New Mexican Printing Company. "Santa Fe Daily New Mexican, 11-17-1897." (1897). https://digitalrepository.unm.edu/sfnm_news/5776

This Newspaper is brought to you for free and open access by the New Mexico Historical Newspapers at UNM Digital Repository. It has been accepted for inclusion in Santa Fe New Mexican, 1883-1913 by an authorized administrator of UNM Digital Repository. For more information, please contact disc@unm.edu.

P. O. Box 153
SANTA FE, N. M.

Colonel C. R. Hallowell is so highly regarded with this climate, and he has improved so much in health, says the Citizen, that he is thinking of moving his law library from Chicago and opening a new office in this city. For a score of years Colonel Hallowell was one of the leading members of the bar in the state of Kansas, and he will be a valuable accession to the Bar association of the territory.

The Daily New Mexican

THE NEW MEXICAN PRINTING CO.

Entered as Second-Class matter at the Santa Fe Post Office.

Daily, one year, by mail..... 40.00
Weekly, per month, by mail..... 1.50
Weekly, per quarter, by mail..... 4.00
Weekly, per six months, by mail..... 7.50
Weekly, per year, by mail..... 14.00

All contracts and bills for advertising payable monthly.
All communications intended for publication must be accompanied by the writer's name and address—not for publication—but as evidence of good faith, and should be addressed to the Editor. Letters pertaining to business should be addressed to the New Mexican Printing Co., Santa Fe, New Mexico.

The New Mexican is the oldest newspaper in New Mexico. It is sent to every Postoffice in the Territory and has a large and growing circulation among the intelligent and progressive people of the southwest.

Advertising Rates.

Wanted—One cent a word each insertion. Local—Ten cents per line each insertion. Reading Local—Preferred position—Twenty-five cents per line each insertion. Displayed—Two dollars an inch, single column, per month in Daily. One dollar an inch, single column, in either English or Spanish Weekly.
Additional prices and particulars given on receipt of copy of matter to be inserted.

WEDNESDAY, NOVEMBER 17.

One of two conditions confronts football players. Either some of the "gig" must be eliminated from the game, or the game will be eliminated by the legislature when they meet. The number of fatal accidents that have occurred this fall have satisfied the general public that there is something radically wrong with the rules and regulations in vogue on the gridiron.

GREAT BRITAIN is a great country to be sure, but it seems that Carlisle's estimate that it contains many fossils is as true to-day as it was when made. The Duke of Teck, because he happens to be the relic of some woman recently deceased, and who was relative of the queen, is to receive a pension, and the people of England are to support the man during his natural life.

The estimated cost of building a railroad from Albuquerque to Durango, a distance of 236 miles, is \$2,960,194. To insure success the promoters should make it even money, then go to the haunts of the bulls and bears in the far east and interest capital in the enterprise. The road will prove of incalculable benefit to the country through which it is to pass, and no private interest schemes should be allowed to prevent its building.

Here is a pointer to Democratic postmasters who wish to retain their positions under a Republican president. E. T. Page of Red Water, Tex., when a number of candidates attempted to oust him from the office protested that the successful raising of three children out of quadruplets, and two pairs of twins entitled him to some consideration from his country, and accompanied the protest with a picture of the family. There will be no change in postmasters at Red Water, Tex.

The St. Louis Globe-Democrat of the 14th instant contains a lengthy letter from a staff correspondent as to the condition of business in New Mexico and Arizona. In the main the statements in the letter are correct and borne out by the facts as they exist. It is refreshing to have eastern journals tell the truth about this territory. For years past the only things worth publishing about New Mexico have been the occurrences of murders and other crimes and these painted and stretched without regard to truth and facts, so as to give New Mexico as bad a name as possible. The change for the better is very pleasing and certainly in the right direction.

In a recent speech delivered before the Nineteenth Century club in New York, at the club's annual banquet, Governor Pingree of Michigan, at one time mayor of the city of Detroit, said: "Before I was elected mayor of Detroit, there was not much in the city to be proud of. The honors that have been piled upon the commander-in-chief of the forces of Michigan and the governor thereof have gone to his head, and from this recent utterance and his note, it may well be concluded that Governor Pingree has the swelled head. The governor will find that the people of Michigan do not like officials with swelled heads and they will let him down in the next election with great rapidity and with appropriate swiftness."

WHERE THE BLAME COMES IN.

The Albuquerque Citizen asserts that "several hundred broken-down lawyers back east want to be judges in New Mexico."

Now it is not quite as bad as that. There are probably a couple of dozen of lawyers, who are applicants for judicial positions in the territory. While the New Mexican desires to see residents of the territory appointed to these places, it cannot blame eastern men and non-residents for being desirous of obtaining them. New Mexico is a good country to come to and besides judicial offices in New Mexico are soft places and it is no wonder that lawyers all over the country are after them. There is another word here and it might just as well be said. If non-residents are appointed, the people and the members of the bar of the territory will have none but themselves to blame. Had they agreed upon five candidates and stood together in their choice, the appointment of residents would have been made long ago. As it is, there have been bickering, envious and jealous feelings and charges and counter charges in connection with applicants from the territory and these have done great harm to the home rule principle.

TOUCHING NEW MEXICAN APPLES.

The Colfax county papers boldly affirm that the apples raised in that county are easily world beaters for size, beauty and flavor; the papers down in Chaves, Eddy and Lincoln counties positively know that their apples would carry off gold medals anywhere; over in Grant county the local papers insist that their apple output would turn the eyes of eastern orchardists green with envy; and the editors up in San Juan county are perfectly harmonious when it comes to singing the praises of their peerless Pippins, Winesaps, Rambows, Greenings and Geneties. These fruitful and prosperous counties are located at the four corners of the broad and resourceful empire known as the map of New Mexico. And there are most decidedly others. Right here permit the New Mexican to stop the procession long enough modestly to observe that the apples raised in Santa Fe county are embodied poems in spherical perfection, materialized pictures in their brilliant colors and realized dreams in their mellow substance and delicious flavor.

PENAL COLONY NONSENSE.

When congress convenes next month, there will be all manner of bills introduced to cure existing evils, regulate society, make money and provide for junketing trips for members of that august body, and the country at large will look upon such proceedings with complacency, regarding this as the usual grist that must be ground in the lawmaking mill. But one announcement has been made of an intended attempt to secure legislation concerning criminals, that should be watched.

Representative Benjamin T. Howell of New Jersey, will seek to separate the State and sheep of society, by establishing a penal colony in Alaska and sending the convicts to that country to meditate over their encroachment upon pastures not theirs by right of possession. Mr. Howell's object, so he states, is the settlement of the convict labor question, "by the removal of all competition with free labor and furnishing protection to society by segregating the criminal element." This sounds very catchy and quite nice, but the plan of colonizing criminals in a frozen desert, in the most inaccessible part of the country is quite as reasonable and humane as that of herding convicts in penitentiaries without employment, suffering the evil consequences to mind and body of enforced idleness, lest they should compete with somebody's free labor. Indeed, of the two plans—that of colonization on an iceberg and that which is driving convicts to insanity at the public expense at Sing Sing—the open air colonization system where the graceful walrus sports and bears their watches keep, is entitled to the preference. The misery at the Alaska institution would be no greater than at Sing Sing and it would be sooner over.

That anybody should, in this age, suggest a criminal colony, shows that in our ideas of the treatment of criminals we are "advancing backward." Criminal colonies have been tried, and their names are always associated with torment and terror. Botany Bay was once one of the most frightful of punishments. It would be necessary to go outside of this world to find anything in the way of a place of torment to equal New Caledonia now. Siberia casts its dark shadow across Russia. A criminal colony is the seat of all abuses that may be practiced in a prison with absolutely no hope of reformation or redress. A criminal colony must, of necessity, be located far from the homes of men, and apparently beyond the ken of Providence. The keepers of such places become the most brutal, as they are the most irresponsible, of men, while there is no other human being so desperate as the escaped convict from a criminal colony. Not all the advantages of relieving free labor from competition or segregating the criminal element could justify a criminal colony in Alaska or elsewhere.

The enforced idleness of the criminals in Sing Sing is a step backward, which should meet with a protest from the entire country, but to establish a penal colony would be to slide down the long hill of ages into barbarism. Mr. Howell may be honest in his idea and sincere in the desire to protect society, but he has taken the wrong path. Some intimate friend should lead him into a corner and read a few extracts from history concerning penal colonies, prisons and reform work among convicts and criminals.

THE PRESIDENT'S MESSAGE.

It is understood in Washington that the president has nearly completed his message to congress, which will convene on Monday, December 6. Particular interest attaches to the forthcoming document, because of the Cuban and Hawaiian questions, financial matters, reciprocity with other countries on the American continent, the Nicaraguan canal and Alaskan affairs, aside from the usual domestic matters which will undoubtedly be touched upon.

The message will probably point out that every obligation toward Spain has been discharged, and that the United States has more than done its part in patrolling a long sea coast in order to prevent the sailing of filibustering expeditions. While Mr. McKinley will undoubtedly take a firm stand in the matter of bringing the war on the island to a close, he will urge that Spain be allowed a fair opportunity to prove her good intentions in the promised scheme of a liberal government. Hawaiian annexation will occupy a prominent place in the message, and the senate will be urged to ratify, at an early date, the treaty now pending before that body. The subjects of reciprocity and finance will be treated at length and many recommendations made. President McKinley regards the principle of reciprocity as the corner stone to success for the commercial supremacy of this country and will point out that an arrangement mutually

advantageous to the commerce of both countries is reaching conclusion with France; that negotiations for reciprocity with Canada are progressing, and that arrangements of like nature will be made with the countries of Central and South America. Currency reform will come in for thorough consideration, and the necessity of wise legislation will be urged. The other subjects mentioned will be carefully treated, and the entire message is expected to be filled with sensible, statesmanlike suggestions for the guidance of congress in its deliberations.

START THE ENTERPRISE.

Even the great, big beet raised in and around Santa Fe the past season, the ones which heretofore have been considered only fit for cattle feed, contain more sugar than the beets raised in Nebraska, where the manufacture of sugar is carried on successfully. A letter received in this city from Grand Island, where one of the Oxnard factories is located, yesterday, said: "The roads in all directions are filled with a procession of great wagon loads of beets going to the factory."

There is no reason why every wagon road leading to Santa Fe should not be filled with wagons loaded with beets, coming into the city at this time of year. It is almost beyond belief that the citizens of the ancient city do not seem to realize the importance of establishing a factory here. If only a spirit of enterprise would be shown, a factory could be running within a twelve month. There is no lack of capital for the enterprise, but capital is not wandering up and down the earth seeking whom it may devour. It wants facts and figures and satisfactory evidence of success before it bites. Santa Fe, the Espanola and Rio Grande valleys can furnish convincing figures on short notice; what is needed is a strong effort on the part of the property owners of the city to attract the attention of the dollars to the advantages offered for investment in making sugar. Who will start the procession? The New Mexican stands ready to do its part.

Free From Rheumatism.

If the people generally knew the true cause of Rheumatism, there would be no such thing as limber joints and loins for this painful and disabling disease. The fact is, Rheumatism is a disorder of the blood—reached, therefore, only through the blood. But all blood remedies are not alike, for it is an old maxim that "one cure fits all diseases." The Swift's Specific is a remedy and prompt bottom of even the most chronic Rheumatism. Like all other blood purifiers, it is a blood purifier. In fact, which they preserve mercury, and though may result, these stiffness of joints disease. "I will more severe each year."

The case of Mrs. James Kell, of 614 Ninth Street, S. E., Washington, D. C., should convince everyone that it is useless to expect doctors to cure Rheumatism. Under recent date she writes: "A few months ago I had an attack of Sciatic Rheumatism in its worst form. The pain was so intense that my nervous system was prostrated, and I was for a long time perfectly helpless. The attack was an unusually severe one, and my condition was regarded as being very dangerous. I was attended by one of the most able doctors of Washington City, who is also a member of the faculty of the leading college here. He told me to continue his prescription and I would get well. After having it refilled twelve times and receiving not the least benefit, I declined to take it longer. "Having heard S.S.S. (Swift's Specific) recommended for Rheumatism," I decided, almost in despair, to give it a trial. After taking a few bottles I was able to hobble around on crutches, and very soon had no need at all for them, for S.S.S. cured me sound and well. All the distressing pains have left me, my appetite has returned, and I am happy to be again restored to perfect health. "S.S.S. never disappoints, for it is made to cure these deep-rooted diseases which are beyond the reach of all other remedies. It cures permanently Rheumatism, Catarrh, Cancer, Scrofula, Eczema, and all other blood diseases. It is the only blood remedy guaranteed."

Notice for Publication (Homestead Entry No. 4481.) LAND OFFICE AT SANTA FE, N. M., November 10, 1897. Notice is hereby given that the following named settler has filed notice of his intention to make final proof in support of his claim, and that said proof will be made before the Register or Receiver at Santa Fe, N. M., on December 15, 1897, viz: Manuel Quintana, for the S. E. 1/4, Sec. 3, T. 36 N., R. 10 E., Co. 1, 1st Dist., New Mexico. He names the following witnesses to prove his continuous residence upon and cultivation of said land: Perfecto Quintana, Juan Quintana, Antonio Quintana, Cesario Quintana, of Rowe, N. M. W. R. O'NEIL, Register.

Purely Vegetable, containing no mercury, potash, arsenic or other dangerous mineral. Books will be mailed free to any address by the Swift Specific Co., Atlanta, Ga.

If you cannot get beef, mutton will answer.

You may choose between milk, water, coffee or tea. But there is no second choice for Scott's Emulsion.

It is Scott's Emulsion or nothing.

When you need the best cod-liver oil, the best hypophosphites, and the best glycerine, all combined in the best possible manner, you have only one choice.

It brings prompt results in all cases of wasting, or loss in weight.

All druggists, 50c. and \$1.00. SCOTT & BOWNE, Chemists, New York.

OUR GLORIOUS CLIMATE.

Santa Fe Enjoys a Most Equable and Cool Summer Temperature and Moderate Winters.

COMPARISONS FAVOR SANTA FE GREATLY.

New Mexico lies at the point where the Rocky mountains lose their characteristic individuality which they have preserved as a distinctive feature from within the Arctic circle to Colorado and almost throughout that state. Herefore they have been a range or a broad series of parallel ranges exhibiting lofty peaks and passes at altitudes so great as to lie further skyward than many of the alpine summits. But when the chain has reached its final great effort of elevation in Pike's Peak it rapidly loses its massive character and with astonishing rapidity sinks to rolling hills and spreads out on the eastern and southern faces. Their climatic purpose is to extract the rain from the atmosphere for the benefit of the lower levels; they do more than this, for the rain carries away the desintegrating force to enrich the plateau and the valley beneath. Arizona faces the prevailing humid sections of the eastern states and the Mississippi valley the extreme dryness of the air must be considered; that the heat experienced by the human body is some 10 to 15 degrees less than that shown by the metallic thermometer, a difference of 90 degrees in the shade at Santa Fe being about equal to 78 degrees in St. Louis.

The following table taken from the reports of the climate and crop service of the bureau will give a general idea of the relative intensity of heat as indicated by the metallic thermometer.

Stations.	Mean Temperature.		Relative Humidity.
	Absolute.	Relative.	
Boston.....	50	56	62
Buffalo.....	49	54	62
Chicago.....	49	54	62
Cincinnati.....	49	54	62
Detroit.....	49	54	62
Galveston.....	59	61	77
Memphis.....	59	61	77
New Orleans.....	71	71	72
Philadelphia.....	61	68	69
St. Louis.....	64	69	61
St. Paul.....	56	58	63
Santa Fe.....	52	47	58
Washington.....	54	50	58

It will be observed that the difference is less than that given in comparison first above noted. This demonstrates the decrease in the difference between the absolute and sensible temperature as the intensity of heat becomes less, until in midwinter, the difference is slight and low temperatures are therefore fairly comparable. The thermal conditions, especially in summer, are not what might be expected at this latitude, owing to the environment. The average temperature during the summer months is about 67 degrees, about the temperature of the upper lake region, while in winter it is about the same as that of the Ohio valley. "It is much cooler in summer than at other points, (covered by the records of the bureau) in the same latitude in the United States and cooler than most stations with a latitude of less than 41 to 42 degrees. It is the extreme southern point of the cool region of the United States."

The following table shows the annual extremes in temperature, rainy days, the percentage of sunshine and number of a number of selected stations, representative of the different sections of our country:

Stations.	Annual Extremes.		Rainy Days.	No. Days.
	Maximum.	Minimum.		
Boston.....	97	-7	56.38	128
Buffalo.....	97	-11	56.38	128
Chicago.....	97	-11	56.38	128

THE SEVENTH Best Sugar factory in the United States was erected at Eddy, New Mexico, in 1896, and made its first "campaign," beginning November 15th, 1896, and closing February 15th, 1897.

THE CONTENT OF "SUGAR" in the beet of the crop grown in the Eddy and Roswell sections of the valley has proven to be more uniformly high than any other part of the United States.

FORTUNATELY the land is blessed with just the fertility to produce high grade beets, and

MORE FORTUNATELY the Pecos Irrigation and Improvement Co. and the Roswell Land and Water Co. have an irrigation system of great magnitude, covering a vast body of the BEST SUGAR BEET lands on earth. The water is applied to the crop WHEN NEEDED.

THE SUN SHINES more hours in the day and more days in the year in Eddy and Chaves counties, New Mexico, than in any other section of the west.

PECOS IRRIGATION AND IMPROVEMENT CO.

EDDY, NEW MEXICO.

Sigars and Seasonings. I can always tell when my wife has bought all the winter clothes she wants. How can you tell? She begins to talk of buying something for me.

194 separate analysis, chiefly carload lots, showed AN AVERAGE of 17.01 per cent sugar in beet; 84.1 per cent purity.

THIS REMARKABLE RESULT was accomplished by raw farmers, unacquainted with the culture of beet root, on new land and under very trying circumstances, as the factory was not assured until May, and a majority of the acreage was planted between JUNE 1st AND AUGUST 10th.

GOOD SOIL makes the seed germinate.

WATER makes the plant grow.

SUNLIGHT puts the sugar in the BEET.

THE ONLY THING left to be desired that the Pecos Valley has not on hand in abundance is PEOPLE. We need thrifty farmers; 500 heads of families each on a 40-acre farm.

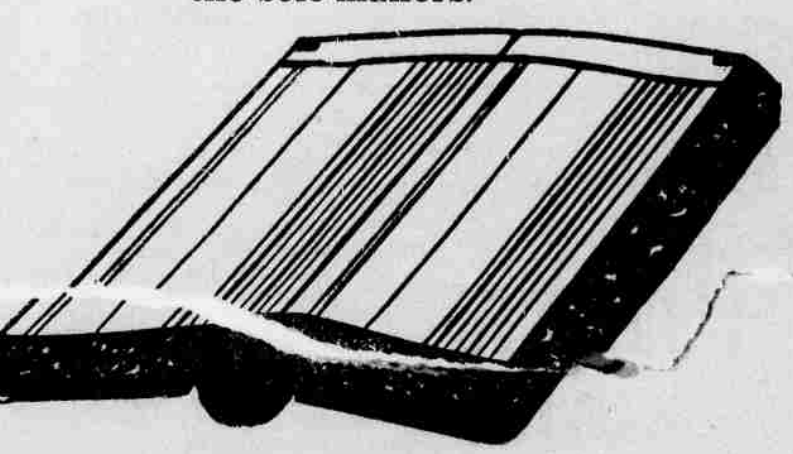

NO FAIRER terms or conditions of sale of beet and fruit lands were ever made.

WRITE for particulars.

THE SUGAR BOWL OF THE GREAT Southwest Is the Rich Valley of the Rio Pecos. IN THE COUNTRIES OF EDDY AND CHAVES OF NEW MEXICO.

Announcement!

The New Mexican Printing Company desires to state that it is making a specialty of its celebrated FREY'S PATENT FLAT OPENING BLANK BOOK. Rule them to order. Can give you the finest kind of binding, both for durability and finish, and it is the sole makers.

JOB WORK

Of all kinds done with neatness and despatch. Carry a large and complete line of commercial stationery consisting of wedding cards, business cards, programs, etc.

BOOK WORK

This is the best equipped establishment in the whole southwest for this line of work, and our unequalled facilities enable us to turn out work at the lowest possible figures.

LEGAL BLANKS

Carry a full and complete line of all Legal Blank, including those required by the Brand Law enacted by the last legislature.
