## THE STRIKE GROWING

**More Coal Miners Join the Strikers in the Anthracite Region of Pennsylvania.**

## SOME TALK OF ARBITRATION

**The Weather Is Growing Older and There Will Soon Be a Great Demand for Coal—Mine Operators Are Stubborn.**

Philadelphia, Pa., September 18.—If as President Mitchell, of the United Mine Workers, claimed last night, 113,000 of the 141,000 mine workers of the Pennsylvania anthracite coal fields were idle yesterday, it is certain that the number has been considerably augmented today. Reports from four big districts embracing the hard coal region say that fewer men are at work today than yesterday and that the colliers that worked full handed or nearly so yesterday are either badly crippled or shut down today. The weather has grown much colder. The workers argue that an increased demand for coal will hasten the adjustment of the difference. The talk of arbitration is so persistent, and the hope grows that this method of settling the strike will finally be adopted, although the mine owners declare they will deal only with the employees as individuals and the strike leaders say that they insist upon the formal recognition of the union.

## PRICE OF COAL ADVANCING.

Philadelphia, Pa., September 18.—The Philadelphia & Reading Coal and Iron company announced this afternoon that all grades of coal have advanced 25 cents per ton.

## TWO WESTERN CITIES.

**Butte Makes a Big Gain and Pueblo a Small Gain in Population.**

Washington, Sept. 18.—The census bureau announces the population of Pueblo, Colo., to be 28,157 against 24,558 in 1890. The bureau announced the population of Butte, Mont., to be 30,470 as against 10,723 in 1890, a gain of almost 200 per cent.

## COLORED PEOPLE ON TOP.

**They Today Celebrated Their Victory in Santiago de Cuba.**

Santiago de Cuba, September 18.—The election of delegates to the constitutional convention resulted in favor of the black party throughout this entire province, and the whites now openly declare themselves to be annexed. Ten thousand colored men, wearing badges containing skull and cross bones, signifying death to the Republican party, paraded last night. A mock funeral of the Republican party was held today attended by thousands of colored people.

## INDUSTRIAL MANIPULATIONS.

**Large Iron Works in Pennsylvania Resume Operations.**

Pittsburg, Pa., Sept. 18.—Oliver's south side plant of the American Steel & Wire company resumed operations, and orders have been issued to start the Anderson plant and the mill of the same concern within a week. The mills had been closed since Gate's order last April. The American Steel & Wire company and the Republic Iron & Steel company entered into an arrangement by which the former withdraws from the merchant bar trade and the latter from the sheet production. In this deal the sheet company secured the sheet mills of the Republic works at Toledo, Ironton, Hazleton, Youngstown, Ohio and Alexandria, Ind., and will dismantle them along with the three sheet mills of Shelton, Pa. The Republic company gets the big bar mill of the Reeves plant at Canal Dover, Ohio, and will remove the machinery to its other mills.

## The Howard Trial.

Frankfort, Ky., Sept. 18.—Ben Rake, the stable boy, was the first witness called in the Howard trial today. He substantially corroborated Bowman Gaines' testimony that Howard was in Frankfort the day that Goebel was assassinated.

## COLORADO REPUBLICANS.

**They Nominate a State Ticket and Adopt a Strong Platform.**

Denver, Sept. 18.—The Republican convention today completed the state ticket, adjourning at noon sine die. The nominations were all made by acclamation. The following complete ticket was named: Justice of the supreme court, G. C. Bartels, Denver; governor, Frank C. Gundy, Denver; lieutenant governor, Perry S. Rider, Telluride; secretary of state, Joseph W. Wilson, Canon City; treasurer, Orson Adams, Grand Junction; auditor, James S. Murphy, Alamosa; superintendent of schools, Mrs. J. T. Hanna, Denver; regents of the university, Charles R. Dudley, Denver; George N. McClure, Boulder; presidential electors, Irving Howbert, Colorado Springs; Thomas S. McMurray, Denver; Thomas F. Walsh, Ouray; Simon Guggenheim, Pueblo. The resolutions endorse the administration of President McKinley and the record of Senator Wolcott. On state matters it pledges the Republican party to an eight-hour labor law, home rule for Denver, taxation of franchisees, revision of revenue laws in the interest of just taxation and simple state revenues, adoption of the merit system in state appointments, the improvement of roads, the repeal of the present pig fight law, retrenchment in state expenses, and opposes the leasing of school lands in large tracts. It expresses sympathy for the Galveston sufferers.

## Returned to Washington.

Canton, Ohio, September 18.—President McKinley started for Washington this afternoon. It is said that matters connected with the Chinese situation call him to the capital.

## THE SITUATION IMPROVES

**Fears of an Epidemic at Galveston Have Been Allayed by Distribution of Medicines and Disinfectants.**

## EVERY DEPARTMENT NOW ORGANIZED

Galveston, Texas, Sept. 18.—The situation continues to improve. Work has been brought down to a business basis as far as possible. All laborers have been assured compensation for their labor. Every department is as well organized as possible under the circumstances. Supplies and money are pouring in from all over the country. It is stated that at least seven figures are needed to express the amount of cash received.

The death list reaches a total of 4,437 with the additions made today. Only a comparatively small number of negroes who perished have been reported. After considering all the facts one can hardly help concluding that the total to be finally reached will be about 6,000. Judge Mann stated today that in his opinion the list would go as high as 7,000. The estimate of the property loss of \$22,500,000 is not regarded too high, and people are becoming more cheerful every day. The people are still leaving the city in considerable numbers, but the relief work locally has now been gotten down to such a fine point that it is likely that there will be a marked diminution of the exodus during the next two or three days. Fears of an epidemic have been allayed by the distribution of medicines and disinfectants.

## A WHOLE TOWN DESTROYED.

Dallas, Texas, Sept. 18.—News reached Dallas today that High Island, a seaside resort, thirty miles northeast of Galveston, near the Gulf shore, in the southwestern corner of Jefferson county, Texas, was entirely destroyed in the storm that devastated Galveston. The place had about 1,000 residents, many of them visitors. Not a house was left standing, and more than 400 dead bodies were found yesterday by relief and exploring parties. General Manager Spangler, of the Gulf and Interstate railway, received the information that more than thirty miles of that road had been entirely destroyed between Bolivar Point and High Island.

## BATTLE OF KOMATIPOORT.

**An Effort to Out Off Supplies Reaching the Boers.**

Lorenzo Marques, Sept. 18.—Fighting is proceeding at Komatipoort. All available men have been sent to the front. It is expected that the Komatipoort bridge will be destroyed. There is great uneasiness here. With the occupation of Komatipoort the British would be able to cut off all supplies reaching the Boers by railroad from Portuguese territory.

## KEARSARGE DAY.

**Formal Presentation of Tablets to the Kearsarge and the Alabama.**

Portsmouth, N. H., Sept. 18.—"Kearsarge day," which includes the presentation of commemorative tablets to the new battleships Kearsarge and Alabama and the presence of the present and former secretary of the navy, the governor of Alabama, and other distinguished guests, opened stormy, so the formal presentation exercises were postponed until 3 o'clock. The guests and speakers occupied a specially erected stand in the park. The area in front of the stand was crowded with spectators. Charles H. Burns, president of the day, spoke at length of the significance of the occasion. Miss Mary Thornton Davis, of Boston, niece of Lieutenant Thornton, executive officer of the old Kearsarge, and Mrs. Henry Bryan, of Alabama, daughter of Rear Admiral Semmes, of the old Alabama, unveiled the tablets. Governor Frank W. Rollins made a brief address presenting the tablets to Captain Folger, of the Kearsarge, and Captain Brownson, of the Alabama. Secretary of the Navy John G. Long responded on behalf of the navy department. The exercises concluded with a historical address by the former Secretary of the Navy Herbert.

## FORMAL ACCEPTANCE

**Colonel W. J. Bryan in an Open Letter Accepts the Nomination for the Presidency.**

## DISCUSSES MANY SUBJECTS

**Only a Brief Review of the Planks in the Kansas City Platform—Another Deliberation on Imperialism—Two Western Questions.**

William J. Bryan's letter accepting the Democratic nomination for president of the United States, was published today. It was addressed to Hon. James D. Richardson, chairman, and others of the notification committee of the Democratic national convention. The letter devotes itself to a discussion of trusts, corporations in politics, interstate commerce, the free coinage of silver at a ratio of 16 to 1, the election of senators by the people, direct legislation, the labor question, blacklisting, arbitration, a department of labor, Chinese exclusion, pensions, the Nicaragua canal, statehood for the territories, Alaska and Porto Rico, Cuba, reclamation of arid lands, foreign alliances, the Monroe doctrine, extravagance in administering public affairs, the income tax and last of all imperialism.

## THE TERRITORIES.

On statehood for the territories the letter says: "Arizona, New Mexico and Oklahoma have long been ready to assume the responsibilities and enjoy the privileges of statehood, and it will be a pleasure, as well as a duty, to carry out the platform pledge concerning them."

## ARID LANDS.

On the arid land question the following is said: "The time is ripe for a systematic and extended effort to reclaim the arid lands and fit them for actual settlers. The last agricultural report estimates that homes can thus be provided for many millions of people. The impounding and use of the waters which are wasted in the spring would people the western states with thrifty, intelligent and industrious citizens, and these would furnish a valuable market for all the products of the factories. A small percentage of the money spent in a war of conquest would provide occupation and habitation for more people than would ever seek a residence in colonies within the tropics."

## IMPERIALISM.

Imperialism is treated as follows: "The subjects, however, treated in this letter, important as each may seem in itself, do not press so imperative for solution as the question which the platform declares to be the paramount issue in this campaign. Whether we shall adhere to, or abandon those ideas of government which have distinguished this nation from other nations and given to its history its peculiar charm and value is a question the settlement of which cannot be delayed. No other question can approach it in importance; no other question demands such immediate consideration. It is easier to lose a reputation than to establish one, and this nation would find it a long and laborious task to regain its proud position among the nations, if, under the stress of temptation, it should repudiate the self-evident truths proclaimed by our heroic ancestors and sacredly treasured during a career unparalleled in the annals of time. When the doctrine that the people are the final source of power is secured from further attack and safely proceeded to the settlement of the numerous questions which involve the domestic and economic welfare of our citizens." All the topics of the letter are treated very briefly, in fact the letter is a mere review of the planks in the Kansas City platform.

## RAILROAD PRESIDENTS MEET.

**They Are Discussing Subjects of Interest to Railroads.**

New York, Sept. 18.—Nearly every important railway line throughout the west was represented today at a quarterly conference of railway presidents. E. J. Jeffery, president of the D. & R. G. railroad, presided. Among the matters considered by the officials was the partial failure of a plan formulated last June for the appointment of district committees at such centers as St. Paul, Kansas City, Omaha, Chicago and St. Louis. It is probable that the unsuccessful attempt to organize at Glenwood Springs, Colo., a new transcontinental passenger association, will also come up for consideration.

## Good Advice for Stockmen.

Every stockman and ranchman who has wire fence on his place should see to it, and without delay, that at frequent intervals a strand of wire runs along the ground reports the numerous late of cattle getting against the wire and receiving the full force of a lightning stroke. A little labor in going over the fence and grounds will save the stock from death in that form.

## THE WOOL MARKET.

**Manufacturers Will Not Buy Until After the Election.**

Boston, Sept. 18.—The sales of the wool market this week have been smaller than at any time in the past three months. This slow business does not tend to strengthen the market, but dealers say to cut prices would not increase the business as manufacturers simply are buying what is required to keep their mills in operation. Territory: Wools are slow. For fine medium and fine staple in, 45 to 50c is asked. Fleece wools are slow with prices. Fleece wools are slow with prices.

## THE ST. LOUIS MARKET.

St. Louis, Sept. 18.—Wool is dull and tending lower.

## Democratic Split in Arizona.

There is a split in the Democratic ranks of Arizona. Mark Smith and J. P. Wilson were almost simultaneously nominated for the office for delegates from Arizona to congress at the convention in Phoenix. The Smith side of the house had ninety-two votes, while Wilson had 103. Charles M. Stanton presided over the meeting, and the house, and Reese M. Ling over the Willsones. A contest will be had in the courts over the right to carry the title of "regular."

## RIO ARRIBA REPUBLICANS.

**Enthusiastic Convention Recommending Hon. L. B. Prince for Delegate.**

Esplanada, N. M., Sept. 18th, 1900.—The Republican county convention held at Abiquiu for the purpose of nominating nine delegates to the Republican territorial convention at Santa Fe, October 1st, was large, very enthusiastic and harmonious. Resolutions were unanimously adopted recommending Ex-Governor L. Bradford Prince for the Republican nomination for delegate to the 57th congress, and instructing the delegation to vote as a unit in the Republican territorial convention.

The delegates are: L. Bradford Prince, Jose Salazar, Amador Ortiz, Venecio Jaramillo, Antonio D. Vargas, J. M. C. Chavez, Preciliano Lopez, Alexander Read and Victor Valdez. These best posted on the political complexion of the county assert that Ex-Governor Prince will carry the county by 600 or 800 majority, and that his nomination insures the success of the council and legislative tickets.

## MURDERED BY HIS WIFE.

**A Tragedy Enacted at Cerrillos Shortly After Noon Today.**

Cerrillos, N. M., Sept. 18.—Ed Johnson, bridge carpenter in the B. P. Williams' gang, located here, was shot and killed by his wife at 1:45 this afternoon. Evidence before the coroner's jury shows that he threatened to kill her and flourish a knife and revolver before her face. He took the cartridges out of the gun and threw it on the bed, where she got it, reloaded it and shot him behind the right ear, killing him instantly.

## MYSTERIOUS LAKES.

**They Are Apparently Bottomless and Are Clear as Crystal.**

In Chaves county, about twelve miles east from Roswell, there are a series of lakes which are termed in that locality the bottomless lakes. Bottomless they must be, for every attempt to fathom them has been a failure.

The water is always cool and very pleasing to the taste, greatly similar to the artesian water in that district, and is cool during even the hottest season. In some places the ground has been dug away so that the water might flow from the lakes upon the plain. It is noticeable however, that in these provided outlets only a very small quantity flows away. The water stands at the same level constantly. Some of the lakes are crowded with fish and form a great resort for those who live in the vicinity as well as the ones who visit for the pleasure of angling. The large quantities of perch, some black bass, and at times a fish without eyes is caught. The ones that have been taken are of a darkish color, with scales, and about eight or ten inches in length.

Those who have inhabited that portion of the country for some years claim that there exists an underground sea, thus giving cause for the formation of the lakes.

Through a narrow range leading west and north from the lakes is what is termed the artesian belt, where many fine wells exist. This portion is limited. The bluff at these lakes for some distance back from the crest is filled with quinces which seem to grow larger year by year. A stone dropped into some of these can be heard to rattle against the rocky sides until the sound gradually dies away within the bowels of the earth.

Another oddity is that this high bluff, becomes a plain on top and stretches toward the south until it merges into the Staked Plains.

West from the lakes about a mile flows the Pecos river. Some 20 miles west the foothills begin, which eventually terminate in the great Rocky mountain range which traverses a part of New Mexico.

These lakes are so perfectly clear in these lakes that one can see to a depth of more than 25 feet. When fishing one can see the fish floating around the hook and observe every move they make. It is difficult to catch the larger ones, but it is no trouble to secure a great number of the little perch. Horses do not seem to want to stay in the neighborhood of these lakes, taking a pronounced dislike to the surroundings through animal instinct. The lakes are a great problem for some scientists.

## A MURDER TRIAL.

**The Case Against Tomas Dominguez Keeps the Court Busy.**

The district court today resumed the trial of the case of the Territory of New Mexico vs. Tomas Dominguez for the alleged murder of Clemente Gutierrez. The taking of testimony has now begun on behalf of the killing. A number of witnesses to the killing have been heard so far and the rocks alleged to have been used by the defendant to pound Gutierrez are in evidence in the courtroom and have been identified by witnesses. They are rather large stones weighing about a pound. The trial of the case seems likely to take several days more.

## NEW MEXICO SCHOOL OF MINES

**Pupils Had to Be Turned Away for Lack of Accommodations—Sierra County Commercial Club—Other Items of Territorial News.**

**CHAVES COUNTY.** The Presbyterian church at Roswell has now a membership of sixty-four, and will build a church this year. The Penasco and did great damage to the crops and farms located along the stream.

**SIERRA COUNTY.** A heavy flood came down Jaralosa creek last week and badly damaged the new county bridge. The county commissioners have restored the precinct at Chloride, as petitioned for by the inhabitants.

**SIERRA COUNTY.** The road between Hillsboro and Kingston is in very bad condition as a result of the recent heavy rains. M. Gonzalez, a miner at the Snake River mine, was injured last week by a rock falling on him, injuring his spine, breaking three ribs, besides inflicting internal injuries.

**SIERRA COUNTY.** The Blackie mine at Kingston has been leased. It is said that the ore last shipped from the May mine at Chloride netted the owners a little more than \$125 a ton after deducting freight and smelter charges. Chris Rugsesser is opening up his new mine on the great eastern at Chloride. The ore is copper grade and carbonate, and the solid mineral varies from 6 to 8 inches in width. He has sunk only a few feet on it, but is opening it up as fast as possible.

**SOCORRO COUNTY.** Capt. M. Cooney has secured an option on the mining property belonging to Jenkins, Levy & Northern, situated opposite La Joya. The property is a lead proposition on a fissure vein, which is 1/2 feet wide at the top and 1/4 wide at the bottom of a 150-foot shaft. The shaft is sunk in granite, and is mineralized from top to bottom. The outcropping is solid mineral, 10 to 12 inches in length, without a break. The captain has also located some iron claims near this property that runs 75 per cent ore.

## WILL HAVE COMPLETE CHARGE.

**W. S. Martin, the New General Superintendent of the Denver & Rio Grande Railroad.**

W. S. Martin, the new general superintendent of the Denver & Rio Grande railroad, will have complete charge of the operating department of the road, it has been announced. The general manager will not have any direct connection with the operation of the railroad. All that part of the work which has heretofore been looked after by the general manager will be cared for by the general superintendent.

**Deming Ice Factory Burned Down.** The Deming ice factory was totally destroyed by fire about 2 o'clock on last Wednesday morning. The loss will probably be about \$20,000, fully covered by insurance. The plant will be rebuilt at once and meanwhile ice will be shipped from Albuquerque. The origin of the fire is not known, but there is no suspicion of incendiarism.

## A Horse and Saddle Recovered.

Last week Deputy Sheriff Williams arrested a Mexican who was trying to dispose of an excellent horse and saddle unusually cheap at Las Cruces. Investigation showed that it belonged to the German W. A. Mitchell, of El Paso, and had been stolen several weeks before. The thief was identified as Pascual Metres a well known character in the El Paso police circles. He admitted the theft and was sent back to Texas for trial.

## A Sign of Prosperity.

The net earnings of the Denver & Rio Grande railroad in the first week of September were \$238,500, compared with \$195,000 in the corresponding week last year, an increase of \$43,500. Since July 1, the beginning of the fiscal year, the earnings have been \$2,178,800, compared with \$1,702,000 in the like period of last year, an increase of \$476,800.

## T. M. Ramsdale Promoted.

Thomas M. Ramsdale, who, for the past two years, has been foreman of the car department of the Santa Fe Pacific shops at Albuquerque, has received notice of his promotion to the responsible position of master car builder for the entire Santa Fe system. At the close of working hours the other day employees under Mr. Ramsdale gathered in his office and presented him with a fine consistory and Knight Templar combination watch chain set with rubies and diamonds.

## JARILLA CAMP PROSPEROUS

**There Is a Better Feeling in That District Than There Has Been Since It Came into Prominence.**

## THE MINES OF SIERRA AND SOCORRO

**OTERO COUNTY.** Maj. W. H. Lewellyn, who is largely interested in the Jarilla mining camp, where the Jarilla mine is located, said: "There is a better feeling in that district now than there ever has been, owing to increased activity on the part of a great many of the owners of property there. A majority of the claim owners are at work getting out shipping ore, instead of standing around the district waiting for the claims to be prospect holes, as was formerly the rule. This is a very good indication, and I predict that the shipments of ore from the district will continue to increase steadily until the Jarillas will become one of the best producing camps in the southwest. George Lynch, deputy United States mineral surveyor, has commenced the survey of the Jarilla group of five claims for the Jarilla Gold and Copper Mining Company at Jarilla preparatory to that company obtaining patents for them. The Philadelphia company, is just completing a large structure to be used as a boarding and bunk house and office at Jarilla. They are also running an incline to the south from the bottom of their 60-foot shaft, and have encountered very good ore. The Kelly brothers, who recently purchased leases and property from Christ, Yaeger at Jarilla, loaded and shipped two cars of ore at the switch at the Lucky mine. They have ordered building machinery for their properties, and it will soon be in place, and by October 1 they will be shipping on an average of one car per day from the Jarilla mine. Work is being pushed rapidly on the Monarch mine at Jarilla, and it will soon be down to the 150-foot level, which will place the company in a position by the last of the month to ship one car daily from the property. There is also a good deal of work being done at the north end of the Jarillas, where Charles O'Neill and his associates are operating. A great many applications for patents to property in the Jarilla district will be made this fall and winter."

## SIERRA COUNTY.

The Blackie mine at Kingston has been leased. It is said that the ore last shipped from the May mine at Chloride netted the owners a little more than \$125 a ton after deducting freight and smelter charges. Chris Rugsesser is opening up his new mine on the great eastern at Chloride. The ore is copper grade and carbonate, and the solid mineral varies from 6 to 8 inches in width. ## AMONG STOCKMEN.

**A New Gold Pan.**

A new gold pan is said to have been tried with good results in some of the placer fields of northern New Mexico. The pan has an open bottom beneath which is a catch basin to receive the gold. The pan and catch basin both rotate on a spindle, the power being applied by a geared crank motion. The whole machine is to be set in water and centrifugal force is used to separate the gold from the sand. The pan is revolved by the same appliance, imparting a centrifugal motion to the pan, which speedsily catches the gold. The pan is revolved by the same appliance, imparting a centrifugal motion to the pan, which speedsily catches the gold.

JOHN S. CLARK, Chairman.

We favor home rule for early admission to statehood of the territories of New Mexico, Arizona and Oklahoma.—National Republican Platform.

"No imperial designs lurk in the American mind. They are alien to American sentiment, thought and purpose. Our priceless principles undergo no change under a tropical sun. They go with the flag."—Speech of William McKinley.

The Democrats in Arizona have had such a row that there are now two Democratic candidates nominated for delegate to congress. This will probably insure a Republican delegate to congress from Arizona, which will be a great aid in securing statehood for the territory.

The experiments of the government at the marine hospital at Fort Stanton in Lincoln county, have been such a success that now \$30,000 will be expended in remodeling the buildings and making the hospital a permanent place for the cure of consumption. This is a great testimonial to the efficacy of New Mexico climate in curing incipient consumption and in staying the progress of the disease in more advanced cases.

A dispatch from San Diego, Cal., says that the Rock Island Railroad company has a corps of surveyors in Arizona, and that the railroad is heading for San Diego by way of New Mexico and Arizona. This in connection with the fact that the Rock Island company has made a survey through New Mexico from Clayton to White Oaks seems to indicate that the proposed line will be built, and that a large portion of New Mexico without direct railroad facilities will receive that great boon in the near future.

The fact that the New Mexico Military Institute, the New Mexico School of Mines and other institutions of higher learning in the territory are overcrowded is a wholesome sign and proof that no mistake was made when the territory founded these institutions. They are bound to grow in importance and efficiency with years and will add to the influence and prosperity of New Mexico. The legislators should now also pay as much attention to the public school system as they have to the colleges which are proving such a success, and New Mexico will then take its rank among the leaders in education and culture.

Governor Roosevelt in his letter of acceptance of the nomination for the vice presidency sets forth in a very clear manner the reasons why not only Republicans but all other good citizens should vote for the re-election of President McKinley. His re-election should be assured beyond a doubt for the nation's prosperity, and the honor of the American flag demand it. As Governor Roosevelt says: "The success of the party representing the principles embodied in the Kansas City platform

would bring about the destruction of all the conditions necessary to the continuance of our prosperity. It would also unsettle our whole governmental system and would therefore disarrange all the vast and delicate machinery of our complex industrial life."

## Sulzer and the Boers.

The Boer war, while it has nothing to do with the political affairs of the United States, has been dragged into the campaign by the Bryanites as an argument why President McKinley should not be re-elected. Nothing more ridiculous could be imagined, and it is evident that it is very coarse bait with which to catch the vote of a few foreign born citizens. Congressman Sulzer is the leader in this movement to make political capital of affairs that transpired in the Transvaal, 11,000 miles away. His insincerity, however, is demonstrated by the fact that of the money entrusted to him for the relief of Boer families, it seems that none has been expended thus far for the purpose that the donors intended.

Dr. W. A. Croft, himself a rampant Boer sympathizer and anti-expansionist, investigated the matter. He succeeded in securing a report which showed that, after the expense of the grand opera house meeting had been paid and a few incidentals liquidated, the sum of \$18 and a few odd cents remained for the Boer widows and orphans.

It was under the cover of "incidentals" the richness was found. Under this head railway fares, hotel bills and livery bills for Taunman politicians were paid.

But the greatest of all were the wine bills. It is no wonder that the \$1,800 subscription was made to melt so rapidly. When a Taunman statesman undertakes to quench his thirst for liquor something is bound to give way, and in this particular case it was the fund for the widows and orphans of the Boer soldiers that vanished.

According to the report of the auditing committee, the Washington reception to the Boer delegates was a disgraceful debacle and the gentlemen who traveled in good faith from South Africa to the capital were imposed upon in the most shameful manner.

Dr. Croft is an ardent supporter of Colonel Bryan, but he denounces the conduct of the Democratic politicians in the most emphatic language.

Up to the present time the \$18 and few odd cents remain in the hands of the treasurer of the committee, subject to the order of Mr. Sulzer. After this shall have been disposed of another incident in Democratic sympathy for down-trodden humanity may be considered as closed.

## The Fathers and Expansion.

The Bryanites delight to quote the founders of the republic and the men who sat in the presidential chair before the civil war. While such quotations have little weight when applied to the political affairs of today, they are always torn from their contexts and the fact is hidden that the men who are quoted from really were expansionists and believed in the coming greatness of the republic. They were not trimmers nor small statesmen who would have confined the United States within its original boundaries. George Washington urged the acquisition of Canada. Alexander Hamilton said: "We ought to look to the possession of Florida and Louisiana." Thomas Jefferson declared for an extensive empire and self-government; as well as the acquisition of Cuba." Andrew Jackson said: "Never cede any land or boundary of the republic but always add to it, thus extending freedom." James Buchanan, the last of the Democratic presidents before the war, made the remark: "Expansion is the future policy of our country and only cowardly fear and oppose it." Douglas, the great opponent of Lincoln, gave his views as follows: "As far as our interests and destiny require additional territory I am in for it." Even Benjamin Franklin advocated the acquisition of Canada. Thus quotations might be multiplied, all in favor of expansion, but after all, what did those who long dead know of the conditions which confront the country today? Great as those men were they could not in their wildest fancy have foreseen the greatness of the republic nor political and international conditions as they exist today. The United States is heaving out for itself a new destiny and it is only small politicians and the willfully blind who cannot comprehend the opportunities within the grasp of the nation at the present time.

## Could Be Produced At Home.

The United States imports annually about \$400,000,000 worth of agricultural products. Brazil is the greatest importer into this country as far as agricultural products are concerned. This is accounted for by the large amount of coffee that is brought to the United States from that country. Many of these agricultural products could be produced in the United States and in New Mexico especially. From Great Britain, for instance, this nation annually takes \$12,000,000 worth of wool and \$5,000,000 worth of hides. Germany sends \$13,000,000 worth of sugar and Cuba ships \$30,000,000 worth of that product to this country. Germany sends \$2,000,000 worth of hides and over a million dollars' worth of wine. France sends \$1,000,000 worth of wine and \$2,500,000 worth of hides. Then there are other products which can also be raised in New Mexico, such as fruits, nuts, live stock, hay and vegetable fibres, amounting in all to over \$30,000,000 worth of products which are now imported but which could be raised in the southwest. It is therefore not the lack of a good market which stands in the way of the future development of the agricultural and stock resources of New Mexico.

## The Bonded Debt of Santa Fe County.

It is now more than a year since, at a public meeting called for that purpose, the board of county commissioners appointed a committee of ten prominent citizens and taxpayers, to ascertain the exact amount of the bonded debt of Santa Fe county, and report to the board their recommendations, as to what should be done with reference thereto. That committee performed their arduous labors in a most satisfactory manner, and reported that there were outstanding bonded obligations of the county to the amount of nearly \$1,000,000, or to be exact \$914,393.74, while the amount of property, real and personal, in the county was \$1,753,527, and that the total taxes for 1899 were 49.52 mills. The majority of the committee reported to the board of county commissioners, that under these circumstances, it was impossible for the county to attempt to pay more than 25 per cent of bonds, the present rate being six. Two members of the committee agreed in the report except as to the amount to which the indebtedness should be scaled down, which they estimated "as the extreme limit, to offer to compromise upon the basis of the payment of 15 per cent of the present indebtedness, with a reduction of the rate of interest to 4 per cent per annum."

These two reports were made to the board of county commissioners, and on the 30th of November last they adopted the majority report, and the committee of ten was continued with directions to correspond with the bondholders and endeavor to obtain their assent to the proposition. These reports, together with the action of the board of county commissioners thereon, were printed and sent to the holders of the bonds, and there the matter has rested, except that where replies from bondholders have been had, they were to the effect that they could not consent to any compromise, until after their legal status had been ascertained by suits now pending in the courts. Since that time judgments have been obtained by holders of coupons aggregating several thousand dollars, while the two main cases involving about \$300,000 in coupons are pending in the courts. Nothing is gained by the delay in the courts deciding these cases. The result is as certain as that night follows day, that these cases must all be determined against the county, carrying with them costs, and each of the coupons is bearing interest at the rate of 6 per cent per annum, which of itself upon our large amount of indebtedness is no small item.

This is a condition and not a theory that confronts this county, and the sooner official action is taken in determining the pending suits, so that the bondholders may know their status, the better it will be for the county and all the taxpayers. The assessment value of the county for the present year is no larger than it was for 1899, and the rate of taxation is the same, which is the limit at which people can be expected to pay taxes and do business, and the sooner these suits are decided, the better it will be for all concerned. The suit now pending against delinquent taxpayers in the county, brought under the provisions of the Duncan law, should be pushed to a finish as speedily as possible, in order that the worst may be known, and that the county may show a clean record to the holders of bonds, upon an effort that may be made to compromise the same. Delays in these matters are more than usually dangerous, and there is absolutely nothing to be gained by the county or any taxpayer from procrastination.

## POLITICAL SIDE LIGHTS.

Comments of the Leading City Papers on Political Questions.

### NO TIME TO EXPLAIN.

(Chicago Inter Ocean.)  
Mr. Bourke Cockran will also be at a great disadvantage. The campaign will not be long enough to give him a chance to explain why he is for Bryan this time when he was for McKinley last time.

### A DEAD CERTAINTY.

(Kansas City Star.)  
Chairman Jones is so certain of the Democratic victory in November, which he has figured out on the basis of the returns in Vermont and Maine, that there seems to be nothing more for him to do but to his himself in Arizona and out in the rest of the time until the election in fishing and con hunting.

### NOW OR NEVER.

(New York Tribune.)  
We violate no confidence when we announce that, in the coming election, W. J. Bryan will not be a candidate in 1904 of the Democratic party for president. Indeed, it does not require extraordinary prophetic vision to see that it is now or never with the Populist agitators who at present control the party organization. There has been abundant opportunity in the country at large during the years of the present administration, but very little of it has reached as far as the Demo-Populist politicians. Some people wonder when they read of the old hard luck and calamity arguments warned over from 1896 for use in certain quarters this year, but really there is nothing astonishing about it. These have been hard winters for the professional agitators. Bryan, it is true, has been able to get along pretty comfortably on the lecture platform, but that resource, in the nature of things, has not been vouchsafed to many of his followers. So it has gone rather hard with them. For a time they were pretty blue, but recently they have been able to warm themselves a little, and so they have chalked their shrewd fronts, shaved and started in with renewed hope. But if something doesn't come of it this time they won't be fooled again. If Bryan isn't can be "worked" this year it never can be.

## ENCOURAGING INDUSTRIES.

### The Santa Fe Railroad Is Helping Sugar Beet Growers Along Its Line.

The Santa Fe railway is doing all in its power to encourage the production of sugar beets along its line. At the shops at Topeka 100 flat cars of the 75,000 series are being remodeled into sugar beet cars—that is, cars in which to transport the sugar beets from the producers to the sugar factory. These cars are being changed at a cost of about \$50 per car, or about \$5,000 for the 100. When completed they will greatly resemble ballast cars, judging from the outside appearance, but will be considerably larger. Each car will have six doors on either side, and these will be fastened with hinges at the top on a rod running the entire length of the car. When the car has been run into the unloading shed all that will be necessary to do will be to turn the lever holding the doors open and they will open outward and the beets will roll out and down an inclined plane into the bins for their storage. The planing mill has been busy about the planing of the wood for the work for the cars, and will finish the remodeling in a few days. The material is being piled in the car sheds, and it will only require a short time to finish the remodeling. Work has been begun on the construction of a plant for the manufacture of beet sugar in Rocky Ford. The cost of the plant will be \$150,000. Although it will be operated by a company, it is rumored that the Santa Fe railroad is furnishing the money for the erection of the plant. The plan of raising sugar beets for the manufacture of sugar will undoubtedly meet with great success. In Nebraska and other places where it has been tried it has proved to be a paying scheme.

## Advice of a Druggist

"It is proper, I think, to let others know about the popular and virtues of Acker's English Remedy for Coughs, Colds and Consumption. From the moment I began handling it, its sale kept growing all the time as fast as people found out what a remarkable preparation it is. The satisfaction it gives is universal. One of our best citizens use it and say it is the best thing for throat and lung troubles they ever saw. Mr. S. H. Culver, one of our prominent townsmen, says Acker's English Remedy is the only medicine that helped his chronic cough of many years' standing. At first it gave relief, and now, after taking a few bottles, he is well cured. I buy it by the gross at a time, and my sales are larger on this one medicine than on any other in my store. It is a great pleasure for me to feel that I am prospering in my store, and I am also doing so much good to the community in selling such a grand medicine." (Signed R. R. Douglas, Westfield, N. Y.)  
Sold at 25c, 50c, and \$1 a bottle, throughout the United States, Canada, and in England, at 1s. 3d., 2s. 6d., and 4s. 6d. If you are not satisfied after buying, return the bottle to your druggist, and get your money back.  
We authorize the above guarantee.

#### A NEW SAFETY MATCH.

A match has at last been discovered which can be manufactured absolutely without the aid of phosphorus. This safety match contains neither red nor yellow phosphorus nor a compound of phosphorus, but possesses the great advantage of being able to be manufactured with the plant and machinery hitherto in use. Invention still strides onward through every line, and yet there are some things which seem imperious to improvement. For instance, Hostetter's Stomach Bitters, that famous medicine, has stood unequalled for fifty years as a corrective of stomach disorders. Imitations have sprung up about it, but like a beacon light, it has stood immovable, pointing the way to health from all such ailments as constipation, indigestion, dyspepsia, biliousness, sluggish liver or weak kidneys.

Were you counted in the census report, do you suppose?  
(Guess not.) My husband had the conversation with the enumerator, and I'm never in it when she talks.

The emergency bags sent by a church society to Kansas soldiers in the Philippines contained among the necessities a box of DeWitt's Witch Hazel Salve, the well known cure for piles, injuries and skin diseases. **Moah's Nationality.**  
What do you think of this new talk that Noah was a Chinaman?

It was with mingled emotions that the arctic explorer beheld a relief expedition standing up the bay.  
To whom do you propose bringing relief? asked the explorer civilly.  
To the public, replied the expedition, with an insulting laugh.  
Suiting the action to the word they beat about and left the explorer to death.

A cheap remedy for coughs and colds is all right, but you want something that will relieve and cure the more severe and dangerous results of throat and lung troubles. What shall you do? Go to a warmer and more regular climate? Yes, if possible; if not possible for you, then in either case take the only remedy that has been introduced in all civilized countries with success in severe throat and lung troubles, "Boecher's German Syrup." It not only heals and stimulates the tissues to destroy the germ disease, but allays inflammation, causes easy expectoration, gives a good night's rest, and cures the patient. Try one bottle. "I suffered for thirty years with diarrhoea and thought I was past being cured," says John S. Hallway, of French Camp, Miss. "I had spent so much time and money and suffered so much that I had given up all hopes of recovery. I was so feeble from the effects of the diarrhoea that I could do no kind of labor, could not even travel, but by accident I was permitted to find a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, and after taking several bottles I am entirely cured of that trouble. I am so pleased with the result that I am anxious that it be in reach of all who suffer as I have." For sale by A. C. Ireland.

I noticed that you never took your eyes off him when he has been out to the theater last night.

#### Some women don't know what it is to sleep well.

In dreams they are haunted by the pains they bore through the day. There is no rest and no refreshment for them even in sleep. This condition is one feature of many consequent upon forms of disease peculiar to women. The head aches often, or there are spells of dizziness or faintness, there is pain in the back or side, with bearing down pains. These are but symptoms of womanly disorders. Let the cause be removed and the pains will pass, and sleep will bring only dreams of happiness and love.

The most effective remedy for diseases of women is Dr. Pierce's Favorite Prescription. It dries up the debilitating drains, heals inflammation and ulceration and entirely cures female weakness. Each letter is treated as a sacred confidence. Every answer is sent in a plain envelope without any printing upon it. Write without fear and without fee.  
"I want to praise your medicine," writes Mrs. Sarah J. Barney, of Cresco, Pa. "I have been sick for twenty years and have been almost in bed five years, and now I am able to work all day. I have taken eight bottles of 'Favorite Prescription' and four of Golden Medical Discovery, and one of 'Pellets.' I praise your medicine to all. I had the headache but it is gone. My throat is well and cough gone and all my old troubles are better. I tried many other kinds of medicine and four doctors."  
Doctor Pierce's Pleasant Pellets help Nature to help you.

**Accurate.**  
Mrs. Kinnard—George, how many drinks did you take down town to-night?

**QUESTION ANSWERED.**  
Yes, August Flower still has the largest sale of any medicine in the civilized world. Your mothers' and grandmothers' never thought of using anything else for indigestion or biliousness. Doctors were scarce, and they seldom heard of appendicitis, nervous prostration or heart failure, etc. They used August Flower to clean out the system and stop fermentation of indigested food, regulate the action of the liver, stimulate the nervous and organic action of the system, and that is all they took when feeling dull and bad with headaches and other aches. You only need a few doses of Green's August Flower, in liquid form, to make you satisfied there is nothing serious the matter with you. For sale by Ireland's Pharmacy.

"Oh what a beautiful water lily!"  
No sooner had the maiden uttered these words than Archie Skeax resolutely waded out after it.

It was still yards away from him, and in deeper mud.  
"Fools rush in," he muttered savagely to himself, as he turned and began slopping his way back to shore, "where angels have too darned much sense to tread!"—Chicago Tribune.

Dobbs—What kind—fiction?  
His business is to write articles extolling the super qualities of Bisoup's baking powder. You will have to classify it for yourself.  
If it's the kind of baking powder that my wife used in her biscuits, then his work is fiction.

## THE "FLYER."

The Equipment of the Train Will Be New Throughout.

It is officially announced from headquarters in Chicago that the necessary arrangements are now almost completed for the reinstatement of the limited trains on the Santa Fe road from Chicago to San Francisco. The first train will leave Chicago on the 7th of November and return on the 14th. The service is to be daily from the start, and the run is to be made in a fraction over three days. Although the result attending the running of the limited trains in the past was most gratifying to the Santa Fe management, there will be disappointment if the business during the coming winter does not exceed that of any previous year. The passenger men feel certain that it will, as the San Francisco liner undoubtedly proves an important factor. The equipment of each of the limited trains will be new from the engine to the observation car. New engines, diners, composite cars and Pullmans are now being built, and the Santa Fe limited trains will rival the finest trains of the eastern roads. The service will be arranged so that the trip to the three California terminals, Los Angeles, San Diego and San Francisco will be continuous without a transfer of any kind.

The city council should do something towards the repair of the sidewalks on Palace avenue along the Spiegelberg and Breeden properties. They are in bad condition and in places dangerous. The sidewalks along Washington avenue on the property also owned by Spiegelberg should be looked after. If anything is in worse condition than the Palace avenue sidewalk. This is a chance for the city council to do some good. Whether they will or not remains to be seen.

## REPUBLICAN SUCCESS ASSURED.

O. H. Elmdorff Tells of Political Impressions He Received in His Travels.  
C. H. Elmdorff, of Lincoln, Neb., who is well known in this city and territory arrived Sunday evening from the east and speaks very encouragingly of eastern conditions.

To a reporter of the New Mexican he said: "During my absence I have visited in several of the larger cities in New York, in Minnesota, in Illinois and in Nebraska. The general opinion is that Mr. McKinley will be elected. Moneyed men are anxious for his election, as they feel that if by any chance Mr. Bryan should become president, serious results would follow. In New York Mr. Roosevelt is bringing strength to the Republican ticket, the Democrats are divided, and the feeling is bitter among the Croker and Hill factions. There is little doubt but what the entire Republican ticket will be elected in New York state, and many believe that Mr. Croker has traded the state of New York at this election with the promise that he shall carry the Greater New York election next year. In Nebraska many Populists and all the sound money Democrats will vote for McKinley. The state is prosperous, and the state central committee feel quite sanguine of carrying both the national ticket and the legislature for the Republican party, the latter is quite essential as Nebraska elects two United States senators this year.

"In the state of Illinois the feeling is strong for McKinley. This is especially so outside of Chicago. It is feared that Mr. Bryan will carry the labor element in Chicago, but this will not be sufficient to offset the large Republican majority throughout the state. In Minnesota while Governor Lind has been renominated and will likely be re-elected, the state will almost certainly give a majority for McKinley.

# WINE OF CARDUI

Woman's  
Crowning Virtue.

BURTON, Mo., July 27.  
For years I suffered terrible pains every month and my doctor told me I could not be cured except by an operation. I felt I could not submit to that and was so despondent I had given up all hope of a cure. My husband insisted on my trying Wine of Cardui and at last I did try it. Last month I did not have a pain, and did all my work, which I had not done in seven years.

MRS. MINNIE LITTLE.

Wine of Cardui

Modesty is the crowning virtue of American women. It is the trait that all mankind admires. A modest woman is the most pleasing of all created things. Because of this becoming virtue thousands of women prefer to suffer untold miseries rather than confide their troubles to a physician, and to even think of submitting to an examination is revolting. They can't get their own consent to an operation. Wine of Cardui permits sensitive women to retain their modesty. With it they can cure female troubles in the quiet of their own rooms. If special treatment is required they can write to the Advisory Department of the Chattanooga Medicine Co., and their letters will be promptly answered by women trained in the cure of womanly weaknesses and irregularities. There should be no hesitation. Delayed treatment means a chronic condition. The longer postponed the harder to cure.

A LARGE BOTTLE OF WINE OF CARDUI COSTS \$1.00 AT THE DRUG STORE.
