BIMONTHLY BULLETIN OF THE HEALTH SCIENCES LIBRARY AND INFORMATICS CENTER

From HSLIC's Executive Director

Here are some recent facts about HSLIC:

- During each of the 4,725 hours HSLIC is open annually, 40 people walk through our doors, and our electronic resources are accessed 222 times each hour, 24x7x365.
- HSLIC faculty members taught 25 credit courses in FY15.
- During FY15, more than 6,300 people attended HSLIC classes and tours.
- Over the past year, HSLIC faculty were funded on nine extramurally funded grant/contract awards.
- During the past year, we offered two training sessions per month in New Mexico communities and visited seven different counties.
- Over the past 10 years, we've increased electronic journal titles by almost 73 percent, now licensing 2,438. Also, in the past two years alone, we've increased electronic book titles threefold; we now license 7,994 titles.
- Almost 20 percent of our collection budget is spent through consortium partnerships with other higher-education institutions, thus leveraging state dollars.
- HSLIC celebrated its 50th anniversary this past year.

Holly Shipp Buchanan, MLn, MBA, EdD, FMLA, AHIP
Executive Director, HSLIC
Professor, UNM School of Medicine

Construction to begin soon on 46-seat classroom

Robyn Gleasner, HSLIC's Library Operations Manager, is shown "shifting," or moving books in the library. She served as the project lead for the 4th-floor shifting project and scheduled team members to complete the shift, which will make room for a new classroom.

Over the next few weeks, the fourth floor will be the least quiet spot in the library as a construction crew builds a 46-seat classroom.

The classroom, which will be located just outside the Administration offices in the northwest corner of the building, should be available for HSC classes and meetings this coming spring.

(Continued on p. 2)

Construction to begin soon on 46-seat classroom *(Continued from p. 1)*

To make room for the classroom, HSLIC shifted all of the books on the 4th floor to free up eight book ranges for collapsing and removal. Media have been moved from the 4th floor to the 2nd floor by the Reference section. There is no longer a separate atlas section; these items have been integrated into the 4th-floor book collection by call number. Also on the 4th floor is a new oversized-books section where we shelve items that do not fit on the regular shelves. Abstracts and indexes have been moved to the Annex. All of these location changes are reflected in the online catalog.

Construction will begin over the Winter Break. The entire UNM campus will be closed from Wednesday, December 23rd, through Sunday, January 3rd. The spring semester begins on Monday, January 18th.

Springer Protocols to be available in January

Karen McElfresh, MSLS, AHIP — Resource Management Librarian

HSLIC will be acquiring a subscription to Springer Protocols, effective January 2016. Springer Protocols is an online database of laboratory protocols in the biomedical and life sciences and includes the popular series Methods in Molecular Biology. The collection also includes protocols in bioinformatics, neuroscience and pharmacology. HSLIC’s subscription will include access to all protocols in the series, dating back to 1980. Once our subscription starts, you can access Springer Protocols from the library’s home page (<http://hslc.unm.edu>). Click on the Database tab in the search box, then on the “S,” then on the “Springer Protocols” link. If you have questions about this resource, please contact Karen McElfresh, Resource Management Librarian, at KMcfresh@salud.unm.edu.

Steve Stockdale makes data governance presentation at conference

Steve Stockdale, HSLIC’s Deputy Director for Operations, made a presentation on the topic of data governance at the New Mexico Technology in Education (NMTIE) conference on Nov. 20th. His 50-minute session was titled “Data Governance Deconstructed.”

Steve explained that as terms like “big data” and “eScience” become more commonplace, more organizations are embracing the mantra that data are their second most valuable asset (after people, of course). For that reason, data governance, in practice, is really about managing the behaviors of people, not bits. His overview provided attendees a starting point from which to define their own data governance initiatives.

“The topic resonated well with those in attendance,” Steve said, “and there was agreement that data governance should not be an IT function.” After the NMTIE conference, he presented a summary of recommendations for an HSC Data Governance policy at an HSC IT Advisory Council meeting in December.

Gale Hannigan to serve on statewide initiative

Gale Hannigan, PhD, MPH, AHIP, will serve on the Statewide Library Conference Committee of the New Mexico Library Foundation. The organization is sponsoring a statewide library assessment designed to gather information about all types of libraries in New Mexico. Data and analysis resulting from the assessment will be used to create a statewide conference on libraries and will serve as the beginning of a movement to promote and initiate a national conference on libraries. The state conference will be held in Albuquerque prior to the 2016 New Mexico Library Association Annual Conference. Committee Chair Marian Royal Vigil says the conference will “shed light on the needs of our libraries and rebrand libraries as institutions vital to the well-being of our citizens and our economy.”

Jon Eldredge wins two School of Medicine teaching awards

On Oct. 19, Jon Eldredge, PhD, AHIP, was presented with two Educational Excellence Awards for the 2014–15 academic year — the Biomedical Research Education Program Award and the Residency/Fellowship Award.

In this photo, Dr. Eldredge is shown with UNM School of Medicine Executive Dean Martha McGrew, MD, and Associate Dean for Undergraduate Medical Education Paul McGuire, PhD.

While presenting Dr. Eldredge with the Biomedical Sciences Graduate Program award, Deborah Helitzer, ScD, HSC Associate Vice Chancellor of Research Education, said, “Dr. Eldredge has proven himself to be an invaluable asset to the students in the BSGP’s Master of Science in Clinical Research (MSCR) program, which trains medical residents and junior medical faculty in translational research methods. One graduate of the MSCR, who is now a faculty member and director of research in her clinical department, describes Dr. Eldredge as ‘truly a master of instilling the urge in students to become lifelong learners,’ and she said he is ‘an asset to students, residents, fellows and faculty.’”

Monica Rogers wins professional development award

Monica Rogers recently received a professional development award from the National Network of Libraries of Medicine, South Central Region. This competitive award enabled Monica to attend an educational workshop at the Association of Academic Health Sciences Libraries (AAHSL) conference in Baltimore, Md. The event included invited speakers and panels on topics such as user experiences; innovative use and design of library spaces; technology, including 3D printing and other “maker space” examples and their applications within libraries; and user services.

Roundtable discussions included the above topics, as well as a discussion on AAHSL activities, the leadership fellows program and potential future collaborations. Participants shared what their institutions are doing to innovate and incorporate new technologies and service designs. The networking function of the conference featured a private tour of the University of Maryland Baltimore, Health Sciences and Human Services Library, and its Innovation Space, which has multiple 3D printers, 3D scanners, and DNA and molecular models. *(See more about Monica on page 4.)*

Movin' in/movin' up

Monica Rogers, MSLIS, joined HSLIC in September as the Division Head for Reference & User Support Services (RUSS). She manages the Service Point, overseeing Tier 1 IT support, the IT call center, and circulation and library services, including interlibrary loan and document delivery. She also supervises and supports HSLIC's team of faculty reference librarians.

Previously, Monica was the Health Information Literacy Coordinator for the National Network of Libraries of Medicine, MidContinental Region, at Creighton University in Omaha, Nebr. In that role, she did outreach with community-based organizations, was the lead author of the national Bringing Health Information to the Community blog (nnlm.gov/bhic), exhibited and presented at conferences and held in-person and online training sessions.

She grew up in Bishop Hill, Ill., a state historic site with approximately 125 residents. She moved to Albuquerque to accept "the exciting opportunity to be the RUSS Division Head."

Monica's Master of Arts in Information Science/Learning Technologies, Library Science, is from the University of Missouri, and she holds a bachelor of arts in sociology from the University of Illinois. In 2011, she received a Consumer Health Information Specialization from the Medical Library Association.

When she is not working, Monica enjoys playing computer and video games, listening to music and baking. She owns more than 500 vinyl records!
