

Committee and Dean Comments for CADT APR 2017-2018

All areas of the APR were completed successfully. No further information is necessary. This program will likely undergo a restructuring over the next academic year. Comments were:

- Do a restructure of the program to make classes better align with main campus. Borrow model from CNM to create a transfer agreement to the school of architecture at main. (Do they have their undergraduate accreditation back?)
- Declining enrollment
- UNM Architecture 2+2 agreement. Once established, some elements of CADT classes would become a part of architecture classes.
- Could some elements align with Mechanical Engineering at main?
- Old assessment report used. A new one would need updated course numbers.
