presents a comprehensive view of the various processes and problems connected with the manufacture of the cheese in this country.

The home of the Camembert cheese is in France, especially in the northern section, the province of Normandy, and here are found the ideal natural conditions for its production. Most of the companies undertaking the manufacture of this cheese in America established plants with the object of reproducing as nearly as possible the buildings and equipment successfully used in France, and employed experienced cheese makers from that country. At one time the product of these American factories made up fully one-fourth of the total amount of Camembert consumed here. The production and sale of this cheese was, however, attended with uncertainties as to market and by numerous losses in the factory. So much difficulty and discouragement have attended these enterprises that some of them have been entirely abandoned and the product from all has been greatly reduced.

The trouble in the process of ripening in Camembert cheese are such that in order to use both temperature and relative humidity must be kept within certain recommended limits. Nature has furnished the French factory a way of working conditions which require only the feeding and feeding of the whey, with at times a moderate amount of artificial heat. A combination of meteorological records in northern France and northern American cities in which the climate is more similar to that of northern France, factories built in the United States for French conditions have actually produced the results a few weeks of each year and have experienced difficulties and losses at other seasons. The successful Camembert season in the eastern states is about six weeks, from October 15 to December 15. Since French factory construction has failed in America in the hands of experienced Camembert makers from

France, some changes are necessary. In Dr. Thom's opinion, either the location of the factory must be determined by the presence of the required climatic conditions, or the construction of the factory itself must make possible the production of those conditions when necessary. There is reason to believe that the Pacific coast affords favorable climatic conditions. Factories to succeed in the eastern states must provide control of temperature and relative humidity within closer limits than those obtainable with the French plans hitherto used. This may be obtained by better insulation of the rooms already built or by the construction of new rooms which may be partly or entirely below the surface of the ground. In either case the building must provide means for thorough but controlled ventilation sufficient to carry off moisture as fast as required.

In thinking up the progress of the work Dr. Thom declares that in spite of the failures which have occurred in the past there is good reason to believe that a readjustment of methods to suit the conditions will eventually bring permanent success to the Camembert industry in the United States.

Camembert cheese making for the general market is a factory proposition, but a good grade of Camembert can be made and cleaned upon the farm with comparatively simple and inexpensive equipment. The difficulty of making uniform cheeses, however, is greater when working on a small scale, and such cheese making on the farm can not at present be advised except for home use or for sale to a special market served directly by the producer.

Dr. Thom has also prepared for the benefit of consumers and also for the circular giving directions for selecting and handling Camembert cheeses so as to get those of good quality, utilize them in the best condition, and avoid losses. This circular may be obtained from the bureau of animal industry, Washington, D. C.

Where to Worship Today

FIRST METHODIST EPISCOPAL.
Rev. J. C. Rollins, D. D., Pastor.
The Sunday school meets at 9:45
o'clock every Sunday morning. D. A.
Porterfield, superintendent.

The Epworth League meets at 6:30
p. m. All young people are cordially
invited to attend.
Public worship at 11 a. m. and 7:30
p. m. At the morning hour Dr. Rollins
will preach—theme, "Christian Unity."
This will be Dr. Rollins' last
sermon before leaving for Colorado.
At the evening hour Dr. Thomas
Harwood will give a brief address.
This is the 50th anniversary of Dr.
Harwood's birth.

The G. A. R. has been invited to attend
in a body. The public is cordially
invited to attend.

ST. PAUL'S EV. LUTHERAN.
(Corner Sixth and West Street.)
Rev. J. W. Patzsch, Pastor.
Sunday school at 9:45 a. m., and
German services at 11:00 a. m. Rev.
Petrie will preach the sermon. Evening
services at 7:30, and in the absence
of the pastor at 8:00. Rev. J.
M. Seile will preach the sermon. All
are cordially invited.

EVANG. LUTHERAN MISSION.
Rev. P. Kretschmar, Pastor.
Divine services will be held by the
pastor at 10:30 a. m. every Sunday
morning at 10:30 a. m. A cordial
invitation to attend is extended.

FIRST BAPTIST
(Cor. Broadway and Lead Ave.)
J. A. Shaw, Pastor.
Preaching at 11 a. m.
Subject—"Foundations" and at 7:30
p. m. subject—"The Soldier and His
Sword."
Sunday school at 9:45 a. m.
Young People's meeting at 8:30 p.
m.

Sunday school at Baptist Mission,
North Second St. at 3 p. m.
The public is cordially invited.

SALVATION ARMY.
Capt. and Mrs. Clement and Lieutenant
Barnett, Officers in Charge.
Sunday morning open air services
10:30 a. m.
Sunday morning business services
at 11 a. m.
Sunday afternoon Sunday school at
2 p. m.
Sunday evening open air services at
7 p. m.
Sunday evening the Rev. F. Britton
will preach in the hall at 8 p. m.

CHRISTIAN SCIENCE
(At the Library Building)
Services 11 a. m. Subject—"Dedication or Alignment." Sunday school
12:15. Testimonial meeting, Wednesday
7:30 p. m. Reading room open
Monday, Wednesday and Friday, from
2 to 4 p. m.

SECRETARY WILSON CHALLENGES DRY FARM METHODS

Cabinet Members' Opinion Will
Be Subject of Lively Discussion
at Fourth Annual Congress in Billings.

[Special Correspondence to Morning Journal]
Billings, Mont., Oct. 15.—Secretary James Wilson of the department of agriculture has shown a deep interest in the progress of dry farming in the west and has devoted considerable attention to it in his report published in the year book of the department, but he takes issue with many of the exponents of certain systems of so-called dry farming, and it is likely that his expression of opinion on the details wherein he differs from the western experts will precipitate animated discussion at the Fourth Dry Farming congress at Billings, Mont., October 26-28.

Secretary Wilson was invited to attend the coming congress, but in a letter to Governor Norris of Montana, president of the dry farming congress, has expressed his regret that he will be unable to be present in person. However, he will send a message to the congress to be read at the opening session. An idea of his position regarding certain details of dry farming methods is given in his letter to Governor Norris, in which Secretary Wilson says:

"I have just returned from a month's visit to the mountain states where we have numerous dry farming experiments going on, and I have been visiting them. It is one of the most prominent and interesting studies of this time. We know what is wanted to some extent and are close students of the conditions in the light rainfall districts of the west. We began some years ago getting plants from dry lands in foreign countries, where they have severe winters, that would be suitable for our conditions west of the 100th meridian, and are having success. We have hardly alfalfa brought last year from Siberia, also clover and other plants. That is one thing that has to be done, and another thing that needs careful study is the dry farming countries where very gross errors are being made and some very questionable methods are being pursued; that is, they plow two years for one crop, the plan being that the precipitation of two seasons will be grouped toward the growing of one good crop. This will succeed for a number of years, but it cannot succeed permanently. That is why this department has been scouring the world for plants that will grow and put organic matter in the soil during the year that is now occupied in following. I have been a close student of this practice during my recent visit in the west.

"I would be delighted to be present with you and discuss these matters, but really I have to direct the movements of so many scientists here and in many different parts of the country and in so many varied lines of enterprise, that it is rarely that I can leave my desk. What time I could spare this summer has been given more to the study of dry land farming than anything else. I know we will eventually solve these problems, but it requires the ability of the best men we have to do it, and it requires federal money to pay these men. It also requires looking over the habitable globe where it is hot in the summer and very cold in the winter to get plants suitable. This we are doing. I would be entertained by meeting your people and discussing these matters with them, but, any way, we will eventually solve these problems, but it requires the ability of the best men we have to do it, and it requires federal money to pay these men. It also requires looking over the habitable globe where it is hot in the summer and very cold in the winter to get plants suitable. This we are doing. I would be entertained by meeting your people and discussing these matters with them, but, any way, we will eventually solve these problems, but it requires the ability of the best men we have to do it, and it requires federal money to pay these men. Corinne and Company in "Mlle. Mischief" Which Appears at Elks' Theater October 25

MLLE. MISCHIEF WITH CORINNE COMING IN FOUR CARLOADS

Full New York Company Coming from Los Angeles Directly After Close of Engagement to Albuquerque to Present Splendid Shubert Attraction on October 25; Manager Promises They Will Get Here Early in the Morning.

"Mlle. Mischief," the beautiful Viennese opera with Corinne as the star and a company that requires two Pullman cars to carry, will arrive in Albuquerque Monday morning, October 25, to play at the Elks' theater the same night. They will present the identical attraction with the identical company that made the phenomenal success in New York.

This very pleasing announcement was made to the Morning Journal last night by Fred J. Bailey, manager for this splendid Shubert attraction, who wanted it particularly understood that the company will get here in the morning in plenty of time so that the experience with "The Witching Hour" here some time ago will not be duplicated.

The Shuberts got a letter from Albuquerque some time ago," said Mr. Bailey, "with the interesting statement that Albuquerque is the only city in the United States that has had the pleasure of seeing 'The Witching Hour' played at the witching hour of 2 o'clock in the morning. The audience and notoriety of this attraction has made a big hit with the Shubert people."

"The Mlle. Mischief" company," said Mr. Bailey, "leaves Los Angeles immediately after close of the Saturday matinee October 22. The four cars carrying the outfit, two scenery and equipment cars and two Pullmans, will probably be run by the

NAT REISS TO STAY OVER; MARDI GRAS MONDAY NIGHT

BIGGEST SHOW OF ALL
IS YET TO MATERIALIZE

Great Masked Carnival for the Shriners Will End Stunts on the Plaza.

It will be good news to everybody to know that Nat Reiss and the best carnival layout that ever came to Albuquerque will remain here until Monday night, when the grand finale of the whole celebration will come off on "The Plaza," which has been the scene of so much gaiety for the past week and which has seen bigger crowds of merry-makers than any carnival ever held in this city. Monday night for the benefit and in honor of the Nobles of the Mystic Shrine a great Masked Carnival and Mardi Gras will be held on the Plaza with some stunts by the Reiss outfit which will literally cap the climax. Nat is going to outdo himself Monday night and it looks as if this would be the big doings of the whole carnival season. Tuesday morning Nat and his company will fold their tents like the Arab and make a getaway, followed by the regatta of everybody in Albuquerque and thousands of visitors from all over the territory—for Nat's carnival is the goods and has shown a most good time to thousands.

Mothers find Perry Davis' Pain-Killer invaluable in the nursery, and it should be kept at hand in case of accident. For pain in the breast take a little Pain-Killer in sweetened milk and water, bathing the breast in it clear at the same time. If the milk passages are clogged, from cold or other causes, bathing in the Pain-Killer will give immediate relief. Ask for New 35c Bottle.

GRAND LODGE MEETS IN ALBUQUERQUE TOMORROW

Masonic Organizations to Convene in Annual Session; Something Doing Every Day This Week; Big Shriners' Parade Tomorrow.

All this week will be a gala week for the various Masonic organizations. There will be something doing all the time from 11 o'clock tomorrow morning, when the Nobles of the Mystic Shrine will give one of their inimitable street parades, until late Friday night when a brilliant banquet will be given in Elks' banquet room by the Order of the Eastern Star. The week will be filled with notable events in Masonic circles, interesting meetings, election of officers, banquets and smokers. Tomorrow morning promptly at 11 o'clock the Shriners will have their yearly parade, which has become a classic for its gorgeousness. Camels, elephants and monkeys, together with many other features, will be in the pageant.

The Masonic Grand lodge will convene Monday morning and will hold its sessions in the Elks' lodge room. The Nobles of the Mystic Shrine will hold their sessions in Ballin Ayad temple.

WOMAN FACE TRIAL FOR DEATH OF HUSBAND

Paris, Oct. 16.—The trial of Mme. Adolph Steinhilber for the murder of her husband and mother-in-law, Mme. Jappi, will open November 2. The indictment finds a motive for crime in the hatred Mme. Steinhilber bore her mother-in-law, coupled with the desire to rid herself of her husband in order that she might marry the wealthy merchant, Maurice Bonwell.

CURRY COUNTY HAS FINEST DRY FARMING EXHIBIT EVER SEEN IN NEW MEXICO

Youngest County in Territory Carries Off First Premium at Territorial Fair for Strictly Dry Farming Displays and Takes Fourth Award in Competition With Irrigated Counties.

Curry county, New Mexico, was yesterday awarded first premium by the committee of judges for the best dry farming exhibit at the territorial fair.

This exhibit which displayed an imposing array of fruits, vegetables, grasses and cereals, excited the most admiring attention all during the fair and is a marvellous collection of products when it is considered that they are raised in the newest county in the territory barely two years old, a county where three or four years ago there was hardly a settler. The exhibit reflects great credit on the enterprising citizens who got it together.

So creditable was the display that the committee of judges decided to give the Curry county men a diploma for the finest exhibit of dry farming products ever seen in New Mexico. When there is taken into consideration the great list of fine exhibits shown at the irrigation congress and exposition last year, this is a big and a thoroughly deserved honor that Curry county has won. In addition the Curry county exhibit took fourth

premium for agricultural products in competition with the irrigated counties.

The following individual premiums were also awarded Curry county exhibits:

First on flax.
First and second on broom corn.
Largest watermelon, best five watermelons and best three watermelons.

First on millet.
Second on wheat.
First on Milo maize and Kaffir corn.

First on five squashes.
First and second on orange plants.
First on sorghum cane, also on peanuts and popcorn.

Second on night peppers.
Second on individual exhibit of grains, potatoes and corn, by dry farming methods.

The display was in charge of Councilman W. D. McElroy and Judge W. M. McElroy, and shows what intelligent skill, two of the best growers of New dry farming methods will produce when followed out by active farmers.

MISSING STRANGER BELIEVED TO BE HORSE THIEF

Mysterious Man Who Disappeared from Santa Rosa Found to Have Forty-four Fine Animals.

(Special Dispatch to the Morning Journal)
Santa Rosa, N. M., Oct. 16.—It is believed that a strange man who rode into Santa Rosa Tuesday of this week and mysteriously disappeared may be one of the boldest horse thieves in the profession. The man rode in on a horse, hitched his mount on Main street in the afternoon and was last seen in a disreputable resort on the

outskirts of the city about 2 o'clock Wednesday morning. Since then nothing has been seen or heard of him. His horse is in the hands of the sheriff. Deputy sheriff Fred Lines learned tonight that the missing man has forty-four fine horses with the brand of P. W. Collins of McMullen, N. M. These horses are now in Puerto de Luna, twelve miles south of Santa Rosa. Whether the missing man is the owner of the horses or rented them is a mystery and every effort is being made by the authorities to learn what became of him.

Coffee is a hidden but powerful enemy to one's progress in life. Its subtle, narcotic poison, weakens heart, interferes with digestion and has a definite and destructive effect on the nervous system. People who are content to load themselves with impediments to progress, who refuse to supply body with food and drink of the kind needed to make up for the daily disintegration of nerve and brain tissue, must stand aside in the race.

The ones who are properly fed will surely win the laurels.

Postum furnishes the gluten and phosphates of grain needed by Nature to nourish brain and nerves with food. When made right, that is, boiled 15 minutes after boiling in water, it has a delicious taste similar to the mild, high-grade Java, but with none of the bad effects of coffee.

There are those who are entirely careless as to what goes into the stomach, but the one who would make all his movements tend toward health and possible greatness can know by a personal test.
