Subject: NSF Graduate Fellowships Available at OSU (fwd)
Date: Fri, 28 Oct 1994 16:30:33 -0700 (PDT)

Please notify any of your colleagues or students who may be interested in the following opportunity:

=====

GRADUATE FELLOWSHIPS IN LANDSCAPE STUDIES

Five NSF fellowships available at the Masters or Ph.D. level at Oregon State University in spatio-temporal analysis of ecological and physical systems at landscape to regional scales. Interdisciplinary research areas include forest ecology, hydrology/geomorphology, geographical information systems, remote sensing, spatial statistics and modelling. Minorities are encouraged to apply.

Interested students should submit a letter describing their specific interest in this program in addition to their application to one of the following departments: Forest Science, Forest Resources, or Geosciences at OSU. Application deadline is 2-1-95. For further information, contact the Faculty Advisory Committee, NSF Graduate Traineeship Program, Department of Forest Science, Oregon State University, Corvallis OR 97331, 503-737-2244.

CPR-LTER Graduate Student Fellowships

The Central Plains Experimental Range LTER will offer up to a maximum of two graduate student fellowships annually for research conducted at the site. Fellowships are available to M.S. and Ph.D. students from other sites who would like to extend or apply their thesis research to the shortgrass steppe ecosystem. Priority will be given to students currently working at a long term site. Fellowships in the amount of \$3500/year will be awarded to each successful applicant. The award can be used for travel, stipend, housing, and research costs.

The application should consist of: (1) a short (<5 page double-spaced) proposal describing the proposed research and its application to the shortgrass steppe; (2) a list of expected products and publications from the work; (3) an itemized budget and budget explanation; and (4) a letter of support from the thesis advisor. Individuals receiving fellowships will be required to provide the CPR-LTER with a copy of all data, reprints of publications resulting from the research, and a copy of the thesis or dissertation. Individuals will also be expected to acknowledge CPR-LTER support in all publications resulting from the work.

Applications are due February 1 of each year, and applicants will be notified by March 1. Applicants are encouraged to collaborate with CPR scientists as part of the research, although this is not required. General information about the CPR-LTER can be found in the LTER Network publication describing the research sites.

For more specific information and to submit an application, contact Debra Coffin, Department of Rangeland Ecosystem Science and Natural Resource Ecology Lab., Colorado State University, Fort Collins, Colorado 80523 (dcoffin@lternet.edu).

Graduate Student Fellowships

Stephanie -

At the Coweeta meeting Josh, Caroline and Mike Allen and I discussed my interest in establishing a set of fellowships to encourage cross-site research at HFR by graduate students working at other sites. Mike strongly urged that I distribute an announcement to all PIs and Grad students, etc. Attached, I have written such an announcement. Would you please help me by distributing it to PIs, the Grad students and any others that you feel might benefit. I assume that the PI list goes to the NSFers like Mike. Thanks.

LTER Cross-site Graduate Student Fellowships

In an effort to promote cross-site studies and graduate student research within the LTER program the Harvard Forest (HFR) will offer three (3) graduate student fellowships annually beginning in 1995. Fellowships will be offered to students from other sites who wish to work at HFR on aspects of their thesis research. Although collaboration with HFR LTER scientists is desirable, investigations of processes or phenomena not currently studied at HFR are strongly encouraged. Fellowships for a maximum of \$3,500 will be made on a one-time basis to an individual and can be applied towards travel, stipend, housing and research costs. The application proposal should include a description of: the thesis project, research to be conducted at HFR, data management, plans for the use of the data in publications or proposals, an itemized budget and budget description, and a letter of support from an adviser or faculty sponsor. The proposal deadline is February 1 and decisions will be made by March 1. Individuals receiving fellowships will be required to provide HFR with copies of all data and all publications, including the original thesis. Prospective applicants should refer to the LTER Network description of the Harvard Forest and send inquiries for additional information to David Foster, Harvard Forest, Petersham, MA 01366. (dfoster@lternet.edu).

Re: LTER Cross-site studies

At the Cedar Creek LTER meeting I was asked to review the proposal by Bryan and Christina for studies on sulfate retention in soils, as a possible candidate for support by the graduate fellowship program for cross-site research at the Harvard Forest.

From conversations with Bryan, Alison Magill and Jana Compton I understand that this is an interesting study that should directly benefit research at Coweeta, Hubbard Brook and Harvard Forest and will enhance cross-site synthesis. Consequently, if Bryan and Christina would proceed with a direct application to the Harvard Forest program, we would be pleased to support the effort.

To: Stephanie Martin
LTER Network Office

From: David Foster

The grad students passed on the proposal from Bryan Dail and Christina Wright and asked that we consider funding it, as the NET is over subscribed with proposals. It looks fine, and if its OK with your process I would send out the attached letter.

Please advise.

Stephanie -

Since I wrote this I believe that you ermailed that the proposals were distributed for review. My basic message is that we can fund Bryan's proposal from HF funds, if that would help. Please let me know.

David

Subject: Grad Student Awards
Date: Mon, 29 Apr 1996 09:08:30 -0600 (MDT)

Reed and I talked briefly at the CC meeting and I agreed to outline a procedure for the role of the Grad Comm. cochairs and Network Office in the Graduate Student proposal competition. Here are my suggestions. Let me know if this is ok and we will make it policy.

Also, Josh has agreed to help in this effort and since he is in Seattle, he will be in a position to help the staff there.

Task:	Responsible:
Notify PIs and Net Office of pending competition	Chair(s) of Grad Comm.
Collect proposals and circulate to Exec.	Josh and Net Office
Notify awardees, Pis and Office of awards	Josh or LTER Chair
Provide info on amount and appropriate use of funds. Explain that they are travel expenses only and distributed on a reimbursement basis. This information should be incorporated into the announcement of opportunity.	Chair(s) of Grad Comm.
Contact Net Office about process for obtaining travel reimbursements & send Net Office a copy of the awarded budget proposal for expenditure documentation	Awardee
Monitor budget and submit to Adrienne at the Network Office the necessary documentation for reimbursement	Awardee
Process travel reimbursements	Net Office
Report on the research done via the Newsletter and/or Web page	Chair(s) Grad. Comm.
