VOL. 46.

SANTA FE, NEW MEXICO, MONDAY JUNE 28, 1909.

NO. 116

TWO RAILWAYS FILE PLATS

Choctaw Extension of Rock Island to Tucumcari

ALTUS & ROSWELL ROAD

**Filing Water Rights on the
Ojo Sarco in Rio Arriba
County.**

The Tucumcari and Memphis Railway Company today filed the plats of its line in New Mexico, running 41 miles from the Texas boundary, all through Quay county to Tucumcari, crossing the Revuelto, the Chapero, the Barancas and Plaza Largo creeks. J. B. Berry is the chief engineer and the road is part of the Choctaw extension of the Rock Island from Dalt, Texas. In New Mexico it runs on an altitude varying from 3,500 to 4,500 feet.

The Altus and Roswell Railway plats were also received by Territorial Secretary Nathan Jaffa, but certain formalities are required before they are filed.

Notary Public Appointed.
Governor Curry today appointed George J. Tharp of Portales, Roosevelt county, a notary public.

Insurance Convention.
Insurance Commission Jacobo Chavez and his deputy, Peter M. Lienau, today received an official invitation to attend the fortieth annual convention of insurance commissioners at Colorado Springs, Colorado, August 24-27.

Filed Water Rights.

Manuel Sanchez of Ojo Sarco, Felipe Pacheco and Esteban Martinez of Llano, today filed in the office of Territorial Engineer Vernon L. Sullivan, the decree of Judge John R. McFie, defining the water rights of the seven ditches taken out of the Ojo Sarco in Rio Arriba county.

Will Investigate Complaints.

Game and Fish Warden Thomas P. Gable today dispatched Manuel Salazar to Penasco and Santa Barbara to investigate the complaint that saw mill owners are dumping saw dust into the Pueblo and Santa Barbara creeks and killing the fish.

Raton Commercial Club Coming.

The Raton Commercial Club will arrive in Santa Fe on a special car tomorrow evening to attend the sessions of the supreme court which convene here on July 1 to district the Territory into seven districts. Raton wants to have the headquarters of the seventh district. Socorro and Tucumcari are also candidates for headquarters honors.

FAILED TO DIS- POSE OF TRUNK

**Leon Ling Made Futile Efforts to
Give Away Gruesome Receptacle
of Elsie's Remains.**

New York, June 28.—That Leon Ling made attempts to dispose of the body of Elsie Sigel was discovered through further questioning of Chung Sin, his roommate, who told of the murder of the girl in Leon's room. It was that Leon had carried the trunk containing the body over to New York and attempted to leave it with a laundryman, a friend who would not receive it. He then went to Newark in a taxicab, where he tried to leave it with another friend, but failed. After much wandering, he brought the gruesome trunk back and left it in his room where he found it a week later.

Morbid Curiosity.

New York, June 28.—Great crowds were attracted to Chinatown and its restaurants and other resorts through the publicity given the murder of Elsie Sigel and extra police have been assigned to the district. It is said that never before has the place been so crowded and most of the callers are overhead discussing the Sigel tragedy.

A Startling Theory.

New York, June 28.—Failure to find any trace of Leon Ling leads the police to a new theory that Leon was killed by the same hand that killed Miss Sigel. It is further believed that the body of Leon was placed in a trunk shipped to Schenectady and thence to Cleveland, where the police lost trace of it. This line of reasoning throws out the evidence of Chung Sin who told the story of seeing Leon in a room with the body of Elsie. The police say if Leon is dead, they have one slayer and can lay hands on another in five minutes.

NEW VIEW OF WOODILL TRAGEDY

Eastman May Not Have Been the Murderer.

TELL TALE BOTTLES FOUND

**However the Suicide Pawned
the Slain Woman's Jewels
and Was Implicated.**

St. Michaels, Md., June 28.—The inquiry by the coroner's jury was continued today into the cause of the death of Mrs. Edith Thompson Woodill and the jury seemed to place considerable credence in the letter of Eastman that the woman was killed by a woman in the party at Eastman's bungalow, who used a bottle for a weapon. Several bottles found on the premises seem to indicate that part of the letter by Eastman, that the party out for "a time" were in the bungalow on the night of the murder. The fact remains, however, that Eastman pawned Mrs. Woodill's jewels in Baltimore and exhibited a roll of money several days after the murder. It is also thought in some quarters that Mrs. Woodill had given Eastman money on different occasions. An inquest was held at the bungalow within a few days of Eastman's grave. It is believed that Eastman made preparations to escape when told not to leave the county pending the investigation and was then caught. Mrs. Eastman has begun proceedings to get control of the property.

DRINK LEADS TO SUICIDE'S GRAVE

Special to The New Mexican.

Roswell, N. M., June 28.—J. B. Trotter, aged 59 years who has been a resident of Roswell for twenty years, committed suicide this morning in the Palace saloon by taking an ounce of carbolic acid. He swallowed the poison in the presence of several bystanders and was dead in eight minutes. He had been drinking for some time to excess and had become gloomy brooding over property losses and the loss of a woman who had promised to marry him and turned him down on account of his drinking. He was formerly a prominent contractor and builder and furniture and undertaker here. He was a member of the present petit jury of the district court on the regular panel.

He attempted to buy morphine this morning and later bought an ounce of carbolic acid from the Pecos Valley Drug Company, who notified the police.

James Champion, who questioned Mr. Trotter, and the chief concluding that he was in his right frame of mind, did not demand the drug from him. He has lately made threats of self-destruction and shortly before taking the acid, he told the bartender, V. L. Arnett, that he intended to wind it all up. The verdict of the coroner's jury was suicide. He had \$244.45 on his person.

LOST SON WAITED ON HER

Unexpected Meet- ing in New York Cafe

MOTHER NOT MISTAKEN

**Mrs. Robert H. Burnham Re-
cognizes Her Child in
Restaurant Waiter.**

New York, June 28.—Mrs. Robert H. Burnham of Reno, Nevada, entered the Astor hotel yesterday for afternoon tea. A nice looking waiter was assigned to her table. When Mrs. Burnham got a good look at him she recognized him as a long lost son from whom no tidings had been received for several years. The waiter took his position to await further orders and when the mother had finished her tea and went to the retiring room the waiter was called out. Immediately he recognized his mother whose motherly instinct proved not to be mistaken.

AMENDMENTS TO CORPORATION TAX

Senate Working Despite the In- tolerable Heat

ALDRICH APPEARS NETTLED

**Because of Delay in Forcing
the Tariff Bill to the
Front.**

Washington, D. C., June 28.—The extreme heat that forced most of the Senators to appear in the chamber clad in white, did not deter from action on the tariff measures. Vice-President Sherman appeared in a white suit and many members followed suit. Clapp, when the corporation tax measure was brought up, urged an amendment eliminating from the measure the right of corporations to own stock in other companies. In connection with the same measure, Culberson proposed a modification whereby the Senate may obtain possession of any information gathered by the commissioner of internal revenue concerning corporations. Aldrich, nettled at the delay to force the tariff to the front, accepted an amendment by McLaurin, whereby cotton bagging is placed on the free list.

The action of the Senate will merely have the effect of throwing the matter of a duty on cotton bagging into conference where it will be fought out. The Senate then turned to the iron and steel schedule, and on motion of Aldrich the paragraph relating to structural steel was slightly changed so that the products valued at less than nine-tenths of a cent per pound will be taxed three-tenths of a cent per pound instead of four-tenths of a cent per pound. An ineffectual attempt was made by Stone of Missouri to place structural steel on the free list. A duty of one and a half cent a pound on zinc instead of one cent as in the House bill was agreed to.

Petition for Executive Clemency.

Washington, D. C., June 28.—A petition for executive clemency to save a young woman from disgrace and a term in prison was brought to the White House this morning by Mondell of Wyoming, in behalf of Mrs. Ethel Donovan, formerly postmaster at Dietz, Wyo. Mrs. Donovan, who is only 26 years old, was convicted of embezzlement in connection with the issuance of money orders and she will be taken to Denver to serve six months in jail. Mondell brought the papers to show that eight jurors who voted to convict Mrs. Donovan now believe that she intended no crime.

Refuse to Give Senate the Documents.

Washington, D. C., June 28.—Attorney General Wickersham has refused to send to the Senate files in the department of justice relating to the trial of Dr. E. B. Perrin, charged with conspiracy to defraud the government in the California timber land cases. The data was demanded in connection with the nomination of Robert Devlin to be U. S. district attorney for the northern district of California. The nomination was put over until fall.

Wickersham Says the Commission Must Enforce Railway Law.

Washington, June 28.—The suggestion that the enforcement of the so-called "hours of service law," relating to the employment of men on railroads, be postponed until there is a final decision of the supreme court of the United States, determining all possible controversies as to its construction "cannot be entertained," announced Attorney General Wickersham in a letter made public today. The attorney general said that it is the duty of the Interstate Commerce Commission to enforce this statute and "the commission has been so advised by this department."

BLACK HAND TRIALS AT TOLEDO

Toledo, Ohio, June 28.—Because convinced that the base of operations of the alleged Black Hand gang recently uncovered in Marion, Ohio, was in this federal district, the authorities have decided to try all men implicated in the case in Toledo, next fall. The preliminary hearing of the four alleged leaders will be held today.

CARDINAL SATOLLI

REPORTED NEAR DEATH.
Rome, June 28.—Cardinal Satolli, who has been ill for the past week, is believed to be in a serious condition. Dr. Ettero Marchiafava, consulting physician to the pope, made an examination of the cardinal and announced that the patient was suffering from nephritis and atrophy of the right lung. The result of the examination was communicated to the pope, who was greatly affected.

PITTSBURG TIED UP BY CAR STRIKE

Business Paralyzed Through Inade- quate Service

IDLE MEN IN UGLY MOOD

**It Is Feared Rioting Will
Follow Any Attempt to
Resume.**

Pittsburg, Pa., June 28.—Pittsburg started on the third day of the street car strike which began on Saturday afternoon, with business paralyzed through inadequate service. It is feared that rioting will follow any attempt of the company to operate the cars. The outlying car barns have taken the attention of the police and the downtown districts were unguarded. The feeling of the union men and sympathizers was evidenced by the gathering of more than five hundred last night at the Herron Hill barns when it was noised about that the company would attempt to operate its cars. The saloons remained open today. The director of the police said he saw no reason to close the orderly places. The entire police force is held in reserve.

The grievances of the Union include charges of discrimination against Union employees, a demand of a hearing for the discharged men, longer lunch time, bulletin boards in the car barns announcing lay-offs and shorter runs.

The first real violence in the strike situation occurred soon after noon when fourteen strikebreakers were chased from the Rankin car barns by a crowd of union men and sympathizers from a nearby plant. Mayor McGee threatens to use his powers to stop the strike. The company says it is ready to settle but the union has refused a conference.

COLD BLOODED MURDER ON THE GILA

**Details of Crime Committed Out of
Jealousy—Man and Woman
Arrested.**

The Silver City Enterprise brings the following details of a murder which occurred on the road to the lower Gila in Grant county:

"Jealousy over a woman was the cause of a cold-blooded murder in Cottonwood canon on the road to the Lower Gila, about forty miles southwest of Silver City last Monday night between ten and eleven o'clock. At that time Manuel Terrazas, the murdered man and a woman Guadalupe Vea, with whom he had been living for the last four years, were camped near the spring in the canon. They were on their way to the lower Gila where Terrazas was taking the woman to reside as he did not care to have her live in Leopold with him, where he was employed, owing to the wives of Alvino Davila, another suitor of whom Terrazas was jealous. Earlier in the day it is alleged that Davila was on his way back from the Lower Gila, having gone there to get the woman and bring her to Leopold to live with him. Terrazas hearing of Davila's intentions, started after Davila and met him and the woman on their way back. According to the woman's story he made her get down from the vehicle in which they were riding, at the point of a gun and accompany him back to the Gila. They started back, Terrazas and the woman, Davila going on to Leopold, presumably. However, between ten and eleven o'clock that night, according to the woman's testimony, Davila stole upon them at their camp and without warning shot Terrazas down in cold blood. He was shot twice, once through the back of the head, the bullet penetrating the brain and passing out near the mouth and causing instantaneous death, the other through the lower part of the cheek and coming out on the other side. From the nature of the wounds, the bullet was .44 or .45 caliber. The body of the murdered man was not found until Wednesday when a lad, the son of a neighboring ranchman, discovered it on a high bench of land above the spring. He immediately reported the discovery and Deputy Sheriff Telles summoned a coroner's jury which after viewing the remains rendered a verdict of murder.

Telles started after the man and woman and overtook them on their way to Leopold and in company with Sheriff McGrath who had been notified of the murder by phone, brought them to this city where they were locked in the county jail. They had their preliminary hearing before Justice Newcomb and were bound over to the grand jury without bail. The woman is about 25 years of age and has a daughter three years old by Terrazas.

ROMANCE OF SANTA FE BOY

Louis Lowitzky Springs a Surprise on Local Friends

CUPID IS KEPT BUSY

**Many Couples Getting Mar-
ried—Double Wedding at
Cathedral Wednesday.**

Quite a surprise was sprung this morning among the many friends of Louis Lowitzky, the San Francisco street merchant when invitations to his wedding were received. Some time ago Lowitzky started on an extended trip to the coast but never a word did he say nor nary a hint did he drop about entering the fraternity of benedicts. Nevertheless he headed straightway for Portland, Oregon, with a definite purpose in mind. Having been previously acquainted for a long time with Miss Mamie Gilbert of that city, the rest was easy. An engagement followed and today invitations to the wedding arrived through the mails. The ceremony will take place on next Wednesday night at the residence of the bride at 530 Fifth street, Oregon. Lowitzky will then proceed with his bride on a honeymoon trip, going to San Francisco, the Seattle exposition and Los Angeles, after which the couple will come to Santa Fe and make their home.

More June Weddings.

As though anticipating the nearness of the end of June, weddings are becoming more frequent. On Saturday Maurice W. Thompson of Espanola, became the husband of Miss Meribel Wright of Des Moines, Iowa.

This morning at seven o'clock a pretty wedding took place at the Cathedral, the contracting parties being Filiberto Guillermo Carrillo and Dolores Baca, both of Cienega. Amelio Ortiz acted as best man and Miss Florentino Baca as bridesmaid.

A Double Affair.

On Wednesday morning at the Cathedral a double wedding will take place, the grooms being brothers and the brides, sisters. The principals of the affair are D. M. Gillespie, Edward T. Gillespie, Miss N. O. Taylor, and Miss P. E. Taylor all of Springer, New Mexico.

OLD LAND MARK DESTROYED BY FIRE.

Conejos, Colo., June 28.—Fire destroyed the plant of the Conejos Roller Mills Company, entailing a loss of \$50,000. For a time the court house and other valuable property was threatened. As the mill generated the electricity for Conejos and Antonito, these two cities are now in darkness. The burning of the mill takes one of the early landmarks of southern Colorado and the first flouring mill in this section of the state. The mill was built in 1867 by Major Lafayette Head, founder of the town. Although an old structure, the mill had modern equipment and its product took the special gold medal on flour at the St. Louis exposition. Power was furnished from the river. Insurance \$25,000.

TRACK GAMBLERS OR STRIKERS

Explosion in Chica- go Causes Im- mense Damage

ONE MAN FATALLY INJURED

**Mysterious Dynamite Out-
rage in the Heart of the
Windy City Last Night.**

Chicago, Ill., June 28.—The cause of the explosion in the heart of the city last night, which wrecked the telephone exchange and did damage to property estimated at \$100,000, injured one man fatally and hurt fourteen others, is still unexplained.

The police are unable to determine whether it was another "gamblers war" or an attempt to injure the employees of the company are now on strike and it is thought that this may have some connection with the explosion. It is also thought that possibly the gamblers may have connection with it because of the refusal of the company to supply service for the use of track gambling.

HEAT TWISTS RAILS AT DENVER

Thirteen Degrees Warmer Than at Santa Fe

TWO WRECKS CAUSED BY IT

**Three D. & R. G., Coaches
Derailed as Well as Co-
lorado Midland Trains.**

Denver, Colo., June 28.—The hottest day in ten years, with the mercury registering at 98, caused a displacement of rails on the Denver & Rio Grande railway system yesterday afternoon, throwing three coaches of the east bound passenger train in the ditch at Sedalia, twenty miles from Denver, injuring eight persons seriously. A few hours later an engine and two coaches on the Colorado Midland passenger train were derailed inside the city limits of Denver, also by heat-twisted rails.

Many Heat Prostrations in Boston.

Boston, June 28.—The hottest seven consecutive days in June ever recorded by the Boston weather bureau, resulted in 13 deaths and 175 prostrations were recorded.

Eight Die in Philadelphia.

Philadelphia, June 28.—There were eight deaths due to heat yesterday. The humidity was unusually great.

Chicago Reports Two Deaths.

Chicago, June 28.—Chicago suffered yesterday from oppressive weather conditions. The thermometer was around 87 degrees. Two deaths and many prostrations resulted.

Chicago, June 28.—The heat wave continues over the entire country with much suffering in the eastern cities. Four deaths in this city are attributed to the heat. Philadelphia and New York are suffering terribly and many thousands are taking advantage of the beaches to sleep, while those who can afford it are leaving for the western mountains the only cool spots from coast to coast.

GREAT SAVING BY WOOD PRESERVATION

Ogden, Utah, June 28.—The impregnation of wood with a chemical substance for the purpose of preventing decay is not only successful theoretically but it has also been proven by practice that such treatment more than doubles the life of timber and thereby renders the proposition most practically profitable.

Although the advent of wood preservation into commercial practice is of recent date in the United States, in European countries the chemical treatment of wood has been in general practice for over a quarter of a century, and with most satisfactory results. So successful has it proven that the installation of untreated wood in any construction which will bring it into contact with the soil is the exception rather than the rule.

The use of preservative processes in the United States has been confined largely to the southern and eastern portion, partly due to a more rapid decay of timber on account of climatic conditions, partly to the fact that in the older settled portions of the United States the diminution of the timber supply is more keenly felt, making urgent the adoption of some means to lessen the demand.

With the exception of the Transcontinental railway systems the preservative treatment of wood is seldom made use of in the intermountain region. However, as the country becomes older and more settled industrially the users of timber will feel more free to make the additional investment necessary.

The preservation of timber in use in contact with the soil is a question of intense interest to the man who looks at the economical side. The fact that a railroad tie that costs sixty cents untreated and has a life of from five to seven years, can, by treating, be made to last from fifteen to twenty years at an additional cost of from forty to fifty cents with the added saving of the cost of replacing the decayed tie, raises the proposition from one of theory to one where dollars and cents count. This saving is as applicable to posts, poles and mine timbers as to ties. If the amount of timber now used for these purposes each year in the intermountain region could be diminished by one-half by doubling its life by the use of preservatives the total saving in money outlay alone would be enormous.

It is for the purpose of bringing the possibilities of timber treatment to the attention of those using timber that the office of products in the local district office of the forest service at Ogden is maintained. If by demonstration the amount of timber used can be decreased by increasing its life it is felt that as much service has been rendered as to grow new forests.

The Big Store

"NOW" Let us ask you why pay \$3.50 for pair of shoes, when it will require three pair to wear as long as one pair of our \$5.00 kind. WHY pay \$5.00 when we can duplicate the shoe for \$4.00. It is durable and your feet as well as your pocket will suffer. You will find in our \$4.00 shoes every POINT KNOW TO GOOD SHOES-MAKING.

WE BELIEVE OUR \$4.00 SHOES ARE THE BEST \$4.00 SHOES ON EARTH

THE DAILY ROUND UP.

EVENING PEACE.
Evening sings around us
Over field and fell;
Peace has gently bound us,
All the world rests well.

But the brook still dashes
To the rocks below;
And it foams and flashes
In its ceaseless flow.

And no evening brings it
Quiet from the skies;
Not a bell e'er rings it
Peaceful lullabies.

Thus in thine endeavor,
Soul of mine thou art;
God alone can ever
Evening peace impart.

—E. W. TRIESS.

Released on Habeas Corpus—Judge Edward A. Mann at Alamogordo last week ordered the release of William Kluck, John Connor and William Letendris, the three men accused of rioting in connection with the recent killing in the El Paso and Southwest-ern depot at Carrizozo.

Two Fires—The blacksmith shop of Blas Duran, the rooming house of Mark Robinson, the store of W. M. Anderson, the office of the Duran News and the lumber sheds of E. Romero, at Duran, Torrance county, were destroyed last week by a fire which started from an oil stove and used for cooking. The loss was \$2,500, the insurance being small. The house of W. P. Dunn near Blair, Quay county burned to the ground last week being set on fire from sparks of a fire on the outside. The damage was \$1,000 and there was no insurance.

UNCLE SAM'S LAND LOTTERY

It is Expected That 150,000 Persons Will Register at Missoula and Kalispell, Montana.

Spokane, Wash., June 28.—Unusual interest and alluring possibilities center in the opening of the Flathead reservation in western Montana, the Coeur d'Alene in northern Idaho and the Spokane in eastern Washington this summer, and it is expected that fully 150,000 persons will register at Missoula and Kalispell, Montana, Coeur d'Alene, Idaho, and Spokane between July 15 and August 5, and take chances in Uncle Sam's free-for-all lottery for 750,000 acres of land. The drawing at Coeur d'Alene will begin on the morning of August 9 and continue until the land has been disposed of. The advance guard has already reached Spokane, Coeur d'Alene and Kalispell, and there are also many at Missoula, but railroad officials do not look for the big rush until early in July. Railroad and government land officials and secretaries of commercial organizations are literally swamped with letters of inquiry from all parts of the United States, and it is estimated that if only 10 per cent of the writers come there will be such throngs that tents will have to be established in public parks and the suburbs to accommodate the homeseekers.

REMOVED PEACH BASKET HATS

Hold Balance of Power in Nez Perce County and Are in Favor of Local Option or Prohibition.

Spokane, Wash., June 28.—Rev. Dr. S. Willis McFadden, formerly of Iowa, now pastor of First Presbyterian church, is a hero in the eyes of several hundred male members of that congregation. He has accomplished a great reform without offending the reformed, and, as a result, there is every reason to believe he has added to his many admirers. In response to a score or more letters, in which the writers indicated they attended church services to see the expounder of the gospel and "not just hear a voice in the distance," Dr. McFadden requested the matrons, young women and girls to remove their peach basket, merry widow and other types of hats. He explained that from his point of vantage in the pulpit the veritable sea of fanciful creations of the milliner's art did not interfere in the least with himself or the discourse, but that he simply made the request to oblige the men. The women saw the point and there was a prolonged rustle of silks and clatter of dagger pins. The pastor thanked the women on behalf of the men, many of whom clapped their hands in show of gratitude, and the service proceeded.

It is an admitted fact that rest, quiet, financial men and merchants all say that quickest and best results are obtained by advertising in the New Mexican.

Why suffer with pain when BALLARD'S SNOW LINIMENT WILL CURE

RHEUMATISM, CUTS, OLD SORES, SPRAINS, WOUNDS, STIFF JOINTS, NEURALGIA, SCALDS, ETZ.,

INDIANS AGAINST LIQUOR TRAFFIC

Presbyterian Minister at Spokane, Earns Gratitude of Male Members of His Church.

Spokane, Wash., June 28.—Gumshoe politicians enlisting the support of the Indians at the election in central Idaho will strike snags all along the trail if they pursue the old tactics of campaigning with suit cases filled with flasks of whiskey. Since fire-water has been banished from the reservation, southeast of Spokane, more than a score of educated Nez Perce Indians, headed by James Stuart, Paul Corbett and Corbett, lawyers, graduates of Carlisle, have been doing silent but effective missionary work among their fellows in the cause of local option. If they succeed in convincing the older Indians that it is their duty to exercise the franchise the liquor traffic in Nez Perce county will be wiped out. The church redds have decided to vote with the "dry" forces, and it is reported that if the long-haired renegades vote they will do likewise. There are between 700 and 800 Indians in the county and with their votes they hold the balance of political power.

PAIN

Pain in the head—pain anywhere, has its cause. Pain is congestion, pain is blood pressure—nothing else usually. At least, so says Dr. Shoop, and to prove it he has created a little pink tablet. That tablet—called Dr. Shoop's Headache Tablets—coaxes blood pressure away from pain centers. Its effect is charming, pleasingly delightful. Gently though surely, it surely equalizes the blood circulation.

If you have a headache, it's blood pressure. If it's painful periods with women, same cause. If you are sleepless, restless, nervous, it's blood congestion—blood pressure. That surely is a certainty, for Dr. Shoop's Headache Tablets stop it in 20 minutes, and the tablets simply distribute the unnatural blood pressure.

Bruse your finger, and doesn't it get red, and swell, and pain you? Of course it does. It's congestion, blood pressure. You'll find it where pain is—always. It's simply Common Sense. We sell at 25 cents, and cheerfully recommend

ALL OUT OF SORTS.

Has Any Santa Fe Person Never Felt
That Way?

Feel all out of sorts?
Tired, Blue, Irritable, Nervous?
Back feel lame and achy?
That's the story of sick kidneys—
Bad blood circulating about;
Uric acid poisoning the body.
Just one way to feel right again,
Cure the sluggish kidneys;
Do it with Doan's Kidney Pills.
Doan's have cured many Santa Fe
people.

Here's one case.
Toribio Rodriguez, 110 Johnson St.,
Santa Fe, N. M., says: "I suffered
off and on for several months from
backache and pains across my loins.
Mornings when I attempted to work
my back so greatly distressed me that
often I would have to sit down to ob-
tain relief. Finally the pain became
so constant that I was in great mis-
ery. I then began using Doan's Kid-
ney Pills, procured at Stripling and
Burrows' drug store, and in a short
time I was entirely cured."

For sale by all dealers. Price 50
cents. Foster-Milburn Co., Buffalo,
New York, sole agents for the United
States.

Remember the name—Doan's—and
take no other.

(Homestead Entry No. 052.)
Notice for Publication.
Department of the Interior,
U. S. Land Office at Santa Fe, N. M.
June 10, 1909.

(Not Coal Land)

Notice is hereby given that Albino
Lucero of Jemez Springs, N. M., who
on July 3, 1908, made homestead en-
try No. 052, for lot 7, Sec. 6; and N
1-2 of lot 1, Sec. 7, Township 18 N,
Range 4 E, N. M. P. Meridian, has
filed notice of intention to make final
five year proof, to establish claim
to the land above described, before
the register and receiver at Santa Fe,
N. M., on July 21, 1909.

Claimant names as witnesses:
Refugio Armenta, Lino Armenta,
Jose Mestas y Ruiz, Jose Armenta, all
of Jemez Springs, N. M.

MANUEL R. OTERO,
Register.

Badly Sprained Ankle Cured.

Three years ago our daughter
sprained her ankle and had been suf-
fering terribly for two days and nights
—had not slept a minute. Mr. Stal-
lings, of Butler, Tenn., told us of
Chamberlain's Pain Balm. We went
to the store that night and got a
bottle of it and bathed her ankle two
or three times and she went to sleep
and had a good night's rest. The next
morning she was much better and in
a short time could walk around and
had no more trouble with her ankle.
—E. M. Brumitt, Hampton, Tenn. 25
and 50 cent sizes for sale by all drug-
gists.

MINES AND MINING

Orogrande—The work of remodel-
ing the sampler and repairing other
portions of the smelter plant here is
well in hand. The sampling plant
has been put in first class condition
throughout, including new ore bins,
carrier to take the ore from the bins
to the big new crusher just installed
and thence to the sampling room and
small crushers. This work of remodel-
ing has cost the Orogrande Smelt-
ing Company many thousands of dollars,
but the plant will now be one of the
most up-to-date plants in the south-
west, and will be able to handle the
ore with much less expense than
formerly. The blast furnace is also
being completely overhauled and put
in condition for the blowing in of
the plant. A large storage-water re-
servoir has been built just east of the
main smelter building and is now be-
ing cemented. This will be used for
the overflow water from the furnace,
making it possible to use the water
over, thus saving very materially in
the water supply. The wells and par-
titions of the new concrete office
building are now being completed.
Both walls and partitions are of ce-
ment. A large vault room has been
built in the building and when com-
pleted the building will be very com-
plete and well equipped.

Charles H. Knibbs has just sent out
another car of ore from the Delusion
property to El Paso. He has several
more cars on the dump which will be
shipped at an early date.

Judge Frank P. Blair, formerly of
Chicago, is operating the Cuprite
mine, and getting some excellent ore
and will push the development work
as rapidly as is consistent with an
economical management.

The work being done on the prop-
erty of the Treasure Mining Corpora-
tion is showing up the property to
good advantage. The vein in the
tunnel now being run is about 30 in-
ches wide and showing some high grade
ore. While no great depth has yet
been reached the indications are
most favorable for a quick develop-
ment and an unusually good quality
of copper-silver ore.

Work has been resumed on the Har-
vey property owned by the Waucha-
sett Mining Company. This work is
being done to extend the main drift,
being run from the 140-foot level.
This drift is now over 100 feet in, the
purpose being to cut the main dyke
just ahead.

The First National Mining Company
expects to begin a more active devel-
opment at an early date and is mak-
ing arrangements to this end.

Culver & Downs have just cut
through about 15 feet of good ore in
the Gem, where they have a shaft
down about 180 feet. This seems to
be a large blanket vein, butting up
against the main contact wall. The
shaft is being deepened to determine
the character of the ore underneath.
Some good copper is now showing in
a highly-mineralized lime.

Coal Mining in New Mexico in 1908.
The total production of coal in
New Mexico in 1908 was 2,467,937
short tons, having a spot value of
\$3,368,753, according to statistics
collected by E. W. Parker, of the
United States Geological Survey.

New Mexico did not suffer so much
from the panic and business depres-
sion of 1908 as did some of the other
coal-mining regions of the United
States. In a preliminary statement
issued by the United States Geological
Survey early in January it was stat-
ed that the production of the Terri-
tory in 1908 was not more than 10
per cent less than in 1907. The statis-
tics compiled show that the actual
decrease was 161,022 short tons, or
6.12 per cent from 2,628,959 short tons
in 1907 to 2,467,937 tons in 1908. The
value decreased in somewhat greater
proportion—from \$3,832,128 to \$3,
368,753, a decline of \$463,375, or 12.09
per cent. The average price per ton
declined from \$1.46 in 1907 to \$1.37 in
1908.

The features of the year were the
heavy falling off in the demand for
coal by the railroads and by the man-
ufacturing and smelting industries
and the considerable increase in the
production of coke by the Stag Canon
Fuel Company, of Dawson, Colfax
county. This coke is shipped to al-
lied interests in Arizona and dis-
places equivalent amounts of eastern
coke in that market.

The amount of coal made into coke
in 1907 was 498,279 short tons; in
1908 it was 450,114 short tons, an ap-
parent decrease in 1908 of about 48,
000 tons. The figures for 1907, how-
ever, cover unwashed coal; those for
1908 cover washed coal. The quantity
of coke produced in New Mexico in
1907 was 265,125 short tons; in 1908
it was 174,565 short tons, an increase
of 9,440 short tons. The coke man-
ufacturers of the Territory, who had
to depend on outside markets, were
at a considerable disadvantage, as
when the panic came in 1907 the Ar-
izona smelters who did not suspend
operations had large amounts of coke
in storage and in transit. During the
prosperous times of 1906 and 1907
from 300,000 to 500,000 tons of eastern
coke had been shipped into the south-
western territory, and as a large por-
tion of this had not been used, there
was a decided glut in the market dur-
ing the first half of 1908. This re-
sulted in the closing down of a num-
ber of Colorado and New Mexico ovens.
The production of coke at other
plants than at Dawson showed a
decided decrease. By the latter part
of the year the accumulated stocks
had been practically used up and the
demand for New Mexico coke im-
proved to some extent.

During the entire year there was an
ample supply of cars, there were no

strikes or other labor troubles, and the
supply of labor was abundant, in
New Mexico, as in the other coal-min-
ing districts of the Rocky mountains,
the effects of the depression on the
metal-mining industry threw a sur-
plus of labor into the coal mines, so
that notwithstanding the decreased
production in the Territory, the num-
ber of men employed in the coal
mines showed an increase from 2,
970 in 1907 to 3,448 in 1908. The
average working time decreased, how-
ever, from 269 days in 1907 to 197
days in 1908. During the year there
were a good many weeks when the
coal mines were operated for one or
two days only, but as is usual under
such circumstances, the productive
efficiency of the men was increased.
The average daily production per
man, which had decreased from 3.92
tons in 1906 to 3.29 tons in 1907, in-
creased to 3.63 tons in 1908. The av-
erage production per man for the entire
year (1908) was 716 tons against
855.2 tons in 1907 and 949 tons in
1906. Most of the mines in the Ter-
ritory were operated on a ten-hour
basis. Fourteen mines, employing 3,
015 men, reported ten hours as the
length of the working day in 1908; 6
mines, employing 356 men, worked
nine hours; and 5 mines, employing
39 men, worked eight hours.

Jo E. Sheridan, the Territorial mine
inspector, reports, that during the
calendar year 1908 there were 23 fa-
tal accidents. In Mr. Sheridan's of-
ficial report covering the fiscal year
ended June 30, 1908, 34 fatal acci-
dents are recorded.

In 1907 there were three mining
machines in use in New Mexico and
11,615 tons of coal were machine-
mined. In 1908 there were seven ma-
chines, and a machine-mined product
of 30,600 tons was reported.

LIVE ITEMS FROM MORIARTY

Busy and Prosperous Town on the
New Mexico Central Tributary
to Santa Fe.

(Haywood and Fielding, Moriarty,
Agents for the New Mexican.)

Mr. and Mrs. P. C. Copple left Mor-
iarty Saturday for Albuquerque where
they expect to reside the next two
months.

A. W. Barlow, representative for the
Oliver Typewriter Company, spent
Saturday in town. Mr. Barlow reports
the sale of an Oliver, together with
numerous supplies.

Fred Fornoff, captain of the Mount-
ed Police for the Territory of New
Mexico, passed through Moriarty Sat-
urday, en route for Santa Fe.

Bishop J. M. Kendrick of Phoenix,
Arizona, was a passenger on the north
bound train to Santa Fe Saturday.

A. H. Stone and wife of El Paso,
Texas, were registered at the Cottage
hotel Saturday and Sunday. Mr. Stone
spent Sunday inspecting the Hagan
coal fields to see whether the coal of
this field was adapted to coking pur-
poses or not. Mr. Stone and other
El Paso men are contemplating the
erection of coke ovens near the city
of El Paso.

Hon. Earl Moulton, U. S. commis-
sioner at Lucia, New Mexico, was in
town Saturday and Sunday on pri-
vate business.

The James Brothers held the second
of their series of dances Friday eve-
ning, June 25th, at McFarlin's hall.
A large number of young people of
Moriarty and the surrounding coun-
try spent a very pleasant evening.

E. Romero of E. Romero & Son,
lumber dealers, was a passenger on
the north bound train en route for
Santa Fe. E. Romero & Son own the
Moriarty Lumber Company yards at
Estancia and Las Vegas.

George H. Matsler of Otto, was a
visitor in Moriarty Saturday.

Miss Mabel Markey who owns a
homestead near Otto was in town
Saturday transacting business.

The Moriarty baseball team defeat-
ed a picked nine of local boys Sat-
urday afternoon by the score of 12 to 6.
White and Johnson were on the fir-
ing line for Moriarty. Look for the
result of the Estancia-Moriarty game
in Tuesday's paper.

No Need of Suffering From Rheuma- tism.

It is a mistake to allow rheumatism
to become chronic, as the pain can
always be relieved, and in most cases
a cure effected by applying Cham-
berlain's Pain Balm. The relief from
pain which it affords is alone worth
many times its cost. It makes sleep
and rest possible. Even in cases of
long standing this liniment should be
used on account of the relief which it
affords. 25 and 50 cent sizes for
sale by all druggists.

NOTICE.

Notice is hereby given, that a meet-
ing of the stockholders of the New
Mexico Central Railroad Company,
will be held at the general offices of
said company in the city of Santa Fe,
Territory of New Mexico, on Wed-
nesday the 7th day of July, 1909, for
the purpose of electing directors of
said company, and for the transaction
of any other business that may be
brought before the meeting; said
meeting being called in pursuance of
Section 3816 of the Compiled Laws of
New Mexico, 1897.

ROBT. LAW,
President.

The seals and record books for no-
taries public for sale by the New
Mexican Printing Company at very
reasonable rates. Seals for incor-
porated companies are also handled.
Call at or address the New Mexican
Printing Company, Santa Fe, N. M.

OFFICIAL PAPER OF SANTA FE COUNTY.

The New Mexican is the oldest newspaper in New Mexico. It is sent to every postoffice in the Territory, and has a large and growing circulation among the intelligent and progressive people of the Southwest.

THE FALSE AFFIDAVIT MEN AGAIN.

Recent dispatches from Washington inspired evidently by persons not very friendly to New Mexico, seek to convey the impression that President Taft, the Cabinet and Congress suspect New Mexico of being politically corrupt and unfit for self-government. In consequence, these dispatches say, the Territory is to be overrun by a horde of special agents and secret service men who are to make voluminous reports on the many charges that are being filed at the National Capital against prominent people of this commonwealth. The tenor of these dispatches can be gauged from the following extract recently published in the Los Angeles Express:

"The ignorant character of a large element of New Mexico's population, taken in connection with the fact that this element does not even speak the English language has rendered that Territory a favorite field for the operation of the political highwayman and marauder. The scandals connected with the administrations of its affairs have been many and of a serious character. At the present time there is the sharpest possible division of sentiment among the American residents in the Territory as to the character of the men who are now in charge of the Territory's affairs. The supporters of the administration, the nucleus of which are the office holders and their friends, maintain that the Territory is being honestly governed.

"The great mass of the Americans, however, take the opposite view, and just as there was bitterness and strife between those two sections several years ago so is there bitterness now, and it is difficult for officials in Washington to arrive at the exact truth.

"The President is therefore, making a careful examination, through employees of the government. The Republicans of the Senate Committee on Territories are using government employees, also, for the purpose of getting at the facts. The mass of information already on hand would fill a large volume, if published.

"The information thus far brought out inclines to the view that the President, before the Territory is admitted, ought to make a clean sweep of all Territorial office-holders. Petitions to him to do this have been coming to Washington in considerable numbers. Similar petitions have been coming to the Senate committee on territories."

This covert attempt to awaken race prejudice against the Territory and to throw suspicion upon the integrity of territorial officials is to be regretted. There certainly can be nothing mysterious and unknown about the conduct of territorial officials the past twelve years for in all that time special agents have reported diligently; have investigated without surcease and certainly nothing escaped these argus-eyed minions of Washington. Nor must it be forgotten that the men appointed to office were not elected by New Mexico but were selected right at Washington, and Washington should be the last to complain of them if New Mexico is satisfied. And taken, in general, New Mexico has been satisfied. Considering its helpless, territorial, bondage condition, it has done remarkably well. When Governor Otero took charge of affairs more than twelve years ago he found an empty treasury, enormous debts and the credit of the Territory in deplorable condition. Under his nine years' administration, industry and prosperity revived; debts were paid; credit re-established; the administration of justice re-habilitated; political vandalism stamped out. The Territory flourished; no one any longer denies this; and has continued to flourish under Governor Curry for people are flocking here by the tens of thousands; the population has doubled in less than a decade and by the end of this decade, the assessed valuation too, will have doubled. The year 1910 will find twice the railroad mileage of the last census year. In these twelve years just past, not a single territorial official has defaulted, or has been convicted of wrong doing, a record, which very few states can duplicate. Why therefore these vague hints at corruption, at unfitness? Do they come from men who were interrupted in their nefarious work in this Territory by Governor Curry who insisted that if he is to be Governor, he must be the chief executive in deed as well as in name?

Senator Teller of Colorado has launched Bryan's fourth Presidential boom and the poverty of the Democratic party is such that the boom will be permitted to flourish without hindrance.

THE CORPORATION INCOME TAX.

The main points about the proposed corporation income tax are that it taxes only profits; that it does not tax corporations showing less than \$5,000 a year on the right side of the ledger, and that through this tax, the federal government will get an insight into the business of every corporation, large or small. Incidentally, too, it will lead to new systems of bookkeeping in most concerns and will do away with the juggling of accounts. Says the Kansas City Star:

"The Corporation Dividend Tax Bill, as designed by President Taft, drawn by Attorney General Wickersham and Senator Root and approved and presented to the Senate by the finance committee, is a particularly important measure. It is a departure in the way of American revenue proposals. If, along with a provision to submit to the state legislatures a constitutional amendment to legalize a graduated income tax, this bill is enacted into law, the way will be opened for a large volume of revenues from sources particularly well prepared to furnish them. And, as both of these proposals have the hearty approval of the President, there is reason to believe that Congress will enact them.

"The principle of the income tax is embodied in this divided tax, but the technical objection on which the latter was declared unconstitutional has been avoided. One tax is based on the net incomes of incorporated associations; the other is based on the gross incomes from all sources, above a fixed amount. The latter would be the better if it could be certainly and equitably assessed and collected. But in the absence of such certainty and with the doubt of such equity, the corporation tax is a commendable measure, and for these two reasons: Corporations having more than \$5,000 net income per year will not find the 2 per cent tax burdensome, and corporations—as distinguished from partnerships, firms and individuals—should be willing to pay something for the limited liabilities their stockholders enjoy under the federal laws. It is on this difference in liabilities that the President bases his chief argument for the law as a revenue measure.

"But every progressive publicist will see in this proposed enactment an especial advantage to the government, a particular promise for a better application of the principle of the square deal to corporations. For the bill provides that the government shall know the essential things about every corporate business having profits of more than \$5,000 per year, these things including the actual capital paid in, the gross earnings, the cost of operation and the net profits, which knowledge will give the government a strong hand in regulating the privileges that corporations should have, whether through the medium of the tariff or in other ways."

Amistad is one of the most prosperous settlements in Union county although twenty-five miles from the nearest railroad. One of the reasons for its prosperity is to be found in the fact, that like Mountainair, when the townsite was laid out, the decision was reached that every deed to a town lot should contain a clause forbidding the sale of liquor. Amistad like Mountainair and like Artesia and like half a dozen other communities in the Territory, and like happy, prosperous San Juan county, is without a saloon, and strange to say, that institution so firmly rooted elsewhere, is never missed by them.

Socorro will have a monster demonstration and celebration the day that the Santa Fe will inaugurate a daylight service from Albuquerque to El Paso. Unfortunately, the day for the celebration has not been set. Unlike its policy elsewhere in sections tributary to its lines, the Santa Fe does not seem to be doing all in its power to develop that part of New Mexico that lies between Albuquerque and El Paso. A daylight passenger service would be a great factor in making the attractiveness of the country traversed, better known to the general public.

San Juan county is the first to take advantage of the new irrigation law and will organize the first irrigation district, presumably to issue bonds for the purpose of improving and extending existing irrigation systems. This plan is working well in Colorado and elsewhere and in New Mexico should result in the modernizing of many of the ancient ditch systems which have been conducted in a haphazard, wasteful manner for years, and have retarded rather than developed those sections of the country where they are located.

SPANISH SPEAKING JURIES.

Within twenty-four hours that he committed the deed, a Rio Arriba county native had been sentenced by Judge John R. McFie to 99 years in the penitentiary for murder. As there was not the least doubt of the man's guilt and this had been established with due observance of every formality of justice, there could be no special excuse for delay, and yet, it is seldom that justice is so summary and so swift. Incidents of this kind dispel the idea that justice can be shuffled with; that race, religious, political and other issues enter into the administration of justice in counties where Spanish speaking people predominate.

Says the Socorro Chieftain: "Judging by the number of convictions he has secured during the present term of court, District Attorney John E. Griffith must have found juries composed entirely of Spanish speaking citizens quite satisfactory, in spite of the opinion that some people hold to the contrary. If Mr. Griffith happens to be pleasantly surprised in this regard, he is not the first to experience that surprise. The fact is that the Spanish speaking citizens of New Mexico are no slower to convict one of their own race of crime than citizens of any other race are, when the evidence warrants a conviction."

This is equally true in San Miguel county where at the recent term of court an unusually large number of convictions were procured and that mostly of native people by native jurors. It is equally true in Santa Fe, in Taos, in Dona Ana, in other Spanish speaking counties. Nevertheless, the New Mexican believes, and it is confident, that in another ten years, the Spanish speaking jury will be a matter merely of history. The territorial form of government has retarded the coming of that day; under statehood it will be hastened. The younger generation of the native people nearly all speak and understand English and ten years hence it will not be difficult to secure English speaking juries among the native people anywhere in New Mexico.

FIGHTING FOREST FIRES.

Working along the line of securing the greatest results in protection against fire, with a minimum of expenditure, the forest service has decided to establish on the most advantageous points of the national forests in the west a series of lookout stations from which news of the breaking out of forest fires can be telephoned to forest officials.

Since all of these stations will command a view of the country for miles around the work of detecting and extinguishing fires in their incipency will, by this plan, be greatly expedited, with the result that many thousands of dollars worth of valuable timber will be saved annually.

In most of the national forest states the climate is very dry, and the rainfall light. Conditions, therefore, are remarkably favorable for the spread of fire and extraordinary diligence is necessary in patrolling dangerous areas. To administer the vast area included in the national forests, approximately 195,000,000 acres, the government has about 1,400 men in the field. If each man could be used for fire patrol he would have to cover approximately 138,000 acres. As a matter of fact, however, the volume of business on the national forests has grown to such proportions that less than twenty-five per cent of the force is available. This makes it necessary to spread an average man's service over nearly four times 138,000 acres, decreasing fire protection far below the point of safety in many cases.

In the face of this, however, fire losses on the national forests are kept at a point where they are trivial when compared with the damage which would be caused were the lands contained in the national forests unprotected.

From the standpoint of fire protection, the forestry headquarters at Santa Fe are advantageously situated. From the very windows of the office the greater part of the Jemez reserve can be scanned and recent fires there were all plainly visible right from the desk of the supervisor. Similarly, from Ft. Marcy, the Manzano reserve can be scanned and also part of the Pecos reserve and it was from the steps of the federal building that two recent fires on the Pecos reserve were discovered by an employee of the forestry office.

It seems that prolonged heat is always accompanied by a wave of atrocious crimes all over the United States. What relation excessive heat may have to crime or to an epidemic of suicide is not known, but this much is established, that as a haven of refuge from the unprecedented heat which has tortured the east and the west, from coast to coast, the past ten days, Santa Fe, cannot be excelled.

The X I T ranch wild west show, after holding forth at Santa Fe for a few days has gone to pieces. The X I T folks did not believe in newspaper advertising. They did not advertise in the newspapers at Santa Fe nor anywhere else. The result was a foregone conclusion.

Over in Quay county they have commenced to plant flax and it is doing well. It is difficult to set a limit to the variety of products that New Mexico soil will grow and which will flourish under the New Mexico sun.

The First National Bank

OF SANTA FE.

The oldest banking institution in New Mexico. Established in 1870.

R. J. PALEN, President. J. H. VAUGHN, Cashier.
I. A. HUGHES, A. H. BRODHEAD,
Vice President. Assistant Cashier.

CAPITAL STOCK, \$150,000
SURPLUS AND UNDIVIDED PROFITS, \$75,000

Transacts a general banking business in all its branches. Loans money on the most favorable terms on all kinds of personal and collateral security. Buys and sells bonds and stocks in all markets for its customers. Buys and sells domestic and foreign exchange and makes telegraphic transfer of money to all parts of the civilized world on as liberal terms as are given by any money transmitting agency public or private. Interest allowed on time deposits at the rate of three per cent per annum, on six months' or year's time. Liberal advances made on consignments of livestock and products. The bank executes all orders of its patrons in the banking line, and aims to extend to them as liberal treatment in all respects, as is consistent with safety and the principles of sound banking. Safety deposit boxes for rent. The patronage of the public is respectfully solicited.

Automobiles LATEST 1909 Models on Sale at Alexander's Garage

Representing the Mitchell, Moline, McIntyre and Zimmerman Factories. These factories are noted for their excellent cars, who, instead of building down to a cheap price car, build up to a machless standard, as good a car as a man would care to own. The Mitchell people have built \$11,000,000 worth of cars within the past few years, and their current year's production will equal 18,000 cars.

The Moline car occupies a position of high favor among automobile users. Models "K" and "M" for 1909, are two models of still higher excellence than their satisfactory models of last season, and have proven themselves the cars for anywhere.

High wheelers in solid rubber tires are represented by the McIntyre and the Zimmerman cars. These cars can be furnished in 26 styles of commercial and passenger combinations from \$250 up.

The people realize that the motor driven vehicles have proven good and is here to stay. It is erroneous to suppose that only expert mechanical engineers can own and operate a motor driven car, many ladies drive their cars.

At present quotations they are relatively cheaper than horse-charger to maintain. In its adoption you take nothing from the horse except that part which can better and cheaper be done with the motor vehicle. You drive the car yourself. You get the real zest of motoring by handling the levers and steering the car yourself.

Free road demonstrations are given to interested parties any time.

O. W. ALEXANDER

310 San Francisco Street Santa Fe, N. M.

PERSONAL MENTION

Mrs. M. J. Warner is visiting friends in Albuquerque.

Attorney General Frank W. Clancy has returned to his home at Albuquerque.

A. H. Hudspeth, an attorney of White Oaks, is in town, a guest at the Claire.

Henry H. Huck, a Denver traveling man, is in town stopping at the Palace.

Sam F. Woolard, an insurance man of Wichita, is a guest at the Palace today.

Territorial Treasurer M. L. Otero returned today from a business visit to Albuquerque.

O. A. Larrazolo, attorney of Las Vegas, is a visitor in town today. He is quartered at the Claire.

M. O'Neil, a mining man from Cerillos, is a business visitor in the city. He is stopping at the Claire.

W. P. Tanner, a New York traveling man, is in town seeing the merchants. He is registered at the Claire.

D. Moriarty, a St. Louis traveling man, is in town calling on the trade. He is quartered at the Palace.

J. O. Eaton, a mining man from Cerillos, was among the noon arrivals today. He is stopping at the Palace.

Mr. and Mrs. J. G. Kent of Virginia, are among the sightseers in town. They are guests at the Claire.

G. W. B. Jacob, a San Francisco traveling man, is in town selling woolen goods. He is registered at the Palace.

J. F. Quinn, a traveling man from St. Joseph, was an arrival on the noon train today. He is a guest at the Palace.

W. H. Goebel this morning returned from his camp in the Santa Fe canon, two miles above Monument Rock.

T. M. DuBois and R. L. Owen, mining men from Corona, are visitors in town. They are registered at the Claire.

W. A. Hardman, a traveling man from St. Louis, is in town visiting the merchants. He is a guest at the Claire.

F. L. Black and family of Boise, Idaho, are visitors in town seeing the sights. They are stopping at the Claire.

P. Spencer, a traveling man from Guthrie, Oklahoma, is in town visiting the merchants. He is a guest at the Claire.

H. D. Lauson, a mining man from Oroville, California, came in on the noon train today. He is quartered at the Palace.

W. Raymond Cooper and J. D. Cooper of Centerville, Alabama, are in the city enjoying the sights. They are guests at the Palace.

R. H. Johnson, of Albuquerque, connected with the Santa Barbara Tie and Pole Company, is in town. He is stopping at the Palace.

Dr. C. A. Wheelon has left for the Pacific coast on an outing. His new cottage on East Palace avenue has just been completed.

Miss M. J. Morton of the Allison Mission School in this city, recently addressed the Woman's Home Missionary Society of the Presbytery of Pittsburgh, Pa.

Miss A. H. Ahrens, of Fort Smith, Arkansas, and Miss M. Harrison of Owensboro, Kentucky, are visitors in town seeing the sights. They are quartered at the Palace.

Sheriff E. A. Green of Socorro, arrived at noon today bringing in nine prisoners for the pen. He was assisted by Deputies G. E. Sanchez, J. E. Montoya and Procopio Sanchez.

S. G. Morley, who will be a member of the faculty of the School of American Archaeology, has arrived in Santa Fe and has taken up his residence at 104 Manhattan avenue.

Hale H. Cook of Kansas City, Missouri, attorney for the receiver of the Elmendorf colony in Socorro county, is in Santa Fe on business in the office of the Territorial Engineer.

Juan Ortega has returned from a business trip to Springer, Raton and Trinidad. He says that ample rains have fallen in northern New Mexico and that the range is in first class condition.

Telegraph Operator E. C. Cooke has returned from Las Truchas where he had been hunting big game. A fine bear hide and a lion skin are among his trophies. He left today for Seattle, Washington.

On last Saturday, M. W. Thompson, of Espanola, was quietly married to Miss Meribel Wright of Des Moines, Iowa. Mrs. A. Wright and Mrs. Frank J. Wright were present to witness the ceremony. All are guests at the Palace.

Hon. Nestor Montoya, editor of La Bandera Americana, his mother, Mrs. E. Montoya, and his daughter, Miss Aurella Montoya, are here from Albuquerque.

Ask Your Wife About a Home

Every Woman living in rented property longs to get into a house of her own. There are hundreds of things she would like to do to make her own home more comfortable, attractive and pleasant. Nearly every woman is a money saver and she will help you wonderfully to pay for a home.

Rent Money Will Do

We will sell you a very desirable home on payments, which your rent money will make. Don't wait. Begin now paying for your home.

LET US EXPLAIN OUR CONTRACT FOR CHEAP MONEY.
GEO. M. KINSELL
294 San Francisco St.

quique, and the ladies will be guests at St. Vincent's Sanitarium for the summer months.

Mr. and Mrs. H. S. Kaune have returned from a very enjoyable trip to California which included Los Angeles and San Diego and Pacific coast resorts. Both Mr. and Mrs. H. S. Kaune have recovered their health completely and are glad to return to Santa Fe.

John Leibfried of Bethlehem, Pa., who is an engineer in the U. S. Reclamation Service with headquarters at Denver, is a guest of Mrs. H. C. Luckenbach, on Gaspar avenue, on his way to headquarters to the Pacific coast. He will remain in Santa Fe several days.

Colonel W. M. Berger, editor of the Belen Tribune, who unlike other editors can afford to take a vacation, is in Santa Fe on his return home from Raton. He was a former resident of Santa Fe and still owns property here and its still convinced that Santa Fe is the best town on the face of the earth although he also boasts for Belen day in and day out.

A. H. Brodhead, assistant cashier of the First National Bank has returned from a vacation trip that took him to the Seattle Pacific-Yukon Exposition, by way of Los Angeles, Santa Catalina and the coast cities. Mr. Brodhead reports having had a very interesting trip but found that as far as climate is concerned, that Santa Fe still excels in his mind. There are prosperity, plenty of push, many business opportunities in the northwest and the trip is one worth while making.

It is an admitted fact that rate, financial men and merchants all say that quickest and best results are obtained by advertising in the New Mexican.

Born in Iowa.

Our family were all born and raised in Iowa, and have used Chamberlain's Colic, Cholera and Diarrhoea Remedy (made at Des Moines) for years. We know how good it is from long experience in the use of it. In fact, when in El Paso, Texas, the writer's life was saved by the prompt use of this remedy. We are now engaged in the mercantile business at Narcoossee, Fla., and have introduced the remedy here. It has proven very successful and is constantly growing in favor.—Ennis Bros. This remedy is for sale by all druggists.

The New Mexican does printing and binding equal to the best done in any of the large cities. Try our work once and you will certainly come again. We have all the facilities for turning out every class of work, including one of the best binderies in the West.

Subscribe for the New Mexican.

S.S.S. CURES BLOOD POISON

When the blood becomes infected with the virus of Contagious Blood Poison, the symptoms are soon manifested. The mouth and throat ulcerate, copper-colored spots appear, a red rash breaks out, the hair begins to come out, and usually sores and ulcers show themselves on different parts of the body. At the first sign of the disease S.S.S. should be taken, for the trouble is too powerful and dangerous to trifle with. If allowed to run on the tendency is to work down and attack the bones and nerves, and sometimes it makes a complete physical wreck of the sufferer. The disease can make no such headway if S.S.S. is commenced and used according to directions; its progress can be stopped, the poison removed, and health preserved. S.S.S. goes into the blood and removes the insidious virus, cleanses the circulation and makes a complete and permanent cure by driving out the cause. S.S.S. quickly takes effect on the blood, and gradually the symptoms disappear, the health is improved, the skin cleared of all spots, sores and blemishes, and when S.S.S. has thoroughly purified the circulation no trace of the disease is left. S.S.S., a purely vegetable remedy, cures Contagious Blood Poison because it is the greatest of all blood purifiers, tested and proven for more than forty years. Home treatment book and any medical advice free to all who write.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

VALUE OF CACTI TO SAVE STOCK

Spineless Variety Will Not Grow on Open Range But Prickly Pear is Useful.

After all that has been written concerning spineless cactus as a forage plant it would seem somewhat superfluous to call the attention of stockmen to the value of the cacti upon their ranges at this season of the year. But the mental step between spiny cacti and spineless ones seems to be a long one and one that few take readily.

In bulletin No. 74, Bureau of Plant Industry (The Prickly Pear and Cacti as a Food for Stock, Dr. David Griffiths, U. S. Dept. Agri., Washington, D. C.) commencing on page 43 there is a long list of succinct statements relative to the possible uses of cacti, from which I quote the first, because of its present importance. "Prickly pear, although poor in nutritive quality, can be fed to decided advantage under several conditions and for several purposes: 1. To save cattle during prolonged drought when other more nutritious food is scarce."

Now this statement applies to any kind of cactus that is big enough to furnish any quantity of forage, being especially true of the prickly pears and cane cacti. The truth of this statement is vouched for by many who have tried it.

This is by no means the only use for cacti, but at this season of the year, when all feed is dry and there is very little of it, when the water supply is poorest and stock, especially cattle on the range are dying in large numbers, it would seem to be a most important one.

This short article is written to call the attention of those stockmen, who have already availed themselves of the supply, and more especially those who are losing stock, to the fact that they probably have upon their ranges a forage which may be available to their stock by a little work.

Spineless cacti will not grow in the open range of New Mexico. In fact, their thorns and spines together are one of the characters that make it possible for cacti of any kind to live on the open ranges. And even this defensive armor is insufficient to protect them from a number of enemies. But the spines do protect them from stock, and before they can be made into stock feed the spines must be destroyed.

Fortunately the spines burn readily hence it is possible to singe them off without effecting the stems and so come at the forage.

Two ways of burning the spines have been shown to be practicable. One is to cut the stalks with a machete or a sharp spade and hold them in the blaze of a brush fire with a pitch fork. The other is to singe them on the plants as they stand with a gasoline torch specially made for the work. This torch is made on the principle of an ordinary plumber's torch with a rather long pipe for the reservoir, and one that may be turned in different directions. Gasoline is a fuel and is used under pressure and mixed with air, so it is very essential that all joints be gas tight and be kept free of gasoline; otherwise serious explosions may occur.

The torch method is much the more rapid and less laborious. Experience has shown that it is well to have a good pressure in the tank and avoid using the torch in the wind as much as possible, since this materially increases the amount of singeing.

The specially prepared burners called "pear burners" may be had through one's local hardware dealer or other supply house, and cost about eighteen dollars. Estimates as to the expense of saving stock by this method are dependent upon the abundance of native cacti upon the range, the method of singeing employed, the cost of labor, (the price of gasoline and the first cost of the outfit, if the torch be used), all of which items of expense vary with the locality.

Considering the fact that we have a period of shortage of feed and water each year in the spring and early summer, and periodic recurrences of years that are drier than usual at that time, it would seem but a sensible thing for stockmen to encourage the growth of cacti upon those parts of their ranges where grass and better forage do not grow well; this to be done with the idea of preparing for the "lean year."

The easy way of planting cacti is to scatter the separate joints over the ground. They will take root without covering. The work may be done at any season of the year, though a larger per cent of the joints will root during the rainy season. This state-

ment applies to the lower and hotter southern end of the Territory.

E. O. WOOTON,

Botanist of the Exper. Sta.

MONKEY AND PARROT TIME

Peace Officers of Washington Are Having Difficult Time to Enforce New Criminal Code.

Spokane, Wash., June 28.—Peace officers of the various cities and counties in Washington are experiencing what they mildly term "a monkey and parrot time" over the new criminal code, which classes as misdemeanors such things as "tipping," cigarette smoking or having them in possession, screening saloon windows and the presence of women in places where liquors are served. Many outside of Spokane county have been arrested and fined for smoking the little paper sticks.

There are numerous opinions as to the constitutionality of the law, but the chief questions involved are: Had the commission created in 1908 by Governor Mead authority to frame a new code; and may a bill contain many subjects, when the constitution clearly provides that no bill shall contain more than one, and that must be expressed in the title.

Prominent lawyers in Spokane say that if the anti-tipping law is constitutional, then Herman D. Hunt, a justice of the peace at North Yakima, is technically guilty, from the fact that he accepted five cents' change in a case where a cigarette smoker was fined \$10 and cost, amounting to \$12.95, and, tendering \$13, remarked, "as he left the court room: 'Judge, you may keep the change.'"

Leaders of the bar are agreed that many provisions of the code are unconstitutional, and George F. Vanderveer, chairman of the commission responsible for the law, which was rushed through during the closing hours of the last legislature, believes that some changes should be made during the extra session now sitting at Olympia. Many members are disposed to repeal the law in its entirety, as they look upon it as a monstrosity, designed especially for the county prosecutors, who, it has developed, are preparing to urge even more drastic measures than are now contained in the code.

Stomach Troubles.
Many remarkable cures of stomach troubles have been effected by Chamberlain's Stomach and Liver Tablets. One man who had spent over two thousand dollars for medicine and treatment was cured by a few boxes of these tablets. Price 25 cents. Samples free at all druggists.

The seals and record books for notaries public for sale by the New Mexican Printing company at very reasonable rates. Seals for incorporated companies are also handled. Call at or address the New Mexican Printing company, Santa Fe, New Mexico.

The New Mexican can do printing equal to that done in any of the large cities. Our solicitor, every piece of work we turn out. Try our stock once and you will certainly come again. We have all the facilities for turning out every class of work, including one of the best binderies in the West.

MOON CAPTURED BY EARTH

California Astronomer Announces
That He Can Prove That By
Mathematical Calculations.

San Francisco Cal., June 28.—An announcement was made tonight by Prof. T. J. J. See, astronomer in charge of the Naval Observatory at Mare Island, that he has mathematically proved a discovery that the moon is a planet captured by the earth from space and not a detached portion of our globe. He rejects entirely the long accepted theories of Laplace and Sir George Darwin ascribing earthly origin to the moon and asserts that his discovery is supported by rigorous mathematical proof based on the methods of Hill, Poincare and Darwin.

Prof. See's announcement was made in a paper presented to the meeting of the Astronomical Society of the Pacific coast and is a further development of his discovery promulgated last January that all planets and satellites are captured bodies, which have since had their orbits reduced in size and rounded up under the secular action of the nebular resisting medium once prevailing the solar system. In his former paper presenting this theory, Prof. See showed how these bodies, which once revolved around the sun like the asteroids now do, had made circuits close about the planet like Jupiter, the sphere of the sun's control was shown to have an extension or protuberance on it, like the neck of a bottle, or hour-glass with very unequal bulbs, and when the small bodies moving about the sun came into this neck they could revolve about Jupiter, and in many cases again return to their paths about the sun. In other cases after revolving about Jupiter they would be captured by the action of the nebular resisting medium about the planet, and stay there forever as satellites.

By revolving about the planet for a long time, their orbits would be rounded up into almost perfect circles, and made smaller and smaller, till they became just like the satellite orbits are now observed to be. Such, he says, has been the origin of the satellites generally, and the rings of Saturn have had a similar origin—by the capture of waste nebulousity once circulating around the sun. When this matter is once brought in near the planet, it cannot again escape, but must stay there permanently because in the space near the planet the planet's attraction is supreme.

In the case of the terrestrial moon, however, more than unusual uncertainty existed as to how this large satellite originated and a special investigation of the problem had to be made. The moon's mass is relatively very large, about one-eighth of the earth's mass; and then Darwin's argument that the moon had once been a part of the earth had to be overcome. This Prof. See says, he has done with entire success, and he announced that he had proved mathematically that our moon too had been captured and had come to us from the heavenly spaces.

It was, he says, originally a planet like Mercury, but not quite so large, and moved about the sun at nearly the same distance as the earth. Then it came between the sun and the earth in such a way as to enter the neck of the space resembling a bottle neck projecting from the sun's sphere of control and enclosing the earth. This neck was quite small and narrow, but the bulb of space enclosing the earth and constituting its sphere of attraction was of considerable size. When the moon had once left the sun's control and gone into the bulb about the earth, it met with some resistance, and the neck became closed, so that the moon was "bottled up" under the earth's control and could not escape. Hence it has remained with the earth ever since, and will always abide with us.

By revolving about the earth in the space controlled by our planet, the moon has met with considerable resistance, and its orbit has become smaller and smaller and also rounder and rounder. Thus it has come nearer and nearer the earth, but never has been closer than at present. "Thus," he concludes, "Darwin's theory of the moon's detachment from the earth is overthrown, and an entirely new theory developed which has the support of all the highest mathematical science now known."

In a second paper communicated to the Astronomical Society of the Pacific tonight, Prof. See will explain the famous outstanding inequality of six seconds in the secular acceleration of the moon's mean motion. He said this perturbation in the moon's motion had been discovered by Halley in the time of Newton. It was partially explained by Laplace in 1787, but gravity alone would not account for the observed acceleration since the time of the Chaldeans, 720 B. C., and the outstanding difference had perplexed the greatest mathe-

maticians for more than a century. was originally captured, and was still slowly nearing the earth, Prof. See said he had removed the last difficulty, and the result would be a decided improvement in Astronomy.

SUNDAY AT THE CHURCHES

St. John's Methodist Episcopal.
A children's day program was given at this church yesterday morning. It consisted of songs and recitations by the children of the Sunday school. The church was very tastefully decorated for the occasion. As a part of the service also and making it still more impressive the rite of baptism was administered to Percy Alfred, the infant son of Mr. and Mrs. A. J. Teare.

The text at this church last evening was from St. Matthew's Gospel, the 24th chapter, and the 35th verse: "Heaven and earth shall pass away but my words shall not pass away." The subject of the sermon was "Things That Abide in the Midst of a World of Change."

After speaking of various changes which have taken place in the material; the political, the industrial and the educational world the pastor mentioned some of the changes which have taken place in religious matters and then said: When we think of all these changes we sometimes wonder if there is anything abiding. Some become fearful lest the Christian religion like the old Jewish religion is to pass away or become supplanted by a new religious system.

While it is true that some of the men made beliefs may be outgrown we will never outgrow the teachings of Jesus. Some of our denominations may pass away and ought to when they cease to teach and practice the religion taught by our Savior. But out of the wreck of denominationalism there will be builded a purer and a better church than we have ever had before.

Jesus put emphasis while here upon an old truth, a glorious and an eternal truth viz.: That there is a Divine personality called Lord and Jehovah and God and Father who is the Creator and Preserver of all things. Amid all the convulsions of the past God has never changed. In the midst of all the revolutions of the future He will remain the same. Jesus also taught that there is a Divine Providence in the world; that men are of more value in the sight of God than many sparrows. The oversight of God in the affairs of men will never cease. God's Providence is over every individual. It is over the church and the world and out of turmoil and confusion, out of trial and temptation He will eventually lead us to quietness and peace and His own universal reign in the hearts of men.

The word of God from which Jesus so often quoted and that portion which has been added as a result of His life and works and teachings will abide forever. Men's interpretations may fail. Commentaries may become obsolete but God's word will not pass away.

Before the advent of the Savior into the world men were saved by penitence and by faith in the blood of atonement and until the end of time the sinner can still be saved from his sins by penitence and faith in the atoning merits of the blood of Jesus.

The teachings of Jesus concerning holy living will in an ever increasing manner be exemplified in the lives of men. Earthly cities may pass away, nations may crumble and decay but there is a city whose builder and maker is God, eternal in the heavens. The homeless and the homeless soul may find an eternal dwelling place where the changes wrought by time will never mar our happiness.

SENTENCES PRONOUNCED BY JUDGE PARKER.

Judge Frank W. Parker at Socorro last week, pronounced the following sentences in district court:

Eduardo Vigil, assault with intent to kill; sentence, three years in the penitentiary and payment of costs.

Simplicio Salazar, larceny of a horse; sentence two years in the penitentiary, fine of \$500 and payment of costs.

Pablo Garcia, larceny of a horse; sentence, two years in the penitentiary, fine of \$500, and payment of costs.

Mannuel Chavez, rape; sentence, ten years in the penitentiary and payment of costs.

Robert Walker, handling a deadly weapon in a threatening manner; fine of \$100 and costs.

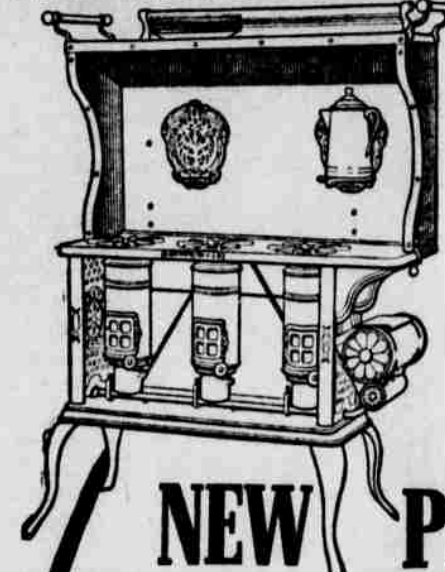

C. A. Tingley, arson; sentence, two years in the penitentiary and payment of costs.

Jasper N. Broyles, obtaining money under false pretenses; sentence, three years in the penitentiary and payment of costs.

Elmer West, larceny; sentence, one year in the penitentiary and payment of costs.

Miguel Oiguin, larceny; sentence, three years in the penitentiary and payment of costs.

Hot Stove—Cool Kitchen

How do you expect to endure the broiling days of summer if you prepare all the food over a glowing coal fire?

You need a "New Perfection" Oil Stove that will do the cooking without cooking the cook. It concentrates plenty of heat under the pot and diffuses little or none through the room.

NEW PERFECTION Wick Blue Flame Oil Cook-Stove

besides being the perfect stove for summer use is just as efficient for year round use. Does anything any other stove will do. It is built just like the modern steel coal range, with a CABINET TOP that makes it possible to keep food warm after it is cooked. Made in three sizes. Sold either with or without Cabinet Top. If not at your dealer's write our nearest agency.

The **Rayo Lamp** a substantial, strongly made and handsome lamp. Burns for hours with a strong, mellow light. Just what you need for evening reading or to light the dining-room. If not with your dealer, write our nearest agency.

CONTINENTAL OIL COMPANY
(Incorporated)

IMMENSE DE- POSITS OF IRON

Veritable Mountains of Ore That
Cannot Be Mined With Profit
for Fifty Years or More.

Spokane, Wash., June 28.—Immense deposits of iron ore have been encountered by engineers along the right of way of the Chicago, Milwaukee & Puget Sound railway, but Albert F. Flewelling, who is identified with that company and is also president of the Pacific Northwest Forest and Conservation Association, says it cannot be mined at a profit under existing conditions and probably at no time during the life of the present generation. The reasons assigned are the item of transportation, the cost of coal or coke and the lack of limestone, making it impossible to compete with the Lake Superior regions for at least 50 years. The deposits which Mr. Flewelling says, are veritable mountains of ore, are within eight miles of the Milwaukee line. Several of the deposits extend into the Coeur d'Alene reservation in northern Idaho. There is not a particle of gold visible in the prospects explored by the engineers.

OJO CALIENTE HOT SPRINGS.

These celebrated Hot Springs are located in the midst of the Ancient Cliff Dwellings, twenty-five miles west of Taos, and fifty miles north of Santa Fe, and about twelve miles from Baranco Station, on the Denver and Rio Grande Railroad, from which point a daily line of stage runs to the springs. The temperature of these waters is from 90 to 122 degrees. The gases are carbonic. Altitude 6,000 feet. Climate very dry and delightful the entire year round. There is now a commodious hotel for the convenience of invalids and tourists. People suffering from consumption, cancer, and other contagious diseases, are not accepted. These waters contain 1,626.24 grains same day. For further particulars of alkaline salts to the gallon, being address:

MINOR CITY TOPICS

Denver, Colo., June 28.—
Weather forecast for New
Mexico: Generally fair to-
night and Tuesday with station-
ary temperature.

Try our ground alfalfa meal. Best
chicken feed or earth. Leo Hersch,
San Francisco Street.

If you are looking for an up-to-date
straw hat, or Panama, buy it from
Nathan Salmon.

Marriage License—The probate
clerk has granted a license to wed
to W. M. Tucker and Concepcion Or-
tega de Luna.

FOUND—Pair gloves left in for-
tune tellers booth Plaza Fete. Owner
can get same by calling at this office
and paying for this ad.

Held for Gun Toting—Thomas Gar-
away was held under \$500 bail at
Carlsbad, Eddy county, for flourishing
a gun in a threatening manner.

Sold Liquor to Minors—Judge W.
H. Pope, in the district court at Ros-
well, sentenced Al Hawkins of Kenna,
for selling intoxicants to minors, to
fifteen days in jail and \$25 fine.

Chicken wheat at Leo Hersch's.

Murder at Lakewood—According to
the Carlsbad Current, Martin Gomez,
was brought to the Carlsbad jail last
week on the charge of having shot
and killed a native at Lakewood.

Surveying Township—U. S. Deputy
Surveyor Wendell V. Hall of this city
is surveying township No. 7, N. R. 7
E, in Torrance county. There are
quite a number of settlers on this
township.

Flood Carries Off Crops—A flood
fifteen feet high came down Rocky
Arroyo in Eddy county, last week,
and carried before it crops, trees,
headgates of ditches and outhouses. It
was caused by a cloudburst.

Onion Sets at Leo Hersch's.

Estancia Coming—On next Sunday
the Estancia baseball team will come
to Santa Fe to cross bats with the All
American team. The latter team will
play a return game at Estancia the
next day, July 5th.

It is up to you if you want the best
underwear for \$1.25, \$1.50 and \$2.00
per suit. Nathan Salmon.

Three Arrests—Yesterday the city
police made three arrests. Epimenio
Garcia and Antonio Lobato were ar-
rested for drunkenness and disorderly
conduct. Epimenio Archuleta was ar-
rested for assaulting Francisco Guti-
errez.

Noon Arrivals at the Hotels—Pal-
ace—J. F. Quinn, St. Joseph; James
Ronay, Trinidad; H. D. Lauson, Oro-
ville, California; J. O. Eaton, Cerril-
los, Claire—C. H. Bowlds, Pueblo;
G. E. Sanchez, J. E. Montoya, A. E.
Green, Procopio Sanchez, Socorro.

If you want the worth of your
money dollar for dollar, buy your
goods from Nathan Salmon.

Big Catch of Fish—E. C. Burke and
Jacob Safford caught 74 trout yester-
day afternoon in the upper Santa Fe.
They report that fishermen line the
river from the reservoir to Monu-
ment Rock. They also reported two
parties of campers above Monument
Rock. W. H. Goebel and family and
Mrs. E. A. Fiske and family. Among
others who made big catches were
H. S. Clancy and Frank Owen.

At the Opera House—Change of
pictures tonight. A handsome present
will be given away next Friday night.
Death of Infant—The infant child of
Alejandro Romero died Sunday morn-
ing at three o'clock, at the home of
the grandmother on the Loma, just
north of East Palace avenue. The
child had been ill for a long time
with marasmus. Interment took place
today.

Confesses to Outrage—Procopio Nu-
anes at Albuquerque, has confessed
that he and Florencio Pfeiffer held up
Mr. and Mrs. Majoribanks of San
Marcial near Albuquerque, locking
the man in a freight car and dragging
the woman, after robbing her, into
the bushes a quarter of a mile away,
tearing her clothes from the body,
when according to Nuanes, Pfeiffer
outraged her. Majoribanks has iden-
tified Pfeiffer, who is under arrest, as
one of her assailants.

Drowned in the Surf—Miss Irene
Whitmore of Las Vegas, who with her
mother has been spending the sum-
mer in California, was drowned Sat-
urday afternoon at Long Beach, ac-
cording to a telegram received by
friends here late Saturday evening.
She was the daughter of Adin H.
Whitmore, and upon her return was
to have married Richard Devine of
the San Miguel National Bank and
who left Las Vegas on Friday to visit
his fiancée when overtaken by the
sad news he returned to the Meadow
City.

Some merchants advertise a special
sale for week or 10 days. We have
special sales for 365 days in the year.
We have the stock to back us. Come
and see. Nathan Salmon.

Barbarita Ortega—Mrs. Barbarita
Ortega, aged 70 years, died yesterday
afternoon at her home at the corner
of Hillside avenue and Arroyo Sals.
Death was from old age. She is sur-
vived by two grand sons and two
granddaughters, Pedro G. Ortiz, Jose
R. Ortiz, Francisquita Ortiz and a
Sister of Loretto at Socorro. Only a
week before, a daughter died in this
city. A son, Venceslao G. Duro, lives
at Las Vegas and will be here to
attend the funeral tomorrow morn-
ing, which will take place from the
Cathedral, with interment in Rosario
cemetery.

Thompson-Wright—Last Saturday
evening at the Methodist parsonage,
Rev. E. C. Anderson united in mar-
riage Maurice Thompson of Espanola

and Miss Meribel Wright of Des
Moines, Iowa. The groom who recent-
ly came to New Mexico from Boston,
Massachusetts, purchased one of the
finest fruit and alfalfa ranches in the
Española valley. The bride has been
for a number of years the secretary
of the Young Woman's Christian As-
sociation at Des Moines. Both are
excellent young people and their
many friends wish them much happi-
ness.

Serene June Weather—June re-
mains serene and the maximum tem-
perature continues fluttering about
the 80 mark although it has thus far
at no time reached 87. For tomorrow
fair weather and stationary tempera-
ture are predicted. Yesterday, the
maximum temperature was 84 de-
grees, on Saturday it was 85 degrees.
The minimum yesterday was down to
57 degrees and the night, as always
in summer, are very comfortable.
The relative humidity at 6 p. m. yester-
day was only 15 per cent, and on
Saturday only 14 per cent. During
last night, the wind attained a velo-
city of 30 miles an hour.

At Elks' Opera House—The follow-
ing are the titles of the moving pic-
tures which will be shown at the Elks'
opera house beginning tonight: "The
Test," "A Suffragette's Dream," "Old
Heidelberg," "Magic Love." Morri-
son's orchestra will furnish music,
which alone is worth many times the
price of admission. Ten cents admits
you to the balcony and fifteen cents
to the lower floor. Show begins at 8
o'clock and but one show will be
given. Come out and see some real
good pictures.

A DAY OF ACCIDENTS
Yesterday the God of Mishaps Ap-
peared to Be at Work For Quite
a Number Were Reported.

Early Sunday morning C. J. Bacon
the ice man attempted to drive his
heavily laden vehicle over the tracks
of the New Mexico Central railroad
near the depot. Men who had been
at work carelessly forgot to replace
the heavy boards that lead up to the
tracks and in their place had thrown
a pile of dirt. As Bacon started to
drive across the wagon because of
its heavy load sank into the earth and
then caught in some manner against
the tracks, the horses jumping for-
ward suddenly and breaking the front
part of the wagon away from the rest
and otherwise damaging it. Bacon
was nearly thrown on his head and
the ice was scattered all about and
broken into small pieces. Bacon was
much wrought up over the matter and
says he will make the railroad men
suffer for their negligence.

Buggy Turns Over.

While driving up in the mountains
with his family yesterday W. S. Da-
vis, cashier of the U. S. Bank and
Trust Company attempted to turn the
horse about, but owing to the steep-
ness of the road, the buggy turned
completely over spilling the occu-
pants. Fortunately no one was hurt
in the least.

Just above Monument Rock in the
Santa Fe canon, three boys driving in
a buggy met with a minor mishap.
The occupants of the rig were John
Roberts, Edward Cartwright and
George Cartwright. The bolt connect-
ing the body of the buggy with the
spring came loose and fell out making
it impossible for the boys to drive
farther. A young native was given
the horse to ride upon and dispatched
to the city for aid.

About midnight the horses attached
to a bus load of returning excursion-
ists became wild and ran away. The
driver, however, checked them be-
fore any damage was caused.

A CHANCE FOR
THE HUMANE SOCIETY

Animals of the Brute World Not Re-
ceiving the Best of Treatment
in Santa Fe.

Considerable comment has been
aroused lately by a number of acts of
cruelty that have been taking place
around the Plaza and in the streets.
A number of citizens complain that
time and again park policemen in the
Plaza have been observed to sneak up
upon sleeping dogs (canines having no
business in the Plaza) and brutally
clubbing the animals, upon the head in
some cases knocking them senseless.
Witnesses of such occurrences state
that the policemen could easily scare
the dogs away instead of resorting to
such inhumane methods. Bitter com-
plaint is also being made about the
mistreatment of burros used for carry-
ing wood to the city. Owners of many
of the burros carry a long piece of
lead pipe and at times unmercifully
beat the poor patient animals.

SIX THOUSAND MINERS WALK OUT

Two of Kansas Operators Give in to
the Demands of Their Em-
ployees Near Pittsburg.

Pittsburg, Kan., June 28.—Six thou-
sand miners in the North Pittsburg
field quit work today. No strike has
been called but the men decided to
quit work pending the settlement of
the check-off dispute. A break in the
ranks of the operators occurred today
when two companies said they would
accede to the miners demands.

Dr. Clifford F. Losey of East Las
Vegas, N. M., eye, ear, nose and throat
specialist, will be at the Palace hotel
July 1st, 2nd and 3rd.

PLAN EXTENSIVE IRRIGATION PROJECTS

Lake Charette Reservoir and Ditch
Company Expending Large Sums
of Money.

The Lake Charette Reservoir and
Ditch Company, whose application for
the segregation of 10,070 acres of
land under the Carey act, was grant-
ed by the Carey Act Board on Satur-
day, as reported in the New Mexican
plan to expend a large sum of mon-
ey in the development of this and
other projects. The headquarters of
the company are at Springer, C. Hart-
ley, is president and C. F. Hortenstein
being secretary. The land which will
be segregated lies in Colfax and Mora
counties. It is the intention to build
five large reservoirs with a total ca-
pacity of 32,800 acre feet, this to-
gether with the necessary ditches to
cost over three hundred thousand
dollars. Within the next ninety days
work will commence on the first of
these reservoirs, this one to have a
capacity of eighteen thousand acre
feet or more than enough to irrigate
the 10,000 acres segregated under the
Carey act. It is planned, however, to
also irrigate private lands. The first
reservoir with its attendant ditches
will alone cost about \$100,000.

Irrigate Other Lands.

The same officials are also connect-
ed with the Palo Blanco Irrigation
scheme in Union county where they
plan to irrigate twenty thousand acres
of land mostly private. They are also
connected with the Pinebetas Irriga-
tion Company, which will irrigate six
thousand acres of land in another por-
tion of Union county, all the lands
being private. The building of nec-
essary reservoirs and ditches for this
latter project is an assured fact. D.
N. Hartley of Springer is the engineer
in charge of the work of each com-
pany.

LO, HOW THE MIGHTY HAVE FALLEN

Dan Padilla's Pets Achieve a Record
for Garnering a Plentiful Supply
of Goose Eggs.

Report has been received from Al-
buquerque to the effect that the me-
tropolis is in a state of mourning, the
result of a terrible calamity which
occurred yesterday. And to make
matters worse, an aggregation from
Santa Fe is blamed for it all. It ap-
pears that the champion diamond
warriors of the wind and sand blown
city headed by their intrepid
leader Dan Padilla had the temerity
to face a bunch of Santa Fe's "Sons
of the Horsehide" who had in their
midst McCarthy, the Doc, otherwise
known as "The Mighty." What en-
sued is too awful to contemplate, Doc,
the Puzzler, it is said, was contempti-
ble enough to shoot the leather pel-
let over the pan in places where the
willows of Padilla's sluggers were not,
while the big stick brigade from
Santa Fe were likewise discourteous
in that they hampered the delivery
of Albuquerque's best to spots of
the diamond where the fielders were
not. Without ceremony, in fact,
without even asking Dan Padilla's
permission, the Santa Feans helped
themselves to seven pieces of prop-
erty known as runs, giving nothing in
return. The last seen of Padilla's
Stars, they were disappearing through
a knot hole in the fence, disguised
as goose eggs. Thus were the mighty
laid low even in the midst of their
friends.

ITALIAN REFUSED TO SALUTE OLD GLORY.

Galveston, Texas, June 28.—The
Italian cruiser Strurla has given of-
fense to the United States revenue
cutter Windom by ignoring the lat-
ter's salute as the man-of-war steam-
ed into port for a six-days visit.

The commander has also aroused
the severest criticism by refusing to
hoist the Stars and Stripes while in
port.

It was stated that while the Italian
naval vessel could not be compelled
to fly the American flag, as a matter
of international courtesy all naval
ships fly the flag of the country in
whose port they happen to be.

The Italian flag was run up and it
was feared the commander was going
to hoist the American flag be-
neath it, but he said:

"Never fear," and he has not raised
"Old Glory" although 24 hours in port.
When asked for an explanation the
commander refused to discuss the sub-
ject.

The Windom had prepared to give
the national salute, but when its

greeting was ignored the salute was
not fired.

The Italian commander did not ev-
en visit the Windom, although in
paying the customary formal calls up-
on the mayor of the city and the gov-
ernment army representative here,
he also visited the Mexican war train-
ing ship in port and called upon its
commander.

MURDERER SENTENCED WITHIN TWENTY-FOUR HOURS.

Early Friday morning at Tierra Am-
arilla, Policarpo Jaramillo murdered
an inoffensive old man named Jose
De Los Angeles Martinez, formerly of
Chimayo, Santa Fe county, by kick-
ing and trampling his head beyond
recognition and otherwise mutilating
his body.

The murderer said that the old man
was annoying him by asking leave to
let him sleep in his house and he kill-
ed him for this.

In less than 24 hours from the
time Jaramillo committed the unprov-
oked murder, Judge McFie had
sentenced him to serve 99 years in the
penitentiary.

MARKET REPORT

MONEY AND METALS.

New York, June 28.—Prime paper

\$5.00 Reward—For return of bunch
of 12 or 14 keys with name plate, Ar-
thur Boyle, Santa Fe, N. M. No ques-
tions asked. Return to this office.

Sore Nipples.

Any mother who has had experi-
ence with this distressing ailment
will be pleased to know that a cure
may be effected by applying Cham-
berlain's Salve as soon as the child
is done nursing. Wipe it off with a
soft cloth before allowing the babe
to nurse. Many trained nurses use
this salve with best results. For sale
by all druggists.

The New Mexican Printing Com-
pany has on hand a large supply of
pads and tablets suitable for school
work, the desk, and also for lawyers
and merchants; good everywhere. We
will sell them at 5 cents in book form.
