## \$20,000,000 FUND DIVIDED AMONG 14 PROJECTS

President Approves Report of Army Board Apportioning Immense Sum Provided By Congress for Reclamation.

\$4,500,000 FOR WORK IN RIO GRANDE VALLEY

Carlsbad and Hondo Enterprises to Receive Only Money Sufficient for Maintenance and Operation.

[By Morning Journal Special Leased Wire] Washington, Dec. 26.—President Taft has approved the report of the special board of army engineers recommending the apportionment of the new \$20,000,000 fund, provided by congress, among the following reclamation projects in the west:

Salt River, Ariz., \$495,000; Yuma, Ariz., and California, \$1,200,000; Grand Valley, Colo., \$1,000,000; Uncompahgre, Colo., \$1,500,000; Payette-Boise, Idaho, \$2,000,000; Milk River, Mont., \$1,000,000; North Platte, Wyo., and Nebraska, \$2,000,000; Truckee-Carson, Nev., \$1,193,000; Rio Grande, New Mexico, Texas and Mexico, \$4,500,000; Little Bel, Ore., \$225,000; Klamath, Ore., and California, \$600,000; Strawberry Valley, Utah, \$2,272,000; Sny-Lease and Tieton, at Yakima, Wash., \$1,250,000, and \$665,000, respectively.

The \$20,000,000 is to be spent within the next five years and the interest on the loan is to be charged against the projects.

The following projects, completed or nearing completion, carry a recommendation for the funds from the general reclamation act sufficient only for maintenance and operation:

Orland, Cal.; Carlsbad, N. M.; Hondo, N. M.; Garden City, Kan.; Klamath, Wash.; and the units of the Yakima, Wash., project.

For the following existing reclamation projects the board of engineers in the report approved by the president, recommends allotments from the general reclamation fund:

Missouri pumping, N. D.; Bellevue, S. D.; Shoshone, Wyo.; Minidoka, Idaho; Huntley, Mont.; San River, Mont.; Lower Yellowstone, Mont.; Okanogan, Wash.

In his letter to the secretary of the interior approving the report of the engineers, President Taft says in part: "I hereby approve the report of the board of engineers in respect of the reclamation projects, to which they have made allotments from the \$20,000,000 fund; but this approval, so far as the amounts of the allotments are concerned, is not final and absolute, but is intended to be subject to change by adjustment and modification of the amounts to be necessary for the intelligent and proper prosecution of the work, and to the advantage of the service."

"You are authorized to call upon the secretary of the treasury to issue the certificates of indebtedness needed to carry out the work in accordance with the allotment recommended by the board and approved by me as the same shall be needed from time to time in pursuance of the terms of the act."

The remainder of the report of the engineers which was not responsive to the direction of the law but was drawn at my request and for my information, I hereby approve; and when congress reconvenes in January, I shall submit a message to the two houses, transmitting the report and announcing my approval for the same and urging the adoption of the enabling legislative measures recommended by the board."

In its comprehensive report on the reclamation work in general, the engineers board says, in part:

The engineering structures of the various projects are, as a whole, well designed and well built. Some of them, as the Pathfinder dam, the Shoshone dam, the Roosevelt dam and the Gunnison tunnel, are monuments reflecting great credit on both designer and builder.

Modern irrigation being a relatively new art in this country, much freedom was allowed the local engineers in the design of minor structures. While this was a wise policy in the early stage of the work, it has resulted in some complicated and unnecessarily expensive structures. With the present knowledge of the comparative merits of the different types, it is believed that standard designs of the simplest satisfactory type should be adopted for all minor structures.

"The most uncertain feature of nearly all the projects is the water supply. This is under state control, and in the prosecution of its work the reclamation service bears the same relation to the states as to a private individual or corporation. Where the water rights have been adjudicated, the rights of the United States are well defined, but elsewhere they are uncertain and may prove to be materially different from that assumed."

"It is recommended, that wherever possible, steps be taken to secure an early adjudication of water rights on all projects where such adjudications have not yet been made, and that, pending such action, expenditures be kept within the probable rights of the United States."

The actual cost of completed work has almost invariably exceeded the original estimates, and in the case of some structures has been two or three

times as large. This increase in cost has been the cause of much of the discontent among the settlers. It was partly due to a general increase in the cost of labor and materials, partly to under-estimates and an insufficient allowance for contingencies, and partly to the necessity of doing more work than was originally contemplated."

Under existing regulations, the report sets forth the construction charges must be returned to the reclamation fund in ten equal annual payments. This it is said, is regarded as a hardship by the settlers on some projects, who express a desire for a series of graduated construction payments increasing from one per cent or two per cent, the first year, to four per cent or fifteen per cent, the tenth year. Should this suggestion be generally adopted it is pointed out, it would mean a delay of several years in the return of the first half of the investment and a corresponding delay in the completion of other work.

"One some of the projects in the semi-arid regions," say the engineers, "such a modification in the terms of payment may be necessary to prevent an absolute failure of the project, but the general adoption of a system of graduated payments is not believed to be necessary or advisable."

### SOUTHERN EDUCATORS MEET IN CHATTANOOGA

Chattanooga, Tenn., Dec. 26.—The Southern Education association, with representatives from the sixteen southern states, will convene in this city at 10 o'clock tomorrow morning. It is expected that between 500 and 1,000 delegates will be present.

Mayor Gaynor of New York, Senator R. L. Owen of Oklahoma and Bishop T. F. Gailor of the Episcopal church, are among the speakers. There will be morning and night meetings of the general association and the sixteen departments will hold meetings in the afternoon.

### LIBBYS IN DEAL TO BUY OUT ALASKAN CANNERIES

Seattle, Wash., Dec. 26.—According to the Times negotiations are being carried on for the sale to Libby, McNeill and Libby of Chicago of ten salmon canneries in Alaska and the ships and other property owned by the Northwestern Fisheries company, a Guggenheim corporation. The price to be paid is reported to be \$1,000,000. Local officers of the fisheries company will neither deny nor affirm the report.

The full rigged ships St. Paul, Elwell, J. D. Peters, A. J. Fuller and Benjamin F. Packard, A. C. Goss and Harvester are said to be included in the deal for the sale of the Northwestern Fisheries company.

### WHITE TO ABANDON CROSS CHANNEL FLIGHT

English Aviator's Injuries Prevent Effort to Win Prize; Sopwith Has Best Chance at \$20,000.

[By Morning Journal Special Leased Wire] London, Dec. 26.—Acting on the instructions of his medical adviser, Claude Grahame-White, who had a narrow escape from serious injury a week ago, and whose aeroplane was burned Sunday, has decided to forego further attempts at flight across the English Channel for the prize of \$20,000.

Because it would interfere with the Christmas holidays of the men, the admiralty has refused to permit Grahame-White's request to have torpedo boats accompany him on his flight across the channel.

Only five days more for the competition remain and two competitors are still in the field. Robert Leckie, an actor and Captain F. S. Cody. It is likely, however, that young Sopwith, who, in a flight from Sharnbrook, crossed the channel and covered more than 170 miles, landing in Belgium, will prove the winner. It is not unlikely that Grahame-White's withdrawal from the contest was in part due to the refusal of the admiralty to lend its aid to the aviators.

James Gordon, nephew of the late Mayor Grace of New York who was last week in a return flight across the channel from Calais.

### THREE LITTLE CHILDREN ARE BURNED TO DEATH

Glasgow, Ky., Dec. 26.—On returning home on an errand today, Mrs. Robert Boles of Wisdom, Ky., found her home in ashes and in one corner of the ruins, the charred bodies of her three young children.

When Mrs. Boles left home she carefully covered the fire and locked the doors. It was evident that the children had tried to escape, but were trapped.

### Four Little Ones Cremated.

Montreal, Que., Dec. 26.—Four small children of Oscar Chilwood, who was shot to death by a mob early today, have been cremated until tomorrow. Coroner Randolph has summoned a jury, composed entirely of business men, and announced that the inquiry is being held.

### INQUEST TO BE HELD OVER BODY OF MOB'S VICTIM

Hot Springs, Ark., Dec. 26.—To permit the collecting of evidence, the inquest over the body of Oscar Chilwood, who was shot to death by a mob early today, has been deferred until tomorrow. Coroner Randolph has summoned a jury, composed entirely of business men, and announced that the inquiry is being held.

The actual cost of completed work has almost invariably exceeded the original estimates, and in the case of some structures has been two or three

## GRAND STATEHOOD RALLY

Thursday evening at Elks' theater, will occur one of the most important meetings in the history of New Mexico. Prominent men, both republicans and democrats will address the gathering, explaining the provisions of the constitution for New Mexico, recently framed by the convention at Santa Fe, and which is to be voted upon by the people of this territory, January 21. Among the speakers will be Governor Mills and Hon. O. A. Larrazolo, besides a number of local orators of note. The meeting will be a strictly non-partisan affair and no voter, no matter what his politics, can afford to miss this opportunity of informing himself on the provisions of the constitution. It is expected that this meeting will mark the opening of an active campaign in Bernalillo county for the ratification of the constitution and every citizen who has the interest of the new state at heart should make it a point to be present.

## FORTY PLEAD GUILTY TO SELLING VOTES FOR ARIZONA THIS TIME

Astounding Revelations of Corruption at Polls in Ohio; Fifteen Hundred Indictments Expected.

[By Morning Journal Special Leased Wire] Columbus, O., Dec. 26.—The appearance of E. W. Crawford, state printer and former editor of a West Union newspaper, before the special grand jury in Adams county today as a witness in the investigation of vote buying, was a feature of the probe. As a result of today's work, 1250 men were indicted for selling their votes. This brings the total number of indictments up to 755. Of these 154 have acknowledged their guilt and have been punished by disfranchisement, fines and workhouse sentences.

Most of them are backwoodsmen, unable to pay their fines but their promises in most instances were accepted and they were spared imprisonment. Alleged threats or rumors of threats against Judge A. Z. Blair, who is conducting the investigation, did not result in any disorder today. Officers do not expect any trouble, they say. It was said today at the court house at West Union that the total number of indictments before the week is finished will be 1,500.

### PROMINENT MEN TO ANSWER FOR BRIBERY

Manchester, Ohio, Dec. 26.—The largest parade witnessed in this town since the close of the November election campaign, took place today when automobiles and carriages, containing thirty-five men left for West Union.

The thirty-five men, comprising some of the wealthiest and most prominent in the county, are to be called before Judge Blair tomorrow to plead to indictments, charging them with either bribery or accepting bribes in connection with the recent election.

### QUIET CHRISTMAS AT THE NATIONAL CAPITAL

Washington, Dec. 26.—Christmas Monday in the national capital was as quiet as Christmas day. President Taft surprised his staff at the executive offices by appearing there for an hour in the morning and reading his mail. Secretary Nagel and Secretary Meyer called on the president.

In the afternoon the president and Mrs. Taft drove around the city, calling at the residence of Admiral Dewey.

### Ballooning Killed at Havana.

Havana, Dec. 26.—Frederick Brown, a circus performer of Buffalo, N. Y., while attempting to make a balloon ascension today, struck a projection of a building. He fell 100 feet to the ground and was killed.

### Little Girl Accidentally Killed.

Ewing, Mo., Dec. 26.—Rosa McCoy, 11 years old, daughter of Edward McCoy of Clinton, Mo., was shot and instantly killed at the home of her grandparents today, when a gun which her uncle, Ben Tremore, was cleaning, was accidentally discharged.

### SLAPPED HIS SISTER SLAIN BY BROTHER

Prescott, Ariz., Dec. 26.—On the eve of his wedding because it is alleged he had slapped his sister, George Hendricks was shot and killed by his brother, William Hendricks, today. The shooting occurred at the store of the father of the man. At the time the older Hendricks was in search of an officer to have his sons arrested.

### Hay Warehouse Burns.

Stockton, Cal., Dec. 26.—Ten thousand tons of hay stored in a warehouse here was destroyed by fire today. Loss, \$125,000.

### KISS LANDS CHRISTMAS CALLER IN PRISON CELL

Asheville, N. C., Dec. 26.—Because it was charged he was carried away by an exuberance of osculatory zeal and unlawfully inflicted a kiss on Mrs. Zella Ward, James Ramsey is tonight cooling off in the city jail, charged with insulting Mrs. Ward.

Ramsey made a holiday call at the Ward home today and was admitted as a friend of the family. He kissed Mrs. Ward as he was leaving and in the presence of her two small children. Mrs. Ward immediately left the house and returned with a policeman, who took Ramsey in charge.

## NO STATEHOOD FOR ARIZONA THIS TIME

GOVERNOR SLOAN FINDS  
ALL PARTIES HOSTILE

Democrat, Republican and Progressive in Congress, United in Belief That Act Framed at Phoenix Is Impossible.

[By Morning Journal Special Leased Wire] Newark, N. J., Dec. 26.—A statement on the New Jersey senatorship situation was issued tonight by James Smith, Jr. Mr. Smith's statement is in the nature of a reply to Governor Elect Wilson's recent declaration in favor of the New Jersey democratic party's primary choice, James A. Martine, as opposed to Mr. Smith's candidacy for the United States senate.

Mr. Smith's statement says in part: "Dr. Wilson's statement is as I expected it would be. It appears over his signature, but the reasoning is not familiar. The charges and insinuations suggest a harassed mind. Uninfluenced, Dr. Wilson would have been above misrepresentations."

"But certain public applause has proven fatal to calm judgment. He has been swept to the height with such suddenness that his judgment was accompanied him. He has my sympathy."

"He asserts that I am pledged to special interests. He was charged with being Wall Street's candidate. I say neither statement is true, and Dr. Wilson should have been the last man to assert the contrary. I do not stand for free trade, free silver or new nationalism. I stand for state rights, for a just tariff for such conservation of our natural resources as will permit of their wise development, not their wasteful distribution; for the restoration of our merchant marine, and for other enterprises which I recently publicly enumerated."

### GOVERNMENT TO SPEND MONEY FOR DAM IN MEXICO

Washington, Dec. 26.—Arrangements between the state department and the Mexican embassy have been concluded for the construction of a dam and levee on the lower Colorado river in Imperial valley. Congress at the last session appropriated \$1,000,000 for the work.

Under the arrangements the construction will be carried on by the Colorado River Land company, a Mexican corporation, the stockholders, in which are Americans. It is provided that the United States does not acquire any right of ownership or easement either in Mexican territory or the work of construction on Mexican territory, where the dam will be located. The works are to be built from surveys approved by a Mexican engineer.

### Cotton Broker Commits Suicide.

Galveston, Texas, Dec. 26.—Arthur J. Baum, a well known cotton broker who inaugurated the movement a few months ago for a monument to the "Black Mammy," committed suicide in a hotel here today. He leaves a widow and one daughter.

### ROOF OF TABERNACLE CAVES IN ON PREACHERS

Barberton, O., Dec. 26.—While a number of preachers and fifty deacons and laymen were putting the finishing touches in celebration of Christmas to a new tabernacle, which was built for a series of revival meetings, the roof caved in, killing J. H. Myers, a real estate dealer and injured several others. Two preachers are among those hurt. One of the injured may die.

### TWO DEAD IN FIGHT WITH PISTOLS IN GEORGIA

Waycross, Ga., Dec. 26.—Two persons are dead, a third is wounded and a fourth is probably dying as a result of fights southeast of Waycross yesterday and today. The dead are Walter Allen and Dancer Crews. Allen was shot through the heart by Walter Crews, who in turn was shot by the dying man as he fell.

### CHILDREN POISONED BY MISTLETOE BERRIES

Bokoshe, Okla., Dec. 26.—Eating mistletoe berries here today, caused the deaths of three children and the serious illness of two others. Two of the dead children belonged to Francis Wright and the other to Benjamin Wright. The ill children are members of neighboring families.

## CANDIDATE REPLIES TO DR. WILSON'S STATEMENT

Smith Denies He is Pledged to Special Interests; Says Governor-elect Called New Jersey Primary a Farce.

[By Morning Journal Special Leased Wire] Newark, N. J., Dec. 26.—A statement on the New Jersey senatorship situation was issued tonight by James Smith, Jr. Mr. Smith's statement is in the nature of a reply to Governor Elect Wilson's recent declaration in favor of the New Jersey democratic party's primary choice, James A. Martine, as opposed to Mr. Smith's candidacy for the United States senate.

Mr. Smith's statement says in part: "Dr. Wilson's statement is as I expected it would be. It appears over his signature, but the reasoning is not familiar. The charges and insinuations suggest a harassed mind. Uninfluenced, Dr. Wilson would have been above misrepresentations."

"But certain public applause has proven fatal to calm judgment. He has been swept to the height with such suddenness that his judgment was accompanied him. He has my sympathy."

"He asserts that I am pledged to special interests. He was charged with being Wall Street's candidate. I say neither statement is true, and Dr. Wilson should have been the last man to assert the contrary. I do not stand for free trade, free silver or new nationalism. I stand for state rights, for a just tariff for such conservation of our natural resources as will permit of their wise development, not their wasteful distribution; for the restoration of our merchant marine, and for other enterprises which I recently publicly enumerated."

"Dr. Wilson says that he was assured by my spokesman before his nomination that I would not be a candidate for the senatorial office. I never would have made such a statement. No one was ever authorized by me to make such a statement and no one representing me made such a statement to Dr. Wilson."

"Furthermore, here is a challenge which I do not intend to accept. Let him name the man or men coming from me who so informed him. Let there be no hiding behind the seal of confidence. If he be my spokesman, I remove the seal. Let Dr. Wilson speak out or by his silence stand convicted before the public of attempting trickery and deceit."

"I called upon Dr. Wilson shortly after election. The senatorial matter was discussed. I told him that I had not yet reached a decision as to my candidacy. Professing a high regard for me, Dr. Wilson said that my candidacy would meet with some opposition from the people; that in his judgment they wanted a man who had not previously appeared in the political arena; some untitled man."

"Stating that the recent primary was a farce and that it would be a disgrace to the state to send James E. Martine to the senate, he asked me to sit down with him and agree upon a candidate, who would be acceptable to him and to me."

"How will I wear the doctor's seal to have his seal, as to the primary and as to the man he now lauds for senatorial honors, brought home to him with such painful accuracy. He will try to disavow it, but it is true, and in his heart he knows it to be true."

## REIGN OF TERROR IN STRIKE RIDDEN MINE TOWN

Three Murders in Twenty-four Hours in Westmoreland District; Authorities Fear General Outbreak.

[By Morning Journal Special Leased Wire] Greensburg, Pa., Dec. 26.—The strike-ridden coal fields of Westmoreland county are in the throes of rioting, the result of large quantities of liquor being shipped into the various mining camps. The third murder in twenty-four hours was reported to the coroner today in the death of Tony Carcano, a striker who was formerly employed at Osborn. Carcano was living in a striker's camp and was

shot to death last night when there was an assault on the camp. About seventy-five shots were fired.

There have been repeated demands for the state police all day from various parts of the coal fields. The authorities fear that there will be a general outbreak all over the coal fields because of liquor.

### COLD WATER DRIVES AWAY DESIRE FOR DEATH

Chippewa Falls, Wis., Dec. 26.—John Christiansand jumped forty feet from today's icy water into Chippewa river today with suicidal intent. He went under the ice and came up 200 feet downstream at an air hole. He grabbed the ice and crawled out. He went home and said that the cold water made him feel so much better that the desire to die had suddenly left.

Reception to American Naval Officers, Brest, Dec. 26.—The municipality of Brest today gave a brilliant reception in honor of Rear Admiral Murdoch and the officers of the third division of the United States Atlantic fleet. About 700 persons attended the functions.

Bubonic Plague Kills 23. Harbin, Manchuria, Dec. 26.—In the Chinese suburb of Fudziadia there were twenty-three deaths from bubonic plague in houses and streets on Christmas day. Ninety-eight persons suffering from the disease were taken to a hospital.

### MURDEROUS MINER SHOT DEAD BY POLICEMAN

Wellston, O., Dec. 26.—At the home of a sick neighbor, Frank Buckley, a miner today stabbed his wife, fatally, ordered Mrs. Louise Boggs, a neighbor to leave her sick bed and go out in the snow and drove her hand away. Buckley then placed his wife on a sofa and with a knife and revolver threatened to kill anyone who tried to arrest him or to minister to his wife.

The police were called and Patrolman Shires shot Buckley through the heart. Buckley had accused his wife of preferring Boggs' nephew, who was visiting at the house. Buckley's two little children were witnesses to the crime.

Grand Duks Meet Austrians. St. Petersburg, Dec. 26.—Grand Duke Nicholas Nikolaevich, Michael Nicholaevich and Serge Mikhalovich today departed for Skierskewich, Russia-Poland, where they will hunt with nine Austrian persons, among them Archduke Rudolph, crown prince of Austria. The highest importance is attached to the meeting.

## PREDICTED HORNET WILL BE USED BY INSURGENTS

Generals Bonilla and Lee Christmas Sail From New Orleans for Honduras to Lead Movement Against Government.

[By Morning Journal Special Leased Wire] Washington, Dec. 26.—Manuel Bonilla, former president of Honduras, and General Lee Christmas, an American soldier of fortune, both of whom appeared after the steamer Hornet left New Orleans several days ago, have sailed for Honduras aboard a passenger steamer to lead a revolution in that country according to private dispatches received today. Bonilla and Christmas, it was said tonight, took every precaution that neutrality laws might not be violated in connection with the sailing of the Hornet, but their agents are expected to meet the vessel at some point in Central America and formally charter it for use in transporting munitions of war up and down the coast.

Parmales driver of the "Baby" Wright, also dived the wind and attained an altitude of 6,625 feet. He electrified the crowd by a series of whirling and swooping maneuvers. The Frenchman was among the first of the aviators who answered the starting gun at 1 o'clock. For two hours and fifteen minutes he fought the wind which blew directly off the ocean, six miles from the aviation field. Then an adverse current slipped his plane and he was hurled into a fence under the power of a hull and threw the aviator into a gully.

The Frenchman was unhurt, but his machine was a tangled mass of wire and broken rods. The motor was the only part left intact, and Latham declared that having enough parts for three extra machines he would build a new monoplane and be in the air before the contest was over.

Then an adverse current slipped his plane and he was hurled into a fence under the power of a hull and threw the aviator into a gully.

### STUDENTS PROTEST AGAINST EXPULSION

St. Petersburg, Dec. 26.—A deputation of students from Odessa arrived today to protest against the decision of the government to expel students of the University of Odessa because of the recent disorders there.

The students say that the official version of the affair was untrue. They say that the students did not fire a shot but merely broke windows. They declare also that a judicial inquest into the affair and a search of the precincts of the university did not disclose any firearms and that the reports of the examining doctors did not certify to the wounding of any policemen.

### WOMAN MEDICAL MISSIONARY DIES

Rochester, N. Y., Dec. 26.—Clara A. Swain, M. D., the first woman physician sent by a missionary society to the Orient, died at Caste today.

Dr. Swain was born in Elmira, seventy-six years ago. She did a notable work in establishing hospitals in India and introducing medical methods among the women of that land.

### COTTON KING PRESENTS NEPHEW WITH \$10,000

Fort Smith, Ark., Dec. 26.—This was a happy Christmas for James Fernandez, formerly a Texas League baseball player and more recently a policeman.

Eugene S. Scates, better known as "Cotton King" presented Fernandez with a check for \$10,000. Fernandez is a nephew of Scates.

## HOXSEY SOARS TWO MILES HIGH

WORLD ALTITUDE RECORD  
BROKEN AT LOS ANGELES

Daring Aviator Accomplishes Remarkable Feat in Forty Mile Gale; Suffered From Intense Cold Above the Clouds.

[By Morning Journal Special Leased Wire] Aviation Field, Los Angeles, Dec. 26.—Seventy-five thousand people saw Arch Hoxsey, the Pasadena, Cal., aviator, break the world's record for altitude here today. He soared more than two miles up into the sky—to be exact, his barograph registered a height of 11,474 feet, or nearly a thousand feet above the altitude of 10,490 feet recently attained by Le Gourd at Pau, France. This is the second time the existing world's altitude record has been broken in Los Angeles, the first time being last January when Louis Paulhan rose a little over 4,000 feet.

Hoxsey, who made a series of thrilling spiral dives while thousands of feet in the air. Before he came lightly to earth, the crowd was on its feet cheering. He was lifted from his airplane by fellow aviators, who paraded to and down before the grand stand bearing the intrepid flier upon their shoulders.

The crowds insisted on making a hero of Hoxsey. They did not give him time to rest his feet, but marched him back and forth before the grand stand.

"Was it windy up there," he was asked.

"It blew so hard," replied Hoxsey, "that my machine hardly moved, and barely held its own. It was so blamed cold that more than once I thought my carburetor was about to freeze. I made the record because I determined to keep on going up until I passed Le Gourd's record, or the carburetor did freeze."

The gale which Hoxsey and his brethren of the Wright camp, Parmelee and Brooks, braved successfully, wrecked Latham's beautiful Antoinette machine completely. The Frenchman was among the first of the aviators who answered the starting gun at 1 o'clock. For two hours and fifteen minutes he fought the wind which blew directly off the ocean, six miles from the aviation field. Then an adverse current slipped his plane and he was hurled into a fence under the power of a hull and threw the aviator into a gully.

The Frenchman was unhurt, but his machine was a tangled mass of wire and broken rods. The motor was the only part left intact, and Latham declared that having enough parts for three extra machines he would build a new monoplane and be in the air before the contest was over.

The Frenchman was among the first of the aviators who answered the starting gun at 1 o'clock. For two hours and fifteen minutes he fought the wind which blew directly off the ocean, six miles from the aviation field. Then an adverse current slipped his plane and he was hurled into a fence under the power of a hull and threw the aviator into a gully.

Parmales driver of the "Baby" Wright, also dived the wind and attained an altitude of 6,625 feet. He electrified the crowd by a series of whirling and swooping maneuvers. The Frenchman was among the first of the aviators who answered the starting gun at 1 o'clock. For two hours and fifteen minutes he fought the wind which blew directly off the ocean, six miles from the aviation field. ## SPORTS

CHICAGO FOOTBALL  
ELEVEN EASILY BEATS  
WASHINGTON SQUAD

Seattle, Wash., Dec. 26.—The Oak Park high school eleven demonstrated the superiority of Chicago football over that of the Pacific coast today by defeating the Wenatchee, Wash., eleven 22 to 0. Wenatchee was outclassed at every point by the Chicago boys, but the game was made interesting by the brilliancy with which the Oak Park team unfolded play after play that had never before been seen on a Pacific coast gridiron. Oak Park scored three times on touchdowns, kicking one goal and twice on place kicks. Wenatchee never got nearer Chicago's goal than the twenty-five yard line and that only once.

PHYSICIAN OF CLUB  
PREVENTS COMPLETION  
OF SIX ROUND BOUT

Philadelphia, Dec. 26.—The new peace regulation empowering the club physician to stop a boxing bout when he deems it necessary was enforced for the first time today at the National Athletic club.

Phil McGovern of Brooklyn was prevented from continuing in his match with Eddie O'Keefe of this city, after McGovern had been knocked down in the fifth round. In the judgment of the referee, both men were in shape to continue the full six rounds but the physician at the ring-side thought otherwise.

In the main bout Frankie Madole of Pittsburgh and Eddie Murphy of Boston, the former, although outwheeled, put up a good fight and got a draw.

## RACE RESULTS

**At Juarez.**  
Juarez, Mex., Dec. 26.—With summer-like weather and a fair card a big crowd turned out to witness the racing at Terrazas park today. Mendocino, under 123 pounds, made a new track record for seven furlongs when she stepped the distance in 1:24 3-5. She won very easily and was favorite in the betting. Four favorites won.

First race, selling, 2-year-olds, five furlongs: Lora, first; Canapa, second; Lady Stalwart, third. Time, 1:09 1-5.

Second race, selling, 3-year-olds and up, 1 mile: Acumen won; Misprision, second; Lista, third. Time, 1:14 1-5.

Third race, selling, 3-year-olds and up, 6 furlongs: Gene Wood won; Beauman, second; Ellard, third. Time, 1:13.

Fourth race, handicap, all ages, 7 furlongs: Meadow won; Ocean Queen, second; The Pippin, third. Time, 1:24 3-5.

Fifth race, selling, 2-year-olds, 5 1-2 furlongs: Butter Ball won; Comandante, second; Pit a Pat, third. Time, 1:07 2-5.

Sixth race, selling, 3-year-olds and up, 1 mile: Bob Lynch won; Noon, second; Ramon Corona, third. Time, 1:38 2-5.

**At Emeryville.**  
Oakland, Cal., Dec. 26.—In the presence of eight thousand people Spellbound won the Christmas handicap at Emeryville today and in doing so, shattered the track record of 2:05 1-5 for a mile and a quarter by covering the distance in 2:02 3-5. Perfect weather favored the sport and the track was very fast.

First race, 6 furlongs: Emma G. won; Jessup Burn, second; Biskra, third. Time, 1:12.

Second race, furlong course: Winning Widow won; Pawhusket, second; Pay Strak, third. Time, 1:09 2-5.

Third race, 6 furlongs: Kelsigh P. D. won; Enfield, second; Sealchiff, third. Time, 1:11 1-5.

Fourth race, mile and a quarter, Christmas handicap: Spellbound won; Chester Krum, second; Arasee, third. Time, 2:02 3-5.

Fifth race, mile: Dahlgren won; Royal River, second; Elgin, third. Time, 1:40 1-5.

Sixth race, 5 1-2 furlongs: Prosper won; Madeline Musgrave, second; Doreington, third. Time, 1:20.

**At Pensacola.**  
Pensacola, Fla., Dec. 26.—First race, 6 furlongs: Horace E. won; Talow Dip, second; Tanbark, third. Time, 1:23.

Second race, 6 furlongs: Black Domino won; Dick Rose, second; Dry Dollar, third. Time, 1:23.

Third race, 6 1-2 furlongs: Lord Wells won; Don Hamilton, second; Pleasing, third. Time, 1:25.

Fourth race, 6 1-2 furlongs: Sandiver won; Cry Baby, second; Lew Hill, third. Time, 1:28 2-5.

Fifth race, 6 furlongs: Omicron won; Johnny Wise, second; Grecian Bend, third. Time, 1:22.

Sixth race, mile: Vanen won; Bethlehem, second; Ameron, third. Time, 1:49.

Seventh race, 6 furlongs: Cherokee won; Plint, second; Fundamental, third. Time, 1:21 1-5.

**At Jacksonville.**  
Jacksonville, Fla., Dec. 26.—First race, 6 furlongs: Agmar won; Al-thrope, second; Definite, third. Time, 1:15.

Second race, 5 furlongs: Miedingtoe won; Tippy, second; Zool, third. Time, 1:01 4-5.

Third race, mile and a sixteenth: Bob R. won; Sand Hill, second; Fout, third. Time, 1:47 2-5.

Fourth race, selling, 6 furlongs: Monier won; Patrie S., second; Red Wine, third. Time, 1:14 4-5.

Fifth race, mile and a half, mule, horse and automobile: Mary Hyde (Six Furlongs), won; Simon Slick (mule), 4 1-2 furlongs, second; W. Williams (marathon runner), 550 yards, third. Time, 1:16 1-5.

Sixth race, mile and a half, mule, horse and automobile (N. R. Fulton) 1 1-8 miles, also ran.

Sixth race, 6 1-2 furlongs: La Sille won; Aspirin, second; Star Board, third. Time, 1:22 2-5.

Seventh race, mile and a sixteenth: Fitzbethian won; Ardi, second; Stoneman, third. Time, 1:50 2-5.

**Novelty Race at Jacksonville.**  
Jacksonville, Fla., Dec. 26.—A contest unique in sporting events was decided at Monier's park today, when

the management provided as an added holiday attraction special handicap novelty race, in which were tested the speed and endurance of an athlete runner, a thoroughbred race horse, a mule and an automobile.

The winner was returned in Marie Hyde, a race horse, favorite in the betting at 2 to 5, which, under the handicap conditions, was required to cover six furlongs. Eight lengths back came the mule, which started four and one-half furlongs from the wire while the man who had 550 yards to negotiate, finished third.

The automobile, which had to travel one and one-eighth miles after a running start of a sixteenth of a mile was a distant trailer, probably due to the slow track.

Ideal racing weather and six good races, besides the novelty event, brought out the largest attendance ever seen at the local course.

**Gene McGovern Worst.**  
Milwaukee, Wis., Dec. 26.—Jack White of Chicago all but knocked out Gene McGovern in a ten-round bout today. McGovern was substituted for Johnny Schultz of Toledo, who was taken sick. The bout was an uninteresting one, it being a slugging match in which White did the slugging.

**Notre Dame Beats Missouri.**  
St. Louis, Dec. 26.—The Notre Dame football team of Indiana defeated the Missouri All-Stars here today, 12 to 0.

FIGHTER DIES FROM BLOW  
RECEIVED IN PRIZE RING

Green Bay, Wis., Dec. 26.—Johnny Parmenter of Green Bay, 18 years old, died in the prize ring tonight after fighting a six-round bout. He suffered a hard jolt on the Adams upper, it is said. He went to his corner, and after sitting down, became weak.

He died a short time later. Homorrid, the doctor of the ring, said the cause was death. A coroner's jury will investigate the case.

**Eight Time Rounds.**  
Memphis, Tenn., Dec. 26.—James Bingham of Chicago and Tony Ross of Newcastle, Pa., fought rather tame rounds to a draw before the National Athletic club tonight.

Neither man seemed disposed to charge his opponent at short range and the blows which landed true were comparatively few, especially in the early part of the fight. Toward the end they seemed to be striking their stride and after the sixth round the fighting became faster. Barry landed choppy rights and long left swings. At the end Barry had a blackened eye and Ross showed several bruises.

Carl Morris, the Oklahoma heavyweight, was at the ringside to challenge the winner.

**Doer Roller Defeated.**  
Boston, Dec. 26.—George Hackenschmidt, the Russian wrestler, tonight defeated Dr. B. F. Roller of Boston by winning two straight falls; the first in 1 hour, 7 minutes, 20 seconds; the second in 15 minutes, 25 seconds, with a fair arm and body roll.

**Skating Record Smashed.**  
New York, Dec. 26.—Edmund Lamby today at Saratoga Lake, N. Y., set the world's amateur 220-yard skating record, negotiating the distance in 17 2-5 seconds. This clips 2 2-5 seconds from the record of 19 4-5 seconds, made by Leroy See in 1909.

**Punch Kills Two Italians.**  
New York, Dec. 26.—After drinking punch, believed to have contained wood alcohol, two Italians died today in North Bergen, N. J. Four others are in critical condition.

FAMOUS PHANTOM  
DEER KILLED ON  
TAFT RANCH

Milk White Animal Hunted for  
Years in Texas Falls Before  
Gun of Cow Foreman.

**(Special Correspondence to Morning Journal)**  
San Antonio, Tex., Dec. 26.—The famous phantom deer, milk white, and said by the Mexicans to bear a charmed life, carrying the "ghost's" right, after years of persistent hunting, has been killed. The white deer was brought low on the Taft ranch in San Antonio county, east of San Antonio by G. H. Patterson, assistant foreman on the ranch, which is owned by Charles F. Taft, of Cincinnati, Ohio, brother of the president. Hunters from the north have camped out for weeks, year after year, awaiting the chance for a lucky shot, but though many glimpses have been obtained never has a spot of pink stained the white of the fleet footed phantom.

Eight years ago a fence rider on the ranch saw what he supposed was a white goat and attempted to rope it. When he came closer he found that the animal was a milk white deer and too fleet for pursuit by an ordinary cow pony. The chapparral and thick mesquite growth added to deer in the successful evasion of hunters and trappers. Monday, when it was killed, running at a range of more than 200 yards, for the first time it appeared to be careless. One shot did the work.

Albert Friedrich, whose Buckhorn saloon is known all over the country because of its unparalleled collection of deer horns, deer heads, antlers and other trophies of the hunt, has purchased the deer every season for the past five years, and while he has seen it several times, it was always so far away and running so rapidly it was useless to shoot at it. Mr. Patterson sent him a photograph of the deer. Friedrich and the antlers were ordered shipped to San Antonio. It will be sent to a taxidermist and mounted after the most approved fashion. The animal is a

back and has a most unusual horn formation, three spikes on one side and twelve on the other.

The Mexicans believe that the "madstone" is obtained from the stomach of milk white animals. They are certain the phantom deer carried it, but when Mr. Patterson removed the viscera, looked in both apartments of the double stomach, peculiar to all deer, he failed to find the madstone. Some held, however, the stone is not contained in the stomach, but is found in the connecting passage of the stomach. He will make another examination of the viscera in an effort to ascertain if this is true.

Taxidermists say the milk white deer is very rare, and so far as is known, this is the first one killed in the southwest.

TO ESTABLISH NEW  
RELIGIOUS  
ORDER

Envoy From Spain to Found  
First American Convent of  
Society of Saint Teresa of  
Jesus.

**(Special Correspondence to Morning Journal)**

San Antonio, Texas, Dec. 26.—From Barcelona, Spain, where the mother house is located, Mother Maria Rubio, mother superior to the general mother, has come to San Antonio for the purpose of establishing the first convent of the order of Saint Teresa of Jesus, in the United States. Mother Maria Teresa is accompanied by five sisters of the order and will be joined by five or six others. They are now in possession of the former Episcopal residence on Dwyer avenue and are having everything put in readiness for the opening of the convent, February 1.

The work of the order is educational, and in the convent about to be opened special attention will be given to French, music, drawing and painting, and a kind of literary work. The order has an interesting history. It was first organized about thirty-seven years ago and took for its patron saint Teresa of Jesus, a Spanish nun, since that time it has had a wonderful growth. It now numbers more than 1,000 members. It has forty houses located in Spain, Mexico and South America. The order was driven out of Portugal during the recent revolution, and in a late uprising in Spain, also lost a house which was kindled into flames by rioters.

## SOUTHWEST NEWS NOTES

**Thrown on to the Fence.**  
Miss Ada Burke, principal of the city school, happened to a very serious accident Saturday morning when her horse became frightened at a switching freight train in the yards. The animal thrashed Mrs. Burke on to the wire fence, cutting her badly, and otherwise bruising her. — Clayton News.

**Robbery in Santa Rita.**  
The Santa Rita rooming house at Santa Rita recently had a visitor some time during the night. The party entered Mr. Kelly's room and took \$150 from under his pillow. The thief then went into Mr. Anderson's room and took \$80 from him; then he tried to enter Mr. Bassener's room, but Mr. Bassener awoke and asked who it was, and the guest left very quickly.

**Oil Well Dynamited.**  
The Brent oil well at Shamrock, near Alamogordo, was dynamited recently in the hope that it would be unroofed. The well was then on the 1800 foot level. A charge of 100 pounds of dynamite was used, and the well was exploded in the well. Water was thrown to a height of seventy-five feet, but no oil found. It is very likely that nothing further will be done with that test well. Mr. Brent, however, thinks favorably of some of the resources which have not been developed, and will remain there.

**Thieves Trained by Tobacco.**  
After a recent investigation it has been found that the loss sustained in the robbery at Tinnie, Lincoln county, is greater than at first reported. The postoffice itself was robbed of \$50 in cash. Ramona's store was robbed of about \$35 in goods. The robbers were trailed up the Rio Grande by reason of the loss of thirty-five sacks of tobacco which were found along the road between Tinnie and the river, and in the place where the trail was lost. The postoffice inspector at Denver was notified and will investigate shortly.

**Model Convict Camp.**  
The Silver City Enterprise says: J. L. Merriweather, territorial road roads engineer, spent last week inspecting the work being done on the Mogollon road by the territorial convicts. He found good progress being made and says when completed the road will be one of the finest in the territory. Work is now being carried on at Santa Rita, near Alamogordo, where thirty-five convicts are employed at present and no trouble has been experienced with them since the work began. They are allowed a large measure of liberty, partly through necessity of circumstances and only one has made an attempt to escape. This is accounted for largely from the fact that all the men are what is termed "short time men," that is, they are in prison for short terms of from one to two to three years, and as their terms are shortened by good behavior, work for the good behavior, allowance and this shortens their terms many months. Even if they escape, their liberty is very likely to be short lived, as they are almost certain of capture, and they lose all their good behavior allowance, which in some instances amounts to months, and even years. Men are discharged almost every week having served out their terms, and new ones are shipped in from Santa Fe. It has thus far taken over 100 men from Santa Fe to complete the work already done.

Every family has need of a good, reliable liniment. For sprains, bruises, soreness of the muscles and rheumatic aches there is none better than Chamberlain's. Sold by all dealers.

CALIFORNIA LEADS  
IN PRODUCTION  
OF PETROLEUM

STATE SHOWS INCREASE  
OF OVER 20 PER CENT

Interesting Statistics on the  
Growth of Industry During  
Past Few Years; Average  
Price per Barrel Shows In-  
crease.

The advance chapter of the Geological Survey's volume, "Mineral Resources of the United States," for 1909 on the production of petroleum, by David T. Day, is now in press and will be ready for distribution about January 1, when it can be had on application to the director of the survey at Washington, D. C.

In 1907 the total product of the United States, which had been increasing rapidly in previous years, made a phenomenal gain—over 20 per cent—and reached the great total of 166,096,335 barrels. This gain was due to the fact that the production of the Illinois field and to great increases in the fields farther west, in Oklahoma and California. In 1908 and 1909 this production was sustained and has even increased, though by no great percentage. In 1908 the quantity produced rose to 178,527,353 barrels, and in 1909 also the record showed a slight gain—the total being 182,134,274 barrels—but there was a decline in the value from \$12,907,814 in 1908 to \$12,488,783 in 1909. The average price per barrel was \$0.723 in 1908 and \$0.704 in 1909. This is a constant with the increase in stocks during the year.

**Rank of the States.**  
Only three states contributed greatly to the increase in quantity produced. California took first place by gaining 21.55 per cent. Utah and Wyoming produced only 22.125 per cent. The combined output of these three states was 24.55 per cent over their combined output in 1908. In all other states decreases were noted, the greatest decline, 47.15 per cent, being in Louisiana.

California's output of oil in 1909 was 100,000,000 barrels more than any other state has ever produced in a year. Should the volume show a further production increase in 1910, her total will be more than double the highest yield of Pennsylvania.

**Fuel Oil on the Railroads.**  
The use of fuel oil by the railroads of the United States has been rapid and the volume has been expected to reach 19,223,294 barrels, as compared with 18,898,070 barrels in 1908 (an increase of 2,050,324 barrels, or 18 per cent) and with 18,856,491 barrels in 1907. The consumption of oil per mile of road operated was 3.68 barrels in 1909, as compared with 3.81 barrels in 1908 and with 3.93 barrels in 1907, which shows that the methods now employed are more economical.

The volume of fuel oil was introduced as a fuel by the railroads of the country. The oil consumed on the railroads is mostly crude, but includes a considerable quantity of residual—the product left after the lighter oils have been extracted by refining.

**Fuel Oil in the Navy.**  
The introduction of fuel oil in the United States navy has been rapid and the volume has been expected to reach 19,223,294 barrels, as compared with 18,898,070 barrels in 1908 (an increase of 2,050,324 barrels, or 18 per cent) and with 18,856,491 barrels in 1907. The consumption of oil per mile of road operated was 3.68 barrels in 1909, as compared with 3.81 barrels in 1908 and with 3.93 barrels in 1907, which shows that the methods now employed are more economical.

The following countries, besides the United States, increased their production of oil in the year 1909. Russia, Galicia, Dutch East Indies, Romania, and Persia. The total production for the world increased from 285,000,390 barrels in 1908 to 297,412,791 barrels in 1909, of which the United States produced over 60 per cent.

QUARTER BILLION  
FOR BUILDING IN  
NEW YORK

Half of it Goes Into New Homes;  
Detectives Organized to Look  
After Army of Christmas  
Crooks.

**(Special Correspondence to Morning Journal)**  
New York, Dec. 26.—A quarter of a billion dollars have been constructed here during the past year, according to estimates that have been drawn up by the city authorities. For every single resident added to the metropolitan area last New Year, a thousand dollars is shown to have been spent in increasing the structure in which New Yorkers are housed. Practically half of the \$240,000,000 that was used to thus thicken Gotham's sky line has gone into new homes, while the rest has been spent on office skyscrapers and structures of a semi-public character. Twenty millions of dollars have served to turn old residential buildings into quarters for business, that is rapidly encroaching upon the old home sites. Seldom have the people of this town seen so steady and strong a growth in construction, and a future increase at this pace must soon mean that the whole sky line will be blocked off by buildings.

**Christmas Crooks.**  
Special squads of detectives are be-

ing organized at police headquarters to cope with the "Christmas burglars," who have already begun to operate in the sections where homes are sure to be attacked up with holiday presents. Every year gangs of these expert crooks have descended upon this city and carried away more plunder than would fill a score of the sleighs of Santa Claus. Hitherto the sharpest sleuths have been unable to catch these perpetrators of what they consider the meanest thievery of the whole year. Now that a dozen homes, where holiday gifts meant months of saving, have already been robbed of presents stored for Christmas, every effort will be made to round up and jail the crooks who prey upon yuletide generosity.

**Costly Chauffeurs.**  
At the cost of \$5,000 a day to this tax-payers, taxicabs have been moved about town under police escort for the last two weeks of the chauffeurs' strike, according to the estimates. With a burly bluecoat stationed on the box of every one of the thousand motor hacks that brave the city, not only in wages but in general police protection. Though the temper of the striking taxi drivers has lately been more mild than at the outset of the motor muss, it has taken to guard every casual joy-riding passenger from the possibility of force that would ordinarily be required to watch over hundreds of lives and homes. Official motoring in proving cold, dull work for the guardian patrolmen, and they will be as glad as the general public to have this sorry situation finally settled.

**Child Corruption.**  
That candy shops, which lure the street child to worse things, outnumber the saloons in the more congested districts of lower New York city, has been shown by statistics that have been collected by various philanthropic societies here. While their parents are being enticed to the liquor stores, the children are being constantly subjected to the attractions of soda, ice cream and lollipop parlors that make for their depraving, according to these investigators. Moving pictures as well as unclean candy working sure moral destruction to the youth of the tenement districts, it is claimed. When the dangers of traffic to the street urchins are counted in on this scientific analysis of conditions, New Yorkers begin to wonder how it is so many children survive the streets of rearing in the poorer quarters.

**Real Riding.**  
While Isaac McHenry of the mounted police is bandaging the legs of his good horse Elton, along with his own hurts, the true tale is being told of the most stirring of all the runaway captures in the annals of police work. While holding a runaway horse threatening death to the school children that flocked across his path, McCurdy and Elton took the chase a half a mile apart. When the charger slipped and fell on his rider, the crowd of onlookers, who were shut their eyes; for it sounded like broken bones, and the runaway wagon was sweeping upon the school crowd still half a mile ahead. But Elton recovered his feet and backed to the side of his injured rider just in time to take up a frantic chase that succeeded in the nick of time. Hogan and Elton are today unfit for service; but when they come back, great praise will be heaping a reward for this bit of duty which both rider and horse are taking as all in a day's work.

## The Bachelor and His Buttons.

Do not give the schoolboys lessons in embroidery and fancy sewing. Not because it might occasionally make one of them a "mollycoddle," but because it would be a waste of time. That does not apply to a little drill in the rudiments of plain sewing. There are many cases where it is not true "little knowledge is a dangerous thing." A slight acquaintance with the mysteries of needle, thread and thimble cannot harm man or boy, and may on many occasions be of great service. Consider the sad state of a lone bachelor, moping and sighing, who finds a coat button hanging by a thread, or a conspicuous rip, or when the laundryman has sent back some of his garments clean, but buttonless. Then it is that he feels the sting of the thing, and that he begins to attend to those things and wishes that he knew how to sew.

It has been argued with some plausibility that if men knew more than they do of the domestic arts, could manage a gas stove, make a decent cup of coffee, that bread, punch an egg and sew on buttons—they would become such self-sufficing creatures that they would be averse to married life. No wonder, then, that the world's whatever discourages marriage is against public policy. Therefore boys should not be taught to sew.

Bad reasoning. When a man has succeeded with some pricking of his fingers in cobbling a button on a shirt, he will be all the more inclined to get a wife to do it for him. Indeed, the more he knows from personal experience of that and other kinds of woman's work, the more patient will he be with those who have to do that kind of work. He will have a more likely appreciation of its difficulties. He will not say: "I could do that in half the time it takes you."

Women are not so dependent on men as they used to be. They are deserting domestic for industrial pursuits. They are doing work which men alone used to do. Therefore, men should not be so dependent on women as of old. They should know something of woman's work, so as to be able to get along without them in a pinch. So let the schoolboys be taught how to sew. But do not give too much time to it. Parents should be urged to supplement school instruction by making their boys sew on at home the buttons they have torn off in violent gymnastics out in the street.—Chicago Tribune.

Philadelphia Women Are Good  
Housekeepers.

In Philadelphia every member of my classes lived in a private home; there were no apartment dwellers. Besides being eager to learn the difference in quality of the various food-stuffs, they wanted to learn which could be bought in bulk to the greatest advantage. Here in New York there is little reason for a woman to interest herself in what should be bought in large quantities and what should not. I don't know of a single apartment house where a barrel of flour could be kept without inconvenience to the inmates. The lack of closet-room has a lot to do with the high price of living in New York. I found that in Philadelphia women were accustomed to put up vegetables and fruits for winter use, as they do in the country. Among all the women that I have lectured

to in New York I have not found one who considered the economical side of canning corn and tomatoes. Many women who possessed country homes and declared they were taking my course because of the housekeeping done during the summer rather than that done in their city apartment had never canned either fruit or vegetables for the use of their families during the winter.

When I told them of women making their own licing by supplying restaurants with home canned and preserved vegetables and fruits they of the purpose of learning how to do the same things for their own table. This was very different from the Philadelphia way of looking at the subject. There the women would ask to see recipes and want to learn all about the different methods.

I do not believe such a course of lectures could be successfully given without taking the classes to the markets and the grocery and fruit shops. At least one lecture should be chiefly devoted to the date cooking methods and utensils. Women are surprisingly ignorant about the newest and often the best utensils.

Though I can't say that a lecturer or marketer must necessarily be a good cook, I am convinced that a knowledge of the art of preparing dishes for the table will come in handy. When you explain to a class the difference between the tenderloin and the chuck steak it is of little use unless you can tell them how each should be prepared to get the best results.—New York Sun.

**Eleven-Year-Old Criminal.**  
The Roy Spanish American says: Marvin Malone, the 11-year-old son of J. R. Malone, a homesteader near Sheriff, E. A. Bismarck, charged with entering and stealing from the Floerheim Mercantile company's store some two months ago, his brother, Willie Malone, aged 14, is also implicated in the robbery, but is absent at Dawson at present. The trial of the little fellow was held before Squire Garcia Friday evening. He was found over to the grand jury under 1,000 bonds, in default of which he was taken in charge of Mr. Bismarck, who will take the boy to his own home in Mora, and send him to school this winter and care for him till the grand jury meets in April, when his future will be determined. A collection was taken up here to buy the boy some clothes for the trip.

**The First Was Laughter.**  
"Oh, dear!" cried Mrs. Mason, seizing a spoon and bending over a dish on the supper table. "Here's a fly in my preserves."

"I'll bet he never got in a worm jam in his life," hazarded Mr. Mason, with the chuckle of a husband who rejoices in a momentary eminence over his wife's "Youth's Companion."

**Awake to Opportunity.**  
Marie—When you spoke to papa did you tell him you had \$500 in the bank?  
Tom—I did.  
Marie—And what did he say?  
Tom—He borrowed it.—Boston Transcript.

## Suggestions on Wheat and Other Grains in Rio Grande Valley

At the first regular meeting of the Dona Ana County Farmers' Institute, held recently at Las Cruces, Dr. J. H. Squires, of the agricultural college, was the first speaker on the subject of "Wheat Raising in New Mexico." He said that the differences in hard and soft wheat go further than is at times considered. The hard wheats will yield more pounds of flour to the bushel than do the soft ones, and in addition are higher in gluten, the substance present to a great or less degree in all wheats, which renders it possible to make a porous, light loaf from wheat flour, which is not possible with the flours of the other cereals. Some hard wheats have too much gluten, and it is necessary to mix them with soft wheat in order to get the best results. (Question) "How do the spring wheats of this valley mill?" "I do not know, as the situation has so far been unable to make tests," made, but the wheat seems to be as good as or better than the same type raised elsewhere.

**Seasons Easily Overlap.**  
There is no strong line of difference in the winter and spring varieties of wheats, as they may be seed out of season and a complete change from spring to winter or winter to spring made in a very few years. Here the change is easily brought about as spring wheat has yielded well when planted in the fall and fall wheat does well on early spring seedling.

With quality established, the farmer has to do with the production of as many pounds of good wheat per acre as possible. This may be brought about in a number of ways. By better land, by the use of manures or artificial fertilizers when the soil demands them, by better care in seedling and maturing the crop, and by the use of high yielding varieties. All of these, except the last, cause an additional outlay of funds, but with the use of better seed the yield is increased without extra cost of preparation, seedling and caring for the crop, interest on investment, and water right, and with a slight increase in the cost of harvesting and threshing.

**Selecting Varieties.**  
The matter of selecting of variety is not as simple as it may seem. Comparing three varieties that have been grown side by side in this valley for a period of seven years, one gave an average of 51.2 bushels while the other two yielded 48 and 49 bushels. All of the varieties, except the last, caused an additional outlay of funds, but with the use of better seed the yield is increased without extra cost of preparation, seedling and caring for the crop, interest on investment, and water right, and with a slight increase in the cost of harvesting and threshing.

**Highly Profitable Crop.**  
This work is being continued on the station farm and in 1910 the maximum yield for the season was 47 bushels to the acre, while the wheat that had averaged 52 bushels in the seven year test gave 57 bushels and the one that had given 51 bushels in the long test went to 65 bushels. This is the wheat that is being distributed to the farmers, and is using as a standard at the station.

With regard to the cost of raising the crop, we estimate that charging the acre with \$10 for interest or investment, \$3 for tax, \$3 for water, and \$10 for seed, the cost of a bushel of wheat is \$22.50 per acre. New wheat at \$1 per bushel this will give a net income of \$15 per acre over and above the investment, on the wheat that is yielding 40 bushels per acre. The straw is not considered in this estimate.

**Time of Seeding.**  
The time of seeding is not restricted in this valley. We are getting good results with seeding spring wheat at any time from October 15 to March 1st, but would advise avoiding the two extremes. The seeding should be done with a drill if possible, for this way we can avoid all irregularities in the rate of seeding and also get a uniform covering of all seed, and in addition, get a satisfactory stand with less seed. A very good rate of seeding is 30 pounds to the acre, but a much less amount should be used when the crop is grown as a nurse for alfalfa. The soil should be well leveled and well irrigated. The contention that through irrigation tends to cause the crop to run to straw, and that it is not in answer to the question "How would you tell when to irrigate?" I would break through the dry surface and examine the soil to a depth of several inches. If this is well supplied with moisture, there is no immediate need of more water as the wheat roots penetrate to a depth of five or more feet on light soils and a proportionately less distance on heavier soils; if the small roots are in moisture, the plant will thrive.

On account of danger from smut which is very noticeable at times all seed should be treated either with a solution made of 16 ounces of formalin in 40 gallons of water, the seed being thoroughly sprinkled and covered for 12 hours, or dipped in the solution for 30 minutes and then dried. Or the usual treatment with copper sulphate or blue stone may be used. This is a little more trouble and not as satisfactory as the other but gives good results. Use 1 pound of the crystals dissolved in 24 gallons of water, soak the seed for 12 hours and dry thoroughly.

**Grow Your Own Seed.**  
It should be the aim of every wheat farmer to select the very best variety for his locality and then keep his variety pure by growing a small seed batch each year. This should be kept clear of noxious weeds and all heads that tend to be extremely early or late in ripening should also be removed. The crop should be threshed and kept separate for seed.

In answer to questions: I would advise the wheat to mature thoroughly before cutting, as the later stages of growth there is a decided increase in the dry weight of the crop. Early seeded spring wheat which blooms early may be caught by a very

late frost. Wheat is destroyed by frost at blooming time.

From the data now at hand, the soft wheat of this valley is as good as the soft spring wheats elsewhere.

**Other Small Grains.**  
J. W. Taylor, of Dona Ana, followed with a discussion of the other small grains. He brought out the value of growing small grains until the land was in fit condition to receive alfalfa; pointing out, as well, that the average yield of alfalfa now grown on many farms does not compare favorably with the returns to be had from grain. His experience has been that it is best to leave off the nurse-crop when sowing alfalfa for the reason that when the nurse crop does well, the alfalfa suffers. It is the best plan to grow the nurse-crop the first year and then the alfalfa after the land is well leveled.

**Careful Preparation.**  
He cited the case with which the Dairy farm of El Paso prepared land to receive alfalfa, pointing out that whereas their land varied only about a fourth of an inch between the borders, two inches would be very close leveling for the average farmer. Seven tons of alfalfa per acre was raised on this land so carefully prepared.

It is necessary to grow grain for the horses and other livestock on the farm. Careless barley has yielded as much as 80 bushels on the farm of one of the speakers. The speaker raised 100 bushels of oats by sowing good seed and preparing the land in the fall.

**Must Raise Car Lots.**  
"What Other Crops Shall the Small Farmer Grow?" was then taken up by E. B. Hoagland, manager of the produce exchange. A good point made was that farmers should not try to grow other crops if they are going to specialize in truck raising, because the proper attention cannot very well be given to both. To make a profit in trucking, it is necessary to be independent of the limited local market and raise produce in carload lots. It is essential, too, not to depend solely upon a high market price for the profit, but to strive to reduce the cost of production as well. He read a schedule comparing the prices paid the farmer in Colorado and the prices charged the consumer, showing that there is in other states, the middle man makes more than the one who raises the crops.

**A Newcomer's Experience.**  
C. E. Locke gave an account of the successes and failures he has had in raising vegetables. It was a valuable report in that it was practically the experience of all newcomers in the Rio Grande valley. By persevering, he has succeeded in raising as much as 44,000 pounds of onions per acre, and this year the returns on cantaloupes brought \$250 an acre above the actual cost of production. He made failures growing celery, cauliflower and lettuce, but was able to raise large quantities of cabbage, cauliflower and onion seedlings. Mr. Locke got best results by having the ground loose and dry; marking off shallow furrows and spacing the onions in them, then irrigating thoroughly.

It was voted by the institute to hold an early session at the agricultural college at which an opportunity will be given the station staff and the domestic science department to demonstrate the nature of the work being done to further the interests of rural life. As soon as funds are available, it is the intention of the college to again take up institute work in all parts of New Mexico.

## 60 HOUR DASH ON THE SANTA FE TO THE COAST

Solid Express and Mail Train From Chicago to Los Angeles Will Try to Beat American Express Company.

A solid express and mail train, to run from Chicago to Los Angeles in sixty hours in order to allow the Wells Fargo Express company to beat the American Express into the coast city, is the latest project of the Santa Fe Railroad company. It is understood this train will be put on cars in January and will run to Los Angeles via the Windy City to the Angel City like Halley's comet, not even hesitating anywhere except when necessary to get a drink or change the engine.

It is said that the American Express company is now delivering shipments from the east to southern California from ten to twelve hours in advance of Wells Fargo. The express schedule on the Santa Fe is now 72 hours. The proposed new train will slash this twelve hours. The train, it is said, will be composed of four Wells Fargo express cars and two mail cars.

**Byrne Has Reason.**  
Asked as to the report that eastern railroads are reducing the number of passenger trains and contrasting this situation with that on the Pacific coast, John J. Byrne, assistant passenger traffic manager of the Santa Fe, is reported as saying: "There are, perhaps, two paramount reasons why eastern railroads are reducing the number of passenger trains. Adverse legislation may be assigned as one reason and, at the same time, a reduced population may be another. Without discussing the political phase of the subject, the railroads centering in Los Angeles are certainly not up against any reduction in population. The railroads have had a big interest in population in southern California and the additional train service is largely brought about, of course, by the desire to serve this additional population."

**The Livestock Markets**

Kansas City, Dec. 26.—Cattle.—Receipts, 3,000, including 500 southern; market 10c higher. Native steers, \$4.75 to \$5.75; southern steers, \$4.50 to \$5.00; southern cows, \$2.90 to \$3.50; native cows and heifers, \$2.75 to \$3.50; calves, \$3.50 to \$5.00.

hulls, \$3.40 to \$4.00; calves, \$4.00 to \$5.25; western steers, \$4.50 to \$5.00; western cows, \$2.50 to \$3.75.  
Hogs.—Receipts, 3,500; market strong. Bulk of sales, \$7.70 to \$7.75; heavy, \$7.75 to \$7.80; packers and butchers, \$7.70 to \$7.80; light, \$7.65 to \$7.75.  
Sheep.—Receipts, 2,000; market strong. Muttons, \$3.40 to \$4.25; lambs, \$5.50 to \$6.30; fed wethers and yearlings, \$3.75 to \$5.25; fed western ewes, \$3.00 to \$3.75.

## "PAID IN FULL" IS WHOLESOME AND SANE

Honored By Special Criticism From Sociological Professor at Harvard University; Here Next Friday Night.

When Eugene Walter's famous play, "Paid in Full," had rounded out its celebrated run of two years in New York, the United Play company was prevailed upon to take it temporarily from Broadway for a tour of other big cities that had been clamoring to see this, the greatest dramatic success of the generation.

In such way it reached Boston, where the presentation of this notable play was regarded as of so unusual theatrical importance that the Boston "American" arranged with Prof. T. S. Carter, of the chair of economics and sociology of Harvard university to write a special analysis of "Paid in Full" and the character of it. An essay from one so eminent as Professor Carter is a rare distinction, seldom indeed accorded to a play. That it was bestowed on "Paid in Full" is another of the many convincing proofs of the tremendous interest the American drama has awakened everywhere and in all quarters. "Paid in Full" produced the profound impression upon Professor Carter that it has created on critics and public without exception. Said he in his article of praise:

"Paid in Full" is a sane and wholesome contrast to the ordinary sickly sociological play by Bernard Shaw and others of his kind. Their art consists mainly in manufacturing horror out of a jelly fish. A community that prefers that sort of thing is a decadent community."

"Paid in Full," with a specially selected cast that has won New York, in this notable play will be at the Elks' theater, Friday night, December 30, and the occasion will be looked forward to with unusual expectancy.

**A Gentleman from Mississippi.**  
It is impossible to analyze the elements of success in "A Gentleman from Mississippi," now in its third season at the Elks' theater, next Saturday. It is difficult to describe the pleasure it affords. The principal element of success is the heartiness with which it is presented. The audience's laughter is never forced and is never courted by an approach to vulgarity. The players seem to enter completely into the fun of the thing and to enjoy it as much as the audience. Their spirit is unflinching and their perception of the possibilities of every position complete. If it be true that a good hearty laugh saves a man a doctor's bill, "A Gentleman from Mississippi" will enable every play-goer to add a long list of credits to his medicine accounts. The prolonged success of the piece in New York, Boston, Philadelphia and Chicago is a fact in itself. It is so happily constructed that it can be seen again and again without a moment of weariness.

## RECORD OF ACTIVITY OF PAST WEEK IN MOGOLLON DISTRICT

(Silver City Enterprise)

**Ernestine Mining Co.**  
The mill handled 725 tons of ore during the week, of which were produced 57 sacks of concentrates. The precipitates smelted yielded 5322 Troy ounces of gold and silver bullion. Development is being pushed in the different levels of the mine.

**Socorro Mines.**  
Twenty stamps are dropping, crushing over 100 tons per day. The great lead continues to hold its width and past values in the lower levels.

**Deadwood Mines.**  
Inasmuch as further surface storage of ore would be inconvenient, mine development has been discontinued until the mill is started. The nature of the work being done to further the interests of rural life. As soon as funds are available, it is the intention of the college to again take up institute work in all parts of New Mexico.

**Byrne Has Reason.**  
Asked as to the report that eastern railroads are reducing the number of passenger trains and contrasting this situation with that on the Pacific coast, John J. Byrne, assistant passenger traffic manager of the Santa Fe, is reported as saying: "There are, perhaps, two paramount reasons why eastern railroads are reducing the number of passenger trains. Adverse legislation may be assigned as one reason and, at the same time, a reduced population may be another. Without discussing the political phase of the subject, the railroads centering in Los Angeles are certainly not up against any reduction in population. ## ALL RECORDS FOR BOAT BUILDING TO BE BROKEN

50,000 Ton Europa Now Under Construction Will Be Largest Liner in the World; Big Freight Steamers.

(Special Correspondence to Morning Journal)  
New York, N. Y., Dec. 18.—All records for steamship construction since the size and number of new ocean liners will doubtless be broken during the coming year. Seventeen new liners are being added to the fleet of the Hamburg-American line, including the 50,000-ton "Europa," the largest ship in the world now under construction. The newly authorized tonnage is equal to 12 per cent of the line's present tonnage, making a total of 4,925,452 tons under one house flag; 402 ships, 173 of them ocean-going.

In addition to the "Europa" four very large freight steamers have also been ordered to be built at Stettin. Each of these will have a carrying capacity of 12,000 tons, a total of 48,000 tons. The first of these freight steamers, the "Prussian," has already been launched and will be in commission next year. One of the 9,000 tons steamers in the course of construction will be equipped with an internal combustion motor instead of ordinary steam power. This ship will be undoubtedly one of the most interesting innovations since the introduction of steam.

The American trade will be especially interested in the four new steamers which have been ordered for the West Indian service. These boats will have a carrying capacity of 5,000 tons each and will be ready for service at the end of 1911. Remarkable technical innovations will be introduced on all these ships. In addition to the internal combustion engine, the boats will be equipped with engine working with a super-heated steam system. In addition to the boats now building, the company has brought to England two steamers to be employed in the Persian trade.

**The Evolution of Ocean Steamers.**  
While the landsman is astonished at the enormous length and bulk of the great modern liners, these skyscrapers of the high seas are even more remarkable for the ingenuity shown in the construction below deck. The average traveler, content with a hull and an interior of a palatial hotel, does not realize how complicated is the mighty fabric about him.

The parallel between the modern ocean liner and skyscraper is much closer than might be imagined. Both have been made possible by the use of skeleton steel construction. The limit in the height of buildings of steel or of concrete is reached when it is found impossible to carry such structures higher without increasing the thickness of their walls and supports to such an extent as to make the structure impracticable. Steel construction made it possible to raise the skyscraper indefinitely without sacrificing floor space. The problem of the great ocean liner is even more complicated. It must be built larger than any skyscraper yet constructed, and it is subject to many violent strains. A ship built of wood like the skyscraper of solid masonry would require a hull and interior bracing of such thickness that there would be little space available for the machinery or cabin accommodation.

In the hands of a skillful marine architect, the problem of building a ship is complicated with steel construction, the mere economy of space. The safety of vessels at sea has been enormously increased, until in the highest type of modern liners, the element of danger is virtually eliminated. The marvelous ingenuity displayed throughout this great fabric of steel in building against every possible contingency of the sea comes to the average landsman as a surprise. The great liner of 50,000 tons, such as the "Europa," now under construction, may be controlled by a single hand. The complicated machinery for automatically the ship practically automatically. The control of the entire ship from a central station on the bridge of the liner has recently been brought to a point where the steady department of the ship under instant control.

**The Ultra-Violet Ray.**  
The ultra-violet ray is almost a rival to radium in the mysterious properties and powers which are attributed to it. The famous French scientist, Professor Becquerel, has lately discovered that it destroys the spores of organic life and so prevents the transmission of life from world to world, and the Paris municipal authorities are recently reported to have been advised by its impact it could shatter the surface layer of the metal into minute

**LEGAL NOTICE**  
Territory of New Mexico, County of Santa Fe.  
In the District Court.  
No. 8549.  
Juan M. Martinez, Plaintiff, vs. Estanislao Herrera, who is also known as Tanislado Herrera; Desiderio Carballo and all other unknown claimants in and to the premises hereinafter described, adverse to said plaintiff, defendants.

**NOTICE OF SUIT.**  
The defendants and each of them will take notice that the above named plaintiff, has filed the above named suit in the above named court, where the same is now pending.  
The general object of said suit is to establish the title of certain lands and quiet said title as against the adverse claims of said defendants and each of them in and to two certain tracts of real estate situated in the county of Bernalillo, Territory of New Mexico, and being in Precinct 25 of said county and more particularly described as follows, to-wit:

A parcel of land situated in Precinct No. 25, in said county, being in length on its westerly boundary 175 yards and measuring on the north at a certain point 62 yards, and at another point 122 yards in width; it is bounded on the north by lands of Melquiades Sanchez, on the south by lands of Desiderio Carballo, on the east by lands of Desiderio Carballo, and on the west by lands of Desiderio Carballo.

From this conveyance or description it is to be noted that the above named plaintiff, has filed the above named suit in the above named court, where the same is now pending.

Also another parcel of land in said precinct No. 25, which measures 181 yards from north to south and 151 yards from east to west. It is bounded on its eastern boundary by lands of Desiderio Carballo, on the west and by the public road on the south; it is also bounded by lands of Estanislao Herrera.

Said defendants are further notified that the title of the plaintiff's attorney is Manuel U. Vigil, and that his postoffice address is Albuquerque, New Mexico; and the said defendants and each of them are hereby notified that unless they enter their appearance in said cause on or before the 22nd day of February, 1911, judgment will be rendered in said cause against them and each of them by default.

Dated December 24, 1910.  
T. R. MADDISON,  
Clerk of said Court.

**PERSONAL PROPERTY LOANS**  
On Furniture, Piano, Organ, Horse, Wagon and other Chattels; also on Salaries and Warehouse Receipts, as low as 10c and as high as 100c. Loans are quickly made and strictly private. Time—one month to one year given. Goods to remain in your possession. Our rates are reasonable. Call and see us before borrowing. Steamship tickets to and from all parts of the world. THE OVERSEAS LOAN COMPANY, 309 West Central Avenue, PHOENIX, ARIZONA.

**WANTED—Salesmen Agents**  
PORTRAIT AGENTS—It will pay you to correspond with me if you want good work. Write at once. N. Benedict, 227 W. Michigan St., Chicago, Ill.

**WANTED—Boards**  
FIRST class accommodations with full board. Electric light, bath; centrally located. Phone 242.

**WANTED—Rooms**  
FOR RENT—Single and modern rooms Rio Grande, 519 W. Central.

**FOR RENT—Rooms**  
STEAM HEATED room, suitable for two young men or couple; every modern convenience. Address newly established HOTEL CRAIG, ALBUQUERQUE'S BEST, 115 1-2 W. Silver.

**FOR RENT—Miscellaneous**  
FOR RENT—The second floor of the Strong block, 32 rooms, newly paved and repainted; two baths, two toilets, all in first-class condition; rent reasonable. Just the proposition for first-class rooming house or hotel. Apply Strong Bros.

**LOST AND FOUND**  
LOST—Belt buckle, Friday night, either in opera house or between the opera house, South Walter and Central. Return to Journal office for reward.

**FOUND—Jeweled Lafayette necklace.**  
Found in the lobby of the Alvarado hotel by paying for this advertisement.

**LEGAL NOTICE**  
Territory of New Mexico, County of Santa Fe.  
In the District Court.

**BALFOUR GOES TO  
LA JUNTA**

Former Local Santa Fe Agent  
to Fill Executive Position in  
Office of General Superin-  
tendent J. M. Kurn.

William Balfour, agent for the  
Santa Fe railroad, in Albuquerque, for  
two years, and for several weeks past  
general yardmaster, with charge of  
the local yards and terminals, will go  
to La Junta within the next few days,  
where he will assume an executive  
position in the office of General Super-  
intendent J. M. Kurn. Mr. Bal-  
four was relieved as agent several  
weeks ago by J. P. Johnson of Trin-  
idad. The position of general yard-  
master will be filled after January 1  
by G. W. Yeakum, for several years  
yardmaster.

**HOLIDAY CONCERT**

There will undoubtedly be a large  
attendance at the holiday concert to  
be given this evening at 8 o'clock in  
the Christian church, under the direc-  
tion of the Ladies' Aid society. After-  
Christmas stories will be told by sev-  
eral excellent readers. Yuletide de-  
clamations will be in evidence. M. C.,  
Frank and Mr. Charles Andrews will  
be heard in solos and duets while Miss  
Lillian Hensel, Miss Kenworthy,  
Miss Grace Storti, Miss Martha Bol-  
lard are on the program for a num-  
ber of instrumental selections. It will  
be a musical and literary treat. Tick-  
ets can be secured at the door. Ad-  
mission 25 cents.

**FREDERICK WARDE  
IS SPLENDID IN  
JULIUS CAESAR  
BY DR. GRAY**

Most Evenly Balanced of  
Shakespeare's Tragedies Is  
Very Successfully Presented  
By Unusually Strong Cast.

"Julius Caesar," almost universally  
acknowledged the best Shakespearean  
tragedy, was splendidly presented yes-  
terday at the Elks' theater at a mat-  
inee and evening performance. The  
crowd, in point of numbers, was not  
worthy the masterpiece, and it's mas-  
terful interpretation of characters, but  
a much larger house greeted the  
production in the evening than at the  
earlier presentation.

Frederick Warde has lost none of  
the powers of wonderful character  
portrayal which have made him the  
leading Shakespearean actor of his  
age. As Brutus, "the noblest Roman  
of them all," Mr. Warde is at his best  
and his impersonation of the part  
brought out vividly the better per-  
sonality of that generally misunder-  
stood character of history. Mr.  
Warde's Brutus is an original Brutus,  
one entirely different from other  
stage creations, and yet the real  
Brutus of history.

Marc Antony was well done by Mr.  
Andrew Rogers, who is an actor of  
much youth and equal promise.  
Horace Porter gave a splendid im-  
personation of Caesar. As the lion  
and hungry Cassius, Ernest Woods  
scored a success. The subject was,  
on the whole, decidedly good and the  
cast was a strong one. Probably more  
beautiful scenery was never shown on  
the local stage, as that very essential  
part of the production was perfect in  
every detail. All in all, the produc-  
tion was an artistic success. "Julius  
Caesar" was one of the theatrical  
treasures of the season and thoroughly  
enjoyed by those who went.

This is not Mr. Warde's first ap-  
pearance in Albuquerque, and it is  
hoped it will not be his last, as the  
eminent actor will always find a warm  
welcome from the theater-goers of the  
city.

**BRIDE AND GROOM  
ARE ONCE AGAIN  
TOGETHER**

Lon. E. Gamble Released From  
County Jail Yesterday After-  
noon, His Young Wife Refus-  
ing to Prosecute.

The closing chapter, as far as Al-  
buquerqueans are concerned, of a lit-  
tle drama which began here on Christ-  
mas eve, when Lon E. Gamble de-  
serted his young bride of six days and  
departed on a westbound passenger  
train with seven hundred dollars of  
her money, occurred at 5:30 o'clock  
yesterday afternoon, when Lon was  
released from the Bergrum county  
jail in which place he had been con-  
fined since Sunday morning, after be-  
ing captured by a Santa Fe detective  
near Grants.

Mrs. Lon E. was on the outside of  
the gray walls of the prison and as  
the gate clanged behind Gamble, they  
both made for each other and were  
soon wishing each other a Merry  
Christmas and a Happy New Year.  
The girl notified the officers yes-  
terday that she would not prosecute  
Gamble and would stand all costs in  
the case. There was no alternative  
but to release Gamble, as he could  
not have been convicted without the  
testimony of the wife.

Gamble and the girl, who was Miss  
Cecil Clark of Abilene, Texas, were  
before her marriage to the man in Trin-  
idad, a week ago, arrested here, Christ-  
mas eve. Gamble left his bride in the  
lobby of the Alvarado hotel while he  
went to buy tickets west. He took with  
him seven hundred dollars of the  
girl's money and was a hundred miles  
away when captured, after an excit-  
ing chase by the officers. The money  
was returned to the girl yesterday and  
at last reports she and her appar-  
ent husband were taking in  
the moving picture shows.

When you have a cold get a bottle  
of Chamberlain's Cough Remedy. It  
will soon fix you up all right and will  
ward off any tendency toward pneu-  
monia. This remedy contains no  
opium or other narcotic and may be  
given as confidently to a baby as to  
an adult. Sold by all dealers.

If you need a carpenter, telephone  
Hesselden; phone 377.

LOOK! LOOK!  
It looks like hand-screened coal.  
That's what you will get if you phone  
JOHN S. BEAVER.

We say, with a clear conscience,

duced wonderful results, especially in  
"The March of the Magi Kings," and  
in that immortal chorus, Handel's  
"Messiah," from which Mr. Seder pre-  
sented the musical part of the "Halle-  
lujah Choruses."

The anthem, "Arie, Shine," was  
rendered beautifully. The duet part  
of this anthem, in which the sweet  
voice of Miss Rose Hensch and the  
well known voice of Mrs. Frank,  
blended in delightful harmony, was  
one of the many fine touches in this  
varied program.

If one number could be specially  
mentioned, perhaps it was the duet  
by Mrs. Frank and Mr. Charles G. An-  
drews. Here surely in "The Star of  
Bethlehem," nothing finer could be  
desired.

The minister took his hearers to the  
temple of old and in a few words  
sketched the significance of the "Law  
and fulfilled prophecy," meeting at  
the age-old shrines.

"I had been troubled with consti-  
pation for two years and tried all of  
the best physicians in Bristol, Tenn.,  
and they could do nothing for me,"  
writes Thos. E. Williams, Middleboro,  
Ky. "Two packages of Chamberlain's  
Stomach and Liver Tablets cured me."  
For sale by all dealers.

**DEATHS AND FUNERALS**

William Volant Brach, 36 years  
old, and for seven years a resident of  
Albuquerque, died at 7 o'clock Sunday  
morning at the Santa Fe hospital.  
Mr. Brach was for a number of years  
a valued employee in the Santa Fe  
storekeeper's department here, and  
made many friends, who will regret to  
learn of his untimely death.

A sister arrived from the east yes-  
terday and will accompany the body  
to Baltimore, Md., leaving here on  
Santa Fe train No. 8 Tuesday eve-  
ning. Deceased is survived by three  
brothers and two sisters.

Brief funeral services will be held  
at 2:30 o'clock this afternoon, Rev.  
C. O. Beckman of the First Method-  
ist church will officiate and Mrs. H.  
J. Collins will sing.

Funeral of Manuel Salazar.  
The funeral of the late Manuel  
Salazar y Otero, whose death occurred  
Saturday afternoon, was held from the  
Immaculate Conception church at 9  
o'clock yesterday morning. A large  
number of relatives and friends at-  
tended the requiem mass, celebrated  
by Rev. A. M. Mandalari, S. J. In-  
terment was in Santa Barbara ceme-  
tery.

Henry Kempf.  
From the Immaculate Conception  
church at 9 o'clock this morning will  
be held the funeral of Henry Kempf,  
a young man, who died here Sunday.  
Rev. A. M. Mandalari, S. J., will of-  
ficiate at the funeral and interment  
will be in Santa Barbara cemetery.

Mrs. Anna Livingston.  
Funeral services for Mrs. Anna Liv-  
ington will be held in the Borders  
chapel at 2 o'clock this afternoon.  
Mrs. Livingston, who was 76 years old,  
died Saturday after a brief illness at  
the home of her daughter, Mrs. Henry  
L. Lee, 296 South Broadway.

Neither Desirable.  
Myer (proud)—My son is learn-  
ing to play on the violin.  
Giver—Well, you have my sym-  
pathy. I have a dog that howls at  
the moon.—Chicago News.

Coats at Five Dollars each. They are made of all wool Zephyr  
Yarn in plain or fancy weaves. Several collars in a variety  
of colors, values up to \$7.00.

**Blankets and  
Comforts**

With practically all the winter before us we wish espe-  
cially to call your attention to our blankets and comforts. You  
will find our stock worthy of inspection. One number in com-  
forts made specially for us is 81x90 inches filled with selected  
cotton. Nicely quilted covered with good quality of silklike  
printed at \$3.50. Others priced from \$1.00 up.

In plaid blankets we carry the largest line in the city. We  
have just received a delayed shipment of Blanket and White and  
Red or Black, all wool blankets that are guaranteed as such.  
The Black and the White are Priced at \$6.50 and the Red and  
Black at \$5.00, only 10 pairs of the 11-4 Black and  
White left and no more to be had. Phone your order on these  
for they will only last a day or two.

We would also remind you that we carry a guaranteed all-  
wool, white blanket in pink or blue border at \$5.50 the pair.
