## MORE TREACHERY

Friendly Natives Kill Five More  
American Soldiers.

**OTIS CAN HAVE MORE TROOPS**

California Offers Another Regiment of  
Volunteers—Transporta Departing  
for San Francisco.

Manila, June 19.—The battalion of the 4th infantry which left Iloilo, where General Wheaton is in command, this morning, reconnoitered toward Pore das Marinas, where it was believed most of the rebels who escaped from Parangue and Bacoor had fled, were attacked in the rear by apparently "friendly" natives. This brought on a sharp engagement, lasting several hours, resulting in five Americans being killed and about twenty-five being wounded. The loss of the rebels was very heavy.

The battalion soon exhausted its ammunition, and at 2:30 p. m. General Wheaton and staff, two mountain guns and one field piece, went to re-enforce the troops attacked. General Wheaton was fired on in the road, and had a narrow escape. The 3d battalion was ordered to the front, and formed on the Las Pinas road. Heavy firing on both sides followed, artillery being freely used. The enemy was located in the woods at 4 o'clock, showing signs of retreating, as they were being pressed very hard. One gun of the 6th-artillery in advantageous position did great execution. Fighting was still in progress at 5 o'clock, at which time the Americans secured a quantity of Filipino arms, abandoned in the woods. The scene of the fight is over twenty miles from Manila.

**WILL SUPPORT OTIS.**  
New York, June 19.—A Washington correspondent of the Herald quotes an influential member of the cabinet as making the following statement: "The slightest intimation from General Otis that he wants more troops will be followed by a prompt call for volunteers. There will be no further parleying with Aguinaldo, and no let-up in the aggressive campaign which Otis is conducting."

**VOLUNTEERS RETURNING.**  
Washington, June 19.—General Otis has cabled the war department as follows:

"Manila, June 19.—The transport Sherman arrived this morning. The casualty list is as follows: Edwin L. Gavett, company I, 6th infantry; Colonel Kellogg and twelve men left Honolulu sick; seven cases typhoid fever en route. Sixth infantry leaves for Iloilo to relieve Californians at Negros. The transport Indiana, with 134 officers discharged as sick, with civilians, left for San Francisco via Nagasaki yesterday. The Hancock and Sherman, with Nebraska, Pennsylvania and Utah troops, leave for the United States as soon as the troops can be placed in readiness. The Californians will leave as soon as collected. Colorado to follow on first available transport."

**MUSTER OUT IN CALIFORNIA.**  
Washington, June 19.—The following cablegram has been received from General Otis: "All volunteer organizations desire to be mustered out at San Francisco."

**A CALIFORNIA REGIMENT READY.**  
Washington, June 19.—The following telegram was received by the war department to-day:  
San Francisco, July 19.—Southern California supports the administration in efforts to suppress the Philippine insurrection.

**"Do Not Grasp at the" "Lose the Substance."**

Many people are but shadows of their former selves; due to neglect of health. Look out for the blood, the fountain of life, the actual substance; keep that pure by regular use of Hood's Sarsaparilla and robust health will be the result. Dyspepsia, weakness, and other troubles will be things of the past and life will be worth living.

Hacking Cough—"I was troubled with dry, hacking cough. One bottle of Hood's Sarsaparilla helped me and three bottles cured me and made me strong."

George W. Bennett, Coaling, Del.

surgeon, and tenders the president for immediate service a well-organized, thoroughly disciplined regiment of infantry, ready to embark as soon as necessary field equipment can be furnished. Signed, George C. Perkins, United States senator; Stephen M. White, ex-senator.

## THE PRESIDENT'S TRIP.

He Is at Northampton, Massachusetts, Today.

Northampton, Mass., June 19.—Northampton was dressed in its best to-day to welcome the president of the United States on his arrival from Holyoke. William Whiting, the president's host at Holyoke, and Congressman Lawrence came up with the party. The president and Mrs. McKinley were constantly engaged in acknowledging cheers. The procession moved through the main streets to Smith college. Senior day class exercises were nearly completed when the company arrived at the college grounds. At the close of the exercises the president watched the planting of class day ivy. The party were then driven to the residence of Captain Williams, where a beautiful loving cup was presented to Mrs. McKinley by Bethesda chapter of the order of the Eastern Star, of which she is a member. After lunch the president reviewed the school children. The presidential party was escorted to the station by a military company.

## GOLD AND SILVER.

Total Production—New Mexico Credited with Less Than a Million.

Washington, June 19.—Director of the Mint Roberts has announced his final estimate of the production of gold and silver in the United States for the calendar year 1898 as follows: Gold, \$64,463,000; silver, fine ounces, \$4,438,000. Total for 1897, gold, \$57,333,000; silver, \$3,860,000 fine ounces. The commercial value of silver bullion in 1898 was 59 cents per fine ounce, while in 1897 it was 60 cents. Colorado led all states, with \$23,195,300 in gold and \$2,815,600 ounces of silver; California second in gold production, with \$15,637,000. The New Mexico gold production was \$539,000; silver, 425,300 ounces.

## Boundary Agreed Upon.

London, June 19.—Officials of the colonial office were to-day shown a dispatch from Washington, saying that Canada served notice on Great Britain that she must choose between the United States and her North American dominion in the settlement of the Alaskan boundary dispute. They declared the modus vivendi was reached early last week, as cabled by the Associated Press at the time. The arrangement deals with the question on broad lines. One or two minor details are still under discussion, and when they are settled final arrangement will be entered into. The boundary agreed upon follows the summits of White and Chilkoot passes.

## Monument for Bland.

Lebanon, Mo., June 19.—In the movement on foot to erect a \$10,000 monument to the memory of the late Richard P. Bland, William J. Bryan subscribed \$200 and other amounts, in all about \$10,000, have been raised.

## ROBBED A TROLLEY COMPANY.

Bandits Raid an Office in a Suburb of Philadelphia.

Philadelphia, June 19.—Masked robbers, probably ten in number, raided the receiving office of the Fairmont Park Transportation Company at Belmont, Fairmont Park, and blew open a safe, securing \$4,000, the company's receipts for two days. Six men in the office were bound hand and foot with wire. In addition to the men who actually committed the robbery, others operated miles away by destroying telegraph and telephone wires connecting with the trolley company's main office.

## TROUBLE IN THE TROPICS.

The People of Various Islands Are Now Riotous.

Kingston, Jamaica, June 19.—Advices from Antigua, British West Indies says there has been a recurrence at Montserrat, Leeward islands, of serious riots in the northern district extending to the capital, Plymouth, over old excise duty collections, the trouble which occasioned riots last year. The police were overcome and the island was for a time in the hands of a mob. The chief government officials were confined to their houses until the arrival of the British cruiser Talbot. After a sharp conflict between a detachment of marines and rioters the ring leaders were arrested.

There also has been a continuation of troubles in the French island of Guadalupe where twenty seven more or less disastrous incendiary fires occurred on plantations since the burning of Pointe-a-Pitre, each preceded by an anonymous threat to the governor protesting against continuation of protection of immigrant labor by the military.

## CANADA'S DEMAND.

Defiant Attitude of the Colony Toward the Parent Country.

New York, June 19.—A special to the Journal-Advertiser from Washington says: Canada has served notice on England that she must choose between the United States and her North American dominion in settlement of the Alaskan boundary question. It is stated on the highest authority that this statement represents accurately the condition submitted to England, which delayed negotiations between Ambassador Choate and Lord Salisbury. It is said there are only two ways out of the difficulty; first, that Canada will voluntarily recede from her demands for a Pacific tidewater port; or, second, that the United States surrender the principle laid down by Secretary Hay that America will not grant temporarily or otherwise any port facilities to Canadians. That Canada will yield is considered improbable.

## Fireman Injured.

Omaha, Neb., June 19.—Eleven firemen, including Chief John Redell, were injured by an explosion of powder in the fire at Allen Bros.' wholesale grocery Sunday. Lieutenant Thomas Ruane is probably fatally burned, but the others are likely to recover. The loss is estimated at \$115,000.

## More Cardinals and Bishops.

Rome, June 19.—The pope at a consistory held this morning created eleven cardinals and a number of bishops.

The bishops preconized include Mgr. Bien, Porto Rico; Mgr. Barnaba Aguilari, Santiago de Cuba. The pope, who was in good health, delivered the address dealing with the union of churches.

## Dingley's Successor.

Lewiston, Me., June 19.—A special election in the second Maine congressional district to fill the vacancy caused by the death of Nelson Dingley is in progress to-day. Indications point to the election of Charles E. Littlefield, Republican, over John Scott, Democrat.

## Colored Miners Imported.

Fort Scott, Kan., June 19.—Under direction of Colonel J. P. Richards, attorney of the Missouri Coal and Mining Company, a car load of Fort Scott negroes left here to-day for the Yale and Fleming mines in charge of a mine foreman. There the train was followed immediately by a special train bearing deputy United States marshals, who will arrest any strikers that may interfere with the landing of the new men, under federal court injunctions.

## Caught by Park Guards.

Salt Lake, Utah, June 19.—A special to the Tribune from Montida, Mont., says: Near Dwells, Wyo., just south of Yellowstone park, park scouts captured three men supposed to be the Union Pacific train robbers. They were surrounded by scouts just before daybreak and captured without firing a gun. They are being taken across the country to Mammoth Hot Springs.

## NEW MEXICO MINES

### BLAND.

The 40-foot shaft on the Giant has been completed, and a crosscut has been started from the bottom of the shaft.

F. G. Walker has finished the framing of heavy timbers for the addition to the Allerton mill.

The Washington mine people are preparing to start operations, after four years of litigation. The supreme court at Washington has dismissed a suit. This is a victory for the Washington mine people.

The Aunt Betsy, in Peralta canyon, shows an average outcrop of 40 feet for the entire length of the claim. The work which has been done on the property consists of a 25-foot shaft, a 40-foot tunnel and a 12-foot tunnel. The average values of the ore in gold taken from the shaft were \$20.60 per ton. It is the only mine in Peralta canyon that carries free gold. The Ivanhoe, owned by Major Beaumont, contains one of the finest leads in the country. Recent assays run \$25 in gold and \$4 in silver. The Climax is owned by Alexander Conrad. It has three distinct leads of fine mineral-bearing quartz. The development work consists of one 50-foot tunnel and a 35-foot drift. When the ore in the tunnel was encountered it showed an average value of \$6.50 in gold and \$2 in silver. The drift on the east lead of this property shows a fine character of oxide ore, which assays \$1 in gold and \$5 in silver.

### TAOS COUNTY.

The drilling and other operations at the Copper Hill mine will in the future be done with compressed air. The concentrating plant at the mine has a capacity of fifty tons a day. J. K. Turner, the manager of the company, was in Denver this week to purchase some additional machinery for the mill.

## MEXICO ENTERPRISE.

An Isthmus Railway to Connect Two Ports.

City of Mexico, June 19.—It is announced that the government has concluded arrangements for settling with holders of bonds of the National Tehuantepec railroad which crosses the Isthmus of the same name and instructed Pearson & Sons, contractors to rebuild the line in a substantial manner and commence work on two new ports to be created at Zalina Cruz, on the Pacific side and Coahuilcos, on the Gulf coast. This will cost many millions of dollars and give Mexico facilities for doing great trade in international freight.

### Another Pacific Accident.

Portland, Ogn., June 18.—An east bound Northern Pacific freight train collided with an excursion train returning from Astoria, a mile east of Linton station. The cause is said to have been misunderstanding of orders. D. P. Bell who was engaged serving lunches to excursionists was killed. Five persons were injured.

## THE COLORADO STRIKE.

Waiting to See What the Smelter Trust President May Do.

Denver, Colo., June 19.—The smelter strike situation now seems waiting on the arrival of President Nash, of the smelter trust, Wednesday. The smeltermen's union met this morning, but nothing of importance was reported. A meeting is to be held this afternoon between the union committee and ex-Governor Grant. The citizens' committee appointed by Governor Thomas has issued the following statement: The committee has, according to its best judgment, furthered the opening of negotiations between smelter managers and men with a view to early resumption of work, and the committee believes progress has been made which in a few days may culminate in reopening the smelters of Denver and Pueblo. It is learned that the president of the American Smelting Company will probably arrive in Denver Wednesday, when a mutually satisfactory scale of wages may be agreed upon between managers and men. Meantime, the committee will offer its services to help bring about so desirable a result."

MONDAY, JUNE 19.

"I tried it once too often," said Fitzsimmons. Czar Reed did not. He quit the ring just in time to prevent being knocked out.

Colonel Bryan ought to have stayed in the army and gone to the Philippines. He could have been of service in talking the legs off of insurgents.

Lawyers in the eastern part of Kentucky will be well-qualified to travel a legal circuit in the Philippines when the army establishes courts there, as the Kentucky attorneys are practicing with Gatling guns.

Colonel Bryan is like the light-weight champion who tells the country of his wish to go against the heavy weight. He has more nerve than strength. The Nebraska champion should contest only with some one of his size. He does not belong in the same class with McKinley.

The sugar trust is now on record as opposed to tariff protection, calling it the mother of trusts. That is a pretty sure sign that the "mother" must have spanked this particular trust. If tariff protection had helped the sugar trust there would be no such testimony from Havemeyer.

The French army has organized a bicycle corps. France is always among the first to adopt innovations in the army service, but there is good reason to believe that Aguinaldo is the leader in the use of the bicycle in war time. Else how does he always make a century run whenever the Americans seek to catch him?

Public opinion of the outrage at the Paris race track caused Premier Dupuy to employ 35,000 soldiers and policemen to line the streets and race track when President Loubet went a week later amid the cheers of the people, to defy anyone to again insult the president of France. But the very next day the ministry was compelled to resign for having spent so much money in massing soldiers for the demonstration.

In nearly every town that has an electric system, electric fans are buzzing to agitate the atmosphere and cool heated humanity. But in Santa Fe the fan is unnecessary. In fact, the majority of people are wearing the same clothes that were in use in the winter months, minus overcoats and wraps. When a man in a crash suit comes up from El Paso he calls for a fire upon reaching a hotel, and if he appears upon the street in the summer costume, he is stared at like a circus parade.

If Cubans do not become Yankees it will not be because they are not taking to Massachusetts diet. In the short month of February they imported nearly 500,000 kilos of codfish. Boston has not reported how many cans of expansive beans she has shipped to the island, but as there has been no roar from Atkinson and others about the Cuba that the United States may do Cuba, it is likely that Chile enters of the tropic country are turning to beans, and Boston will not oppose expansion if beans cause it.

Rev. Alexander Jeffries, of Los Angeles, father of the successful pugilist, is doing more talking than the son. The old gentleman takes a cheerful view of the future spiritual welfare of James. "The hand of the Lord is in it," he said of the victory. "Jim is taking a short cut through the prize ring to salvation. He will keep up his devilment until he gets licked." Then he will "get good," the father thinks. Defeat has not yet made Sunday-school teachers of Sullivan, Corbett, Fitzsimmons and others. The Los Angeles preacher evidently thinks it true that "God moves in mysterious ways his wonders to perform."

Bishop Hurst, of the Methodist church, and his wife have quarreled and separated like ordinary people minus the grace of religion. The cause of the separation was the disposition of the bishop to give too freely of his rich wife's money to charitable institutions. She protested against this prodigality, and the churchman resented the interference. The result was a voyage to Europe by the wife, and the restitution of her wealth by the bishop, at the request of a brother of the absent woman. The bishop undoubtedly believes that money is the root of all evil, although he may have considered it not a bad thing when he had it to burn.

John J. Ingalls, once the snob of the United States Senate and the pet of the rich members, is now on the staff of the New York Journal, and distinguishing himself by his attacks on trusts. In a recent article he intimated that the managers of the window-glass trust which had shut its factories and thus made 17,000 workmen, and 50,000 people dependent upon them, should be hanged to lamp posts. Mr. Ingalls never raised his voice against corporate or monopolistic wrong when he was a political dad, favored by the very class he now denounces. He has learned something of humility, perhaps, since the days of his riddiculous success, and what he says now as a writer may be said in bitter sincerity.

Some intolerant silver politicians are giving it out that no delegation from a state that does not endorse free silver in a state convention will be recognized. This foreshadows a beautiful row that will be worth going miles to see.

Roosevelt has a municipal board that is forcing needed sidewalk improvements upon the people. Property owners who are compelled to pay the expense are petitioning for disincorporation of the municipality. Some people have to be pushed, and when pushed seek to retard public enterprise.

Senator Hanna is in Europe. Czar Reed is in Paris, watching the row and longing to be speaker of the chamber for five minutes. Boss Croker, the ruler of Greater New York, is in Europe. The United States seeking to annex a continent, or is only it New York that is proposing to annex something on the other side?

The government is hunting the country over for stenographers who can take from Spanish dictation. The stenographers are wanted in the Philippines to report the tales the natives and Spanish prisoners tell. One of them will be wanted to record Aguinaldo's tale of woe by and by. But it will be over a long-distance telephone.

The flings of the press at Boston, owing to the attitude of Atkinson et al. in regard to the Philippine war, have stung the pride of the people. More recruits for the navy and army are enlisting in that city than in any other. St. Louis and New Orleans are also doing better than New York and San Francisco.

The Populist professors in a state agricultural college of Kansas are to lose their jobs. The country has grown tired of all that savors of populism, and as these professors were installed as pay for their chin music, they are to be displaced. In a few years the name of the party that lived but a day in the period of the country's distress will be forgotten.

Senator McLaurin, of South Carolina, in addressing college students last week on "Imperialism," declared it to be the duty of this country to accept the newly acquired territory as a trust for God and humanity. He said: "The statesman who doubts or falters is a demagogue; the Christian who doubts or falters is a traitor to his God and his religion."

It takes 35,000 policemen and soldiers to see the French president safely through a stay of twenty minutes at a race track. The president of the United States can go to a race without a policeman or soldier in a mile of him, and his hat will not be smashed. In this country all people respect the office, if not the man. In France, a large element respect no office that does not pertain to royalty.

Perhaps the reason Governor Roosevelt was a little late in saying that he would come to Las Vegas was unwillingness to leave New York unless he could be sure that Croker would not return in the absence of the governor. Roosevelt certainly would not leave the state lying around loose were the boss tiger in this country. That he is coming west is a pretty good indication that the tiger is to stay on the other side.

A declaration in favor of the gold standard by the next session of congress is looked for from the Republican majority. The action of the party on this subject was the salvation of business. In the coming campaign the Republicans will stand on their record and point to the success that followed the election of a sound money administration. If the Democrats adopt a free silver platform they can let it go at that, for the Republicans will not attempt to follow their lead.

## Editors Pained.

Democratic editors over the country apparently have pain whenever they think of the great wrong the recent civil service order inflicted upon the country. Their memory is short. When Cleveland chilled their spirits with civil service twaddle in his first term they resented his unwillingness to bounce Republicans entitled to hold office on account of merit. But when the old man finally succeeded in getting the office the second time with the aid of a cabinet that believed in grabbing, he displaced 40,000 Republicans in three years. There was no condemnation from the Democratic editors then. And when Cleveland, on the eve of his retirement from office, after the election of McKinley, threw a blanket civil service extension over 40,000 men whom he had put into office, the Democratic editors all became advocates of the before-dispensed policy.

## The Standard Oil Monopoly.

The industrial commission had a witness the other day from Ohio who proved to be a "warm number." He alleged that the Pennsylvania Central Railway Company had paid \$11,000,000 in rebates to the Standard Oil Company, giving that monopoly advantage over competitors. Without the help of the railways the monopoly would be forced to take second place, he said. The witness named a New York judge whom he charged with having been elected to office with a coal oil corruption fund, because of a decision he gave in favor of the Standard. "The Standard can raze a competitor up and down through court for ten years, and ruin him, while never ceasing illegal acts. The company packs the judicial bench, and buys legislatures. It will not do to wait reforms by states. The government should seize all railways, pay their real worth, and then give all ships the same rates. Then monopolies could not kill competitors." was substantially the argument of this Ohio competitor of the Standard.

## Redeemable in Gold, Not Coin.

In 1875 congress passed an act making legal tender notes, or greenbacks, redeemable in "coin." This has never been construed to mean silver. As long as the notes are as good as gold the people prefer to keep them. It was Bryan's intention, if he had been elected, to instruct that the notes be redeemed in silver by the secretary of the treasury. This would have put the country on a silver basis. Had he been elected

the bulk of the greenbacks would have been surrendered before he could have given such an order. It has been unnecessary when Republicans have had control, for the law to use the word gold. But in order to prevent another money scare and keep the government's redeemable currency in circulation, the coming session of congress will probably amend the law and make greenbacks redeemable in gold. Then if a silver Democrat be elected president he can not by a mere order to the secretary of the treasury destroy the stability of the currency. A change of the law will be necessary, by vote of both houses of congress. The proposed action of the Republicans will preserve the parity of money, and one dollar will continue to be as good as another. There can, under this system, be no reason for withdrawing gold from the treasury by holders of paper currency.

## THE TERRITORIAL PRESS.

### WAITING FOR STATEHOOD.

(Donna Ana County Republican.) New Mexico is waiting for statehood, which she deserves, and if she continues to show up a prosperous country of many resources she will come into the Union a full grown accessory.

### FOR APPROPRIATIONS.

(Albuquerque Journal-Democrat.) With a liberal appropriation by congress for the construction of storage reservoirs and another for the building of national sanitariums, New Mexico will not worry about the navigation of the Rio Grande.

### GOVERNOR ADVERTISES NEW MEXICO.

(Elizabethtown Miner.) Now Mexico is getting a great deal of advertisement throughout the east in the interviews of Governor Otero, had while on his recent trip to Washington. They have been published in all the eastern papers. The governor is loyal to the territory and has on each occasion given New Mexico a good send off as to her climate and resources.

### DO THEIR OWN THINKING.

(Roswell Register.) The Pecos valley delegation to the Transmississippi commercial congress at Wichita made their mark by voting right on every question that came up. They are all bright men who do their own thinking.

### BETTER IRRIGATION SYSTEM.

(Las Cruces Republican.) The people of Mesilla valley should now get together and extend our irrigation ditches to what is known as the Pecos rock. At this point there is always water in the river which shows that the bed rock is near the surface. The underflow could here be easily brought to the surface and into our ditches. Many of our best posted men on irrigation matters deem this extension a necessity if our people expect water during the dry months. At any rate it is bound to be an improvement over our present expensive makeshift.

### APPRECIATE LOYALTY.

(Carlsbad Argus.) The action of Governor Otero in the Nite reward has won him many friends in Carlsbad and Eddy county, and Sheriff Stewart and all those interested are keenly sensible and appreciative of the loyalty of support accorded by the executive.

### FOR ECONOMY OF WATER.

(Silver City Enterprise.) The Silver City Water Company, through its efficient superintendent, A. F. Nichol, is doing all in its power to increase the water supply. The fact is that the water is failing in all of the streams, and heretofore permanent springs because of the entire absence of rainfall and snowfall during the late winter and spring months. For the first time in the history of this section there was not a single shower during the spring months, and only one very light shower this summer, which fell two weeks ago. Our citizens should by economical use of water help the water company to maintain sufficient reserve in case of fire.

## MODERN SHEEP FARM.

What Is Being Done on Irrigated Land at Roswell.

A model sheep farm has been established by the Otis brothers near Roswell on the Corn farm purchased recently from the Roswell Land & Water company. W. G. Hamilton has been appointed manager of the farm and ranch. The farm consists of 376 acres, of which 220 acres is in alfalfa. One mile of 58-inch and three miles of 41-inch field fencing have been put up this year to enclose pastures for the sheep on the farm.

In one enclosure there are 700 ewes with 500 lambs and within another 600 yearling calves. Of the pasture 120 acres is salt grass land.

The fields of alfalfa with the rows of cottonwood trees on both sides along "Lover's Lane" on the north side of the farm, make a rich back ground to the quaint old adobe formerly occupied by Martin V. Corn, the original owner of the farm. The house stands in the midst of a grove of cottonwood trees. A large handsome modern dwelling will be erected in place of the old adobe. The farm house, a cottage of four rooms, will be built in front of the stables south of the old orchard famous for its apples. The walls of the old 80x100 ft. corral have been repaired. The ground inside has been broken up and thoroughly prepared and mixed with rich peat and converted into a flower garden. On the outside of the walls will be planted vines and climbing plants of different varieties. The plants, shrubs and trees will come from Allegheny, where Mr. Hamilton's father is superintendent of public parks.

An artesian well is being drilled close to the house from which water will be piped to all the buildings, the garden and the stable. The young twenty acre orchard in which alfalfa has recently been sowed will be used as a sheep pasture, the plan having been tried in the old orchard and found to work well. Rutabagas, mangel wurtzels and sugar beets, nearly twenty acres in all, have been sown as root crops for sheep feed. Taken altogether the farm and ranch are models that should be inspected by every large land owner in the territory.

## Application for Bids for Territorial Certificates of Indebtedness to Pay Deficiencies.

**A Shakespearean Discovery.**  
The most scholarly men of the world have devoted years to the study of one of Shakespeare's greatest creations. Hamlet has been discussed by the ablest minds of all countries. What his malady was, has vexed more than one scientific brain. It remains for America and the producers of America's greatest remedy—Hostetter's Stomach Bitters—to make the discovery. Nothing ails Hamlet but indigestion, which upset his liver, polluted his blood and made him nervous. If it had been possible for Hamlet to have had Hostetter's Stomach Bitters he would have been a different character. It makes and keeps stomachs strong, and with hearty digestion and pure blood no disease is possible. It is for both men and women. All druggists sell it.

**Would Not Suffer So Again for Fifty Times Its Price.**

I awoke last night with severe pains in my stomach. I never felt so badly in all my life. When I came down to work this morning I felt so weak I could hardly work. I went to Miller & McCurdy's drug store and they recommended Chamberlain's Colic, Cholera and Diarrhoea Remedy. It worked like magic and one dose fixed me all right. It certainly is the finest thing I ever used for stomach troubles. I shall not be without it in my home hereafter, for I should not care to endure the suffering of last night again for fifty times its price.—G. H. ## PHILIPPINE PEOPLES.

Researches of Professor Worcester Among the Natives.

THEIR CUSTOMS AND CHARACTER.

Some Eighty Distinct Tribes or Peoples Are Found—Chief Among Them Are the Tagalogs—Negritos Are Believed to Be the Lowest of All the Tribes.

Through the extended researches of Dean C. Worcester, professor of zoology in the University of Michigan, it has become possible for the citizens of the United States to learn something of the native population of the Philippines, estimated to be between 8,000,000 and 10,000,000 in number and divided into some 80 distinct tribes or peoples. Chief among these are the Tagalogs, who are also the most familiar to Americans, since they are the largest component of the folk on the island of Luzon, where Manila is situated. They may safely be called civilized, though among them, as elsewhere in the archipelago, there is a strong tendency to escape from the burden of Spanish taxation and set up brigandage as a species of competition. They are not a fighting race, taken as a whole, though they make excellent soldiers under efficient officers, but they are nevertheless decadent. They reached their high water mark on the island of Mindoro, 130 miles from Manila, but there today the fierce Moro, a Malay-Moslem, holds undisputed sway, and the entire coast is shunned by whites.

Next in number to them are the less well known Ilocanos and the Visayans, who differ from them more in language than in other respects, physical or intellectual. The Ilocanos are in Luzon principally, while the Visayans inhabit the group of islands known by their name, including Panay, Guimaras, Negros, Zebu, Bohol, Samar and Leyte. These, too, have yielded to the Moro when brought face to face with him, and are Christians, though not a progressive component of the population in any respect.

The aborigines of the entire Philippines are believed to be Negritos, a miserable, puny, dwarfish folk. They are quite black and have curly hair, with features heavy and stupid. General ill health adds to the feeling of repulsion they cause in Europeans or Americans. They have been worsted in the struggle for life since the discovery of the islands, and are decreasing in numbers year by year. Some of them can be found on Manila bay, though their home is in the tropical forest, where they shoot game with poisoned arrows and dig roots and tubers. They are the lowest of all the island peoples, and are wholly incapable of civilization through lack of mental capacity.

It must not be assumed that Spain has extended her sway over the area of even a single one of the Philippines. In Luzon itself, the likeliest of all the group to be civilized, it is only needful to leave the coast to find complete savagery. The hills contain numerous tribes, some of them descended from Chinese pirates, certain others of Malay extraction and head hunters to the present day, while most of them follow an unpleasant tradition which requires the kinsmen of a person newly dead to kill the first man he comes across in order to provide company for the departed on his long journey. The name Igorrote is applied to a series of these fellows, who are not necessarily related one to another. Among other tribes of head hunters are the Gaddanes, the Altasanes and the Apayanos. But there are mild mannered folk even among the wild tribes, the Tingguanes among others being kindly by nature and not given to warlike pursuits.

On the island of Palawan Battaks are found in the northern mountains and Tagbanuas along the northern coasts, the southern being under the rule of the fierce Moros. The Tagbanuas Professor Worcester found to be well intentioned. They have an alphabet and can read and write. But they go unclad for the most part—a European hat being the most highly prized article in their wardrobe. They have many curious customs and a religious belief which is quite distinctive. They believe in a future beyond the grave, down under the earth, scouting the idea of a residence in the heavens by the simple argument of inaccessibility. Though superstitious, they were not groveling under any ceremonial observances, but lived a moral life under wise laws administered by the elders in each community.

In Mindoro, lying due south of Manila bay and at no great distance, live the Mangyans, a simple folk, quite without beliefs of any discoverable kind, though Worcester lived among them for months. When he had gained their confidence he asked if they went anywhere after death and had for reply, "When a Mangyan is dead, he is dead." Nor was there any form of prayer or invocation to show the slightest belief in any divine being, whether on earth or in heaven. They had no fetiches, and amulets and charms of any kind were not usual with them. They do not inflict death upon members of their own tribe, confiscation of property being the penalty for murder. They have an appeal of the sort known to the old common law, the accused being required to pick up a piece of hot iron with his bare hand. If he drops it, he is found as guilty. They are strictly honest, and marital infidelity is unknown among them. In fact, Professor Worcester sums up the native situation in the Philippines thus, "After making somewhat extensive observations I am inclined to formulate the law that their morals improve as the square of the distance from churches and other so-called 'civilizing influences.'"—Cor. Chicago Times Herald.

**THERE'LL BE FIREWORKS**  
In Las Vegas at the Rough Riders' Reunion. The charge up San Juan hill will be realistically shown. 'Tis safer to see it now and in this fashion than it was when the Rough Riders climbed the hill in the face of a murderous hail of bullets. The railroad fare is only \$2.50. Tickets on sale June 23, 24, 25, limited to June 28.

"One good turn deserves another." Those who have been cured by Hood's Sarsaparilla are glad to tell others about it.

## "JUST DRAGGING AROUND."

How many thousands of women understand the sad and pitiful meaning of that simple phrase: "Just dragging around." Women everywhere who feel that they have a work and a mission of womanhood to accomplish in this world will appreciate instantly the disheartened spirit of Mrs. Mattie Venhans, of Tioga, Hancock County, Illinois.

"I had been sick for seven years," she says, "and in bed, but just dragging myself around. At last I took three bottles of Dr. Pierce's Favorite Prescription and five of Golden Medical Discovery, and it is impossible to say how good the good medicines did me. My husband says 'Golden Medical Discovery' is the best medicine he ever tried for a cough. No praise is too high for Dr. Pierce's medicines."

Another lady, Mrs. R. P. Monfort, of Lebanon, Warren Co., Ohio, says, "I think Dr. Pierce's Golden Medical Discovery the finest medicine on record. I have taken a number of bottles and it is the only medicine that relieved my terrible headaches."

Women who suffer should write to Dr. R. V. Pierce, of Buffalo, N. Y. He will send them the best professional advice that can be had anywhere in America and entirely without charge. Neither the "Favorite Prescription" nor the "Golden Medical Discovery" contains any alcohol to enliven or create a morbid craving for stimulants.

Every woman should own a copy of his splendid book "The Common Sense Medical Adviser." It is the grandest medical book for popular reading ever written. It contains a fund of knowledge of precious value to women. It has over a thousand pages elaborately illustrated with engravings and colored plates. The first edition of more than half a million copies was sold at \$1.50 each. The profit from this induced Dr. Pierce to carry out his cherished intention of issuing a free edition on copy of which in paper-covers will be 10¢ for the bare cost of mailing, 21 one-cent stamps, or a heavier cloth-bound copy for 31 stamps.

ALAMOGORDO BUILDING

Brief Description of Operations Under Way—Large Number of Structures Going Up.

CONTRACTORS KEPT BUSY

El Paso & Northeastern Railway Spending Large Amount of Money on Its Property—Machine Shops and Round House.

The Alamogordo Improvement Company is erecting a number of fine residences, most of them two and two and a half stories in height. The company originally intended to build fifteen houses, but has been so successful in renting or selling the buildings, some of them before the foundations were laid, that the number has been considerably increased.

The greater number of these dwellings face Indiana and Michigan avenues, and are provided with modern improvements. The first three erected are on Michigan avenue, facing east. They are completed with the exception of fitting the doors and windows. So soon as the work on the water works is completed the yards will be sown in grass, and flowers and shade trees planted. F. E. Beldeman has charge of the work on the buildings, and is now erecting a two-story residence facing Indiana avenue, which has been sold to Mr. Ackley.

The large two and a half story building directly north of Hotel Alamogordo has been rented to the county to be used as a court house. It contains eight large rooms, and is the most suitable structure in the city for county purposes. The new jail, just back of it, is now ready for the placing of the cages.

The second house erected by the company is north of the one to be used as a court house, and like the first, is two and a half stories. It has been rented to Fred Nymeyer, who will occupy it as a residence. It has twelve rooms, and a large yard, which is being beautified and will be one of the prettiest places in town.

The third two and a half story building, still further north on the same avenue, is rented to the Commercial club to be used as a club house. It has a broad veranda on three sides, and a nice lawn and shade trees. The club is fitting up reception, reading, music and lounging rooms, and will soon be prepared to royally entertain whomsoever is fortunate enough to be its guest. This building contains thirteen large rooms, all of them nicely arranged for club purposes.

F. E. Beldeman, the builder in charge, has just completed a nice office of three rooms on Michigan avenue, which is a model of convenience with its electric lights and other modern appliances. His residence is also under way, the foundation of which was laid some time ago. It is one of the group to be built on Indiana avenue.

The plans are being drawn for a modern cottage for Laurie & Frazier, something after the same style as those already built by the company. In the same group of dwellings H. Alexander and W. A. Hawkins will each have a residence. The plans have been prepared and the buildings will be erected as soon as possible, since these gentlemen desire to leave El Paso at the earliest possible moment. They will also move their offices here when the new depot building is finished, which will be about the first of next month.

Besides the above-mentioned buildings, Mr. Beldeman has in charge the construction of a number of smaller houses, from three to seven rooms each, two of which are almost completed and are rented. The number of these houses to be built by the company will depend upon the demand, but from present prospects will be twenty-five or thirty.

Mr. Beldeman is also superintending the building of two fine residences of five rooms each, for L. F. Megargel, of Scranton, Pa. Mr. Megargel came to Alamogordo about two months ago, and was so well pleased with the little city and its prospects that before leaving for his eastern home he purchased a number of lots and let contracts for the erection of houses on them. He has four small dwellings on Ninth street which are finished and rented, and the two now under construction are spoken for.

Valentine & Crain have just completed a neat cottage on Michigan avenue, four blocks from Hotel Alamogordo.

S. E. Pelphrey has sold his residence on Florida avenue and purchased a lot on Ohio avenue, where he will build a large brick dwelling. The plans for the building have been drawn, and work is expected to begin next week.

W. B. Snodgrass' small dwelling on Twelfth street is not ready to be occupied.

J. L. O'Shea has a beautiful dwelling almost completed on the corner of Tenth street and Virginia avenue. It is a model residence of seven rooms, and is an ornament to the city.

Broyle & Patterson have finished their building, and are engaged in the manufacture and wholesaling of soda waters.

The depot should not be overlooked in this brief description of Alamogordo's building operations, since it is larger and more complete than the one in El Paso. Nothing speaks so well for the future of this city as does the work being done by the El Paso and Northeastern Railway. The largest and most artistic depot to be built along the line of road is located here, and when it is finished the offices of the president, general manager, superintendent, attorney, purchasing agent and a number of the other officials will be moved from El Paso to handsome quarters on the upper floor. Here will be located the round house and machine shops; here the company will spend large sums of money in improving its property and making the best town in New Mexico.

In the southern part of the city, below the business portion, the Alamogordo Lumber Company is erecting a number of cottages, thirty in all, to be sold or rented to the men employed in the saw-mills. Three are completed, and seven others are in course of construction. The entire number will be finished by the time the new mill is ready to begin operations.

Several individuals are also building. Among them D. C. Campbell has a two-story, six-room house rapidly approaching completion. It is in the hands of the painters, and Mr. Campbell will take possession and move his family in the last of the month. It faces east on New York avenue, and is three blocks from R. H. Pierce & Co.'s large mercantile house.

Joseph Seeger has a six-room, two-story dwelling about ready for occupancy.

M. Whiteman has finished a business house on the site of his store building, which was burned last month. It is rented and occupied.

The Pennsylvania House, which was burned at the same time as the Whiteman store, is being rebuilt. It will be a two-story abode building, 25x90 feet, and will be used for hotel purposes.

S. Laughlin is putting the finishing touches to a ten-room lodging house on the corner of Ninth street and Maryland avenue.

The Texas restaurant has completed an addition 14-20 feet to the dining hall. The addition was made necessary by the constantly increasing business done by the place.

Aside from the buildings mentioned, many others are being arranged for, and before the season closes Alamogordo will contain more new structures than any other town in the territory.—Alamogordo News.

### ALLEGED POISONING.

A Girl Said to Have Been Murdered in  
Socorro County.

Urbano Benavides and Anasaria de Garcia were arrested on the Gila river, in Socorro county, on a charge of poisoning Isabel Barreras, a 14-year-old girl. The poisoning took place on the night of May 3. A hearing was given the two before Judge Leland, who held the woman without bail and the man under \$2,000 bail.

The facts brought out at the preliminary examination are that on May 3, a holiday for the Roman Catholics, there was a gathering at the home of Celso Garcia to celebrate the event. One of the witnesses overheard a conversation between the woman, Garcia and Benavides, in which the man asked the woman to speak to the Barreras girl to see if she would marry him, saying: "If she refuses, give her something that will send her to the devil." The woman is said to have answered: "I have a remedy that will fix her."

After midnight a meal was served, and the Garcia woman was seen sprinkling a white powder on the girl's food, saying that it was pepper. The girl and her mother went home shortly afterwards, when the girl complained of nausea and pain in the stomach. She lingered four days, and then died, with the symptoms of poisoning. The body of the girl has been exhumed, and the stomach is now in the hands of a chemist at Albuquerque for examination. The girl's father died about eight months ago.

### A SOCORRO TRAGEDY.

An Alleged Hero Said to Be Under Sus-  
picion.

The Socorro Chieftain is responsible for a story that T. P. Mullane, alias Dug Perry, who was accused of holding up a store at Frisco, Socorro county, is believed to have been murdered by a man named Foster, who, it is claimed, was a partner of Mullane. The report is that the sheriff's posse following the robber, came upon Foster at a ranch which Mullane had taken possession of, but Mullane was not there at the time. Foster offered to arrest Mullane or kill him if the warrant were given to him. The warrant was handed to Foster, and the next day he reported that he had the man. Mullane's body had six bullet holes in the breast, almost in a line. Foster at one time worked for C. T. Brown at Socorro, got into some trouble, skipped, and was afterward reported to have joined a gang of rustlers. Many people think that Foster is the real culprit, and murdered his partner to clear himself, says the Socorro county paper.

### THE TERRITORIAL TREASURERSHIP.

The Appointment of Governor Otero Explains His Reasons for Declining.

Since the appointment of Hon. Jefferson Reynolds as territorial treasurer there have been street rumors that he would decline to qualify. Some of the papers announced this as a fact. But there were counter rumors that Mr. Reynolds might adhere to his original intention. Pending a determination of the matter, the New Mexican made no statement, because it prefers to publish only facts. Last night Governor Otero received notice of the final decision of Mr. Reynolds. By the same mail which brought the notice to the governor came a letter addressed to the New Mexican, under date of June 17, prompted by premature and incorrect statements of certain other papers. The letter reads as follows:

"Editor New Mexican: I have recently observed articles in the different newspapers in the territory with reference to my appointment to the office of treasurer and my failure to accept the same, none of which are authorized statements and many of them untrue. 'The facts are, that after the adjournment of the last legislature I desired this appointment, and the governor assured me that he would make it when I would signify my readiness to qualify.'

"This I did on the 8th inst. on my return from the republic of Mexico, where I had been for several weeks previous.

"But upon arriving at Las Vegas and consulting with my business associates, I found that during my absence in Mexico circumstances had arisen which would render it impossible for me to accept this position without great pecuniary loss to myself; and that in justice to my own interests and those of my business associates, I could not take the office and give it the time and attention which its responsible character deserved, and which is the only reason for my declining the position. I therefore notified the governor to that effect, at the same time expressing my deep regret in being unable to carry out his wishes in the matter, as well as my own. I am in hearty accord with the governor and his administration of affairs in the territory, and deeply regret the circumstances which prevent me from actively assisting him as one of his officers and appointees in continuing his efforts for the welfare of the territory. Very respectfully,

"JEFFERSON REYNOLDS."

### Flowers for Prisoners.

Flower day at the penitentiary yesterday drew quite a number of people to that institution. A musical program consisting of quartet and solo singing was rendered. The convicts joined heartily in singing hymns. A bouquet was presented to each convict. Assistant United States Attorney W. H. Pope made an address to the convicts. The exercises were under the auspices of the local Woman's Christian Temperance Union.

### SERMON FOR STUDENTS.

Religious Exercises at the United States Indian School.

Rev. A. H. Southerland, of the M. E. church at Cerrillos, preached the baccalaureate sermon to the senior class at the government Indian school last evening. Almost 100 people from the city attended the services. A pleasing musical program was given by the school choir, Mr. Holt and Miss Schorrmeyer. Mr. Moore, of the Presbyterian church, led in fervent prayer. Mr. Southerland, in introducing his sermon, said that no educational advantages are perfect unless religious instruction is included in them. In conclusion, he addressed words of advice to the five young men of the graduating class. His sermon was a scholarly one, and could be classed as a literary effort. Mr. Gay, of the Episcopal church, pronounced the benediction.
