# SANTA FE NEW MEXICAN

VOL. 46.

SANTA FE, NEW MEXICO, TUESDAY JUNE 29, 1909.

NO. 117

## MECHEM WILL BE CONFIRMED

### Judge Cooley Has Returned to the Territory

## OIL COMPANY INCORPORATED

### Mounted Policeman Beal Makes Two Arrests at Alma.

All objections having been withdrawn, it is quite likely that by next week, Hon. M. C. Mechem's nomination to be an associate justice of the supreme court of New Mexico, will be confirmed by the Senate.

Judge A. W. Cooley arrived at Raton yesterday from Washington, D. C., and was in Las Vegas today. He will arrive here tomorrow to attend the special session of the supreme court on Thursday. It is very likely that Alamogordo will be his headquarters and that Judge Mechem will be assigned to Socorro.

**Arrests by Mounted Police.**

It was reported at the headquarters of the Territorial mounted police today that Mounted Policeman John A. Beal has arrested "Tuck" and "Pad" Holliman at Alma, Socorro county, on the charge of larceny of cattle. The prisoners were turned over to Sheriff Geronimo Sanchez, who lodged them in jail at Socorro.

**Clean-Up Day.**

Governor Curry has promised the Woman's board of trade the use of the entire force of convicts at the penitentiary for a day or two to clean up the town from one end to the other. This is much needed and desired for from conspicuous manure piles in the very heart of the city to rubbish piles on vacant lots, the city is in the most unsanitary condition possible. The clean-up should take place before July 4th.

**Incorporation.**

Incorporation papers were filed today by the Giant Oil and Gas Company of Roswell, Chaves county, with capital of \$500,000 of which \$2,500 is paid up. The capital stock is divided into 500,000 shares. The incorporators and directors have each subscribed to 500 shares and are the following: Herbert J. Hagerman, W. C. Reid, Edgar Salfie of Roswell; J. S. Howell and W. C. Lawrence of Lake Arthur. The company will drill for oil in the lower Pecos valley.

**Fire Company Sued.**

Service of summons was had today upon Insurance Commissioner Jacobo Chaves, for the Germania Fire Insurance Company of New York and the American Central Insurance Company of St. Louis, in a suit by Luis Lujan of Tucumcari, to recover on a policy for \$800 in the former and \$700 in the latter.

**Suit Involving Lands.**

Judge John R. McFie has issued a temporary injunction against A. R. Manby and the Taos Valley Land Company to restrain them from disposing of the interests of the company until an accounting is had and claims of the plaintiffs, Martha S. Hill, Charles H. Hill, Alexander F. Prescott and Mary R. Prescott, who paid \$50,000 for 200,000 shares in the defendant company, of which, Defendant A. R. Manby is alleged to have claimed control and of which he and his brother, J. B. Manby, are officers. Misuse and misappropriation of funds are alleged by plaintiffs, in addition to misrepresentation and manipulation of company funds and company lands, which are claimed to include 20,000 acres in the Antonio Martinez grant. The suit was brought in the district court for Taos county and the allegations of the plaintiffs are very interesting and even sensational.

## BLIND CUES IN SIGEL MURDER

### Solution of Problem Seems Far Off But Fifty Detectives Are Very Busy.

New York, June 29.—A police cord thrown about a comparatively narrow territory comprising Patterson, Passaic, Hackensack and other neighboring towns in New Jersey, is today tightening around a number of Chinamen among whom the police hope to find a trace of Leon Ling, the supposed slayer of Elsie Sigel. Fifty of the best detectives have been placed in this territory which leads to the belief that the police have information which has not yet been made public. The mystery surrounding the murder of Miss Sigel and the disappearance of Leon seems no nearer to solution. The detectives have run down the clue concerning the removal of a trunk to a laundry in Harlem but found only an empty building.

## BURGLARS ON THE INCREASE

### Two Stores Broken Into Last Night

## BOLDEST ROBBERY TO DATE

### Enter Fischer's Drugstore and Kaune's Grocery Securing Money and Stock

Some time last night a robbery took place that is to date the most bold and brazen ever attempted in Santa Fe. The places broken into were H. S. Kaune's grocery store and A. J. Fischer's drug store. The intruders pulled off the iron bars protecting a rear window in the store room back of the grocery and entering the store room battered down the door leading into the grocery.

**Secure Cash and Groceries.**

Once in the store the night prowlers helped themselves to the cash in the register and in the tills and likewise carried off a good supply of groceries and several boxes of cigars. A thorough inventory will be necessary to ascertain just how much of the stock they really got away with.

**Attempted to Open Safe.**

The safe in the office showed from its condition that a chisel had been used in an effort to force it open. The brass knob is badly dented and cut, while all around the lock are dents caused by the hammering. The work appears to be that of amateurs. That the robbers took their time and had no fear of interruption was evident from the fact that they had sat down to feast on a watermelon the remnants of which they left lying upon the floor.

**Got Into Drug Store.**

After putting the finishing touches in so far as they were capable, to the job at Kaune's, the marauders forced a rear window of the Fischer's drug store and entered that place. Here they rummaged through everything in sight. They succeeded in securing considerable loose change left in the till and helped themselves to a supply of postage stamps.

As in the case of Kaune, a thorough inventory of the stock carried will be necessary to find out how much they got away with.

**Missed a Good Thing.**

In their anxiety or carelessness, the thieves overlooked a bet when they left severely alone the large safe in the Fischer drug store. In the safe was over seven hundred dollars in cold cash, the proceeds of the opening performances at the Elks' theater. Had the law breakers been aware of this fact they would have in all probability made every effort to break open the safe.

**Mounted Police on Hand.**

This morning the mounted police looked carefully over the place where the robbery was committed and they are now on the trails of the guilty ones. When caught the culprits will be shown no mercy.

## BUSY TERM OF COURT

### Judge John R. McFie Talks Very Glowingly of the Attractions of Rio Arriba County.

Judge John R. McFie, who has just returned from Tierra Amarilla, where he held two weeks' court, cannot speak too highly of the hospitality of the people of the county seat of Rio Arriba. That part of New Mexico is gradually attracting new settlers. It has the finest grazing country in the Southwest. The Chama and the Brazos are running bank full and there is still considerable snow in the mountains. The term of court was a very busy one, but the criminal business was mostly of minor nature. The last verdict was brought in on Saturday at midnight. Only two penitentiary sentences were imposed. Policarpo Jaramillo, who murdered an aged man at Ensenada one night was indicted and sentenced for life by three o'clock the following afternoon.

The court party enjoyed trout dinners almost every day as trout fishing in the Brazos and other streams is very good this year.

## TWO BLACK HAND SUSPECTS BOUND OVER.

Cleveland, Ohio, June 29.—George B. Joseph Nuzzo, the local black hand suspect was bound over to the grand jury today, waiting an examination. Pippino Galbo demanded a hearing. He was asked to join the order of the Banana by Sam Lima of Marion, Ohio, who it is believed is the head of the black hand. Galbo was also bound over to the federal grand jury.

## TAFT AS JUDGE OF WHISKY

### Hears Abstruse Arguments on Mo- mentous Question

## SWELTERING IN THE SENATE

### Aldrich Insists That Main Tarriff Bill Be Disposed of First.

Washington, D. C., June 29.—In the sweltering heat of the cabinet room, Taft today sat in judgment and heard arguments of whisky experts and their lawyers on the subject: "What is whisky?" The entire time previous to the regular cabinet meeting was consumed in listening to arguments on exceptions made to the opinion of Solicitor General Bowers, covering the phases of the controversy. The "straight whisky" representatives directed their principal arguments against Bowers' contention that neutral spirits mixed with whisky may be sold under the pure food law as whisky but agreed that the neutral spirits are not whisky.

**Buckets of Lemonade.**

Washington, D. C., June 29.—Many people defied the torrid weather this morning to come to the Senate to hear the opening battle over the income tax amendment. The buckets of lemonade in the cloak rooms were often visited by the members and each was given a palm fan as he entered. Senator Brown brought up the question, but Aldrich immediately said the Finance Committee had determined that the main tariff bill should be completed before amendments are taken up and he would move to table any amendment brought up at this time.

**Aldrich Will Support Corporation Tax**

Washington, D. C., June 29.—Senator Aldrich, in course of an answer to questions today, said he would support the corporation tax amendment as a means of defeating the income tax. He expressed the opinion that the tax would be repealed after two years or the rate materially lowered. After some argument Tillman's amendment providing a duty of ten cents a pound on tea, was defeated by 55 to 18.

All this is but preliminary and when the tariff bill is taken up, the income tax will be put aside to enable Mr. Tillman to argue an amendment on tea, for the purpose of compelling the schedules before the tax is taken up. Tillman lost no time in taking up the tea schedule and asking ten cents a pound for it. He declared this ought to be done to protect the tea growers of South Carolina, who, he said will soon be able to furnish enough tea for America and even ship some. He declared there is an enormous profit now and with duty, America can grow its own tea. Dixon suggested a bounty if that was the case, but Tillman said he would accept no bounty, even if a dollar a pound. He would not be caught in such a trap and wanted protection for the whole country and not a bounty for his own state.

Senator Aldrich made the statement during the argument over the tea tax. The corporation tax and the income tax could not be kept out of the debate. It was in response to a direct question from Clay, that Mr. Aldrich told bluntly his position on the income tax. "I shall vote for the corporation tax as a means of defeating the income tax. I shall be perfectly frank, I shall vote for it for another reason. The income of the government will show a deficit of sixty million this year; next year it will be forty-five million. I am willing that the deficit shall be taken care of by the corporation tax, but at the end of two years it should be reduced or replaced." He said a permanent form of direct taxation was sure to destroy the protection system.

**Census Bill Goes to President for Signature.**

Washington, June 29.—An agreement on all the disputed points in the bill providing for the census was reached by the conferees of both houses of Congress and their report was accepted by the House and Senate leaving nothing but the signature of the president to make it a law. The most important provision of the bill is one pertaining to the general civil service and not especially to the census. This provision rules that hereafter all examinations of applicants for positions in the government service from any state shall be conducted in the state in which such applicant resides, and that persons taking the examinations shall have been actually domiciled in the state for at least a year previous to examination. The provision is intended to prevent the

## NIGHT RIDERS AT TUCUMCARI

### Temperance Advo- cates Make Clean Sweep of Saloons

## THEN SHOOT UP DANCE HALL

### In the Panic That Ensued Several Women Fainted.

Tucumcari, N. M., June 29.—A band of night riders, believed to be temperance advocates, rode into two saloons last night and shot the bar fixtures to pieces and destroyed the liquor after which they rode into a dance hall where they broke up the merry-making causing a panic. Several women fainted. The raid is the result of an effort to stamp out rum selling.

## NEEDED IN SANTA FE TOO

### Protective Association Formed at Albuquerque to Prevent Depre- dations By Vandals.

A mass meeting of the members of the Sacred Heart parish was held in the Sacred Heart school building at Albuquerque last night, at which preliminary steps were taken looking towards the establishment of a permanent organization to be known as "The Sacred Heart Parish Property Protective Association." The meeting was held as the result of depredations committed at the school last Thursday afternoon, evidently by young boys. The school was entered and teachers' desks broken into, ink spilled all over the floor, "black hand" written on the blackboard and four lighted candles left in the rooms. Fortunately the candles were discovered before a fire resulted.

## SECRETARY OF BUREAU MARRIED

### H. B. Henning, Formerly City Editor of Albuquerque Morning Journal Weds Illinois Girl.

Horace B. Henning, secretary of the Bureau of Immigration, was married yesterday morning at the home of the bride's parents in Jacksonville, Illinois, to Miss Virginia Hockenhuil, daughter of Mr. and Mrs. Robert M. Hockenhuil. The ceremony was performed in the presence of a few immediate relatives of the bride and groom by the Rev. Dr. Roswell G. Post. The bride and groom left immediately after the ceremony for Albuquerque and will make their home in that city.

## EL PASO DOCTOR ARRESTED

### Charged With Perjury and Throwing Constable With Attachment Off Yacht.

Los Angeles, Calif., June 29.—Dr. Frank Bell, of El Paso, who accused A. P. Sanger, his wife's brother, and O. P. Widaman, his attorney of having shot him, was arrested yesterday on the charge of perjury growing out of the case nearly a year ago. Bell is also charged with having thrown a deputy constable out of his yacht, when the latter came to serve an attachment. Bail was fixed at \$4,000.

## BRANDENBURG AC- QUITTED RE-ARRESTED

### Charged With Kidnaping the Step-Son of James Cabanne of St. Louis, Missouri.

New York, June 29.—Broughton Brandenburg was acquitted today on the charge of grand larceny, growing out of the sale to the New York Times of an article purporting to have been signed by Grover Cleveland. He was at once arrested again on the charge of kidnaping the step-son of James Cabanne in St. Louis.

## MORE DAYLIGHT FOR CINCINNATI

### Hands of Clocks Have Been Turned Back One Hour By Municipal Ordinance.

Cincinnati, June 29.—The city council gave official sanction to the "more daylight" movement by passing an ordinance providing for moving the clock back one hour during the months of May to September, inclusive. It is believed that Cincinnati is the first American city to change working hours during the summer months, along the lines introduced in numerous European countries.

## PITTSBURG IS HAPPY TODAY

### Mayor Magee Has Settled Street Car Strike

## BOTH SIDES CLAIM VICTORY

### Heavy Loss to Business and to Other Interests.

Pittsburg, Pa., June 29.—Pittsburg is happy today because the people do not have to walk down town. The street car strike which for two days tied up traffic causing demoralization to business, was ended last night with a conference between the company officials and the leaders of the union. The loss to the city has been large, wages to car men, loss in fares to the company, loss in trade to department stores, and general standstill of business. The union claims it has gained their point in everything while the company claims the same thing. Mayor Magee who brought about the agreement, says nothing, but that there will be no trouble in Pittsburg for many years to come.

Excepting one point which will be arbitrated later the differences were adjusted at a conference before Mayor Magee last night as follows: The number of short runs to be reduced to fifty per cent; the men withdraw objections to emergency runs; Sunday runs not to be longer than week day runs; two discharged employees to be given a hearing; that the conductor who lost his seniority be restored.

## NO USE TEACHING GREEK TO AMERICANS

### President Hadley Thinks It is Love's Labor Lost and Not Worth the Time.

New Haven, Conn., June 29.—There is no use trying to teach Greek to American youth, is practically the decision of President Hadley of Yale University in his annual report today to a meeting over which Forester Gifford Pinchot presided.

Hadley declared that the best educators in Europe and America declared that the study of Greek takes more time than it is worth. He said the American public don't care to have its sons taught Greek and the colleges cannot teach things to people they don't want.

## LED 60,000 TO PLEDGE ABSTINENCE

### Grand Old Catholic Bishop Who Cham- pioned Temperance Cause Goes to His Reward.

Winona, Minn., June 29.—Bishop B. Cotter, 65 years old, of the Catholic diocese of Winona, died at his home here. In the early eighties he was for several years president of the Catholic Total Abstinence Union of America.

As a result of his letters Bishop Cotter secured about 60,000 pledges for total abstinence. He was one of the leading Catholic workers in the northwest.

## WOOL PRICES CONTINUE HIGH

### Demand By Manufacturers Less Heavy and Therefore There is Decline in Sales Reported.

Boston, Mass., June 29.—The local wool market is apparently awaiting indications of future prices of finished goods, and sales have been less heavy than the previous weeks. Prices are still high, however, and with the fabric situation settled, it is expected, that there will be resumption in buying by manufacturers. New territory is moving steadily with Montana selling at 27 1-2 to 28 in grease or 72 to 73 scoured.

## PARIS JEWELER SUES FOR \$20,875

### Expects Howard Gould to Pay for Jewels Bought by Wife While She Was Abroad.

New York, June 29.—An echo of the Mrs. Katherine Clemmons Gould's suit for divorce was heard today when argument was heard and decision reserved by Justice Blanchard on a motion to set aside the previous order for Mrs. Gould's examination before trial in a suit brought by Cartier, the Paris jeweler, to recover \$20,875 from Howard Gould for jewelry claimed to have been purchased in France by Mrs. Gould.

## RELIEF FROM HEAT IN SIGHT

### Weather Bureau Promises Drop in Temperature

## AWFUL SUFFERING IN EAST

### Western Man Commits Sui- cide in Pennsylvania Be- cause of Sultriness.

Washington, D. C., June 29.—Relief for the intense heat is in sight, according to the weather bureau today. It will be cooler in the middle Atlantic states tonight and Wednesday. A general change to cooler is in progress in the northeastern states, the lake region and the northwest. In the middle west and the southwest the temperature continues high.

**Ten Deaths From Heat at Chicago.**

Chicago, Ill., June 29.—Ten deaths superinduced by the excessive heat, were reported to the police yesterday. Numerous cases of prostration have been reported to the police today.

The latest fatality reported was the death of Police Sergeant Bernard Buckholz, who died at his home. Carl Sommers jumped into Lake Michigan while temporarily insane. He was rescued, but died at a hospital.

**Two Hundred Death Due to Heat.**

New York, June 29.—Two deaths were added to the long list of temperature victims. There were a score of prostrations. The maximum temperature was 86 but the humidity was great. Summing up the results of the heat wave, Health Commissioner Darlington in his weekly mortality report, today noted an increase of nearly 200 deaths over the corresponding period last year.

**Scorching in Indiana.**

Indianapolis, Ind., June 29.—Two deaths and many prostrations from the heat occurred yesterday. The maximum temperature in this city was 88 degrees, but in Southern Indiana it reached 97 degrees.

**Nine Added to Death Roll in Philadelphia.**

Philadelphia, Pa., June 29.—Nine more deaths were added yesterday to the list of heat victims in this city. This makes the total for the present hot spell more than forty. The humidity today was 91, while the maximum temperature was 90.

**Four Drop From Heat in Cleveland.**

Cleveland, O., June 29.—One man died, one attempted to commit suicide, and four were prostrated due to the heat here. The highest temperature was 90 degrees, but the humidity was intense, reaching 89 during the afternoon.

**Insufferably Hot at Denver.**

Denver, Colo., June 29.—"Whew! 103 degrees in the shade!"

"That is the highest ascension I have made in many years," said the advertising thermometer under an awning on Sixteenth street yesterday. "I have taken some high trips," the tube continued, "but in all the days of my heat-telling career, I have never been so close to boiling point, especially at this time of year."

Pueblo and Grand Junction suffered the greatest from the heat of any of the western cities.

**Hottest Days for Years.**

Greeley, Colo., June 29.—Yesterday was the hottest day of the year. The thermometer registered 98 degrees in the shade from 11 to 3:30 o'clock.

**Flood at Des Moines.**

Des Moines, Ia., June 29.—A cloudburst yesterday swept half a dozen residences from their foundations, flooded cellars and reached a depth of eight inches on the floors of dwellings and tore up a half mile of Chicago & Northwestern tracks at Vail.

A large livery barn was carried 200 feet down the main street and left standing across the thoroughfare. Sidewalks were swept away and the damage will reach \$50,000. In places the water is two and three feet deep in the middle of the principal streets.

**Killed Himself on Account of Heat.**

Allentown, Pa., June 29.—Suffering physically and mentally from the effects of the heat, William Hiskey, aged 62 years, formerly of Oakland, California, committed suicide by hanging. His widow lives in Oakland.

## NO REVOLUTION IN HONDURAS

New Orleans, La., June 29.—No confirmation of the pending revolution in Honduras is obtainable from American Consul W. A. Brickwood, who arrived here last night from Puer to Cortez. He declined to discuss the situation in Central America. Other passengers from there say that while there is unrest, a revolution is improbable.

## THE DAILY ROUND UP.

### LOOK ALOFT.

(By Jonathan Lawrence.)

In the tempest of life, when the wave and the gale are around and above, if thy footing should fall, if thine eye should grow dim, and thy caution depart, "Look aloft," and be firm, and be fearless of heart.

If the friend, who embraced in prosperity's glow, With a smile for each joy and a tear for each woe, Should betray thee when sorrows like clouds are array'd, "Look aloft" to the friendship which never shall fade.

Should the visions which hope spreads in light to thine eye, Like the tints of the rainbow, but brighter to fly, Then turn, and, through tears of repentant regret, "Look aloft" to the sun that is never to set.

Should they who are dearest, the son of thy heart, The wife of thy bosom, in sorrow depart, "Look aloft" from the darkness and dust of the tomb, To that soil where "affection is ever in bloom."

And, oh! when death comes in his terrors, to cast His fears on the future, his pall on the past, In that moment of darkness, with hope in thy heart, And a smile in thine eye, "look aloft" and depart!

### Moriarty Wins From Estancia.

Moriarty defeated Estancia Sunday afternoon on Moriarty grounds by a score of 7 to 3. With the exception of the first and seventh innings both teams played firstclass ball. White started the twirling for Moriarty but was a trifle wild, however he pulled himself out of a tight hole in the first after walking one man and hitting another. G. Johnson relieved White in the third and had the Estancia batters completely at his mercy, allowing one run during the remainder of the game. In the seventh hits by Hays, White and Ellwanger, together with three errors netted Moriarty four runs. Hays and G. Johnson for Moriarty and Terry and Scott for Estancia carried off the honors in the field and at the bat.

## NO REASON FOR IT.

When Santa Fe Citizens Show the  
 Certain Way Out.

There can be no just reason why  
 any reader of this will continue to  
 suffer the tortures of an aching back,  
 the annoyance of urinary disorders,  
 the dangers of diabetes of any kidney  
 ills when relief is so near at hand  
 and the most positive proof given that  
 they can be cured. Read what a  
 Santa Fe citizen says:

Jose Ortiz y Baca, Alto street, Santa  
 Fe, N. M., says: "I derived benefit  
 from Doan's Kidney Pills which gives  
 me just cause to vouch for their effi-  
 ciency. At intervals for three years  
 I was more or less troubled by pains  
 in my back, and seeing Doan's Kid-  
 ney Pills highly recommended for  
 this complaint, I procured a box at  
 Stripling & Burrow's drug store. Af-  
 ter using them as directed a short  
 time I was relieved."

## FROM SANTA FE TO SEATTLE

### A Lesson in Enter- prise and Progres- siveness

### MAKING MOST OF ADVANTAGES

### What Santa Fe Might Do In the Light of What Paci- fic Coast is Doing.

(By A. H. Brodhead.)

To those of us who have gathered  
 round the camp fire underneath the  
 starlit heavens, drinking in stores of  
 reserve energy that seem part of the  
 pine-laden air, the very real attrac-  
 tions of progressive cities, are those  
 to be enjoyed for a season, the abid-  
 ing heart-ease is in the open by the  
 camp fire. In the Grand Canon of  
 the Colorado river we have one of  
 the world's colossal nature wonders.  
 It has the real call of the open, but  
 its beauties may be enjoyed by the  
 traveler surrounded by every com-  
 fort and convenience of an up-to-date  
 city hotel. How often has it been  
 urged: "Santa Fe can never grow, it  
 has not water enough to support a  
 population." Every ounce of water  
 used in the El Tovar, the Grand  
 Canon's famous hostelry is transport-  
 ed in tank cars from the vicinity of  
 Williams. In this day of American  
 energy, an achievement is planned.  
 Natural conditions are forced to fit  
 the thing planned.

### The Grand Canon.

But what of the canon—the sombre  
 grandeur of it all, the countless ages  
 it represents. Think of a rock rent  
 that nature has made thirteen miles  
 from rim to rim and 4,000 feet deep  
 from which wells up that blue, mys-  
 terious haze. We have something of  
 the same mystery in that impressive  
 opening scene in "Ben Hur." The  
 three camels, their eastern riders,  
 motionless, likewise the star and all  
 wrapped in that inscrutable blue haze.  
 It opens up to us a region so far be-  
 yond and above the petty small things  
 of this life, that we stand humbled on  
 threshold of mysteries, the forces of  
 which the Almighty rules. The El  
 Tovar, a Log Cabin Inn, in size in  
 keeping with the canon on whose  
 brink it is situated. Built of the  
 pine logs of the surrounding forest—  
 rich, complete and in touch with na-  
 ture as she is here represented. Our  
 American artists have honored places  
 on its walls. An Indian heard by Bert  
 Phillips of Taos is there, the art room  
 has many pictures of merit and Mo-  
 ran's painting, as illustrated at night,  
 is a scene long to be remembered. Ap-  
 pelton's for June, contains McCut-  
 cheon's sketch with caricatures for  
 those who enjoy a half hour's amusing  
 reading.

### Arizona's Problem.

Leaving the Grand Canon, we find  
 the problem of Arizona that of New  
 Mexico, how shall barren be turned  
 to productive land. To the solving of  
 this problem we must overturn our  
 energies—earnest research and pa-  
 tience will eventually solve it. The  
 orange, lemon and olive groves of  
 the Pacific coast, the flowers in won-  
 derful profusion and beauty, the  
 marine gardens with their finny in-  
 habitants are all objects of interest  
 and beauty to the eye that has never  
 before beheld them. Los Angeles a  
 city of snap and vim with continued  
 growth on all sides. The chief asset  
 of any locality is the use of its natural  
 advantages, attractively, but wide  
 streets, well parked or planted to  
 trees are an attractions in any com-  
 munity.

### The Pacific Coast.

The wonderful cultivated suburbs of  
 Los Angeles abound in the beauties  
 of lawn and garden. San Francisco  
 with indomitable energy has nearly  
 recovered from her disaster, still  
 scarred, but the replaced districts  
 larger and finer than ever. In making  
 the ocean trip from Frisco to Portland  
 to those who love the water, old ocean  
 comes as an old friend, re-  
 plete with its many attrac-  
 tions of fresh air, beauty of out-  
 look and cloud effects. The Columbia  
 river from its mouth to Portland, a  
 river of great natural beauty, wooden  
 to the water's edge, and as this season  
 the water is very high, some of the  
 trees are half submerged. Salmon  
 fishers by the hundreds dotted the  
 mouth. They were in open 20 foot  
 boats with square sails, laden with  
 nets and these seemed to cover the  
 entire mouth of the river except the  
 channel. Astoria, old John Jacob As-  
 tor's namesake, the first town on the  
 river, located on a hill with its main  
 business streets plank walks and built  
 on piling. It seems ridiculous in-  
 deed that with miles of surrounding  
 virgin forest, that land claimed by  
 the river should be converted into  
 business streets, but such is the case,  
 and this condition is again seen in  
 Seattle. From this point all the way  
 to Portland it is a beautiful broad  
 winding river, its banks clothed with  
 verdure, and serving, as it does, a  
 fertile country, destined in the future  
 to be a mighty mart of trade. Port-  
 land is on the Willamette river a  
 short distance from where it branches  
 from the Columbia. By railroad  
 from here to Seattle reminds one of  
 a trip through Michigan to Mackinaw,

the character of the tree growth and  
 vegetation being the same.

Seattle.

And what of Seattle, a city after  
 35 years growth of 285,000 population?  
 It is a marvel in many ways, with  
 many of the characteristics of Frisco  
 and not a few of the physical and  
 commercial advantages of New York  
 City. Here are found fourteen story  
 steel, stone and marble hotel struc-  
 tures with every possible convenience.  
 Magnificent marble dining room, or-  
 chestra in the evening, tea room, roof  
 garden, corridor overlooking hotel  
 lobby, furnished mission style with  
 desks, stationery and every conveni-  
 ence for correspondence, stenographer  
 who is also an operator on typewriter  
 and adding machine in attendance.  
 Rooms with bath, telephone and clos-  
 ets constantly lighted by electricity  
 and every other feature of the hotel  
 in keeping with these appointments.  
 yet the incongruity of it all, back of  
 the building is an open space of about  
 four city blocks where part of a hill  
 is being blasted away and a locomotive  
 and eight dump cars puff and  
 work all day and all night. The city  
 covers many miles and its houses are  
 compactly built in many places. Sec-  
 ond avenue particularly is a broad  
 business street with many as fine  
 business structures as either Frisco  
 or Los Angeles.

### The Exposition.

The Alaska-Yukon-Pacific exposition  
 known on the Pacific coast as the A.  
 Y. P., beautifully located with Lakes  
 Washington and Union on either side,  
 20 minutes trolley ride from the main  
 hotel and business section of Seattle.  
 It is a comparatively small but beau-  
 tiful exhibition—not in any sense of  
 the word small in the magnitude of  
 its exhibits, but because the buildings  
 are well-arranged and compactly lo-  
 cated, the principal exhibits can be  
 seen and a general impression gained  
 in a short time. Grouped around Cas-  
 cade court and the Arctic Circle, both  
 water features, are the exposition  
 buildings proper. Pay Streak, Ani-  
 mal Exhibits, etc., are allotted space  
 on the outskirts, the total space oc-  
 cupied being 250 acres. From the  
 handsome entrance, a short steep as-  
 cent leads to the U. S. government  
 buildings. From this the highest  
 point in the fair grounds you look  
 directly down the central court, com-  
 prising Cascade Court and the Arctic  
 Circle with the largest exhibit build-  
 ings on either hand and ending in the  
 music pavilion. This scene is particu-  
 larly brilliant at night with the  
 cream-colored buildings and water  
 features outlined in thousands of elec-  
 tric lights. The general character of  
 such exhibits are known to everyone,  
 but for beauty of arrangement, inge-  
 nuity of exhibition and strength of  
 building design, the U. S. Government,  
 Forestry and Arctic Brotherhood,  
 might be mentioned, also the exhibits  
 of Canada, Japan and New York state.  
 Innes New York Orchestra band, over  
 thirty pieces with a soprano soloist  
 give two concerts daily, a musical  
 treat long to be remembered. A fast  
 and powerful motor boat, gives you  
 a view of the exposition from Lake  
 Washington. A cigar-shaped balloon  
 flying machine navigated the air  
 above the buildings. The floral dis-  
 play was very beautiful.

### The Cascades and Rockies.

A return trip from Seattle through  
 Spokane, Helena and Billings, show  
 first the beauties of Cascade and  
 Rocky mountain ranges, virgin forests  
 with clear mountain streams, splendid  
 tree growth and verdure everywhere.  
 Very little evidence of humanity ex-  
 cept here and there where mining and  
 lumber interest are getting out their  
 product and make settlements along  
 the line of the Northern Pacific rail-  
 road.

### Energetic and Progressive People.

Such are the Pacific coast states,  
 California, Oregon and Washington  
 and their kindred attractions. It is  
 a great community of prosperous, self-  
 confident, progressive people, whose  
 territory nature has most richly bless-  
 ed and the speedy development of  
 which is assured by the energy of its  
 citizens. While more than satisfied  
 with their surroundings they are  
 quick to grasp the possibilities of  
 adjacent territory. Their money is  
 going into Mexico, where the steamer  
 carrying trade that will soon be rush-  
 ing through the Panama canal will  
 bring the products of that country,  
 with cheap transportation cost, with-  
 in a few days of the consumers of  
 New York and other eastern cities.  
 Into Alaska where the fisheries indus-  
 try will within a few years produce  
 more wealth than her gold output.

### A Lesson for Santa Fe.

In the light of such nature attrac-  
 tions as the Grand Canon of the Colo-  
 rado, the Yosemite, the Yellowstone  
 National Park and the many and var-  
 ied advantages and attractions of the  
 Pacific coast states, what are we to  
 learn of the resources of our own lo-  
 cality. We may learn, for instance,  
 that Los Angeles with few apparent  
 resources can be made the most at-  
 tractive city of the coast by the wealth  
 poured into it by eastern capitalists  
 who spend there but three months of  
 the year to enjoy the climate, but  
 whose residence there has made a  
 business city, surrounded by a won-  
 derfully beautiful residential district.  
 This is the asset of climate—a very  
 real one—and it brings its train not  
 only business but an ideal city for  
 residence. As a historic point of in-  
 terest, comprising the oldest American  
 civilization European domination and  
 United States occupation we stand  
 without a peer. The value of this  
 asset is only beginning to be recog-  
 nized, with proper appreciation it  
 will grow with every year.

Every known historic point in this  
 locality must be emphasized, others

## OFFICIAL PAPER OF SANTA FE COUNTY.

The New Mexican is the oldest newspaper in New Mexico. It is sent to every postoffice in the Territory, and has a large and growing circulation among the intelligent and progressive people of the Southwest.

## HAIL! HAIL! THE GANG'S ALL HERE!

At last part of the mystery has been solved. The cat is out of the bag. For years, the Albuquerque Morning Journal, the Roswell Daily Record, and a few other papers of like ideals and like ambitions have been hinting mysteriously at the terrible gang that is having the people by the throat; that is the cause of all the political and material misery from which the Territory is suffering; that has restored the credit of the Territory when Democratic misrule had ruined it; under whose guidance the Territory has doubled population and wealth and will be admitted to statehood within another twelve months; under whom the administration of justice has been swift and fair, under which there has not been a single conviction of any territorial official for misdoing and no losses by defalcations or embezzlement by territorial officials. There were repeated challenges to name the gang, to unmask these highway robbers and pirates, to haul them before the courts of justice so that their horrible crimes might be expiated in due and proper form, but the same mysterious silence was maintained from Albuquerque to Roswell, until Saturday, when the Roswell Daily Record comes out with a partial list of "de gang." It says:

"The Pecos Valley News wants to know who comprises the 'gang.' The men who have been generally denominated as members of the New Mexico ring of politicians are the following and a few others: Reynolds, Bursum, Otero, Prichard, Martin, Andrews, Llewellyn, Fall and it might be well to put Curry in the list."

Among the few "others," of course, is every other Republican office holder and every other Republican leader, who has stood in the way of the Democrats in their hankering after the flesh pots of office. Says the Pecos Valley News:

"The Roswell Record is ready to admit that the members of the 'gang' as it chooses to designate our state officials, are stronger in the favor of the people than ever before. This seems strange after the persistent attempts of the Democratic press of the Territory to vilify the good name of every Republican of any prominence. By the way, who compose the so-called 'gang?' Governor Curry is a prominent figure in New Mexican politics; is he a gangster and unworthy of the respect and confidence of the people? Hon. Nathan Jaffa has much to do with the management of our public affairs; is he too a gangster, given to political intrigue and corruption? Hon. James M. Hervey is he unworthy to assist in the management of affairs at Santa Fe? And Chief Justice William J. Mills, is he also included in the list? Hon. William H. Andrews, thrice elected Delegate from the Territory; have the people so many times been mistaken? Hon. H. O. Bursum, stronger today than ever before in the councils of the Republican party, enjoying practically the entire support of his party, has he succeeded all these years in deceiving not only his associates but the people in general? Not so. These men are worthy of the positions which they occupy notwithstanding the slander and misrepresentation to which they have been subjected and they will still be accorded the confidence of their party which is, and will continue to be, the ruling power in New Mexico."

## THE ANVIL CHORUS.

A certain amount of knocking from outsiders who visit New Mexico and do not or cannot understand conditions must be expected. The anvil chorus will never cease, but it should receive no encouragement from within the boundaries of the Territory. In the Waynesboro, Pa., Record last week for instance, is found the following:

"The homesteaders in New Mexico are practically facing starvation unless it rains. For a distance of 100 miles from the Texas line there is scarcely a green thing to be seen in the shape of vegetation and on the ranges the cattle and sheep are dying for want of something to eat."

"One place I noticed the cattle running after the train bawling for something to eat. They are not strong enough to ship. The railroad refuses to haul them because so many of them die on the way and the stockmen are up against a stiff proposition. Of course, this is different in the irrigated sections but that area is small compared with the range country."

There is no use calling the writer a liar, for evidently he was honest in his impressions, except that he exaggerated, and generalized for the whole Territory from one dry spot he has seen, and probably multiplied one dead cow by a thousand. Fortunately,

trains, all over the eastern part of the Territory, have helped crops and the range wonderfully, and it can be easily proved that the statements in the Record are not the facts.

Another knocker, this time, a minister, writes in an Arkansas paper that "the morals of Albuquerque are limited and the immorals are numerous." He complained of Sunday baseball and a Sunday church festa and described a dance he saw at Albuquerque as: "It was goin' a huggin' or huggin' a goin'", which indicates what was in the sky pilot's mind all the time he looked on. Still he says: "I only spent a very few moments in seeing all this and returned to my afternoon meeting feeling like I never wanted to witness another scene like that." He takes a whack at Albuquerque's ministers, for he says: "We were hindered much by the pastors not taking hold with us. One of the pastors would preach to his gang, then slip out of the pulpit and accompany them to the Crystal theater. Another was known to leave his wife and babies at home and escort his lady soloist to a circus. So they could not stand for strong evangelistic preaching."

After taking a fall-out with New Mexico's climate, this billous and grouchy visitor signs himself: Edward Gideon Phillips.

Of him, it is probably that the Albuquerque Morning Journal says:

"A certain mountebank who had counted on making a rich haul through 'working' the churches of this place as an 'evangelist,' was somewhat disappointed in the net receipts, if we may judge from a very evangelical letter which he prints in an eastern paper. As a rule those who go affishing for suckers don't get many bites in Albuquerque."

While these misrepresentations are inexcusable and there should be a way of punishing those who make them, yet, they do not hurt the Territory one-tenth as much as those of New Mexico's own people continually accusing their officials of graft, of trickery, of corruption, of being gangsters. It is there where the hurt comes in and what gives the commonwealth the black eye at the National Capital, and among investors and homeseekers. The papers and individuals guilty of these scurrilous accusations are no better, in fact, they are much worse, than the Rev. Edward Gideon Phillips or the man who saw starvation written all over eastern New Mexico, for the latter actually believed, or deceived themselves into believing what they wrote, while the former know they are lying and that only out of political or personal spite.

## SAVE THE GARITA.

Through the generosity of an eastern philanthropist, the ruins of Fort Ticonderoga in Vermont have been restored and a big celebration will be had next month to signalize the event. Among the guests will be President Taft and the celebration will be made a national one. Admitting, even though a myth, the details of the capture of the fort by Colonel Ethan Allen and his Green Mountain boys, yet, Fort Ticonderoga cannot measure in historic interest with the venerable Garita at Santa Fe, only three minutes' walk from the Plaza. The Garita is crumbling to ruins and unless steps are taken to protect the adobe walls, a few more hard rains will wash away the last vestige of it. Not only should it be protected, but it should also be acquired by the city, or the New Mexico Historical Society, and eventually restored. This would not be costly but would perpetuate a structure steeped in thrilling romance equal to that of any castle on the Rhine or on the Danube. The story of Fort Ticonderoga, with all its fairy embellishments, would appear very tame besides the true story that could be written around the Garita. The last legislative assembly passed a law, which paves the way for the acquirement of historic monuments of this type and their preservation for future generations and it should be taken advantage of without further delay in order to preserve the Garita.

Chairman E. N. Burch of the board of county commissioners, has just completed a tour of Colfax county, so as to see for himself what road work is needed and to inaugurate it whenever he found it necessary. As a result, Colfax county, will soon have the reputation of maintaining the best roads in the Territory. Now, if Chairman Sparks and his colleagues of this county could be persuaded to make a trip over the Scenic Highway with a view of putting it in good shape, they will have demonstrated to the tax payers that they are in earnest in the cause of good roads.

## UNCLE SAM SHOULD PAY THE PIPER.

The visit of Secretary of the Interior Ballinger and the Senate Irrigation Committee to the west this summer, will have important bearing upon the work of the Reclamation Service in the future. While pessimists believe that there will be considerable curtailing on the projects already started, this is very unlikely. The result will probably be direct appropriations for the completion of these works. Uncle Sam spends millions of dollars annually on river and harbor improvements without expecting to be paid back directly the amounts expended but under present reclamation legislation he expects this very thing from the water users. This is unjust and inequitable for he will be paid back indirectly as he is from the improvement of rivers and harbors and should expect no more. Still the Denver Republican says editorially:

"In his tour of the west for the purpose of investigating the projects and work of the Reclamation Service Secretary Ballinger of the Department of the Interior will find much to interest him, a great deal to approve and yet something to criticize."

"The Reclamation Service made at the outset the mistake of trying to accomplish too much in proportion to its ability. It was hailed by many people in every section as a deliverer; and not a few of those who turned to it for assistance entertained the notion that in some way they would be relieved from paying for work if it should be done by the government. They were unwilling to undertake on their own responsibility enterprises which they were able to shift to the shoulders of the Reclamation Service."

"The result was that the officers and agents of the service were beset from all sides with appeals. They were urged to undertake different projects that they miscalculated their future revenues and embarked upon ventures which they now find themselves unable to complete within the time first announced."

"The receipts of the service come from the sale of public lands, and beyond these revenues it cannot extend its expenditures. A policy of suspicion respecting the integrity of men who have endeavored to acquire lands under the federal law has in a measure interfered with the transfer of the public domain to private ownership, and hence has prevented the receipts of the Reclamation Service from attaining the volume which otherwise would have been reached."

"Thus the Reclamation Service has been compelled to halt or at most to proceed at a slow pace. Many contemplated projects must be deferred until its revenues become adequate. Failure to complete some of them has delayed payment for lands taken up in the expectation that they could be reclaimed under these enterprises, and hence the reclamation fund has not begun in any great volume to flow back into the treasury of the service."

"Secretary Ballinger will see evidence of this in nearly every state, and it may suggest to him the wisdom of deferring ventures which in any event must await completion until some more or less remote future."

## GOOD REASON TO BE PROUD.

According to the Pecos Valley News, Artesia is quite proud of the fact that it manages to prosper without saloons. Says D. L. Newkirk, the editor of the News:

"Recently the Middle Valley has had an object lesson on the evil of the saloon. Roy Lee a printer, came here about three weeks ago, highly recommended by Will Robinson, and while in town conducted himself in a meritorious manner. After two weeks of industry and sobriety he concluded to pay a visit to the little place called Lakewood, the nearest booze station, and while there filled up on what that burg has for sale. The result was that one man came near losing his life, Lee is in jail and the community enjoys the unenviable reputation always attached to such occurrences. One of the greatest reasons for Artesia's growth and development today is her freedom from saloons and every citizen who took part in the movement should be proud that we were able to bring this state of affairs about. In this day of enlightenment, few people care to establish residence in a booze town."

The New Mexican had to go away from home to learn the news this time, in fact all the way to Aztec, San Juan county, and the news is so good that the New Mexican hopes that it is true, although the tip comes from a weekly newspaper more than two hundred miles away by railroad. It announces the proposed establishment of an automobile route from the San Juan river to the Capital City, following very much the old survey made by railroads more than twenty years ago from this city to Durango. It is to take the road to Tesuque, thence to Pojoaque, Santa Cruz, crossing the Rio Grande to Espanola, thence up the Chama to Abiquiu, across the Gallinas divide into Canon Largo down to the San Juan river. The automobiles to be used are already in Santa Fe and all that remains to be done, apparently, is some road work and the inauguration of the service.

**Automobiles** LATEST 1909 Models on Sale at **Alexander's Garage**

Representing the Mitchell, Moline, McIntyre and Zimmerman Factories. These factories are noted for their excellent cars, who, instead of building down to a cheap price car, build up to a machless standard, as good a car as a man would care to own. The Mitchell people have built \$11,000,000 worth of cars within the past few years, and their current year's production will equal 18,000 cars.

The Moline car occupies a position of high favor among automobile users. Models "K" and "M" for 1909, are two models of still higher excellence than their satisfactory models of last season, and have proven themselves the cars for anywhere.

High wheelers in solid rubber tires are represented by the McIntyre and the Zimmerman cars. These cars can be furnished in 26 styles of commercial and passenger combinations from \$250 up.

The people realize that the motor driven vehicles have proven good and is here to stay. It is erroneous to suppose that only expert mechanical engineers can own and operate a motor driven car, many ladies drive their cars.

At present quotations they are relatively cheaper than horses—cheaper to maintain. In its adoption you take nothing from the horse except that part which can better and cheaper be done with the motor vehicle. You drive the car yourself. You get the real zest of motoring by handling the levers and steering the car yourself. Free road demonstrations are given to interested parties any time.

AIRSHIP SHED  
DESTROYED BY GALE

Walter Wellman Finds It Impossible  
to Make Trip to North Pole  
This Summer.

Tromsø, Norway, June 29.—The  
steamer Arctic of Walter Wellman's  
north pole expedition arrived here  
from Spitzbergen with her flags at  
halfmast, bringing the news that  
Knud Johnson, one of the two men  
who remained at the Wellman camp  
this winter, had perished in the pack  
ice and that the airship shed had  
been destroyed by a heavy storm.

On May 19 Johnson went with his  
fellow watchman, Paul Bjoervig on a  
hunting expedition over the pack ice.  
The ice was moving and Johnson fell  
through a crevasse into the sea.  
Bjoervig held out a long stick for  
Johnson to grasp but he was uncon-  
scious. Bjoervig then ran back to  
camp and secured a rope, but when  
he returned Johnson's body had dis-  
appeared.

A strong gale from the southwest  
sprang up on Christmas day and last-  
ed for eight days. Bjoervig, who has  
passed many winters in Spitzbergen  
and has been with Wellman on every  
Arctic expedition since 1894, says he  
has never seen such a fierce storm as  
this. It reached its climax on the  
night of December 26, when it entirely  
destroyed the airship shed.  
Anticipating the possibility that  
the airship house might be destroyed  
Walter Wellman had sent by the Ar-  
ctic timber and repairing materials.  
Arthur Wellman who is now in com-  
mand at the camp, reports the work  
of rebuilding the house has already  
begun.

If it found impossible to make the  
voyage northward this summer, Mr.  
Wellman declares he will continue as  
long as it is necessary to attain suc-  
cess.

## MEN PAST FIFTY IN DANGER.

Men past middle life have found  
comfort and relief in Foley's Kidney  
Remedy, especially for enlarged pros-  
tate gland, which is very common  
among elderly men. L. E. Morris,  
Dexter, Ky., writes: "Up to a year  
ago my father suffered from kidney  
and bladder trouble and several phy-  
sicians pronounced it enlargement of  
the prostate gland and advised an op-  
eration. On account of his age we  
were afraid he could not stand it and  
I recommended Foley's Kidney Rem-  
edy, and the first bottle relieved him,  
and after taking the second bottle he  
was no longer troubled with this  
complaint. Sold by all druggists."

The New Mexican can do printing  
equal to that done in any of the large  
cities. Our solicitor, every piece of  
work we turn out. Try our stock  
once and you will certainly come  
again. We have all the facilities for

No Need of Suffering From Rheuma-  
tism.

It is a mistake to allow rheumatism  
to become chronic, as the pain can  
always be relieved, and in most cases  
a cure effected by applying Cham-  
berlain's Pain Balm. The relief from  
pain which it affords is alone worth  
many times its cost. It makes sleep  
and rest possible. Even in cases of  
long standing this liniment should be  
used on account of the relief which it  
affords. 25 and 50 cent sizes for

## LOCO DISEASE OF LIVESTOCK

U. S. Bureau of Animal Industry Has Definitely Established Fact That Barium is the Cause.

The so-called loco disease of horses, sheep, and cattle has been for many years a source of serious loss to stockmen in the west, who have generally attributed it to certain weeds eaten by the stock. Investigations by the United States Department of Agriculture have not only confirmed the supposition as to the poisonous effect of these plants, but have resulted in the discovery and identification of barium as a definite poisonous element in them. Feeding experiments establishing the fact that the plants are responsible for the disease were carried on under field and corral conditions by Dr. C. Dwight Marsh, while the discovery of barium was made in the laboratory by Dr. A. C. Crawford.

The loco weeds are a class of leguminous plants of which the principal ones are the purple loco weed (*Astragalus mollissimus*) and the rattle-weed (*Aragallus lamberti*). One or both of these prevail to a greater or less extent over an area including all or parts of Montana, Wyoming, North Dakota, South Dakota, Minnesota, Nebraska, Kansas, Colorado, Utah, Arizona, New Mexico, Texas, and Oklahoma.

The characteristics of the disease are a slow, staggering gait, rough coat, staring, vacant look, and emaciation. The affected animals have hallucinations, cannot be led or backed, show more or less lack of muscular co-ordination, gradually lose flesh, and die. The affection comes on in a slow and cumulative manner, and there is no possibility of animals becoming immune by continually eating the plants.

The proverb "an ounce of prevention is worth a pound of cure" applies to this disorder. Although good results can often be obtained by the treatment of locoed animals, the most effective way of dealing with the trouble is to keep animals from eating the loco plants. Wherever practicable the weeds should be exterminated from the range or pasture, and the best way of doing this is simply to cut them out. This method, however, while often practicable on land under private control, cannot very well be applied to the public range. In many cases much can be accomplished by keeping animals away from loco-covered ranges during the time when feed is short, as they are much more likely to contract the habit at such a time. It may sometimes be profitable to feed them for a short time, in order that the loco-eating habit may not be formed.

After animals have become affected the first essential in their treatment is to place them where they cannot eat the loco weeds. They should be given plenty of nutritious feed, and so far as practicable feed with laxative properties, such as green alfalfa. Some may recover under this treatment without recourse to medicine. With most animals, however, recovery is hastened by medicinal treatment.

As a result of its experiments the Department of Agriculture suggests the following treatment: For cattle, strychnine in doses of three-twentieths to four-twentieths of a grain daily, administered hypodermically. For horses, Fowler's solution of arsenic in half-ounce doses daily in the drinking water or in the grain. This treatment should be continued for at least a month. To correct the constipation which is almost universal in locoed animals, magnesium sulphate (Epsom salt) may be administered as a drench in 2-ounce doses. Epsom salt may also serve to some extent as an antidote to the poison produced by the weeds. Beneficial results have also been obtained by giving horses daily a drench containing 2 ounces of Epsom salt with 10 drops of dilute sulphuric acid, and by giving cattle tri-weekly 3 to 4 ounces of Epsom salt with a proportional increase in the quantity of dilute sulphuric acid. As the foregoing treatments are in the experimental stage, the Bureau of Animal Industry, Washington, D. C., would be glad to receive reports of results from their use.

If your Stomach, Heart or Kidneys are weak, try at least a few doses only of Dr. Shoop's Restorative. In five or ten days only, the result will surprise you. A few cents will cover the cost. And here is why help comes so quickly. Dr. Shoop doesn't drug the Stomach, nor stimulate the Heart or Kidneys. Dr. Shoop's Restorative goes directly to the weak and failing nerves. Each organ has its own controlling nerve. When these nerves fail, the depending organs must of necessity falter. This plain, yet vital truth, clearly tells why Dr. Shoop's Restorative is so universally successful. Its success is leading druggists everywhere to give it universal preference. A test will surely tell. Sold by Stripling-Burrows Co.

The seals and record books for notaries public for sale by the New Mexican Printing Company at very reasonable rates. Seals for incorporated companies are also handled. Call at or address the New Mexican Printing Company, Santa Fe, N. M.

Foley's Honey and Tar is especially recommended for chronic throat and lung troubles and many sufferers from bronchitis, asthma and consumption have found comfort and relief, by using Foley's Honey and Tar. Sold by all druggists.

## WHEN THE CLOCK HANDS TURN BACK

Taken from the Daily New Mexican of June 29, 1889.

When the reporter of the New Mexican today called upon W. A. Leonard, the editor of the Silver City Enterprise, who is stopping at the Palace Hotel, he received the following information in response to a request for news:

A prominent mining man, was publicly cowhided on the streets of Silver City a few days ago by an irate woman named Mrs. Nettie Munger wielding the rawhide. She had been to see him about some rooms and claimed that he had insulted her. He was much aggrieved about the assault as he had given no cause for it. To show he did not fear an investigation he had the woman arrested. She was fined \$50 and costs after pleading guilty. After the trial the woman's father-in-law and her husband apologized to their victim for the woman's conduct.

Colonel J. Frank Chavez of Valencia county, left this morning for his home.

Mr. and Mrs. Alfredo Hinojos returned this morning from their wedding trip to Denver.

Hon. John R. McFie, Colonel W. L. Rynerson and Colonel J. Morris Young left last night for the south.

The funeral of the wife of ex-President Hayes took place yesterday at Fremont, Ohio.

Mrs. E. H. Murphy, late principal of the University of New Mexico, leaves tonight to join her husband at Guadalajara, Mexico.

## POWER OF WATER.

Under Certain Conditions It is Practically Irresistible.

When a man goes in swimming at the seashore and slaps the water forcibly with his hand or takes a back dive from a pier and lands squarely on his back he realizes that the unstable liquid offers not a little resistance. Yet, says a writer in the New York Tribune, it would surprise almost anybody to see what water will do under certain conditions.

A stream from a fireman's hose will knock a man down. The jet from a nozzle used in placer mining in the west eats away a large piece of land in a day, toys with great bowlders as if they were pebbles and would shoot a man over the country as though he were a projectile from a cannon.

There is a story of an eastern blacksmith who went west and made a bet that he could knock a hole through the jet of one of these nozzles with a sledge hammer. He lifted his arms, swung the sledge and came down on the ten inch stream with a force that would have dented an anvil. But the jet, never penetrated, whisked the massive hammer out of the blacksmith's hands and tossed it several hundred feet away into the debris of gold bearing gravel beneath a crumbling cliff. After this the blacksmith left out iron when he spoke of hard substances.

There is also a power plant near Durango, Colo., where a United States cavalryman one day thought he had an easy job in cutting a two inch stream with his sword. He made a valiant attack. The result was that his sword was shattered in two and his wrist broken.

A little thinner jet of water descending 1,600 feet to a manufactory at Grenoble, Spain, and traveling at the moderate speed of 100 yards a second fractures the best blades of Toledo.

Of course some people will not believe such stories without having seen the thing, and one may think it a proof of the scientific imagination to say that an inch thick sheet of water, provided it had sufficient velocity, would ward off bombshells as well as steel plate.

Nevertheless many persons while traveling have seen a brakeman put a small hydraulic jack under one end of a Pullman car and lift twenty tons or so by a few leisurely strokes of the pump handle, and the experience of riding every day in a hydraulic elevator tends to remove doubts of the magic power possessed by water hatched to a machine.

## SIMPLE FAITH.

A Burly Burglar's Confidence in an Editor's Business Acumen.

A man who admitted that he came direct from state prison tried to sell to the city editor of a New York newspaper a weird and startling story of a missing will which he declared had been revealed to him by a fellow convict. He was a burly fellow with a prognathous jaw, and he had lost an eye in battle. The mere look of him would frighten a timid citizen into tremors. Mr. White, the expert in criminology, cross examined the man as follows:

"Why were you in Auburn?"

"Highway" (meaning, of course, highway robbery).

"I suppose you were wrongfully convicted?"

"Nub; dey had me right."

Such engaging candor made Mr. White feel that the man was truthful, and he was greatly disappointed when strict investigation disclosed the fact that the story of the missing will was all fictitious. The man was disappointed, too, at the failure of his romance, but he went away from the newspaper office in cheerful mood, with some remark about better luck next time.

A week later Mr. White was summoned to the reception room of the newspaper, and there he found his friend, the burly highwayman, his shoulders broader, his single eye fiercer than ever. But his visit was quite friendly, although somewhat tinged with business. He evidently believed he could rely on Mr. White's good faith and business acumen. Fixing Mr. White with his glittering eye, the strong armed one plucked him by the sleeve over to a corner of the room and there in a loud, hoarse whisper inquired:

"Say, couldjer do anyt'ing wit' a couple o' watches?"—Harper's Weekly.

Bimini and the Fountain of Youth.

Bimini was a fabulous island firmly believed in by the Indians of the Antilles, though they could give no further clue to its location than that it lay some hundreds of leagues north of Hispaniola. On this island was the famous fountain of youth, giving perpetual health and vigor. It was the search for this fountain that led Ponce de Leon and Hernando de Soto to Florida, on the outskirts of which the island was generally supposed to be situated.

Concerning His Kissing of Her.

Only one person with a mean disposition would have figured out this little prose poem. It runs as follows:

Which do you think is the greatest slur?  
DID he kiss her?  
DID HE kiss her?  
DID he KISS her?  
Or,  
DID he kiss HER?—Cleveland News.

The Great Need.

"I don't want to hear anything about ad-ages," she interrupted. "What we girls want is some subtract-ages."—Woman's Home Companion.

Born in Iowa.

Our family were all born and raised in Iowa, and have used Chamberlain's Colic, Cholera and Diarrhoea Remedy (made at Des Moines) for years. We know how good it is from long experience in the use of it. In fact, when in El Paso, Texas, the writer's life was saved by the prompt use of this remedy. We are now engaged in the mercantile business at Narcoossee, Fla., and have introduced the remedy here. It has proven very successful and is constantly growing in favor.—Ennis Bros. This remedy is for sale by all druggists.

It is an admitted fact that real estate, financial men and merchants all say that quickest and best results are obtained by advertising in the New Mexican.

ready busily engaged in the construc-  
tion of a large vault. The necessary  
bank furniture is on the way here  
from the factory. The doors of the  
new bank are to be thrown open for  
business on July 15.

## PLAZA FETE

GREAT SUCCESS

The members of the Woman's  
Board of Trade take this opportunity  
to thank the public for their very  
generous support and co-operation in  
the Plaza Fete of last Wednesday.  
Each citizen seemed to feel honored  
by being asked to assist and we know  
not where to begin to give special  
thanks. The New Mexican always  
most generously advertising all our  
undertakings. The beauty of the  
Plaza was enhanced by the electric  
lights donated by the Water and Light  
Company. To the band who gave us  
music in the Plaza and to Morrison's  
orchestra who played for the dance we  
are deeply indebted. For the use of  
lumber we are indebted to C. W. Dud-  
row. We believe there was not a  
merchant who did not donate, and  
that liberally to some of the many  
booths. It was a bright and good  
natured crowd who turned out to en-  
courage the women and who spent  
their money so fully that the board  
cleared about \$510, which will enable  
them to pay off \$500 of their debt and  
order \$100 worth of new books for  
the library. For all of which we  
thank the public most heartily.

Mr. Corrick saved us much by pro-  
viding free drayage for the ice cream.  
Our own assembly room being in  
use for the supper we considered it  
a very great favor to have the use  
of the Armory for the dance.

\$5.00 Reward—For return of bunch  
of 12 or 14 keys with name plate, Ar-  
thur Boyle, Santa Fe, N. M. No ques-  
tions asked. Return to this office.

## STORY AND APOLOGY IN SAME COLUMN

Mrs. Laura Biggar Bennett Tells  
Pittsburg of Her Journalistic  
Experiences in New Mexico.

Pittsburg, Pa., June 29.—When Mrs.  
Laura Biggar Bennett, the former ac-  
tress, has finished her litigation over  
the Bijou theatre property, on which  
she holds a \$215,000 mortgage, and  
returns to her abode homestead at  
Albuquerque, New Mexico, she will  
not take up the editorial cudgel in de-  
fense of the common people of that  
sun-blistered burg.

Mrs. Bennett has had experience  
sufficient in running a daily sheet out  
among the sandhills, and she will  
worry no more with the pro and con  
of a state bullion tax, the impervious  
strength of certain railroad corpora-  
tions and with the whole shebang of  
troubles to be found without hunting  
in fussy New Mexico.

The Albuquerque Sun, which Mrs.  
Bennett owned and operated, is no  
more. Before she came East the "We  
regret to announce" bulletin, with a  
few trite opinions of the people of  
the town, appeared on half of the  
front page. The telegraphic wire be-  
came silent as so much junk, the  
paste-pot, scissors and "Who's Who"  
book was stored away, and the estab-  
lishment from which the paper was  
published was locked up.

Mrs. Bennett, with no more expe-  
rience in the newspaper game than was  
gained by conversation with reporters  
and with press agents in the old days,  
accomplished an astounding thing in  
publishing the erstwhile Sun. She is-  
sued the paper without a plant. The  
editorial room was a small office and  
the paper was set and printed in a  
rival shop, by contract, \$900 a month  
being paid.

### The Way They Took Ads.

"It was a losing game," says Mrs.  
Bennett. "I was running about \$2,000  
a month behind, and the pace of the  
bank roll was too swift. You see, out  
there in New Mexico it is different  
from here in the East, both as to news  
and business. When I found that the  
financial arrangements were not go-  
ing satisfactorily, I jumped in to solicit  
advertisements. I got them, too, in  
plenty. But that was all.

"Here is the reason we were long  
on ads and short on returns: I would  
go to the office of a business concern  
and talk advertising with them. 'Sure,'  
the head of the firm would say. 'Just  
take our card and fix it up yourself.' I  
would arrange and publish the ad and  
that ended the matter. When I went  
around with the bill they did not seem  
to understand that advertising should  
be paid for. No wonder it was a los-  
ing proposition.

"But the paper was a good one. We  
championed the downtrodden and told  
the police a thing or two about their  
high-handed methods of abusing the  
Spanish-speaking population. We  
showed 'em up—just like that. Mad?  
One big fellow on the police depart-  
ment came into the office one morning  
to clean it out. Dr. Hendricks, who  
is also my legal adviser, was reading  
some copy. The policeman struck  
out, then he thought that an automatic  
riveting machine was at work on his  
face. He came to in the street. That's  
only one of the incidents.

"The motto to be observed in run-  
ning a paper in New Mexico is, 'don't  
be afraid.' There was that campaign  
in which Andrews was elected Terri-  
torial delegate to Congress. The gang  
wanted us to support Larrazolo, the  
Democratic nominee, and said we  
could have 8,000 subscriptions in the  
state at \$5 per if we could see it that  
way. But we couldn't and we said so  
on the front page.

### Why Andrews Won.

"Andrews was elected, and who did  
it? My paper. We pounded away at  
the other side and we boomed our  
own. Result—Andrews by about 100  
votes.

"But—" and Mrs. Bennett sighed  
reflectively, "it is a thing of the past.  
The people wanted me to keep it up  
and stopped me on the streets to ask  
me to continue. But it's too strenu-  
ous. Somebody was liable to drift in-  
to the office sometime with an auto-  
matic gun. One never can tell. As I  
say, we championed those who buff-  
eted about—they call them greasers  
out there—and naturally the perse-  
cutors were offended.

"We were under contract of \$900 a  
month with another paper for our  
printing and typesetting. On two days  
they did not 'catch the mail.' (Notice  
that technical phrase?) They had  
contracted to have our sheet on the  
street at 4:30 and the failure to do this  
broke the contract. Then I quit.

"But I like it out there, away from  
the grinding, quibbling, quarreling,  
wicked big cities. I like to be where  
I can gallop over the plains. There  
is where I found health and repose.  
You should see my house. It is a  
dobe, with walls three feet thick, but  
it is most comfortable. I have a dug  
well 250 feet deep and the water is  
great. I also have fourteen cats about  
the place and carriage and riding  
horses. In the conservatory attached  
to the house I raise vegetables for  
the table. They would burn up out-  
side.

"It's a good place—Albuquerque—  
where you can see far without seeing  
anything, but I do not like it as a  
newspaper town. In this regard, it is  
a trifle strenuous. They expect one  
to write a story and an apology in the  
same column."

## SENATOR DURHAM DIES SUDDENLY

Was a Power in the Republican Party  
in the City of Philadelphia  
and Pennsylvania.

Philadelphia, June 29.—State Sen-  
ator Israel W. Durham, one of the  
Republican leaders of this city and  
prominent in state politics died sud-  
denly at his summer residence in At-

lantic City. He had been ailing for  
several years.

"Iz" Durham, as he was familiarly  
known, was 53 years old. He was a  
follower of the late Senator Quay and  
owned much to the friendship of that  
politician. He was also a friend of  
Delegate W. H. Andrews of New Mex-  
ico.

Recently Mr. Durham purchased a  
large interest in the Philadelphia Na-  
tional League baseball club.

Competitive examinations are pro-  
vided for, but this requirement is not  
made applicable to supervisors and  
enumerators. Only one person from  
a family will be admitted under the  
examination and this provision is  
made general to all branches of the  
civil service.

The geographical examination is al-  
so provided for. The appointments
