RIO HONDO DISTRICT.

New Business Flourishing and Some Excellent Prospects.

Special Correspondence Denver Sun.

AMIZETT, N. M., June 9.—This camp is beginning to assume quite rapidly the appearance of a thorough mining camp. Goodrich Bros., of Taos county, have completed their 20x60 store and are ready for business, with a good stock of groceries and merchandise. Three saloons are in full blast. Helpenstine's new hotel has been running full to overflowing the past few days, and Liebert, proprietor of Liebert's hotel in Taos, has broken ground for his hotel here. F. A. Gallegos, of Arroyo Seco, has nearly finished his meat market and will open up about next Wednesday.

W. W. Follett, civil engineer and surveyor, of Denver, and well known through Colorado from his association with the Atchison, Topeka and Santa Fe, and Col. Nettleton on the latter's irrigation work for the government, has completed his building and is ready for business as the United States deputy mineral surveyor for this territory.

R. D. Cowden, lately with Dietrich & Mitchell, of Creede, and formerly in the engineer corps of the D. & R. G., arrived on Friday, and his experience in claim work at Creede insures his accuracy and correctness in this line of business.

Tully & Co., are selling hay, grain and flour, and are also running a general blacksmithing business.

P. M. McCall, of Creede, is fully equipped for assay work, and with a reputation fully established in this business, the camp is fortunate in having an assayer whose reports can be thoroughly relied upon.

The returns from the last carbonates struck in the Independence were decidedly encouraging and shipping ore is now in sight in that mine. Sample No. 1 gave fifty-five ounces of silver with 61.8 per cent lead. Sample No. 2, 61.7 ounces silver and 77.6 per cent lead.

There is now certainly every indication of the establishment of a prosperous mining town at this point in the canon of the Rio Hondo.

Disastrous Fire in El Paso.

Yesterday morning at 2:35 an alarm of fire was turned in from the Gem theatre on El Paso street. The flames started in the alley and the building was quickly gutted of theatre fixtures, gambling layouts and the stock and furniture of the handsome saloon destroyed. The fire quickly communicated to Kerna jewelry store and from thence spread into Myers barber shop, the El Paso Kitchen and Hunter's tailoring establishment.

It looked as though the whole block down to Overland street would go, as the water pressure was very feeble, but the prompt and manful action of the firemen subdued the flames and all danger was over in twenty minutes.

Where to Stop in Chicago.

The perplexing question which is every day asked by people who desire to go to Chicago to attend the World's fair is, "Where are we going to stay when we get there?" This is easily answered, and if you will go to the ticket agent of the Santa Fe, Mr. W. M. Smith, he will tell you.

Arrangements have been made for the distribution by the Santa Fe company of a pamphlet entitled "Homes for Visitors to the World's Fair." This is a valuable pamphlet containing the names and addresses of about 9,000 families who will furnish accommodations to visitors from May 1 to October 31, 1893. The pamphlet also contains sectional maps which will enable the intending visitor to select any quarter of the city that he would prefer. Correspondence can then be carried on and definite arrangements made so that when visitors arrive in Chicago they can proceed at once to their quarters.

TERRITORIAL TIPS.

ALBUQUERQUE ATOMS.

A Home Protective Temperance society has been started in Albuquerque. Great Scott! Is it that bad?

Theo. F. Zimmer yesterday received very sad news from his home in Saxony. It conveyed to him the information that his mother was dead. She was 59 years old.

The remains of Jas. M. Wood, a consular agent, who died at Albuquerque Monday, were shipped to Elmira, Ont., this morning for interment.

C. E. Blum, civil engineer, has advanced to the Commercial club a scheme for a glass factory there, and the club should look into the matter at once. Mr. Blum is thoroughly convinced that the sand of the valley is practically adapted to the manufacture of glass.

Dan Keleher received a telegram from Lawrence, Kas., stating that his father died yesterday at 10 o'clock a. m. The deceased was 67 years old and a prominent gentleman of Lawrence. Thos. Keleher, a son, left here for his bedside on Monday night, reaching Lawrence this afternoon.

W. H. Hulvey writes Hon. J. A. Saint at Albuquerque that several foreigners now visiting the World's fair at Chicago, will visit Albuquerque before returning to Europe. Albuquerque gathers them in, whenever possible. Good example this to follow for other cities in New Mexico.

General Agent Van Slyke, of the A. & P. R. R., is arranging for an excursion from Albuquerque to the Pacific coast to start July 1. Rates for round trip from Albuquerque will be to Los Angeles, Redondo and San Diego \$12, and to Santa Monica \$12.50. Those who are not going to make the trip to the World's fair, but intend to take a vacation, ought to arrange to avail themselves of the opportunity to make the trip to California.

LAS VEGAS LOCALS.

Mrs. Josephine Wright, at the insane asylum, is reported to be steadily growing worse.

Meers, Zimmerman, Stoddard, Nolan, Smith and Billis, have returned from their enjoyable mountain trip.—Optic.

Ex-officio county recorder, Chas. E. Rudolph is notifying parties interested in overdue and uncancelled mortgages to give the same attention.

Mr. J. R. Smith, lessee of the roller mill, is making repairs, during which the plant is shut down. He has recently made extensive purchases of Mora wheat and on resuming will run full time.

Two men, Geo. O'Neil and Fred. McDonald were captured by Joe Overhulst in a Santa Fe box car. The lowest penalty is six months for this offense. It will probably go hard with them.

A. B. Renahan, of Santa Fe, who acted as stenographer in the election contest case of Romero vs. Lopez, was ordered by Judge O'Brien to turn over the testimony in the case to the examiner, the judge holding he was an officer of the court. Mr. Renahan refused on the ground that the parties were seeking to evade their liability for his legal fees. The judge ordered him to jail for contempt. Mr. Renahan still holds his testimony.

The Raton Range says that a letter from General Manager Frey, on the subject of removing the Atchison shops from that place, concludes with the statement that the shops "will not be moved." This is perfectly satisfactory to Las Vegas, and the Optic sincerely congratulates Raton on the fact. This city has never desired to deprive the Gate city of her chief industry. The position of Las Vegas has been, all the time, that only in case the company had fully determined on removal, would Las Vegas advance a proposition for location.—Optic.

SILVER CITY NOODLES.

Robert Black has returned from a visit to J. A. Apperson, in San Francisco.

The Timmer House repairs are almost completed, and the house is as good as new.

The Grant county fruit crop is progressing splendidly. The supply may exceed the demand.

The tie in the election between two school trustees at Lordsburg has been referred to the county superintendent.

The New Mexican is the oldest newspaper in New Mexico. It is sent to every Post Office in the Territory and has a large and growing circulation among the intelligent and progressive people of the south-west.

THURSDAY, JUNE 15.

GEORGIA has a postoffice named Adlai. And still the 80,000 Georgia colonists are not happy, but are still clamoring for more government pie.

Mr. DAYTON, newly appointed postmaster of New York City, is described as a "Tammany and a clubbable man." He says himself "I know nothing about post-offices and I wonder at my appointment." Shade of the starry goddess!

The Inter Ocean announces editorially, that \$20 in Chicago will pay for six visits to the fair, a week board and lodging and leave a "little more" than \$8 for the steers, side shows, or other incidental expenses. You may try this plan if you like.

One of the axes that the Grand Old Man swings so famously in Hawarden park is now on exhibition at Chicago. Mr. Stevenson's axe, or even Mr. Maxwell's would take all the shine off the imported article. Stand up for home industries.

It is to be regretted that the pneumatic guns of the little dynamite boat Vesuvius do not give satisfaction because of the unsteady deck. The twelve-inch monster rifles of the Monterey are all right though, and the pneumatic cannon may be used from the land with satisfaction.

The nomination of Major Wm. McKinley means that the Republicans have appealed their case from the erroneous decisions 1890 and 1892. The demonstrated success of the Republican policy at home and abroad will be put in against the vacillation and failure of the present administration.

SEVERAL murder cases are upon the docket at the present term of court in this county. The ends of justice and the good of the community demand that these cases be disposed of at once. The appropriation for court expenses is small, hence it should be used for the disposition of the most important cases on the docket.

It will probably cost us a little more than Minister Blount's salary, or even the price of the New York Herald to buy the Sandwich Islands when some exigency which is sure to arise during this generation requires it. The next great war will be decided on the ocean. The power that holds Hawaii controls the Pacific, dominates China, India and Australia and checks the restlessness of our South American neighbors.

SENSIBLE SUGGESTIONS.
Postmaster General Bissell thinks that it would be a great advantage if some plan could be devised that would result in practically placing the power of selecting postmasters in the hands of the people of the various localities, thus affording much needed relief to the officers of the postoffice department and the representatives in congress from the personal importunities of applicants for these positions.

Moreover, he thinks it is not and can not be in the interest of the people or of good government that the power to appoint postmasters of a class already 65,000 in number should be vested in a single officer of the general government remote from the localities and the people affected by its exercise. The postmaster general is clearheaded and patriotic in this opinion. Congress should act upon these suggestions. They are timely and if carried out would result beneficially to the people of the entire country.

THE CHIEF JUSTICESHIP.
Ex-Chief Justice E. V. Long is now engaged, so the New Mexican's information comes from the Meadow city, in a still hunt for the appointment of chief justice of New Mexico; he now has in his office a petition which is being signed by the native citizens of this territory only, New

Mexicans by birth and Spanish speaking, which petition sets out, that they, the native people of New Mexico, want the ex-chief justice re-appointed because of his knowledge of the customs and habits of the native people, and that he is their unanimous choice etc., etc.; on the other hand friends of the ex-chief justice are circulating reports that he is out of the race, would not have it, etc., etc. Judge Long is a very experienced Indiana politician and those who desire to beat him must get up before daylight in the morning. The New Mexican being a newspaper, takes pleasure in informing the people of what goes on in the matter. There are now four candidates for the position, Messrs. H. L. Warren, of Albuquerque, and J. D. O'Bryan, E. V. Long, and Columbus Moise, of Las Vegas. It comes also direct and upon good authority that in case of Judge Long's appointment as chief justice, Mr. W. G. Hayden is to have the clerkship; Messrs. Lawrence, Joe Lopez, Veedor and Radolph will have to be satisfied with deputy clerkships or nothing.

AN IRRIGATION JOURNAL.

This journal has always and consistently advocated the development of the waters of Santa Fe county. In a short time it will publish a complete review of the work and progress made during the last three years in the Pecos valley. The first public attention called to this valley was by the special correspondent of the New Mexican in 1880. Since then able engineers have followed the hints given, and to-day the Pecos valley enjoys the benefit of the largest completed and projected water system in the United States. The Seven Rivers reservoir is the largest on the continent. During the three years of its progress the New Mexican has consistently championed these improvements.

To come nearer home, the reservoir in the Santa Fe canon, whose water is restrained by the best built dam in the United States, is the offspring of its constant advice and labors. Preliminary survey work on the Nambé reservoir has begun. This and the Arroyo Hondo reservoirs should be pressed to completion. There is also another proposition that should receive attention. There is a difference of elevation between the constantly flowing water of the Rio Grande at Embudo and the general level of the Santa Fe valley of about 200 feet. The Rio Grande should be brought to the gates of the city, and the thousands of arid acres available for cultivation in that direction made fertile. The New Mexican will not cease its labors for Santa Fe until crowded with success equal to that in the Pecos valley. The Santa Fe valley is the most delightful in the world. Let it be made fruitful.

THE SPIRIT OF THE PRESS.

Not a Particle.
The "pernicious activity" of Headman Maxwell does not appear to worry the president just a little bit.—Columbus Journal.

Strong Always and Everywhere.
The campaign for the presidential nomination in 1896 is already on, with Ohio backing William McKinley. Ohio's backing means a great deal for any man, but McKinley would be strong even without it.—Jacksonville (Fla.) Journal.

Let Them Take Their Medicine.
Louisiana Democrats are whining over "a repeal of the bounty on sugar" and the protective tax. They say "it will be a great hardship on planters." Well, they helped to place in power the party that promised to "smash the robber tariff." Take your medicine like little men.—Chicago Inter Ocean.

Many Cooks.
President Cleveland has no lack of advisors. The various wings of the party are telling him just how to do it. Among them are the "tariff smashers," and the "anti-silverites," the "snappers," and the "anti-snappers," and last the "Mugwumps" and "civil service reformers." They each know just how it must be done "if the party hangs together." Republicans will stand by and see it hang.—Chicago Inter Ocean.

Will the President Succeed.
Just what the effect of the president's definite announcement of his purpose to call a special session in September will have upon the office seekers and the men exerting influence in their behalf is an interesting question. Probably, however, they will put forth every effort in their power during the intervening three months. It is understood that some congressmen have agreed, in return for favors extended in the form of offices, to support such legislation as the administration may desire, but all the same it is probable that the performance of their part of the contract may be insisted on in advance of the granting of the offices sought.—New York Tribune.

A Specimen Southern Governor.
There may be ground for the complaint made by Gov. Fishback, of Arkansas, in his letter to Mr. Cleveland, in which he pointed out the fact that congress had neglected the interests of the people living along the Mississippi river. But it is difficult to see why he addressed his letter to Mr. Cleveland, who is not responsible for the action of congress, although he

seems to think that he is. The president is not the author of legislation, and if congress neglects to legislate in the interests of a particular section of the country, it, and not the president, should be held responsible. It is letters like this which Gov. Fishback has written, which strengthen a president like Mr. Cleveland in the belief that he is the whole government and that he has a right to shape the legislative policy of congress. It would be perfectly proper for the governor of a state to address a communication to congress and, if Gov. Fishback had done that, he would have chosen the better course.—Denver Republican.

"OTOCATARRH."

How Catarrh Impairs Their Health, Disrupts Their Intellectuals and Darkens Their Future.

Unfortunately children of tender years are often afflicted with catarrh, sometimes inherited, but generally acquired through contact with diseased persons. The child is restless and dull, with poor memory, disinclination to study; the nostrils are sore and clogged up; the child is often seen heavily awaking with startles and screams. Parents not knowing the child has catarrh are apt to blame the child for being cross and peevish, for stupidity, etc. Instead of having the child cured of the disease that beclouds the intellect, impairs the health and darkens the future of their offspring. During the course of the disease the eyes become weak and watery, hearing dulled, smell impaired and all the special senses injured.

Take the case of Master Charles Graham, one of Denver's brightest children, now 10 years of age, and who, in a most intelligent and concise manner, states his own case: "My head ached nearly all the time; it was worse when I tried to study, and when I ran it would hurt and pain over my eyes. I could not hear people talk as I can now since you made me well. I could not my teacher at school; always had a noise in my ears; could not attend to my books; had to stop school; I could not go out and play for fear of catching cold; did not care to do anything but sit still. I was tired and hungry; did not care to eat; I would almost choke at times and hardly could breathe when I tried to run. My mamma tried everything she could hear of, but as I had taken no medicine for the last six months, nothing could be found to cure me until she took me to Dr. Hume, and although I have taken no medicine for the last six months, I have had no return of the trouble and am entirely cured. Dr. Hume treated me for only four months and did for me in that time more than every body else, for he cured me and made me quite well."
CHARLES GRAHAM,
701 Scott Street, N. Denver.

Those in other cities treated with equal success by correspondence, as Dr. Hume devotes several hours daily to the care of out-of-town patients, and for a diagnosis of your case, which will inform you whether you are curable or not.

Such a remedy is found in Simmons Liver Regulator—not a sweetened compound to nauseate, or an intoxicating beverage to cultivate an alcoholic appetite, but a medicine pleasant to the taste, and perfectly harmless when given to the smallest child. SCHOOL DIRECTORS AND ELECTIONS.

At request of Hon. Amado Chavez, territorial superintendent of public instruction, the solicitor general has rendered the following opinion:

Your favor of this date, requesting my opinion with reference to the validity of the election held for school directors in Sierra county, under the circumstances referred to by you, is received, and in reply would say, that on July 9, 1922, I advised you as follows: "Section 9 of chapter 26, laws of 1911, the school law, simply provides for an election for school directors, at which the old directors were to act as judges of election and certify the results to the county superintendent. There is no provision for canvassing the vote or for counting the ballots, or for a contest, and no means under that act for going behind the certificate of the judges. The county superintendent is not authorized to impugn the certificate of election given by the directors; there is no provision for the disposition of the ballots, and the whole law is very defective in this particular, and it should be amended at the next session of the legislature. The only remedy any person aggrieved by the result, would have, would be by going to the district court in a civil action, or by a criminal proceeding against the board of directors, if they have willfully neglected their duty or violated the oath of office." And I see no reason to change that opinion when you get that election, in regard to the appointment of judges by the county superintendent, I think that is irregular; for while the school law is silent as to the method of filling vacancies for that purpose, the general law of elections, section 1830 would govern, and that provides for the selection of such judges by a majority of the qualified electors present. But as I have stated above this would not invalidate the election of itself.

In regard to a woman holding the office of school director, if the case were tested in the courts, I do not think, she could retain the office, although there is a wide difference of opinion on this subject but the question can not be raised, except by a direct proceeding to test her right, and if she appears to have been regularly elected, she had better qualify and act. Very respectfully yours,

EDWARD L. BARTLETT,
Solicitor General, etc.

A NEW U. S. ASSISTANT ATTORNEY.

The efficient U. S. attorney for New Mexico, Hon. E. A. Fiske, was quite surprised this morning when he received official notification from Judge A. B. Fall, of the 8d district, that the commission of Col. A. J. Fountain as assistant U. S. attorney for New Mexico had been revoked by the attorney general of the United States, and that, by the same officer, Mr. Thomas S. Hefflin, a young Silver City lawyer, had been appointed to the vacancy, had presented his commission to the judge of the 8d district, taken the oath of office and was ready for business.

NOTARIES APPOINTED.

Major R. J. This case has the right of way to be argued on its merits, but the court may take up other business.

At 2 o'clock this afternoon suitable resolutions were offered by the bar committee on the death of W. E. Coons. Messrs. Catron, Bartlett, Fiske, Spies and Sloan made appropriate addresses, and the court then adjourned as a mark of respect to the memory of the deceased.

They will probably make New Mexico their homes and appear to be desirable citizens and enterprising wide awake men.

Squire Garcia this morning discovered that the hat worn by Eleuterio Padilla, one of the men in jail held for the murder of Marcelino Vigil, was the property of the murdered boy; Epifanio Vigil identified the hat fully; it had the appearance of having been recently washed. This will prove an important link in the evidence against Padilla.

Mr. E. F. O'Riordan, one of the public school teachers, filed a communication with this paper in which he defends himself against certain charges made against him by Mr. Rogers, late school superintendent of this city; the charges were filed with the governor, who is an ex-officio member of the territorial board of education. Mr. O'Riordan denies them in toto and uses some very emphatic language against Rogers. The paper is too lengthy for publication in this journal.

Mr. A. M. Howells, consulting engineer of the Municipal Investment company, informs the New Mexican that within three days the connections would be made with the main reservoir and the city water mains and Santa Fe would have its usual good pressure and supply of water. With the stored water and the flow of the river an indefinite supply is assured; and Mr. Howells thanks the public for its forbearance under the stress caused by the tremendous difficulties with which the workmen have had to labor.
