

Construction Technology Program Review

Presented by Alexa Wheeler

May 3, 2018

On May 3, 2018, Alexa Wheeler, Chair of the BTFA Division at UNM Valencia, presented a program review for the AAS degree in Construction Technology. This program has had declining enrollment, and so a restructure or sunseting might be in order. Hank Vigil has requested to meet to discuss possible ways to preserve this program. Alexa and Dean Musselwhite will meet with Hank over the summer. Since action is still pending, no scoring of the program review was done.

Comments

- Why has there been a decline in enrollment? Would tying the program to local industry needs help?
- Unless there is a clear plan to rebuild with realistic outcomes, we should sunset.
- Would like to see it grow, but no plan as of yet; it is worth keeping.
- Re-create it as a certificate program and cater to local needs.
