Mexico: Notes On Investment

by John Neagle

Category/Department: General

Published: Tuesday, March 27, 1990

According to a recent report by the Banco de Mexico, fixed gross investment in 1989 was 30% less than in 1981. In 1982 combined private and public investment was equivalent to 21.06% of GDP, compared to 16.05% in 1989, and a projected 17.7% for 1990. The Center for Economics Instruction and Research (CIDE) said the decline in public and private investment in the 1983-87 period was the result of economic recession. Private sector investment dropped by 4.4%, compared to a 11% decline in public sector investment. (Basic data from Notimex, 03/26/90)
