TRACK SEASON OPENS SATURDAY

Engineers vs. A. P. S.

The first track meet of the season will be held Saturday afternoon on the Varsity field between the Engineers and A. P. S. students. Quite a number of track men have been working faithfully the past month in spite of inclement weather and some good form has been developed. As this is the first meet of the season Coach Johnson will have his first opportunity of picking his teams for representing the University at meets with other schools. The meet tomorrow afternoon should be very interesting and a large turnout of students and others will be expected.

The schedule for the track season is at present in a disrupted condition and can not be announced at this time, the meet with the University of Arizona having been canceled by Arizona. However, we have been invited by the Rocky Mountain Conference to send a team for a meet at Boulder on the twenty-first of this month.

In certain respects the Varsity has the best material for a track team this year that it has had in years. In the dashes we have Bill Hale, "Kid" Dow, Louie Gerpheide and Miller. For the jumps we have Louie Gerpheide, "Blanco" White and Forraker. Hayes, Forraker and Benny Gerpheide will run in the quarter, Arthur Brown, Hugh Graham, Dean Wait and Bernhardt in the half mile and Brown and Heacock in the mile.

John Pope Hayes, Ralph Miller and "Blanco" are showing up good in the pole vault. In the hurdles Dow, Calkins and "Blanco" have been working out. Benny Gerpheide is in a class by himself in the javelin throw, and has no competition. Greenleaf, Pierce, Witten and "Blanco" are practicing in the weight events.

The following men are doing their first year in college athletics but are practically all record men in high school: Hale, Dow, Cooper, Wait and Benny Gerpheide. These men have shown very good form in practice and may give us some surprises when thrown into real competition.

This year we have no outside games scheduled in baseball but will probably play all of the local teams, among which have been mentioned the following: U. S. Indian School, Menaul School, the Greys and the A. Q.'s.

GIFTS TO THE UNIVERSITY LIBRARY

Among the recent gifts to the library, the following may be mentioned especially:

Journal of the care for cripples, and other publications of the Red Cross institute for crippled and disabled men.

Nineteen volumes of fiction from the Albuquerque Public Library. Galsworthy's "Amotley" and "The Inn of Tranquility," given by Edith Wetmore.

Forty volumes, including March's Thesaurus of the English language and a complete set of the New Nature Library, were presented to the library by Buck Conner at the time of his recent visit here.

Dr. Hill has also given fifteen of his own publications, which have been added to the library.

The ever popular Faculty Women's Sextette opened the exercises at assembly last Friday with two well rendered songs, "The Morning Wind" and "An Irish Love Song."

"Bish" and "Skinny" appeared in the Elk's Minstrels this week.

ANNUAL PROMENADE SATURDAY NIGHT

Juniors Honor Seniors.

Everything is in readiness for the premier event on the University of N. M. social calendar—the Junior Promenade, which is to be held tomorrow evening at the Masonic Temple.

The annual prom is given by the Junior class in honor of the graduating Seniors.

Dancing will be the main order of the evening and will be held in the ballroom from 8:30 to 12 o'clock. The grand march will begin at 9 o'clock and will be led by Governor and Mrs. Duckworth.

The patrons and patronesses for the occasion will be Governor and Mrs. Duckworth, Dr. and Mrs. J. A. Reidy, Mr. and Mrs. T. F. Keleher, Jr., Mr. and Mrs. Neil B. Field, Dr. and Mrs. John D. Clark, Dr. and Mrs. M. K. Wylder, Mr. and Mrs. Guy Rogers, Mr. and Mrs. O. A. Matson, Mr. and Mrs. Lawrence Lee, Mr. and Mrs. A. A. Sedillo, Mr. and Mrs. Tom Hughes, Mr. and Mrs. Pierce Rodey, Mr. and Mrs. Jack Reynolds, Mr. and Mrs. H. B. Henning and Mrs. W. W. Connell.

The Junior committee in charge are Blanche Guley, Robert Hopewell, Norman Mayne, Mary Sands and Helen Lindsey.

DR. GEKLER TALKS ON TUBERCULOSIS

Its Prevention and Treatment.

At the regular assembly last Friday morning Dr. W. A. Gekler, an eminent tuberculosis specialist from the Albuquerque Sanatorium, gave a most interesting and instructive lecture upon the prevention and treatment of the widespread and universal disease, tuberculosis.

Speaking at length, Dr. Gekler said that in order to enable us to intelligently and successfully combat this dread disease, we must first know what tuberculosis is and what the factors are which tend to produce it.

Tuberculosis is an infectious disease and is transmitted from person to person, from human beings to animals or vice versa. However, the animal factor is small, the chief source of contagion being from another person who is afflicted. The germs are carried in the excreta, the most prolific source being the sputum.

Infection is almost universal and it has been found that about 90 percent of the people in the world have had or now have tuberculosis in some form. Though the disease may affect any part of the body, ninety-

SENIORS OF '21 VOTE CLASS MEMORIAL

To Re-establish Former Custom.

At the regular weekly Senior meeting Monday, the 1921 Senior class voted unanimously in favor of re-establishing the custom practiced by graduating classes of leaving behind them, as a present to the University, a class memorial.

In former years this custom was adhered to rather diligently and each out-going class presented to the University some memorial. A few can still be seen about the campus. The cement bench donated by the class of 1905 is appreciated by all. The old drinking fountain, until it was neglected, furnished a very pretty spot for the campus, as well as a useful and refreshing addition to the campus. It was the memorial of the class of 1907. The fish pond, that delightful and amusing place where we all are found frequently passing a few minutes' time, is a gift of the class of 1906, and the sun dial was a gift of the class of 1904.

The class of 1908 gave the corner stone to Rodey Hall and various pictures and other memorials were given.

One of the greatest wrongs of the University was the demolishing of an old pump given by one of the classes.

In re-establishing this custom it is hoped by the present graduating class that following classes will carry on the good work from year to year.

Our University is yet comparatively young and has not the background of traditions that older institutions have, but these things soon become traditions and foster the real alma mater feeling that makes us always remember our college days with tenderness.

Just what the memorial will be, is to be decided at the next meeting. Lack of funds and fewness in number of the class causes regret that more can not be expended for this year's gift.

The committee in charge of the memorial is Grace Petersen, Clair Fetzer and Dorothy Crawford.

INTERCOLLEGIATE ACTIVITIES TO BE REPORTED BY RADIO

The Electrical Engineering Department of the University of Colorado has asked the Electrical Engineering Department here if they would be interested in sending and receiving reports of intercollegiate activities, etc., by radio telegraph and telephone. The University as yet has no wireless outfit but it is expected that we shall have one in the near future and thus will be able to get a quick and accurate report of activities in the different schools as well as the news of the day.

When it is recalled that the first successful transmission of speech over the telephone between two distant points just forty-five years ago on the tenth of last month is well within the memory of men not yet old and that its inventor is still in robust health at seventy-three, the development of the art through its various stages to the present day transmission of speech without wires reveals the dramatic side in the advance of scientific achievement.

What the future holds for the radio telephone is beyond our vision, but it is certain that the popularizing of its use will bring the science of electricity into the home and into the general education just as the phonograph and the player piano and the printing press have stimulated a wider love for musical art and for the romance, poetry and history of good literature.

Y. W. C. A. BONFIRE.

Among the many unique gatherings of the Y. W. C. A., one of the most interesting was the big bonfire held back of the women's dormitory. This meeting was for the purpose of getting together and enjoying a pleasant hour. Miss Katherine Dearing favored the group with a vocal solo, "When Honey Sings an Old Time Song." Miss Francis Rogers very appropriately gave the Camp Fire Girls' Chant, "Burn, Fire, Burn." A feature dance, "The Goofe Dance," was danced by (she doesn't want her name mentioned).

After the program the girls sat around the fire, toasting marshmallows, singing songs to the accom-

CANDY SALE.

The candy sale planned by the Y. W. C. A. proved to be a success from every point of view. A total of \$27.00 was made from the sale. Part of this money will be sent to the National Y. W. C. A.; part will be used to begin a fund to send a representative to the Y. W. C. A. Conference at Estes Park in June.

paniment of several ukeleles and banjos.

It is rumored that a mysterious young lady (?) was a visitor and that chuckles from several members of the sex that is not the least bit curious were heard from the direction of the swimming pool.

lines should be made as soon as possible in order to begin work for the coming year. The meeting has been called by George Bryan, who was last year manager of debate.

signs and have an unlimited supply. They also are carrying an excellent grade of fraternity stationery engraved with crests of the various fraternal organizations on the Hill and, best of all, they have two kodaks which they will loan—free—

versities by making contributions, giving prize awards, and loan funds to the University.

LOCALS

Helen MacArthur spent the latter part of last week with friends at San Ysidro.

Mary Wood is about again after a week's illness.

Tom Calkins spent last week-end with his brother at Barton, N. M.

Brooksie has not been attending classes on account of hay-fever.

Paul Mosley, Alpha Delta, who was a student here several years ago, has been visiting on the Hill. He intends to return to school here next year.

Four carloads of Varsity students motored to Isleta Sunday evening to see an Indian dance. Alfred Masten reports that a Ford is liable to do some funny dances, too, when it hits sand.

Mary Sands has been spending the week at her home in Las Vegas.

ENGINEERS VISIT SANTA FE SHOPS

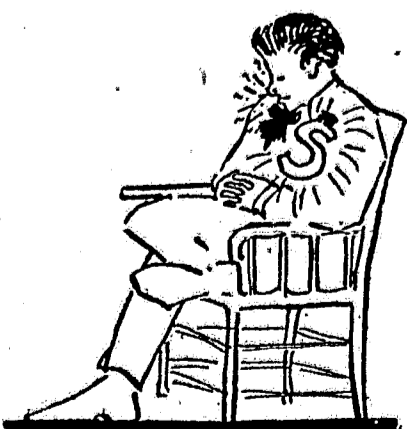

Friday of last week Prof. Daugherty and a number of engineering students visited the Santa Fe shops. The new machine shops and fire station under construction were inspected and a trip was taken through the shops and roundhouse. Messrs. W. M. Holm and H. E. Rehm, construction engineers for the Santa Fe, courteously conducted the party through the shops, pointing out interesting features.

THE FROSH HOP.

Much to the Sophomore's regret the Frosh Hop was pulled last Saturday night and proved a great success. There were the usual whisperings, secret meetings, etc., before the dance and the Freshmen felt sure that nary a Sophomore knew where the dance was to be held—but it seems they did. It seems that the Odd Fellows' Hall—it's no secret now—was tastefully decorated with American Beauties and lilacs which gave off a delicious odor, as one Freshman expressed it, and that the refreshments served beggared description.

Mr. and Mrs. Hessler kindly consented to chaperon the affair and of course the irrepressible Miss Mosher was there bringing with her Johnnie Fernstrom, a Sophomore, who was treated very decently—considering. Miss Mosher mixed agreeably with the young crowd and seemed to particularly enjoy dancing with Dick Angle, a dashing Don Juan of the Freshmen class. Two Sophomores came to pay their respects during the evening, but were politely told to "vamos" by the detective who guarded the only entrance to the building. A few alarms of approaching Sophomores seemed to add a little excitement to the party and caused a general rush to the door, but all of them proved false.

Everybody present expressed themselves as having a delightful time and the party broke up promptly at eleven-thirty, much to the regret of all.

MR. ROSLINGTON AD-DRESSES FUTURE MANAGERS AND EXECUTIVES

"Learn your mathematics and your English and you can solve any problem and write any paper you wish," said Mr. George Roslington, president of the City Electric Company, when he addressed the A. A. E. Chapter at their regular monthly meeting held last Wednesday night in the Practical Mechanics building. His talk dwelt mainly upon public utilities and their management. It was very interesting and much appreciated by the students who realize that they do not get enough of this subject in their engineering courses.

In concluding, Mr. Roslington presented a banking problem to the members and offered a box of candy as a reward to the first one who could work it. This problem was a very difficult one and came up in one of the city banks several weeks ago, when it was worked by only a very few. The engineers, who are prompt as well as accurate, immediately set to work, and after several minutes of figuring Marshall Wilson came forward with the correct result.

The next and last meeting of this semester will be held jointly with the Albuquerque Chapter at the University some time next month.

This year has not only been one of the most prosperous in the history of the Society but an extremely busy and useful one. Up to the present time it has held seven regular monthly meetings and four special meetings. They are held in the Practical Mechanics building and are open to any person who may be interested. They have been well attended, are marked by much interest and discussion, and have been a great help to those who have attended. At each meeting some prominent Albuquerque citizen has been obtained as a speaker.

The increasing interest in the Chapter's work is indicated by the increase in membership during the year. Of forty-five eligible students the first semester, twenty-nine became members. At present out of fifty-two students in the College of Engineering there are thirty-six members in the Chapter. All the eligible members of the faculty are enthusiastic supporters of the Association. While none of them belong to the Student Chapter, they are members of the City Chapter, and all did their part to urge the students to join. There is every indication that the Chapter will be a permanent organization in the University and not only maintain its present interest but increase its membership. It is causing the students to become thoroughly acquainted with the A. A. E. and to hold its aims and objects in high regard.
