BALLOON MEN READY FOR BIG RACE

GERMANY, FRANCE AND
ENGLAND SEND ENTRIES

Nine Airships Start This Afternoon in Effort to Smash Recent Record Established by McCoy and Chandler.

[By Morning Journal Special Leased Wire.]
St. Louis, Oct. 20.—Arrangements have all been completed for the second international aeronautic contest, which will begin at 4 o'clock Monday afternoon. Nine balloons have been entered, representing America, Germany, France and England.
The first international contest was held last year at Paris, at which Lieutenant Frank P. Lahm of the United States cavalry, by a flight of 402 miles won the James Gordon Bennett cup, the trophy of the contest. The cup is an object of art in massive silver, valued at \$2,500, and was offered by James Gordon Bennett to the aeronauts covering the longest distance in a single flight. If the cup is won three times in succession by an aeronaut it then becomes the property of the aeronautical club of which he is a member. The winner of the cup in each international contest, by the terms of the donor, will receive in addition, a prize of \$2,500 in cash, together with one-half of the entry fees and forfeits. The contestant finishing second will receive one-third and the contestant finishing third the remainder of the entry fees and forfeits. This second competition for the Bennett cup was organized by the Aero club of America under the rules of the International Aeronautic Federation and will be conducted under the auspices of the Aero club of St. Louis.
The first five days of the week will be devoted to aeronautics. On Monday the principal feature of the entire aeronautic meet will open the program, when the nine balloons will ascend in the international long distance race for the Bennett cup. Tuesday there will be a contest of aerobically flying machines of the heavier-than-air type, with total cash prizes of \$2,500. Thursday the contest of flying machines for the Scientific American cup will be held. Friday will be "free-for-all" day in which any kind of air craft that will get above the ground may participate in the contest to win the Lahm cup, which has just been won by Aeronauts McCoy and Chandler in their long balloon flight from St. Louis to West Virginia.

Aeronautic interest centers chiefly on the international balloon race. According to the announcement of the Aero club, the first balloon, the Pommer, will be sent up at 4 p. m. Monday, and others will follow at not less than five minute intervals. The balloons entered in the race, their pilot and the company who will accompany each pilot, the country represented, and the cash fees of gas capacity of each balloon are as follows, given in the order in which they will start:

Pommer, Germany; Oscar Erling, 77,000.
United States, America; Major H. B. Hersey, 75,000.
L'Esle de France, France; Alfred Le Blanc, 75,000.
Dusseldorf, Germany; Captain Hugo von Abercron, H. Heidemann, 77,000.
Lotus II, England; G. Brewer, Le Brabant, 75,000.
America, America; J. C. McCoy, Captain De F. Chandler, 77,000.
Anjou, France; Rene Gassner, Charles Levee, 75,000.
Abercron, Germany; Paul Meckel, Herr Polatz, 75,000.
St. Louis, America; Alan R. Hawley, August Post, 77,000.

All the details of the race are in charge of a commission appointed by the Aero club of America.
Next in importance in the features of the program is the competition by aerobically flying machines, which are divided into classes as follows:
First—Dirigible airships which are lighter than air, being made so that the bag or envelope contains a gas lighter than air.
Second—Machines heavier than air, which are designed to be lifted from the ground and propelled by the pressure of planes or extensive surfaces of some light or material against the air.
All the air craft have reached St. Louis, and are being assembled on the plot of ground in Forest Park where the ascensions will be made. The plot of ground is at the eastern end of Forest Park, about two miles from the site of the Louisiana Purchase exposition, and is one of the highest points in the city. Its height makes the selection agreed on for aeronautics as it is far removed from wires that might entangle the baskets and smoke stacks that might interfere with the flight.

The ballooning ground proper is about 100 yards wide by 170 yards long and is enclosed by a fence of netting. Twenty feet inside this fence is still another wall of netting, this inner court being reserved exclusively for the aeronauts, contest officials, members of the United States signal corps and the scientific men who will assist in the inflating, and so along will the cordon of soldiers be that none other may enter, no matter what his rank or title.

Through the center of the inner court runs a twelve-inch gas pipe 100 yards long with alternating off-shoots of smaller pipes from which the cup contenders will be inflated. The main pipe runs from a gasometer with a capacity of 4,000,000 cubic feet, one of the largest in the world.

On three sides of the outer enclosure and daily bunting, are stands that will seat 20,000 people. On the south side are the tents in which the airships and flying machines are being assembled to await the departure of their larger but clumsier sisters, the delicate skeleton-like frame work being scattered in profusion among the big drums or generators which are to provide the special gas for the dirigibles.

All the dead grass has been burned away from the slopes of the hills leading to the grounds, that a chance spark may not in a few moments destroy many thousands of dollars worth of valuable property and prevent the great race. As a sure safeguard, rules have been made to prevent anyone from smoking near the enclosure. The balloons have been stored at the old palace for several days, under the careful care of the aeronauts who are to man them. Each has been carefully examined for possible weak spots, the ropes, cords and valves have been tested and talcum powder has been sprinkled where the varnish was sticky. Today all were taken to the grounds and final arrangements were completed for the contest.

FRENCHMEN HAVE NEW PLAN FOR AERIAL NAVIGATION
Paris, Oct. 20.—A new principle of aerial navigation with heavier-than-air machines has been employed in some recent experiments and gives promise of large results. Instead of using planes on the box kite principle, driven by a vertical propeller, as is the case in the aeroplanes of Santos Dumont, other experimenters up to this time, rotary horizontal planes are used. In other words the gyroscope principle is employed and the machine is called the gyroplane. The theory is that by employment of horizontal propellers the machine can be easily lifted and lowered after the fashion of the old "helicopter" toy, longitudinal motion being obtained by the forces of gravity by allowing the machine to dip and glide on its plane in the same way that the heavy birds do. Count de Lambert believes that this is the true solution of aerial flight, but the honor of constructing the first machine on this principle belongs to Louis Breguet. He has built a machine in the general form of a Saint Andrew's cross, each arm having at its extremity eight revolving paddles or propellers slightly inclined. These thirty-two paddles present a total surface of twenty-five square meters and are revolved by a ferry ship motor at the center of the cross, which is where the pilot sits. The total weight of the machine is 578 kilograms. In the preliminary trial the machine left the ground in which when the motor was set in motion and was easily sustained in the air with seventy-eight revolutions a minute. When the motor was slowed down the gyroplane descended gently. Perfect equilibriums were maintained. Longitudinal flight has not yet been attempted, but the inventor thinks it will be easy to make seventy-five kilometers an hour.

BLUE LAWS DEFIED IN KANSAS CITY

Actors and Actresses Face Indictment by Grand Jury For Participation in Sunday Plays.

[By Morning Journal Special Leased Wire.]
Kansas City, Oct. 20.—All the theaters of this city were open today in violation of the Sunday closing order of Judge Wallace of the criminal court, and all the actors and actresses who participated in the various performances will be indicted by the grand jury next Tuesday. Scores of city detectives and deputy marshals were busy today securing evidence against the violators of the Sunday closing order which will be presented today to the same grand jury that has already indicted all the theatrical managers here for keeping their playhouses open on Sunday. The persons indicted will be released on bond and Judge Wallace believes that this method of procedure, if adopted every Sunday, will prove so inconvenient to traveling actors that the theaters will be compelled to close.

PRAIRIE FIRE SWEEPS FARMS IN MINNESOTA

Boy Playing With Matches Starts Disastrous Blaze.
Barnesville, Minn., Oct. 20.—A prairie fire is devastating the northeastern part of Wilkin county and three farms have already been wiped out. The damage thus far is estimated at \$50,000.
The fire was started yesterday afternoon on the farm of Charles Fandock by a boy who was playing with matches. All the buildings on that farm were soon destroyed. Thus far efforts to check the progress of the fire have been unavailing, but all the farmers in the vicinity tonight are plowing the country in an attempt to stop the flames.

AMERICANS IN RUSSIAN PRISON

ACCUSED OF HELPING TO
FINANCE REVOLUTION

William E. Walling, Wife and Sister-in-law, In Hands of Czar's Secret Police on Serious Charge.

[By Morning Journal Special Leased Wire.]
St. Petersburg, Oct. 20.—William English Walling, of Indianapolis, his wife and sister-in-law, Miss Rose Strunsky, were arrested in this city tonight by a force of gendarmes because of their association with several members of the Finnish progressive party. They were still being held at the gendarmes' headquarters at a late hour tonight. A representative of the American embassy appeared at the headquarters in their behalf, but he could take no action until tomorrow morning.

Kellgren Durand, another American and a friend of Mr. Walling, who has been in St. Petersburg gathering material for a series of lectures, was also taken into custody, but later he was released. There was no evidence on which to hold Mr. Durand.
For several years past Mr. Walling has taken an active interest in the Russian struggle, and this is the third time he has visited Russia.
The Finns with whom Mr. Walling has been associated also were arrested. In this party there are three men and one woman. The woman is the wife of Professor Malmberg, of Helsingfors university. The Finns have been in St. Petersburg for several days. They have been under close police observation. Yesterday and today the Finns, Mr. and Mrs. Walling and Miss Strunsky dined together, and tonight the entire party was taken into custody.

The arrest took place at the Hotel de France, one of the leading hostels of this city. The rooms of the Walling party and the Finns were thoroughly searched by a colonel of gendarmes and several assistants. All the baggage and effects of the Walling party and the four Finns were opened and the gendarmes took possession of a large quantity of books and other documentary material.
Mr. Walling and his wife, who is known to the literary world as Anna Strunsky, and Miss Strunsky, were taken to the gendarmes' headquarters and no other place to confine them could be found. After much telephoning by the authorities places were finally found for the prisoners. The three Americans were separated. Mr. Walling was sent to the detention prison, his wife to the women's prison and Miss Strunsky, who apparently is regarded as the most important captive, to the new jail recently built for the famous third section or secret police.

It was impossible to learn tonight what the charge was against the Finns. It will determine the accusation against Mr. Walling, but a member of the secret service who accompanied the gendarmes who made the arrest, said the order of arrest had originated in his section and that the secret service had been shadowing Mr. Walling constantly for two years past. The police have been instructed to look also for James M. James, a New York newspaper man, who has been over here for a New York weekly, and several socialist papers. Mr. James left St. Petersburg several days ago and has not yet returned. He has been taken into custody twice during raids on revolutionary gatherings in this city, but was released upon proving that he was present in his journalistic capacity only.

Mr. Walling has just returned to St. Petersburg from attending the socialist congress in Germany and France. He has also spent several months recently in Geneva, where he frequented the headquarters of the Russian revolutionists. He is intimate with many leading revolutionists and liberals. Mr. Walling is accused by the police of furnishing financial aid to the revolution, though this charge is not the foundation for his arrest tonight.

The arrest of Walling bears a striking resemblance to certain reports of his arrest in the Russian capital in January, 1906, which originated with the editor of a Jewish newspaper in New York, but which was at once denied from St. Petersburg, and declared to be without foundation.
Mr. Walling is thirty years old. He is a son of Dr. Willoughby Walling of Chicago, formerly United States consul at Edinburgh. He is a graduate of the University of Chicago. He inherited a considerable fortune from the estate of his grandfather, William H. English, of Indianapolis, and after working among the poor of Chicago and New York City, he associated himself with the University settlement at Rivington and Elbridge streets. He lived there for two years, and was an intimate associate of J. G. Phelps Stokes and Robert Hunter.
Mr. Walling is described as having been a quiet, reserved man until he was aroused on the subject of child labor. Then he forced himself to the front as an aggressive champion against children working in factories. His energies and his means were enlisted in this cause. At one time he was a state factory inspector in Illinois.

Mrs. Walling, who was Miss Anna

Strunsky, is a graduate of Stanford university. She has done much literary work. She is a Jewess, twenty-six years old, and was born in Russia. She has lived in the United States since childhood. Her father is a business man in San Francisco.

WALLING WELL-KNOWN INDIANA PHILANTHROPIST
Indianapolis, Ind., Oct. 20.—William English Walling, of this city, who is mentioned in a dispatch from St. Petersburg as having been arrested with his wife and sister-in-law, has for the past several years been engaged in "settlement work" among the poorer classes. It is thought his energies in this direction in St. Petersburg brought about his arrest, together with his wife and sister-in-law.
Walling is a grandson of the late W. H. English, who was a candidate for the vice presidency on the democratic ticket in 1880. On the death of W. H. English he was left property to the value of about \$500,000. He still owns considerable real estate in Indianapolis. His wife is of the Jewish faith.

GOLD OUTPUT SHOWS BIG INCREASE

\$94,393,400 PRODUCED
IN PAST TWELVE MONTHS

Alaska and Nevada Leaders in Yellow Metal; Colorado Reports Decrease; Arizona Leads in Silver.

[By Morning Journal Special Leased Wire.]
Washington, Oct. 20.—George E. Roberts, who retired from the position as director of the mint on August 1, 1905, has completed a compilation of the statistics on the production of gold and silver in the various states and territories of the United States for the calendar year 1906. Mr. Roberts estimates the productions of gold in the United States during the calendar year 1906 to have been \$94,393,400, as against \$88,190,700 for the calendar year 1905, a net gain in 1906 of \$6,202,700. The principal gain was in Alaska, which amounted to \$6,429,500. Nevada's gain in gold was offset in Colorado, where there was a decrease of \$2,766,700.

The total production of silver in the United States during the calendar year 1906 is given as \$5,517,300. The output of the commercial value of \$28,256,400, as against \$5,101,600 fine ounces of the commercial value of \$34,221,976 in 1905. The net gain in the production of silver during the calendar year 1906 in Arizona was \$62,500 ounces.

The average price of silver for the calendar year 1905 was \$0.617 per ounce, as against \$0.67531 for the calendar year 1906.

DENVER MAN THROWS BOMB AT WIFE
Startling Attempt of Would-Be Murderer Foiled by Mother-in-Law.

[By Morning Journal Special Leased Wire.]
Great Bend, Kas., Oct. 20.—E. E. Stacy, soon after his arrival here from Denver today, made an attempt to kill his wife with a dynamite bomb. Stacy's mother-in-law saw her daughter's peril and phoned her out of danger before the bomb exploded. Stacy followed the women and struck blows of them with his fists, after which he was arrested. No one was injured by the explosion of the bomb, but the house in which the bomb was thrown suffered some damage.

A few weeks ago Mrs. Stacy left her husband in Denver and came to live with her parents here. Her refusal to return to Denver with her husband caused the trouble today. Stacy tried to put the bomb in the bosom of his wife's dress, but the mother-in-law knocked it from his hand and pushed her daughter from the room before it exploded.

PRESIDENT NO TENDERFOOT SAYS GUIDE

JUDICIOUS JOLLY BRINGS
TWENTY DOLLAR REWARD

Roosevelt Back From Hunting Trip Gleelessly Recounts Adventures in Wilderness; Ate Everything but the Bobcat.

[By Morning Journal Special Leased Wire.]
Stamoul, La., Oct. 20.—"We got three bears, six deer, one wild turkey, twelve squirrels, one duck, one possum and one wildcat. We ate them all except the wildcat, and there were times when we almost felt as if we could eat it."

This was President Roosevelt's summing up of the result of his hunt on Bayou Tenaga and Bear Lake. He arrived at 3 o'clock this afternoon at the residence of Leo Shields, where he will be a guest until he makes his departure for Newburg tomorrow. He came in on full gallop and accompanied as he was by about a dozen of his hunting companions, all mounted and attired in hunting garb, the cavalcade presented a tableau as picturesque as it was animated. The president is slightly more bronzed than when he entered the wilderness from this point fifteen days ago, but notwithstanding this fact and the additional circumstances that his clothes bore evidence of contact with the cane and other brush, he was never in better spirits in his life.

"Yes, we got three bears," he added, "all that we saw, and I think that is a pretty good record. I am perfectly satisfied."
"You might add," interjected one of the Metcalf brothers, who has been the president's principal guide throughout the hunt, "that we hunted a country of vast extent, and in which there were but five bears all told, and that of those, as you see, we got three."
Assenting to this amplification of his statement, the president entered upon an enthusiastic account of his hunt, of his life in camp and the meals with which he had been supplied while there.

"Was the possum good?" he was asked.
"Absolutely the best dish we had, except the bear's liver," he responded with relief.
The president, when he said this, stood on the lawn in front of Mr. Shields' home. Around him were gathered Mr. Shields and a number of guests whom he had invited to dine with the president.

The distance was gathered the negro hunters, Holt Collier, Alex. Ennolds, Brutus Jackson and numerous cooks, teamsters and messengers, while the horses stood in the yard, and the dogs lay around licking their lacerated bodies, many of the animals being in bad condition on account of the long chase, and others as a result of contact with wild hogs, wildcats and other wild things. The president was the central figure of the group, and he never appeared so genial, so full of life and so full of spirit as on this occasion. He declared that his health had been perfect, his appetite equally good, and, with the exception of a day or two lost on account of rain, he had been in the saddle every day from daylight till dark. He ended by declaring that he had never in his life had finer sport.

The arrival of the party brought out the fact that a third bear had been killed on Friday, a two-year-old, which was slain by one of the Osborne brothers when it was in a fierce fight with the dogs. The one bear that was obtained by the president was killed on Thursday, and the killing was witnessed by one of the McKenzies and Alex. Ennolds. They agree in saying that the president's bearing was extremely gentlemanlike. The animal had been chased by the dogs for three hours, the president following all the time. When at last they came within hearing distance the president dismounted from his horse, dashed off his coat and tore into the canebreaks, comping to within twenty paces of the bear. The dogs were coming up rapidly with the president's favorite, Rowdy, in the lead, and the brute had stopped to bid defiance to them when the president sent a bullet from his 45-70 rifle after it. But the shot went through the animal's lights and would have been fatal, but with the little life left in it the bear turned upon the dogs. The president concluded to end all and lodged a second bullet between the shoulders which broke the creature's neck.

Other members of the party were not long in coming up, and the president was so rejoiced over his good fortune that he embraced each of his companions. They were equally happy, and in the exuberance of the moment Ennolds went to the extent of telling the president that he (the president) was "no tenderfoot."

The president rewarded him with a \$20 note.

I did not have the fear of alligators that some seem to have."
The president will leave here tomorrow at 10 o'clock, and will spend four hours in the afternoon at Vicksburg. He will arrive at Delta, directly across the river from Vicksburg, at 1 o'clock tomorrow afternoon.

In honor of the president the name of this place was today changed to Roosevelt.

MOORS AMBUSH FRENCH SOLDIERS; TWO SLAIN

Paris, Oct. 20.—A dispatch has been received here from General Druide, commander of the French expeditionary forces in Morocco, saying that the French reconnoitering party was ambushed today while proceeding in the direction of Tiddert. Captain Jandoy and one private of the Chasseurs de Afrique were killed, and six men wounded. General Druide at once went out with a battalion, but when he got to the place the Moors who had made the ambush had disappeared.

TELEGRAPHERS HISS FALLEN PRESIDENT

STORMY SCENES AT
STRIKERS' MEETING

Small's Effort to 'Justify His "Go Back to Work" Proposal Almost Results in Riot; Assessments Increased.

[By Morning Journal Special Leased Wire.]
Chicago, Oct. 20.—S. J. Small, former president of the Commercial Telegraphers' Union of America, was hissed and jeered by 6,000 members of the Chicago local union, before whom he appeared this afternoon in an effort to justify his action in seeking to end the strike. Nearly a third of those present left the hall after the shouting insults at their despised leader. When order had been restored, action was taken increasing the assessments upon leased wire operators from one day's pay per week, as at present, to two days' pay per week, for the benefit of the strike treasury. Four operators were suspended from the union for non-payment of their assessments.

Vice President W. W. Beattie, of Washington, was named as the choice of the Chicago local for successor to Small.

LONE HIGHWAYMAN BOBS UP IN UTAH

Male Passengers Robbed by Gallant Bandit Who Scorns to Interfere With Women Wayfarers.

[By Morning Journal Special Leased Wire.]
Salt Lake City, Utah, Oct. 20.—The Murray stage, used for the conveyance of passengers on the line between Bingham Junction and Sandy was brought to a halt by a masked robber early today at Loendahl. The driver and the male passengers in the coach were ordered down from their seats and when the robber faced them with drawn revolver, they readily complied with his demand for money and valuables.

Only \$12 was obtained from the party, it was said today, but the driver, who had a considerable sum of money in his possession, managed to secrete it under the seat of the stage while his passengers were climbing down from their seats. The purse was overlooked by the robber. The women passengers, of whom there were a number were not molested. The bandit escaped under cover of darkness.

RAILROAD OPERATORS' WAGES AGAIN RAISED

Telegraphers of Kansas City Southern Rejoice in Second Increase Since January.

Kansas City, Oct. 20.—The Kansas City Southern Railway company has granted a voluntary increase in salary of seven dollars a month to its telegraph operators. The new salary order became effective October 15. This makes the second increase in salaries on this road since January 1. Officials of the road say that the increase was made because of the general advance of salaries which have been made in other departments of the road this year.

Tokio College Celebrates Anniversary.
Tokio, Oct. 20.—The twenty-fifth anniversary of the founding of Waseda university in Tokio, of which Count Okuma is the founder and president, was celebrated this afternoon.

Hurricane Sweeps Norway.
Trondhjem, Norway, Oct. 20.—A violent hurricane has been raging over the province of Singmark since last Thursday. Many fishing boats are missing, and up to the present time seven lives have been lost.

FINDS ALL NEW YORK BANKS SOLVENT

REASSURING REPORT OF
CLEARING HOUSE PEOPLE

Heinze, Morse and Thomas Interests Eliminated, Committee Will Extend Necessary Help to Shaky Institutions.

[By Morning Journal Special Leased Wire.]
New York, Oct. 20.—At a late hour tonight the Associated Press was assured by the clearing house committee that the Heinze, Morse and Thomas interests had been eliminated from the banking organizations of New York City, and in the light of this fact the clearing house association announced its readiness to lend all necessary aid to any of the banks which have been under suspicion, the clearing house investigation having established their solvency.

It is believed that this action will prevent any crisis in New York banking circles.
William H. Havemeyer, one of its directors, was today elected to the presidency of the National Bank of America, succeeding Alfred H. Curtis, resigned.

It is understood that the Mercantile National bank will undergo a process of slow liquidation.

At a special meeting of the board of directors of the Mercantile National bank, this afternoon, Seth M. Milliken was elected president of the bank to succeed F. Augustus Heinze, resigned.

William Skinner and Gerish H. Milliken were elected additional vice presidents. Gerish Milliken being added to the board of directors.

The clearing house committee met with the directors of the bank and the two boards were in session for about four hours. Later William H. Sherer, manager of the clearing house association, on behalf of the association, gave out the following statement:

"A committee of the council has examined several banks of the association that have been under criticism and find them solvent. The clearing house committee has decided to render them such assistance to meet their deposits as the committee may think necessary."

Neither the members of the board of the Mercantile National, nor the clearing house committee would add to these announcements. The statement of Mr. Sherer is, however, taken to mean that the clearing house committee is perfectly satisfied with the reorganization of the Mercantile National bank and will see that the bank is enabled to meet any crisis that the widely publicized story about its condition, following the collapse of the Heinze corner in United Copper may force it to face.

After the meeting of the Mercantile National directors, E. R. Thomas, one of the directors, announced that he had disposed of all his holdings in the Hamilton bank to a syndicate composed of men interested in the bank. The action had been expected.

Mr. Milliken, who heads the new lists of officers of the Mercantile National, is one of the best known of New York's capitalists. He had been for some time a member of the board of directors of the bank. He is a rich man and a member of the firm of Deering, Milliken & Co. He is an officer or director in a score of other woolen companies and southern cotton companies. He is well known in business circles and is said to be the choice of the clearing house committee to the position to which he was elected today.

William Skinner, who was elected vice president of the bank, is president of William Skinner Manufacturing company and is a director in a large number of railroad companies, including the New York, New Haven and Hartford.

Gerish H. Milliken is a son of Seth M. Milliken.
While none of those connected with the Mercantile National as the clearing house would discuss any phase of the matter today, it is known that it is the belief of the clearing house committee that the election of Mr. Milliken as head of the bank will relieve the uneasiness in the financial district and the action was taken today that it might have a quieting effect on the market on the opening of the stock exchange.

Charles W. Morse today announced his resignation from the directorate of every local bank with which he was connected. He gave out the following formal statement:

"Owing to my connection with the affairs of the Mercantile National bank and the seemingly disturbed condition of the public mind, I have determined, without the slightest suggestion or solicitation on the part of anyone, that my resignation from the various boards of directors of the other banks with which I am associated might be for the best interests of the depositors, stockholders and others interested in those banks. Accordingly, I have this day tendered my resignation in all the banks in which I have been serving as director."

Alleged Blackmailer Released.
New York, Oct. 20.—Hugo Voelck, arrested last night on the complaint of Raymond Hitchcock, the actor, on a charge of blackmailing, was arraigned today and held in \$10,000 bail. Frank O. Tornberg, arrested with Voelck, was discharged, there being nothing to show that he had anything to do with the blackmailing.

COLD STORAGE PLANT TO BE BUILT AT ONCE

Putney Cold Storage and Ice Company Behind Big Business Enterprise Now Well Under Way.

WILL SUPPLY ENTIRE SOUTHWESTERN MARKET

Eighty Thousand Cubic Feet of Cold Storage Space in Plant Which Will be in Operation by April 1st.

Nothing better illustrates the advance of Albuquerque as a commercial center than the announcement of the immediate construction here of a great cold storage plant, the first of its kind to be built in the territory and one of the largest establishments of the class in the west. The Putney Cold Storage and Ice company, incorporated last week with a capital stock of \$40,000, proposes to begin at once the construction of such a plant in Albuquerque, to supply not only the local market, but the entire southwest with cold storage products. The company has purchased its site and constructed for its buildings. Quietly and without making any noise about its plans, it has arranged to supply one of the greatest needs of this market, and to supply it completely. The Putney Cold Storage and Ice company is incorporated by Robert E. Putney, head of the Putney wholesale grocery house, of this city; John R. Price, for twenty-two years secretary and treasurer and manager of the Cleveland Storage company, of Cleveland, Ohio, one of the largest cold storage establishments in the lake states, and Neil B. Field, of Albuquerque. Mr. Price becomes president and manager of the company and will have full charge of its construction and operation. Mr. Putney is secretary and treasurer. The corporation is a close one and is controlled entirely by Mr. Putney and Mr. Price.

The company has purchased four lots on North First street, next to the warehouse of the Lemp freezing company. The property fronts on the east on the Santa Fe tracks, giving ideal warehouse location, and on the west on First street. The company will build at once a complete cold storage plant, and an ice plant in connection, the latter not only supplying the cold storage rooms, but being designated to supply the local trade as well.

STORAGE PLANT WILL BE BUILT AT ONCE

"It is our plan," said Mr. Price yesterday, "to build here an absolutely modern and up-to-date cold storage plant that will supply all the needs of the southwestern market. Our plant will be a large one, the building as planned allowing 80,000 cubic feet of cold storage space. This is equal to about fifty carloads of ordinary cold storage products, such as butter and eggs. This space will be divided into sixteen storage rooms, each one of which will be supplied with a different temperature, the plant being arranged so that the temperature of any one of the sixteen rooms can be graded from zero to 28 degrees, depending on the needs of the commodity to be cared for.

"The plant will be as complete as money and modern methods can supply. The coils through which the cooling brine from the ice plant passes will not come in contact with the storage rooms at all, but will be in a separate room. From this room cold air, chilled to the temperature desired, will be carried direct to the storage rooms by means of fans, or what is called forced air circulation, the most modern system of refrigeration."

"It is our purpose to deal as merchants in eggs, butter, cheese, California and northern fruits, which we will buy direct from the producers and sell to the retail trade. We are going not only into the local market with this produce, but into the southwestern market. This market has never been covered in this way before. I am informed that it is almost impossible to secure a desirable orange in the local market now. With proper cold storage facilities there is no reason why this market should not be supplied at all times with this fruit in its most desirable form. There is vast difference between cold storage products taken from storage direct to the consumer and products which come out of cold storage, stand a long shipment and are then sent into temporary storage again. Products handled so are bound to deteriorate, and this market has never known what direct cold storage service means. It will insure here not only better, fresher goods for the consumers, but it will enable the local market to keep in hand a supply of fresh products at all times.

"In addition to dealing direct in cold storage products, a portion of our plant will be devoted to public warehouse purposes for the storage of fresh meat and all other goods which have cold storage as a basis. "In addition to our cold storage business, our ice plant will be of large capacity, and modern in every way. It is our intention to serve the local ice market and to ship as well. We will begin construction just as soon as we can get the material, and it is

hoped to have the full plant in operation by the first of April or sooner. "Mr. Price is an expert in cold storage and ice manufacture. His connection for almost a quarter of a century with the big Cleveland concern, which he left to come to Albuquerque, is sufficient evidence of his knowledge of the business, and during his comparatively short stay here he has acquired a thorough mastery of conditions in the local and southwestern business field, having spent some time in familiarizing himself with the market and market conditions.

Mr. Putney is too well known through his long and highly successful business career in Albuquerque to need any introduction, and the big enterprise is certain of immediate success under such competent direction. The project is a large one and means a very great deal to Albuquerque, supplying as it will a long felt want and indicating the rapidly increasing importance of Albuquerque as a commercial center and distributing point.

COPPER BULLS BLAMED FOR SLUMP

ATTEMPT TO CORNER RED METAL FLAT FAILURE

Wall Street Hopes For Better Things Since Real Cause of Recent Flurry Has Been Located.

(By Morning Journal Special Leased Wire.) New York, Oct. 20.—The principal source of the serious disturbance of the stock market last week was traced finally to the copper world, but before the conditions had become sufficiently well defined the financial district was kept nervous by all kinds of rumors of the nature of the trouble that was threatening. The result was seen in the range of quotations published, which presented the lowest for several years in a considerable list of important stocks. Foreign money centers were kept well supplied with all the alarming rumors current and originated others on their own account, sending securities for sale in this market meanwhile, and restricting credits to New York in many ways. Under these circumstances something like relief was felt when the circumstances became known regarding the market position of the United Copper stocks and the futile attempt to corner the stock and to administer discipline to the bear party which had been interfering with the liquidation of the stock. The reduction in the dividend on Amalgamated Copper for the quarter from two per cent to one per cent naturally aggravated the bad effect of the metal kept open the real cause of the disturbance. The reduction in the price of the metal failed to bring about the desired result, and the possible limit of the drop remained undisturbed. Reports were in circulation of intended entire shutting down of production in the Montana mines. Fears of coming business contraction that might run into depression were stimulated by the course of the copper trade and had some incentive also in the advice from the iron and steel trade. Notwithstanding the sustained present activity in the trade, there is a feeling that the falling off in orders for future purchases contraction on an important scale. The railroad and steel trade authorities are reported to be still at variance over the pattern of the steel rail, with orders held up in consequence. There is some apprehension that the insistence of the railroad authorities on their contention may veil a disposition to defer expenditures for rails from motives of economy.

The money market continues tight, and the growth forward ease in the call loan market was checked by the disturbance in the stock market. There was evidence of forced liquidation in many points here, and this was attributed to growing strictness on the part of the banks as to collateral and the throwing out of some securities held as collateral for loans. Foreign selling of securities here and some maturing indebtedness by foreign lenders for which renewals were refused kept the foreign exchange rate up and kept alive the discussion of possible gold exports. Bankers do not look for an outflow of gold, while money rates are sustained as they are now and while the interior demand keeps up. The question of treasury relief for the money market is complicated by the high rate for foreign exchange which carries the intimation that any marked increase in the market supplies of money might incite gold exports. The September foreign trade statement carried some reassurance as to the existing situation. The decrease of \$2,145,653 in the value of exports compared with last year was regarded as moderate as was the \$3,699,475 in the volume of imports, as compared with an average for recent months running to \$20,000,000 above corresponding months of last year. The volume of exports of \$21,623,595 for September, although \$8,452,126 below September of last year, compared with a balance payable to us in August of less than \$2,000,000; a showing which aroused discussion of a possible actual excess of imports for September. In the prospect there is considered to be an assured foreign demand for our grain surplus and the high prices prevailing and the cotton which is held from the market is expected to go out in large volume. New York's control of international exchange is expected, in that way, to increase, with the effect of easing the money market, although the declining tendency in value of imports which has set in may be accepted as another index of contracting demand for commodities.

CASSIE'S COIN DECLARED A MYTH

PITTSBURG BANK DENIES STORY OF BIG DEPOSIT

Confession of Swindler's Aged Victim Is to Remain Government Secret to Protect Innocent People.

(By Morning Journal Special Leased Wire.) Cleveland, Ohio, Oct. 20.—The confession of Banker Beckwith, of Oberlin, which first laid bare to federal officials the huge financial transactions of Mrs. Cassie Chadwick, will remain a secret of the government. United States Marshal Frank M. Chandler, to whom the confession of the Oberlin banker, now dead, was made, returned from Washington today, where he laid before the department of justice the question of whether the Beckwith stenographic statement should be given out for publication. Mr. Chandler says that the creditors of Mrs. Chadwick have unhesitatingly agreed to make it public, but that he has never done so, for the reason that it would injure innocent persons. The department of justice, Mr. Chandler said, informed him that the matter was wholly optional with him. He has decided that he will continue to suppress it for the reason that the charges contained in it against many persons, while they were believed by Beckwith to be true, were false.

"Beckwith accepted Mrs. Chadwick's stories about people," said Mr. Chandler, "just as he did about her money, and he was badly fooled. It would not be right, however, to have these people's names hawked about and those stories go out, seriously reflecting upon them, when every one of the charges has since been refuted by the conclusive evidence."

Nathan Loesser, receiver in bankruptcy for the Chadwick estate, when informed tonight that the Pittsburgh bank officials denied that Mrs. Chadwick had any account with the Second National bank of that city, replied that he expects all the pass books with other banks will also prove worthless. Mr. Loesser also coincided with the statement of Marshal Chandler that there are no assets in sight belonging to the estate.

EMPEROR ENDURES BAD NIGHT

Francis Joseph Insists on Receiving Government Officials Despite Warning of Doctors.

(By Morning Journal Special Leased Wire.) Vienna, Oct. 20.—Emperor Francis Joseph passed a rather unsatisfactory night. He was disturbed frequently by fits of coughing, which were followed by nervousness and restlessness. This morning the patient arose at his usual hour, but he was not able to attend the religious services that had been arranged for today, and consequently the mass was not said.

In spite of the doctors' advice, the emperor today insisted upon receiving the heads of his civil and military cabinets. General Hofhaus, his aide-de-camp, stayed with him for an hour. At the end of this interview his majesty was somewhat fatigued.

The doctors found this morning that the emperor was slightly better, but the patient still had fits of dry coughing. Considerable care is necessary in COMMON SENSE.

Leads most intelligent people to use only medicines of known composition. Therefore it is that Dr. Pierce's medicines, the maker of which print every ingredient entering into them upon the bottle wrappers and attest their correctness under oath, are daily given in favor. The composition of Dr. Pierce's medicines is open to every body. Mr. Pierce being desirous of having his medicines subjected to investigation, he turned fully upon his formula, being confident that the better the composition of these medicines is known the more will their great curative merits be recognized. Being wholly made of the active medicinal principles extracted from native forest roots, by exact processes original with Dr. Pierce, and without the use of a drop of alcohol, triplicate and chemically pure glycerine being used instead in extracting and preserving the curative virtues residing in the roots employed, these medicines are entirely free from the objection of doing harm by creating an appetite for either alcoholic beverages or habit-forming drugs. Examine the formula on your bottle wrappers—the same as sworn to by Dr. Pierce, and you will find that his "Golden Medical Discovery," the great blood-purifier, stomach tonic and bowel regulator—the medicine which, while not recommended to cure consumption in its advanced stages (no medicine will do that), yet does cure all those catarrhal conditions of head and throat, weak stomach, torpid liver and bronchial troubles, weak lungs and hang-over coughs, which, if neglected or badly treated lead up to and finally terminate in consumption.

conserving the strength of the emperor. Archduke Franz Ferdinand, heir to the throne, visited the emperer today and remained for an hour. He inquired regarding the emperor's condition, but did not see him.

DAN O'LEARY FINISHES THOUSAND MILE WALK

Cincinnati, Oct. 20.—Dan O'Leary, the world famous long distance walker, finished his 1,000 mile walk at Newport in this city at 7 o'clock this morning. He has walked one mile during each hour for 1,000 consecutive hours, and although he is nearly sixty-five years old, he is at no time during this test of his strength has shown any signs of faltering. This is one of the most remarkable walking tests ever witnessed in America, and all the medical world has been intensely interested as to the outcome. It is said that the International Tuberculosis association persuaded O'Leary to attempt the walk, and that he is to receive \$5,000 for accomplishing the feat.

WOUNDED THIEF, TAKEN; RESTORES STOLEN GOLD

Confession of Mexican Captive Leads to Wholesale Arrest of Confederates.

Mexico City, Oct. 20.—Special dispatches to this city report that the leader of the gang which last week stole \$15,000 worth of bullion from the precipitating room of the Guanajuato Consolidated Mining and Milling company, has been captured after being wounded three times. With him was taken all the stolen bullion. In his confession he implicated forty persons, who have been arrested.

AUTO CRASH BRINGS DEATH TO TIMID MAN

Alarmed at High Speed Victim Grabs Controller Sending Flying Car Into Trolley Pole.

Pontiac, Mich., Oct. 20.—In an automobile accident here early today Harry Wood, aged 40, was killed, and Karl E. Smith, an automobile tester for a local factory, had his right arm broken. Smith was driving home when Wood and three other men asked for a ride. Smith took the men into his machine. While running about forty miles an hour the automobile began skidding and Wood, unaccustomed to riding in a machine, became frightened and grabbed the controller, swerving the machine into the ditch, where it hit a trolley pole. The other three men were uninjured.

NATIONAL COMMITTEE MEETS AT CAPITOL

Preliminary Steps for Republican National Convention to Be Taken November 6.

Washington, Oct. 20.—The republican national committee will meet in this city November 6 and 7 for the purpose of deciding upon the place and time for holding the next republican convention.

Formal announcement to this effect was made tonight by Harry S. New, acting chairman of the republican national committee.

Acting Chairman New, who arrived today, had a conference with Elmer Voyer, secretary of the committee, when the time for holding the meeting of the committee was decided upon. The official call for the meeting will be issued within a day or two.

According to Mr. New, a number of cities have made formal application to secure the next convention, among them being Chicago, Kansas City, St. Louis, Denver, Seattle, Atlantic City and Pittsburgh.

From Milwaukee and St. Paul also have come inquiries as to the prospects for securing the convention, but Mr. New said that at this time he was not committed to any particular city.

"The next convention is going to attract a larger number of people than have heretofore attended," said Mr. New, "and there are four considerations to be taken into account in deciding upon a place for holding the convention. The first is the accessibility of the town. It must possess adequate transportation facilities. Second, it must have ample first class hotel accommodations. Third, it must provide a good hall sufficient in size to accommodate the convention, and, further, it must possess adequate facilities for distribution of news."

ASSOCIATED PRESS NEWS FORECAST FOR THE WEEK

The return of President Roosevelt to Washington; a great gathering of business and professional men at Chicago to take part in the National Civic Federation conference on trusts and combinations; the balloon races at St. Louis; the tour of William J. Bryan through New York state; a continuation of the interstate commerce commission's hearing in the cases of the Union Pacific and Chicago and Alton railroads cases; argument of counsel in the cases of prominent insurance officials indicted as a result of the insurance investigation in New York state; the Illinois Central meeting at Chicago and arguments in the poster proceedings brought against the Standard Oil company by the state of Missouri; are among the events which promise to have a prominent part in the news of the week.

camp at Bear Lake. There he will deliver one of three set speeches which have been arranged as a part of his homeward journey. He will speak at Vicksburg on Monday. On Tuesday the president will speak at the Hermitage, on Wednesday he will speak at Nashville, and from that city he will proceed immediately to Washington.

The conferences on trusts and combinations, which is to meet in Chicago on Tuesday and continue for three days, is expected to be the largest meeting ever held in this country for the purpose of discussing trade combinations.

Mr. Bryan will come to New York as the guest of the New York Progressive Democratic league. His first speech will be in New York City on Monday.

The suit brought by the state of Missouri to oust the Standard Oil company of doing business in that state will come up in the supreme court at Jefferson City next Friday. The case is to be argued on the report of the special commission, which is alleged to have found an illegal combination of the Standard Oil company, the Water-Power Oil company and the Republic Oil company, and the exceptions filed by the companies to the report.

Thousands Have Kidney Trouble and Never Suspect It.

Prevalence of Kidney Disease. Most people do not realize the alarming increase and remarkable prevalence of kidney disease. While kidney disorders are the most common diseases that prevail, they are almost the last recognized by patient and physicians, who content themselves with doctoring the effects, while the original disease undermines the system.

What To Do.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy, fulfills every wish in curing rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. It corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant condition of being compelled to go often during the day, and to get up many times during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists in fifty-cent and one-dollar sizes.

You may have a sample bottle and a book that tells all about it, both sent free, by mail. Address Dr. Kilmer & Co., Binghamton, N. Y. When you write mention this paper and don't make any mistake, but remember the name, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y.

ZIONISTS ATTEND CONVENTION AT LAS VEGAS

VOLIVA AND HIS MEN ARE BUYING MESA LAND

Las Vegas Still Deeply Interested in Freight Rates and Price of Coal; Two Stories of a Wreck.

(Special Correspondence Morning Journal) Las Vegas, Oct. 19.—The Dry Farmers' congress which closed its sessions this evening has been a remarkably successful gathering. Hundreds of local people attended the session and they were reinforced by seventy-five farmers from Iowa, Illinois and Indiana, and Deacon Peters and a number of the followers of Voliva. The most notable address was delivered this evening by Prof. Campbell, Father of Dry Farming. Prof. J. D. Tinsley of the Agricultural college at Mealla Park spoke on the soil and moisture conditions. All the speakers agree that the climate of Las Vegas is almost ideal for dry farming.

Deacon Peters and his companions have purchased 7,000 acres of mesa land and will establish at once the nucleus of their new Zion City. Deacon Peters says that Voliva has not given up the idea of his city near Las Vegas and that just as soon as the followers of the over-seer can dispose of their holdings at Zion City, they will come here. They will establish their own stores, have their own schools, conduct a newspaper and secure all the land they can purchase for farm purposes. He expects two thousand people here within a year and will establish twenty families here this fall.

A San Miguel county farmers' institute was organized this morning with N. S. Belden and Arthur C. Eick, two pioneer farmers as president and secretary. The membership is large. The intention is to hold monthly meetings for the purpose of comparing experiences and making a careful study of a rational method of farming in this region.

Wreck Story Stretched. The local Santa Fe officials do not feel that they have been given a fair deal by the Denver Associated Press manager. Last night the division superintendent's office gave to the local correspondent of the Associated Press an official statement regarding the wreck of No. 4 near La Junta, telegraphed early in the evening. The official statement differs very materially from the published statement sent from Trinidad. It is as follows: The wreck was caused by a broken arch bar on the front engine of the California limited. The second engine, the composite and the dining car left the rails and turned over. The three Pullmans left the rails but did not turn over. Engineer Thomas of Raton was killed. The conductor, cook and barber of the limited were injured. No passengers were injured. The statement alleged by the passengers, which is required by the interstate commerce commission, was taken and every passenger reported under his own signature that he was not injured.

The Associated Press report says the wreck was caused by rotten ties and gives a list of ten passengers injured, including Tommy Burns, the prize fighter. Burns, who is said to have got up much, was one of the first passengers to reach the injured fireman, and then rushed back to the dining car and asked for olive oil and flour. The dining car man said he couldn't have the articles without paying for them, whereupon Burns fell upon him and beat him to a jelly. Then he helped himself to the stuff and went back to attend the fireman.

Santa Fe and the Coal Rate. The agitation for cheaper coal continues with little abated vigor, but it is extremely doubtful if results will be accomplished unless the recently opened up local mines are able to furnish sufficient coal for the use of the community. It is true that the price of coal is high here and that the Santa Fe charges a high rate for transportation, but the Raton coal companies have instructed their agents that they will be very glad if this city can secure its coal from local mines and make no further demands upon them.

Much has been said about the differentiation made by the Santa Fe company between the prices charged for hauling coal from Raton to Las Vegas and the price of hauling limestone from the Las Vegas Hot Springs to Slink, Col., a considerably longer distance. The limestone men have the better of it by about 35 cents a ton. It would be hard to find anyone here who does not think the Santa Fe might afford to give a lower rate on coal to Las Vegas, but there are not many who think that the rate on the limestone is too low. In the first place, the local owners of the limestone quarries spent days with the freight transportation men of the Santa Fe

BURNT CORK IS FINE THING FOR COMPLEXION

Primrose Tells How He First Got Soot From the Bottom of His Mother's Old Soup Kettle to Black Up With.

"Nearly every visitor who comes into my dressing room," says George H. Primrose, "wants to know how we burn cork black up. Well, I'll explain. Even the toilet secrets of Lilian Russell are public property, and I suppose mine are no longer sacred."

"Burnt cork always has been, and will be, the thing to use. Nothing can take its place. We buy corks from druggists and salarists. It used to be the scheme to hire small boys to pick them up. A small boy will work ten hours a day for a pass to a show. If his mother wants him to go across to the grocery store he sets up frenzied howls of protest. A minstrel pass is the greatest known stimulant to juvenile endeavor."

"There is a Philadelphia man who puts up burnt cork in packages. But most of the boys like to fix it themselves. The first time I blocked up with cork from the bottom of mother's soup kettle, I mixed it with grease, and couldn't get clean for four weeks. But burnt cork comes off readily. All you have to do is to ap-

ply plenty of soap and scrub vigorously over a bucket of water. "I can wash up" after the show quicker than the laboring man when he goes home to supper from the iron works or gas house.

"A trace of burnt cork inside the ear is a song and dance man's professional card. It will be recognized at any box office where they are not turnin' 'em away. "Does burnt cork injure the complexion? Goodness no; look at mine. Nothing like it to keep the skin clear, soft and ruddy."

The ever-droll Primrose will be seen here at the Elks' theater next Friday and Saturday, October 25 and 26.

Indictments or No Bills Expected From United States Jurors Today, After a Week of Testimony.

(Special Correspondence Morning Journal) Santa Fe, Oct. 20.—Since the United States grand jury adjourned yesterday afternoon until Monday afternoon there seems to be a growing impression that the jury will return some indictments tomorrow afternoon when it assembles. That there has been a mass of testimony taken goes without saying for the grand jury was in session from Monday noon until yesterday at 2 o'clock and the assistants to the attorney general lost no time in getting evidence before the jury. Much of the evidence which was submitted is believed to have been in the nature of affidavits, but there were a number of witnesses who gave oral testimony which was reduced to writing, so that the members of the grand jury have before them evidence which they can examine at their leisure.

There appear to be a number of persons interested in the work of the grand jury, and the suspense is doubtless trying on their nerves. There are some who profess to know what is going on in the grand jury room, but so far, it does not appear that there has been any definite information gone out from the jury. There are too many government employees to make it very safe to attempt to get information from the members of the grand jury, besides, Judge McElie intimates that any person who attempts to pry into the proceedings of the grand jury last Monday morning that he would make it unpleasant for any member of the grand jury who so far forgot himself as to communicate to any one outside the jury room what was going on there and it is to be presumed that the members of the jury have not forgotten what he said to them.

Should the government employees fail to secure a number of indictments before the adjournment of this grand jury, the failure will undoubtedly be taken to mean that the land frauds in this territory have not been so flagrant nor so glaring as they have been supposed to be, but on the other hand, should a number of indictments be secured it will tend to confirm the reports which have been so widely circulated during the past year or more concerning frauds in this part of the country. It is not to be supposed that all of the cases will be presented to this grand jury for the representative of the government have not had the time to prepare evidence in all of the cases having been engaged for a considerable portion of the time since they have been here in the preparation of civil cases, a number of which have been brought in the different districts of the territory. Many of the cases will not be ready for presentation to a grand jury before the next March term of the United States court for this district, at which term it is believed that most of the cases not reached now will be presented.

NERVES IN SANTA FE ARE BADLY STRAINED

ANXIOUS PERSONS WAIT ON GRAND JURY REPORT

Indictments or No Bills Expected From United States Jurors Today, After a Week of Testimony.

(Special Correspondence Morning Journal) Santa Fe, Oct. 20.—Since the United States grand jury adjourned yesterday afternoon until Monday afternoon there seems to be a growing impression that the jury will return some indictments tomorrow afternoon when it assembles. That there has been a mass of testimony taken goes without saying for the grand jury was in session from Monday noon until yesterday at 2 o'clock and the assistants to the attorney general lost no time in getting evidence before the jury. Should the government employees fail to secure a number of indictments before the adjournment of this grand jury, the failure will undoubtedly be taken to mean that the land frauds in this territory have not been so flagrant nor so glaring as they have been supposed to be, but on the other hand, should a number of indictments be secured it will tend to confirm the reports which have been so widely circulated during the past year or more concerning frauds in this part of the country. It is not to be supposed that all of the cases will be presented to this grand jury for the representative of the government have not had the time to prepare evidence in all of the cases having been engaged for a considerable portion of the time since they have been here in the preparation of civil cases, a number of which have been brought in the different districts of the territory. Many of the cases will not be ready for presentation to a grand jury before the next March term of the United States court for this district, at which term it is believed that most of the cases not reached now will be presented.

French Bakery
202 East Central

Calling the Roll
for breakfast every morning is a favorite task for the children. There is nothing else that will cheer the little ones up so soon. If we supply you with your breadstuffs you will never have cause for complaint, but rather for congratulation. Our French, who is a graduate of the well known Hart Institute of Philadelphia, is about to establish an up-to-date kindergarten in Albuquerque. A number of pupils have already been secured. Parents wishing to enroll children in this school telephone Mrs. A. B. McFarley, phone 553.

ROSWELL TRAIN TO BE AS GOOD AS THE BEST

General Manager Hurley Says
Daily Service From Here to
Pecos Valley Will Be Right
Up to Date.

DENIES KNOWLEDGE OF KENDRICK RESIGNATION

Santa Fe Traffic Department is
in Better Shape Than for
Months—Every Piece of Roll-
ing Stock is Kept Busy.

"The daily passenger train over the cut-off from Albuquerque to Roswell will be one of the best operated out of this city," said General Manager James E. Hurley, of the Santa Fe system last night. Mr. Hurley arrived last night from Las Vegas, where he has been for several days inspecting terminals, accompanied by General Superintendent H. W. Sharpe, of the western grand division, and Chief Engineer C. A. Morse.

The general manager said further that the new train would be put on as soon as the water and coal stations along the Belen cut-off are completed, probably about January 1.

"The Santa Fe traffic department is in better shape today than for a long time," said Mr. Hurley, in speaking of conditions generally over the system. "We are having all the business, of course, that we can handle and at present every engine, passenger coach and box car on the system is being used to its capacity. Just now our biggest contract is the transportation of the large volume of grain being shipped to the mills at Galveston."

HAS NO KNOWLEDGE OF KENDRICK'S RESIGNATION

Mr. Hurley denied any knowledge of the information that Vice President Kendrick was to leave the Santa Fe, or that his indefinite leave of absence was in reality a resignation. He said that so far as he knew Mr. Kendrick did not contemplate leaving the Atchison.

CHANGES WILL GO INTO EFFECT OCTOBER 25TH

According to Mr. Hurley, the changes in the Santa Fe official directory recently announced, which resulted from the resignation of Superintendent F. J. Easley to join the Rock Island staff, will go into effect October 25. Mr. Hurley intimated that more promotions will occur soon.

The changes made are as follows:

W. K. Etter, superintendent, from Rio Grande to Oklahoma division; headquarters at Arkansas City, Kas.

Frank L. Myers, promoted superintendent of Rio Grande division from trainmaster Panhandle division, Wellington, Kas.

Payson Ripley, trainmaster, from Rio Grande to Panhandle division; headquarters at Wellington, Kas.

D. E. Orr, general roadmaster, to trainmaster of Rio Grande division; headquarters at San Marcial.

H. A. Tice, superintendent, from Oklahoma to Western division, with headquarters at Dodge City, Kas.

G. E. Ayers, superintendent, from western division to middle division, with headquarters at Newton, Kas.

General Manager Hurley, accompanied by Chief Engineer Morse, and Superintendents Sharpe, Etter and Myers, goes to Isleta this morning, where he will meet Second Vice President J. W. Kendrick, who is en route east from California. The entire party will proceed to Belen, without coming back to Albuquerque, and from there the "brass collars" will separate.

Vice President Kendrick and Mr. Hurley and Mr. Morse will make an inspection tour of the Belen cut-off and the Pecos valley division, continuing north to Newton over the new route, which the Santa Fe trains will use when running from California east over the cut-off.

General Superintendent H. W. Sharpe, of the western grand division, with Superintendent W. K. Etter, will proceed today to "break in" Superintendent Frank L. Myers on the several hundred miles of track comprising the "Horny Toad" division.

Trouble on the "Horny Toad" and coast lines yesterday delayed Nos. 19 and 3, causing both trains to arrive here about noon. No. 8 of last night did not arrive until 9 o'clock, being delayed west of Winslow, while the two sections of No. 1, which were marked on time out of Las Vegas, fell down considerably between the Meadow City and here.

Cord of Thanks.

I wish to extend thanks to my many friends, and especially to the Woodmen, for the numerous kindnesses shown me during the illness and subsequent death of my husband, L. H. Dye.

MRS. L. H. DYE.

QUIET TOUCH MADE AT ALVARADO CHECK ROOM

Yellow Leather Suit Case, Two Overcoats and Leather Grip Are Missing and Police Are at Work.

The police and Santa Fe officials are conducting a still hunt for a yellow leather suit case, a leather satchel of light color, a black cravenette raincoat and a tan cravenette raincoat, which disappeared some time Saturday evening from the check room at the Alvarado hotel. The grip, suit case and coats were the property of a guest at the hotel, and were deposited in the check room in the usual way. Up to last night no trace of the missing articles had been discovered.

AUTOS ON TIME IN SPITE OF BAD ROAD

Inclement Weather and Chunks
Make No Difference in
Running Time of Estancia-
Albuquerque Machines.

That the big automobiles of the Estancia-Albuquerque line can run on schedule time in spite of bad weather and worse roads was proven Saturday and Sunday. Car No. 3 being out of commission for slight repairs, Car No. 1, which left here Saturday morning for Estancia, made the return trip immediately, arriving here Saturday night after making the trip each way in five hours or covering 150 straight miles in ten hours, with many stops.

On the outgoing trip from Tijeras to Estancia the car encountered mud-holes and swollen creeks without number, but flew through the "dobe" like an amphibian, reaching Estancia at 1:30 o'clock. It left at 3 for the return trip and got here at 9 p. m. Chauffeur Bacon, in charge of the car, said it was about the roughest going he ever struck, but he did not fall behind the schedule. Driver J. G. Clock brought car No. 2 in Sunday afternoon about 2 o'clock, being five hours and fifteen minutes on the road on account of slipping tires and the terrible condition of the roads, following the rains.

"Since the schedule has been established," said F. N. McCloskey, of the company, yesterday, "no car has been behind time and every one has carried a full cargo."

Residents along the auto route are signing a petition to have the machines carry the mail from this city to Tijeras, Sedillo, Moriarty, McIntosh, Estancia and Willard.

POSITIVE PROOF.

Should Convince the Greatest Skeptic in Albuquerque.

Because it is the evidence of an Albuquerque citizen.

Testimony easily investigated.

The strongest endorsement of merit.

The best proof. Read it:

J. M. Parker, living at 314 S. Fourth street, Albuquerque, N. M., says:

"Doan's Kidney Pills are entitled to the strongest praise I can give them. I never placed much faith in patent medicines, but I can say I have derived more good from Doan's Kidney Pills than I supposed it would be possible for me to get from any kind of medicine or treatment. Several years ago my condition reached the state where I was an almost constant sufferer from pain in my back and trouble of an alarming nature, existed with the kidney secretions. On one occasion the kidney secretions stopped altogether and I had to have a physician draw it from me. At that time I was employed as a locomotive engineer and had to give up this work as the fear of the engine made the pain in my back beyond endurance. I suffered from pain across my loins and in both sides over my hips so that I would have to sit down in a chair and lean my back against something to support it. At night after I would retire I would not sleep any more than an hour before the pain would wake me and then I would have to sit up in bed and bend over in order to get relief. The kidney secretions were very profuse and which added to my misery was a burning scalding sensation which accompanied the secretions. About three months ago I learned of Doan's Kidney Pills and procured a supply. In a short time every difficulty was corrected and I have no trouble at all with my back and kidneys now. I am as well and strong as ever and am certain that I could take up the work that I had to give up and could do it without any trouble. On occasions without number I have recommended Doan's Kidney Pills and whatever I can say for them will always afford me pleasure."

For sale by all dealers. Price 50 cents. Foster-McBarn Co., Buffalo, N. Y., sole agents for the United States.

Remember the name—Doan's—and take no other.

Burdette is coming. The Prince of Pathos. Burdette the wizard who jingles among the bells of his cap the key to every human heart. Hear him at the Opera House Tuesday evening.

FAIR SUBSCRIBERS SHOULD PAY UP AT ONCE

With All Subscriptions in Association Will Probably Come Out of Twenty-seventh Fair on Top.

The officers of the twenty-seventh annual fair after a week of hard work have brought all fair accounts into shape so that the final report can be made within the next few days. The association finds the situation decidedly more satisfactory than was expected at the first of last week, when it was given out unofficially that a small shortage might be expected. As a result of the examination of the accounts it seems probable that the association will break even this year, provided all subscriptions are paid up. Those who have subscribed to the fair and who have not paid their subscriptions are urged to do so at once, in order that all accounts can be closed up and the final statement made. With all subscriptions in the accounts will balance neatly, and there should be no delay in payment. It is gratifying to know that almost all subscriptions have been paid, only the straggling few remaining to be collected. Subscriptions may be paid to the First National bank, to Manager J. A. Hubbs or to Secretary Roy A. Stamm.

ALBUQUERQUE - NEW MEXICO

NOT A SQUARE DEAL.

Our neighbor, the Roswell Record, presents in a recent issue a lengthy article on the pending statehood question, from which we copy below quite liberally, giving all the essential portions. After declaring itself in favor of the measure, the Record says:

A year ago the president said, in acts if not in words, that New Mexico alone was not fit for statehood, and that if we had it at all within a generation we must marry Arizona to get it. Senator Beveridge, the chairman of the senate committee on territories, said the same thing in even more confident language.

The president is reported to have changed his mind and to have promised Governor Curry that he will do all in his power to secure our admission to the union at the next session of congress. If the president was right a year ago in his belief of the unfitness of our people to govern themselves unaided by the people of Arizona, he must be wrong now, or in one short year the people of New Mexico have been politically, socially and educationally born again and regenerated, and fitted to take a seat with the forty-five other states composing the choir of the union. If he is correct now, there must have been a political and social change here within two years to which the history of the world does not find a parallel. But, of course, the president must be right, and it would be next thing to "these unjust" to hint otherwise. Until about two years ago he had never paid much attention to the affairs of New Mexico; but during the last eighteen months, particularly, he has taken a very active hand, and this, no doubt, accounts for our political regeneration in so short a time. The reason that it has often taken a century for other peoples to accomplish what the people of New Mexico seem to have accomplished in less than two years is because they had no Theodore Roosevelt to lead them.

Of course we must now be fit for self-government, or the president would not now favor statehood for New Mexico. Otherwise it would be a danger which we ought not to assume, and it would be a great wrong to the rest of the nation if it goes without saying that he would not favor statehood for any reason of transient party politics, because he never does anything of that sort. (Remember, this article is entirely serious.) Some narrow-minded men are saying that the president favors immediate statehood for us so we will need to Washington two republican senators to offset the two democratic senators to be sent by Oklahoma. That would be unworthy of the president, and therefore can not be true. None but an "undesirable citizen" dare hint such a thing. Statehood, once granted, can never be taken away—it will be permanent as the everlasting hills—but the political complexion of both Oklahoma and New Mexico may change many times in one generation.

Besides this, the president is too good a politician to let on New Mexico being safely republican, even at the beginning of its existence as a state. He must know that the republican majority has been rapidly traveling towards the vanishing point, and is almost sure at the next general election to be changed to democratic. In 1902 the republican majority was about 5,600 for Rodey, who had practically no opposition. In 1904 Andrews, who was not then known, got about 5,400 majority. In 1906, when Mr. Andrews was known, he got a majority of 55 votes. If he, or any other candidate dictated by the Plunderbund, should run now against any good independent candidate, he would be beaten by 5,000 or more. The chances are that the next legislature of New Mexico, be it territorial or state, will have a large majority made up of democrats and of independent republicans who have kicked out of the machine traces. The president must certainly know these facts, and it can not be that he favors the permanent condition of statehood for the

uncertain chance of getting two republican senators. *

It may arouse the suspicions of some people here at home to know that what is known as the republican gang in New Mexico are red-hot for statehood, to a man. It goes without saying that this would not be the case if they did not feel sure of controlling the new state. But we believe that from the very outset they could not control the new state. We believe they do not now represent twenty-five per cent of the voters. This gang of grafters and reputation assassins have ruined their own party, but this they can not themselves see, and they have misled the president into believing that they represent the sentiment of the majority in New Mexico. Never was there a greater mistake. All the people want is a good square opportunity to clean out the gang, and statehood will give that chance.

Now, if our Roswell neighbor is really in favor of an honest and earnest effort in favor of statehood, why does he treat the subject in the foregoing cynical manner? Such a handling of the case under the guise of friendship is not dealing squarely with the cause, with the president of the United States, with the honest friends of the measure in New Mexico, or with the public good. Admitting that Mr. Roosevelt was mistaken in his attitude toward the territory a year ago, does that warrant us in turning the cold shoulder to him in his efforts on our behalf at this time? On the contrary, if he has seen his mistake in this matter it is to his credit that he is willing to correct it. If the members of the "old gang" are enthusiastically in favor of the measure, why should we attempt to discourage their efforts as long as we know, according to the Record, that they will never be able to control the new state? We agree with the Record that statehood will seal their doom, and for that reason we welcome them to the statehood ranks, and encourage them to render the cause all the assistance they can. Give us statehood first, and we will fight out all the minor issues afterwards.

First give us full-fledged American citizenship, and then if we can't achieve and maintain the rights and privileges that pertain to American citizenship, the fault will be our own. But the main point at present is to show congress that the people of the territory, without regard to party or faction, are a unit in favor of statehood for New Mexico. With that accomplished, we believe we stand a first rate chance to get in, because fair-minded men in congress will regard admission as our due, on account of reasons with which every one is familiar, and politicians in congress will favor our admission because they believe the delegation from the new state will strengthen the dominant party—provided such articles as the one we have quoted from do not serve to dissipate that impression.

THE FLOOD OF IMMIGRATION.

The monthly statement of the commissioner general of immigration, given to the public last week, shows that in September 98,894 immigrants were admitted to the United States, an increase of 25 per cent over the admissions for September, 1905, and 3 per cent over the admissions for September, 1906. In the month 870 persons were deported, a decrease of 182 from the number deported in September, 1906.

Immigration for the six months ended September 30 aggregated 579,527 persons, an increase of 14 per cent over the corresponding period last year. In the same period 9,236 persons, or 2,646 less than in the corresponding six months of 1906, were deported.

From Russia 17,296 persons were admitted in the month and 149,682 for the six months period. This was a decrease of 24 per cent for the month and 5 per cent for the six months, the comparison being with the similar periods of last year.

"X-RAYS" AND ELECTRICITY.

Among all the long-sought cures that have enlisted the painstaking and persistent search of medical men and scientists the cure of cancer has especially appealed to the present generation. The discovery of radium, with all its unknown possibilities, has stimulated to experiments in the direction of cancer-cure that must rank with the most ingenious ever made.

Last week, at the congress of French surgeons held in Paris, the principal interest is said to have centered on the discussion of the effect of "X-rays" on cancer. While it was agreed that no case of complete cure had as yet been recorded, it was also shown that beneficial effects had been obtained by the Roentgen ray treatment of cancer. In summing up the results of the congress Dr. Teinon, chief surgeon of the Bourges Hospital, said: "One thing is certain. No case of cancer has yet been cured by 'X-rays'."

Almost while this discouraging summary of investigation was being announced, says the New York Commercial, there was a demonstration under way at Broca hospital in Paris before several scores of surgeons of the electrical treatment of cancer.

otherwise known as "fulguration." This was conducted by an Irish surgeon named Hart, the patient being the victim of an advanced internal cancerous growth. For a half hour the patient was submitted to high-frequency sparks created by a current of from sixty to two hundred thousand volts. On examination by the surgeons present the patient was pronounced completely cured.

Allowing for any reasonable modifications of the surgeons' encouraging verdict in this case, there can be no doubt that in electricity has been found a powerful curative agent. The forthcoming experiments along the lines marked out by Dr. Hart will be watched with interest, especially in our own country, where the interest in cancer-cure is especially keen. It is only recently that we noted the endorsement of a chair of special research, in this line in one of our university medical schools, while wealthy individuals in other parts of the world have been moved to give generously for the encouragement of the search for a cancer cure.

A CHICAGO exchange tells about a man in that city who has attempted to commit suicide six times within a year. A bad habit like that will be the death of him some day.

IN THE PRESENT depressed state of the Almanac's fortunes, the tender of a five dollar bill would likely put an end to published slurs on the Water and Light company.

ONE HUNDRED thousand men watched Stoppel Jack climb a flagstaff in New York. More than that have watched Apple Jack in some of his justly celebrated stunts.

A NEW YORK man has applied for a divorce because his wife persists in wearing a décolleté dress. No doubt the court will refuse to consider anything but the bare facts.

THE AMERICANS in the Orient are making a roar because they allege Taft is making the same speeches he did on his last trip. Curious how many people sometimes expect of a man.

THE INDIAN Methodists won't stand for the "Holy Rollers." They might come out here and start a colony with some of the gentlemen who have been "rolling" the taxpayers in the last few years.

MAX IS WAITING for a return to the brilliant educational system exploited by Superintendent Esquivel Vilel and Superintendent Francisco Hubbell. There isn't a bit of a rakoff for the Almanac under the present regime.

"DELEGATE W. H. Andrews is in the national capital and he is allowing no grass to grow under his feet."—The Almanac.

It's a cinch he hasn't been allowing any grass to grow on the White House lawn.

GENTLEMEN who manipulate the elusive pen and the shells at county fairs, must feel like pikers when they consider the shabby manipulations of New York street railroad operators.—Phoenix Republican.

Or the fancy little legends—main thing the Plunderbund have been trying on the dear people in New Mexico.

What the Editors of the Southwest Are Saying

Lost We Found.

Whatever may have become of the flies in the winter time it is true that they are going somewhere.—Dodge International.

Stead's Last Resort.

W. T. Stead is organizing a peace pilgrimage through the Latin-American countries. If all other peaceful means fail he can be relied upon to talk the Central and South American jingoes to death.—Phoenix Republican.

Fancy It in Texas.

In New Mexico 200,000 American citizens are barred from self rule and from participation in the national government. How would we people of Texas feel if our governor were named and canned at the will of the president at Washington?—El Paso Herald.

Throwing the Switch.

Neither Governor Curry nor President Roosevelt need worry themselves about there being any opposition to statehood among the people of the territory. Opposition to the rule of the old gang of grafters and carpetbaggers, however, will continue to grow in spite of administration efforts to sidetrack the issue.—Roswell Record.

The Gay Mr. Leake.

Just to prove that he is not scared or hiding, Frank Leake has sent the Times a copy of the Herald of Corinth, Miss. His name appears at the masthead as "editor and manager."

The Herald is talking up a fair at Corinth, its editor thinking, no doubt, he might be able to capture some of the horses.—El Paso Times.

A Democratic View.

The Record is informed that the sentiment of democrats generally as expressed during the fair at Albuquerque, is to favor the single statehood scheme advocated by Governor Curry. If we fail to get statehood and Andrews is re-nominated for congress then will be time enough for the democrats to show their hand. The sentiment seems to be almost unanimous for the re-nomination of Larrabee as democratic candidate for delegate.—Roswell Record.

The Almanac—Not the Press.

The republican press of the territory continues to give all the credit to Delegate Andrews for pensions received in New Mexico. The truth of the matter is that the granting of pensions is a purely routine matter with which the delegate very seldom has anything to do, and it is a safe guess that if he has knowledge of their issuance, it is by some arrangement by

TRIAL OF WOMAN WHO STABBED RIVAL WITH SCISSORS

Case of Ruby Estes One of the Most Sensational to Come Up at Present Session of Quay County Court.

INFLECTED FIFTEEN WOUNDS ON VICTIM

Grand Jury Will Investigate Killing of Marshal Lawson by Sam Hardwick — Judge Mann Opens Court Today.

Special Correspondence Morning Journal.
Tucuman, N. M., Oct. 20.—The fall term of the district court for Quay county will open in this city tomorrow, with Judge Mann on the bench. The court officials who will be in attendance are Edward R. Wright, Santa Rosa, district attorney; Roy A. Prentice, Alamogordo, stenographer; Charles P. Downs, Alamogordo, clerk; and George Sena, Santa Rosa, interpreter. Court will open with 115 cases on the civil docket and ninety-three on the criminal docket.

The principal criminal case which will come on for trial at this term is the case of the Territory vs. Ruby Estes, for murder. The defendant was, at the time of the alleged crime, an inmate of Marie Moore's resort, and on the night of the killing had been indulging rather freely in intoxicants. She had been absent from the place for a few days, having just returned; and upon being informed that Blanche Hudson, also an inmate of the house, had in her absence been endeavoring to allay the affections of her sweetheart, she became uncontrollably enraged. She went immediately to her room, and procuring a pair of scissors, proceeded to the room of the Hudson woman, forced an entrance, and with the scissors inflicted some twelve or fifteen wounds, three of which were by the physicians pronounced fatal. The Hudson woman lived but a few hours. At the October term, 1906, term of this court the indictment was returned by the grand jury against the Estes woman, charging her with murder, to which indictment she entered the plea of not guilty. For the past seven or eight months she has been living quietly in Tucuman, having secured bond, C. C. Davidson, of Tucuman, is her attorney.

The Lawson Killing.
A case which in all probability will result in the grand jury finding a true bill, is the killing of Marshal Lawson last winter by Sam Hardwick. This killing took place in the Legal Tender saloon, and at the preliminary hearing before Justice Saxon, the defendant, Hardwick, was bound over to await the action of the grand jury. He succeeded in securing a bond and is now here.

Judge Mann has sent notices to all the attorneys whose appearances have been entered in the civil cases that he expects to clear the docket of much of the old matter pending thereon. There are many cases which have been on the docket for several years, and these cases must, or should, at least, in the opinion of the judge, be disposed of in some manner.

SLUMP IN COPPER DOESN'T FEAZE THE COMANCHE

IMPROVEMENTS FOR BIG SILVER CITY SMELTER

Amateur Burglaries Continue to Baffle the Police — Hunting Season on — Sanatorium Does Big Business.

Special Correspondence Morning Journal.
Silver City, N. M., Oct. 19.—Notwithstanding the low price of copper, work goes on steadily at the Comanche works. Bins are being cleaned up and other work being done preparatory to a shut down of a few days for extensive repairs. The old 150-ton furnace which was removed to make room for the present new 300-ton furnace, will be re-installed and extensive improvements will be made in the water system, including a large new radiator and feed water heater and two new pumps to increase the water supply.

Extensive work is being done on their properties at Pinos Altos and new equipment added to the narrow gauge railroad system to facilitate the ore transportation.

Hold-Ups Continue.
The amateur burglaries and hold-ups still continue and as yet have baffled the police. Two young ladies were held up Wednesday evening in opposite parts of the city before eight o'clock. The robber secured nothing in either case.

Hunting Season On.
The hunting season is on now in dead earnest and everyone who can get away is following the game through the mountains. Deer and quail are plentiful and a few turkeys are found.

Telephone Extensions.
The Grant County Telephone company has increased its capital stock from \$25,000 to \$50,000, and 19,000

WEEKLY REVIEW OF WESTERN MINES

Jerome, Ariz.—Mr. Alex. H. Lyons, of Jerome, who has extensive mining interests in the Jerome copper belt, has recently been inspecting the mines of the Copper Creek district. Mr. Lyons in an interview said: "An immense and promising surface showing greets the eye of the miner as soon as he travels over the great porphyry dykes that traverse the district. In the Sunset group the great ledge shows a width of 75 feet on the surface. The Sunset company has lately installed a large hoist, an eight-drill air compressor, and a 135-horse power boiler. The company has its double compartment shaft now down to a depth of 52 feet, and is rushing the work of sinking. It is sunk along one of the walls of the ledge and has good ore showing all the way down." The Sunset group is regarded as among the best of the Consolidated Copper Creek properties.

PREPARATIONS FOR BIG CHICAGO SHOW

Success Attending the New York Business Display Promises Well for the Event in the City by the Lake.

Chicago, Oct. 20.—With the closing of the national business show at Madison Square Garden, New York, comes a completion of the plans for the big Chicago show that opens on the first day of February and closes one week later. The success attending the New York affair has passed all records heretofore established, auguring well for the Chicago event. The addition of the advertising show to be held in connection with the Chicago show at the Coliseum will produce one of the most elaborate and exceptional affairs ever seen in the west. The Chicago Advertising association will have charge of affairs for one night, and it is planned that the show shall be opened by prominent members of the Chicago Association of Commerce. On the first night speeches will be made by leading business men and city officials and appropriate exercises held to mark the beginning of this event. Already the United States government has taken hold of the affair to aid in its ultimate success, and the department of commerce and labor and possibly other departments will be represented with booths and exhibits. The treasury department and the bureau of engraving and printing will also be probably represented, and one of the plans now under way is for the securing of a complete exhibit of the manner which the government coins money, prints and engraves silver and gold certificates and manufactures postage stamps. These will be but a few of the many attractions that will be put on to attract the public.

BUSY WEEK AHEAD FOR DISTRICT COURT

Zenobia Sanchez Will be Tried For Murder of Ranchman McCumber — Slightly Behind the Docket.

The trial of most interest in the district court this week will be that of Zenobia Sanchez, charged with the murder of the aged ranchman, McCumber, in the Santa mountains, two or three years ago. The trial will be a sensational one, both on account of the brutal nature of the crime and the mystery which surrounds its author. The attorneys for Sanchez will put up a strong fight for the prisoner and the prosecution is equally certain that in Sanchez they have the man who committed the murder. The trial of Sanchez was set for today, but as the court is a trifle behind the docket the case will not come up until later.

Other cases which were set for this week when the criminal docket was called are those of Carlos Apodaca, charged with seducing a minor, John Cometto, indicted for selling liquor to Indians; Leopoldo Apodaca, entering a house with intent to commit rape; Mariano Garcia, assault and battery; Thomas R. Meyers, abandonment of wife. It is hardly likely that the criminal business of the term will be closed up until next week.

WEEKLY REVIEW OF WESTERN MINES

Jerome, Ariz.—Mr. Alex. H. Lyons, of Jerome, who has extensive mining interests in the Jerome copper belt, has recently been inspecting the mines of the Copper Creek district. Mr. Lyons in an interview said: "An immense and promising surface showing greets the eye of the miner as soon as he travels over the great porphyry dykes that traverse the district. In the Sunset group the great ledge shows a width of 75 feet on the surface. The Sunset company has lately installed a large hoist, an eight-drill air compressor, and a 135-horse power boiler. The company has its double compartment shaft now down to a depth of 52 feet, and is rushing the work of sinking. It is sunk along one of the walls of the ledge and has good ore showing all the way down." The Sunset group is regarded as among the best of the Consolidated Copper Creek properties.

Mansfield, Ariz.—Developing copper mines in this section are likely to be the most successful of the present uncertain state of the metal markets, according to the most authoritative local opinion. The position of Arizona as a copper producer is regarded as now established on a safe basis. Production costs have been so far reduced as to enable successful operators to do business at a profit on a much narrower margin than a few years ago, and the steady improvement of transportation facilities and treatment methods seems likely to reduce these costs to a still lower figure. In this district there is no let-up in activity. The Mansfield management is showing itself especially energetic. At the Sweet mine the sinking of the shaft to the 550-foot level is in the hands of contractors, while at the same time the ore is being raised from the 250-foot level and laid on the dumps. This ore is of milling grade, with good values in free gold. At the Black Cap mine the ore being taken out is of a good shipping grade, the quality showing improvement daily. Frequent shipments are going forward to the El Paso smelter.

Henry R. Jones of Tampa, Florida, writes "I can thank God for my present health, due to Foley's Kidney Cure. I tried doctors and all kinds of kidney cures, but nothing did me much good until I took Foley's Kidney Cure. Four bottles cured me, and I have no more pain in my back and shoulders. I am 52 years old and suffered long, but thanks to Foley's Kidney Cure I am well and can walk and enjoy myself. It is a pleasure to recommend it to those needing a kidney medicine." J. H. O'Reilly Co.

The Mirth King is coming. Hear Burdette at the Opera house next Tuesday evening. Subject, "Handies."

GO TO BELEN

The Future Railroad Center of New Mexico

LOCATED ON THE BELEN CUT-OFF OF THE ATCHISON, TOPEKA & SANTA FE RAILWAY. THE NEW CITY OF BELEN IS 31 MILES SOUTH OF ALBUQUERQUE, N. M., IS AT THE JUNCTION OF THE MAIN LINES OF THE SANTA FE SYSTEM—LEADING EAST AND WEST FROM GALVESTON AND CHICAGO TO SAN FRANCISCO AND LOS ANGELES, FROM THE NORTHERN STATES TO EL PASO, TEXAS, AND THE REPUBLIC OF MEXICO.

The Belen Town and Improvement Company

(INCORPORATED)

Are the owners of the Belen Townsite, consisting of 1000 Business and Residence Lots, size 25x142 feet, fronting upon 80 and 70-foot streets and avenues, right in the business center of the new city and directly upon the Santa Fe Railway Depot Grounds. The Atchison, Topeka & Santa Fe Railway Company is now grading its extensive depot grounds yard limits 800 feet wide and a mile long (capacity of 70 miles of side track) to accommodate its immense passenger and freight traffic, Harvey eating House, round house, coal chutes, water tanks, machine shops, etc.

THE CITY OF BELEN has a population of 1500, and several large Mercantile Houses, the Belen Patent Roller Mills with its 150 Barrels a day capacity, winery, etc. It is the largest shipping point for flour, wool, wheat, wine, beans, hay and fruit in New Mexico. From its location upon the great trunk line leading north, south, east and west, to all Chicago, Kansas City, Galveston and the Pacific Coast. The water is good and climate unsurpassed. Belen has a \$16,000 public school house, two churches, a commercial club, three hotels, restaurants, etc. It needs right now a good up-to-date newspaper and a good hotel. The lots offered are low in prices and terms easy. One third of purchase money cash; two-thirds may remain on note and mortgage for one year with interest at 8 per cent per annum. Title perfect and warranty deeds given.

Come early if you wish to secure the choice lots. For further particulars and prices of lots call in person or write to

Weather Forecast.
Washington, Oct. 20.—New Mexico: Scattered showers Monday; Tuesday fair and warmer.
Arizona: Fair Monday and Tuesday.

Officer Frank Rossi, who has been sick for some time, is expected out this week.

W. L. Healey, of Belen, was a visitor in the city yesterday, returning home last night.

H. H. Hanson, a well-known raisin grower of Fresno, Cal., was a visitor in the city yesterday.

Lou Holt and Lou Schencker left yesterday morning for Paywood Springs on a week's hunting trip.

J. W. Burke, of Fort Morgan, Colo., representing the Armour Packing company there, is visiting friends in the city.

Isaac Holloway, a rancher living at Becker's Wells, near Belen, N. M., spent yesterday in Albuquerque visiting friends.

Miss Vera Graham left yesterday on the California limited for Los Angeles, where she expects to spend the winter months.

W. B. Liscomb, of Decatur, Ill., a manufacturer of mining tools, spent yesterday in the city. He left last night for Gallup.

W. C. Delster, with the Wells, Fargo Express company in Los Angeles, is a visitor in the city, having arrived here Saturday night.

B. Preston, a prominent sheep buyer of Kirksville, Ill., is in the city for the purpose of purchasing sheep for various Illinois farms.

Edward Clark, an engineer on the second district of the Albuquerque division, spent yesterday in the city, returning to Winslow last night.

A number of drunks will be arraigned before Police Judge Craig today, as a result of the Saturday and Sunday nights' clean up by the police.

Professor George S. Ramsey, traveling representative of the Morning Journal, returned last night from a successful week's trip through the Estancia valley.

James F. Loux, of Allentown, Pa., has joined the traveling salesmen staff of L. B. Putney & Co. Mr. Loux arrived here last night from Pennsylvania.

Walker Evans Jr., of Chicago, Ill., representing a number of eastern capitalists, is in the city looking up certain land deals in which the eastern men are interested.

There will be a stated convocation of the Knights of the Ku Klux Klan at 8 o'clock, by order of the grand commander, Harry Braun, recorder.

William McIntosh, one of the promoters of the Albuquerque-Estancia Auto company, leaves this morning for McIntosh via the buzz-wagon, after spending a number of days in the city.

G. I. Brown, local depot baggage master, has resigned and Mr. Mahoney, from Wichita, Kan., will succeed him. The change takes effect at once. Mr. Brown expects to remain in Albuquerque.

Two of the soldiers of the Thirtieth Infantry which passed through the city Saturday, missed their trains while sampling Albuquerque refreshments, and as a result had to pay their way east.

Frank L. Myers, newly appointed superintendent of the Rio Grande division, spent yesterday with retiring Superintendent W. K. Eiter, inspecting the local yards, postponing the inspection trip over the south end until today.

Mrs. Beale Kerr, aged twenty-two years, died yesterday morning at 218 North Walter street, after a residence here of two months. The deceased was survived by a daughter. The body will be taken to Kansas City, Mo., the old home, tonight for burial.

Richard Klett and P. G. Scott, of Los Animas, Colorado, are in Albuquerque for a few days, superintending the shipping of several hundred head of lambs to their feed lots in Colorado. The gentlemen are old friends of Assistant Marshal Kennedy.

Candido Padilla, private clerk and chairman of the republican central committee of Torrance county; Assessor Antonio Salazar and Deputy Assessor Frank A. Chavez left yesterday morning on the automobile for Estancia, after spending a week here attending the trial in the district court which cleared Padilla of the charge of cattle stealing.

E. A. Salen returned last evening from Albuquerque, where he attended a meeting of the grand lodge of A. O. U. W. He reports the convention as being a grand success from every point of view and that the hospitality extended the Workmen by the citizens of the Duke City reached the limit. The next grand lodge meeting will be held at Silver City—Hillsboro Advocate.

MORE IRRIGATION PROJECTS FOR NEW MEXICO

PROPOSED TO CONSERVE FLOW OF THE PECOS

Antelope Basin in Eddy County to be Site of Another Big Private Enterprise for the Reclamation of Land.

Hardly a day passes that some new irrigation or colonization project is not launched in New Mexico and the number of these projects backed by reliable men and abundant capital is increasing so rapidly that there is no longer any question of the continuance of the present tremendous flow of immigration to this territory.

Two of the latest irrigation projects in private hands are reported from eastern New Mexico.

H. B. Jones, head of the First National bank at Santa Rosa has interested eastern capital in a plan to conserve the waters of the Pecos river and preliminary surveys are now being made for a large ditch system near that town.

Dayton, New Mexico people are now organizing for the construction of a large irrigation reservoir in what is known as Antelope Basin in the north end of Eddy county.

MAY MANUFACTURE CAMERAS IN THIS CITY

Manager of Ferrottype Company in Albuquerque Looking Over Ground for a Suitable Factory Site.

Dr. H. T. S. Huntington, manager of the Chicago-American Ferrottype company, is in Albuquerque looking around and it is quite likely that he will choose this city for the site of a factory which is to turn out the "Canon One Minute Camera," of which Mr. Huntington is the patentee and manufacturer.

Dr. Huntington said yesterday that arrangements for the manufacture of the camera here would likely be completed soon.

The device which Mr. Huntington has patented is said to turn out a complete photograph in one minute's time. Thousands of them, according to Dr. Huntington, have already been sold and as the trade is chiefly confined to the southwest, he will make his headquarters in this city.

Dr. Huntington and wife leave this week for a business trip through Arizona and Mexico.

Dr. Deimel

(LINEN-MESH)
Underwear

We are agents for the celebrated Dr. Deimel Linen Mesh Underwear, which we sell at the same price as everywhere—\$6.50 per suit.

It is the most sanitary underwear in the world, and once worn, will always be wanted again.

We carry regular long and stout sizes.

Here is something new and very fine. There are hundreds of men who cannot wear wool next to the skin, and who want warm garments. To those the Duofold will prove a boon. It is a double garment: Wool on the outside and Balbriggan next the skin. Not bulky—but comfortable and warm. \$3.50 and \$4.50 per suit.

Other lines of underwear in all grades and styles at \$1.00 to \$7.50 per suit. Call and see us if in need of anything in this line. We can please you and our prices are always reasonable.
