## MISS SHEPHERD WINS BEAUTY CONTEST

**Popularity Contest Won by Miss MacArthur; Miss Cameron Runs Close Race.**

Following several weeks of active campaigning and keen rivalry, the annual Beauty and Popularity contest conducted by the Mirage, came to a whirlwind finish. Miss Elizabeth Shepherd, popular candidate of Kappa Kappa Gamma, was an easy winner in her division, being elected the most beautiful girl in the University, by a large margin over her closest competitor. It will be remembered by a number of students that Miss Shepherd was chosen last year as the most beautiful girl in the city of Roswell by the Corps of Cadets of the New Mexico Military Institute.

Results in the Popularity Contest were much closer, and up until the last few days it was difficult to pick a possible winner as the votes were fairly evenly divided among the five contestants. The final count of the ballots proved Miss Helen MacArthur, also of Kappa Kappa Gamma, the popular choice of the student body. Miss MacArthur won by a fairly narrow margin over Miss Dorothy Cameron, the Alpha Delta Pi candidate. The respective standing of the various nominees clearly demonstrates their popularity, as there was but a small margin between the votes cast for each.

As has been the custom for a number of years, a full page in the year book will be devoted to the winner of each contest.

Three photographs of Miss Shepherd and Miss MacArthur will be taken by the Walton Studio. The young ladies will be photographed in various costumes and charming poses, and the best three in both cases will be sent to Denver, where cuts will be made for the Mirage.

The results of the "Vanity Fair" contest were very satisfactory from both respects, as the winners were chosen by the popular vote of the student body, and a fairly large number of the year books were contracted for. More than half of the students purchased a copy and cast a vote in the contest, and the remaining half have expressed their intentions of buying as soon as the books are off the press. The Managerial staff of the Mirage intends to conduct an active campaign for subscriptions again soon, among those who have not yet made the initial deposit.

## SIGMA CHI FIRST TO WIN SCHOLARSHIP CUP

With an average of 81.7 per cent, the Sigma Chi fraternity won the first leg on the Scholarship Trophy purchased by the inter-fraternity council of the University. Alpha Delta and Pi Kappa Alpha tied for second place with 80.75 per cent each.

The award is made at the close of each semester, three wins by one organization entitling it to permanent possession. This cup is now in possession of Sigma Chi.

## PROF. CAREY ENTERS JOURNALISTIC FIELD

Professor Carey has recently accepted the editorship of a radio column for the Sunday edition of the Albuquerque Evening Herald. The items appear under the caption: RADIO NEWS, NEWS, AND COMMENTS and are of news-technical character. Professor Carey's action marks the gratifying appearance of another faculty member into the eye of the public.

## TRACKSTERS BRAVE SPRINGTIME GALES

**Cinder Path Aspirants Practice Daily; Crying Need for Distance Men Only Drawback to Balanced Team.**

With the advent of the traditional Spring breezes common to the territory of the Rio Grande, the cinder-path artists of the University have unlimbered their spiked slippers and are romping around the oval under the stentorian commands of the Lobo mentor, Coach Johnson. Not more than a dozen candidates have reported for practice to date, but a number of other tracksters are expected to materialize in the near future.

From last year's team, Hale and Dow remain to take care of the sprints, while Ogle Jones is expected to show well in both the furlong dash and the quarter mile. White and Elder, with Dow, will present a formidable jumping force, and Elder has a record in the pole vault which will cause the rest of the Varsity men to work hard to better. Harrington is also a strong contender for honors in field events, having made the team at the Colorado School of Mines in his Freshman year.

Distance material is lacking, and Coach Johnson is calling for men with or without experience to run the mile and the half. It is expected, however, that a well-balanced combination will represent the Red and Gray when they meet Arizona on the Tiger's field in Tucson, May 7th. This meet is the only inter-collegiate contest scheduled to date, but if any opportunities arise, the Varsity will be taken to compete in other meets.

New cinders are being spread on the track, and the pits are being put in prime shape. A series of meets among the team is contemplated by the coach.

## FRESHMEN MEET TO PLAN DANCE FOR APRIL FIRST

**Attendance to be Restricted Largely to 1925 Class Members**

At 12:30 on Wednesday, March 15, the Freshman Class met in Rodey Hall and perfected plans for the annual Freshman dance.

In view of the majority of girls in the class there was considerable dissension to the motion that upper classmen be excluded from attending, finally a compromise was effected without any casualties. It was agreed that all Freshman boys should ask Freshman girls, and the girls not having dates by March 27, should present their name and that of choice for the evening among the upper classmen for approval by the committee. The names of both parties "keeping company" for the hop must be submitted to the committee by March 27; the committee approves, collects the charges, and then O. K.'s the invitation required for admittance.

One committee of seven was appointed to select the hall, programs, invitations, provender, drinks, and to plan a suitable program of events in keeping with the nature of the occasion. The committee convened immediately after the class meeting Wednesday and started the wheels of accomplishment whirling in a manner that bids fair to result in the best, most exclusive, and all-satisfying disturbance of the season.

President Reeves appointed the following to serve in making preparations for the affair: Roy Hickman, Pat Miller, Elizabeth Shepherd, Frances Andrews, Bob Elder, Gerry Tully, and Frank Reeves.

## Horgan Wins Student Body Presidency Over Bryan by Small Margin of Votes

**Final Count of 108-82 Gives Office to Varsity Cheer-Leader, Who Has Taken Part in Many Undergraduate Activities; Stinnett, Prominent Coyote, Chosen Vice-President.**

**BERNHARDT, NELSON AND STOWELL ATHLETIC COUNCIL MEMBERS.**

## ENGINEERS' HOLIDAY IS SUCCESSFUL EVENT

The College of Engineering held open house in the afternoon and evening of Friday, March 17, in accordance with the annual custom of celebrating Saint Patrick's Day and acquainting the other colleges and the public with some of the works of the engineering department. Members of the classes entertained and demonstrated various operations of interest and the entire enrollment of the department and the faculty acted as hosts. It is estimated that over two hundred visitors inspected the electrical laboratory, the weather bureau, the chemistry building, the pumping station, Hadly hall and the science building.

The Science building of the Electrical Engineering Department was appropriately decorated. Upon entering, the visitor was confronted by a number of warning signs such as "Leave Your Cold Outside," "Do Not Monkey With Machines Which You Know Nothing About," and "Let Your Light Shine." Kenneth Wilkenson escorted the visitors over the first lap of the display, explaining the details of the "bucking broncho," a reversing motor of unique action. The office and engineer's library was next visited; after which the shop, where pieces of machinery are made, assembled and repaired, and where radio equipment on display was inspected. After answering numerous questions and explaining the use of the Korber Wireless Station, Wilkenson turned the visitors over to Cullen Pierce, who elucidated upon the mysteries of frying eggs on ice—a demonstration he immensely enjoyed, judging from the liberal accumulation of eggs with which his corrugating countenance was festooned. He also explained the rehabilitation of the defective motor taken from the campus well, pointing out that the principal reason for the cause of previous pump trouble was due to the excessive loss of RI Sq. better known as loss of horse power. After showing the uses of a number of interesting meters and instrument boards, Pierce referred the company to Fat Greenleaf, who spoke to the visitors on the vast improvement of the modern incandescent light bulb, and the principles of the electric furnace—ending with the justification of lack of energy by stating that "laziness is the mother of invention." But he then dispelled first impressions, and those formed by his previous statements and actions, by quickly and skillfully constructing a practical motor out of an ordinary tin can. Next followed an illustration of two ways of keeping one's money moving—one way was with the use of the clickers, another by spinning a dollar, which, through some electrical influence, continued to spin indefinitely, neither falling heads or tails. Greenleaf then tendered his charges to Mr. Furch, who renewed his youth by roping and herding the visitors through the intricacies of the electrical measurement rooms, explaining and demonstrating the uses of the various apparatus employed in ascertaining the degree of electrical units.

Edward Horgan, better known to the student body as Macgoogin, doctor of cheer leading, was elected to the presidency of the Associated Students of the University, defeating his contestant, George Bryan, by a popular vote of 108 to 82. Horgan was chosen to succeed Frank Neher, the retiring president.

Horgan's executive ability has been proven in many cases on the campus and his quality as an impromptu speaker has been demonstrated many times in assembly. His popularity with the student body in general is manifested by the vote cast in his favor. His qualifications are such as to enable him to accept this position of trust with confidence in himself and in the support he will receive from the student body as a whole.

Marion Stinnett, letter man and ardent worker for the University, was elected to the vice-presidency over Miss Emma Gerhardt by a vote of 103 to 84. Mr. Stinnett is well qualified in co-operation with Mr. Horgan, as he has always taken an active part in student affairs. The office of secretary and treasurer went to Miss Hazel Morris unanimously as she was the only candidate for that position.

With Eddie Mapea withdrawing from school the remaining candidates for the seats on the Athletic council were left without opponents and the choice was unanimous. The students chosen for these positions were, Clifford Bernhardt, football letter man, Miss Helen Nelson, and Miss Helen Stowell. These members will occupy seats in the council with members of the faculty.

Mary Sands was the only contestant for the unexpired term of vice president. Her election was unanimous.

The outcome of this election was apparently satisfactory to all concerned, and was conspicuously free from politics, which have played such a part in the previous elections. The candidates were put up by the students and elected by them without any electioneering on the candidates' part. This fact should be an infallible criterion for the popularity of the new officers.

Tellers in the election were Frank C. Ogg, Ralph Hernandez, R. W. Honewell, and Thos. V. Calkins. Frank Neher, president of the student body presided, and Helen Nelson acted as secretary.

## FLU GETS NUMBER OF VICTIMS ON CAMPUS

Has the "Flu" flown? This is a serious question that is now being discussed by different members of the student body as they witness the recuperation of the various victims.

The epidemic, although comparatively light, has caused many absences during the past three weeks, and a slacking up of work.

The sickness has not been confined to students only. Coach Johnson, Dr. Coan, Professor Feasel, Dr. Hubbel, have been confined to their beds from the effects of this disease, but all are now able to attend classes except Professor Feasel.

The only serious effects noticed so far is the increased size of the ineligible list.

who desire to do anything along these lines should join the Society as soon as possible in order to begin work for the coming year. The meeting has been called by George Bryan, who was last year manager of debate.

cable runners, etc., in various designs and have an unlimited supply. They also are carrying an excellent grade of fraternity stationery engraved with crests of the various fraternal organizations on the Hill and, best of all, they have two kodaks which they will loan free-

low the example shown in older universities by making contributions, giving prize awards, and loan funds to the University.

During the past year the following were noted:

The gift of \$1,500 by citizens for the grandstand, \$600 of which was

### TIMES MUST HAVE CHANGED

Campus rumors have it that the use of the word "hell" by one of the members of the cast of "THE WONDER HAT" during the course of the play, has met with some disapproval.

Hell, as we understand it, is referred to the Bible as the place of correction in the hereafter. It is also used by adults now and then as a means of frightening children. Our old friend Dante made himself quite a reputation, in fact a good reputation, by playing hell up to its limit. As far as we know there is no recognized authority that constitutes "hell" as a profane expression.

Just a couple of years ago the boys used to say to each other, "Is everybody happy?" And the answer was, "Hell yes!"

It was considered good form then, and a first class method of keeping up the morale.

### AMENDMENT TO THE CONSTITUTION OF THE ASSOCIATED STUDENTS OF THE STATE UNIVERSITY OF NEW MEXICO

The Mirage and The U. N. M. Weekly

Section 1. Candidates for positions on the Editorial staff.

The Editors in Chief of both of the publications shall issue at the first of each Semester a call for candidates to compete for staff positions, and from the candidates presenting themselves the Editors in Chief of the above publications shall

We have just received a new assortment of Pipes, including Dunhill, B&B, French Briars, Italian Briars, Congo, and many others.

choose those proving themselves most competent, basing their judgments on the quality of the work and the column inches turned in, and the Editors in Chief of both publications shall present to the Student Council their nominations for election. Members of the Staff, once elected, shall not be removed during their attendance at the University except for neglect of duty or gross incompetency or ineligible according to the standards of the University.

The privilege of competition shall be withheld from no student qualified under the Constitution of the Associated Students of the State, University of New Mexico.

Sec. 2. The choice of an Editor in Chief.

The Editors in Chief of these publications shall be nominated to the Student Council each year by the unanimous vote of the entire membership of the respective Staffs. An Alternate Editor shall also be nominated in the same way, it being understood that the Alternate Editor shall serve only in case the Editor in Chief shall sever his own connection with the University or be legally disqualified.

In case decisions cannot be reached by the respective Staffs, a list of the candidates shall be submitted by the Editor in Chief to the Student Council, which shall choose from these candidates an Editor in Chief and an Alternate Editor.

Sec. 3. Managerial Positions. The Managers of these two publications shall call for candidates in the same manner as the Editors call for their candidates, and from these candidates shall choose their assistants. The new Manager shall be nominated to the Student Council each year by the retiring Manager from among his assistants, on the basis of performance. Upon nominating his choice, with the knowledge and consent of his managerial staff, he shall present to the Student Council a statement setting forth the merits of his candidate. The Manager must be elected by the Student Council of the University of New Mexico upon nomination by the retiring Manager.

Sec. 4. Sections 1, 2, and 3, above are to be substituted for Article V, Section 1, of the Constitution of the Associated Students, which Article and Section is hereby repealed and the succeeding two Sections are to be numbered 4, and 5.

In answer to the question put by Miss Jack Jackson, in the Steam Roller Edition, i. e., "Do you know the boy who wears B. V. D's?"

We are forced to reply,  
"No. Do you?"

We sincerely appreciate the little cartoon on the first page of the Steam Roller Edition. We take it that it would suggest that the Steam Roller furnish the Gas.

COURT LOVE SONG

When Peggy gives me one sweet smile  
It sets my heart a-flutter;  
But when she gives me two sweet smiles  
My blood is churned to butter.

And when she rests her eyes on me  
Soft, like the pleading faun's,  
'Tis then I swell my chest with pride  
'Til in size it equals jaws.

But when I try to claim a kiss,  
Like lovers will, in fun,  
I get a slap upon the cheek  
That makes the butter run.

ALAS! HELEN!

Oh, Helen, with your Titian hair,  
What spirit in you thwarts me  
When my timid soul exhorts me  
To adore you standing there?

Your heart is squeezed by some grim hand  
Which leaves you void of feeling  
Else my tender gaze, appealing,

Your Messenger Phone is \$60.

And hope within me dies.

OH YOU!

HADLEY HALL

The original Hadley Hall was erected in 1899 as a gift from Mrs. Walter C. Hadley. It was a building of the Pueblo style of architecture and stood southeast of the administration building. But disaster overtook this building, and it was completely destroyed by fire on May 23, 1910. The Science Building which stands just east of the Dining Hall was erected in its place and held sway over the College of Engineering until January, 1920, when the present magnificent Engineering Building was completed.

This new building which is also named Hadley Hall, houses the Wood shop, the Machine shop, the C. E. Department, the Drawing Room, and the Department of Mathematics.

The Wood-shop is a modern and up to date department in practically every respect, it having more than sufficient work benches for present needs, four lathes which are electrically driven, and a power saw.

The Machine Shop is also quite modern. There are over ten engine lathes, a forge with complete equipment, a cement testing apparatus, milling machine, grinder, drill press, power saw and in addition, several gas and steam engines for experimentation. In these quarters is located the blue-printing room, which was built this year by Dean Eyre. It is a novel arrangement showing the ingenuity of its design.

The Civil Engineering Department is not to be slighted. It is well equipped, most of the instruments being new and all of them modern. It will be well worth anyone's time to give this department a complete inspection.

Taken as a whole and considered from all angles, Hadley Hall is one of the finest and best equipped buildings on the campus. It is the home of the Knights of St. Patrick and has the offices of the Dean of Engineering and the Department of Mathematics within its walls.

Again the handiwork of Dean Eyre looms imposingly over the entrance to this building and one cannot help but note, on entering, the beautiful bronze plate, erected as a memorial to one of the University's best friends.

CHEMISTRY DEPARTMENT

In the past few years, the Chemistry Department of the State University of New Mexico has made rapid growth. Each succeeding year shows a marked increase in the number of students taking advanced work.

Ostrawing its cramped quarters several years ago in the old Science Hall, the department now occupies a massive white structure of the Pueblo Indian style, situated west of the dormitories. The distinctive features of the Chemistry Bldg. is its open air laboratory, or patio—the only open air laboratory of its kind. In this patio are concrete tables equipped with gas and running water for the precipitation of sulfides and experiments on poisonous gases which are objectionable when performed indoors under the hood.

The laboratories are spacious, airy, and well lighted and are equipped with modern appliances for research as well as for general chemistry. A special feature of the laboratory is its well designed balance room. Balances are mounted on massive concrete tables to eliminate vibration. The slight temperature variation of this room, absence of drafts, and good lighting, insure greater than usual precision in weighing.

The Chemistry Department will be open for the Engineers' Show, and it will be one of the interesting features. Mr. Georges, one of the Chemical Engineers, will conduct visitors thru the building.

Money talks, but there would not be so many financial scandals if it stuttered more.

A dozen photographs will solve a dozen puzzling gift problems. Make an appointment today.

"THERE ARE NONE BETTER"

PI K. A. AWARDED TROPHY FOR CAGE TOURNAMENT

Last Friday, Dean Clark, chairman of the Athletic Council, announced the award of the Interfraternity basketball trophy to the Pi Kappa Alpha Fraternity, who came through the cage season with only one defeat, administered by Sigma Chi who finished second.

Dean Clark's presentation speech was a model of brevity, and for the benefit of all others who may be called upon for a similar duty, we reproduce it here:

"There was a basketball tournament. Pi Kappa Alpha won the tournament. Here is the cup, which I present to the president of the fraternity."

A Gloomy Report

"Dad, can you sign your name with your eyes shut?"  
"Certainly."  
"Well, then shut your eyes and sign my report card."

Some lawyers are so energetic they perform a double duty. They get into congress and the State legislatures and help make laws, and then aid their clients to evade them.

Mrs. Mix: It's a woman's privilege to change her mind.  
Mr. Mix: Yes, but the trouble is she always gets such small change for it.

## SARA REYNOLDS HALL IS SCENE OF BIG BANQUET

**Patrons of University Are Guests  
at Repast Prepared by  
Co-Eds.**

The Home Economics Department of the University entertained the people who have made donations to the welfare of the University with a banquet in Sara Reynolds Hall last Wednesday noon.

Among those present was C. T. French who gave five hundred dollars in Liberty Bonds, the interest on which is to be used in purchasing a medal for the engineering student who makes the highest average during the school year; Colonel George Breece who has made several liberal contributions; Mr. Kaseman, who was instrumental in completing the construction of the wireless station and several others.

Dr. and Mrs. Hill and the Deans of the University were also present.

## U. MERMAIDS FROLIC IN Y. SWIMMING POOL

(By Patric the Heeler.)

According to Phatric the Heeler, official inspector and special correspondent to the U. N. M. Weekly, the swim-fest held at the Y. aquarium came off with a triumphant splash.

Attention was first directed to the pool by violent tremors which shook the entire building. The disturbance was first attributed to the high wind velocity, but personal investigation disclosed it to be the initial swan-dive of Ruth Zimmerman. There is some dispute, however, for the correspondent was—at the time—only within ear-shot. It is also said that it was but the first contact of Lizzy Shepherd's dome on the pool floor.

Although strictly co-ed, the party was well attended and according to the best form—and a good time was had by all!

## EDUCATIONAL PICTURE SHOWN IN RODTY HALL

On the evening of Friday, March 17, a number of students and faculty members gathered in Rodey Hall to view the Industrial movie presented under the auspices of the J. C. Baldridge Lumber Company.

The film, which was of educational character, depicted the manufacture of terra cotta and its myriad forms and uses. A number of unique photographic effects were achieved in tints, half-tones, and silhouettes.

The occasion was highly appreciated by those present and it was voted a decided success by all concerned.

## PROMINENT ENGINEERS VISIT CAMPUS FRIDAY

Mr. Hogland, now with the Centurn Electric Company, graduate of the State College of Agriculture and Mechanical Arts at Las Cruces, and members of last year's debating team representing that institution, was on the campus last Friday morning and afternoon. Mr. Hogland spent the day looking over the grounds, inspecting the plants of the College of Engineering during their Saint Patrick's Day Open House, and visiting with his many friends of the faculty and student body, among whom were his opponents in the debates of last year, Kenneth Wilkenson and Cullen Pierce.

## HONOR DAY AND PRIZES

Annual Honor Day Exercises were inaugurated during Commencement of 1921, and will be repeated at succeeding Commencements. Annually on the occasion of HONOR DAY, the President of the State University and the president of the Associated Students, in the presence of the students and friends, announce in Rodey Hall the names of those students who are entitled to certificates of excellence or prizes for achievement. The honors bestowed by the Faculty are awarded by the President of the University, and honors bestowed by the Student Body are announced by the President of the Associated Students. The occasion is one of interest to the students and their relatives and friends.

## University Honors and Prizes

**The C. T. French Medal for  
Scholarship Katherine Mather Simms Prize  
in English**

A friend of the University, Mr. Chester T. French of Albuquerque, during the spring of 1921, notified President Hill of his willingness to establish a permanent fund, the proceeds of which might be used perpetually as a prize to stimulate scholarship. Mr. French accordingly gave \$500 in Liberty bonds for this purpose. The C. T. French Medal for Scholarship will be awarded annually by the President of the State University to the student who meets these conditions:

(1) He or she shall have obtained during the year the highest general average for scholarship in a regular course of not less than 15 hours, leading to the Bachelor's degree, during a residence of not less than one full academic year.

(2) Only Juniors and Seniors in residence will be eligible in competition for the C. T. French Medal, and the medal can be awarded to the same person but once.

Another friend of the University, Mr. Albert Simms, during the summer of 1921, gave \$250 in Liberty bonds, the interest of which will be paid in cash to that student who in the opinion of a Faculty Committee and the President of the University has excelled in English Composition. The prize is named for Mrs. Katherine Mather Simms, a great-granddaughter of an early president of Harvard.
